## INTRODUCTION

INTERNATIONAL AEROSPACE ABSTRACTS (IAA) is an abstracting and indexing service covering the world's published literature in the field of aeronautics and space science and technology. IAA is issued semimonthly, on the 1st and 15th of each month.

### Coverage of Published Literature

The following types of publications are covered in IAA:

- Periodicals (including government-sponsored journals) and books.
- Meeting papers and conference proceedings issued by professional societies and academic organizations.
- Translations of journals and journal articles.

### Coverage of Reports ("Unpublished" Literature)

Abstracts and indexes of report literature are issued in SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS (STAR), which is published by the Scientific and Technical Information Division, National Aeronautics and Space Administration.

By special arrangement between NASA and the American Institute of Aeronautics and Astronautics, IAA is issued in coordination with the twice-monthly schedule of STAR, which appears on the 8th and 23rd of each month.

IAA and STAR utilize both identical subject categories and indexes, which are described below.

Thus the two services provide comprehensive access to the national and international unclassified report and published literature of current significance to aerospace science and technology.

### Arrangement of the Semimonthly Issues

IAA is arranged in two major sections:

- (1) Abstracts Section. This section contains complete bibliographic citations with informative abstracts, arranged by appropriate subject categories to facilitate scanning. The subject categories are numbered from 01 to 34, and the scope of each category is outlined in the Table of Contents and again at the beginning of each category in the Abstracts Section. Each abstract is prefixed by the IAA accession number.
- (2) Index Section. Four indexes are contained in this section: Subject, Personal Author, Meeting Paper, and Accession Number. Each index is prefaced by explanatory notes to guide the user to the desired abstract.

### Cumulated Indexes

Cumulated indexes are prepared and issued promptly at the end of each quarter year, with the 4th quarterly being the Annual Index.

Each cumulated index contains the following sections: A—Subject Index, B—Personal Author Index, C—Contract Number Index, D—Meeting Paper Index, and E—Accession Number Index.

### Guide to the Subject Indexes

A GUIDE TO THE SUBJECT INDEXES FOR STAR has been issued by the Scientific and Technical Information Division of NASA. This publication contains an alphabetic listing of the subject headings and cross-references used in both STAR and IAA indexes, which use the same subject terminology.

Subscribers to the IAA Cumulative Indexes may obtain copies of the guide by writing to the AIAA Technical Information Service, 750 Third Avenue, New York, N. Y. 10017.

---

Information regarding SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS and the availability of INTERNATIONAL AEROSPACE ABSTRACTS to organizations having contractual arrangements with NASA may be obtained from the following address:

National Aeronautics and Space Administration  
Scientific and Technical Information Division  
Attention: Code USS-A  
Washington, D. C. 20546

# How to obtain publications abstracted

All publications abstracted are available from the AIAA Technical Information Service.

## LOANS

Individual and Corporate AIAA Members in the United States and Canada, and NASA Centers, may borrow publications without charge. Interlibrary loan privileges are extended to the libraries of government agencies and academic nonprofit institutions in the United States and Canada. The loan period is two weeks, excluding transit time. The borrower pays return postage and insurance.

## PHOTOCOPIES

Documents can be supplied in the form of positive paper copies or negative 35-mm. microfilm.

## MICROFICHE SUBSCRIPTIONS

Documents available on microfiche are identified in INTERNATIONAL AEROSPACE ABSTRACTS by the symbol # following the accession number in the Abstracts Section and in the Report Number and Accession Number Indexes. Microfiche are made in conformity with Federal Microfiche Standards (COSATI) and are 105 x 148.75 mm. (approximately 4 x 6 inches) in size.

Microfiche of documents announced in INTERNATIONAL AEROSPACE ABSTRACTS may be obtained on annual subscription—each subscription covering all IAA-announced documents that are available on microfiche. Approximately 50 per cent of the documents announced each year are available in this manner. Subscriptions are accepted on a current basis, and subscribers will be billed monthly for the actual charges at the rate of \$0.40 per microfiche issued. Individual microfiche continue to be available on a demand basis at \$0.50 each.

## RATES

Positive paper copies	\$0.25 per page
minimum order	\$1.50
Negative 35-mm. microfilm	\$0.20 per frame
minimum order	\$2.50
Microfiche (demand)	\$0.50 per microfiche
Microfiche (subscription)	see above

(Minimum air-mail postage to foreign countries is \$5.00)

*Requests for loans or photocopies may be made by telephone, telegram, TWX, or in person.*

## PLEASE REFER TO THE ACCESSION NUMBER WHEN REQUESTING PUBLICATIONS

NOTE: The AIAA does not sell the publications abstracted, except those issued by the AIAA.

**Address all inquiries and requests to:**

TECHNICAL INFORMATION SERVICE  
AMERICAN INSTITUTE OF AERONAUTICS  
AND ASTRONAUTICS, INC.  
750 Third Avenue, New York, N. Y. 10017

Telephone: 212 TN-7-8300

TWX: 212 867-7265

---

## CROSS REFERENCES

The subject index includes two types of cross references to aid the user of the index in locating the material being sought:

1. "SEE" references (S) direct the user to alternate headings under which material on the subject will be found, for example:

COLUMBIUM  
S NIOBIUM

2. "SEE ALSO" references (SA) refer the user to additional headings in the same subject area, for example:

LUMINESCENCE  
SA ELECTROLUMINESCENCE

The periodicals listed in this section were scanned for material to be announced in *International Aerospace Abstracts* in 1966. The periodicals were received regularly throughout the year in all but a few instances. In the case of titles preceded by an asterisk, only the articles abstracted in *International Aerospace Abstracts* are available. All abstracted articles can be obtained from the AIAA Technical Information Service (see page iv).

LIST OF SUBJECT HEADINGS OF  
PUBLICATIONS

A Notation of Content, rather than the title of the publication, appears under each subject heading; it is listed under several subject headings which provide multiple access to the subject content of each accession. The IAA accession number is located under and to the right of the Notation of Content. It is preceded by numbers identifying the issue and page of International Aerospace Abstracts where the abstract is located.

To illustrate:

Issue Number	Page Number	Accession Number
03	p0360	A66-12345

## A

## A-4 AIRCRAFT

Overrunning clutches in gas turbines, design, performance characteristics and application to A-4D Skyhawk aircraft, UH-2 helicopter and Curtiss-Wright X-19 VTOL drive systems

[ASME PAPER 66-GT-92] 14 p2300 A66-26996  
Braze hydraulic system design and fabrication for Skyhawk A4B aircraft 17 p2849 A66-33098

## A-6 AIRCRAFT

Inertial platform test station for shipboard maintenance and calibration of platform used in A6A and E2A aircraft, examining accelerometer bias and gyro drift tests 21 p3723 A66-38889

## A-7 AIRCRAFT

Automatic flight control system for A-7A featuring high fixed gain dual channels, series servos and control augmentation in addition to normal attitude and path control functions 01 p0098 A66-10007

Contractor-customer responsibilities for Model A-7 aircraft design in firm fixed price environment

[AIAA PAPER 65-758] 03 p0320 A66-12589  
Automatic flight control system for A-7A featuring high fixed gain dual channels, series servos and control augmentation in addition to normal attitude and path control functions 23 p4088 A66-40983

## A STAR

UV color and flux at 2200 and 2600 angstroms measured for A and B stars, using rocketborne

photometers 10 p1602 A66-21096  
Stellar rotation and position of metallic line stars in color magnitude diagram 20 p3649 A66-37328

## A-11

## S ECHO I SATELLITE

## A-12

## S ECHO II SATELLITE

## ABDOMEN

## S DIGESTIVE SYSTEM

## S INTESTINE

## ABERRATION

Aberration of width of linear image

created by skew rays in composite quadrupole lens 02 p0199 A66-11782

Coarse-wire objective grating method applied to determination of coma-magnitude scale distortion and magnitude errors in long-focus refracting

telescope 05 p0678 A66-15090

Lens primary aberration evaluation using Twyman interferometer, developing exact equations for high-order lens defects 06 p0879 A66-16118

Electro-optical attitude and velocity sensors for interplanetary navigation and stellar aberration and Doppler shift measurements 08 p1252 A66-19502

Concentric circular grid method of testing for aberrations in image-forming optical system and comparison with Ronchi test 09 p1403 A66-20515

Sunspot phenomena and observation as affected by image perturbation caused by atmospheric inhomogeneities 11 p1770 A66-22647

Spatial amplitude of field of ideally parallel laser beam focused by optical systems with spherical aberration 12 p1889 A66-23778

Lens aberration correction using Gabor wavefront reconstruction method to produce hologram of spherically aberrated wavefront emerging from lens 13 p2080 A66-25990

Lateral, radial and rotational shearing interferometry 13 p2080 A66-25993

Wavefront shearing prism interferometer applied to testing of chromatic aberration of simple and compound lenses and waveforms characterizing monochromatic aberrations 14 p2291 A66-27319

Spherical aberration correction by grinding concave mirror to generate aspheric contour 15 p2498 A66-28826

Scherzer theorem on aperture aberration extended to monochromatic nonrelativistic system with electrostatic or magnetic quadrupole fields with common planes of optical symmetry 24 p4239 A66-43215

## ABIOTENESIS

## SA BIOGENESIS

Astrophysical observation and experimental results of organic synthesis bearing on abiogenic formation of biochemical compounds formed from simple precursor in aqueous or aqueous ammonia system 02 p0181 A66-11603

Synthesis by electrical discharge of porphine-like substances imply abiogenic possibility under primitive Earth condition 03 p0331 A66-13261

Nucleic acid molecule reproduction discussing probability of life development under favorable environmental circumstances 06 p0952 A66-15915

Hydrocarbons synthesized abiogenically and those found in terrestrial samples, using gas chromatography and mass spectrometry in connection with terrestrial life 12 p1806 A66-24965

Synthesis of constituents of nucleic acid and protein molecule for artificial production of life 14 p2227 A66-26866

Chemical laboratory experiments on origin, chemical components and structural attributes of life 16 p2638 A66-30357

Book on photochemical origin of life 16 p2641 A66-31745  
Origins of prebiological systems and their molecular matrices - Conference, Wakulla Springs, Florida, October 1963 17 p2849 A66-32083

Molecular reproduction and life origin from meteorite and gaseous condensation on metallic ion and silicate dust 17 p2850 A66-32085

Prebiological organic synthesis stages and mechanisms prior to and during formation

of Earth, noting extraterrestrial organic matter 17 p2850 A66-32087

Solar UV synthesis of nucleoside phosphates from terrestrial atmosphere, discussing irradiation of adenine-ribose-phosphoric acid solution 17 p2851 A66-32090

Nucleic acid constituents synthesis from methane-ammonia-water mixture, hydrogen cyanide and formaldehyde in thermal-radiation environment 17 p2851 A66-32091

Porphine-like substances synthesis from irradiated mixture of pyrrole, benzaldehyde, pyridine and zinc acetate 17 p2851 A66-32092

Biosynthesis evolutionary stages projected from present data, considering bacterial evolution 17 p2852 A66-32093

Thermal polycondensation of free amino acids with polyphosphoric acid 17 p2852 A66-32094

Polymerization of nucleotides from ADP, noting separation of polymer particles from solution as coacervate drops and relation to life origin 17 p2852 A66-32097

Origin of life experiments noting hereditary propagation in macromolecules arising after spontaneous chemical evolution but before self-replicative biological evolution 17 p2853 A66-32100

Molecular biology noting hemoglobin and enzyme cytochrome evolution, amino acid code, ribonucleic acid, etc 17 p2853 A66-32101

Simulation of organismic morphology and behavior by synthetic poly-alpha-amino acids 19 p3284 A66-35573

Origin of constituents of nucleic acid and protein molecules, noting biological molecules synthesis under conditions similar to those prevailing in prebiotic Earth, following Oparin-Haldane hypothesis 20 p3507 A66-38029

## ABLATING MATERIAL

## SA PYROLYTIC MATERIAL

Plasma arc tunnel tests show thermochemical heat of ablation of magnesia strongly dependent on stagnation enthalpy [AIAA PAPER 65-641] 01 p0089 A66-10225

Thermochemical interaction between ablation material and environment during manned reentry, using mainly graphite and composite materials [AIAA PAPER 65-642] 01 p0160 A66-10226

Cermet ablatives for thermal shields in fabrication of nozzles and nose cones [SAE PAPER 650767] 01 p0078 A66-10838

Ablation mechanism for impregnated tungsten materials 02 p0303 A66-11552

Gemini ablative heat shield, noting nonmetallic honeycomb reinforcement of insulative char 02 p0294 A66-11639

Charring ablative materials effectiveness in combined convective and radiative heating as reentry shield 03 p0444 A66-12792

Mutual effects of vaporization, combustion and coking processes during material decomposition in high temperature gas flow 03 p0445 A66-12828

Uncertainties in thermophysical properties of char-forming ablatives in intense convective and radiative heat transfer environments and effect on mathematical and physical models [AIAA PAPER 65-639] 03 p0445 A66-13010

Make wire, light pipe and spring wire ablation sensors development for measuring parameters of heat shield materials for reentry vehicles 03 p0372 A66-13257

Heat transfer through porous ceramics and thermally degraded ablation material, discussing conductivity [ASME PAPER 65-HT-46] 05 p0785 A66-14756

Thermodynamic calculations and experimental measurements to illustrate material properties pertinent to ablation process and to suggest refractory

compounds as ablating materials 05 p0706 A66-15472

Hypersonic wake ionization dependence on ablation products, investigating laminar and turbulent flow regions [AIAA PAPER 65-54] 05 p0793 A66-15778

Insulation materials and processes for aerospace and hydrospace applications - SAMPE Symposium, San Francisco, May 1965 06 p0898 A66-16284

Carbon and graphite textiles use as ablative reinforcements for high temperature phenolic resin systems 06 p0899 A66-16285

Materials and fabrication techniques for ablative hardware composite materials engineering 06 p0899 A66-16286

Performance assurance for phenolic resin refractory fabric materials used for insulation and ablative components in rocket propulsion hardware and reentry heat shields 06 p0899 A66-16287

Continuous bias tape wrapping of ablative components 06 p0885 A66-16288

Fabrication characteristics of ablative plastics prepreg reinforced tape for construction of large rocket nozzles 06 p0885 A66-16289

Optimization of reinforced plastics in ablative rocket nozzle and reentry body application, considering compression molding 06 p0885 A66-16290

Thermal response of ablative materials for nozzles and leading edges in terms of specific thermal and mechanical properties 06 p0899 A66-16291

Low density thermal insulation materials, discussing temperature control, ablation efficiency and processing qualities of materials for missile use 06 p0900 A66-16296

Elastomeric silicone for aerospace electric and thermal insulation, discussing properties, application and new developments 06 p0900 A66-16297

Backside wall temperatures of ablative rocket nozzle exposed to hyperthermal environment treated for backside with heat transfer 07 p1151 A66-17584

Char formation in solid rocket nozzle exit cones made from reinforced plastic predicted from corrosion standpoint 07 p1151 A66-17585

Hypersonic aerodynamic stability and drag of ablating and nonablating models of blunt-faced reentry shape [AIAA PAPER 66-61] 07 p1141 A66-17898

Materials for extreme temperature and g loading during suborbital, manned and superorbital reentry 07 p1051 A66-18303

Visible and near UV radiation intensity profiles for ablating Teflon boundary layer in hot subsonic arc-jet flow at one atmosphere [AIAA PAPER 66-56] 07 p0983 A66-18450

Effectiveness of charring ablators strongly influenced by stream enthalpy level and heating rate 08 p1316 A66-18812

Ablation rates, surface temperature, emittances and reradiated fluxes of heat shield materials heated by irradiation [AIAA PAPER 66-44] 08 p1318 A66-19070

Photographic spectra of ablating plastics in thermodynamic environments related to species and temperatures in boundary layers [AIAA PAPER 66-132] 08 p1318 A66-19071

Low temperature chemical vapor-plating process for obtaining pyrolytic titanium diboride filaments for ablative composites 08 p1244 A66-19140

Microwave scattering system for detection of voids in fiberglass-honeycomb ablative materials causing drop in receiver signal strength 09 p1385 A66-20966

Ablative materials for thermal protection and minimum mass transfer of aircraft flying at hypersonic speeds 10 p1620 A66-21404

Performance and operation of one-inch-square plasma accelerator to simulate reentry velocities [AIAA PAPER 66-180] 10 p1519 A66-21430

Fabrication of ablative liners for solid propellant rocket motor nozzles [AIAA PAPER 65-167] 14 p2375 A66-27872

Transient thermoelastic stresses under thermoelastic and sublimation ablation, noting temperature profile 14 p2402 A66-27970

Ablation materials behavior in high shear environment using Teflon, Pyrex, quartz and phenolic Refrasil as specimens 15 p2616 A66-29280

Momentum deposition in wake of reentry vehicle, discussing behavior of complex materials characterized by heat of ablation 15 p2424 A66-29309

Thermal model for performance of cork insulation on Minuteman missile in launch environment [AIAA PAPER 65-117] 16 p2827 A66-30893

Double wall ablative heat shield panels for manned lifting entry vehicles, noting nylon phenolic and elastomeric silicone ablators [AIAA PAPER 66-506] 16 p2822 A66-31496

Aerothermochemical performance of inorganic fiber-reinforced char forming ablative material [AIAA PAPER 66-435] 17 p3035 A66-32756

Char-layer structural integrity limits application of charring-ablator heat-protection materials to advanced ballistic reentry [AIAA PAPER 66-424] 18 p3239 A66-33642

Elastomeric ablative thermal shield material to meet system requirements for lifting reentry vehicles having lift-drag ratio of 0.5 to 1.5 18 p3240 A66-33801

Streak test excellent acceptance technique for assurance of reproducibility of service life for ablative thrust chamber of Mira 150A variable thrust rocket engine [AIAA PAPER 65-608] 19 p3449 A66-35607

Mutual effects of vaporization, combustion and coking processes during material decomposition in high temperature gas flow 19 p3479 A66-36770

Ogive shape produced by ablation experiments with duralumin spheres in wind tunnel and reentry 20 p3491 A66-37406

Seminfinite flow of axisymmetric flow of viscous thermoelectric gas around blunt body with ablation shield, noting magnetic field effect 20 p3611 A66-38108

Engineering method to determine combined effects of entry and combustion heating on total char regression of ablative nozzle as function of distance from exit plane [ASME PAPER 66-MD-72] 21 p3806 A66-38500

SIC role in ablation chemistry, examining experimental results on char-reinforcement reactions 21 p3834 A66-38710

Calculating specific heat and conductivity of ablating specimens exposed to radiant heat fluxes 22 p3998 A66-40032

Heat transfer equation solution for ablating solid, assuming exponential temperature profile with numerical solution on digital computer by Runge-Kutta method 22 p3998 A66-40035

Plastic laminates use for ablation shields, noting importance of heat flow and comparison of thermal screens 22 p3938 A66-40417

Heat of pyrolysis of resin in silica-phenolic ablator determined from combustion calorimetry measurements of heats of formation 23 p4150 A66-41892

Gemini ablative heat shield, noting nonmetallic honeycomb reinforcement of insulative char 24 p4283 A66-42773

Internal thermal behavior of charring cork with reference to heat shield design 24 p4294 A66-42783

## ABLATING NOSE CONE

Heat transfer and melting ablation about decelerating spherical bodies during planetary atmosphere entry [AIAA PAPER 65-132] 02 p0303 A66-11539

Surface modifications of recovered small-scale plastic models after high speed flight used to estimate extent of laminar and turbulent flow over surface related to ablation studies 02 p0303 A66-11560

Combustion and sublimation in aerothermochemical interaction between dissociated air stream and graphite surface in hypersonic laminar viscous flow [AIAA PAPER 65-42] 03 p0444 A66-12797

Ablation measurement using sensor with radioactive dispersions being carried away with char [AIAA PAPER 65-363] 07 p1034 A66-17812

Laminar and turbulent boundary layer flow

in ablating cones in hypervelocity flight [AIAA PAPER 66-27] 07 p1020 A66-17889

Ablation effects on static and dynamic stability of reentry vehicle [AIAA PAPER 66-51] 07 p1141 A66-17896

Ablation effects on transient thermoelasticity in sem infinite elastic solid 14 p2402 A66-27969

PDE of terminal shape of ablating body as function of time derived, noting mass and energy flow, boundary layer thickness, etc 16 p2628 A66-30219

Axial shear vibrations of long hollow cylinder subjected to time-dependent body forces in axial direction 18 p3257 A66-34581

Laminar and turbulent boundary layer flow in ablating cones in hypervelocity flight [AIAA PAPER 66-27] 21 p3723 A66-38686

Temperature and heat resistant properties of fiberglass-reinforced plastic nose cone in supersonic flight 23 p4132 A66-41421

Ablation effects on static and dynamic stability of reentry vehicle [AIAA PAPER 66-51] 24 p4283 A66-42770

## ABLATION

### SA AERODYNAMIC HEATING

Maximum temperature profile in phenolic resin-siliceous fiber heat shields on ICBM and Mercury spacecraft [AIAA PAPER 65-638] 01 p0162 A66-10596

Solid bodies in plane parallel flow of ideal fluid, discussing one-parameter family of ablation bodies with steady shape 04 p0596 A66-13554

Increased heat of ablation and performance of injection cooling by addition of surface active agent [ASME PAPER 65-WA/HT-49] 05 p0792 A66-15660

Quasi-linearization solution of two-component laminar compressible boundary layer with heat transfer on ablating wall [ASME PAPER 65-WA/HT-41] 05 p0792 A66-15667

Asymmetrical ablation cause of persistent roll resonance in nominally symmetrical reentry vehicles [AIAA PAPER 66-49] 08 p1303 A66-18950

Ablation of blunt metallic body near stagnation point solution using integral equations, noting pressure effect 09 p1472 A66-20833

Approximate solution of ablation of reinforced plastic for heat protection 10 p1621 A66-21500

Mars atmospheric composition and laminar convective heating and ablation studied to predict performance of heat protection systems during entry 13 p2208 A66-25274

Ablation of reentry heat shields, discussing fiberglass reinforced phenolic resin, charring, graphite, radiation, etc 14 p2412 A66-27484

Meteor luminosity/ionization ratio dependence on air density found through analysis of ablation rate of meteor 14 p2387 A66-28172

Ablation effects on transient thermoelastic phenomenon 14 p2416 A66-28343

Meteoroid heating, deformation and fragmentation of melted meteoroids, showing not so loose structure in connection with satellite and rocket encounter 15 p2604 A66-30055

Ribbon ablative thermocouples for 3000 to 5000 degree F range 17 p2924 A66-32038

Ablation and viscoelasticity effects on vibratory response of hollow viscoelastic cylinder 18 p3247 A66-33572

Aerodynamic stability of slender cone under ablation effect including pressure distribution measurement, ablation-flow field interaction, flow analysis during oscillation, etc [AIAA PAPER 66-410] 18 p3045 A66-33635

Ablation analysis in cylindrical coordinates for axisymmetrical configuration of wall materials with temperature-dependent properties and nonlinear heat flux conditions at boundaries [AIAA PAPER 66-542] 20 p3680 A66-38034

Insulation surface regression mechanism in rocket motors, examining ablation corrosion and erosion effects 22 p3970 A66-39872

Simulated meteor ablation tests using artificial meteors of gabbro, basalt and steel in ultrahigh enthalpy plasma jet [ICAS PAPER 66-40] 23 p4147 A66-41009

Time lag effect on dynamic stability determined, using wind tunnel tests with 10 degree cone as test body simulating ablation process by gas injection into boundary layer [AIAA PAPER 66-757] 23 p4008 A66-41330

Ablation velocity, rocket motor working conditions and combustion instabilities for hybrid rockets, using solid fuel and liquid or gaseous oxidizer 24 p4261 A66-42695

**ABORT**

Two Project High Water experiments producing optical, ELF, RF, and radar data on ionospheric abort of large water quantities and expansion process 14 p2289 A66-28417

Aborted Atlas-Centaur launch data of environmental conditions and use in engineering design 14 p2395 A66-28446

**ABORT APPARATUS**

Design requirements for LEM, describing stabilization and control elements of abort system 01 p0140 A66-10046

**ABRASION**

Abrasion of circular self-rotating cutters as function of blade path in material being worked 11 p1710 A66-22860

Abrasion of reverse side of cutter effect on thermal state of cutter during sharpening of steel specimens 11 p1710 A66-22861

**ABRASIVE**

SA DIAMOND

SA QUARTZ

Ultrasonic cutting tools abrasive supply system modification for efficiency increase 01 p0078 A66-10653

Structure of microsurface layer of silicon wafers after polishing with polirrit and crocus and thorium, cerium, chromium, aluminum and titanium oxide 07 p1037 A66-17413

Ultrasonic cutting tools abrasive supply system modification for efficiency increase 12 p1885 A66-24013

**ABSORBER**

SA NEUTRON ABSORBER

SA SHOCK ABSORBER

SA SOLAR ABSORBER

SA VIBRATION ABSORBER

Frequency range of more than 60 gc obtained by introducing microwave absorber into last stage of multistage absorber, improving reflection coefficient 05 p0648 A66-15029

**ABSORPTION**

SA ATMOSPHERIC ABSORPTION

SA AURORAL ABSORPTION

SA ELECTROMAGNETIC ABSORPTION

SA ENERGY ABSORPTION

SA IONOSPHERIC ABSORPTION

SA LIGHT ABSORPTION

SA MAGNETIC ABSORPTION

SA MOLECULAR ABSORPTION

SA OPTICAL ABSORPTION

SA PHOTON ABSORPTION

SA POLAR CAP ABSORPTION

SA RADIATION ABSORPTION

SA THERMAL ABSORPTION

SA X-RAY ABSORPTION

Mass transfer potential in colloidal bodies, discussing relation between water content of dispersed substance and amount of moisture that can be absorbed by it 14 p2416 A66-28329

Absorption of solar neutrinos in deuterium 16 p2792 A66-30144

**ABSORPTION BAND**

SA SCHUMANN-RUNGE BAND SYSTEM

Spectral distribution of UV radiation in ozone band reflected from Earth, assuming Rayleigh scattering 01 p0133 A66-10756

Angular and spectral distribution of outgoing radiation in cloudy atmosphere in spectral range beyond absorption band 01 p0133 A66-10757

Silicon and lead sulfide electron paramagnetic resonance spectra, showing gas action and temperature effect on EPR signal amplitude and absorption lines 01 p0124 A66-10765

Electromagnetic wave absorption and cosmic noise absorption measurements useful in radio communication 01 p0072 A66-11101

Linewidth parameters for self-broadening and foreign gas broadening of water line measured, noting temperature dependent result and Zeeman components 03 p0443 A66-12342

Effect of surface state of cadmium sulfide on fundamental absorption edge and fine structure obtained from gaseous phase in inert atmosphere 03 p0407 A66-12405

Optical absorption spectra of transition elements especially ruby, based on crystal field, ligand field and molecular orbital theories 03 p0408 A66-12500

Light intensity in homogeneous turbid medium for unresolved absorption bands calculated from distribution of photon optical paths in absence of absorption, considering atmospheric scattering 04 p0542 A66-14302

Response of D-region absorption of cosmic noise to passage of totality during eclipse of May 30, 1965 recorded in New Zealand 05 p0668 A66-14798

Growth of absorption bands of natural and synthetic calcium fluoride crystals irradiated with protons from cyclotron at Tomsk Institute 05 p0741 A66-15857

Exponential absorption edge of gallium arsenide 05 p0742 A66-15870

Earth radiation field characteristics from radiation transfer equation for plane model of atmosphere for specific region, considering ozone absorption and molecular scattering 06 p0876 A66-16553

Measurement of exciton absorption of gallium selenide at low temperatures in presence of electric field, noting line broadening and no splitting 06 p0929 A66-16942

Correlation between strength of induced optical absorption G band and strength of features in electron spin resonance spectrum in electron irradiated diamonds 06 p0934 A66-17125

Temperature factors and intensities of absorption bands of molecular vibrational spectrum 07 p1082 A66-17531

Band structure of germanium in vicinity of Brillouin zone center 07 p1097 A66-17533

Displacement of absorption band edge into long wave region by phonon-caused damping 07 p1105 A66-18372

Carbon dioxide absorption bands in Mars atmosphere, transmission, function of carbon dioxide amount and effective surface pressure [AIAA PAPER 66-147] 08 p1290 A66-19072

Silicon and lead sulfide electron paramagnetic resonance spectra, showing gas action and temperature effect on EPR signal amplitude and absorption lines 11 p1748 A66-22276

Short wavelength wing of pure rotation emission spectrum of water vapor measured at various temperatures and nearly constant optical depth, calculating mean spectral absorption coefficient 11 p1739 A66-22952

Image converter tube spectrophotometry of zonal variation of methane absorption bands on Jovian disk in near IR region 12 p1944 A66-23504

Edge absorption of indium-doped cadmium in polarized light, noting exchange interaction between current carriers and Fermi level dependence on carrier concentration 12 p1929 A66-24449

Measurement of shift of cesium absorption lines near series edge, obtaining electron elastic scattering cross section at zero energy by extrapolation of shift 12 p1918 A66-24882

Receiver of hydrogen line interferometer at California Institute of Technology 13 p2182 A66-25551

Organic solvents and water classed according to increase in oscillator strength of absorption bands of praseodymium, samarium, neodymium and erbium ions 13 p2168 A66-25948

Pressure effects of argon on fine structure components of first two members of cesium principal series 13 p2135 A66-26263

Pressure effects of helium on fine structure components of first two members of cesium principal series, noting changes in shift curves 13 p2135 A66-26264

Spectral distribution of UV radiation in ozone band reflected from Earth, assuming Rayleigh scattering 14 p2285 A66-27855

Angular and spectral distribution of outgoing radiation in cloudy atmosphere in spectral range beyond absorption band 14 p2285 A66-27856

Light intensity in homogeneous turbid medium for unresolved absorption bands calculated from distribution of photon optical paths in absence of absorption, considering atmospheric scattering 14 p2327 A66-28216

Earth radiation field characteristics from radiation transfer equation for plane model of atmosphere for specific region, considering ozone absorption and molecular scattering 14 p2289 A66-28225

Absorption bands in thin lead films, vacuum prepared, considering general analysis of elements in group IVA of periodic table 14 p2369 A66-28271

Measurement of single line in P branch of carbon dioxide vibro-rotational absorption band using tuned optical maser spectroscopy, noting presence of shifted frequencies 15 p2512 A66-28691

Optical properties and thermal behavior of new absorption bands in oxygen doped silicon irradiated at low temperatures 15 p2564 A66-28874

Monograph on intensity distribution and polarization of scattered radiation in ozone absorption bands at selected levels of terrestrial Rayleigh atmosphere 16 p2698 A66-31226

Spectral composition of direct solar radiation variation with height of Sun and relation between aerosol absorption band and humidity 17 p2994 A66-32857

Uniaxial stress effect on two-phonon lattice absorption bands of silicon 18 p3154 A66-33920

Isotope shifts for zero-phonon absorption lines associated with radiation induced color centers in lithium fluoride single crystals 18 p3154 A66-33921

Absorption lines and bands in scattering and absorbing medium elucidated by study of distribution of photon optical paths in scattering atmosphere 18 p3230 A66-34148

Resonant enhancement of Raman cross section for phonons in CdS at frequencies near absorption edge 18 p3156 A66-34468

Lowest of UV absorption bands attributed to 4f-5d transition of trivalent rare earth ions in calcium fluoride crystals 19 p3443 A66-36004

Optical absorption edges with nearly parallel bands of aluminum analyzed for all polyvalent metals with simple structures 19 p3401 A66-36391

Image converter tube spectrophotometry of zonal variation of methane absorption bands on Jovian disk in near IR region 20 p3646 A66-37017

Single continuous correlation for total band absorbance of radiating gases 20 p3678 A66-37121

Fermi surface interpretation of band structure, electron energy levels, optical properties and ferromagnetic structure of transition and noble metals 20 p3613 A66-37274

X-ray absorption edge observation by transmittance measurements through thin unbacked metal films in XUV as function of wavelength 20 p3613 A66-37275

Electronic energy band structure and optical properties of heavy rare earth metals 20 p3614 A66-37278

Edge absorption of indium-doped cadmium in polarized light, noting exchange interaction between current carriers and Fermi level dependence on carrier concentration 20 p3619 A66-37681

Random Elsasser band model to compute atmospheric transmission of Earth and Mars for 2-micron carbon dioxide bands 20 p3655 A66-38024

Temperature dependence of absorption bands by localized vibration modes associated with substitutional impurities in phosphorus-doped gallium arsenide 20 p3622 A66-38249

Kjeldaa absorption edge in cryogenic potassium for shear magnetoacoustic wave propagation in spherical metallic Fermi surface with spin density wave ground state 21 p3800 A66-38991

Faraday and Voigt and dispersive magneto-optic effects in semiconductors in crossed field due to energy band transitions 21 p3800 A66-38995

Spontaneous-emission probability and

absolute intensity for IR absorption band of nitrous oxide 22 p3947 A66-39768

IR absorption band growth and decay in spectra of oxygen-doped Si irradiated with fast neutron 22 p3962 A66-40085

New absorption bands in near IR spectrum of Mars found by Fourier spectroscopy via carbon dioxide absorption measurements 22 p3981 A66-40486

Behavior of lambda 6300 angstrom Fraunhofer absorption line in solar spectrum 22 p3984 A66-40850

D-3 helium absorption line on solar disk connected to chromospheric flare origin 22 p3984 A66-40851

Optical depths of titanium I absorption lines in solar spectrum 22 p3984 A66-40853

Measurement of shift of cesium absorption lines near series edge, obtaining electron elastic scattering cross section at zero energy by extrapolation of shift 23 p4097 A66-41089

Absorption lines on Venus spectrograms of rotational fine structure of excited vibrational transition of carbon dioxide 23 p4130 A66-41816

IR active localized vibrational modes absorption in lithium and copper compensated silicon doped gallium arsenide 24 p4251 A66-42298

## ABSORPTION COEFFICIENT

Visibility range of 100-watt lamp and relation to absorption coefficient of tropospheric fog 01 p0096 A66-10223

Extension of study showing that increase in temperature of silicon carbide increases absorption coefficient of defect, for case of heavy particle irradiation 02 p0274 A66-11723

Photoionization and absorption coefficients of carbon oxide measured below 1000 angstroms, using Seya-Namioka scanning vacuum UV monochromator with helium continuum as background 02 p0263 A66-11834

Absorption coefficient for lines with combined Doppler and Lorentz broadening calculated, using Runge-Kutta method, continued fraction expansion and Hermite-Gauss quadrature 03 p0393 A66-13267

Spectroscopic measurements using membrane-type shock tube for: absolute determination of continuous absorption coefficients of negative hydrogen ions 04 p0553 A66-14279

Continuous absorption coefficients for xi-factors of neutral argon, krypton and xenon by spectroscopic measurements using shock tube with membrane 04 p0553 A66-14280

Optical properties of light scattering layer with negative absorption coefficient, discussing layer reflection and transmission 05 p0715 A66-14726

Frequency dependence of resistivity, absorption and emission processes in fully ionized plasma 05 p0726 A66-15245

Source function models and modified mean values of solar photosphere, accounting for limb-darkening and intensity fluctuation data 05 p0763 A66-15283

Carbon dioxide-R-branch lines of 5 mu sub 3 band from integral of absorption coefficient of Martian atmosphere 05 p0763 A66-15288

Optical properties of polycrystalline InSb films noting index of refraction, absorption coefficient and transmission curves 05 p0741 A66-15852

Electric field effect on optical absorption edge, discussing exponential tail influence on magnitude of absorption coefficient 05 p0741 A66-15869

Atmospheric oxygen absorption factor of centimeter and millimeter radio waves 05 p0636 A66-15878

Exciton absorption lines and long wave intrinsic edges of single-crystal CdSe and CdS at low temperatures 06 p0924 A66-16540

Sunspot spectra, determining lithium abundance and ratio of Li 6/Li 7 isotopes 07 p1136 A66-17736

Resonance Raman effect in crystals, discussing spontaneous and simulated scattering efficiency 08 p1259 A66-19233

Radio wave absorption coefficients calculated, using approximations of magnetoionic formulae 09 p1341 A66-19860

Absorption coefficient of water vapor in relative windows of transparency for millimeter and submillimeter radio

waves 09 p1343 A66-20338

Accuracy in determination of light absorption coefficient of semiconductors with reflection coefficients of 0.2 to 0.5 09 p1431 A66-20943

Hopf analytical solution for values of ratio of gray absorption coefficients for insulating and escaping radiation /greenhouse parameter/ assumed constant at all depths, presenting temperature distribution graphs 10 p1605 A66-21204

Radiative heat-flux potential for nongray gas derived, noting origins of vector differential equation for gray gas 12 p1977 A66-23596

Continuous emission and absorption of plasmas by calculating radiation of hydrogen plasma, deriving temperature and pressure conditions under which plasma radiates as black body 12 p1919 A66-23750

Absorption of longitudinal ultrasonic waves in superconductors containing impurity atoms, noting entrainment effect role in energy dissipation of waves 12 p1929 A66-24453

Atmospheric radio wave absorption coefficient and altitude determined and linked to effects of colliding paramagnetic oxygen molecules 13 p2020 A66-25224

Solar limb darkening measured at various wavelengths by Veronique rocket, obtaining data on continuous absorption coefficient 13 p2180 A66-25421

Nonlinear dielectric laser light absorption by neutral gas resulting in avalanche breakdown of gas due to thermal ionization 13 p2090 A66-25425

Nonresonant absorption of radio waves in molecular oxygen 13 p2025 A66-26044

Steady state variation of light intensity with distance for monochromatic light, noting dependence of absorption coefficient on degree of excitation of electronic system 13 p2099 A66-26183

Growth rate of ionization by electron impact in presence of laser beam, elastic and inelastic scattering cross sections, free-free absorption, excitation and ionization coefficients, breakdown times and thresholds 13 p2134 A66-26193

Photometric determination of extinction coefficient for optical scattering in turbid medium 14 p2326 A66-27544

Reflection, transmission and absorption coefficients of circularly polarized electromagnetic wave incident on plasma layer situated in stationary magnetic field 14 p2348 A66-28471

Accuracy in determination of light absorption coefficient of semiconductors with reflection coefficients of 0.2 to 0.5 15 p2557 A66-28531

Radiative energy transfer between concentric spheres separated by absorbing and emitting gas, noting analogy to atmosphere with spherical symmetry 15 p2615 A66-28620

Free carrier absorption on GaAs films which exhibit absorption edge shift to lower energies 15 p2561 A66-28698

High Q Fabry-Perot interferometer for measurement of atmospheric gas losses, particularly water vapor absorption, using coherent light source in 100-300 gc frequency range 15 p2501 A66-29003

Microwave absorption by water vapor and mixtures with other gases between 100 and 300 gc/s, noting increase in absorption attributed to molecular collision-induced polarization 15 p2450 A66-29004

Absorption coefficients for nitrogen and oxygen ion in air at temperatures of 150,000 to 800,000 degrees K 15 p2617 A66-29345

Exciton absorption lines and long wave intrinsic edges of single-crystal CdSe and CdS at low temperatures 15 p2569 A66-29987

Gallium arsenide absorption edge dependence on strong electric fields 16 p2769 A66-30166

Absorption coefficient change due to electric field measured for indirect absorption edges of silicon and germanium, determining energies of phonons taking part in indirect optical absorption 16 p2775 A66-30728

Model potential consisting of Coulomb potential and linear terms in electric field potential, obtaining eigenfunctions of model

and deriving optical absorption coefficient for electric field excitons 16 p2775 A66-30729

Photoelectric yields of alkali halides measured, using rare gas ion chamber to determine flux distribution of helium continuum and obtain absorption coefficients 16 p2754 A66-30855

Linear absorption effect on threshold for self-focusing of laser beam in cadmium sulfide, noting variation of absorption coefficient 16 p2720 A66-31537

Temperature structure of early type stellar atmospheres noting sources of opacity, electron Rayleigh scattering, etc 16 p2806 A66-31703

Visibility range of 100-watt lamp and relation to absorption coefficient of tropospheric fog 17 p2948 A66-31907

Solar corona emission spectrum and narrow passband photography of solar disk, noting measurement of intensity variation and absorption coefficient 17 p2999 A66-32133

Electric field effect for free carrier absorption, determining coefficient for acoustic phonon scattering 17 p2976 A66-32264

Atmospheric ozone absorption coefficients measurement, determining errors in extraterrestrial constant of Dobson spectrophotometer 17 p2923 A66-33359

Absorption coefficient of oxygen gas Schumann-Runge continuum, using microsecond flashing source 18 p3137 A66-33988

Free-free absorption coefficient of electrons in field of neutral carbon atoms calculated per unit electron pressure per carbon atom in static central field exchange approximation 18 p3233 A66-34574

Absorption, radiative recombination and photoconductivity of CdSe 19 p3444 A66-36035

Splitting of ground state of neutral mercury two-hole acceptor in unstressed silicon or germanium evidenced by intensity decrease of photoabsorption peaks 19 p3444 A66-36174

Absorption of polarized electromagnetic waves at zero degrees K in n-type germanium under high uniaxial stress 19 p3446 A66-36396

Weak field effective mass approximation calculations of absorption coefficient in presence of electric field for transitions at normal threshold extended to arbitrary orientation of electric field in solid 19 p3447 A66-36397

Temperature dependence of UV radiation absorption coefficient in quartz undergoing phase transition for several spectral lines 19 p3447 A66-36722

Absorption coefficients for monomers of water vapor and oxygen for various altitudes, noting seasonal variation 20 p3511 A66-37133

Absorption coefficients for nitrogen and oxygen ions in air at temperatures of 150,000 to 800,000 degrees K 20 p3604 A66-37350

Absorption of longitudinal ultrasonic waves in superconductors containing impurity atoms, noting entrainment effect role in energy dissipation of waves 20 p3619 A66-37685

Optical determination of hole concentration dependence in p-type silicon semiconductors by measuring absorption coefficients 21 p3798 A66-38765

Performance of GaAs semiconductor laser with resonator, noting dependence of forbidden zone width and absorption coefficient on free carrier concentration and incident photon energy 21 p3746 A66-38955

Light scattering influence on effective value of extinction coefficient considered as function of optical parameters of medium and of angular characteristics of source and receiver 21 p3760 A66-39361

IR absorption coefficients of water vapor as function of temperature obtained from absorption and emission spectra 22 p3950 A66-40114

Molecular spectroscopy, measuring absorption coefficient at center of carbon dioxide band, determining vibration-rotation transition moment 23 p4076 A66-41179

Kinetic equations in hydrodynamic approximation for weakly reacting and

- excited Bose systems, finding asymptotic expressions for Green function 23 p4055 A66-41412
- Low accuracy of interferometric measurement of coefficient of ultrasound absorption in gas 23 p4068 A66-41414
- Nongray radiation effects on laminar boundary layer of absorbing gas over flat plate, using absorption coefficient with stepwise frequency dependence 23 p4012 A66-41903
- Mass of shaped charge accelerator generated fragments determined via high speed flash X-ray photography of projectiles in flight 24 p4209 A66-42186
- Frequency temperature dependence of longitudinal and transverse hypersonic wave absorption coefficients in quartz and artificial ruby crystal 24 p4255 A66-42514
- ABSORPTION CROSS SECTION**
- Resonance absorption measurements in cesium vapor 02 p0262 A66-11435
- Visible spectrum absorption cross section of trivalent chromium in metastable 2E state of pink ruby 05 p0694 A66-14902
- Solar radiation attenuation in UV region provides data on production of atomic oxygen by photodissociation of oxygen and ion and electron formation by photoionization of nitrogen and oxygen 05 p0748 A66-15022
- Photoabsorption cross section of atomic hydrogen obtained by flowing molecular hydrogen through discharge tube 06 p0913 A66-17042
- Abundance of titanium for solar photosphere model derived from ion lines 07 p1135 A66-17641
- Mie scattering and absorption cross sections for spherical absorbing particles as function of complex refractive index 09 p1405 A66-20512
- Monograph on solar corona physics covering ground based, satellite and sounding rocket observation, spectral emission and absorption lines, ionization mechanism, RF and UV radiation, etc 12 p1949 A66-24069
- Effective capture cross section for holes by singly negatively charged zinc atoms in p-silicon determined by double injection method 14 p2369 A66-28261
- Energy spectrum of primary photoelectron, using data from atmospheric density distribution, fluxes of solar XUV radiations and absorption and ionization cross sections 15 p2574 A66-28906
- Total absorption cross section of carbon monoxide and carbon dioxide in 550-200 angstrom range 15 p2538 A66-28978
- Temperature effect on UV absorption continuum of oxygen, using photoelectric techniques, obtaining absolute absorption cross sections 16 p2695 A66-30711
- Relation between Rydberg series lines observed in absorption spectrum of atomic oxygen and absorption cross sections of Cairns and Samson 17 p2961 A66-32504
- Altitude distribution of atmospheric molecular and atomic hydrogen, showing results of Lyman alpha absorption measurements 17 p2919 A66-32995
- Fluctuation scattering and absorption cross section derived for space and time dispersive plasma 18 p3149 A66-34914
- Absorption cross section of electron systems in bands of diatomic molecules calculated, noting effects of temperature variation 21 p3775 A66-39077
- Photoabsorption cross section of atomic hydrogen by molecular hydrogen flow through discharge tube 23 p4098 A66-41245
- Absorber concentration effect on pulsed laser system noting performance characteristics, threshold energy, pumping dynamics and time parameters 24 p4220 A66-42254
- Nondestructive detection technique of phosphosilicate layer on semiconductor wafers, using IR spectrophotometer 24 p4181 A66-42390
- Absorption cross section, scattering cross section and angular scattering distribution of solid alumina particles emitted in homogeneous solid propellant rocket plume 24 p4294 A66-42778
- ABSORPTION SPECTRUM**
- X-ray L band absorption spectra of rare earth atoms in hexaborides, collecting evidence on valence state 01 p0126 A66-10980
- Elemental abundances in solar atmosphere determined from intensity of absorption lines in solar spectrum 02 p0285 A66-11297
- Forbidden absorption spectrum of ionized iron in solar absorption ascertained with high resolution direct intensity recordings 02 p0286 A66-11353
- Spectral absorption due to parallel bands of nitrous oxide computed for temperatures of 200 and 300 degrees K 02 p0263 A66-12213
- Slant path measurement of atmospheric absorption spectra of 4.3 mu band, using Sun as radiation source 03 p0359 A66-12301
- IR and UV absorption spectra of free radical NCN observed following photolysis of matrix isolated cyanogen nitride 04 p0473 A66-13644
- Absorption contour for fundamental vibration-rotation band of nitrogen oxide compared with pressure broadened spectra 04 p0473 A66-13651
- Interpretation of nuclear magnetic resonance spectra from cobalt alloys containing small amounts of solute atoms 04 p0564 A66-14032
- Absorption spectrum sidebands for quasi-local oscillation in KCl-H crystals 05 p0730 A66-14648
- Transfer equation of solar absorption line developed with split upper level in magnetic field 05 p0759 A66-14870
- Inverse stimulated Raman spectra during Stokes absorption in terms of stimulated emission of optical phonons 05 p0697 A66-15108
- High resolution absorption spectrum of nitrogen in fourth and fifth orders from 1060 to 1520 angstroms 05 p0763 A66-15284
- Potential curves and spectrum absorption of nitrogen, redetermining spectroscopic constants 05 p0763 A66-15285
- Atmospheric thermal radiation calculated from unresolved molecular absorption spectra of atmospheric carbon dioxide and water 05 p0675 A66-15860
- Absorption and emission spectra pertaining to electronic transitions of short-lived molecules C sub 2 and CH present in reaction zone of low-pressure oxyacetylene flames 06 p0969 A66-16126
- Nitrogen and nitrogen-foreign gas mixtures, determining absorption profile shapes, binary and ternary absorption coefficients and molecular quadrupole moment 06 p0908 A66-16281
- Upper atmospheric research using spectroscopic study of absorption bands and night-sky radiation, celestial bodies as UV and X-ray sources and atmospheric light scattering 06 p0876 A66-16310
- Uniaxial and hydrostatic pressure effect on absorption edge spectrum and edge excitation spectrum for visible luminescence diamond 07 p1095 A66-17320
- Emission and absorption lines with anomalous intensity distributions indicate hydroxyl molecule concentrations in Sagittarius A 07 p1133 A66-17462
- Vacuum fusion and IR absorption determination of bulk oxygen content of germanium crystals 07 p1098 A66-17743
- Manganese X-ray emission lines in compound-oxide semiconductor 07 p1105 A66-18369
- Validity of Kirchhoff law for apparent local spectral emittance and absorptance and total flux calculations for spacecraft cavities [AIAA PAPER 65-135] 08 p1316 A66-18793
- Oscillations in impurity photoconductivity and absorption spectra of p-germanium samples 08 p1269 A66-18973
- Fluorescent K-absorption and emission spectra of phosphorus in III-V semiconductor compounds 09 p1426 A66-20192
- Optical double resonance in ruby, discussing absorption transitions from lowest excited state of chromium ion effected by laser pumping 09 p1387 A66-20856
- Raman scattering and IR absorption spectra of gaseous, liquid and crystalline benzoyl benzoic acid and O-and M-toluic acids 09 p1339 A66-20941
- Vertical water vapor distribution to determine absorption function from high altitude measurements of solar IR radiation spectrum 09 p1375 A66-20942
- Temperature and environment effect on absorption spectra of two-level system, using stochastic model and Green function 09 p1348 A66-20959
- Absorption spectra of alkaline, alkaline-earth and rare-gas groups 10 p1557 A66-21095
- IR absorption spectra of oxygen-defect complexes in irradiated silicon 10 p1581 A66-21737
- Vanadium pentoxide-boron oxide-lead oxide system IR absorption spectra and electroconductivity 10 p1582 A66-21917
- Broadening of IR absorption lines by HF local oscillations attributed to either modulation effects or decay processes 10 p1588 A66-22162
- High precision photoelectric scan at 8667-8668 angstrom wavelengths in solar spectrum for identification and abundance of boron 11 p1771 A66-22773
- Absorption spectrum of neutral nitrogen near 500 angstroms, noting vibrational spacings and Rydberg series 11 p1773 A66-22783
- Multifilm absorption spectrum dependence on magnetic interaction, deposition, thickness and quality of ferromagnetic and insulating films 11 p1753 A66-22810
- Spin wave sideband in absorption spectrum at low temperatures for transition of manganese ion in antiferromagnetic manganese fluoride 11 p1740 A66-22970
- He-Ne laser IR radiation emission attenuated by atmospheric methane 11 p1657 A66-23090
- K absorption spectra of germanium and selenium in germanium selenide based on band theory of solids by assuming electrons transfer, using X-ray spectroscopy 11 p1758 A66-23368
- Longitudinal plasma oscillations excited in warm plasma column at microwave frequencies in presence of magnetic field, manifest themselves as absorption peaks near harmonics of electron cyclotron frequency 11 p1748 A66-23395
- Splitting in indirect absorption edge spectrum dependent on direction and magnitude of applied stress and light polarization with respect to stress axis 12 p1927 A66-23721
- Absorption spectrum of germanium at various temperatures and wavelengths and of heavily doped germanium at room temperature, obtaining agreement for both cases with theory of structural absorption of holes 12 p1929 A66-24452
- Coriolis interaction in first and third fundamental frequencies of ozone, noting vibration rotation spectrum and coupling of two states 13 p2016 A66-25373
- UV absorption and excitation spectrum of ruby and sapphire, noting structure and polarization effects, quantum efficiency, etc 13 p2162 A66-25378
- Microwave absorption in compressed carbon dioxide between 150 and 300 gc measured, detecting no losses at 150 gc 13 p2021 A66-25383
- Absorption spectrum sidebands for quasi-local oscillation in KCl-H crystals 13 p2167 A66-25923
- Elliptic cavity design for solid state lasers, discussing multiple reflections, absorption coefficient, refraction losses, etc 13 p2092 A66-25998
- Excited-singlet even parity states of anthracene in near UV, noting role of absorption spectroscopy 13 p2132 A66-26143
- Absorption spectra in optical region when laser radiation and continuous radiation are simultaneously incident on molecular medium 13 p2133 A66-26161
- Far-IR laser molecular spectroscopy including IR laser oscillators, photon noise, detectors and nuclear optics 13 p2100 A66-26195
- Organic gas magnetically tuned laser spectroscopy, discussing resolution, absorption spectra and vibrational deactivation 13 p2100 A66-26197
- Time behavior of 3889 and 5016 angstrom line helium emission during initial transient of RF discharge, noting pressure dependence and signal intensity 13 p2104 A66-26335
- Optical transition of manganese fluoride as function of temperature and magnetic field

in both emission and absorption 14 p2351 A66-26886  
Emission and absorption bands in K spectral region of titanium, using single setup 14 p2314 A66-27371  
Fine-line absorption spectrum anisotropy with respect to crystallographic axis of cadmium sulfide 14 p2308 A66-27646  
Energy level transitions in vacuum UV absorption spectrum of calcium vapor 14 p2337 A66-27704  
Stark broadening effect on solar atmospheric abundance determinations, with results for sodium 14 p2383 A66-27709  
Field-effect-modulated optical absorption spectrum for various values of Ge surface potential 14 p2366 A66-27765  
Absorption lines of quasi-stellar object 3C 191 14 p2387 A66-28131  
Vertical water vapor distribution to determine absorption function from high altitude measurements of solar IR radiation spectrum 15 p2483 A66-28530  
Ruby phosphorescence under intense optical excitation, inferring possible recombination characteristics from initial brightness decay 15 p2558 A66-28607  
Impurity scattering in theory of interband magneto-optical effects, noting inadequacy of first-order perturbation treatment and low and high impurity-atom concentration with weak interaction 15 p2558 A66-28610  
Riometer absorption caused by solar protons and alpha particles in monoenergetic intensities and in spectral distributions 15 p2574 A66-28818  
IR absorption of arsenic monoselenide 15 p2565 A66-29198  
In, Ga and Cu impurity effects on absorption spectrum of zinc telluride 15 p2565 A66-29199  
IR absorption spectrum of neutron bombarded silicon 15 p2565 A66-29202  
Vacuum spectrometer measurement of absorption band of atmospheric water vapor 15 p2542 A66-29346  
Absorption, excitation, and emission spectra of TI-activated NaI single crystals at liquid helium temperatures 15 p2566 A66-29347  
Absorption spectrum of ruby in metastable state 15 p2566 A66-29349  
High energy mountain-altitude nuclear interactions produced by pions and nucleons, pion/proton and neutral/charged interacting particle ratios studied, using multiplate cloud chamber with air Cerenkov counter and absorption spectrometer 15 p2584 A66-29554  
Electron-photon cascades caused by nuclear active component in atmosphere and on gamma rays, atmospheric absorption spectrum of primary nucleons and generation of pions 15 p2584 A66-29556  
Ionized electron centers in irradiated lithium fluoride crystals investigated by observing emission and absorption spectra 15 p2568 A66-29641  
Impurity absorption of LiF crystals in vacuum UV 15 p2568 A66-29729  
Optical properties of complex compounds of divalent platinum, noting absorption spectra, forbidden transitions, etc 15 p2569 A66-29730  
Biological macromolecule detection using thiocarbocyanine dye and observation of absorption spectra changes 15 p2441 A66-29962  
Absorption, photoionization and fluorescence of carbon dioxide measured in regions of strong band and continuous absorption in various spectral ranges 16 p2749 A66-30111  
Auroral excitation rates and molecular vibrational temperatures in nitrogen 2PG from Franck-Condon factors obtained from intensity measurements and high resolution absorption spectral data 16 p2692 A66-30328  
Atomic scattering from perfect crystal, considering effects of absorption potential, surface vibrational modes momentum and energy exchange etc 16 p2752 A66-30389  
Radiative flux divergence for lower few centimeters of atmosphere, accounting for combined effects of water vapor, particle absorption and scattering 16 p2699 A66-31640  
Optical and magnetooptical phenomena in

CdSnAs sub 2, discussing reflection and absorption spectrum, optical activity, double refraction, dielectric constant, etc 16 p2788 A66-31775  
Relation between Rydberg series lines observed in absorption spectrum of atomic oxygen and absorption cross sections of Cairns and Samson 17 p2961 A66-32504  
Continuous source for atomic fluorescence flame spectrometry using 150-watt xenon arc, total consumption atomizer-burner and low resolution monochromator 17 p2870 A66-32551  
Electron scattering interpretation of ionization, emission and absorption line spectra of quasi-stellar object 17 p3004 A66-32928  
IR absorption of arsenic monoselenide 17 p2982 A66-33047  
In, Ga and Cu impurity effects on absorption spectrum of zinc telluride 17 p2982 A66-33048  
IR absorption spectrum of neutron bombarded silicon 17 p2982 A66-33051  
Triatomic carbon spectrum transition bands based on available photographic and densitometric data 17 p3013 A66-33401  
Chemical bonds between rare earth metals and nitrate radicals in lanthanum, gadolinium and yttrium nitrates studied from IR absorption spectra 18 p3063 A66-33842  
Ionization potential, dissociation energy and electron affinity for molecular oxygen 18 p3137 A66-33989  
Solar extinction measurements and interpretation of terrestrial atmosphere microwave absorption spectrum near 1-cm wavelength 18 p3105 A66-34012  
IR and UV absorption spectra of solid HN sub 3 film after photolysis with unfiltered radiation from Hg lamp 18 p3064 A66-34455  
Absorption spectrum of condensed oxygen in 1.26 to 0.3 micron region 18 p3140 A66-34693  
Absorption spectra modification in silica ceramics after gamma irradiation from Co-60 19 p3388 A66-35463  
Broadening of IR absorption lines by HF local oscillations attributed to either modulation effects or decay processes 19 p3441 A66-35776  
Silicon IR absorption spectra at various wavelengths before and after irradiation with neutron fluxes 19 p3442 A66-35821  
Absorption spectra of pure and isotopic impurity crystals of naphthalene in region of first electronic and vibrational/vibron/transition 19 p3402 A66-36067  
Absorption line between 220 and 550 mu in transmission spectra of ruby at liquid nitrogen and helium temperatures 19 p3446 A66-36342  
Ionospheric absorption measurement by A3 method in which field strength of distant CW transmitter is continuously recorded 19 p3351 A66-36359  
Superconductor electromagnetic absorption in energy gap region, examining gap anisotropy, multiple gaps, precursor absorption and magnetic perturbation effect on optical absorption spectrum 20 p3615 A66-37281  
Vacuum spectrometer measurement of absorption band of atmospheric water vapor 20 p3602 A66-37351  
Absorption, excitation, and emission spectra of TI-activated NaI single crystals at liquid helium temperatures 20 p3615 A66-37352  
Absorption spectrum of ruby in metastable state 20 p3615 A66-37354  
Absorption spectra, reflection index and photoelectric emission of tellurium 20 p3618 A66-37566  
Absorption spectrum of germanium at various temperatures and wavelengths and of heavily doped germanium at room temperature, obtaining agreement for both cases with theory of structural absorption of holes 20 p3619 A66-37684  
Receiver with n-type indium antimonide detector for investigating absorption spectra in submillimeter wave range 20 p3561 A66-37999  
Moisture contamination and associated water band absorption spectra recorded by balloon-borne

spectrometer 20 p3554 A66-38206  
Fine structure in direct absorption edge of cleaved type IIA diamond determined from reflectance data obtained from 5.5 to 11.5 ev at room and liquid-nitrogen temperatures 20 p3622 A66-38248  
Absorption spectrum of sulfur hexafluoride in far UV due to electron impact and inelastic scattering and oscillator strengths for three absorption bands 21 p3774 A66-38524  
Spectral characteristics of gases heated by shock waves, noting absorption capacity distribution as function of wavelength 21 p3726 A66-39078  
Emission and absorption capacity of /zero-zero/ band of CN violet system at high temperatures, determining parameters of oscillator system power 21 p3775 A66-39079  
Absorption and dispersion spectrum of laminar gallium selenide crystal 21 p3802 A66-39159  
Stimulated emission, absorption spectra and luminescence of neodymium-activated YAG crystals in pulsed laser 21 p3748 A66-39306  
Experimental excited state band locations and intensities in absorption spectrum of electron transitions in optically pumped ruby laser 21 p3749 A66-39569  
Theoretical excited state absorption spectrum of electron transitions in optically pumped ruby laser 21 p3749 A66-39570  
Indium and thallium first spectra sp2 atom configurations and configuration mixing 22 p3960 A66-39801  
Multiparametric diagnostic technique for optically dense plasma 23 p4102 A66-41451  
Line strengths variation in spectra of HD 124224 and HD 19832 analyzed, establishing anticorrelation of He I variations with variations in temperature 23 p4130 A66-41808  
Evolving synchrotron self-absorption model of extragalactic nonthermal radio sources 23 p4132 A66-42074  
Saturable dyes noting mode selection properties and absorption spectra in bleached state 24 p4220 A66-42253  
Multiple cyclotron resonance absorption lines in degenerate valence bands of Ge semiconductor studied with far IR laser submillimeter spectrometer 24 p4257 A66-42545  
Transmittance of gaseous air components for 1850 angstrom radiation 24 p4234 A66-42818  
Ultrarelativistic muon electromagnetic interaction energy loss due to bremsstrahlung and pair production 24 p4271 A66-42936  
Decay of small temperature perturbations by thermal radiation in atmosphere, noting gray and line absorption, relaxation time constants and numerical computations 24 p4203 A66-42986  
Dipole moment of perchlorofluoride by measuring absolute absorption maximum and linewidth parameters in resonant cavity 24 p4170 A66-43038  
**ABSORPTIVE INDEX**  
Absorptance and emittance of metal surfaces determined via cyclic incident radiation, noting error computation and method accuracy parameters [AIAA PAPER 66-416] 16 p2829 A66-31487

 marrow cells in mice 15 p2437 A66-29478  
 lood flow rate in surface veins of brains  
 animals subjected to accelerations, noting  
 ermal transducer 15 p2445 A66-29500  
 igh-explosive driven shock tubes, as

sources of short duration high-pressure  
 supersonic pulses, applied in accelerating  
 large objects 16 p2674 A66-30423  
 Structural mounting of large diameter  
 cylindrical missile section in centrifuge for  
 high acceleration environmental  
 testing 16 p2677 A66-30458  
 Fast rise programmed centrifuge, noting  
 acceleration testing capabilities, power  
 speed control, etc 16 p2679 A66-30473  
 X-ray motion picture recording of change  
 in A-P chest diameter and heart position of  
 five human subjects during transverse  
 centrifuge accelerations of 5G and  
 10G 16 p2639 A66-31119  
 Antidiuretic effect of positive Gz gradient  
 acceleration 17 p2855 A66-32137  
 Correlation between survival time of rats  
 under acceleration stress and cerebral level  
 norepinephrine 17 p2855 A66-32145  
 Pulmonary blood flow distribution under  
 forward accelerations studied by combined  
 use of human centrifuge and radio-isotope  
 scanning 17 p2856 A66-32153  
 Mechanical impedance of human body  
 subjected to vibration combined with  
 various magnitudes of linear  
 acceleration 17 p2863 A66-32154  
 Abstract higher mental functioning of  
 human operator during exposure to  
 transverse acceleration  
 stress 17 p2857 A66-32161  
 Parasympathetic control of heart rate in  
 monkeys under acceleration stress, noting  
 ECG changes and effect of atropine sulfate  
 on change of rate 17 p2857 A66-32176  
 Blood saturation decrease due to regional  
 pulmonary arterial venous shunting during  
 exposure to transverse  
 acceleration 17 p2858 A66-32195  
 Age effect on liver glycogenesis in rats  
 exposed to acceleration  
 stress 17 p2860 A66-32555  
 Physiological reactions of astronauts to  
 acceleration of Voskhod spacecraft  
 characterized by greater emotional stress  
 than during centrifuge  
 simulation 17 p2861 A66-32936  
 Pathomorphological changes in hemopoietic  
 organs of mice under combined effects of  
 proton radiation and vibration and gamma  
 radiation and acceleration 17 p2861 A66-32937  
 Fluctuations in human acoustic sensitivity  
 after 24 hours in room under effect of  
 Coriolis accelerations of various  
 magnitudes 17 p2861 A66-32941  
 Effect of head-to-foot accelerations of up  
 to 10 g on rabbits, noting changes in ECG,  
 EEG, brain histology, etc, leading to  
 ischemic conditions 18 p3060 A66-34408  
 Labyrinthine nystagmus and sensation of  
 turning evoked by impulsive stimuli in yaw,  
 pitch and roll compared for subjects in  
 plane of rotation and in tilted  
 position 24 p4163 A66-42448  
 Cardiopulmonary hemodynamics in dogs  
 under transverse acceleration studied in  
 terms of changes in heart and  
 lungs 24 p4163 A66-42450  
 High acceleration missiles for intercepting  
 enemy ballistic warheads, considering sprint  
 and hibex rockets, noting problems with gap  
 heat, gyro drift, communications,  
 etc 24 p4284 A66-42952  
**ACCELERATION TOLERANCE**

Heat stress and minimal dehydration effect  
 upon human tolerance to positive  
 acceleration 03 p0326 A66-12353  
 Acceleration effect on food reinforced  
 DRL and FR schedules 03 p0325 A66-13175  
 Vibration exposure with varying peak and  
 rms acceleration and frequency in low  
 altitude high-speed flight 03 p0329 A66-13355  
 Breathing mechanics during transverse  
 acceleration, discussing experiments and  
 measurements made on  
 man 04 p0466 A66-14075  
 Electroencephalographic variations in  
 albino rats, discussing transverse  
 acceleration effects before and after  
 splenectomy 06 p0810 A66-15908  
 Neurologic adaptations and audiogenic  
 responses in mice exposed to chronic 2X  
 gravity field, noting development of more  
 efficient circulatory system, growth pattern  
 alterations, etc 07 p0998 A66-17660  
 Short radius onboard centrifugation for  
 simulated gravity during prolonged space

flight, providing zero G at eye level and  
 maximum G at feet 09 p1334 A66-20524  
 Effects of chronic hypohydration on  
 responses to tests of bodily functions,  
 defining set points and mechanisms involved  
 in changes in work  
 performance 09 p1337 A66-20528  
 Positive /headwards/ acceleration effect on  
 vision, cardiovascular system, respiration,  
 kidneys, brain wave patterns and total  
 performance 10 p1490 A66-22123  
 Negative acceleration physiological effect,  
 discussing heart, blood pressure, respiration,  
 vision, etc 10 p1490 A66-22124  
 Transverse acceleration physiological  
 effect, discussing cardiovascular system,  
 respiration, body position,  
 etc 10 p1490 A66-22125  
 Subgravity tower and axis results obtained  
 on man and animals, discussing transition  
 from acceleration to weightlessness and vice  
 versa 11 p1641 A66-22480  
 Physiological reactions of human body to  
 transverse acceleration, examining means of  
 increasing organism resistance to these  
 effects 11 p1643 A66-22575  
 Ejection seat spin rate tests to determine  
 temporary incapacitation  
 possibilities 11 p1647 A66-22576  
 1 g rotating linear acceleration vector  
 producing compensatory nystagmus, noting  
 effects when rotation axis was vertical and  
 horizontal 11 p1643 A66-22579  
 Vestibular reactions of deaf during angular  
 and coriolis accelerations 13 p2010 A66-25892  
 Combined effect of horizontal and vertical  
 accelerations on gravimeter readings  
 mounted on gyroplatform or in Cardan  
 suspension 14 p2297 A66-28111  
 Hypoxemia induced in man by sustained  
 forward acceleration while breathing pure  
 oxygen in five pounds per square inch  
 absolute environment 15 p2430 A66-28659  
 Acceleration stress-induced changes in fat  
 metabolism, level of circulating glucose and  
 corticosterone level in  
 rats 15 p2431 A66-28868  
 Chest-to-back accelerations effect on  
 human electroencephalograms and work  
 capacity 15 p2437 A66-29475  
 Simulation of aircraft crashes to evaluate  
 seating and restraint  
 systems 16 p2680 A66-30480  
 Packaging techniques for telemetry  
 components and systems to withstand gun-  
 launch accelerations up to 250,000  
 g 16 p2651 A66-30561  
 Physical conditioning found to have no  
 effect on human tolerance of positive Gs  
 during gradual or rapid onset centrifuge  
 runs 16 p2640 A66-31123  
 Wind tunnel, simulator and flight test  
 results to evaluate cockpit accelerations,  
 handling qualities and stability and control  
 of jet transports in severe turbulence  
 [AIAA PAPER 65-330] 16 p2634 A66-31317  
 Squirrel monkey physiological response to,  
 and survival under short duration very high  
 acceleration stress 17 p2858 A66-32187  
 Capability of white mice to sustain  
 extreme accelerations after exposure to  
 ionizing radiation 18 p3058 A66-33844  
 Missile and rocket launching with static  
 instability, deriving approximate solution for  
 equations of longitudinal accelerated  
 motion 19 p3470 A66-36083  
 Consequences of heart-to-foot acceleration  
 gradients on tolerance to positive  
 acceleration determined on variable radius  
 centrifuge 19 p3285 A66-36373  
 Human vestibular responses to combined  
 stimulation by angular and linear  
 accelerations tested, noting relation between  
 tolerance and habituation 19 p3287 A66-36647  
 Physiological and mechanical effects of  
 radial accelerations on brain temperature of  
 dog and rabbit 23 p4026 A66-41336  
 Twofold transversely applied 8-g  
 centrifuging effect on functional state of  
 otolithic part of vestibular apparatus of  
 guinea pigs 23 p4026 A66-41337  
 Combined effect of horizontal and vertical  
 accelerations on gravimeter readings  
 mounted on gyroplatform or in Cardan  
 suspension 24 p4212 A66-42699  
 Physiological disturbances caused by action  
 of prolonged accelerations on human  
 organism, examining methods of increasing

maximum g force tolerance  
levels 24 p4166 A66-43136  
Physiological and biomechanical reactions  
of humans exposed to action of g forces,  
examining effects of impact  
acceleration 24 p4166 A66-43137

readout 21 p3764 A66-38849  
Inertial platform test station for shipboard  
maintenance and calibration of platform  
used in A6A and E2A aircraft, examining  
accelerometer bias and gyro drift  
tests 21 p3723 A66-38889

**ACCIDENT INVESTIGATION**  
SA AIRCRAFT ACCIDENT  
INVESTIGATION  
Medical knowledge as aid in preventing  
aircraft accidents and injury through  
investigation of causes and  
results 10 p1495 A66-22142  
Spatial disorientation experiences of Army  
helicopter pilots, noting accident and  
incident statistics, methods of correction,  
etc 11 p1648 A66-22578  
Missile and space system accident potential  
evaluated numerically 20 p3685 A66-37931

**ACCIDENT PREVENTION**  
Plane crash as result of pilots coronary  
disease, discussing prevention and  
rehabilitation 04 p0469 A66-14387  
Supersonic flight control, discussing  
reliability and safety devices, computer  
application and multiplex  
systems 06 p0816 A66-16055  
USAF aircraft accidents involving ten or  
more fatalities 06 p0807 A66-16825  
RAF system of classification of aircraft  
accidents by causes for statistical  
purposes 10 p1494 A66-22139  
Medical knowledge as aid in preventing  
aircraft accidents and injury through  
investigation of causes and  
results 10 p1495 A66-22142  
Contribution of medical science to accident  
prevention, discussing causes, results and  
escape from standpoint of man and  
machine 10 p1495 A66-22143  
Automatic stabilization systems reduce  
accidents due to disorientation, emphasizing  
sensor-servo system for roll axis control  
[SAE PAPER 660201] 13 p1996 A66-26390  
Clinical and medicolegal considerations on  
fatal case of myocardial infarct involving  
military pilot in flight 14 p2229 A66-26813  
EEG experiments on men exposed to  
intermittent photic stimulation under  
simulated IFR conditions produced  
drowsiness as primary  
response 17 p2864 A66-32165  
Closed circuit television applied to data  
transfer in air traffic control, discussing  
accident prevention and information  
provision to aircraft 17 p2874 A66-32356  
Ground testing of large nuclear rockets,  
discussing decontamination requirements to  
maintain safety level with longer running  
times and higher reactor  
levels 19 p3398 A66-36177  
Allotment of probability shares method  
applied to improving safety in design by  
diagnosing failure and probability of  
accident 20 p3494 A66-36999  
Promotion of aviation safety, discussing  
adoption of new accident statistics,  
elimination of catastrophes and STOL  
design extension to medium and long-range  
aircraft 23 p4152 A66-41305

**ACCIDENT PRONENESS**  
Flying skills assessment in relation to

accident liability 20 p3508 A66-36995

**ACCLIMATIZATION**  
SA ADAPTATION  
SA ALTITUDE ACCLIMATIZATION  
SA ENVIRONMENTAL SCIENCE  
SA HEAT ACCLIMATIZATION  
SA HEAT TOLERANCE  
SA HUMAN TOLERANCE  
Heat regulation, acclimatization and human  
tolerance upon exposure to moderate, hot  
and cold temperatures 10 p1489 A66-22119  
Resistance to hypoxia by individuals at  
height of 1650 m trained for high altitude  
climbing, noting  
equipment 15 p2435 A66-29449

**ACCOMMODATION**  
S VISUAL ACCOMMODATION  
**ACCOMMODATION COEFFICIENT**  
SA THERMAL ACCOMMODATION  
COEFFICIENT  
Energy accommodation coefficients  
calculated for gas particles interacting with  
cubic crystal lattice 04 p0548 A66-14142  
Roberts method determining  
accommodation coefficients of gases on bare  
wires leads to erroneous conclusions due to  
thermal inertia of experimental apparatus in  
vicinity of current paths 04 p0545 A66-14170  
Heat transfer during film condensation of  
liquid metal vapor, discussing thermal  
resistance effect of condensation coefficient  
[ASME PAPER 65-HT-29] 05 p0784 A66-14748  
Parametric analogies used to obtain design  
characteristics of thermal and viscosity  
vacuum meters and hot-wire  
anemometers 07 p1031 A66-17412  
Momentum and energy accommodation  
coefficients for moving gas interaction with  
solid surface, with attention to molecular  
mass and velocity flux  
distribution 07 p1083 A66-18135  
Heat transfer during film condensation of  
liquid metal vapor, discussing thermal  
resistance effect of condensation coefficient  
[ASME PAPER 65-HT-29] 11 p1784 A66-22182  
Temperature jump in polyatomic gases,  
discussing nonequilibrium energy  
distribution on boundary  
conditions 11 p1687 A66-22334  
Energy accommodation coefficient variation  
with energy of gas molecules impinging on  
clean surfaces or adsorbed  
monolayers 16 p2645 A66-30391  
Pulsed molecular nitrogen beam-ballistic  
pendulum measurements of normal  
momentum accommodation  
coefficients 16 p2701 A66-30395  
High energy argon atom interactions with  
surfaces and variations in accommodation  
coefficient 16 p2702 A66-30399  
Thermal conductivity and accommodation  
coefficient measurements in gas mixture of  
atomic and molecular  
oxygen 21 p3836 A66-39174  
Revision of Levin average value of  
accommodation coefficient K for iron  
meteoric bodies 22 p3984 A66-40783

**ACCORDION PROJECT**  
Project Accordion data to provide  
information for decisions on horizontal  
separation standards and navigational  
accuracy 07 p1076 A66-17790

**ACCUMULATOR**  
Auxiliary power unit turbine-engine  
starting system analyzed to determine  
sufficiency of selected  
accumulator 16 p2637 A66-31224

**ACETALDEHYDE**  
Radiation-induced solid state explosive  
polymerization of  
acetaldehyde 19 p3295 A66-35333

**ACETATE**  
Nuclear magnetic resonance classification  
of alcohols and hydroxyl groups from FI-19  
spectra of  
trifluoroacetates 15 p2447 A66-29238

**ACETIC ACID**  
Carbon-13 chemical shifts of carboxyl  
carbon atom of acetic, benzoic and mesitoic  
acids in various compositions of sulfuric  
acid 14 p2232 A66-27376  
Conversion of 2-formyl dienone III into  
dienone IV upon irradiation in acetic acid  
followed by base-catalyzed deformation of  
crude photoproduct 15 p2446 A66-28873  
Thermodynamic calculation of explosive  
properties of peracetic acid, using data from  
detonation wave to establish safe limits for

- se of acid 21 p3834 A66-38535
- ETONE
- Stimulated Raman effect in acetone and acetone-carbon disulfide mixtures, noting similarity of Stokes radiation pattern to Raman effect 15 p2513 A66-28881

- Natural frequencies of sheet-stringer panels which do not deflect laterally but rotate when subjected to arbitrary external loads 01 p0148 A66-10137
- Vibration response of steel panels to fluctuating pressures in turbulent boundary layer of wind tunnel compared to random excitation caused by jet noise and siren 01 p0148 A66-10138
- Propagation of fatigue cracks in tensioned plate subjected to acoustic loads 01 p0148 A66-10140
- Dynamic responses of panel shells and complete equipment packages to acoustic inputs to improve fabrication techniques of flight structures 01 p0149 A66-10142
- Acoustic fatigue characteristics of beryllium panels exposed to high intensity random noise 01 p0149 A66-10143
- Increased aluminum panel acoustic resistance due to combination of surface treatment and mylar gasket-universal head mounting technique 01 p0149 A66-10144
- Spectrum shaping of noise generated by broadband siren is possible by introducing air by-pass system and changing rotor shape 01 p0052 A66-10145
- Optimum proportion of surface-damping treatment to surface metal thickness to minimize randomly excited skin surface stresses in stiffened plate structure 01 p0149 A66-10148
- Acoustical fatigue study of propeller duct designed for minimum weight to maintain specified thrust-to-weight ratio 01 p0150 A66-10155
- Acoustic fatigue and acoustically induced

vibration in Titan II and Titan III missiles studied by simulation and wind tunnel scale models 01 p0150 A66-10156

Matrix technique to predict structural fatigue of acoustically loaded structures 01 p0150 A66-10157

Acoustic fatigue testing of 20 fuselage panels of XC-142A VTOL/STOL transport aircraft, using simulated propeller noise 01 p0151 A66-10158

Noise and vibration causing acoustic fatigue leading to deafness of aircrew 06 p0811 A66-18065

Lifting aircraft structures subjected to acoustic pressures, noting estimation of panel joint rms stress 20 p3666 A66-37422

**ACOUSTIC GENERATOR**

Broadband siren spectrum test facility including acoustic chamber, horn network, siren, air supply, instrumentation and controls 01 p0052 A66-10146

Programming method for determining modulation parameters required to change siren sine wave output to random Gaussian noise 01 p0053 A66-10147

Microwave acoustic delay lines made practical by low-loss propagation of microwave phonons at room temperature in single crystals 03 p0331 A66-12412

Mathematical analysis of noise generation mechanism in axial-flow compressor rotors [ASME PAPER 66-GTIN-42] 14 p2372 A66-26987

Longitudinal acoustic wave generation by electrostrictive mixing of two light beams in single crystals of strontium titanate, rutile and z-cut quartz 19 p3400 A66-36073

X-radiation alignment of quartz crystals for generation and detection of reverberating acoustic echoes at liquid-helium temperatures 20 p3624 A66-38409

Oscillator circuit needing no standby power and pulsed on when required, with application to tone generators 21 p3714 A66-39495

**ACOUSTIC IMPEDANCE**

Energy dissipation of acoustic waves propagating in liquid medium and producing cavitation 01 p0106 A66-10417

Acoustic impedance of liquid He 3 under vapor pressure 09 p1391 A66-20012

Acoustic impedance of liquid He 3 under pressure of up to 12.5 atm 09 p1391 A66-20013

150 mc strip-line circulator using Altrron garnet material, noting isolation, insertion loss, input impedance, etc 10 p1514 A66-21910

Energy dissipation of acoustic waves propagating in liquid medium and producing cavitation 11 p1735 A66-22601

Deposition of cadmium selenide films for transducers of electromagnetic energy to acoustic energy at microwave frequencies, noting use of multiple film assemblies 12 p1839 A66-24616

Limitations imposed on upper atmospheric sonic thermometry by lowering of density with increasing altitude 21 p3741 A66-39428

**ACOUSTIC INSTABILITY**

**S COMBUSTION INSTABILITY**

**ACOUSTIC NOZZLE**

Refraction of injected point source of sound by cold nitrogen jet, noting effects of temperature and velocity fields 07 p1080 A66-17500

**ACOUSTIC RADIATION**

Size and position effect, baffle effect and wake and pressure interaction effect of upstream stator on ducted axial flow fan noise 10 p1483 A66-21746

Acoustic power emitted by coaxial subsonic jets in relation to aerodynamic parameter 13 p2063 A66-25432

Unbounded isothermal atmosphere response to time harmonic point disturbances, exact solutions obtained for frequency ranges of acoustic waves, trapped oscillations and gravity 13 p2183 A66-25613

Sound power from nonuniform flow determined by summing surface and volume integral over sound sources 17 p2905 A66-31949

Multipole analysis of acoustic radiation to explore dependence of mass density on functional character of source distribution 17 p2957 A66-31951

Computer-derived contour plots of electric

and magnetic fields for acoustic electromagnetic plane wave pulse incident on wedge 17 p2875 A66-32390

Fluid loading effect on acoustic radiation from point-driven infinite orthotropic plate 18 p3251 A66-33677

Acoustic resonance tube used to change radiation to sound 24 p4213 A66-42854

**ACOUSTIC SCATTERING**

Correlation of large and small scale roughness for plane wave scattering from rough surface 03 p0335 A66-12818

Acoustic-mode scattering theory obtained with tight-binding approximation of band theory and applied to narrow-band semiconduction in organic molecular crystals 04 p0560 A66-13721

One-dimensional self-consistent problems involving interaction between Langmuir and ionic-acoustic plasma oscillations caused by induced combination scattering of former on latter 04 p0556 A66-14418

Acoustic fluctuations from transmission through water whose refractive index varies randomly in space and time related to range from source to receiver, acoustic frequency and scattering medium parameters 05 p0717 A66-15737

Combination scattering of HF electromagnetic and plasma oscillations propagating over longitudinal standing waves of ionic sound 06 p0914 A66-16145

Acoustic detection of micrometeoroids from rockets, discussing experimental setup, calibration methods and analysis of results 09 p1381 A66-20367

Spin-lattice relaxation of conduction electrons in semiconductors of n-InSb type with scattering at acoustical and optical phonons 14 p2358 A66-27083

Combination scattering of HF electromagnetic and plasma oscillations propagating over longitudinal standing waves of ionic sound 15 p2556 A66-29875

Specular returns and diffuse scattering from Moon and ocean bottom 16 p2653 A66-30932

Sonic boom shape distortion due to reflection and scattering by ground surface with finite acoustic impedance 17 p2905 A66-31947

Electric field effect for free carrier absorption, determining coefficient for acoustic phonon scattering 17 p2976 A66-32264

Scattering of ultrasonic waves from turbulence produced by flow through grid in 6 x 6-inch nozzle 18 p3136 A66-35024

Omnidirectional characteristics of scattering of acoustic waves from statistically rough surfaces, measuring scattering cross section as function of incidence and observation angles 21 p3770 A66-38649

Spin-lattice relaxation of conduction electrons in semiconductors of n-InSb type with scattering at acoustical and optical phonons 22 p3967 A66-40839

Brillouin scattering spectra of crystalline quartz, fused quartz and Pyrex glass, noting acoustic modes in crystalline spectrum 23 p4114 A66-41628

Backscatter of electromagnetic waves from rough layer simulated by acoustic backscattering from partially submerged Plexiglas layer 24 p4173 A66-42624

Acousto-optical deflection and modulation devices, considering specific geometries and scattering-efficiency-bandwidth products 24 p4174 A66-42812

**ACOUSTIC SIMULATION**

Response of simple structure to boundary layer noise examined together with response of supported panel to sound field 01 p0055 A66-10132

Model measurement of radar cross section of target with complex outline by use of ultrasonic waves 02 p0189 A66-11366

Simulation of noise transmission through structures under turbulent boundary layer flow shown to be of doubtful value 10 p1520 A66-21744

Elastic wave diffraction on rigid edge analyzed by employing acoustic analogy 13 p1991 A66-25637

Human reaction to noise under various simulated acoustical conditions of space cabin 13 p2015 A66-25890

Stimulus coding in cochlear nucleus, noting different discharge patterns of units in different subdivisions 16 p2641 A66-31187

**ACOUSTIC STABILITY**

Electron heating effect on acoustic instability of weakly ionized plasma in electric field 06 p0914 A66-16143

Sonic instability in piezosemiconductors with negative differential conductivity 10 p1589 A66-22170

Electron heating effect on acoustic instability of weakly ionized plasma in electric field 15 p2556 A66-29873

Influence of relative thickness of elastic case on acoustic stability of radial modes in solid propellant rockets 16 p2791 A66-31474

Combustion instabilities in solid propellant rocket motors, including acoustic and nonacoustic instabilities 18 p3163 A66-34003

Sonic instability in piezosemiconductor with negative differential conductivity 19 p3441 A66-35784

**ACOUSTIC STREAMING**

Thermoacoustic streaming equations, examining effect of sound on free convection from heated cylinder 16 p2828 A66-30992

Acoustic streaming in flow near vibrating membrane and in flow generated by absorption of magnetoacoustic wave 23 p4108 A66-42035

**ACOUSTIC VELOCITY**

Horizontal propagation of sound from jet engine at ground proximity, discussing effects of vector wind, ground absorption and temperature gradient 07 p1080 A66-17730

**ACOUSTIC VIBRATION**

Acoustic, gravitational and gyroscopic oscillation spectra of baroclinic atmosphere over rotating spherical Earth with emphasis on energy composition 01 p0062 A66-10858

Interior and exterior Dirichlet and Neumann problems for LF acoustic oscillations 02 p0261 A66-12153

Unsteady boundary layer flow of multicomponent gas mixtures, investigating combustion instability in liquid and hybrid rocket motors [AIAA PAPER 65-41] 03 p0444 A66-12796

Oscillations in triaxial mirror ellipsoid and quantum conditions, determining natural oscillation frequency and position of acoustic surfaces 03 p0393 A66-13186

Linear vibratory system response to random impulses, describing nonstationary white noise and mean square resonance 07 p1143 A66-17731

Temperature-velocity phase lag of vibrations of air columns excited by heat supply 08 p1320 A66-19555

Turbulence-excited atmospheric velocity, critical frequency of atmosphere, solar atmospheric power spectrum of acoustic field velocity correlation, solar convection zone, etc 11 p1772 A66-22777

Aerodynamic forces on system of N thin slightly twisted profiles in subsonic unsteady flow for small angle of attack, examining acoustic resonance for arbitrary small harmonic oscillations 12 p1798 A66-24436

Test facility for combined sonic and mechanical excitation of flight and surface-vehicle hardware, using electropneumatic transducers 16 p2676 A66-30444

Formula derivation for acoustic conductivity of combustion surface of condensed system 17 p3033 A66-31896

Magnetoacoustic natural oscillations in solid MHD resonators 17 p2971 A66-32787

Dispersion of ion waves in mercury vapor discharges, carrying out spectral analysis of acoustic and plasma oscillations 18 p3146 A66-34234

Sound field parameter dependence of coefficient of heat transfer from horizontal cylinder at near zero Grashof numbers 19 p3478 A66-35751

Acoustic oscillations in solid propellant rocket chambers, discussing cases of small amplitude perturbations and solving wave equations 20 p3628 A66-37387

Rotational axisymmetric mean flow and damping of acoustic waves in solid propellant rocket 21 p3807 A66-38720

Standing ion acoustic waves between cathode and electrically floating auxiliary metal electrode, noting discharges in

mercury vapor between plane oxide-coated cathode and nickel anode 22 p3954 A66-39817  
 Ion-acoustic wave propagation and damping in plasma with negative ions 23 p4104 A66-41505  
 Hamilton variational principle formulation of damped acoustical-structural vibration motion equations, with application to radiation problems 24 p4291 A66-42858  
 High speed photograph analysis of compressed volumes of plasma formed in reaction of colliding supersonic flares of high power pulsed discharge 24 p4244 A66-42875  
 Radiated pressure field due to LF vibration of slender body of revolution expressed as distribution of sources and doublets along body axis 24 p4238 A66-43047  
**COUSTICS**  
**SA NOISE**  
 Acoustic images arising from binaural repetitive wideband acoustic transients, noting tonal harmonic images and two dominant images of impulsive character 05 p0628 A66-15734  
 Design technique for large capacity acoustic instrument 14 p2296 A66-28036  
 Acoustic problems formulated and solved by finite element method of variational calculus, using both force and displacement procedures 17 p2957 A66-31945  
 Acoustics, shock and vibration bibliography of 1959-1965 meetings of Institute of Environmental Sciences 17 p2904 A66-33040  
 Small and low cost voltage-tunable audio filter using field effect transistors as tuning element in place of inductors for space communications 24 p4180 A66-42334  
**ACQUISITION**  
**DATA ACQUISITION**  
**TARGET ACQUISITION**  
**CRYLATE**  
**LUCITE**  
**ACTH**  
**ADRENOCORTICOTROPIN /ACTH/**  
**ACTINIDE**  
 Alpha emitter actinide element application as heat source for isotopic generators, discussing safety precautions required, economy, etc 18 p3134 A66-34056  
 Fluorescence of rare earth, actinide and transition metal ions in insulating crystals as result of optical excitation, discussing spectroscopic properties and operating characteristics 20 p3575 A66-36969  
**ACTINOMETRY**  
 Quantum yield of CO formation from photolysis of carbon dioxide at wavelengths of argon lines 13 p2017 A66-25801  
**ACTIVATION**  
**NEUTRON ACTIVATION**  
**ACTIVATION ENERGY**  
 Neutron flux in atmosphere measured by method of indium 02 p0284 A66-12130  
 Tracer diffusion measurements in beta titanium covering Arrhenius plots, monovacancy and divacancy diffusions and new data for Sc-46, Sn-113 and P-32 03 p0382 A66-12939  
 Compensation dependence of impurity conduction in n-type germanium containing antimony atoms 05 p0743 A66-15876  
 Ripening of defects induced by fast neutrons in germanium in course of low temperature annealing 06 p0937 A66-17143  
 Titanium oxidation characteristics, determining activation energy of scale formation, oxygen absorption of base metal and total oxygen 09 p1389 A66-20613  
 Kinetics and mechanism of enhanced oxidation of platinum in activated oxygen as function of partial pressure of oxygen atoms 09 p1339 A66-20946  
 Numbers theory for lead sulfide photoconducting films, noting balancing of n and p-type impurities, various activation energies, etc 10 p1578 A66-21574  
 Chemical etching revealing dislocations produced by indentation on single crystals of silicon, measuring edge dislocation velocities at various shear stresses and high temperatures, determining activation energy 11 p1750 A66-22492  
 Early interaction stages of metal oxides with carbon, using thermochromatographic method to determine temperature reaction

onset 12 p1892 A66-23518  
 Germanium specimens with various dislocation densities quenched from high temperatures to introduce vacancies, contamination by copper atom diffusion, finding activation energy 12 p1930 A66-24801  
 Annealing of deformed sodium, noting activation energy distribution annealing kinetics, etc 12 p1897 A66-24923  
 Thallium admixture effect on electrical conductivity of crystalline and liquid selenium, noting decrease and increase in conductivity, determining temperature dependency and activation energy 14 p2359 A66-27177  
 Neutron flux in atmosphere measured by method of indium 14 p2377 A66-28087  
 Activation energy and corresponding concentration of unknown donor level in n-type gallium arsenide 16 p2777 A66-31002  
 LF internal friction of beryllium, noting strain amplitude dependency variation with temperature and purity, obtaining activation energies 16 p2724 A66-31265  
 Surface IR photoconductivity spectra of chemically etched p and n silicon, noting energy distribution, activation energies of centers, etc 16 p2788 A66-31774  
 Epitaxial growth of semiconductors in isothermal system approaching thermodynamic equilibrium, noting growth parameters, activation energy, etc 17 p2886 A66-32495  
 Radiotracer investigation of silicon self-diffusion in high purity single crystal material 18 p3153 A66-33609  
 Photoconductivity of thin layers of CdS, noting intrinsic maximum for various dopants, temperature effect, activation energy, etc 18 p3157 A66-34628  
 High temperature rate constants for H-atom transfers involving light atoms evaluated, using hard sphere collision theory 22 p3950 A66-39924  
 Attachment coefficient and temperature dependence of ionic reactions in F layer for various activation energies 22 p3908 A66-39968  
**ACTIVITY**

**SA RETINAL ADAPTATION**  
 Adaptation theory concepts, examining threshold learning process, Markov chain, learning wave, feedback adaptivity, etc 11 p1647 A66-22299  
 Neural, threshold, majority and Boolean logic techniques compared for reliability and efficiency in adaptive machines and data handling systems 11 p1659 A66-22300  
 Adaptation rearrangements in organisms of mice during and after exposure to high concentrations of carbon dioxide 15 p2438 A66-29479  
**ADAPTIVE CONTROL**  
 Empirical Bayes rule obtained from observing unknown signal of stochastic control 02 p0206 A66-11307  
 Computer program and technique for adaptive digital controller that learns switching regions for optimal control of decision-making regulator 04 p0490 A66-13621  
 Adaptive parametric two-input detectors analyzed and compared to nonparametric detector /polarity coincidence correlator/ under assumption of quasi-stationary inputs 06 p0884 A66-16739  
 Active circuit of second order designed with independently variable parameters for use as transfer function model 07 p1003 A66-17819

Algorithm for data transmission system automatic adaptive equalization, employing change of settings during transmission in response to variation in transmission channel characteristics 11 p1656 A66-23088  
 Adaptive analog-to-digital converter using level sensing and current switching 11 p1660 A66-23180  
 Black box analysis from input and output and estimation of subsystem switching by combination of differential approximation, quasi-linearization and dynamic programming technique 11 p1660 A66-23186  
 Automatic control systems, discussing optimal and on-line adaptive control in electricity, nuclear research, steel industry, numerical problems, etc 11 p1679 A66-23272  
 Stability and transient characteristics in single channel sinusoidal perturbation adaptive system 12 p1853 A66-24336  
 Communications satellite system efficiency enhanced by using automatic adaptive voice multiplexer in ground terminal equipment [AIAA PAPER 66-291] 12 p1822 A66-24761  
 Adaptive utilization of communication satellite systems optimizing dynamic traffic handling of combined ground and satellite communications complex, noting network configurations [AIAA PAPER 66-295] 12 p1822 A66-24764  
 Coupling impedance selection for Perceptron-like adaptive pattern recognition system 13 p2045 A66-25338  
 Equalization systems for stochastic processes, discussing automatic adaptive servocontrol, feedback control and vibration simulation equipment 13 p2048 A66-25848  
 Suboptimal control for system with random or deterministic input by frequency domain techniques, differential approximation and quasi-linearization 13 p2055 A66-26096  
 Adaptive on-off communication system for binary data transmission over noisy channel of unknown attenuation 19 p3302 A66-35709  
 On-line and off-line self-organizing control systems for space vehicle application 19 p3333 A66-36661  
 Markov chain hill-climbing scheme for probable fast-time learning absorbing model 19 p3333 A66-36663  
 Estimation method of learning time of time-varying threshold learning processes /TLP/ 19 p3333 A66-36664  
 Algorithm for learning without external supervision and application to learning control systems 19 p3333 A66-36666  
 Rapid parameter identification system for linear time-invariant plant with only input and output measurable 19 p3336 A66-36709  
 Parameter-plane method analysis of nonlinear equations of asymmetric oscillations in adaptive feedback control systems 19 p3338 A66-36740  
 Block diagram of closed loop automatic control system and conditional feedback control system, both with passive adaptation 20 p3536 A66-36883  
 Adaptive control system requirements for launch vehicles includes insensitivity to parameter variations and adjustability as function of measured feedback conditions 20 p3664 A66-38182  
 Mechanical prediction display to improve human behavior in control system 21 p3700 A66-38454  
 Adaptive telemetry applied to data compression, analyzing redundancy reduction, adaptive sampling, data reconstruction, etc 21 p3708 A66-39480  
**ADAPTIVE CONTROL SYSTEM**  
**SA SELF-ADAPTIVE SYSTEM**  
 Adaptive flight control system, using sampled data to identify aircraft parameter, for high performance aircraft 01 p0009 A66-10005  
 Characteristics of linear optimal systems whose performance criterion is defined by minimum of infinite integral of quadratic function of outputs and inputs of system 01 p0049 A66-10016  
 Adaptive coupler providing extended automatic glide slope beam following by compensating for beam convergence 01 p0101 A66-10036  
 Adaption of linear classifier without data repeating and behavior of classifier parameters 04 p0490 A66-13622  
 Redundant data omission for reducing

transmission bandwidth, associated noise vulnerability and optimum  
 prefiltering 04 p0490 A66-13623  
 Changing spectrum of input and output signals related to sensitive element in parametric circuit of adaptive system 04 p0504 A66-13974  
 Adaptive control system with reference model to achieve given performance 05 p0658 A66-15191  
 Optimal adaptive estimation of sampled stochastic process described by initially unknown parameter vector 06 p0865 A66-16740  
 Comparison of adaptive and nonadaptive control systems for lifting entry vehicles [AIAA PAPER 66-48] 06 p0960 A66-17100  
 Model reference adaptive control systems for calculating system variables of sinusoidal or ramp function input signals 08 p1199 A66-18672  
 Dynamic programming approach to nonparametric problem in calculus of variations 09 p1394 A66-20131  
 Automatic parameter tracking model for adaptive control system, using steepest descent procedure for adjusting parameters 09 p1362 A66-20611  
 Synthesis of adaptive control systems by function space methods 09 p1362 A66-20652  
 Property of identification as applied to adaptive control system 13 p2048 A66-25859  
 Components of gradient of performance criterion in adaptive control systems, employing correlation technique by use of time delay 13 p2051 A66-26067  
 Synthesis problem solution for performance criteria defined by time domain sensitivity function, noting controller structure, parametric minimization and operative adjustment of parameters 13 p2051 A66-26071  
 Adaptive servocontrol equalization system using true integrator instead of RC averager in feedback loop and memory circuit 14 p2267 A66-27664  
 Self-oscillations and stability of model reference adaptive systems with constant plant parameters and control response 15 p2476 A66-29991  
 Circuit selection and analysis of model reference nonscanning adaptive system for rapid response controlled plant 15 p2476 A66-29992  
 Energy feedback adaptive control system for elimination of effects of load inertia variations in servomechanisms 16 p2670 A66-30812  
 Model reference adaptive techniques applied to feedback attitude control system to minimize instrumentation 16 p2809 A66-30830  
 Statistical decision theory determination of parameter variations in closed-loop automatic adaptive control system 16 p2670 A66-30880  
 Design of adaptive systems with forced oscillations, using correlation and filter methods 17 p2902 A66-32573  
 Analog computer and logic circuitry combination for variable frequency signal production, noting application to adaptive control systems 18 p3089 A66-33561  
 Sensitivity methods in control theory - International Symposium on Sensitivity Analysis, Dubrovnik, Yugoslavia, August-September 1964 19 p3326 A66-36009  
 Sensitivity analysis and invariant imbedding, discussing application to adaptive control theory and reduction of boundary value problems to initial value problems 19 p3326 A66-36011  
 Doppler tracking loops for antenna array system adaptive to changes in signal and noise levels, maintaining constant SNR in tracking loop 19 p3321 A66-36413  
 Adaptive roll autopilot in air-to-air interceptor missile, noting application of dither principle, simulation results and noise rejection qualities 19 p3398 A66-36691  
 Model reference adaptive control system synthesis based on Liapunov direct method 19 p3335 A66-36698  
 Parameter adjustment model reference adaptive control of nuclear rocket engine, noting design parameters, system performance, propellant savings estimates and dynamic stability 19 p3398 A66-36699

Optimization of time dependent systems in dynamic programming, using forward and backward algorithm 19 p3391 A66-36700  
 Design synthesis of adaptive control system for linear discrete plants with time varying parameters, noisy measurements and statistical and deterministic disturbances 19 p3337 A66-36711  
 Coordinate control theory of self-adapting systems, considering problems of sensitivity, optimization and invariance 20 p3535 A66-36852  
 Experiments and model for adaptation of human controllers to sudden changes in plant dynamics in time-invariant situations 20 p3508 A66-36860  
 Simulation and analysis of adaptive roll autopilot for air to air missile, using limit cycle with small amplitude controlled by gain changing loop 20 p3595 A66-36865  
 Control algorithms synthesis for analytical adaptive control systems with nonlinear plants investigated with hybrid computer 20 p3536 A66-36876  
 General adaptive approach based upon minimizing moments of power density spectrum of system error in feedback control system 20 p3536 A66-36877  
 Parameter adaptation theory of quick-response self-adapting systems subject to parametric disturbance 20 p3536 A66-36884  
 Adaptive decoding technique for analyzing information-carrying signals in order to control signal to noise ratio during transmission time of single compound signal 20 p3522 A66-37384  
 Equations of motion of continuous single loop adaptive control system with scan modulated parameters, noting stability analysis method 24 p4188 A66-42479

## ADAPTIVE FILTER

Filter adapting to spectral density of incoming sampled signal, reconstructing continuous signal from samples 05 p0652 A66-14597  
 Structure of frequency filters in self-adaptive circuit 07 p1005 A66-17404  
 Simulation results of adaptive tracking filter application to stabilization of structural bending modes of SL-B launch vehicle 21 p3821 A66-38877  
 Time varying adaptive filter structure for providing minimum mean square estimate of signal in nonstationary channels for communications satellites 23 p4039 A66-41590  
 Fixed filter structures optimized according to criterion of minimizing average mean square error for nonstationary and statistical description of signals in noise 23 p4039 A66-41591

## ADDITIVE

SA ANTIOXIDANT  
 SA OIL ADDITIVE  
 SA PROPELLANT ADDITIVE  
 Cesium fluoride additive effect on emitter work function and power output of cesium diodes with various emitter materials 05 p0618 A66-15558  
 ADENOSINE MONOPHOSPHATE  
 Occurrence of adenosine monophosphate inhibition of carbon dioxide fixation photosynthetic and chemosynthetic autotrophs 18 p3056 A66-33697  
 ADENOSINE TRIPHOSPHATE /ATP/  
 Ribonucleoside triphosphatase in rabbit reticulocytes, discussing distribution in extracts, behavior in purification of amino acid and properties 17 p2859 A66-32553

## ADHESION

SA BONDING  
 Structural metal adhesion in space environment as affected by time, pressure and temperature 13 p2108 A66-25646  
 Time, pressure and temperature effects on adhesion of structural metals in vacuum and space environment 14 p2316 A66-28005  
 Surface area and condition and effect on adhesion of aluminum plates 14 p2304 A66-28206  
 Nature of forces causing adhesion of coatings produced by plasma jet sputtering techniques 15 p2505 A66-28752  
 Vacuum coating techniques for thin film layers for bonding, examining adhesion, bonding layer reinforcement and surface oxidation 23 p4043 A66-41194  
 Welding and adhesion techniques in aircraft and space vehicle construction -

Conference, Hanover, West Germany, May 1966 23 p4073 A66-41530

Adhesion force of silicates in ultrahigh vacuum as function of load force, temperature, surface roughness and crystal orientation 23 p4131 A66-41848

## ADHESIVE

Strength of adhesive joints showing ratio of normal and shear stress as important parameter, using crack propagation theory 01 p0152 A66-10380  
 Improvement of mechanical properties of structural adhesives and composite materials at cryogenic temperatures 12 p1899 A66-24385  
 Adhesives and sealants in electronics, discussing resin elastomers, epoxies, polyurethanes, polysulfides, outgassing, damping, radiation effects, etc 14 p2318 A66-27103  
 Strength of adhesive-bonded lap joints as affected by changes in temperature and fatigue 14 p2401 A66-27772  
 High temperature insulating adhesives for vacuum applications tested, including outgassing rate, mass spectra of evolved gases, electrical and mechanical properties 17 p2942 A66-31980  
 Rate of setting of adhesive joints in relation to differential thermal contraction of adhesive polymers relative to metal adherend 17 p3019 A66-31986  
 Adhesive bonding of aluminum structures including aircraft and space applications 17 p3023 A66-32266  
 Thermoconductivity, mechanical stress, processing characteristics, etc, of various adhesives used in integrated circuits, noting neoprene cement 18 p3077 A66-34051  
 Nondestructive testing of adhesive bonded structures using ultrasonic-resonant instrument, noting detection of voids and cohesive strength determination 19 p3362 A66-35329  
 Very rapid-curing capsular adhesive developed for use in astronaut-to-space vehicle attachment device 19 p3363 A66-35949  
 Testing of adhesive bonding at high temperatures for use in reentry vehicles, using IR energy on specimen preloaded in shear [ASME PAPER 66-MD-38] 21 p3742 A66-38488  
 Surface treatment of joints for structural adhesive bonding design, material selection and metal surface processing for adhesion [ASME PAPER 66-MD-39] 21 p3742 A66-38489  
 Adhesive performance testing, noting mechanical methods and types of test specimens [ASME PAPER 66-MD-46] 21 p3742 A66-38492  
 Adhesives and joining processes in mechanical quality control 21 p3745 A66-39465  
 Adhesively bonded joints withstand severe thermal shock and have excellent bonding with high strength structural alloys in cryogenic liquids 22 p3937 A66-39778  
 Polybenzimidazole adhesives properties suitable for bonding metals 22 p3926 A66-40275  
 Polybenzimidazole adhesive properties for structural bonding as affected by processing parameters 22 p3937 A66-40276  
 High temperature adhesive properties of epoxy, epoxy-phenolic, polybenzimidazole and polyimide 22 p3937 A66-40278  
 Polyaromatic adhesives for temperature resistant sandwich construction in lap-shear strength and preliminary sandwich evaluations 22 p3926 A66-40279  
 Adhesive strength cured by integrated resistance heaters compared with autoclave and/or press bonding 22 p3926 A66-40280  
 Adhesive and bonding techniques evolution for general and specific use in aircraft and aerospace industry, noting elastomeric and ceramic adhesives 22 p3928 A66-40418  
 Metal adhesives in aircraft and space industry, particularly in construction of laminar and sandwich elements of wings 23 p4073 A66-41532  
 Welding and gluing of third stage of ELDO-A rocket 23 p4073 A66-41533

## ADIABATIC EQUATION

Adiabatic heating and temperature

recovery factor of tubes carrying liquids of high Prandtl number 01 p0165 A66-10905  
 Bogoliubov adiabatic hypothesis in quasi-linear theory of plasma 01 p0115 A66-11088  
 Hydrodynamic equations for one-dimensional, adiabatic, frictionless, ideal-gas flow and general matrix form equations for coupled chemical reaction kinetics of C-H-O/N systems 02 p0303 A66-11533  
 Adiabatic motion determination of charged particle containment in combined mirror-multipole cusp magnetic fields 05 p0718 A66-14712  
 Transient behavior of heated stellar atmosphere, examining unsteady flow caused by sudden application of heat to static adiabatic atmosphere 08 p1286 A66-18541  
 Adiabatic laminar flow in concentric sleeve seal where rotating shaft changes fluid temperature and viscosity  
 ASLE PREPRINT 65AM 4C3]  
 Nonisentropic simple waves in two-dimensional steady flow of ideal gas 08 p1210 A66-19585  
 Scalar formulation of ideal charged adiabatic gas flow in presence of gravitational and electromagnetic fields 10 p1524 A66-21814  
 Positron-helium scattering below positronium threshold, using adiabatic method previously tested in positron hydrogen scattering, presenting phase shifts and momentum transfer cross section computations 13 p2134 A66-26262  
 Violation of second and third adiabatic invariants, examining mirror point change of trapped particles under displacement of guiding centers along force-lines and particle diffusion 13 p2176 A66-26356  
 Adiabatic dispersion into empty space of coaxial gaseous ellipsoid studied by Tsianikov exact solution of equations of gasdynamics 14 p2278 A66-28060  
 Adiabatic compression device for plasmas containing hot ions 14 p2348 A66-28312  
 Characteristic for partially invariant solutions of hydrodynamic equations, specifically adiabatic plane-parallel gas motion 15 p2478 A66-29177  
 Adiabatic invariants and third integrals of motion in periodic potentials in periodically time-dependent Hamiltonian systems of n degrees of freedom 17 p2945 A66-32292  
 Pulsation properties of stellar models representing RR Lyrae stars obtained, using adiabatic and nonadiabatic linearized pulsation equations 20 p3652 A66-37613  
 Adiabatic theory of charged particle motion, considering first-order effects in radius of gyration and Alfvén theory 20 p3603 A66-38303  
 Adiabatic exponents in equations for gas boiling by vaporization 21 p3835 A66-38905  
 Hydraulic analogy methods for simulation of internal gas flows containing combination one 22 p3901 A66-40500  
 Adiabatic motion of auroral particles in model of electric and magnetic fields surrounding Earth, commenting on importance of higher order terms in asymptotic expansion 22 p3914 A66-40561  
 Adiabatic gas flow pattern in plane parallel channel near critical point 22 p3902 A66-40815  
 Adiabatic equation of state for homogeneous compressible anisotropic plasma wave equation invalid for homogeneous case 24 p4243 A66-42639  
 Adiabatic theory and lowest order invariants applied to Van Allen radiation indicate that without collisions particles could remain in geomagnetic field 24 p4240 A66-43110  
 MITTANCE  
 ELECTRIC IMPEDANCE  
 ADRENAL GLAND  
 Electrophysiological study of pituitary-adrenal axis activation during rapid eye movement /REMS/ in human urology patients 17 p2859 A66-32305  
 Correlation of adrenal steroids and alpha frequency in EEG 17 p2860 A66-32556  
 ADRENAL METABOLISM  
 Adaptive responses of adrenal cortex to some environmental stressors, exercise and acceleration 17 p2862 A66-33093

ADRENALINE  
 S EPINEPHRINE  
 ADRENERGICS  
 Performance and physiological effects of adrenalin or insulin in human subjects 06 p0813 A66-16829  
 ADRENOCORTICOTROPIN /ACTH/  
 Adrenocorticotrophin-releasing hormone appears in peripheral blood of rats under physiological stress, noting role of pituitary gland 14 p2228 A66-27811  
 Metabolic correlates of glucocorticoid induction of enzymes in man studied in terms of ACTH induced changes in tryptophan turnover along inducible pathways 24 p4166 A66-43168  
 ADSORPTION  
 Quantum theoretic probability of trapping inert gas atom on solid surface with linear lattice 01 p0108 A66-10634  
 Spectral emissivity calculations for parallel bands of carbon dioxide at 4.3 microns between 150-600 degrees K, comparing experimental measurements with theoretical calculations 03 p0393 A66-13104  
 Gas phase nonideality and mean column pressure effects on sample retention in gas-solid partition chromatographic systems with real carrier gases 04 p0472 A66-13396  
 Adsorption at semiconductor and gel surfaces discussing chemisorption theory, ionizing radiation effect and structural parameters 04 p0563 A66-13768  
 Ultrapurification discussing definition, purification techniques, analytical techniques /e.g. emission and mass spectroscopy/ and role in biochemistry, metals and materials 04 p0474 A66-13867  
 Erected dipole model of adsorbed layer in fluorinated molybdenum filaments exposed to cesium vapor 05 p0737 A66-14986  
 Gas adsorption on molecular sieves, discussing separation caused by electrostatic forces and electric fields 06 p0819 A66-16730  
 Heat capacity of adsorbed He 3 films at temperatures from 0.1 to 4 degrees K, with adsorption surfaces made of monolayers of argon preadsorbed on copper 09 p1392 A66-20020  
 Low-energy electron diffraction studies adsorption of cesium on Si /111/ 10 p1576 A66-21551  
 Germanium dioxide surface adsorption characteristics with respect to water vapor 10 p1583 A66-21983  
 Adsorption of CO radicals on three types of magnesium oxide using EPR techniques, noting spectrum of adsorbed radical, bonding, etc 12 p1916 A66-23619  
 Nitrogen adsorption effect on thermionic emission from polycrystalline tungsten ribbon at high and low applied fields, explaining work function changes 13 p2162 A66-25381  
 Adsorptive phenomena effect on reaction kinetics of electrochemical oxidation involving organic materials on platinum electrode 13 p2017 A66-25676  
 Elutration diagrams in determination of adsorption enthalpies from temperature dependence of retention volume in band maximum 14 p2232 A66-27604  
 Electrostatic theory of physical adsorption applied to gas-solid chromatography, discussing chromatographic inseparability of argon and oxygen at room temperature, prediction of elution order of many gases, etc 16 p2646 A66-30646  
 Thermionic and adsorptive properties of zirconium nitride in cesium vapor, determining current-voltage characteristics and temperature dependence 16 p2755 A66-31732  
 Gas sorption and desorption processes at low pressures, discussing molecular adherence to cold solid surfaces, adsorption mechanism of isotherms, vacuum generation via cryotrapping effect, etc 20 p3605 A66-38088  
 Thermal accommodation coefficients of He on tungsten and hydrogen on hydrogen-covered tungsten at temperatures of 325, 403 and 473 degrees K 23 p4033 A66-42078  
 ADVANCED ORBITING SOLAR OBSERVATORY /AOSO/  
 S AOSO

ADVANCED RANGE INSTRUMENTATION  
 SHIP /ARIS/  
 Calibration of ARIS /Advanced Range Instrumentation Ships/ radars for cross section measurements 04 p0479 A66-13611  
 ADVECTION  
 Short-range forecasting of stratified cloudiness, noting linear dependence between variations in dew point and air temperature near Earth surface for aperiodic processes 16 p2742 A66-30791  
 Wind distribution in atmospheric boundary layer under conditions of advection from pilot balloon observations 20 p3594 A66-38376  
 AE-A  
 S EXPLORER XVII SATELLITE  
 AERIAL PHOTOGRAPHY  
 SA PHOTOGRAMMETRY  
 Structural character of modern black and white aerial photography films and relation to image definition 01 p0068 A66-10694  
 Method for computing base of aerial photograph and maximum altitude for desired resolution 01 p0068 A66-10695  
 Photometric system for measuring linear and angular vibration of aerial photography apparatus 01 p0068 A66-10696  
 Image motion and corresponding loss of resolution from rotational motions of airborne vehicle and camera parameters 02 p0228 A66-11381  
 Multistrip transformation of aerial photographs of mountainous regions to obtain scale maps 02 p0229 A66-11696  
 Multistrip transformation of aerial photographs using rigid special masking frames in accordance with contour line 02 p0231 A66-11971  
 Determination of contrast range of optical images obtained in aerial camera as function of atmospheric and optical factors 03 p0368 A66-12504  
 Operation and uses of triode-based electronic control device for pulse aerial cameras 03 p0368 A66-12505  
 Commercial aerial camera objectives estimated with TsNIIGAIK electron-optical bench 04 p0519 A66-13662  
 Stereometrograph for photographing relief and contours in compilation of topographical charts from vertical aerial photographs 04 p0519 A66-13663  
 Book on French aerial photography, emphasizing methodology rather than reproduction of samples 04 p0523 A66-14380  
 Airborne albedo measurements of ice in Ross Sea, Antarctica, for various solar elevations and altitudes 05 p0669 A66-14937  
 Airborne albedo measurements of various representative underlying surfaces in Antarctica 05 p0669 A66-14938  
 Renovation techniques for topographic maps 06 p0879 A66-16325  
 Color spectrozonal photography used in plotting topographic maps 06 p0881 A66-16752  
 Aerial photography in geology, climatology and urban development 06 p0882 A66-16937  
 Criteria for quality of aerial camera systems including allowances for ground scene properties, photographic grain and human observer, noting role of resolving power and transfer function 07 p1035 A66-18154  
 Combination of geometrical and physical optics with modern system design such as computers, cameras for aerial use, space tracking, etc 09 p1403 A66-20918  
 Large-scale aerial photographs applied to cartography by taking pictures of same area at varying scales 10 p1534 A66-21132  
 Electronic color correction during aerial photograph printing by employing specially programmed computer 10 p1534 A66-21329  
 Hyperaltitude photography, applications and advantages 10 p1535 A66-21523  
 Earth atlas based on high altitude photography, Nimbus and IR imagery and high altitude radar imagery 10 p1532 A66-21527  
 Mutual orientation of oblique aerial photographs at nadir distance greater than 50 degrees for simultaneous rotation of y and z axes of universal autograph 10 p1536 A66-21800  
 Precise airborne geodetic survey system capable of measuring lines up to 900 nautical miles and determining nadir of aerial photographs to 24

ft 10 p1533 A66-22045  
 Mechanical swivel arm that can be used with several types of reflecting stereoscopes for inspecting aerial photographs 11 p1705 A66-22661  
 Flight and navigation procedures and requirements for civil aerial photography 11 p1705 A66-22662  
 Image movement from aircraft velocity for vertical and oblique panoramic cameras 13 p2078 A66-25605  
 Reflector-light source requirements for homogeneous format illumination in night aerial photography 13 p2081 A66-26005  
 Spatial distribution of four cloud fields studied by photometry of aerial photographs, determining statistical parameters 14 p2325 A66-27537  
 Distinct separation of colors on aerial landscape photography 14 p2295 A66-27654  
 Structural character of modern black and white aerial photography films and relation to image definition 15 p2497 A66-28555  
 Method for computing base of aerial photograph and maximum altitude for desired resolution 15 p2497 A66-28556  
 Photometric system for measuring linear and angular vibration of aerial photography apparatus 15 p2497 A66-28557  
 Aerial photograph interpretation of landscape in terms of tone, texture and stereo effect 15 p2500 A66-28967  
 Soviet papers on theory and practice of interpretation of aerial photographs 15 p2503 A66-30004  
 Improvement of negative quality of aerial photographs 15 p2504 A66-30005  
 Spectral brightness of haze and effect on interpretation of aerial photographs 15 p2504 A66-30006  
 Aerial photograph interpretation theory including detection, recognition and interpretation of object on photograph 15 p2504 A66-30007  
 Stereoscopes for aerial photograph interpretation 15 p2504 A66-30009  
 Spectrometric analysis of aerial photograph, using computers 15 p2504 A66-30010  
 Topographic interpretation of aerial photographs 15 p2504 A66-30011  
 Aerial photograph interpretation for sparsely populated regions 15 p2505 A66-30012  
 Landscape interpretation of aerial photographs 15 p2505 A66-30013  
 Soil investigation and geological map preparation from aerial photographs 15 p2505 A66-30014  
 Interpretation of vegetation types from aerial photographs 15 p2505 A66-30015  
 Military aerial mapping program, noting camera lens distortion, shutter, stabilization, films, etc 16 p2703 A66-30511  
 Evaluation of nonstereoscopic pairs of photographs obtained from vertical base by moving camera, determining spatial coordinates of points on photographs 16 p2703 A66-30512  
 Computational photogrammetry, deriving relation between image and object space, using collinearity conditions and orientation matrix 16 p2703 A66-30513  
 Geometrical quality of elements of exterior orientation after double and single point resection in space, noting position determining characteristics of linear and angular parameters 16 p2704 A66-30515  
 Multisensor airborne reconnaissance mission planning and data acquisition 16 p2704 A66-30516  
 Aerial photography of Earth surface, discussing application in Earth and life sciences 17 p2925 A66-32609  
 Integrated elements for aerial surveying and mapping 18 p3109 A66-33739  
 Screening tests to predict potential ability of persons to be trained as aerial photo interpreters 18 p3061 A66-33744  
 Aerial image reproduction on Lith type and extreme resolution emulsions, noting experimental results on sharpness, line width changes and methods of testing with photomicrography 19 p3353 A66-35315  
 Field determination of coordinates of points of mountainous terrain from aerial photographs with known elements of external orientation 19 p3353 A66-35363

Solar altitude relationship to scene luminance for aerial photographs determined by photographic photometry 19 p3358 A66-35816  
 Photogrammetric network for large-area phototriangulation using star-tracking airborne cameras, discussing theoretical and technical aspects 20 p3551 A66-37472  
 Airborne electronic command device for measuring time intervals corresponding to cruising speed/ true flight altitude ratios up to 40 21 p3735 A66-38569  
 Colored spectrozonal aerial photographs in topographic decoding of photographs of wooded regions 21 p3735 A66-38570  
 Distortions in aerial photographs due to errors in cameras, noting determination methods in various countries 22 p3919 A66-40622  
 Spatial distribution of four cloud fields studied by photometry of aerial photographs, determining statistical parameters 24 p4233 A66-42323

## AERIAL RECONNAISSANCE

Analytical aerial triangulation noting accuracy of photographs, stereocomparator, etc 02 p0229 A66-11695  
 Canadian photogrammetry for analytical aerial triangulation, using mathematical model and matrix 04 p0516 A66-13898  
 Aerial observation of sea surface, measuring wind direction, speed, wave direction and period of Gulf Stream along coast 10 p1532 A66-21524  
 Near-real time acquisition of aerial reconnaissance radar imagery from continuously moving and static displays 12 p1808 A66-23921  
 Automatic target recognition, discussing machine analysis problems of aerial reconnaissance data 13 p2124 A66-25657  
 Earth surfaces reflecting and polarizing properties in aerial reconnaissance 17 p2918 A66-32611

## AEROBEE ROCKET

Solar X-ray photographs, describing Aerobee rocket mounted telescope using grazing incidence optics 05 p0763 A66-15289  
 Plasma sheath effects on antenna impedance probe and retarding potential probe installed on two Aerobee 150 rockets 08 p1181 A66-18746  
 Night sky sources for soft X-rays, examining data obtained by Aerobee 4.70 detectors 10 p1598 A66-21102  
 Aerobee rocket measurements of cosmic X-ray sources emanating from Cygnus A, M-87 and galactic supernova remnant Cassiopeia A 13 p2174 A66-25836  
 X-ray emission from Sco X-1 and Crab Nebula sources observed with Aerobee 150 18 p3186 A66-34157  
 Aerobee rocket instrumentation and rocket sounding techniques for investigating far UV auroral emission 20 p3552 A66-37594  
 Particulate contamination control of ultraclean collecting surface for extraterrestrial matter in Aerobee 150 22 p3922 A66-40041  
 Aerobee rocket preliminary tests and FR-1 project 22 p3986 A66-40160  
 FR-1 satellite contact with surrounding plasma ensured by cathode device tested on Aerobee rocket 22 p3876 A66-40163

## AERODYNAMIC CHARACTERISTICS

## SA LATERAL STABILITY AND

## CONTROL

## SA LONGITUDINAL STABILITY AND

## CONTROL

## SA STATIC AERODYNAMIC

## CHARACTERISTICS

Air data equipment trends in subsonic and supersonic control 01 p0033 A66-10680  
 Stopped and slow rotor aircraft configuration for fundamental limitations on forward flight speed of compound helicopters [SAE PAPER 650806] 01 p0012 A66-10847  
 Variable sweepback wing determination of pivot position influence on aerodynamic characteristics while wing is turning, deducing lift and thrust center laws [ONERA TP 272] 02 p0175 A66-11680  
 Aerodynamic characteristics of blower in form of propeller with rim 03 p0314 A66-12536  
 Wind tunnel research of deep stall

aerodynamic characteristics of T tail analyzed as preliminary design guide [AIAA PAPER 65-737] 03 p0317 A66-12547  
 Measured aerodynamic characteristics of cone-cylinder-cone model using magnetic balance system, discussing techniques, errors and data 03 p0315 A66-12773  
 Aerodynamic spacecraft deceleration systems examined by hydraulic analogy, noting Mach number effects on flow disturbances 04 p0507 A66-13533  
 Effect of incompressible fluid flow boundaries on unsteady aerodynamic properties of thin curved profile undergoing small amplitude oscillations 04 p0454 A66-13574  
 Extremal problems in aerodynamics, discussing mathematical and physical models for optimum aerodynamic shape 04 p0455 A66-13995  
 Volterra integral applied to steady supersonic flow past annular wings of various configurations to determine aerodynamic characteristics 04 p0455 A66-14139  
 Aerodynamic characteristics of flat rectangular plate placed normal to flow of highly rarefied gas 04 p0456 A66-14141  
 Aerodynamic characteristics of fixed-geometry double delta wing SST, noting low speed handling improvement due to vortex flow [AIAA PAPER 64-591] 05 p0610 A66-15069  
 Static elastic deformation and associated change of aerodynamic characteristics of flight vehicle subject to aerodynamic and inertia loading 05 p0609 A66-15784  
 Laminar profile characteristics affected by wind tunnel flow turbulence 07 p1018 A66-17857  
 Aerodynamic and heat transfer characteristics of cross-stream wedge in low density aerodynamics, investigating transition from continuum to free molecular flow 07 p0982 A66-18126  
 Numerical computer solutions for several nonlinear gas flow problems in high speed aerodynamics 07 p0983 A66-18143  
 Aerodynamic characteristics of wakes behind hypervelocity bodies [AIAA PAPER 66-53] 08 p1162 A66-18952  
 Peculiarities of aerodynamic characteristics of flow past plate and pointed and blunt slender cones in viscous hypersonic thermodynamically ideal gas 08 p1165 A66-19571  
 Book on thin wing and aerodynamic characteristics in subsonic gas flow 09 p1327 A66-19975  
 Aerodynamic characteristics of arbitrary slender reentry bodies predicted by conformal mapping method 10 p1481 A66-21942  
 Hypersonic wind tunnel measurements to Mach 17 of aerodynamic characteristics of family of hypersonic gliders [ONERA TP 331] 11 p1635 A66-23198  
 Working section size and shape for V/STOL wind tunnels, emphasizing wall effect magnitude limitation, aircraft aerodynamic and propulsion system characteristics 12 p1857 A66-23657  
 Aerodynamic characteristics of shape, constructed by current surfaces of supersonic flows past cones, noting lengthwise variation of cross sections 12 p1798 A66-24431  
 Aerodynamic characteristics of rectangular plates in hypersonic flow of rarefied gas: differing in aspect ratio, thickness and angles of attack, determining maximum lift drag ratio 12 p1798 A66-24444  
 Effect of gap between wing tip and end plates for wing with minimum induced resistance and unrestrained end plates showing aerodynamic characteristics differences between these wings and wing without gaps 13 p1989 A66-25007  
 Three-dimensional plane shock wave intersection in space, noting parameter range for which two solutions exist 13 p1991 A66-2563  
 Double-delta supersonic air transport low speed operational characteristics, noting wind tunnel tests and design parameters 13 p1991 A66-2576  
 ONERA laboratory weightlessness simulation tests on liquids, accelerometers

- aerodynamic braking, etc 13 p2058 A66-26371  
Subsonic business aircraft manufacturing processes and techniques relation to production time and costs [SAE PAPER 660206] 13 p2087 A66-26395  
Aerodynamic characteristics of NAL-16 research rocket of Japan, noting results from transonic and supersonic wind tunnel tests 14 p2220 A66-27670  
Unsteady aerodynamic characteristics of model helicopter rotor operating in vortex ring state, considering thrust and torque fluctuation 16 p2634 A66-31322  
Unsteady aerodynamics of tandem rotor operating in vortex ring 17 p2840 A66-32744  
Vortice effects on aerodynamic characteristics of aircraft and missiles 17 p2841 A66-33081  
Measurement method for aerodynamic damping of helicopter rotors in forward flight 18 p3047 A66-33684  
Aerodynamic pressure on deformable, oscillating and rigid wing surfaces in subsonic flow 18 p3049 A66-34733  
Aerodynamic design criteria for maintaining laminar flow control including instability limit, surface roughness, acoustical environment, etc 18 p3050 A66-34951  
Approximate and characteristic methods to predict effect of gas composition on forces and static stability of planetary entry configurations in air and assumed Martian atmospheres [AIAA PAPER 65-318] 19 p3275 A66-35605  
Wind tunnel research of deep stall aerodynamic characteristics of T tail analyzed as preliminary design guide [AIAA PAPER 65-737] 19 p3280 A66-36491  
Book on aeromechanics of flight vehicles including structure and physical properties of atmosphere, wing characteristics, research methods, aerodynamic characteristics of principal units of aircraft and rockets, etc 21 p3695 A66-39288  
Aerodynamic breakup of liquid drops in flow behind plane shock wave analyzed via high speed photography, noting experimental setup, parameter variation, etc 22 p3899 A66-40198  
Dynamic stability and aerodynamic damping derivative of Apollo launch escape vehicle, using wind tunnel tests [AIAA PAPER 66-770] 22 p3895 A66-40651  
Aerodynamic analysis of complex shapes in hypersonic flow, using digital computer [ICAS PAPER 66-25] 22 p3847 A66-40665  
Supersonic aerodynamic problem of wing-body interaction and solution within lifting-surface theory, using analog method [ICAS PAPER 66-22] 23 p4008 A66-41254  
Annular vortices method applied to determine aerodynamic characteristics of lifting propeller in axial and oblique flows 23 p4010 A66-41785  
**AERODYNAMIC COEFFICIENT**  
**SA LIFT COEFFICIENT**  
Measurements of three coefficients for rectangular, trapezoidal, sweptback, triangular and parabolic wings in subsonic and supersonic flow 07 p0979 A66-17480  
Viscous aerodynamic contributions to forces and moments on front face of blunt lifting reentry vehicle in producing trajectory error [AIAA PAPER 66-464] 16 p2631 A66-31471  
Optimal stochastic control system with control of linear plants approximating characteristics of airframes, allowing plant parameters to vary randomly 19 p3329 A66-36030  
Fluid dynamic fields around slender rotating bodies, discussing simple theories for evaluating aerodynamic coefficients 20 p3492 A66-37431  
Downwash corrections for wings with arbitrary sweepback in open and closed circular wind tunnels with base plate 21 p3694 A66-38936  
Aerodynamic coefficients of large-aspect-ratio fan-in-wing airfoil, noting that velocity field consists of inflow to fan, parallel flow and circulation flow 24 p4158 A66-43050  
**AERODYNAMIC DRAG**  
**AERODYNAMIC FORCE**  
Nonmathematical notes on propeller whirl flutter 02 p0300 A66-11993  
Aerodynamic damping effect on cascading double circular arc blades vibrating in transitory mode 03 p0313 A66-12397  
Pressure distributions on cambered bodies of arbitrary cross section at angle of attack applied to transport fuselage afterbody design [AIAA PAPER 65-718] 03 p0314 A66-12543  
Integration of propulsion systems with airframe, emphasizing aerodynamic lift and drag 05 p0605 A66-14934  
Pressure distribution on oscillating two-dimensional symmetric airfoil in incompressible flow, examining trailing edge angle influence 07 p0982 A66-18133  
Aerodynamic penetration and radius in drag and lift during atmospheric entry process [AIAA PAPER 66-16] 07 p0983 A66-18447  
Cross flow relation to force distribution on circular cylinders curved in plane containing wind vector at subcritical Reynolds number 09 p1328 A66-20746  
Nonstationary supersonic flow in near sonic range, calculating pressure distribution in oscillating profile 09 p1328 A66-20875  
Reentry orbits for manned spacecraft using aerodynamic lift and drag forces for reentry 10 p1606 A66-21264  
Effects on man of direct /escape/ and indirect /aircraft flight/ movement through atmosphere, considering moderate and high-speed aerodynamic forces 10 p1488 A66-22106  
Aerodynamic torque effect on UK-3 satellite precession rate 11 p1777 A66-22966  
Aerodynamics of heavily loaded wing, discussing relation of longitudinal shear before and after deformation of vortex street 11 p1635 A66-23170  
Aerodynamic forces on system of N thin slightly twisted profiles in subsonic unsteady flow for small angle of attack, examining acoustic resonance for arbitrary small harmonic oscillations 12 p1798 A66-24436  
Satellite orbit plane change by external burning aerocruise [AIAA PAPER 65-21] 12 p1954 A66-24695  
Airfoil equilibrium stability under elastic force and uniform wind action 13 p2062 A66-25402  
Mathematical and numerical determinations of aerodynamic forces on harmonically oscillating cylindrical shell under subsonic and supersonic speeds and comparison with slender body theory results 14 p2218 A66-27405  
Aerodynamic forces acting on harmonically oscillating thin profile in stalled plane parallel flow of ideal incompressible fluid 14 p2220 A66-27695  
Potential complex and forces in perfect incompressible fluid at rest at infinity with free vortices determined by pointless profiles excited by arbitrary motion 15 p2479 A66-29637  
Solar environment and aerodynamic drag effect on deflection of structural booms in space [AIAA PAPER 66-502] 16 p2821 A66-31478  
Newtonian formulas for determining pitch and roll and normal force derivatives for various types of conical and spherical bodies 17 p2838 A66-32333  
Aerodynamic forces acting on wings with braking flaps 19 p3275 A66-35365  
Theoretical nonlinear method for calculating aerodynamic forces on low-aspect-ratio wings at high angles of attack and wide range of Mach numbers 20 p3491 A66-36907  
Integration technique for determining unsteady aerodynamic forces at subsonic speeds, noting role of kernel of integral equation 20 p3491 A66-36955  
Book on aerodynamic experiment in machine building, noting self-simulation problems of machines using gas dynamics, analyzing wind tunnels 21 p3694 A66-38743  
Gyrator shape with minimum aerodynamic resistance, discussing cases with constant and varying moment of inertia 21 p3739 A66-39327  
Aerodynamic resistance of cylindrical rotor determined, using method based on formulas for resistance factors of cylindrical surfaces and rotor encasement 21 p3739 A66-39328  
Oblique shock wave formal determination of aerodynamic forces and pressure distribution on delta wings in supersonic or moderately hypersonic flow 21 p3695 A66-39602  
Aerodynamic problem of steady potential flow and added mass in unsteady motion of idealized hemispherical parachute 22 p3845 A66-40591  
Shock tunnel external burning experiments to investigate effects of reactive fuel injection into air stream flowing around body [AIAA PAPER 66-744] 22 p3893 A66-40631  
Free flight model technique in hypervelocity shock tunnel for aerodynamic force and moment measurement by optical instrumentation [AIAA PAPER 66-771] 22 p3847 A66-40652  
Total aerodynamic forces and moments of free flying body in wind tunnel determined from accelerations measured and telemetered by onboard instruments [AIAA PAPER 66-775] 22 p3896 A66-40655  
Side forces and moments on Tomahawk sounding rocket with and without spin at high Reynolds number and Mach 5 [AIAA PAPER 66-754] 23 p4008 A66-41329  
Unsteady supersonic gas flow around lattice of thinly curved plates for calculation of aerodynamic forces and moments acting on oscillating profile 23 p4009 A66-41722  
Displacement detector to provide direct measurement of shear forces in aerodynamics on small surface elements in hotshot wind tunnels 24 p4207 A66-42169  
Piezoelectric balance for aerodynamic force measurements in hypersonic shock tunnel, discussing design, calibration and performance characteristics 24 p4190 A66-42174  
Simultaneous FM telemetry measurement of four aerodynamic forces acting on free flying models in wind tunnel 24 p4209 A66-42190  
**AERODYNAMIC HEAT TRANSFER**  
Equilibrium radiative transport properties of high temperature air coupled with aerodynamic flow field generated by planetary reentry vehicles 01 p0163 A66-10784  
Aerodynamic properties of simple bodies in hypersonic transition regime 08 p1164 A66-19132  
**AERODYNAMIC HEATING**  
**SA AEROTHERMOELASTICITY**  
Theoretical and experimental work in flow field analysis has enhanced ability to predict aerodynamic heating in atmospheric entry 01 p0143 A66-10800  
Preliminary design for optimum combination of insulating and structural materials for hypersonic cruise vehicles 03 p0436 A66-12752  
Glider reentry descent trajectories from near Earth orbit calculated, emphasizing landing accuracy and mechanical and thermal stresses 04 p0584 A66-13525  
Aerodynamic analysis of vapor pressure of tektite glass and bearing on atmosphere entry trajectories of tektites 12 p1952 A66-24895  
Aerodynamic heating of vehicles entering Earth atmosphere at hypersonic speed, noting blunt body concept, radiative and convective heating, heat shield weights, etc 13 p1989 A66-25153  
Aerodynamic heating of ferrous Santa Catharina meteorite 14 p2381 A66-27350  
Thermal model for performance of cork insulation on Minuteman missile in launch environment [AIAA PAPER 65-117] 16 p2827 A66-30893  
Measuring aerodynamic heating of wind-tunnel models by temperature sensitive paint, noting ambient pressure effect 16 p2682 A66-30916  
Stagnation region for body of revolution in analyzing temperature, velocity and atom hypersonic flow with low Reynolds number, concentration under aerodynamic heating 16 p2686 A66-31037  
Gap size effect on pressure and aerodynamic heating over flap of blunt delta wing in hypersonic flow [AIAA PAPER 66-408] 17 p2840 A66-32747  
Australites, external form and structure, describing specific gravity value variation

with size, effect of aerodynamic heating upon atmospheric entry, etc 17 p3007 A66-33288

Prediction characteristics of separated turbulent boundary layers in compression corners used to determine aerodynamic heating distributions and dynamic loading of supersonic vehicles 21 p3724 A66-38730

**AERODYNAMIC LIFT**  
S LIFT

**AERODYNAMIC LOAD**  
SA GUST LOAD

Capability of Cornell Aeronautical Laboratory /CAL/ system for measuring dynamic airloads in wind tunnel [AIAA PAPER 66-15] 06 p0803 A66-17091

Airflow interference theory applied to streamlined wings and bodies undergoing simple harmonic oscillations 07 p0981 A66-18102

Aerodynamic pressure and resistance calculated from gas flow past circular cylinders with piecewise constant diameters 08 p1232 A66-19338

Modified strip analysis method for predicting finite-span, swept or unswept wing flutter at subsonic to hypersonic speeds 09 p1328 A66-20738

Design of control deflections and structural loads of space vehicle for flight stability through atmospheric disturbances [AIAA PAPER 66-350] 12 p1954 A66-24487

Linearized surface pressure distribution on streamlined ducted bodies in axisymmetric flow, considering aerodynamic loading on annular airfoil 13 p1993 A66-26716

Nonstationary aerodynamic load for harmonically oscillating body in fluid flow with constant mean velocity measured, determining errors as functions of system parameters 16 p2630 A66-31302

Aerodynamic and thermal criteria in structural design of aircraft and missiles 20 p3628 A66-37393

Aeroelastic effects due to changes in aerodynamic gain, load factor and structural stresses relative to infinitely stiffened structure in multistage slender missiles 20 p3666 A66-37430

Subsonic aerodynamic loading on harmonically oscillating nonplanar lifting surfaces in kernel-function formulation 21 p3694 A66-38733

Erosion destruction mechanism in polycrystalline graphite, noting effect of gas flow over surfaces, flow pulsation frequency and generated aerodynamic loads 21 p3754 A66-38957

Low speed aerodynamic loading on finite-bladed ducted propeller at zero incidence 22 p3844 A66-40394

Loads on bodies in wakes resulting from crossflow at submerged body or from wake translation over submerged body, noting dynamic instability 22 p3846 A66-40607

Capability of Cornell Aeronautical Laboratory /CAL/ system for measuring dynamic airloads in wind tunnel [AIAA PAPER 66-15] 23 p4051 A66-40977

**AERODYNAMIC NOISE**

Boundary layer noise and effects of acoustic energy on panel response, panel fatigue and internal sound levels tested with X-15 aircraft 01 p0010 A66-10126

Noise problem associated with rocket boosters, possible minimization by radical change of design 02 p0293 A66-11511

Aerodynamically induced vibration in coolers, describing inclined splitter plates for noise and structural vibration elimination 07 p0991 A66-17492

Aerodynamically induced resonance in rectangular cavities resulting from doubly tuned amplification of shear layer unsteadiness by shear layer edge tone and cavity enclosure 18 p3047 A66-33676

**AERODYNAMIC STABILITY**

Operational problems and costs of staged solid-propellant rocket vehicles for atmosphere only, noting aerodynamic stabilization, spin motors, stage separation, jet plume, etc 07 p1140 A66-17612

Hypersonic aerodynamic stability and drag of ablating and nonablating models of blunt-faced reentry shape [AIAA PAPER 66-61] 07 p1141 A66-17898

Free flight dynamic stability measurements indicate that boundary layer transition has

no perceptible effect [AIAA PAPER 64-427] 08 p1161 A66-18810

Stick pushers in new medium range jet transports, noting aerodynamics of aircraft stall 11 p1637 A66-23072

Generalization of Allen-Kelley slender body theory to obtain estimates of two cubic nonlinear aerodynamic damping terms 12 p1795 A66-23593

Static and dynamic stability and drag of blunt-nosed flare-stabilized bodies at velocities up to 8.2 km per second [AIAA PAPER 65-44] 12 p1799 A66-24699

Aerodynamic stability of slender cone under ablation effect including pressure distribution measurement, ablation-flow field interaction, flow analysis during oscillation, etc [AIAA PAPER 66-410] 18 p3045 A66-33635

Flight control system of Saturn V launch vehicle, discussing attitude/altitude rate scheme, gain required and stability achieved 21 p3820 A66-38875

Approximation of aerodynamic stability of coasting vehicle leaving atmosphere at high speeds, assuming linear theory and constant aerodynamic coefficient 22 p3986 A66-40346

Short-periodic motion of tailless glider analyzed to determine degree of overcompensation of flap required for good stability 23 p4016 A66-41784

**AERODYNAMIC VEHICLE**

Magnetic suspension for aerodynamic wind tunnel models in Mach 8 airstream controlled in five degrees of freedom 09 p1364 A66-20664

Book on theory of optimum aerodynamic shapes 11 p1629 A66-22501

Nonequilibrium heat transfer distributions around blunt-nosed aerodynamic bodies, using analytical method, for design analyses of hypervelocity flight vehicles 12 p1799 A66-24715

High performance aerodynamic vehicle design, noting configuration variables, optimum performance parameters, vehicle force characteristics, optimization of hypersonic aircraft performance, etc [AIAA PAPER 66-486] 16 p2635 A66-31476

Dolphin body design for integrating resistance and propulsion mechanisms 19 p3279 A66-36050

**AERODYNAMICS**  
SA FLUID MECHANICS  
SA GAS DYNAMICS  
SA ROTOR AERODYNAMICS

Aerodynamic and heat transfer measurements using interferometer with continuous wave laser as source 01 p0069 A66-10849

Development and stabilization laws of aerodynamic perturbations 01 p0009 A66-11187

Introductory book on hypersonic aerodynamics covering continuum flow of inviscid nonheat-conducting perfect gas and real gas, viscous and low density effects in hypersonic flow 02 p0176 A66-11875

X-15 aircraft and future research noting previous flight data on hypersonic aerodynamics, structural and aerodynamic heating, etc [SAE PAPER 650657] 02 p0179 A66-12238

Text on aerodynamics of wings and bodies, emphasizing matched asymptotic expansion methods for boundary value problems and numerical techniques for loading predictions via computers 03 p0313 A66-12297

Analytic processes for evaluation of supersonic aerodynamics of configuration treating drag, wing design, wrap, interference and sidewash [AIAA PAPER 65-717] 03 p0321 A66-13048

Hydrodynamic systems expressed by kinetic equations, deriving equations of aerodynamics without knowledge of interaction of gas molecules 04 p0510 A66-13879

Solving integral in propeller design and second-order effects in subsonic airfoil theory 05 p0606 A66-15082

X-15 flight problems not encountered during simulation, particularly differences in aerodynamics, control systems, cockpit equipment, etc 07 p1017 A66-17274

Rarified gas dynamics in space flight and hypersonic low density wind tunnel of Goettingen Aerodynamics Research

Facility 07 p1017 A66-17479

Economy of body traveling over given distance at certain velocity and constant air density 07 p0983 A66-18161

Aerodynamics of manometers and mass spectrometers used on rockets and satellites for determination of atmospheric temperature and density 09 p1383 A66-20993

Text on high velocity aerodynamics, including subsonic, supersonic and hypersonic flows, rarefied gases, boundary layer theory and MHD 10 p1479 A66-21057

Variational calculus in one independent variable for optimum aerodynamic shapes and extension to two independent variables 11 p1721 A66-22502

Book on flight dynamics, covering optimum control, multistage rocket trajectory optimization, VTOL aircraft dynamics, autopilot design, etc 11 p1732 A66-23335

General solution for class of initial value problems for systems of aerodynamic equations, constructing reference solution to Cauchy problem involving shock and expansion waves 11 p1694 A66-23363

Development and stabilization laws of aerodynamic perturbations 12 p1797 A66-24005

Aerodynamics of hangar-type engine test facilities, discussing flow stabilization, soundproofing and effect of external winds 12 p1860 A66-24973

Annual report, 1964-65 /Aeronautical Research Laboratories, Australian Defence Scientific Service/ on aerodynamics, guided weapons and systems and flight research 13 p2056 A66-25120

Relativistic aerodynamics, discussing wavefront motion, Thomson and Bernoulli theorems, photon gases, etc, using statistical space-time mechanics 13 p1991 A66-26291

Hydrodynamic systems expressed by kinetic equations, deriving equations of aerodynamics without knowledge of interaction of gas molecules 14 p2275 A66-27569

Hydraulic analogy to compressible gas flow, discussing application to aerodynamic motions, flow visualization, measuring techniques and instrumentation [ASME PAPER 66-FE-16] 17 p2915 A66-33269

Panel flutter at high Mach numbers, using linear plate theory and first-order aerodynamics, noting damping, relation between traveling and standing wave theories, etc 18 p3257 A66-34592

Book on aerodynamics of pure subsonic flow including Earth atmospheric structure, fluid flow laws, boundary layer phenomena, subsonic wind tunnel and Magnus effect 19 p3278 A66-36730

Flight tests on aircraft and analysis by automatic filter, noting structural and aerodynamic problems resulting from use of transient method 21 p3824 A66-38574

Book on aeromechanics of flight vehicles including structure and physical properties of atmosphere, wing characteristics, research methods, aerodynamic characteristics of principal units of aircraft and rockets, etc 21 p3695 A66-39288

Reentry aerodynamics research in Japan including sounding rocket program, optimum reentry trajectory, nonequilibrium flow in nose region of blunt body, wind tunnels, etc [ICAS PAPER 66-36] 22 p3847 A66-40659

Short-duration aerodynamic testing techniques and new usage of hypersonic shock tunnels [AIAA PAPER 66-762] 23 p4052 A66-41331

Integral operator for solving aerodynamic problems for slightly rarefied viscous gas 23 p4054 A66-41356

Propulsion control systems for Concorde aircraft, noting aero-and thermodynamic reasons for power plant variables subject to manipulation 23 p4122 A66-41776

Mass transfer into aerodynamic body flow fields, examining model shear flow in Rayleigh problem for blowing current across gas-solid interface 23 p4058 A66-41900

Aircraft flying up to 6000 miles at Mach numbers up to 8, noting problems in aerodynamics, propulsion, structural weight, cooling, etc 24 p4157 A66-42237

**AEROELASTICITY**  
SA AEROTHERMOELASTICITY  
SA PANEL FLUTTER

# A WING LOADING

Aeroelastic instabilities of simply supported two-dimensional panels in subsonic flow at Mach numbers up to 0.85 [AIAA PAPER 65-772] 03 p0434 A66-12555  
Matrix scheme using two-way spline curves or interpolating low aspect ratio lifting surface mode deflections for use in aeroelastic calculations 05 p0774 A66-15058  
Static elastic deformation and associated change of aerodynamic characteristics of light vehicle subject to aerodynamic and inertia loading 05 p0609 A66-15784  
Free and forced vibrations, static and dynamic stability and aeroelasticity of orthotropic shells and plates in variable temperature field 11 p1781 A66-22614  
Lagrange equation approach to linear aeroelasticity in modern aircraft from structural and aerodynamic data 13 p1997 A66-26696  
Reduction of order of aeroelastic and flutter motion equations while retaining purely elastic contribution of eliminated coordinates, using quasi-static assumption and matrix algebra 14 p2405 A66-27996  
Aeroelastic stability of light aircraft, examining appearance of structural nonlinearities in global vibration test for determining critical flutter speed 17 p3023 A66-32331  
Aeroelastic instability of flat rectangular panels leading, trailing and free lateral edges, noting gap between theoretical and wind tunnel stability test 20 p3491 A66-36952  
Aeroelastic instability of aircraft with automatic pilot, determining domain in which sensor position and other adjustable parameters may vary without risking instability 21 p3695 A66-38580  
Common electronic techniques for studying aeroelasticity in high performance aircraft 21 p3827 A66-38654  
Dynamic aeroelastic motion resulting from inertial and aerodynamic effects, coupled through elastic deformation, applied to jet aircraft, considering flutter, buffet, wakes and turbulence 23 p4015 A66-41035  
Aeroelastic characteristics of Japanese special small rocket, examining body divergence speed and flutter speed of tail fins under flight 23 p4138 A66-41420  
Reverse flow and deformation optimization theories applied to subsonic aeroelasticity of lifting surface in harmonic oscillation, using numerical integration and computer programs 24 p4157 A66-42343

## CROLOGY

Simultaneous lower atmosphere observations with radar and aerological measurements by airborne meteorograph and electrometeorograph 02 p0253 A66-11273  
Aircraft bumpiness conditions in free atmosphere relation to turbulence and other aerological data 18 p3049 A66-34613

## EROMAGNETISM

Comparison of magnetic observations aboard Zaria and aeromagnetic surveying according to magnet plan 08 p1214 A66-19040

## ERONAUTICAL ENGINEERING

Interplay of technology, economics and operation in aircraft design noting VTOL [AIAA PAPER 65-736] 03 p0446 A66-12546  
Text on fundamentals of aircraft gas turbine engine design, including component design and calculation 11 p1762 A66-23310  
Indian National Aeronautics Laboratory annual report 1964-1965 14 p2269 A66-26872  
Bibliographical review of German, French and English texts relative to aeronautical engineering, theoretical and applied 15 p2425 A66-29363  
Progress in aeronautical sciences, noting delta wing vortex sheets, rotating flows, boundary layer flows, etc 17 p2906 A66-32273  
American Helicopter Society, Annual Forum, Washington, D.C., May 1966 17 p2843 A66-32723

## ERONAUTICS

General report of West German Research Institute for Aeronautics and Astronautics for 1964 02 p0216 A66-12073  
Rocket technology and air and space travel research - Annual Meeting, Berlin, West Germany, September 1964 04 p0581 A66-13494  
Aerospace technology including past progress, predictions, minimum and

maximum speeds for safe flight control, economics, propulsion, etc 09 p1472 A66-20164

British influence on world aviation, past, present and future 23 p4151 A66-41258  
Advancement in aeronautics and contribution of Royal Aeronautical Society 23 p4152 A66-42071  
Aeronautical research in U.K. by government establishments, industry and universities 23 p4017 A66-42072

## AERONOMY

Text on atomic and space physics with special emphasis on aeronomy 16 p2804 A66-31316  
Aerospace research programs in India 1965-1966, emphasizing equatorial aeronomy including meteorology up to 170 km 18 p3238 A66-35234  
Soviet book on high latitude research in field of geomagnetism and aeronomy including ionospheric storm, atmospheric absorption, etc 24 p4203 A66-43149

## AEROSOL

### SA ATOMIZATION

Heat and mass transfer in nonuniform gas-suspension flow treated by irreversible thermodynamics 01 p0163 A66-10628  
Influence of absorption of aerosol particles on extinction of solar and sky radiation 02 p0225 A66-12214  
Photographs of passage of Echo II into Earth shadow to determine aerosoles and atmospheric ozone height distribution 03 p0427 A66-12924  
Wooten method for measurement of true light absorption in aerosols, making it unnecessary to make separate light scattering measurement 06 p0906 A66-17032  
Cascade vault sampler for bacterial aerosols 08 p1177 A66-19087  
Critical condition for aerosol deposition from symmetrical flow past solid body, considering case of circular cylinder 08 p1247 A66-19304  
Measurement of radioactivity in air of free atmosphere and interior of cloudy areas and absorption of radioactive aerosols by water droplets 08 p1283 A66-19305

Separation problems of gas and aerosol components in brightness of atmospheric layer for photometric data pertaining to Mars atmosphere 08 p1295 A66-19330  
Difference between values for atmospheric pressure at Martian surface when obtained by photometry or by spectroscopy, due to nonconsideration of light scattering by aerosol particles 08 p1295 A66-19331  
Stable aerosol formation from vapor pressure of hot lava of volcanic eruptions, causing evaporation and condensation from gas phase 10 p1607 A66-21288  
Atmospheric aerosol size distribution from scattered light measurements by rocketborne equipment 11 p1697 A66-22565  
Measurements of decay curves of stored Aitken nuclei with photoelectric nucleus counter show small nonrandom divergences from theoretical curves 11 p1707 A66-23098  
Drift velocity of aerosol particle in field of sound wave distorted by second harmonic 13 p2127 A66-25087

Dispersed material concentration at various cross sections of ascending two-phase gas flow 13 p2065 A66-26484  
Photographs of passage of Echo II into Earth shadow to determine aerosoles and atmospheric ozone height distribution 14 p2380 A66-27273  
Electrical and physical characteristics and distribution density of aerosols in determining microwave scattering and reflection properties in connection with radar angels 14 p2237 A66-27396  
Electrostatic interaction effect on EM wavescattering by atmospheric aerosol particles 14 p2284 A66-27539  
CAT detection from Doppler shift in laser light backscattered from atmospheric aerosol 15 p2500 A66-28930  
Geophysical rocket determination of aerosol scattering coefficient variation from brightness values at 70-450 km heights 15 p2495 A66-30057

Solar radiation absorption by atmospheric water vapor, deriving formulas that include scattering and absorption by aerosol as additional parameter 16 p2691 A66-30228  
Spectral composition of direct solar radiation variation with height of Sun and relation between aerosol absorption band and humidity 17 p2994 A66-32857  
Critical condition for aerosol deposition from symmetrical flow past solid body, considering case of circular cylinder 19 p3393 A66-36041  
Radiation attenuation effect of atmospheric aerosols on all-weather aircraft landing guidance systems using lasers 19 p3397 A66-36051  
Drift velocity of aerosol particle in field of sound wave distorted by second harmonic 21 p3769 A66-38512  
Spectral-transmittance aerosol component for atmospheric haze, taking account of refractive index and polydispersity 21 p3759 A66-38910  
Aerosol component of spectral transmittance of artificial fog, comparing calculated and experimental values for absolute attenuation factor 21 p3759 A66-38916  
Aerosol particle precipitation in surface layer of atmosphere measured by modified method of Alexandrova 21 p3760 A66-39366  
Vertical distribution and transport of radioactive strontium aerosols in rain and air across trade wind inversion at Hawaii 23 p4124 A66-41843  
Electrostatic interaction effect on EM wavescattering by atmospheric aerosol particles 24 p4198 A66-42325  
Laser system for meteorological data using oscilloscope to display return signal, translated as concentrations of matter or aerosols 24 p4226 A66-43044

## AEROSPACE

Russian-English Aerospace Dictionary 05 p0794 A66-15326

## AEROSPACE MEDICINE

### SA BIOASTRONAUTICS

### SA BIOSIMULATION

### SA INJURY

Electrocardiography as related to flying personnel including case histories 01 p0019 A66-10605  
Behavior of right intraventricular conduction in 148 flying cadets under normal sea-level conditions and acute anoxic anoxia 01 p0020 A66-10608  
Medical history of 1056 aviators over 24-year period 01 p0020 A66-10610  
American and Soviet experience considering weightlessness, ionizing radiation, dynamic and biological factors, etc [SAE PAPER 650812] 01 p0021 A66-10819  
Biological problems in extended manned missions caused by low g, artificial atmosphere and absence of terrestrial periodicities 02 p0185 A66-11622  
Effect of delayed feedback in respiratory disease analyzed for behavioral cybernetic theory, using computer-controlled delay 02 p0186 A66-11648  
Forensic medicine in space environment with reference to international responsibility noting risks, medicolegal implications, cybernetics, contamination, pollution, etc 03 p0447 A66-13078  
Space biology and medicine research, stressing flight experiments performed with Russian satellites and spacecraft 04 p0468 A66-14089  
Bibliography of Soviet papers on space medicine and bioastronautics published in 1964 and 1965 06 p0810 A66-15910  
Space medical jurisprudence involved in present and future space technology 06 p0972 A66-16047  
Aerospace medical research of USAF 06 p0815 A66-16049  
Medical wastage of aircrew in Royal Air Force related to age, noting causes 06 p0815 A66-16050  
Postgraduate aviation and space medicine course at University of Rome 06 p0972 A66-16054  
Morphological characteristics and functional data in pilot trainees, noting anthropometric data and vital capacity, oxygen intake, heart rate, etc 08 p1175 A66-19084  
Problems in pilot fitness evaluation, especially physical and emotional capability assessment for flight 09 p1335 A66-20533  
Book on aviation physiology including

atmospheric pressure effect, visual factors in aviation, British Institute of Aviation Medicine, etc 10 p1487 A66-22104

Decompression sickness noting caisson and subatmospheric disease effects, symptoms, causes and prevention 10 p1488 A66-22109

Biological effects of explosive decompression noting parameters such as altitude, pressure differential, compartment volume and rate of pressure loss 10 p1492 A66-22111

Respiration and anoxia, noting anoxic anoxia, reduced oxygen carrying capacity of blood and inadequate flow of oxygenated blood to tissues 10 p1488 A66-22112

Medical knowledge as aid in preventing aircraft accidents and injury through investigation of causes and results 10 p1495 A66-22142

Contribution of medical science to accident prevention, discussing causes, results and escape from standpoint of man and machine 10 p1495 A66-22143

Aviation and space medicine - International Congress, Rome, October 1963 11 p1641 A66-22478

Aeromedical factors of Titan II ICBM support, discussing human factors in missile crew and propellant transfer 11 p1648 A66-22582

Altitude/pressure/vertigo severity and frequency among Swedish RAF pilots 11 p1644 A66-22584

Aerosol deposition in lungs of spacemen under weightless conditions 12 p1806 A66-23920

Acute hemodynamic effects of G-suit inflation, noting elevation of central venous pressure, cardiac output falling due to depressor reflexes and role of ganglionic blockade 12 p1811 A66-25014

Medical evaluation of Martian environment based on Mariner IV photographs and extrapolations from manned flight, noting effects of Martian gravity on astronauts 13 p2014 A66-25293

Preflight medical tests of responses of Soviet cosmonauts Beliaev and Leonov to simulated weightlessness and performance during simulated space walk 13 p2009 A66-25889

Aerospace medical advances in Polish military aviation and pilot testing procedures and equipment, particularly low pressure chamber and centrifuge 14 p2271 A66-28365

Soviet book on physiological methods in astronautics including collection, transmission and procession of medical information from long space flights 15 p2445 A66-29734

Aerospace Medical Association, Scientific Meeting, Las Vegas, April 1966 17 p2853 A66-32134

Particle and droplet contamination of spacecraft cabin atmosphere, examining exogenous and endogenous sources, medical aspects of inhalation and exhalation, effect of weightlessness, etc 17 p2866 A66-32207

R and D clean room complex design for guidance and control systems, noting contamination control, maintenance procedures, cost factors, etc 17 p2903 A66-32209

Contamination control of manned spacecraft, noting problem of biological interactions and methods of monitoring 17 p2866 A66-32211

Accidents involving human error evaluated from medical point of view 18 p3053 A66-34947

Flight activities of Russian cosmonauts in assessment of medical preparedness for orbital flight 19 p3283 A66-35291

Personality development, application of theory to problems of aerospace selection 19 p3294 A66-36378

Flight safety in Soviet civil aviation including takeoff and landing, cruising in airport vicinity, meteorology and medicine 20 p3494 A66-36991

Main stages of development of space biology and medicine in U.S.S.R., discussing biological effects in dogs in suborbital flight vehicles and satellites 24 p4169 A66-43135

Medico-biological methods based on data recording on board rockets and spacecraft and telemetering information to

Earth 24 p4169 A66-43141

**AEROSPACE SYSTEM**

Reliability and maintainability interrelationship in system availability of some aerospace programs 01 p0076 A66-10066

Operational safety analysis techniques according to MIL-S-38130 for aerospace systems 01 p0169 A66-10070

Electronically programmable telemeter using random access multiplexing and stored program control for aerospace missions 01 p0032 A66-11130

Glass properties, formation and application to aerospace systems 07 p1054 A66-18301

Nuclear reactors for space and near-Earth propulsion 07 p1111 A66-18304

Aerospace propulsion systems evaluated and compared from standpoint of cost or effectiveness 08 p1280 A66-18576

Aerospace and electronic systems - IEEE International Convention, New York, March 1966 12 p1818 A66-24600

Aerospace systems - Conference, Seattle, July 1966 20 p3659 A66-37155

Missile and space system accident potential evaluated numerically 20 p3685 A66-37931

**AEROSPACE TECHNOLOGY**

Safety education, management process and aerospace accidents 01 p0169 A66-10073

Safety and management in aerospace industry, noting importance of military specification 01 p0169 A66-10075

Structural system design technique for reliability and weight tradeoffs using designer equations and characteristics of materials, geometry and operational loads 01 p0145 A66-10085

Acoustical fatigue in aerospace structures - USAF Conference, Dayton, Ohio, April 1964 01 p0146 A66-10121

New research techniques from growing space technology for experimental sciences like physics 01 p0134 A66-10209

German participation in aerospace technology noting space transporter design and development 02 p0177 A66-11667

Light alloys for engineering application in armor plates, aerospace and nuclear fields, noting aluminum alloy properties 02 p0244 A66-11745

European Space Technology Center including upper-atmosphere scientific experiments, instrumentation, satellite control, data analysis, etc 03 p0352 A66-12481

Solid state camera system for aerospace application incorporating monolithic phototransistor mosaic sensor, molecular digital readout system, etc 04 p0519 A66-13631

Janes compendium of world aircraft, missiles and rockets 04 p0458 A66-14382

Maintainability guidance as factor in designing for aerospace industry 05 p0646 A66-14634

Roll reduction diffusion bonding for sandwich structures based on solid state diffusion process [SAE PAPER 650778] 05 p0687 A66-15006

French aerospace industry, relationship to French economy, annual expenditures 1958 to 1964 and aircraft exports 05 p0794 A66-15189

Government research and development inventions 06 p0972 A66-16076

Aromatic/heterocyclic polymers from tetraamines reaction with tetraacids at room temperature, developing potential for aerospace application 06 p0901 A66-16299

West Germany and international cooperation in aerospace engine development, noting VTOL aircraft and supersonic and hypersonic spacecraft 06 p0943 A66-16797

Manufacturing methods in space flight technology - German Symposium, Munich, November, 1964 06 p0887 A66-17068

Electron beam welding for in-space welding of spacecraft and space stations noting welding modes, power requirements, environmental influences, etc 06 p0888 A66-17072

Astronautics Year, international astronautical and military space/missile review of 1964 07 p1155 A66-17414

Papers on ceramics emphasizing relationship between microstructure, fabrication techniques and properties, including review of aerospace technological

applications 07 p1050 A66-18293

Civilian and Military Uses of Aerospace-Conference, New York, January 1965 08 p1299 A66-18547

NASA aeronautics and space research including near-Earth, cislunar and interplanetary space, manned flights, meteorology and communications 08 p1321 A66-18549

Factors in shaping policy for aerospace activity, stressing role of scientist 08 p1321 A66-18551

Aerospace industry contribution to science and technology, noting relationship with U.S. Government 08 p1321 A66-18552

Aerospace techniques used for research during International Quiet Sun Years /IQSY/ 08 p1286 A66-18570

Economic aspects of Concorde program, research potential, computational methods and technological progress 08 p1322 A66-19080

IEEE aerospace and navigational electronics conference at Baltimore in October 1965 08 p1250 A66-19487

Effectetics, informetics, control and stability in modern flight vehicle systems [AIAA PAPER 66-131] 08 p1254 A66-19565

Aerospace technology including past progress, predictions, minimum and maximum speeds for safe flight control, economics, propulsion, etc 09 p1472 A66-20164

Book on structure and performance of aerospace industry and governmental relations 09 p1473 A66-20689

European space program of launcher development 11 p1788 A66-22433

Aerospace electronics developments and trends toward more hybrid systems in guidance and control applications 11 p1667 A66-22954

Design-sciences approach for evaluation and selection of materials such as steel, titanium, beryllium, etc, used in idealized structures for aerospace application 11 p1783 A66-23076

U.S. nuclear rocket propulsion program costs, technology and application, noting empirical law of space nuclear program economics 11 p1734 A66-23078

Standardization of machining criteria for aerospace materials, compiling data about tool design, planning, manufacturing, costs, etc, on simple form [ASTME PREPRINT MM66-714] 12 p1887 A66-24418

Scientific and technical program of ESRO including launching of sounding rockets, satellites, space probes, astronomical observatory and scientific interplanetary probe 13 p2211 A66-26293

Machinability data for hard-to-machine materials, noting cost reductions, tool holder test program, cutting fluids, fixtures, producibility, etc [ASTME PAPER MM66-178] 14 p2300 A66-26958

Human factor tests in large-scale operational system testing techniques [ASME PAPER 66-HUF-11] 14 p2229 A66-26967

NASA mission, discussing V/STOL transports, SST and hypersonic cruise vehicles [SAE PAPER 660169] 14 p2416 A66-27282

Defense Materials System control of copper, aluminum and steel and proposed program for readiness and contingency planning of external resources for aerospace industry [SAE PAPER 660286] 14 p2416 A66-27297

Advancement in manufacturing technology in aerospace industry [SAE PAPER 660324] 14 p2301 A66-27301

Aerospace technology, spacecraft and spacecraft systems, launching, control, recovery, etc - Space Congress, Cocoa Beach, Florida, March 1966 14 p2388 A66-28401

European air cargo marketing and air freight industry 15 p2620 A66-29795

Dual-purpose passenger/cargo aircraft noting design, passenger interior system, cargo handling system, compatibility, comparisons, etc 15 p2426 A66-29802

XB-70 technology, developments in materials, equipment and manufacturing

- including steel alloys, welding, etc  
SAE PAPER 660276] 15 p2427 A66-29822
- Manufacture engineer role in producing  
space vehicles, noting S-IC stage of Saturn  
launch vehicle 15 p2511 A66-29834
- Space research programs in Italy since May  
1965 and cooperation with 15 p2602 A66-29940
- JASA 15 p2602 A66-29940
- Aircraft development and goals in  
U.S. 16 p2633 A66-31279
- Aircraft design requirements concerning  
STOL technology emphasizing cost, size  
and propulsion system 16 p2634 A66-31323
- Aerospace life support - Conference,  
American Institute of Chemical Engineers,  
Houston, February 1965 17 p2866 A66-32667
- Effectetics, informatics, control and  
stability in modern flight vehicle systems  
AIAA PAPER 66-131] 18 p3267 A66-33786
- Atlas E/F launch vehicle, discussing  
structure, mission capabilities, launch  
facility, reentry, etc 18 p3245 A66-33890
- SAE PAPER 660444] 18 p3245 A66-33890
- Advanced Atlas launch vehicle technology,  
discussing tank configurations, engine  
ratings, guidance systems, autopilot, thrust  
augmentation, payloads, launch facilities, etc  
SAE PAPER 660445] 18 p3245 A66-33891
- French aerospace industry, production of  
aircraft, engines and missiles, research  
programs, expenditures, etc 18 p3267 A66-33915
- Great Britain, future in space, discussing  
propulsion, nuclear power, satellite orbit,  
guidance, stabilization and attitude  
control 18 p3268 A66-33945
- Aerospace ordnance handbook intended as  
up-to-date reference on design and  
methodology of explosive systems used in  
space technology 18 p3159 A66-34184
- Testing and evaluation of aerospace  
ordnance, considering squibs, detonators,  
fuses and explosive train  
devices 18 p3095 A66-34194
- Quality assurance of aerospace ordnance  
and related devices, discussing factors and  
functions determining performance  
characteristics 18 p3116 A66-34195

wings 23 p4073 A66-41532
- Welding and gluing of third stage of  
ELDO-A rocket 23 p4073 A66-41533
- Hypersonic transport technology,  
considering designs for Mach numbers up to  
14, altitude up to 140,000 ft and 150  
passengers 24 p4159 A66-42238
- Space project planning through detailed  
knowledge and correlation of various  
disciplines, noting role of universities,  
industry and government 24 p4296 A66-42242
- AEROSPACE VEHICLE**
- Aerospace vehicle flight control - SAE and  
NASA Conference, Los Angeles, July  
1965 01 p0102 A66-10661
- Mechanical servoactuator for all-mechanical  
flight control system for aerospace vehicles,  
noting traction transmission effect on  
toroidal actuator, cascading for power  
amplification, etc 01 p0015 A66-10671
- Changes in dynamics of aerospace vehicle,  
flight in low altitude turbulence and  
satellite spin decay 02 p0178 A66-11990
- Optimum structural and thermostructural  
design theory for advanced aerospace  
vehicles 08 p1306 A66-18805
- Meteorological measurement accuracies for  
use in design and operation of aerospace  
vehicles [AIAA PAPER 66-349] 12 p1953 A66-24480
- Aerospacecraft performance optimization  
and design evaluation for airbreathing-rocket  
propulsive systems by variational calculus  
[AIAA PAPER 65-18] 12 p1954 A66-24694
- Determination of number of times per unit  
time that various strength margin levels are  
exceeded under combined random stresses,  
useful to structural design in aerospace  
industry 13 p2195 A66-25592
- Aerospace application of aluminum and its  
alloys 14 p2313 A66-27012
- Hybrid type two-or three-stage aerospace  
vehicle design to place payload in orbit,  
discussing recoverable stages, drives and air  
breathing engines 16 p2635 A66-31682
- Rules for comparing designs of aerospace  
transporters and selecting optimum  
configuration, based on overall cost  
criterion 17 p3040 A66-32375
- First-stage propulsion of aerospace  
transporter, discussing design and  
operational requirements 17 p2990 A66-32377
- Deterministic structural design criteria for  
vehicle systems based on relation between  
management decisions and achieved  
reliability level [AIAA PAPER 66-504] 18 p3250 A66-33659
- High speed hybrid computer simulation of  
aerospace vehicle motion 18 p3094 A66-34068
- Electroexplosive devices in aerospace  
vehicles in two classes, propellants and high  
explosives, noting methods for controlling  
detonation desired effects 20 p3625 A66-37159
- Meteorological measurement systems in  
relation to aerospace problems, using flight  
history of rocket vehicle and root mean  
square accuracy 24 p4214 A66-43043
- AEROTHERMOCHEMISTRY**
- Combustion and sublimation in  
aerothermochemical interaction between  
dissociated air stream and graphite surface  
in hypersonic laminar viscous flow  
[AIAA PAPER 65-42] 03 p0444 A66-12797
- Turbulence in free shear layer in mixing  
region of circular jet, comparing statistical  
characteristics of mathematical and physical  
models [AIAA PAPER 65-805] 03 p0357 A66-13081
- Hypersonic wakes, effects of turbulent  
fluctuations on air ionization reaction rates  
measured by averaging and regrouping  
perturbed source terms of chemical rate  
equations [AIAA PAPER 65-819] 03 p0359 A66-13230
- Aerothermochemical performance of  
inorganic fiber-reinforced char forming  
ablative material [AIAA PAPER 66-435] 17 p3035 A66-32756
- Thermodynamics of combustion and  
concepts of aerothermochemistry using  
Newton-Raphson iteration process, noting  
transfer phenomena of matter, heat and  
momentum 20 p3680 A66-38090
- AEROTHERMODYNAMICS**

- AFTERBURNER**
- SA GAS TURBINE**
- Correlation study of turbojet afterburner  
combustion efficiency and fuel/air ratio  
setting for maximization of efficiency  
[WSCI 66-1] 18 p3164 A66-34423
- AFTERBURNING**
- Bypass engine development from  
conventional gas turbine to ducted-fan and  
aft-fan engine, noting principle of  
afterburning 14 p2373 A66-27014
- AFTERGLOW**
- SA HELIUM AFTERGLOW**
- SA OXYGEN AFTERGLOW**
- SA PHOSPHORESCENCE**
- Rate coefficients of ion charge exchange  
reaction between atomic oxygen ions and  
oxygen-nitrogen molecules measured at  
thermal energies by afterglow  
method 02 p0263 A66-11505
- Helium-neon gas laser used to determine  
electron density variation, spatial and  
temporal, in afterglow of Z-pinch in H at  
100 mtorr 13 p2104 A66-26239
- Discharge afterglow in low pressure tube  
studied by photomultiplier 13 p2150 A66-26473
- Time resolved electron density  
measurements with microwave  
interferometer used in weak afterglow  
plasma diagnostics 13 p2083 A66-26556
- Helium-neon laser afterglow and  
metastable helium atoms under long pulse  
excitation 14 p2307 A66-27335
- Acoustic wave generation and amplification  
in weakly ionized plasma, explaining sound  
emission in glow discharge and modulation  
in plasma afterglow 15 p2556 A66-29808
- Primary and afterglow emission decay time  
from low temperature gaseous nitrogen  
excited by fast electrons explained by  
possible energy transfer 19 p3404 A66-36799
- Nitrogen ion charge-transfer reaction rates  
with CO and carbon dioxide in pulsed  
flowing afterglow system 21 p3774 A66-38529
- Flow visualization via afterglow produced  
in pure low temperature nitrogen and air by  
electron beam projection 23 p4058 A66-41911
- AFTERIMAGE**
- Characteristics of afterimages produced by  
persisting visual effect after termination of  
illumination 04 p0462 A66-13794
- Decay time of positive afterimage following  
high intensity flashes measured by  
monocular and binocular brightness  
matching 18 p3062 A66-33993
- Psychophysiological fusion linking  
afterimages of separate visual stimuli  
causing artifacts in visual astronomical  
observations 20 p3507 A66-38053
- AGC**
- S AUTOMATIC GAIN CONTROL /AGC/**
- AGE FACTOR**
- Medical wastage of aircrew in Royal Air  
Force related to age, noting  
causes 06 p0815 A66-16050
- Age dependence of resistance of chickens  
to 100 percent oxygen at one atm /OAP/  
noting delayed mortality in adult  
birds 07 p0997 A66-17458
- Age, cardiac output and choice reaction  
time of airline, military and test pilots,  
attempting resolution of data  
discrepancy 12 p1806 A66-24397

Iron and stony meteorite evolution, cosmic radiation ages and space erosion model 14 p2390 A66-28409  
 Age effect on liver glycogenesis in rats exposed to acceleration stress 17 p2860 A66-32555  
 Magnetic spherules in silurian and permian salt samples suggest constant meteoric influx useful in determination of lunar surface age 24 p4198 A66-42435

## AGE HARDENING

## SA PRECIPITATION HARDENING

Aging characteristics of Al-Zn-Mg alloys 03 p0381 A66-12722  
 Cr and Mn effects on aging mechanism and anticorrosion properties of Al-Zn-Mg alloys 03 p0381 A66-12723  
 Martensitic transformation kinetics and maraging mechanism in Fe-Mn-Ni-Ti alloy observed by electron and X-ray diffraction 08 p1236 A66-18762  
 Metastable Ti-Mo-Fe-Al beta-alloy system, discussing metal hardening, heat effects, etc 12 p1893 A66-23761  
 Age hardening response correlated with structural observations of iron-nickel-cobalt alloys 12 p1895 A66-24374  
 Cyclic strain fatigue tests and fatigue failure curve for age-hardened nickel based alloy K-Monel  
 [ASME PAPER 66-MET-9] 14 p2312 A66-26977

Cold work and precipitation hardening effect on tensile and thermal characteristics of gas turbine alloys  
 [ASME PAPER 66-GT-102] 14 p2312 A66-27002

Texture and anisotropic age hardening to improve mechanical properties of AlMgSi alloys 14 p2313 A66-27011  
 Microquenched age-formed titanium alloys and titanium bialloy composites 14 p2313 A66-27093  
 Age hardenable nickel-copper steels with strength achieved by copper phase hardening 16 p2723 A66-30319  
 Microquenched age-formed titanium alloys and titanium Bi-alloy composites, discussing production process using spherical particles produced by rotating electrode  
 [SAE PAPER 660458] 17 p2940 A66-33164  
 Aging behavior and mechanical properties of three wrought high-strength magnesium-yttrium alloys 18 p3122 A66-33751  
 Particle size effects in age hardening of high temperature Ni-based alloys 20 p3586 A66-38094

## AGENA ROCKET

SA ATLAS AGENA LAUNCH VEHICLE  
 Acoustic fatigue characteristics of beryllium panels exposed to high intensity random noise environment 01 p0149 A66-10143  
 Pulse code modulation /PCM/ for telemetry and communication between Gemini spacecraft Agena D satellite and ground stations for data processing and display 01 p0031 A66-10938  
 SNAP 10a/Agena Space System, noting interrelationship of several subsystems and integration with nuclear power unit 12 p1857 A66-23677

## AGING

SA CURING  
 SA STORAGE  
 SA STRAIN AGING  
 Stress-aging, differences from strain-aging and effect on tensile properties of various stainless steels 01 p0085 A66-10409  
 Approximate solution method for unsteady creep of shells within framework of theory of aging 07 p1146 A66-18254  
 Diffuse X-ray scattering in crystal structure of Ni-Be and Cu-Be alloys during first stage of aging due to anisotropic monoclinic lattice distortions 08 p1235 A66-18589  
 Aging of Cu-Ti alloy stimulated by Al additions to 2 percent and retarded by Al additions of 2 to 4 percent 12 p1892 A66-23521  
 Aluminum alloy with various metal additions analyzed for aging, using electron microscope 12 p1898 A66-25022  
 Electrical resistance changes in quaternary alloy during simultaneous occurrence of phase solution coalescence and silicon spheroidization, noting effects of aging and

various metal additions 12 p1898 A66-25023  
 Aging effect on structure of cobalt alloys annealed at 1200 degrees C suggests formation of laminar regions 12 p1898 A66-25030  
 Quenching and slow-cooling effects on ductile-brittle bend-transition temperature of chromium wire 13 p2107 A66-25587  
 Aging behavior of explosively deformed 2219 Al investigated by transmission electron microscopy 13 p2086 A66-25775  
 Aging behavior of rods produced by extrusion of manganese-containing aluminum alloy subjected to solution heat treatment, noting microstructure and mechanical properties 13 p2111 A66-26585  
 Aging of aluminum alloy after quenching and strain hardening, noting Vickers hardness tests, tensile tests, precipitation phases, shearing effect, etc  
 [PST PAPER 423] 14 p2315 A66-27468  
 Effects of heat treatment and aging on phase composition, strength and plasticity of industrial titanium alloys 15 p2522 A66-29178  
 Phase transformations in titanium alloys annealed at high temperatures and subjected to aging processes 15 p2522 A66-29181  
 Structural changes and variations in hardness at high temperatures in titanium alloys, determining aging temperatures producing maximum hardness 15 p2522 A66-29183  
 Kinetics of natural aging process of Al-4 percent Cu alloy, experiments indicate addition of up to 1.0 percent Mg proportionately slows down aging process 16 p2723 A66-30871  
 Silver oxide films by cathodic sputtering, discussing changes in sample preparation and material characteristics due to aging and heat treatment 17 p2976 A66-32262  
 Aging temperature ranges for tensile specimens of equiatomic niobium-zirconium alloys, noting phase diagrams, structural changes, mechanical properties, precipitation hardening, etc 17 p2940 A66-33290  
 Existence and uniqueness of solution in viscoelasticity theory for aging materials, considering four boundary value problems for body subjected to finite deformations 18 p3255 A66-34393  
 Optimum aging temperatures obtained from electric resistance of beryllium alloys containing chromium and zirconium 18 p3124 A66-34406  
 Effects of aging temperature and duration on strength, elongation, yield stress, plasticity and electrical conductivity of Al-Zn-Mg and Al-Zn-Mg-Cu alloys 20 p3585 A66-37698

## AGRICULTURAL AIRCRAFT

Flight tests on various agricultural aircraft noting safety record data 16 p2634 A66-31284

## AILERON

SA SPOILER-SLOT AILERON  
 Aileron traverse effect on amount of coupling from roll to yaw during abrupt aileron roll of conventional aircraft 01 p0011 A66-10175  
 Aileron traverse effect on amount of coupling from roll to yaw during abrupt aileron roll of conventional aircraft 16 p2633 A66-31115  
 Static stability of rolling motion of aircraft for given aileron angle when inertia cross-coupling is present, with numerical solution of nonlinear equations 22 p3848 A66-40493

## AIR

SA ATMOSPHERE  
 SA GAS  
 SA HIGH TEMPERATURE AIR  
 SA UPPER AIR  
 Estimates of collision cross sections for carbon dioxide and air molecules at 200 degrees K with thermal radiation field as error source 01 p0062 A66-10762  
 Whole-body plethysmographic method for determination of total inertia of air breathed by humans, using rectangular coordinates 13 p2011 A66-26323  
 Estimates of collision cross sections for carbon dioxide and air molecules at 200 degrees K with thermal radiation field as error source 14 p2286 A66-27861  
 Reevaluation of data and equations used in calculation of air viscosity coefficient and application to wind tunnel

experiments 16 p2685 A66-30911  
 Laminar boundary layer heat transfer measurements by thick-film calorimeter gauges on flat plate in dissociated and partially ionized air 17 p3039 A66-33483  
 Electrodeless annular discharges in argon and air 18 p3144 A66-34039  
 Air purging of high-performance multilayer insulation system with helium 20 p3675 A66-37064

## AIR BREATHING ENGINE

Jet fuels presently used in military aircraft compared with those for advanced air-breathing weapon systems at high Mach number  
 [SAE PAPER 650804] 01 p0128 A66-10846  
 Performance operation and cost of rockets and airbreathing launch system, noting preliminary designs 02 p0295 A66-11676  
 Effects of improved refractory blade materials and internal cooling on inlet temperatures, design and performance of air breathing engines at supersonic speeds  
 [AIAA PAPER 65-743] 03 p0415 A66-12549  
 Engine thrust and heat mass in air breathing jet engine for space flight 04 p0572 A66-13441  
 High temperature measurement in combustion chambers of air breathing engines discussing optical, pneumatic, acoustic and calorimeter methods 04 p0518 A66-13537  
 Turbo-rocket application to air breathing satellite launcher program describing engine design, performance and weight characteristics 04 p0572 A66-13539  
 High temperature materials for hypersonic air-breathing engines, noting usefulness of coated refractory metals 09 p1435 A66-20670  
 Griffon 02 delta-winged aircraft with composite air breathing turboramjet engine, noting achievements and prospects 11 p1761 A66-23248  
 Thermodynamic process within combustion chamber of propulsive duct, examining potential with reference to feedback and spark discharge 11 p1761 A66-23251  
 Soviet book on automation and control of air breathing gas turbine and ramjet engines 13 p2173 A66-26463  
 Orbital satellite launching systems, problem of increasing percentage orbital payload at minimum cost and advantages of air breathing engines 14 p2391 A66-27010  
 Refractory ceramics for air breathing engine for Mach 7 aircraft, noting zirconia properties 16 p2790 A66-30257  
 Hybrid type two-or three-stage aerospace vehicle design to place payload in orbit, discussing recoverable stages, drives and air breathing engines 16 p2635 A66-31682  
 Air breathing engine designs for winged recoverable boosters 20 p3628 A66-37429  
 Performance, kinetic heating, structural weight and effectiveness of air breathing propulsion for first stage of aerospace transport vehicle  
 [ICAS PAPER 66-28] 22 p3972 A66-40664  
 Bluntness and boundary layer displacement effects on air breathing engine hypersonic inlet flow fields  
 [AIAA PAPER 65-617] 23 p4007 A66-41109  
 Propulsion system development for very high speed winged vehicles application  
 [ICAS PAPER 66-29] 23 p4122 A66-41933  
 Hypersonic cruise vehicles for military and civil requirements, considering air breathing propulsion and structural weight 24 p4296 A66-42241  
 Structural design problems of hypersonic air vehicles with air breathing propulsion, discussing relation to future hypersonic commercial air transport  
 [ICAS PAPER 66-31] 24 p4281 A66-42491

## AIR CARGO HANDLING

Air cargo - International Forum, Chicago, May 1966 15 p2619 A66-29788  
 Air cargo techniques applied to movement of retail merchandise 15 p2620 A66-29792  
 Military air cargo transport technology and logistic systems 15 p2620 A66-29793  
 Air cargo transport development, air freight classification and inventory balancing 15 p2620 A66-29794  
 European air cargo marketing and air freight industry 15 p2620 A66-29795  
 Operational, technical and commercial aspects of air cargo handling and effect on

sales 15 p2620 A66-29798  
 Outlook for air cargo handling indicates  
 reduction of cost and increased efficiency  
 by use of intermodel  
 containers 15 p2620 A66-29799  
 Dual-purpose passenger/cargo aircraft  
 noting design, passenger interior system,  
 cargo handling system, compatibility,  
 comparisons, etc 15 p2426 A66-29802

**IR CONDITIONING**  
**SA COOLING SYSTEM**  
 Air conditioning system of SST Concorde  
 noting reliability 04 p0460 A66-14461  
 Single stage bootstrap air conditioning with  
 two-position turbine nozzle for improved  
 high altitude descent conditions for  
 Concorde SST 09 p1331 A66-20133  
 Personnel comfort and protection from  
 thermal stress, discussing clothing,  
 environmental temperature, metabolic heat  
 production, solar radiation,  
 etc 10 p1492 A66-22120  
 Air conditioning system of SST Concorde  
 noting reliability 11 p1640 A66-22250  
 Vapor-cycle air conditioning for business  
 aircraft, considering weight vs power  
 consumption, compatibility with integrated  
 system and test results  
 [SAE PAPER 660208] 13 p2002 A66-26386  
 Air conditioning development in Beech  
 aircraft  
 [SAE PAPER 660209] 13 p2002 A66-26388  
 Regenerative air conditioning systems of  
 spacecraft cabins for long missions,  
 analyzing principal parameters of gas  
 mixtures for life  
 requirements 24 p4169 A66-43142

**IR COOLING**  
 Air cooled gas turbine rotor and stator  
 airfoils, presenting problem definition,  
 analysis techniques, material application and  
 cascade and engine testing  
 [ASME PAPER 65-WA/GTP-10] 05 p0691 A66-15725  
 Turbine blade and vane cooling in Rolls-  
 Royce nonmilitary aircraft engines, noting  
 side effects on design and development  
 [SAE PAPER 660053] 09 p1433 A66-20151  
 High temperature turbine blade air cooling  
 methods and cyclic and steady state  
 endurance testing  
 [SAE PAPER 660054] 09 p1434 A66-20152  
 Electric machines employing evaporative  
 and universal cooling systems for aircraft  
 use 13 p2041 A66-25902  
 Vaporization cooling of inner wall surface  
 of externally heated cylinder by vortex  
 flow 16 p2829 A66-31162  
 Discharge of cooling air from blades into  
 flow-through part of gas turbine, examining  
 mixing of gas behind blade array with air  
 from blade edges and effect of injected air  
 on turbine efficiency 20 p3627 A66-36913  
 Natural convective heat transfer to gas  
 turbine rotor blade and thermal resistance  
 of cooling system using centrifugal  
 pump 20 p3627 A66-36926  
 Statistical correlation of IR cooling  
 measurements by Tiros II /Channel 2 and  
 Channel 4/ and radiometersonde  
 measurements of radiation divergence within  
 atmospheric layers 22 p3944 A66-40431

**IR CURRENT**  
**SA EKMAN LAYER**  
**SA TURBULENT AIR CURRENT**  
**SA VERTICAL AIR CURRENT**  
 Appleton anomaly of F-2 layer examined,  
 assuming ionization induced horizontal  
 motion of neutral air 08 p1215 A66-19207  
 High precision high-spatial resolution  
 tracer study of low-noise steady air flow in  
 rectangular pipe, emphasizing region within  
 two microns of wall 10 p1524 A66-21804  
 Cylinder rotation in boundary layer of air  
 stream 14 p2273 A66-26785  
 Negative effect of air countercurrents and  
 thermal stresses on performance of cooling  
 systems of gas turbine rotor disks with  
 lateral air flow 15 p2570 A66-28776  
 Pressure distribution, skin friction and  
 heat transfer for sharp- and blunt-nosed  
 slender bodies in hypersonic air  
 flow 17 p2837 A66-32070  
 Air flow luminescence front propagation in  
 electromagnetic shock tube measured, using  
 phase synchronized high-speed  
 photography 21 p3790 A66-39080

**AIR CUSHION VEHICLE**  
**SA GROUND EFFECT MACHINE**  
 Comparison of air cushion vehicles  
 supported by peripheral jets or by air  
 cushion contained in bell-shaped structure,  
 stressing simplicity of  
 latter 12 p1862 A66-23819  
 Air cushion landing gear for aircraft,  
 noting rubber tubing under fuselage forming  
 pneumatic bumper blown up by turbine  
 engine 17 p2848 A66-33082

**AIR DEFENSE SYSTEM**  
 Radar, telecommunication devices, antiraid  
 equipment and computers for air defense  
 system 04 p0494 A66-13693  
 Reliability of missile fire distribution  
 facility, noting transistorization effect on  
 economy 11 p1668 A66-22955  
 Semiautomatic digital data processing  
 system used in ground control of  
 interceptor aircraft, noting track marking on  
 PPI display, control of height radar, radio  
 message transmission, etc 14 p2271 A66-28299  
 U.S. strategic missile and air defense,  
 noting Nike-X system 24 p4297 A66-42950  
 U.S. tactical defense systems noting SAM  
 types, interceptors, technical problems, data  
 handling, radar, etc 24 p4297 A66-42951  
 High acceleration missiles for intercepting  
 enemy ballistic warheads, considering sprint  
 and hibex rockets, noting problems with gap  
 heat, gyro drift, communications,  
 etc 24 p4284 A66-42952

**AIR DUCT**  
 Calibration process for RZ-2 rocket engine,  
 noting changes in orifices, engine  
 performance, influence coefficients,  
 etc 21 p3807 A66-38640

**AIR FREIGHT INDUSTRY**  
 Potential air freight market in next decade  
 forecast as many-fold times present level  
 [SAE PAPER 650782] 01 p0012 A66-10839  
 Air cargo - International Forum, Chicago,  
 May 1966 15 p2619 A66-29788  
 Role of IATA cargo agent in handling air  
 freight shipments 15 p2619 A66-29789  
 Specialized services provided by air freight  
 forwarding industry to shipper and  
 carrier 15 p2619 A66-29790  
 Transportation needs of business in small  
 shipment category, discussing role of air  
 freight 15 p2619 A66-29791  
 Air cargo techniques applied to movement  
 of retail merchandise 15 p2620 A66-29792  
 Air cargo transport development, air  
 freight classification and inventory  
 balancing 15 p2620 A66-29794  
 European air cargo marketing and air  
 freight industry 15 p2620 A66-29795  
 New concepts in railroad management  
 oriented to logistics market and return on  
 investment 15 p2621 A66-29801  
 Civil Aeronautics Board /CAB/ role in air  
 freight industry and in proposed  
 Department of  
 Transportation 15 p2621 A66-29804

**AIR INLET**  
 Air intake with boundary layer trap,  
 examining flow structure under external  
 supersonic pressure and uniformity  
 parameters  
 [ONERA TP 288] 03 p0316 A66-12898  
 ONERA experimental wind tunnel research  
 with jet engine intakes and exits  
 [ONERA TP 292] 05 p0606 A66-15159  
 Air augmented propulsion in liquid  
 hydrogen-LOX rocket booster  
 engines 17 p2990 A66-32376  
 Engine air induction system, engine and  
 integral gear case oil cooling air induction  
 system and nacelle cooling and ventilating  
 air induction systems of XC-142A  
 [AIAA PAPER 66-632] 18 p3048 A66-34435

**AIR JET**  
 Heat transfer coefficient by impingement  
 of two-dimensional air jets  
 [ASME PAPER 65-HT-20] 05 p0605 A66-14742  
 Mean flow pattern of round air jet in  
 ambient airstream parallel to jet  
 axis 06 p0802 A66-16504  
 Heat transfer coefficient by impingement  
 of two-dimensional air jets  
 [ASME PAPER 65-HT-20] 11 p1629 A66-22190  
 Hot wire measurements in radial turbulent  
 incompressible air jet 18 p3045 A66-33593  
 Molecular mixing of cold air jet containing  
 sodium nitrite vapor and slipstream of  
 gasoline-air mixture combustion

products 23 p4149 A66-41793  
 Round turbulent low speed airjet  
 impingement on flat surface and application  
 to theoretical analysis of inviscid rotational  
 flow 23 p4012 A66-42002

**AIR MASS**  
 Total mass of Earth atmosphere computed,  
 using atmospheric pressure and land-height  
 distribution data 09 p1369 A66-19871  
 Investigation of two cold air fronts of  
 polar origin that occurred in Alpine region  
 in April 1962, using data from Tiros  
 IV 11 p1730 A66-23096  
 Turbulence energy balance equation used  
 in air mass transformation  
 problem 20 p3594 A66-38369

**AIR NAVIGATION**  
**SA ALL-WEATHER AIR NAVIGATION**  
**SA TACTICAL AIR NAVIGATION**  
 /TACAN/  
 A-NEW MOD 1 digitally controlled  
 navigation system for antisubmarine warfare  
 aircraft employing Univac CP-754-8 thin film  
 computer 01 p0098 A66-10002  
 Locating low cost aircraft inertial  
 navigation system being designed for  
 compatibility with high performance tactical  
 aircraft 01 p0099 A66-10010  
 SGN-10 Inertial Navigator, pure inertial  
 system with no damping or other external  
 input designed for commercial  
 aircraft 01 p0099 A66-10013  
 Electronic techniques applied to taxiing,  
 takeoff, aerial navigation and  
 landing 02 p0255 A66-11466  
 Doppler radar for aerial navigation noting  
 decoupling of transmitter from receiver,  
 velocity measurement within frequency  
 spectrum, etc 02 p0256 A66-11896  
 Doppler radar performance in air  
 navigation noting calibration error,  
 dispersion, hole-altitude phenomena,  
 etc 02 p0256 A66-11897  
 Aid to air navigation problem discussing  
 reliability and accuracy, hybrid system,  
 redundancy and credibility, display,  
 operational environment and navigation  
 technique 02 p0256 A66-11966  
 Hertzian and IR radiometry applied to  
 temperature determination for use in aerial  
 navigation 02 p0257 A66-12032  
 U.S. papers on air navigation control via  
 artificial satellites, discussing merits and  
 deficiencies 02 p0260 A66-12060  
 Flight control by ground-based radio  
 system discussing aerial navigation safety,  
 operating principles, equipment for VOR  
 and ILS and importance of  
 calibration 03 p0390 A66-13011  
 Helicopter navigation requirements for low  
 altitude sea missions at beyond-horizon  
 distance from supporting ship or shore  
 base 04 p0544 A66-14442  
 Long distance air navigation across North  
 Atlantic 07 p1063 A66-17444  
 International Air Transport Association,  
 Technical Conference, Miami, April 1965,  
 Volume 1 07 p1063 A66-17667  
 SST navigation and air traffic control  
 equipment for NAC-60 aircraft, noting  
 climbout, cruise, position, landing,  
 etc 07 p1067 A66-17687  
 Ferranti navigation display used to monitor  
 and update self-contained navigation system,  
 consisting basically of compass card  
 indicating true or magnetic  
 heading 07 p1067 A66-17688  
 Navigation precision for SST operation  
 having due regard to performance and  
 noise 07 p1069 A66-17709  
 Air traffic control system capacity and  
 navigational requirements for North Atlantic  
 and continental transition areas, discussing  
 relationship to accuracy and flight time  
 economy 07 p1069 A66-17713  
 AN/AVN 1 Astro Navigation Set, remote  
 controlled automatic photoelectric  
 sextant 07 p1073 A66-17766  
 Automatic airborne navigation facilities in  
 civil aircraft 07 p1073 A66-17767  
 Flight tests of navigation systems including  
 hyperbolic system, Doppler system, radio  
 altimeter testing, deviation in gyromagnetic  
 compasses, etc 07 p1073 A66-17770  
 Standardization of air navigation  
 techniques noting equipment  
 standardization, aircraft self-contained  
 capability, lateral standard error, radar

monitoring, etc 07 p1073 A66-17771  
Self-contained and ground-based aids to integrated air navigation system noting costs, crew, display, etc, to be used in SST at VLF 07 p1074 A66-17772  
Receiver for processing lane identification signals for Dectra navigation system and relation to tracking accuracy and probability of error 07 p1074 A66-17773  
Air navigation problems in North Atlantic including separation standards lateral and vertical, SST traffic, collision risk, etc 07 p1074 A66-17774  
Navigation techniques and operational objectives due to computer-generated flight plans of United Air Lines 07 p1074 A66-17777  
Synchronous navigational satellites for ships and planes, noting distance and direction measurement by satellite interferometers 07 p1075 A66-17785  
Project Accordion data to provide information for decisions on horizontal separation standards and navigational accuracy 07 p1076 A66-17790  
Ground based self-phasing and nonrigid airborne arrays for aerial mapping and navigation 08 p1252 A66-19510  
Chart display methods of let-down type, roller type and optical projection for aircraft navigation 10 p1554 A66-21897  
Flight and navigation procedures and requirements for civil aerial photography 11 p1705 A66-22662  
Illumination systems used as visual aids for pilots when approaching airport 12 p1857 A66-24089  
A-NEW MOD 1 digitally controlled navigation system for antisubmarine warfare aircraft employing Univac CP-754-8 thin film computer 13 p2124 A66-25596  
Air navigation problems in North Atlantic including separation standards lateral and vertical, SST traffic, collision risk, etc 13 p2124 A66-25861  
Navigation precision for SST operation having due regard to performance and noise 13 p2125 A66-25868  
Aircraft navigational error parameters combined statistically and used to evaluate wander expected in transport aircraft operating in transoceanic environment 15 p2535 A66-29624  
Inertial navigation application to aeronautics, requiring accelerometers and inertial platform with turning motion sensors 15 p2536 A66-29893  
Inertial navigation for commercial aviation economically justified by fuel economy due to reduced flight time 15 p2536 A66-29894  
Ocean platforms in North Atlantic to house radar and navigational aid for high-density commercial aircraft routes 18 p3131 A66-33559  
Text on theory of automated air navigation, examining methods of flight preparation and precision 22 p3946 A66-40855  
Microwave radiometry feasibility as technique for navigation data-sensing in Army aircraft 23 p4089 A66-41317

**AIR POLLUTION**

Effective planning and operations required for control of air pollution due to increased use of toxic propellants in larger missiles 02 p0183 A66-11491  
Evaluating air pollution hazard to personnel from exhaust gases of Titan II test firings 06 p0819 A66-16493  
Optical radiation absorption and attenuation by atmosphere polluted with carbon dust, including transmission coefficient calculation 09 p1402 A66-20313  
Clean Air Act in relation to toxicology and safety to evaluate atmospheric pollution [AIAA PAPER 66-375] 12 p1907 A66-24501  
Mean droplet size and dispersion of atomized liquids in industrial air determined by microscopic slides and photomicrographs 13 p2066 A66-26489  
Mass spectrometric investigations of interaction of atmospheric ions with molecules of rocket gas release 15 p2495 A66-30061  
Low pollution electric arc air heater of CH9 and CH10 type, using metal electrodes to provide air mass flow rates at 4000 degrees K 20 p3540 A66-36950  
Numerical evaluation of intensity of radiation scattered outward from turbid

atmosphere 20 p3593 A66-38190  
Solargraphic measurements of solar radiation absorption by atmospheric dust and pollutants and effects on solar energy transmission 22 p3912 A66-40244

**AIR PURIFICATION**

Safety measures in working with beryllium, discussing berylliosis prevention, dust reduction, protective suits, etc 05 p0687 A66-14862  
Integrated program approach for contamination control of space cabin atmospheres based on identification, estimation of concentration and system specifications 19 p3293 A66-36238

**AIR SAMPLING**

Cascade vault sampler for bacterial aerosols 08 p1177 A66-19087  
Ice crystallization on solid-insoluble nuclei in high humidity air, noting two measuring methods for nuclei concentration 14 p2327 A66-28134

**AIR SPEED**

Aircraft speed relation to range, endurance and maneuverability capabilities reviewed with regard to military value [SAE PAPER 650797] 05 p0610 A66-15012  
Instrumentation of Polish gliders including altimeters, rate-of-climb, turn and air speed indicators, magnetic compasses, artificial horizon, etc 12 p1882 A66-24386  
Indirectly heated PTC resistor for measurements of low pressures and high air velocities, noting basic circuit and application to heat exchangers 19 p3362 A66-36824

**AIR TO AIR MISSILE**

Air to air missiles describing guidance systems, launching aircraft, maximum range and contractor service 04 p0585 A66-13922  
Tabulation and description of missiles in service or under development 04 p0586 A66-13944  
Adaptive roll autopilot in air-to-air interceptor missile, noting application of dither principle, simulation results and noise rejection qualities 19 p3398 A66-36691  
Simulation and analysis of adaptive roll autopilot for air to air missile, using limit cycle with small amplitude controlled by gain changing loop 20 p3595 A66-36865

**AIR TO AIR REFUELING**

Hypothetical linear programming model for minimizing cost of aerial tanker support of practice bomber mission 06 p0805 A66-16349

**AIR TO SURFACE MISSILE**

Air to ground missiles including dimensions, weight, maximum Mach number, propulsion, status and operational or design problems 04 p0585 A66-13921  
Tabulation and description of missiles in service or under development 04 p0586 A66-13944

**AIR TRAFFIC**

Atmospheric conditions effect on supersonic jet traffic 02 p0178 A66-12030  
Forecasting methods for air passenger traffic between selected city-pairs in U.S. air transport network 02 p0178 A66-12218  
Layout and design of air terminal for Basel, Switzerland, noting passenger accommodation and air traffic problems 05 p0660 A66-15199  
International sanitary regulations and air traffic, noting uniform code for quarantine practices 11 p1647 A66-22479  
Douglas DC-8 super sixty series effect on airport requirements including noise level, runway problems and traffic [SAE PAPER 660281] 15 p2427 A66-29825  
Comparison of air, rail, bus and private car traffic within continental U.S. and within metropolitan France, excluding suburban traffic 20 p3495 A66-37397  
SST in nonoptimum conditions, discussing cost penalties due to navigation error, air traffic conditions, sonic boom restrictions, clear air turbulence and weather 21 p3695 A66-38451

**AIR TRAFFIC CONTROL****SA LANDING AID**

Eurocontrol efforts in optimum safe spacing of aircraft in flight with minimum restrictions by radar observations and pilot reports 01 p0102 A66-10180  
Bretigny experimental control center for studying air traffic control for Eurocontrol 01 p0053 A66-10181

Video maps for air traffic control by associating radar picture with geographic features noting mechanical, optical and electronic components 01 p0022 A66-10486  
Computer flight simulators at Langley discussing Boeing 707 jet, helicopter, air traffic control, orbital rendezvous and docking, lunar navigation and landing 01 p0055 A66-10957  
Electronic techniques applied to taxiing, takeoff, aerial navigation and landing 02 p0255 A66-11466  
Air traffic control methods using radar for long-term planning and solution of West German air traffic control problems 02 p0256 A66-11858  
Satellite functions in air traffic control systems noting position determination, aircraft surveillance, etc 02 p0258 A66-12042  
Telecart C for automatic digital evaluation of data supplied by hyperbolic radio navigation systems 02 p0260 A66-12061  
Self-reported stress-related symptoms among air traffic control specialists /ATCS/ and non-ATCS personnel 03 p0324 A66-12358  
Multiple access satellite-borne reflex repeater for continuous line of sight digital data links and voice transmission for air traffic control 05 p0630 A66-14589  
Milan airport system noting air traffic 05 p0661 A66-15846  
Statistical study of training and job performance measures of Air Traffic Control Specialists representing Enroute, Terminal and Flight Service Station specialties 06 p0973 A66-16821  
Air traffic control simulation system based on digital computer for Eurocontrol 06 p0870 A66-16953  
Long range navigation in jet operations, discussing problems and limitations 07 p1065 A66-17670  
Navigation and air traffic control environment, particularly extent to which lateral and longitudinal separations depend on accuracy of navigation 07 p1065 A66-17676  
Mathematical formulation of lateral and longitudinal separation standards for subsonic and supersonic aircraft operation 07 p1066 A66-17680  
Aircraft separation criteria applied to supersonic transport, describing standards and parameters of air traffic safety 07 p1066 A66-17682  
SST navigation and air traffic control equipment for NAC-60 aircraft, noting climbout, cruise, position, landing, etc 07 p1067 A66-17687  
Location of flight control system for simplifying crew procedure and reducing navigation error in areas of high traffic density 07 p1068 A66-17697  
Air traffic control system capacity and navigational requirements for North Atlantic and continental transition areas, discussing relationship to accuracy and flight time economy 07 p1069 A66-17713  
Simulation of airport with SST aircraft in air traffic control system 07 p1070 A66-17725  
Operational requirements for improved worldwide navigational ability, initially applied in North Atlantic area 07 p1072 A66-17761  
Relation of air traffic control separation to collision risk, applicable to North Atlantic routes 07 p1072 A66-17762  
Model of North Atlantic air space organized as sets of paths at various heights 07 p1072 A66-17763  
Safety and economic factors which determine navigational requirements in long range traffic area 07 p0988 A66-17764  
Air traffic control requirement for navigational capability, taking safety and economy into account 07 p1073 A66-17765  
Air navigation problems in North Atlantic including separation standards lateral and vertical, SST traffic, collision risk, etc 07 p1074 A66-17774  
Combination of moored ocean platforms and transatlantic submarine telephone cables for VHF communication service and other ATC facilities for civil aircraft across North Atlantic 07 p1002 A66-17775  
British Dectra system as long distance navigation aid, detailing increased power and reduction of ambiguities by means of zone and lane

- entification 07 p1075 A66-17789
- Moving map displays for navigation information portrayal, advantages and requirements for subsonic and SST liners 07 p1076 A66-17796
- Air navigation operational requirements for effective air traffic control determined by ICAO Special NAT 07 p1077 A66-17803
- Modern inertial navigation system development, describing accuracy, reliability and operational use of SGN-10 07 p1077 A66-17804
- Air derived separation assurance /ADSA/ systems to avoid in-flight aircraft collisions, detailing range altitude, relative position velocity and projected hazard indicator basic types 07 p1078 A66-18223
- FAA regulation of civilian use of U.S. airspace 08 p1321 A66-18548
- Internal friction and vertical separation effects on airways and traffic control and high altitude deviation in barometric altimeters 08 p1249 A66-18693
- Text on international law of territorial airspace, discussing civil aviation, trespassing and crime aboard aircraft 08 p1322 A66-19237
- Altitude measurement requirements for supersonic transport including flight profile, air traffic control, climb, etc. 09 p1400 A66-20426
- Air collision risk and traffic control in long-range air traffic systems as basis for safe procedural separation 09 p1401 A66-20431
- Standards for air traffic control deviations and relation to size of separation 09 p1401 A66-20432
- Radar detection of sailplanes and other small aircraft aided by aluminum reflecting surfaces 09 p1345 A66-20479
- Air traffic control automation problems 09 p1401 A66-20550
- Clear or secondary radar for air traffic control, noting operating principles, structure, etc. 09 p1346 A66-20555
- International satellite communications, noting application for air traffic, using VHF and 09 p1346 A66-20561
- Vertical separation effect on safety of civil aircraft with type II or III altimeter over North Atlantic 10 p1553 A66-21334
- Operation of VTOL aircraft in vicinity of airport including safety, noise and air traffic control factors 10 p1482 A66-21372
- Air traffic control transponder performance preflight test set, ground-based equipment for fast and positive checkout 11 p1732 A66-22898
- Digital data handling method for air traffic control system employing plan position indicators and video correlator for radar beacon signal analysis 11 p1732 A66-22899
- General purpose computers and cathode ray tube displays used in automation of air traffic control technical 11 p1732 A66-22900
- Role of artificial Earth satellites in air traffic control [AIAA PAPER 66-259] 12 p1910 A66-24734
- Collision prevention in controlled and uncontrolled air space, noting onboard visual surveillance, radar systems, etc. 13 p1213 A66-25233
- Secondary surveillance radar in aiding port traffic through aircraft transponder interrogation 13 p1214 A66-25701
- Air navigation problems in North Atlantic including separation standards lateral and vertical, SST traffic, collision risk, etc. 13 p1214 A66-25861
- Combination of moored ocean platforms and transatlantic submarine telephone cables for VHF communication service and other V/C facilities for civil aircraft across North Atlantic 13 p2058 A66-25862
- Navigation and secondary surveillance radar /SSR/ used in commercial helicopters New York airways [SAE PAPER 660319] 14 p2223 A66-27299
- Legal question in air traffic control concerning recommendation for proof of alt system without limitation on capability 14 p2416 A66-27840
- ST air traffic control and fuel consumption dependence on wind drift and atmospheric temperature 14 p2328 A66-28231
- Proposed one-satellite synchronous satellite system for over-ocean surveillance of aircraft 14 p2329 A66-28364
- Supersonic transport operations, particularly analog computer facility at Langley Research Center and ATC simulator at National Aviation Facilities Experimental Center 15 p2443 A66-28744
- SST air traffic control and arrival and departure simulation 15 p2425 A66-28745
- Air traffic controller performance in detecting possible conflicts among aircraft 15 p2534 A66-29125
- Automatic air traffic control development in France 15 p2534 A66-29126
- Schiphol Airport /Amsterdam/ analog computer installation for air traffic control and flight path calculations, with results displayed on automatic flight progress boards 15 p2534 A66-29311
- Air traffic control in West Germany, considering higher air traffic density and operating speeds 15 p2534 A66-29366
- Separation standards for air traffic control, with analysis of collision risks 15 p2535 A66-29623
- Aircraft navigational error parameters combined statistically and used to evaluate wander expected in transport aircraft operating in transoceanic environment 15 p2535 A66-29624
- Terrain clearance during climb and descent under air traffic control 15 p2535 A66-29627
- Optimum model route structure for North Atlantic subsonic jet traffic 15 p2535 A66-29713
- Possible use of computer as tool for air traffic control 16 p2742 A66-30089
- Navigation satellites as monitoring device by integrating navigational hardware into communications satellite for ATC 16 p2743 A66-30667
- Air traffic control system using primary and secondary radar, radar digitizer and computer complex 16 p2744 A66-31278
- Air traffic control radars, discussing airport surveillance radar /ASR/, precision approach radar /PAR/ and secondary surveillance radar /SSR/ 16 p2666 A66-31444
- Cruising level systems and semicircular rule 17 p2950 A66-32354
- SRT daylight radar display system for air traffic control 17 p2950 A66-32355
- Closed circuit television applied to data transfer in air traffic control, discussing accident prevention and information provision to aircraft 17 p2874 A66-32356
- Flight evaluation using course line computers with pictorial display as navigation aid 17 p2950 A66-32357
- Separation standards and navigation in long-range air traffic control region 17 p2954 A66-33213
- Air traffic control and navigation system for North Atlantic and worldwide all-weather navigation 17 p2956 A66-33224
- Automation in flight safety, noting role of radar, flight control system reliability, data processing system used, etc. 17 p2848 A66-33485
- Separation of aircraft over North Atlantic especially reduced lane width from 120 to 90 n miles 18 p3130 A66-33558
- Role of artificial Earth satellites in air traffic control [AIAA PAPER 66-259] 20 p3659 A66-36931
- Automation of air traffic control, discussing radar, data handling and data communication 20 p3595 A66-37003
- National and international trends in ATC from standpoint of pilot and operator safety 20 p3595 A66-37004
- Quantification of relative contributions of various functions to performance of mission combined with availability and dependability for system effectiveness 20 p3684 A66-37883
- Air traffic control problems posed by advent of supersonic transport may be eased by pictorial navigation display 20 p3598 A66-38185
- Safe separation standards estimation for analyzing long-range air traffic systems, emphasizing flying errors observation in operational conditions 21 p3760 A66-38452
- Costing of parallel route systems for supersonic traffic, examining diurnal traffic patterns, sensitivities to fuel requirements, sonic bang avoidance and layout of track systems 21 p3761 A66-38453
- Air traffic estimation, discussing installation locations and parameters for airport site choice 21 p3838 A66-39433
- Aircraft collision avoidance problems and approaches to solution, discussing air derived separation assurance /ADSA/ 21 p3768 A66-39466
- Narrow band transmitters for response code of secondary radar installations containing identity of aircraft and altitude for air traffic control 21 p3706 A66-39634
- Satellite functions in air traffic control systems noting position determination, aircraft surveillance, etc. 22 p3945 A66-40326
- Japanese air traffic control using real time computer data processing 22 p3945 A66-40617
- Approximation method for maximizing nonlinear separable function with two-sided limitations on unknowns, given common lower boundary for difference modulus of unknowns 23 p4088 A66-41059
- Stability, control, navigation, guidance and air traffic control of hypersonic vehicles noting inertial technology, flight planning and optimal control 24 p4235 A66-42239
- AIR TRANSPORTATION**
- SA CIVIL AVIATION**
- SA SUPERSONIC TRANSPORT**
- Short haul transport systems early and rapid evolution requirements to select first generation vehicles [SAE PAPER 650783] 01 p0012 A66-10840
- Organization of short-distance interurban transportation system based on STOL aircraft of Breguet type 05 p0611 A66-15194
- West German federal air transport authority, scope, organization and objectives 05 p0794 A66-15807
- Short-range aircraft design efficiency and possible reduction in operating cost 06 p0804 A66-15990
- Proposal for control of local service subsidies, noting lack of clearly stated public policy with respect to congressional statements and actions 06 p0973 A66-16401
- Price discrimination and regulation of air transportation, examining history, interplay and evolution 06 p0973 A66-16402
- Air transportation in next fifty years 07 p0985 A66-17226
- Air transport engineering, cost and reliability factors, development possibilities, new design construction phasing, etc. 07 p0987 A66-17488
- Interaction of pilot capabilities and economic factors on future air transport, noting problems with SST, V/STOL, Mach 6 transport craft, etc. 07 p1156 A66-17611
- International Air Transport Association, Technical Conference, Miami, April 1965, Volume 1 07 p1063 A66-17687
- Inertial navigation and guidance systems applied to civil air transport from systems engineering viewpoint 07 p1067 A66-17695
- International Air Transport Association, Technical Conference, Miami, April 1965, Volume 2 07 p1071 A66-17757
- Inertial navigation on north transatlantic route, examining inertial equipment, flight planning and preflight cockpit checks 07 p1076 A66-17798
- Book on political, economic and military analysis of air transport policy and national security 09 p1472 A66-20099
- STOL operations in city center, discussing metropolitan transportation problems 09 p1327 A66-20244
- Terminal facilities, support equipment and operational characteristics of V/STOL aircraft 09 p1330 A66-20696
- Inertial navigation and guidance systems applied to civil air transport from systems engineering viewpoint 13 p2125 A66-25865
- ATA direct operating cost formula for transport aircraft, considering flying operations, maintenance, depreciation and indirect costs [SAE PAPER 660280] 14 p2222 A66-27289
- Costs and operational characteristics of short haul air transportation in mid-1970 and 1980 periods in eastern corridor [SAE PAPER 660332] 14 p2223 A66-27295
- V/STOL aircraft for intercity travel, discussing cost, advantages, technological advances, etc. [SAE PAPER 660318] 14 p2223 A66-27298
- Overcapacity in U.S. international air

transport industry due to transition to jet between 1954 and 1963 14 p2417 A66-27841

Air cargo - International Forum, Chicago, May 1966 15 p2619 A66-29788

Coordinated air-surface transportation microeconomic analysis 15 p2620 A66-29796

Updating of air cargo documentation permitting intranet control and orderly accumulation of statistical information, noting forms and teletype machines 15 p2621 A66-29800

Civil Aeronautics Board /CAB/ role in air freight industry and in proposed Department of Transportation 15 p2621 A66-29804

Helicopter capabilities in solving interurban mass transport problems, particularly cost and time considerations [SAE PAPER 660336] 15 p2427 A66-29835

Helicopter design and application to common carrier transportation, particularly between airport and city [SAE PAPER 660335] 15 p2428 A66-29846

Commercial V/STOL aircraft and systems development, discussing government /FAA/ interest and assistance 16 p2633 A66-31281

Transportation developments for airport planning, emphasizing need to limit carrier transport service to single airport 16 p2682 A66-31283

Short haul air transportation in Europe, noting market development with helicopter techniques and development of more efficient rotor aircraft 23 p4151 A66-41303

Air transportation between 1980 and 2000, noting cost limitation, possible trends, management planning, etc 23 p4152 A66-41304

Passenger and cargo aircraft development 23 p4152 A66-41647

## AIRBORNE EQUIPMENT

Advanced integrated landing system /AILS/ consisting of azimuth and elevation ground station, ground display site and airborne unit, emphasizing scanning-beam technique 01 p0101 A66-10034

Progress in constant speed drive generating systems and control equipment for constant frequency aircraft electric systems [SAE PAPER 650827] 01 p0016 A66-10827

Coordinated program for airborne and ground support equipment testing of Gemini spacecraft and launch vehicle by two different manufacturers 02 p0294 A66-11635

Advisability of West German electronics industry stepping into aviation electronics industry to greater extent 02 p0199 A66-11859

MCS 920M airborne digital computer design, production processes and microelectronic techniques 02 p0193 A66-11931

Worldwide navigation system using existing ground and airborne equipment and limited number of navigation satellites 02 p0259 A66-12054

Airborne equipment modernization through elimination of moving parts and conversion from analog to digital techniques [AIAA PAPER 65-729] 03 p0341 A66-12580

Design and installation of antennae for airborne command and control systems, noting antenna system for SAC Airborne Command Post [AIAA PAPER 65-730] 03 p0334 A66-12581

Implementation of airborne command and control systems, emphasizing communications equipment, data processing facilities, electromagnetic compatibility and aircraft configuration parameters [AIAA PAPER 65-727] 03 p0336 A66-13049

Direct measurements of turbulent thermal flux using airborne pulse type system 04 p0513 A66-13418

Amount of maintenance float determined from relation between maintainability and reliability used to estimate effects of product changes [AIAA PAPER 65-734] 04 p0525 A66-13634

Avionics design using integrated electronics or microelectronics, noting reduction of maintenance requirements 04 p0494 A66-13684

Tests of airborne, gimbal and stabilized mounts of LaCoste-Romberg and Askania-Graf gravity meters conducted in 1962 04 p0524 A66-14452

IR spectral reflectance of terrestrial

atmosphere including ground cover effect, noting data from airborne equipment and instrumented rocket 05 p0669 A66-14947

Airborne laser-radar light detection and ranging /LIDAR/ systems applied to detection of clear air turbulence /CAT/ 05 p0697 A66-15297

Maintenance recordings of aircraft parameters, discussing signal conditioning, economics and application [ISA PREPRINT 1.3-1-65] 05 p0794 A66-15499

Airborne measurement of microwave emission from Earth surface and atmosphere for potential application of radiometry to weather satellite reconnaissance 05 p0675 A66-15765

One-way microelectronic airborne digital data converter intended for use in automatic carrier landings 06 p0824 A66-15969

Preflight and operational status test set /PTS/ using radiating techniques for checking out aircraft electronic equipment without removal from aircraft 06 p0868 A66-15986

Airborne navigation and flight-control equipment for reducing weather minimums to lowest possible level 06 p0907 A66-16427

Cloud raindrop sizes and concentration measurement by airborne flow device 06 p0880 A66-16556

Fault location in modern airborne radar, discussing maintenance reduction techniques and reliability improvement 07 p1006 A66-17495

Aircraft separation criteria applied to supersonic transport, describing standards and parameters of air traffic safety 07 p1066 A66-17682

Airborne computer design free of navigational functions performed by humans, using Doppler equipment 07 p1087 A66-17692

Mechanization of navigational functions for supersonic aircraft within central airborne digital computer, comparing military experience with commercial requirements 07 p1067 A66-17693

DECTRA long range navigational aid, DECTRA airborne receiver and Omnitrac computer 07 p1068 A66-17702

Doppler equipment including planar-array antennas, varactor-multiplier sources, etc, evaluated for third generation Decca series 07 p1068 A66-17703

Flight testing of FAA-Lear Siegler receiver/converter airborne system with Loran-C hyperbolic navigation system 07 p1069 A66-17706

C-band weather radar AVQ-10 incorporating tunnel diode amplifier and p-i-n solid state protector switch 07 p1008 A66-17711

Advanced airborne computer double system applied to fault detection, location, flight management and navigation 07 p1003 A66-17715

Airborne computer-aided navigation system, utilizing letter printer and pictorial display 07 p1070 A66-17718

VOR developments in terms of degree of compatibility with respect to airborne equipment 07 p1075 A66-17787

Reduction of signal power in X-band CW aircraft radar echo 08 p1181 A66-18718

Low cost airborne fixed-point data processor designed to operate with nondestructive readout instructions, constant memory and separate destructive-readout memory 08 p1184 A66-19522

Effect of altitude and camera field-of-view at various degrees on geographic orientation and error in target position, using TV data 08 p1225 A66-19531

Airborne microwave reconnaissance receiver design with almost zero IF 08 p1226 A66-19535

Sky observations with balloon-borne X-ray telescope having sodium iodine scintillator 09 p1442 A66-20466

Airborne camera system used to obtain roll, pitch and heading angles for aircraft during takeoff and landing [AIAA PAPER 65-210] 09 p1330 A66-20744

Aerodynamics of manometers and mass spectrometers used on rockets and satellites for determination of atmospheric temperature and density 09 p1383 A66-20993

Equipment located between Diamant second-stage propulsion unit and jettisonable

rear skirt of third stage including antennas, auxiliary rockets, attitude changing apparatus, control and guidance, etc 10 p1518 A66-21258

X-ray photographs of Sun using Fresnel zone plate camera mounted on Skylark rocket, noting Lyman C-VI emission line in solar spectrum 10 p1607 A66-21291

Onboard equipment designed for transport aircraft landings with visibilities less than 200 ft and runways less than 2600 ft, having all devices duplicated 10 p1554 A66-21368

Ground support equipment /GSE/ concept, onboard checkout system for large space boosters [AIAA PAPER 64-298] 10 p1612 A66-21955

Design of Malfunction Detection System used on board orbiting laboratory type vehicles to monitor and evaluate critical signals 10 p1538 A66-22043

Precise airborne geodetic survey system capable of measuring lines up to 900 nautical miles and determining nadir of aerial photographs to 24 ft 10 p1533 A66-22045

Flight and navigation procedures and requirements for civil aerial photography 11 p1705 A66-22662

Balloon-borne instrument for measuring downward flux of thermal radiation from atmospheric water vapor, using gold doped germanium detector 11 p1706 A66-22888

Computer capability and probable growth in aerospace vehicle applications considered against mission requirement constraints 11 p1659 A66-22959

Spark chamber with vidicon readout for balloon-and satellite-borne high energy gamma ray astronomy analysis, noting Cerenkov counter 12 p1877 A66-23685

Digitized spark chamber for balloon and satellite gamma ray astronomy, noting detector array, high voltage system and data acquisition and handling systems 12 p1877 A66-23687

Automatic handling of information by analog recording on magnetic tape for control, monitoring and maintenance of aircraft 12 p1880 A66-23817

Short term frequency stability affecting resolution and range of Doppler radar noting system and circuit requirements when operating under severe vibration and acoustic environment 12 p1815 A66-24131

Clear air turbulence types at high altitude identified and intensity and wavelength measured by FM instrument, using van der grust probe installed in U-2 aircraft [AIAA PAPER 66-362] 12 p1907 A66-24494

Microwave integrated circuits in radar systems, detailing airborne forward-looking radar, using phased arrays and pulse compression 12 p1840 A66-24621

Simultaneous observations of auroral zone X-ray microbursts, using two balloon-borne radiation detectors separated by 300 km to estimate size of region of electron precipitation 12 p1944 A66-24844

Design of system analyzing operating conditions of jet engine up to overhaul, recording regime of engine revolutions exhaust gas temperatures, accelerations, etc 13 p2076 A66-25077

Airborne checkout system, in-flight maintenance and related signal processing problems 13 p2190 A66-25255

Digital airborne computer for navigation problem solutions including inertial navigation, flight path, time-to-go and arrival time, etc 13 p2124 A66-25883

Electric machines employing evaporative and universal cooling systems for aircraft use 13 p2041 A66-25901

Cross sections of geomagnetic field intensity and ionospheric characteristic obtained by airborne equipment crossings of geomagnetic dip equator 13 p2074 A66-26331

Random error of drift measurements using airborne Doppler radar from observed drift output during short flight over fixed course calculating rms values 13 p2125 A66-26444

Reliability improvement in airborne electronic equipment 13 p2044 A66-26661

Modeling and data reduction techniques for obtaining spectrum signatures of low gal. LF airborne antennas 13 p2044 A66-26774

Ground-based test setup using p-n-p controlled switches, logic circuitry and

- sive relays to analyze telemetered pulse  
 als from four lines of airborne  
 etronic system 14 p2255 A66-27807  
 ound raindrop sizes and concentration  
 asurement by airborne flow  
 ice 14 p2297 A66-28228  
 ratospheric small-ion density  
 asurement from high-altitude jet aircraft,  
 ing dust effect 14 p2297 A66-28334  
 r Force Avionics Laboratory and  
 blem of transition from exploratory  
 elopment to operational  
 dware 15 p2618 A66-28746  
 3 rocket observation of proton and  
 etron fluxes at high altitudes, using solid  
 ce detectors 15 p2574 A66-28910  
 ear air turbulence detection and warning  
 r airborne devices including radar, IR  
 etrum, air temperature probes, ozone  
 ection, etc 15 p2500 A66-28917  
 ear air turbulence detection instrument  
 elopment 15 p2500 A66-28919  
 amera tubes for recording Stratoscope II  
 escope, noting photometric  
 elity 15 p2500 A66-28969  
 FCRL grazing incidence grating  
 nomochromator used with thin window flow  
 ager detector on Aerobee rocket for solar  
 etrum recordings between 30 and 130  
 estroms 15 p2605 A66-30079  
 vionics and  
 nsportation 16 p2830 A66-30087  
 ilitary aerial mapping program, noting  
 mera lens distortion, shutter, stabilization,  
 ms, etc 16 p2703 A66-30511  
 valuation of nonstereoscopic pairs of  
 otographs obtained from vertical base by  
 wing camera, determining spatial  
 rdinates of points on  
 otographs 16 p2703 A66-30512  
 ultisensor airborne reconnaissance  
 sion planning and data  
 uisition 16 p2704 A66-30516  
 yro-stabilized heliostat for airborne  
 ronomy noting design principles, achieved  
 bility, servoloop and mechanical  
 tem 16 p2705 A66-30824  
 yro-stabilized airborne solar eclipse  
 ctrograph, noting wavelength range,  
 rsion accuracy, guidance mechanism,  
 16 p2705 A66-30825  
 ircraft instrumentation for spectroscopic  
 servation of solar middle corona at  
 edium dispersion on May 30,  
 55 16 p2705 A66-30826  
 olarization photography of solar corona,  
 ing apparatus used for separation of K  
 m F component 16 p2705 A66-30827  
 elicopter simulation system for avionic  
 valuation 16 p2682 A66-31248  
 hermostability and control of airborne  
 lectronic equipment in closed-loop forced-  
 cooling systems 16 p2663 A66-31325  
 easibility of monopulse radar used for  
 rborne pictorial radar display as aid to low  
 roach aircraft landing 17 p2950 A66-31964  
 cosmic X-ray sources observed through  
 rket-mounted detectors, noting differences  
 spectra 17 p2994 A66-32970  
 ransfluxor program store for airborne  
 gital computer, noting wiring pattern,  
 onomics, read amplifier,  
 18 p3072 A66-33562  
 Atmospheric density measurements for  
 titudes up to 74 km from X-15 flights  
 ing stagnation pressure method  
 IAA PAPER 66-441] 18 p3104 A66-33646  
 ntegrated elements for aerial surveying  
 d mapping 18 p3109 A66-33739  
 Mark II avionics system used in F-111A  
 ctical fighter for navigation and weapons  
 elivery performance 18 p3076 A66-33958  
 Radiation pattern of ground surveillance  
 dar antenna measured with aid of airborne  
 gal generator 18 p3070 A66-34266  
 ACAN and DME navigation systems,  
 scussing ground stations, airborne  
 quipment and guidance  
 stems 18 p3133 A66-34465  
 nterplanetary magnetic field  
 easurements using flux gate magnetometer  
 nsor mounted on Pioneer VI space probe,  
 ing various graphs 18 p3108 A66-34538  
 Flight data recording and processing  
 stem using magnetic tape for digitally  
 mputing airborne data on flight testing of  
 OL aircraft 18 p3073 A66-34679  
 Primary cosmic radiation modulation study  
 by Ariel I and airborne  
 detector 18 p3180 A66-34770  
 Low-energy protons and electrons of outer  
 radiation belt measured by equipment  
 onboard Cosmos XLI 18 p3196 A66-34872  
 Airborne equipment for study of nucleon  
 interactions at energies in excess of 10  
 trillion ev 18 p3214 A66-35155  
 Built-in tests and periodic testing at field  
 shop level applied to avionic systems  
 operational readiness 19 p3339 A66-35504  
 Microelectronic airborne radar equipment  
 operating in ground mapping, terrain  
 avoidance and air to ground ranging, noting  
 design, packaging, etc 19 p3313 A66-35519  
 Operational environment formulation for  
 airborne navigation radar 19 p3397 A66-35521  
 Microelectronics impact on future airborne  
 radar systems reliability, cost and  
 performance 19 p3314 A66-35522  
 Mission system effectiveness of avionic  
 weapon system predicted by general-purpose  
 computerized technique 19 p3480 A66-35528  
 Airborne UHF telemetry receiver utilizing  
 solid state components and high-density  
 packaging technique 19 p3316 A66-35691  
 Microelectronics in airborne equipment,  
 noting reliability and cost  
 reduction 19 p3360 A66-36261  
 Linear polarization and relative intensity  
 variations of skylight measured with  
 aircraft-mounted telephotopolarimeter  
 during solar eclipse 19 p3349 A66-36346  
 Hydrogen and helium ions formation and  
 destruction, charge transfer, diffusion, role  
 during solar activity, using mass  
 spectrometry, ground radar,  
 etc 19 p3350 A66-36356  
 Airborne data acquisition statistical  
 recorder 19 p3361 A66-36669  
 Real-time data gathering and flight-test  
 technique for aircraft-carried weapons  
 system development  
 testing 20 p3495 A66-37207  
 Automatic built-in test of advanced  
 avionics systems, noting advantages of  
 airborne computer in sequencing, conducting  
 and evaluating in-flight  
 performance 20 p3522 A66-37245  
 Digital testing techniques for analog  
 systems, describing bomb computer set for  
 Phantom F-4D aircraft 20 p3522 A66-37246  
 In-flight stress measurements on coaxial  
 counterrotating helicopter blades, using  
 semiconductor strain gauge with HF  
 telemetric data  
 transmitters 20 p3668 A66-37504  
 Reliability testing programs applied to  
 aircraft electronics equipment and  
 description of development of MIL-STD-  
 781A, exploring relation between reliability  
 prediction and measurement  
 techniques 20 p3570 A66-37936  
 Central Telecommunications Laboratory 882  
 P arithmetical airborne  
 computer 20 p3523 A66-38013  
 Airborne electronic command device for  
 measuring time intervals corresponding to  
 cruising speed/ true flight altitude ratios up  
 to 40 21 p3735 A66-38569  
 Airborne guidance computations using  
 prescribed-h method, representing two-body  
 motion in inertial space, presenting  
 equations for target hitting, circular orbit,  
 etc 21 p3765 A66-38869  
 Airborne photoelectric device for  
 registration of cloud  
 drops 21 p3739 A66-39365  
 Aircraft equipment cooling techniques and  
 systems, particularly natural or free  
 convection 21 p3699 A66-39614  
 Aircraft and spacecraft digital systems  
 including computers for production  
 engineering, ground telemetry and  
 communication with aerospace vehicle and  
 onboard equipment for tracking, guidance  
 and simulation of inflight  
 conditions 21 p3709 A66-39629  
 Clear air turbulence detection and warning  
 by airborne devices including radar, IR  
 spectrum, air temperature probes, ozone  
 detection, etc 22 p3945 A66-40325  
 Turbulent refractivity spectrum and  
 optimization of airborne radar CAT  
 detectors 22 p3944 A66-40429  
 Rotary plate airborne bacteria  
 sampler 22 p3858 A66-40505  
 Ion temperature measurements around 1000  
 km altitude, using ion energy analyzer and  
 mass spectrometer mounted on  
 rocket 22 p3913 A66-40551  
 Number densities and composition of  
 upper atmosphere determined by  
 rocketborne mass spectrometers, estimating  
 temperature variation with  
 altitude 22 p3913 A66-40553  
 Airborne spectrozonal telephotometer used  
 in calculation of photographic brightness  
 coefficient of Earth  
 surface 22 p3919 A66-40621  
 Signal simulator for testing Loran A and  
 Loran C airborne receivers in laboratory,  
 using digital simulator circuits to test  
 dynamic response of tracking  
 circuits 23 p4088 A66-41253  
 Onboard miniaturized telemetry system for  
 stagnation point temperature measurements  
 on free-flight models in ballistic  
 ranges 24 p4209 A66-42189  
 Airborne digital computers role in  
 electronic warfare, navigation and guidance,  
 considering weight, power supply, costs,  
 etc 24 p4177 A66-42245

 SA XC-142 AIRCRAFT  
 SA XV-5 AIRCRAFT  
 Janes compendium of world aircraft, missiles and rockets 04 p0458 A66-14382  
 Aircraft with wings of low aspect ratio 09 p1329 A66-20556  
 Generalized masses of vibrational modes of elastomechanical system determined by three methods 17 p3018 A66-31876

**AIRCRAFT ACCIDENT**  
 Army evaluation and implementation of MIL-S-58077 in system safety engineering of aircraft to eliminate initial high accident rate 01 p0009 A66-10061  
 Aircraft crash loads and motion prediction by set of equations with results correlated by experiments on Lockheed 1649A and Curtiss C-46 01 p0009 A66-10071  
 Naval Aviation Safety Center role in reducing aircraft accidents annually, noting material and man-made accidents 01 p0009 A66-10072  
 Aircraft damage scale constructed from photographs of accident-involved aircraft by method of equal-appearing intervals 02 p0177 A66-11831  
 Historical development of rules governing international cooperation on aircraft accident investigations [AIAA PAPER 65-768] 03 p0446 A66-12591  
 Carrier landing improvements in Fresnel lens optical landing system, emphasizing compensated-meatball stabilization [AIAA PAPER 65-791] 03 p0322 A66-13228  
 USAF aircraft accidents involving ten or more fatalities 06 p0807 A66-16825  
 XB-70A in-flight wing accident, noting damage 07 p0987 A66-17277  
 Marine pilot training to develop visual habit patterns as aid in reducing mid-air collision hazards 07 p0999 A66-17712  
 Air derived separation assurance /ADSA/ systems to avoid in-flight aircraft collisions, detailing range altitude, relative position velocity and projected hazard indicator basic types 07 p1078 A66-18223  
 Passenger injuries due to decompression, impact and explosion from dynamite in rear lavatory of Boeing 707 at high altitude 09 p1336 A66-20522  
 RAF system of classification of aircraft accidents by causes for statistical purposes 10 p1494 A66-22139  
 Human factors in causation of aircraft accidents such as faulty perception, erroneous instrument reading and central nervous system malfunction 10 p1495 A66-22140  
 Results of aircraft accidents in terms of injury and death in-flight, on impact, after impact and during escape 10 p1495 A66-22141  
 Medical knowledge as aid in preventing aircraft accidents and injury through investigation of causes and results 10 p1495 A66-22142  
 Contribution of medical science to accident prevention, discussing causes, results and escape from standpoint of man and machine 10 p1495 A66-22143

Simulation of aircraft crashes to evaluate seating and restraint systems 16 p2680 A66-30480  
 Human factors in B-58 aircraft accidents, considering nose-high landing requirement, pilot fatigue and evaluation of ejection facilities 17 p2864 A66-32166  
 Aircraft accidents resulting from pilot errors of skill and background factors 19 p3294 A66-36439  
 Pilot role in VTOL safety during takeoff and transition phase 19 p3279 A66-36440  
 Medical inquest of Britannia 312 crash near Innsbruck 19 p3294 A66-36441  
 Aircraft accident victim identification techniques 19 p3294 A66-36444  
 Aircraft escape systems design criteria established using military accident statistics, noting drogue parachute and pilot sizes 22 p3850 A66-40610  
 Alcohol induced hypoglycemia as factor in aircraft accidents, noting effect of post mortem changes in blood glucose level 24 p4164 A66-42458

**AIRCRAFT ACCIDENT INVESTIGATION**  
 SR-N5 hovercraft accidents analyzed for prevention of future overturnings or plough-ins 05 p0609 A66-14866  
 Determining whether aircraft was on fire before crash by examination of wreckage fragments 09 p1329 A66-20241  
 French commercial aircraft accident investigation 13 p1994 A66-25232  
 Flight accident casualties, pathological changes in bodies of victims of Comet 4C SA-R7 accident in Italy 14 p2229 A66-26812  
 Hostile long term storage environments, discussing aircraft component condition following extensive exposure 16 p2635 A66-30472  
 Statistical analysis of vertebral fracture in U.S. Navy during 1959-1963 period 16 p2644 A66-31132  
 Accidents involving human error evaluated from medical point of view 18 p3053 A66-34947  
 Civilian aircraft accident investigation in West Germany 19 p3294 A66-36442  
 Air Force pathologist role in accident investigation, noting crash injuries 19 p3294 A66-36443  
 Flying skills assessment in relation to accident liability 20 p3508 A66-36995  
 Swedish aircraft incident /near accident/ documentation and analysis, discussing high rate in air force, prevention and psychophysiological excitation of in-flight tasks 20 p3508 A66-37007

**AIRCRAFT ANTENNA**  
 Linking monopulse radar antennas in aircraft tracking system 04 p0497 A66-13965  
 Correlation between clear air turbulence and aircraft electrical activity, describing corona discharges from DC-8 tail antenna 15 p2426 A66-28922  
 LF electrostatic field characteristics of clear air turbulence, noting theory and application of field sensing antennas, turbulence generated signals, etc 15 p2532 A66-28923  
 VHF aircraft antennas for propagation and communication via synchronous satellite, discussing nose radome yagi and window cavity arrays 20 p3525 A66-37235  
 Antennas for electronic navigation, discussing aircraft and ground based equipment, radiation patterns, restrictions, etc 20 p3597 A66-37719

**AIRCRAFT APPROACH AND LANDING INSTRUMENT**  
 Sectionalized, automatic approach and landing system with monitor channel added developed by Boeing-Bendix for all-weather landing 01 p0101 A66-10033

**AIRCRAFT BRAKE**  
 SA DROGUE PARACHUTE  
 SA WHEEL BRAKE  
 Water, ice and slush effects on traction characteristics of runway pavement, noting aquaplaning and aircraft braking criteria 02 p0216 A66-12223  
 Aircraft braking system, determining energy absorbed during landing or interrupted takeoff 06 p0807 A66-16970  
 Aircraft landing gear design, evaluating undercarriage of research aircraft and weapons systems 07 p0987 A66-17359  
 Hytrol electronic/hydraulic antiskid braking

system for automatic braking pressure modulation in BAC one-eleven 400 series aircraft 07 p0992 A66-18163  
 P-3 tricycle landing gear assembly examining mechanical and hydraulic mechanisms for brakes and steering, using graphic charts 19 p3279 A66-36059

**AIRCRAFT BREATHING APPARATUS**  
 Physiology of breathing at reduced pressure and design of aircraft oxygen system, noting cabin and mask design 10 p1489 A66-22118  
 LOX characteristics for on board breathing equipment including contaminants noxious to people, clogging of equipment, explosiveness and possible use of contaminated LOX 22 p3858 A66-40504

**AIRCRAFT CABIN**  
 SA CABIN ATMOSPHERE  
 SA PRESSURIZED CABIN  
 Approach and landing visibility requirements in terms of information needed by civil pilot 01 p0101 A66-10033  
 Air conditioning system of SST Concordia noting reliability 04 p0460 A66-14464  
 Low humidity and dehydration in jet fuselage, noting water metabolism and effect of various beverages 10 p1491 A66-21333  
 Pressure cabin design and utilization noting relation between air speed and environmental temperature on kinetic heating, contamination of cabin air, pressurization control, sealed cabin advantages, etc 10 p1492 A66-22111  
 Air conditioning system of SST Concordia noting reliability 11 p1640 A66-22255  
 Interior design of BAC 111 short haul jet transport 13 p1994 A66-25566  
 Airliner seat and galley design, investigating loading and safety, comfort convertible seats, upholstery, quick-change seating, etc 21 p3696 A66-39394

**AIRCRAFT CARRIER**  
 Automatic and semiautomatic vectoring and landing capability of U.S. Navy carrier-based aircraft F-4G Phantom II 01 p0099 A66-10000  
 Carrier landing improvements in Fresnel lens optical landing system, emphasizing compensated-meatball stabilization [AIAA PAPER 65-791] 03 p0322 A66-13228  
 One-way microelectronic airborne digital data converter intended for use in automatic carrier landings 06 p0824 A66-15966  
 Versatile avionics shop test /VAST/ system, computerized test system for carrier-based avionics 12 p1838 A66-24666  
 Radiation of prescribed polarization from cross-dipole antenna on aircraft carrier 15 p2447 A66-28555

**AIRCRAFT COMMUNICATION**  
 Frequency diversity can increase degree of compensation for multipath fading and thus improve communication reliability of airborne UHF communications 01 p0031 A66-10877  
 HF antenna coupler noting placement, parts and advantages over long wave antennas 03 p0335 A66-12909  
 Detachable radio relay pods /RRQ-5/ increase range of UHF and VHF communications systems [AIAA PAPER 65-728] 03 p0336 A66-13040  
 VHF aircraft-satellite relay /VASR/ means of improving long-range communications, with flight test results 06 p0825 A66-15966  
 Book on radio wave propagation for aircraft radio communication including frequency ranges, waveguides, ionospheric layer influence, noise, antenna properties, etc 06 p0832 A66-16555  
 International satellite communications: noting application for air traffic, using VHF band 09 p1346 A66-20555  
 Fading and multipath propagation mechanism for communication links involving satellites and aircraft with antenna beams, assuming fading models and estimating margin required for FS teletype transmission [AIAA PAPER 66-294] 12 p1822 A66-24707  
 Transhorizon VHF propagation over ground-air paths and transmission loss 13 p2020 A66-25222  
 Advanced avionics systems for improved surveillance and communications for Army

and-support aircraft 13 p2023 A66-25644  
 satellite communications systems for use  
 pilots passing over empty stretches of  
 or sea 14 p2243 A66-28363  
 eachable radio relay pods /RRQ-5/ to  
 ease range of UHF and VHF  
 munications systems 16 p2654 A66-31326  
 AIAA PAPER 65-728] 16 p2654 A66-31326  
 il aviation communications between  
 and ground controller on over-ocean  
 ts, considering use of VHF and HF and  
 rous satellite to extend 20 p3515 A66-37234  
**RAFT CONFIGURATION**  
 pped and slow rotor aircraft  
 igation for fundamental limitations on  
 ard flight speed of compound  
 eopters [SAE PAPER 650806] 01 p0012 A66-10847  
 plane configuration effect on shape and  
 ntitude of sonic boom pressure signature,  
 ng theoretical and empirical methods  
 AIAA PAPER 65-803] 03 p0320 A66-12599  
 nalytic processes for evaluation of  
 rsonic aerodynamics of configuration  
 ing drag, wing design, wrap,  
 erference and sidewash  
 AIAA PAPER 65-717] 03 p0321 A66-13048  
 mplementation of airborne command and  
 rol systems, emphasizing  
 munications equipment, data processing  
 ities, electromagnetic compatibility and  
 raft configuration parameters  
 AIAA PAPER 65-727] 03 p0336 A66-13049  
 he effect on VTOL aircraft hover and  
 speed handling qualities for helicopter  
 jet VTOL 06 p0806 A66-16813  
 ncorde SST aircraft prototype design  
 evelopment 09 p1329 A66-20132  
 ility of wing mounted pro-rotor pylon  
 ems in fully converted aircraft  
 uration, showing in-plane force  
 erated by blade flapping as destabilizing  
 or 16 p2633 A66-30599  
 an loading on wing of complete aircraft  
 uration determined, using segmented  
 in wind tunnel test technique and  
 t squares method 22 p3895 A66-40649  
 AIAA PAPER 66-768] 22 p3895 A66-40649  
**RAFT CONSTRUCTION**  
**PLASTIC AIRCRAFT**  
**CONSTRUCTION**  
 search, development, test and operation  
 ating devices used in aircraft  
 ruction supply real time data,  
 nsidering human factor, costs,  
 01 p0054 A66-10871  
 OL aircraft construction problems,  
 ularly high performance aircraft  
 oying combination of lift and lift-cruise  
 nes 01 p0012 A66-10923  
 sponsibilities of transport aircraft  
 ructor and subcontractor noting  
 age risk of third party and purchaser,  
 rantees, etc 02 p0306 A66-11748  
 revention of metallic edge corrosion of  
 al aircraft, evaluating surface treatments,  
 ners, epoxy enamels,  
 03 p0380 A66-12318  
 ptimal design for lightweight structures,  
 nsidering material properties, shape and  
 raction forces 06 p0963 A66-16474  
 RT in tool schedule for T-38 trainer and  
 ighter assembly line 10 p1539 A66-21168  
 rplane construction and technology in  
 Force 11 p1636 A66-22846  
 rcraft spinning problems, noting mass  
 istribution and tail design factors for  
 efactory spin recovery  
 aracteristics 11 p1637 A66-23077  
 11 swing-wing /variable-sweep/ aircraft  
 gram 11 p1637 A66-23101  
 et and cold hardening of aluminum-  
 ber-magnesium alloys for application to  
 iles and aircraft skins analyzed, using  
 tron microscope, noting metastable  
 ses 12 p1893 A66-23747  
 bit arc automatic tungsten inert gas  
 on welding and application to joining  
 ular systems in aerospace industry  
**TIME PREPRINT AD66-719]**  
 12 p1886 A66-24410  
 tanium and alloys examined, noting high  
 length-weight ratio, corrosion resistance,  
 trochemical properties, application for  
 rsonic transport, etc 13 p2107 A66-25483  
 ndwich panel composed of plastic  
 ular cells in parts of Hansa

aircraft 13 p1994 A66-25500  
 HS 125 twin-jet 500-mph executive aircraft,  
 construction, pressurization, maintenance,  
 etc 13 p1995 A66-26282  
 Subsonic business aircraft manufacturing  
 processes and techniques relation to  
 production time and costs  
 [SAE PAPER 660206] 13 p2087 A66-26395  
 High by-pass turbofan for business aircraft,  
 comparing jet propulsion system efficiency  
 with fan engines, cost factors and market  
 potentials [SAE PAPER 660221] 13 p2173 A66-26400  
 XB-70 technology, developments in  
 materials, equipment and manufacturing  
 including steel alloys, welding, etc  
 [SAE PAPER 660276] 15 p2427 A66-29822  
 Book on design calculations of elements of  
 aviation construction including elastic  
 parameters for finned fillers, shell torsion,  
 shell stability, etc 16 p2816 A66-31045  
 German HFB tubular aircraft construction  
 techniques and light constructional  
 elements 17 p3023 A66-32301  
 High temperature behavior of organic  
 materials for aircraft, noting elastomers and  
 platomers [ICAS PAPER 66-33] 22 p3938 A66-40660  
 Welding and adhesion techniques in  
 aircraft and space vehicle construction -  
 Conference, Hanover, West Germany, May  
 1966 23 p4073 A66-41530  
 Welding technology in aircraft construction  
 including military aircraft, VTOL, helicopter,  
 TIG method, etc 23 p4073 A66-41531  
 Supersonic transport production problems,  
 discussing Concorde, Lockheed and Boeing  
 projects, machining, shaping and  
 assembling 23 p4073 A66-41649  
 Do 31 system test stand including cockpit  
 with instruments, fuselage frame, wing  
 structure, etc 24 p4192 A66-42488  
**AIRCRAFT CONTROL**  
**SA WING TIP CONTROL**  
 Fail-operative stability augmentation  
 system for C-141 jet transport aircraft yaw  
 control axis, using triple redundant sensors  
 and signaling 01 p0011 A66-10662  
 Aircraft control power requirements  
 provided by lift fan propulsion system for  
 V/STOL flight, noting gas power transfer  
 [SAE PAPER 650831] 01 p0130 A66-10830  
 Prediction display based on computer  
 extrapolated data in aircraft  
 piloting 02 p0187 A66-11985  
 Propulsion-control systems interface for  
 V/STOL hover control in aircraft, using lift  
 plus lift cruise propulsion concept  
 [AIAA PAPER 65-799] 03 p0319 A66-12564  
 Reduced stiffness responses of airplane to  
 longitudinal control, noting elevator flutter  
 and stick-fixed dynamic longitudinal stability  
 [AIAA PAPER 65-784] 03 p0320 A66-12594  
 Experimental fixed and moving-base flight  
 simulator investigation of generalized  
 aircraft longitudinal pilot induced  
 oscillations [AIAA PAPER 65-793] 03 p0352 A66-12596  
 Flying qualities requirements related to  
 control system complexity noting  
 longitudinal, lateral and directional  
 requirements [AIAA PAPER 65-794] 03 p0320 A66-12597  
 Reaction control system for V/STOL  
 aircraft including power source, working  
 fluid, delivery system, thrust producing  
 devices and control point [SAE PAPER 650830] 05 p0610 A66-15014  
 Variable sweep wing effect on supersonic  
 transport stability and control  
 characteristics [AIAA PAPER 64-603] 05 p0610 A66-15068  
 Mixed translation and attitude control  
 system using single cockpit stick for low-  
 speed flight control of VTOL  
 aircraft 05 p0610 A66-15078  
 Accessory power drive, variable sweep  
 wing actuation, hydraulic, electric and  
 environmental control systems of Boeing  
 SST [ASME PAPER 65-AV-13] 05 p0611 A66-15131  
 X-22A variable stability and control VTOL  
 aircraft 06 p0809 A66-16816  
 Control and lift-propulsion systems and  
 model testing of Canadair CL-84 V/STOL  
 tilt-wing aircraft 06 p0804 A66-16818  
 Rolls-Royce RB 108 jet engine, discussing  
 project history, test results and current

application 06 p0943 A66-17021  
 XB-70A, high Mach number handling  
 qualities and suggested improvements  
 through addition of better instrument  
 presentation, automatic flight control,  
 etc 07 p0986 A66-17275  
 Elastic properties of bearing elements of  
 gyrotachometer and effect on frequency of  
 oscillations 07 p1031 A66-17409  
 Utilization of computers to reduce cockpit  
 work load, particularly in SST  
 aircraft 07 p1003 A66-17726  
 Direct lift control as landing approach aid  
 by providing more rapid means of changing  
 and controlling flight path than conventional  
 methods [AIAA PAPER 66-14] 08 p1167 A66-18985  
 Stick pushers in new medium range jet  
 transports, noting aerodynamics of aircraft  
 stall 11 p1637 A66-23072  
 Efficiency factors such as roll scanning  
 methods and pitch control effectiveness in  
 hover control system for VTOL  
 aircraft 11 p1638 A66-23258  
 Control problems in operation of transport  
 aircraft noting degrees of freedom,  
 computer aid, human factor,  
 etc 13 p2047 A66-25497  
 Book on unmanned aircraft and rocket  
 control systems, flight dynamics in  
 conjunction with control processes, design  
 of stabilization and guidance  
 systems 13 p2055 A66-26462  
 Minimum time-of-flight aircraft trajectory  
 between two points with account of Earth  
 sphericity 13 p2125 A66-26481  
 Handling and operation of XB-70 aircraft,  
 noting flight testing, folding wing tips,  
 weight, speed, etc 14 p2222 A66-27284  
 [SAE PAPER 660273] 14 p2222 A66-27284  
 Motion equations for dynamics of aircraft  
 control surface controlled by  
 autopilot 14 p2328 A66-27687  
 Semiautomatic digital data processing  
 system used in ground control of  
 interceptor aircraft, noting track marking on  
 PPI display, control of height radar, radio  
 message transmission, etc 14 p2271 A66-28299  
 Book on automatic control of linear and  
 nonlinear systems, particularly aircraft  
 utilization 16 p2744 A66-31058  
 Discrete control signal effect on crabbing  
 /sideways motion/ of aircraft during floating  
 and after touchdown 17 p2950 A66-32584  
 Flying qualities and aircraft control during  
 tandem rotor helicopter external sling load  
 operations 17 p2846 A66-32742  
 Longitudinal motion of piloted aircraft  
 during rapid dropping of concentrated loads  
 in comparison of numerical solution with  
 flight data 17 p2848 A66-33076  
 Reduced stiffness responses of airplane to  
 longitudinal control, noting elevator flutter  
 and stick-fixed dynamic longitudinal stability  
 [AIAA PAPER 65-784] 19 p3279 A66-36485  
 Multiloop control interaction using  
 linearized technique, noting variable  
 geometry intake loop 20 p3627 A66-36881  
 Experimental maneuver demand aircraft  
 control system, noting design considerations,  
 operation and performance  
 characteristics 20 p3493 A66-36887  
 Transfer response of pilot to steady  
 continuous one-dimensional perturbation of  
 lateral motion of aircraft tested in Boeing  
 707 flight simulator 21 p3701 A66-39832  
 Control laws providing attainment of  
 prescribed attitude and acceleration to  
 prescribed speed in minimum time or fuel  
 consumption for VTOL  
 aircraft 21 p3768 A66-39606  
 Dropping heavy stores from low altitude  
 aircraft, considering stability of store after  
 leaving aircraft and rebound from impact  
 with ground 22 p3850 A66-40616  
 Medical aspects of skill in flying modern  
 aircraft, considering health, personal and  
 environmental factors such as noise levels,  
 placing of controls and barometric pressure  
 [ICAS PAPER 66-19] 22 p3858 A66-40668  
 Pilot dynamic response in bank angle  
 control maneuver simulation of sidewind  
 landing of aircraft [ICAS PAPER 66-14] 22 p3945 A66-40672  
 Optimization of VTOL control concepts  
 with and without stabilization compared  
 with six degree of freedom motion  
 simulator, noting system failure effects and

nonlinear concepts 22 p3851 A66-40675  
 [ICAS PAPER 66-9] 22 p3851 A66-40675  
 Propulsion control systems interface for V/STOL hover control in aircraft, using lift plus lift cruise propulsion concept [AIAA PAPER 65-799] 23 p4015 A66-40985  
 Automatic flight control for VJ 101C VTOL aircraft, noting autopilot function 23 p4016 A66-41931  
 Stability, control, navigation, guidance and air traffic control of hypersonic vehicles noting inertial technology, flight planning and optimal control 24 p4235 A66-42239

## AIRCRAFT DESIGN

## SA HELICOPTER DESIGN

DC-9 maintainability, simplicity and commonality of design with emphasis on reliability 01 p0129 A66-10092  
 F-5/T-38 design philosophy to meet rigorous operational and maintenance requirements 01 p0010 A66-10094  
 Weight and load factor modification of V/STOL aircraft design when aircraft is used as weapon system 01 p0011 A66-10186

Balanced power concept for weight savings in aircraft actuation system consisting of mechanically actuated flight control surface, mechanical servo, flywheel and motor 01 p0015 A66-10670  
 XB-70 vehicle control system sensing, local force application, coupling and adaptability for increasing structural mode damping ratio, thus avoiding disturbing pilot accelerations and structural loads 01 p0103 A66-10672

Statistical analysis of dynamic system response used to design aircraft undercarriage systems [AIAA PAPER 65-710] 01 p0013 A66-10947  
 C-5A aircraft design load criteria for landing gear of large aircraft that must operate from semi-improved airfields [AIAA PAPER 65-711] 01 p0013 A66-10948  
 Airport pavement roughness data and aircraft response data evaluated to determine pavement design and construction criteria [AIAA PAPER 65-712] 01 p0055 A66-10949

Ground and laboratory testing of HFB 320 Hansa considering static, dynamic, wind tunnel and deicing tests 02 p0176 A66-11245  
 Comparative design study of low-disk-loading VTOL concepts including stopped-rotor, tilt-propeller, tilt-wing, transport effectiveness, etc 03 p0318 A66-12551

DC-9 aerodynamic design features and control systems [AIAA PAPER 65-738] 03 p0320 A66-12731  
 Aerodynamic design of Boeing 737 covering data of analytical studies, wind tunnel and flight tests, aerodynamic parameters and drag, flap system size, efficiency, wing geometry and handling qualities [AIAA PAPER 65-739] 03 p0321 A66-13047

Thrust-control system on XC-142A tilt-wing aircraft considered in connection with structural design of aircraft hover, transition and acceleration [AIAA PAPER 65-769] 03 p0321 A66-13063  
 Variable geometry aircraft structural problems including fail-safe criteria, flutter configurations, dynamic loads, etc [AIAA PAPER 65-774] 03 p0438 A66-13064  
 Design and development of U.S. SST program 03 p0322 A66-13105

Hypersonic aircraft and aerodynamic aspects for global transport operation noting shock waves, Mach number and gas dynamics 04 p0453 A66-13504

Aerodynamically conventional low-wing monoplane design for high-performance light aircraft stressed to 8g limit loads, utilizing fiberglass reinforced plastic primary structure 04 p0588 A66-13633  
 Variable-sweep aircraft design, with application to trainer, strike fighter and supersonic transport 04 p0458 A66-13928

Aerodynamics, performance and operational considerations effect on Boeing design of variable sweep supersonic transport aircraft [SAE PAPER 858C] 04 p0458 A66-13929

General Dynamics/Grumman multi-mission variable-sweep fighter for Navy and Air Force 04 p0458 A66-13930

Analytical tool for computer flight testing of VTOL designs, evaluating effects of steady state flight, maneuvers, gust

response and weapon

recoll 04 p0490 A66-14137  
 Effect of canard foreplane on longitudinal long-period perturbed motion of aircraft depends on change in hinge moments with Mach number change 04 p0458 A66-14152  
 Drag decrease in glider aircraft noting wing profile, flow laminarization /boundary layer control/, landing flaps, tail, etc 05 p0607 A66-15200

Future developments in supersonic transport and V/STOL aircraft 05 p0611 A66-15269

Short-range aircraft design efficiency and possible reduction in operating cost 06 p0804 A66-15990

Possible cost reduction with all-wing short-range aircraft, noting ogee design 06 p0804 A66-15993

V/STOL Aircraft Symposium, Wright-Patterson AFB, Ohio, November 1965 06 p0805 A66-16808

Quad tilt propeller, tilt prop/rotor and two direct lift jets for VTOL aircraft compared for design 06 p0806 A66-16811

Control power composition and usage characterized for VTOL aircraft flight control system design 06 p0806 A66-16812

Fokker F-28 Fellowship short-haul passenger aircraft 06 p0807 A66-17166

Optimum operational influence on design of DC-9 cockpit 07 p0988 A66-17704

VC10 C Mk I jet transport for troop transport, freighting, casualty evacuation and refueling 07 p0989 A66-18163

Deep-stall characteristics of T-tailed aircraft configurations and recovery procedures, noting parameters of pitch-up, angle of attack, etc 07 p0989 A66-18446

[AIAA PAPER 66-13] 07 p0989 A66-18446  
 X-20 program for maneuverable hypersonic reentry vehicle, noting boost-glide dynamic soaring 08 p1300 A66-18555

American supersonic commercial air transport design, development and operation 08 p1167 A66-18557

Aircraft design parameter development, discussing supersonic air transport, helicopter and V/STOL design problems, metal fatigue, etc 08 p1167 A66-18707

Military aircraft from design stage through service life, emphasizing flight testing 08 p1322 A66-19017

Thermal management of Lockheed L-2000 supersonic transport heat sources and sinks, considering flight profile, aircraft configuration and heat transfer modes [ASME PAPER 65-AV-40] 09 p1329 A66-20298

Design and propulsion of 2-B version of Lockheed L-2000 SST noting drooping nose, variable geometry inlets, stressed skin construction, etc 09 p1329 A66-20390

XC-142A V/STOL transport aircraft with four-ton payload and 200 nautical mile range radius [AIAA PAPER 64-775] 09 p1330 A66-20735

Reliability factors considered by aircraft designers and manufacturers including bad design, indifferent manufacture, inadequate testing, human error, etc 10 p1538 A66-21134

Aircraft landing gear design and maintenance, noting elimination of sharp corners and radii, weldability criterion, joints, part identification, bushings, etc 10 p1482 A66-21135

Short-haul aircraft design for low direct operating costs, noting various wings 10 p1482 A66-21364

Lift-drag ratio, specific impulse, aspect ratio and weight of payload and power plant considered for STOL aircraft 10 p1483 A66-21398

Aircraft fuselage design in region of center section for case of asymmetric bending 11 p1782 A66-22854

DC-9 Douglas short-and medium-range air transport, discussing takeoff field length, fuel capacity, payload and landing-field length 12 p1800 A66-23754

Boeing 737 twin-jet, discussing wing, fuselage and tail design, aerodynamic wind tunnel tests, stability and control, etc 12 p1801 A66-23785

Optimization criteria for critical parameters for attainment of flight by man powered aircraft 12 p1801 A66-23803

Aircraft electrical system design, power requirements, instrumentation, excess loads,

etc 12 p1803 A66-24387

Basic principles of structural design as applied to aircraft, discussing loads and strengths and effect of accidents and costs 12 p1971 A66-24972

Large transport aircraft design, examining effect of high horizontal stabilizer location on vertical fin [AIAA PAPER 65-331] 13 p1994 A66-25588

Ring wings to develop beneficial aerodynamic interference effects at supersonic speeds 13 p1995 A66-25590

Lockheed supersonic air transport design development 13 p1995 A66-25758

DC-9 maintainability, simplicity and commonality of design with emphasis on reliability 13 p2173 A66-26231

Vapor-cycle air conditioning for business aircraft, considering weight vs power consumption, compatibility with integrated system and test results [SAE PAPER 660208] 13 p2002 A66-26386

Reliability testing of aircraft engine components 13 p2088 A66-26688

Design of V/STOL aircraft including propulsion systems, control and configurations 14 p2222 A66-26924

Aerodynamic concepts and configuration of Mach 3 XB-70A aircraft [SAE PAPER 660274] 14 p2222 A66-27283

Relationship between military and contractors in aircraft development, noting adherence to military specifications, costs, weapons, etc 14 p2416 A66-27812

Aircraft design for gust loads encountered based on power spectral results 14 p2405 A66-27998

Concorde aircraft progress report 14 p2223 A66-28100

Dual-purpose passenger/cargo aircraft noting design, passenger interior system cargo handling system, compatibility, comparisons, etc 15 p2426 A66-29800

Aircraft design for large cargo transport noting aerodynamic efficiency, wing construction, cargo loading, cost estimates, etc 15 p2426 A66-29800

Aircraft mile cost vs seat mile cost, noting payload estimation, profit potential, productivity and other parameters [SAE PAPER 660277] 15 p2427 A66-29822

Design and mission requirements and weight penalties claimed for jet VTOL tactical aircraft 16 p2633 A66-30599

VC 400 VTOL aircraft design, development and performance 16 p2633 A66-30944

Aircraft development and goals U.S. 16 p2633 A66-31277

Aircraft design requirements concerning V/STOL technology emphasizing cost, size and propulsion system 16 p2634 A66-31322

High performance aerodynamic vehicle design, noting configuration variables optimum performance parameters, vehicle force characteristics, optimization of hypersonic aircraft performance, etc [AIAA PAPER 66-486] 16 p2635 A66-31477

Aircraft response data evaluated to determine pavement design and construction criteria [AIAA PAPER 65-712] 16 p2683 A66-31599

Stall prevention device for Beechcraft T-34B aircraft equipped with stall warning wing device 17 p2843 A66-32199

First-stage propulsion of aerospace transporter, discussing design and operational requirements 17 p2990 A66-32377

Transport approach and landing visibility requirements, examining design of forward portion of airplane 17 p2950 A66-32688

Aircraft design to minimize sonic boom pressure field energy 17 p2847 A66-33022

Sonic boom requirements for supersonic transports 17 p2847 A66-33030

Algorithm for cost effectiveness comparison of aircraft tradeoffs of performance vs cost vs time of obtainability 18 p3052 A66-34161

Aerodynamic design criteria for maintaining laminar flow control including instability limit, surface roughness, acoustical environment, etc 18 p3050 A66-34959

Optimum high payload laminar flow control aircraft offer 20 to 25 percent range improvement, indicated by design studies of large logistics aircraft 18 p3053 A66-34959

- VTOL aerodynamics, discussing jet-lift, lift, high-lift boundary layer control, jets, ground simulation and wind-tunnel techniques 19 p3275 A66-35364
- lying characteristics of Falcon fanjet, inch-built aircraft, noting landing, accommodations, soundproofing, 19 p3279 A66-36048
- form and swimming characteristics of phin applied to design of high-speed commercial aircraft and VTOL aircraft 19 p3279 A66-36049
- onic boom reduction by aircraft shape modification 19 p3279 A66-36180
- ost-effectiveness evaluation methodology choosing best aircraft to construct for en purpose 20 p3682 A66-37197
- erodynamic and thermal criteria in ctural design of aircraft and ssiles 20 p3628 A66-37393
- structural design criteria for Concorde craft, including necessity for heat-istant airframe 20 p3666 A66-37400
- terior design techniques in civil aircraft t design and supersonic aircraft eriors 20 p3495 A66-37425
- niform design process AFSCM 375-5 plementation and operating personnel elationships in aircraft 20 p3685 A66-37929
- afety-factor problem in glider design, cussing limiting load concept in form of reme load in exceptional cases of eration 21 p3696 A66-38620
- araging steels for landing gear forgings, ing fabrication, distortion and fatigue ts 21 p3751 A66-39237
- o-31 V/STOL transport aircraft design luding engine, wings, speed, rate of mb, etc 21 p3696 A66-39540
- erodynamic design and development of gle B.206 S aircraft, examining irections for inadequate stability margins aft CG limit 22 p3848 A66-39689
- light testing of Beagle B.206 S aircraft ealed need for forward shift of CG in ries II model due to more powerful gines 22 p3848 A66-39690
- utter of variable geometry aircraft odel as affected by airfoil sweep, pivot d wing-empennage coupling [SAE PAPER 66-12] 22 p3996 A66-40674
- ext on weight reduction techniques for e in monitoring phase of engineering sign, using model 22 p3851 A66-40801
- lications 22 p3851 A66-40801
- erodynamically conventional low wing onoplane design for high performance ht aircraft stressed to 8g limit loads, izing fiberglass reinforced plastic amary structure [AIAA PAPER 65-771] 23 p4015 A66-40980
- ngine thrust requirement comparison for rtical and short takeoff aircraft with same ht mission 23 p4088 A66-41187
- project management of Jaguar Anglo-ench military aircraft in design, test and oduction phases 23 p4151 A66-41217
- etal adhesives in aircraft and space ustry, particularly in construction of minar and sandwich elements of ings 23 p4073 A66-41532
- hort-periodic motion of tailless glider alalyzed to determine degree of ercompensation of flap required for good ability 23 p4016 A66-41784
- ust design procedures based on power etral techniques, considering atmospheric urbulence with aircraft as rigid body with gle degree of freedom [SAE PAPER 66-11] 23 p4017 A66-42073
- ircraft flying up to 6000 miles at Mach mbers up to 8, noting problems in yrodynamics, propulsion, structural weight, oling, etc 24 p4157 A66-42237
- ypersonic transport technology, nsidering designs for Mach numbers up to t, altitude up to 140,000 ft and 150 ssengers 24 p4159 A66-42238
- reguet 1150 high seas reconnaissance craft, noting design features and chnological problems 24 p4159 A66-42489
- V/STOL aircraft design noting very high t generation at very low flight speeds and yload role 24 p4159 A66-42890
- V/STOL aircraft for commercial short-haul nsports, considering turboprops, fan-in wing and propulsion 24 p4159 A66-42891
- Dornier twin engine high wing STOL monoplane design and performance, noting useful space, landing gear, control system, fuselage, cargo, etc 24 p4160 A66-43070
- Design, performance capabilities and operational characteristics of Russian high speed jet aircraft IL-62 with tail-mounted engine 24 p4160 A66-43075
- AIRCRAFT DETECTION**
- In-flight monitoring of advanced aircraft, discussing system requirements and constraints [ISA PREPRINT 1.3-2-65] 05 p0684 A66-15512
- Radar detection of sailplanes and other small aircraft aided by aluminum reflecting surfaces 09 p1345 A66-20479
- Radar separation of closely spaced aircraft by fire-control weapon 10 p1553 A66-21268
- Radar cross sections of full-sized targets in flight measured by dynamic system at L, S and X bands 10 p1499 A66-21605
- Data converter system for conditioning, recovery and display of aircraft position and altitude data permitting real time surveillance by ground observer 16 p2651 A66-30564
- Probability of overlapping intercept by system of random intercepts and application to detection of flying objects in cloudy skies 24 p4231 A66-42472
- AIRCRAFT ENGINE**
- SA GAS TURBINE
- SA JET ENGINE
- McCulloch Model 4318 Drone Target Aircraft Engine for maintainability, reliability, moderate cost and high power-to-weight ratio 01 p0129 A66-10091
- Refractory metals for gas turbine and ramjet aircraft engines, noting niobium and tantalum alloys 02 p0245 A66-11746
- Introduction of programmed milling machines to production of aircraft engines for Czechoslovakian FB series 04 p0525 A66-13763
- Book on matched parameters of gas turbine engines for aircraft including rpm and peripheral speed, calculating parameters for axial-flow compressors, centrifugal compressors, turbojet, turboprop, etc 04 p0573 A66-14004
- Various types of periodically discontinuous combustion, showing improved thermal efficiency applicable to turbine combustion chambers 05 p0787 A66-14962
- Aircraft and propulsion system design matching for long range and endurance aircraft [AIAA PAPER 64-783] 05 p0610 A66-15073
- Pulse jet engine where hot gas discharge rather than developing thrust is used to obtain shaft power [ASME PAPER 65-WA/GTP-6] 05 p0745 A66-15721
- Production and recent developments in gas turbines and propulsive engines in West Germany 06 p0942 A66-16795
- West Germany and international cooperation in aerospace engine development, noting VTOL aircraft and hypersonic and hypersonic spacecraft 06 p0943 A66-16797
- Dual flow engines with high by-pass ratios, considering engine process parameter effects, fuel consumption, efficiency, etc 06 p0944 A66-17025
- XB-70A systems, particularly J-39 engine, including ground aborts, in-flight shutdowns, hydraulic and fuel contamination, nozzle control difficulties, etc 07 p0986 A66-17276
- Engine-overhaul facilities and procedures at BOAC noting use of flow principle, automatic processing and three main sections, engine dismantling, crack detection and static and dynamic balancing 07 p1111 A66-18329
- Isochronous and droop type governors controlling aircraft engines 08 p1282 A66-19765
- Aircraft engine rotating shaft coupling design, noting splined shafts, correct lubrication, flexible members and test results 09 p1383 A66-19863
- SNECMA axial flow transonic compressor development during last ten years 09 p1433 A66-19866
- Dimensional stability and structural integrity of labyrinth seals, considering various mechanical design criteria in application to aircraft gas turbines [SAE PAPER 660048] 09 p1383 A66-20150
- Turbine blade and vane cooling in Rolls-Royce nonmilitary aircraft engines, noting side effects on design and development [SAE PAPER 660053] 09 p1433 A66-20151
- Aircraft turbine lubricant technology for high Mach number engines especially SST, noting stability, autoignition, coking, toxicity, etc [SAE PAPER 660071] 09 p1434 A66-20156
- Aircraft turbine engine oil drain practices, discussing engine design and materials and minimum and maximum drain time [SAE PAPER 660073] 09 p1434 A66-20158
- Means of assessing aviation turbine lubricant quality, considering specification, maintenance, operational factor and equipment strip approach [SAE PAPER 660074] 09 p1434 A66-20159
- Sailplane equipped with auxiliary starting engine, characteristics and application in studying Alpine current 09 p1329 A66-20478
- Engines for supersonic and hypersonic aircraft to be used in next decade, noting suitability for cruise aircraft or boosters 09 p1435 A66-20668
- Propulsion problems for engine of 5000 mph aircraft noting ramjet, cooling, intake, nozzle, etc 09 p1435 A66-20669
- Turbine vanes of aircraft engines and experimental plants, determining structural angle of outlet, maximum thickness and area of profile, setting angle, etc 09 p1328 A66-20761
- Comparison of piston engine with turbojet engine, noting power-weight ratio, specific fuel consumption, performance characteristics, etc 10 p1591 A66-21392
- Supercharging turbojet engine for light aircraft compared to piston and turbojet engines 10 p1591 A66-21393
- Design, operating characteristics, advantages of two-cycle star configuration four-cylinder engine for general-purpose aircraft, noting crankshaft, fuel injection, cooling, etc 10 p1592 A66-21407
- Text on fundamentals of aircraft gas turbine engine design, including component design and calculation 11 p1762 A66-23310
- Shock tube ignition delay study of aircraft engine cooling by hydrocarbon fuels in endothermic heat sinks [AIAA PAPER 65-594] 12 p1934 A66-23588
- Simulation of lubricating oil circulation in aviation turbine engines by constructed model, noting change of viscosity, acid number and electrical conductivity at high temperatures 12 p1803 A66-23751
- Constant oil monitoring system using electric conductivity tester for extending oil life in gas turbine engines [SAE PAPER 650814] 12 p1935 A66-23844
- Book on strength and dynamics of aircraft engines including deformation of shells of revolution, osculation frequencies of various shells, turbine rotor dynamics, etc 12 p1963 A66-24042
- Rarefying of dense frequency spectrum of shell-shaped elements of aircraft engines by corrugating shell surface, determining natural oscillation modes and frequencies 12 p1964 A66-24046
- Combustion deposit fouling and other difficulties in spark plug operation in commercial aircraft [AIAA PAPER 64-779] 13 p2038 A66-25597
- Control of large engine motion from soft mountings during starting and stopping [SAE PAPER 660222] 13 p2088 A66-26399
- U.S. Army program for small gas turbine, noting turbine specific horsepower, component, payload-range curve, etc [ASME PAPER 66-GT-91] 14 p2372 A66-26995
- McCulloch TSIR-5190 highly compounded two-stroke cycle, turbocharged, direct fuel injection, liquid cooled, radial light plane engine [SAE PAPER 660173] 14 p2373 A66-27283
- Commercial air transport in 1972, discussing operating economics, management planning, maintenance costs, etc [SAE PAPER 660321] 14 p2223 A66-27300
- Heat transfer considerations in aircraft-engine design noting fuel, oil and icing

problems 14 p2375 A66-28300  
 Factors affecting useful life of subsonic gas turbine engine components including metallurgical variances, stress-cycle relationships, surface coating, etc [SAE PAPER 660312] 15 p2573 A66-29837  
 Factors extending life of aircraft engine part beyond that available by in-service development of component replacement [SAE PAPER 660313] 15 p2573 A66-29838  
 Turbofan engine fuel consumption, noting high cycle pressure ratio compressor, regenerator, etc 15 p2573 A66-29842  
 Jet engine transient thrust response for V/STOL aircraft 16 p2791 A66-30598  
 Operating stability of turbojet engines improved by use of double-rotor compressor 17 p2992 A66-33487  
 French aerospace industry, production of aircraft, engines and missiles, research programs, expenditures, etc 18 p3267 A66-33915  
 Engine air induction system, engine and integral gear case oil cooling air induction system and nacelle cooling and ventilating air induction systems of XC-142A [AIAA PAPER 66-632] 18 p3048 A66-34435  
 Pneumatic vernier engines in aircraft and spacecraft, discussing weight, gas expansion and gas temperature 20 p3627 A66-36916  
 Aircraft turbine engine oil drain practices, discussing engine design and materials and minimum and maximum drain time [SAE PAPER 660073] 20 p3628 A66-37255  
 Maintainability program for aircraft power plant particularly turbofan engine, noting inspection, failure detection, replacements, etc 20 p3574 A66-37963  
 Irreversible trimmed stalls at high angles of attack for aircraft with aft-mounted engine nacelles and high-or T-tails 20 p3496 A66-38255  
 Aircraft gas turbine starting with automatically controlled electronic unit, noting system design, operation and performance 20 p3540 A66-38299  
 Cyclic characteristics of Joule process applied to processes in jet and propjet engines 21 p3807 A66-38813  
 Beagle B 206 S aircraft power plant, vacuum system, air conditioning system, fire protection, hydraulics, fuel, oxygen, rain protection and deicing equipment 22 p3970 A66-39688  
 Lift fan propulsion system using 62.5-inch lift fans flight tested in XV-5A aircraft from hover to subsonic flight regions [AIAA PAPER 66-739] 22 p3972 A66-40628  
 Dynamic test method for characteristics and interactions of supersonic aircraft propulsion systems, particularly inlet/engine performance and control compatibility aspects [AIAA PAPER 66-741] 22 p3893 A66-40630  
 Aircraft and missile engine development at Saclay Propulsion Test Center /France/ 23 p4053 A66-41648  
 Materials and cooling of aircraft gas turbine engines, noting nickel and tantalum alloys, turbine-inlet temperatures, coatings, etc 23 p4122 A66-41662  
 Power plant development trends and effect on short and vertical takeoff aircraft design, noting improvement in thrust-weight ratio 24 p4262 A66-43051

**AIRCRAFT FUEL**  
 Jet fuels presently used in military aircraft compared with those for advanced air-breathing weapon systems at high Mach number [SAE PAPER 650804] 01 p0128 A66-10846  
 Flammability hazards of aircraft hydrocarbon fuels as function of temperature and pressure based on equilibrium conditions [AIAA PAPER 65-801] 03 p0414 A66-12565  
 Fuels and lubricants with thermally stable molecular structure and antioxidants to meet requirements of supersonic transport 03 p0414 A66-13221  
 SST prospects, history, design and controversy 07 p0985 A66-17203  
 Fuel requirements for high altitude high-Mach number aircraft, noting thermal stability, autooxidation, self-ignition, specific heat, etc 10 p1590 A66-21400  
 1965 supplement to 1958 ASTM manual for

rating aviation fuels by supercharge and aviation methods 14 p2370 A66-27230

**AIRCRAFT FUEL SYSTEM**  
 Microbiological attack in aircraft fuel systems and protective measures 06 p0940 A66-15996  
 Aircraft fuel tank coating corrosion resistance, discussing polyurethane and epoxy material characteristics and application 07 p1053 A66-17491  
 Lucas fuel control system for Spey engine, using rotating metering valves and variable stroke fuel pump [SAE PAPER 660049] 08 p1282 A66-19389  
 Concorde fuel system in cooling application and adjustment of center of gravity through fuel distribution 11 p1637 A66-23168  
 Jet pump development and testing on Lear Jet Model 24 and Model 40, noting fuel pump system performance, requirements and configuration [SAE PAPER 660223] 13 p2002 A66-26398  
 Wear and grease lubrication effects in matched aircraft spline specimens subjected to oscillatory motion 16 p2713 A66-30572  
 USAF CH-3C helicopter V/STOL in flight refueling, discussing requirements, system characteristics and flight tests 17 p2844 A66-32724  
 Concorde supersonic transport aircraft propulsion, fuel supply and storage systems 22 p3848 A66-40415

**AIRCRAFT GUIDANCE**  
 Automatic star trackers for long range aircraft navigation, discussing instrumentation methods and use of pulse code modulation for sensor design 02 p0257 A66-12029  
 Evaluation of minimum-time courses for aircraft and inherent error 02 p0257 A66-12035  
 Decra system with increased power and ambiguity reduction evaluated for long range navigation in North Atlantic 02 p0258 A66-12046  
 Omega hyperbolic radio navigation system for aircraft using eight broadcasting stations 02 p0259 A66-12048  
 USAF Central Inertial Guidance Test Facility for testing aircraft navigation systems 02 p0259 A66-12051  
 Astronomical Guidance System for Air Navigation which detects altitude and azimuth errors resulting from precomputed and preadjusted deviations 02 p0259 A66-12052  
 Future trends in long range aircraft navigation 02 p0260 A66-12058  
 Telecart C for automatic digital evaluation of data supplied by hyperbolic radio navigation systems 02 p0260 A66-12061  
 Radiogeodetic plotting device for piloting aircraft on assigned track 03 p0389 A66-12507  
 Modification of Decra position fixing service in North Atlantic 07 p1063 A66-17446  
 Evaluation of four different types of Doppler radar as long range self-contained navigation aid 07 p1065 A66-17669  
 Long range navigation in jet operations, discussing problems and limitations 07 p1065 A66-17670  
 Air traffic control system capacity and navigational requirements for North Atlantic and continental transition areas, discussing relationship to accuracy and flight time economy 07 p1069 A66-17713  
 Design of Elliott E.5, low cost inertial navigation system for civil aircraft 07 p1071 A66-17727  
 Accuracy of Doppler navigational system obtained from ground information accumulated over 500 North Atlantic crossings 07 p1071 A66-17728  
 Error of airborne Doppler navigation system 07 p1073 A66-17768  
 Self-contained Doppler Navigation System performance over three-year operation 07 p1074 A66-17776  
 Navigation techniques and operational objectives due to computer-generated flight plans of United Air Lines 07 p1074 A66-17777  
 Navigation satellite in aircraft traffic control 07 p1074 A66-17778  
 Long-range navigation system control/display concepts and automation for airline navigation 07 p1074 A66-17779  
 Subsonic and supersonic aircraft navigational systems requirements,

discussing pictorial presentation and effect on command function 07 p1075 A66-17788  
 Navigational inertial system dynamic property analysis at high flight speeds, using hodographic characteristic equation for longitudinal and lateral aircraft motion error determination 09 p1401 A66-20913  
 Navigation satellite in aircraft traffic control 13 p1225 A66-25870  
 Compass system on VC10 provides magnetic heading reference, or alternately, inertial reference for grid navigation 13 p1225 A66-26283  
 Book on unmanned aircraft and rocket control systems, flight dynamics in conjunction with control processes, design of stabilization and guidance systems 13 p2055 A66-26482  
 Prediction and avoidance of atmospheric turbulence affecting large aircraft 17 p2842 A66-31989  
 Switching surface construction using one to one correspondence between points in controllability region and points on surface of n-th order system 17 p2902 A66-32570  
 All-weather operations, head up displays, long-range navigational aids - Conference International Federation of Air Line Pilots Associations, Rotterdam, October 1965 17 p2953 A66-33212  
 Worldwide civilian-aircraft navigation system based on VLF radio using ground stations or satellites 17 p2954 A66-33212  
 Decra long-range navigational system giving area coverage position fixing for multiplicity of North Atlantic transoceanic routes 17 p2954 A66-33212  
 Optimal trajectory problem solution using in-flight guidance computers for control rockets and aircraft under influence of random disturbances 17 p2956 A66-33323  
 Navigation satellite system providing precise position information of aircraft, noting flight tests 19 p3396 A66-35511  
 Radiation attenuation effect of atmospheric aerosols on all-weather aircraft landing guidance systems using lasers 19 p3397 A66-36057

**AIRCRAFT HAZARD**  
 Flammability hazards of aircraft hydrocarbon fuels as function of temperature and pressure based on equilibrium conditions [AIAA PAPER 65-801] 03 p0414 A66-12565  
 Behavioral characteristics of birds that collide with aircraft in flight and methods to reduce such strikes at airport [AIAA PAPER 65-748] 03 p0319 A66-12588  
 Human factors in Concorde SST program 03 p0329 A66-13356  
 Radioactive contaminant detection on surface of high altitude transports, noting passenger protection 04 p0458 A66-14466  
 Spontaneous ignition of inflammable fluid by hot surfaces, particularly high aircraft skin temperatures 15 p2618 A66-29639  
 Siting of static discharger to control nature and occurrence positions of corona to minimize RF noise capable of causing hazard to aircraft navigational aid systems 19 p3282 A66-36675  
 Deformation of solids by impact of liquid and relation to rain damage in aircraft arm missiles, to blade erosion in steam turbine and to cavitation erosion - Meeting, London May 1965 20 p3546 A66-37800

**AIRCRAFT HYDRAULIC SYSTEM**  
 In situ ultrasonic testing of braze hydraulic pipe joints in aircraft, noting superiority over radiography 01 p0079 A66-10977  
 High-performance hydraulic power system for supersonic transport aircraft, using redundancy of three completely separate and functional systems 04 p0459 A66-13788  
 British Lockheed undercarriage and hydraulic system for German HFB 320 Hans aircraft 04 p0458 A66-13939  
 Aircraft landing gear design, evaluation undercarriage of research aircraft arm weapons systems 07 p0987 A66-17735  
 Hydraulic system of De Havilland Buffalo tactical aircraft is self-sufficient 10 p1486 A66-22033  
 Hydraulic system of Cessna 210 aircraft noting component structure, electrical and hydraulic sequencing devices, etc [SAE PAPER 660202] 13 p2002 A66-26398

- multiple quick-disconnect valve used in  
iliary power unit (APU) of aircraft and  
viring several systems at once while  
venting fluid leakage from one system to  
ther 14 p2226 A66-28032
- ized hydraulic system design and  
ication for Skyhawk A4B 17 p2849 A66-33098
- T aircraft fluid power systems and  
ormance, discussing power requirements,  
erials, maintenance, configuration,  
ace temperature distribution, etc  
[AIAA PAPER 66-MD-35] 21 p3697 A66-38487
- ircraft hydraulic system contamination  
ontrol program under clean as you go  
inciple 22 p3851 A66-40043
- riteria for hydraulic fluids for supersonic  
raft noting fluid toxicity, fire hazards,  
compatibility with elastomeric materials,  
24 p4229 A66-42380
- urdon-helix pressure-sensitive switch for  
vehicle hydraulic system of XB-70A  
raft and other instruments operating in  
ere environment 24 p4213 A66-42824
- ## RAFT INDUSTRY
- perational research techniques applied to  
urement and capital investment  
grams of aviation 01 p0170 A66-10341
- nickel-chromium base alloys considering  
raft and industrial gas turbine  
lication 02 p0244 A66-11740
- lanium, beryllium and refractory metals  
roperties and application of their alloys in  
raft industry 02 p0244 A66-11743
- ench aerospace industry, relationship to  
nch economy, annual expenditures 1958  
1964 and aircraft 05 p0794 A66-15189
- ports 05 p0794 A66-15189
- transport engineering, cost and  
ability factors, development possibilities,  
design construction phasing,  
07 p0987 A66-17488
- K aircraft industry mergers, causes,  
ernment policies and  
ory 07 p1156 A66-17490
- erospace industry contribution to science  
echnology, noting relationship with U.S.  
ernment 08 p1321 A66-18552
- ook on structure and performance of  
ospace industry and governmental  
ctions 09 p1473 A66-20689
- ystems effectiveness and F-111, concept,  
applicability, reliability, performance,  
and use during F-111 aircraft  
elopment 11 p1789 A66-23440
- ydrogen embrittlement or fatigue  
length loss avoidance in overhauling and  
pairing of high strength aircraft steel  
onponent 13 p2087 A66-26284
- uality and reliability programs of Cessna  
ircraft Commercial Division covering  
onnel from trainees to scientists  
[AIAA PAPER 66-204] 13 p2087 A66-26384
- ## RAFT INSTRUMENTATION
- ### ALTIMETER
- ### APPROACH AND LANDING INSTRUMENT
- ### FLIGHT INSTRUMENT
- ### FLIGHT LOAD RECORDER
- ### GAUGE
- ### LANDING AID
- ### POSITION INDICATOR
- ### SPEEDOMETER
- ilitary specifications MIL-HDBK-217 and  
R-22256, 22973 and 23094A with respect  
reliability design of aircraft electronic  
ipment 01 p0034 A66-10059
- redicted vs observed avionics reliability  
esign technique, using factual reliability  
of baseline equipment and solid state  
onponent advances 01 p0035 A66-10080
- r data equipment trends in subsonic and  
ersonic control 01 p0033 A66-10680
- omparative merits of visual, audible and  
omposite aircraft warning systems for  
imum human response to causal  
dition 01 p0021 A66-10939
- rediction display based on computer  
rapolated data in aircraft  
iting 02 p0187 A66-11985
- heory of aircraft measurement of gravity  
g gyropatform, ideal gimbal suspension  
three orthogonal string sensors, deriving  
formula for unperturbed gravity value,  
discussing perturbation measurement  
03 p0366 A66-12991
- Automatic in-flight testing capability of  
redundant systems 03 p0353 A66-13051
- [AIAA PAPER 65-732] 03 p0353 A66-13051
- Increased aircraft close-support mission  
effectiveness through optimized selection of  
avionic systems 04 p0458 A66-13685
- Takeoff and overshoot director system for  
jet transport aircraft 05 p0712 A66-14701
- XC-142A Flight Test Program, program  
statistics, aircraft instrumentation and flying  
qualities in hover and transition flight  
regimes 06 p0807 A66-16820
- Stall indicator modification, describing  
design in combination with speed indicator  
LUN-1106 06 p0883 A66-16971
- Magnetic compensation methods which  
eliminate swinging 07 p1032 A66-17684
- Navigation and flight instrument,  
discussing deficiencies of panel-mounted  
navigational command 07 p1033 A66-17685
- Supersonic commercial air transport,  
evaluating communication, navigation and  
identification systems 07 p1066 A66-17686
- Inertial navigation and guidance systems  
applied to civil air transport from systems  
engineering viewpoint 07 p1067 A66-17695
- Feasibility of using perfected gyromagnetic  
compass as heading reference for  
aircraft 07 p1033 A66-17698
- Vertime, navigation system for vertical  
plane control 07 p1069 A66-17716
- Up-dating of self-contained navigational  
aids such as Doppler, inertial and  
Doppler/inertial systems 07 p1070 A66-17717
- Position-attitude-true-heading-steering  
navigation system noting accuracy,  
reliability, maintenance, operational  
requirements and functional  
features 07 p1070 A66-17720
- Compass performance improvement,  
discussing Sperry C-12 compass system  
accuracy, operational features,  
etc 07 p1033 A66-17721
- Controlled direct current applied to flux  
valve to stimulate rotation of aircraft in  
compass swing 07 p1033 A66-17723
- Design criteria and operational  
performance of Doppler-driven map display  
device installed on Trident 07 p1077 A66-17802
- Automatic star trackers for long range  
navigation, discussing associated  
instrumentation methods 07 p1078 A66-17808
- Cockpit flight instrument display in  
integrated navigation system for SST,  
stressing smooth transition in handling from  
enroute navigation to terminal-area and  
approach procedures 07 p1078 A66-17810
- Visual display system providing instrument  
data in one-to-one correspondence with real  
world, using cathode ray tube images of  
horizon and runway projected on aircraft  
windscreen 08 p1034 A66-19764
- Thermal management /heat-sink and  
pressurization and cooling systems/, fuel,  
flying control and hydraulic and electrical  
systems of Lockheed L-2000 SST  
project 09 p1329 A66-20391
- Concorde navigation system noting inertial  
platform, digital computer using integrated  
circuits and  
microminiaturization 09 p1401 A66-20685
- Terrestrial test sites and aircraft flights  
used in preparing for remote sensing from  
Earth orbital spacecraft 10 p1532 A66-21525
- Human factor in design of controls and  
instrumentation in aircraft, discussing man-  
machine dynamics 10 p1494 A66-22135
- Atmospheric parameter determination by  
aircraft measurements, noting applicability  
to supersonic air  
transports 12 p1879 A66-23752
- Instrumentation of Polish gliders including  
altimeters, rate-of-climb, turn and air speed  
indicators, magnetic compasses, artificial  
horizon, etc 12 p1882 A66-24386
- Aircraft electrical system design, power  
requirements, instrumentation, excess loads,  
etc 12 p1803 A66-24387
- Universal turbulence measuring system  
giving quantitative measure of turbulent  
intensity independent of type or speed of  
aircraft, using all-weather sensor  
[AIAA PAPER 66-364] 12 p1906 A66-24476
- Equilibrium temperature gradient  
determined from theoretical calculations and
- balloon and aircraft  
measurements 12 p1875 A66-24872
- Vertime, navigation system for vertical  
plane control 13 p2125 A66-25863
- Inertial navigation and guidance systems  
applied to civil air transport from systems  
engineering viewpoint 13 p2125 A66-25865
- Controlled direct current applied to flux  
valve to stimulate rotation of aircraft in  
compass swing 13 p2079 A66-25866
- Automatic star trackers for long-range  
navigation, discussing associated  
instrumentation methods 13 p2125 A66-25867
- Inertial guidance systems using three-  
gimbal, four-gimbal and ball-type platforms,  
operative control of aircraft, ships and  
ballistic missiles 13 p2125 A66-26140
- Redundant system reliability in aircraft  
design, noting amplifier and filter  
arrangements, diode and quadruplex circuits,  
etc 14 p2247 A66-27015
- Theory of aircraft measurement of gravity  
using gyropatform, ideal gimbal suspension  
and three orthogonal string sensors, deriving  
formula for unperturbed gravity value,  
discussing perturbation measurement  
errors 15 p2483 A66-28666
- Atmospheric temperature changes as factor  
in detection of clear air turbulence,  
especially above 25,000 ft, noting aircraft  
instrumentation used 15 p2532 A66-28918
- Clear air turbulence forecasting for  
aircraft, noting methods employed by  
airlines 15 p2533 A66-28932
- Navigation displays for supersonic  
transports, discussing inductive reasoning,  
system performance verification, initial data  
verification, etc 15 p2535 A66-29625
- Airborne weather radar to detect  
dangerous turbulent condition and other  
phenomena 15 p2452 A66-29626
- Aircraft as platform for solar eclipse  
observation, discussing history, project  
APEQS, navigation problems, aircraft used,  
etc 16 p2705 A66-30822
- Pilot eye movement data by recording eye  
fixations on flight 16 p2644 A66-31273
- Helicopter landing in zero-zero weather,  
describing experiment in England involving  
landing in dense fog 17 p2844 A66-32728
- Automation in flight safety, noting role  
of radar, flight control system reliability, data  
processing system used,  
etc 17 p2848 A66-33485
- Monogram on metrological foundations and  
test methods of aircraft instruments,  
especially navigation  
instruments 18 p3111 A66-34011
- Multisensor display requirements and  
approaches, using as example hypothetical  
two-man advanced tactical  
aircraft 19 p3396 A66-35512
- Solid cryogenics as heat sinks for cooling  
electronic components, particularly IR  
detectors in aircraft and  
spacecraft 20 p3676 A66-37073
- Automatic built-in test of advanced  
avionics systems, noting advantages of  
airborne computer in sequencing, conducting  
and evaluating in-flight  
performance 20 p3522 A66-37245
- Prediction of avionic equipment reliability  
in early design stage, noting equations for  
line replaceable unit (LRU), classification,  
regression techniques,  
etc 20 p3573 A66-37953
- Aircraft instrumentation for oceanographic  
measurement platform including radiation  
thermometer, wave meter and expendable  
bathythermograph  
[AIAA PAPER 66-695] 20 p3496 A66-38036
- Equilibrium temperature gradient  
determined from theoretical calculations and  
balloon and aircraft  
measurements 22 p3912 A66-40333
- Barometric instrument development and  
description of counter-pointer altimeter and  
airspeed indicator 23 p4067 A66-41164
- Head-up aircraft display systems using  
cathode ray tube 23 p4067 A66-41166
- Temperature and humidity variations in  
weak convection over England, noting  
measurement techniques and  
results 24 p4235 A66-43076
- Environmental testing and evaluation of  
useful life of insulation material for aircraft  
electrical equipment operating at 280

degrees C 24 p4229 A66-43083

## AIRCRAFT LANDING

Cause and elimination of vertical oscillations of aircraft landing gear system in motion of aircraft over unpaved airfield 01 p0011 A66-10470

Soft and rough airfield landing gears, discussing ground flotation and shock absorbers for aircraft of several sizes [SAE PAPER 650844] 01 p0011 A66-10834

Analytical landing simulation to analyze dynamic loads and aircraft response, particularly high sink speed landing gear [SAE PAPER 650845] 01 p0011 A66-10835

Carrier landing characteristics of vectored-thrust aircraft obtained in piloted fixed-base flight simulator studies [AIAA PAPER 65-792] 03 p0390 A66-12560

Boeing Lower Minimums Program in terms of certified components and systems for Category II and for Automatic Landing [AIAA PAPER 65-765] 03 p0390 A66-13060

Category II lower weather minimums for aircraft landing of airlines of western world [AIAA PAPER 65-766] 03 p0391 A66-13061

Carrier landing improvements in Fresnel lens optical landing system, emphasizing compensated-meatball stabilization [AIAA PAPER 65-791] 03 p0322 A66-13228

Organization of short-distance interurban transportation system based on STOL aircraft of Breguet type 05 p0611 A66-15194

Design of landing gear for military cargo aircraft and supersonic transports 07 p0985 A66-17255

British and French VTOL landing gear design, describing unique SConc fixed-wing VTOL aircraft 08 p1167 A66-18627

CHSS-2 Haul Down and Handling System for operating large /SH-3A/ helicopter from small ships 10 p1484 A66-21891

Automatic system ensuring landing in absence of visibility and atmospheric turbulence by controlling motion of aircraft leveling out, consisting of time-dependent input signal shaping device and amplifiers 12 p1909 A66-24321

Assisted takeoff and landing for commercial aircraft using short runways [SAE PAPER 660337] 14 p2269 A66-27296

Category II lower weather minimums for aircraft landing of airlines of western world [AIAA PAPER 65-766] 14 p2328 A66-28107

Terrain clearance during climb and descent under air traffic control 15 p2535 A66-29627

Dynamic and steady state flow disturbances encountered by aircraft during carrier landing approach in water tunnel simulation study [AIAA PAPER 65-332] 16 p2634 A66-31319

Landing gears and operation illustrated in modern aircraft 16 p2635 A66-31681

Discrete control signal effect on crabbing /sideways motion/ of aircraft during floating and after touchdown 17 p2950 A66-32584

Air cushion landing gear for aircraft, noting rubber tubing under fuselage forming pneumatic bumper blown up by turbine engine 17 p2848 A66-33082

Landing run and taxiing problems in very low visibility 17 p2952 A66-33206

Technological approaches to use of aircraft on undeveloped or semideveloped field from standpoint of load and terrain roughness 18 p3051 A66-33937

Automatic landing of aircraft in blind flying conditions, Royal Aircraft Establishment equipment accuracy and safety 18 p3133 A66-35243

TALAR, tactical aircraft landing aid-radio uses ground-based Cassegrain antenna, magnetron transmitter and 4-lb receiver in aircraft while providing ILS functions 20 p3596 A66-37232

Discrete control signal effect on lateral motion of aircraft landing in presence of correction, considering slideslip equation 23 p4089 A66-41355

## AIRCRAFT LIGHTING

Aircraft illumination utilizing electroluminescent panels 11 p1640 A66-22666

White light rather than red for illumination of instruments and cockpits 11 p1648 A66-22667

## AIRCRAFT MAINTENANCE

## SA CEMS SYSTEM

Whitney Aircraft system for assurance in gas turbine

engines, discussing management, failure modes, product development and tests 01 p0128 A66-10062

DC-9 maintainability, simplicity and commonality of design with emphasis on reliability 01 p0129 A66-10092

T-53 gas turbine engine used to describe results of maintainability at work 01 p0129 A66-10093

F-5/T-38 design philosophy to meet rigorous operational and maintenance requirements 01 p0010 A66-10094

Aircraft maintenance and maintainability within context of U.S. supersonic transport program 01 p0010 A66-10095

Standard Navy Maintenance and Material Management System /3M System/ detailing aviation portion of maintenance data collection program 01 p0033 A66-10118

RCAF system of aircraft fleet operations management /TC-91/ for unserviceability cost estimate 02 p0178 A66-11992

Corrosion control on aircraft skin, countersinks and fasteners describing tests, sealant coatings, chemical treatments, mechanical barriers, platings on fasteners and organic coatings 03 p0372 A66-12298

Aircraft materials stress corrosion at high temperature discussing test and results on titanium alloys, precipitation hardening steels and superalloys 03 p0380 A66-12299

V/STOL aircraft economic and operational characteristics for commercial service over routes of 150 miles or less [SAE PAPER 650243] 03 p0446 A66-12632

Flight operating techniques influence upon engine maintenance costs and new engine design, specifically Pratt and Whitney JT3C-12 on Boeing 720 aircraft [SAE PAPER 650212] 03 p0322 A66-13220

Training and instruction by means of teaching machines in field of aviation 04 p0469 A66-13508

Maintainability guidance as factor in designing for aerospace industry 05 p0646 A66-14634

Maintenance recordings of aircraft parameters, discussing signal conditioning, economics and application [ISA PREPRINT 1.3-1-65] 05 p0794 A66-15499

Manned aircraft self-contained checkout and fault isolation systems, discussing characteristics and operational concepts [ISA PREPRINT 1.3-3-65] 05 p0684 A66-15513

Safe usage of toxic chemical agents in aircraft maintenance 06 p0816 A66-16056

Radioactive contamination of aircraft and effects on maintenance, discussing washing and monitoring procedures for containment and personnel protection 06 p0816 A66-16059

Leakage detection system for monitoring component test stand hydraulic circuit 06 p0869 A66-16792

XB-70 landing gear inspection, describing hydraulic jack used 06 p0869 A66-16793

Aircraft engine maintenance, discussing line, minor and major services, operating period parameters, overhaul facilities, etc 06 p0943 A66-17024

Fault location in modern airborne radar, discussing maintenance reduction techniques and reliability 07 p1006 A66-17495

Engine-overhaul facilities and procedures at BOAC noting use of flow principle, automatic processing and three main sections, engine dismantling, crack detection and static and dynamic balancing 07 p1111 A66-18329

Aircraft landing gear design and maintenance, noting elimination of sharp corners and radii, weldability criterion, joints, part identification, bushings, etc 10 p1482 A66-21135

Concord SST propulsion system, discussing maintainability, monitoring, closed-loop control systems, nozzle, intake, etc 12 p1935 A66-23707

Maintenance and airworthiness philosophy in aerospace engineering 12 p1801 A66-23858

Airline long-haul maintenance objectives, methods for monitoring maintenance equipment and cost 12 p1801 A66-23859

Cost reduction in aircraft maintenance and servicing 12 p1801 A66-23860

Airline safety maintenance, noting British system of classification of parts into chapter

numbers, ground equipment use testing methods 12 p1857 A66-23861

Airborne checkout system, in maintenance and related signal problems 13 p2190 A66-23862

DC-9 maintainability, simplicity, commonality of design with emphasis on reliability 13 p2173 A66-23863

Digital computer automatic check equipment for maintenance of systems 14 p2269 A66-23864

Aircraft maintenance, ground service and safety precautions for XB-70 [SAE PAPER 660275] 14 p2269 A66-23865

SST flight operations, maintenance servicing compared to subsonic [SAE PAPER 660294] 14 p2222 A66-23866

Automatic preworkshop screening apparatus for determining which components removed from aircraft during maintenance need to be sent to workshop 14 p2224 A66-23867

Douglas DC-8 super sixty series of airport requirements including noise runway problems and traffic [SAE PAPER 660281] 15 p2427 A66-23868

Operation and maintenance of Lockheed 2000 double delta SST aircraft with thrust engine and large delta [SAE PAPER 660295] 15 p2427 A66-23869

Airborne performance analysis multiparameter sampling applied to maintenance and benefits including prediction of impending malfunctions 17 p2842 A66-23870

Nondestructive testing in aircraft maintenance, surveying radiography, ultrasonic testing and eddy current testing 18 p3116 A66-23871

Maintenance and inspection of transport vehicle structures 19 p3278 A66-23872

Contractor components/parts relationship program for Douglas S-IVB space project 20 p3566 A66-23873

Decision table for determining base maintenance policy for aircraft engines 20 p3566 A66-23874

Maintenance Dependency Chart for checking and troubleshooting in missile weapon systems 20 p3566 A66-23875

Microelectronics application to missile maintenance and support of guidance control systems of missile and weapons systems 20 p3567 A66-23876

Lockheed C-5 quantitative maintenance program and application to airworthiness utilization and cost effectiveness 20 p3495 A66-23877

VTOL operational availability comparison simulation model, studying initial tradeoff design, maintenance, logistics manpower and flight operational requirements 20 p3543 A66-23878

Naval weapons A-7A maintenance requirement effect on management design and analysis of early flight data 20 p3496 A66-23879

Maintainability program of F-111 aircraft 20 p3574 A66-23880

Maintainability program for aircraft plant particularly turbofan engine, inspection, failure detection, replacement etc 20 p3574 A66-23881

Molybdenum bisulfide as lubricant for aircraft construction to combat corrosion, facilitate assembly and dismantling of parts and reduce frequency of maintenance 23 p4074 A66-23882

## AIRCRAFT MODEL

Sequence photography of models used study head-on interaction between shock cone in supersonic flight and moving wave [AIAA PAPER 66-57] 08 p1163 A66-23883

Modeling and data reduction technique obtaining spectrum signatures of low LF airborne antennas 13 p2044 A66-23884

Drag force of flexible wire connection between aircraft and ship models and about which they are rotating 21 p3832 A66-23885

## AIRCRAFT NOISE

Sound pressure and acoustic spectrum associated with it calculated for predetermination of ground noise at takeoff period of future aircraft

- ERA TP 250] 02 p0177 A66-11679  
Assessment of aircraft noise and relation  
time duration and discrete tone  
ponents  
[A PAPER 65-802] 03 p0319 A66-12566  
Aircraft noise due to propeller, engine  
transmission, examining reduction  
techniques, comparing with aircraft and  
space transport 04 p0457 A66-13466  
Hearing-intelligibility tests in presence of  
recorded noise from jet and propeller  
aircraft 09 p1338 A66-20957  
Measurement of aircraft noise in vicinity  
airports in connection with land-use  
planning 10 p1483 A66-21745  
Physical and psychological nature of noise  
principles of noise suppression in  
aircraft 10 p1493 A66-22129  
Psychological reactions to jet aircraft  
noise, including behavioral reactions and  
fatigue 12 p1806 A66-24234  
Sequential Noise Output Recording  
Equipment /SNORE/, aircraft engine noise  
facility, for jet noise and compressor  
noise and acoustic absorption materials test  
facility  
[SAE PAPER 66-GT-N-41] 14 p2269 A66-26986  
Field noise-reduction measurements in  
hotel, motel and residential rooms during  
flights of aircraft 17 p2847 A66-33036  
Dynamics of noise and loading actions on  
helicopters, V/STOL aircraft and ground  
test machines 18 p3050 A66-33679  
Noise generation due to mass introduction,  
thrust force and stress in helicopters,  
V/STOL aircraft and ground effect  
engine 18 p3051 A66-33687  
Acoustic isolator-membrane structure for  
soundproofing V/STOL aircraft exposed to  
noise levels with radical saving in  
weight 18 p3051 A66-33688  
Internal noise associated with hovercraft  
propeller 18 p3051 A66-33689  
Noise acceptability as produced by actual  
aircraft flyovers and recorded flyover  
levels judged on relative and absolute  
levels 21 p3721 A66-38647

performance, test unit organization, results,  
etc  
[SAE PAPER 660320] 18 p3052 A66-34945  
Laminar flow control /LFC/, aircraft  
performance benefits include increased  
endurance, loiter time and cruise  
altitude 18 p3050 A66-34948  
Flight testing of laminar flow control on  
X-21 aircraft, noting degradation of laminar  
performance in proximity of clouds or  
atmospheric turbulence, feasibility, handling,  
etc 18 p3050 A66-34949  
Optimum high payload laminar flow control  
aircraft offer 20 to 25 percent range  
improvement, indicated by design studies of  
large logistics aircraft 18 p3053 A66-34952  
Liquid methane fueled propulsion system  
for SST application, noting increased  
payload capacity, propellant characteristics  
and design criteria for storage within  
aircraft  
[AIAA PAPER 66-685] 20 p3625 A66-37259  
Common electronic techniques for studying  
aeroelasticity in high performance  
aircraft 21 p3827 A66-38654  
Aircraft in-flight vs ground testing, noting  
better SNR, freedom of jamming and  
decreased parameter requirements for  
vibration and transient  
monitoring 22 p3917 A66-39995  
Fundamental modes of nonervo-assisted  
aircraft control surface 24 p4159 A66-42344  
Optimization of aircraft performance, pilot  
performance and mission completion  
[ICAS PAPER 66-4] 24 p4159 A66-42492  
Dornier twin engine high wing STOL  
monoplane design and performance, noting  
useful space, landing gear, control system,  
fuselage, cargo, etc 24 p4160 A66-43070  
**AIRCRAFT POWER SOURCE**  
Integrated secondary power system to  
provide additional capabilities for supersonic  
aircraft  
[SAE PAPER 650828] 01 p0016 A66-10828  
Engine technology including higher turbine  
operating temperatures, high speed fan and  
nacelle design, increased by-pass ratio and  
improved power plant  
efficiency 06 p0943 A66-16924  
M.A.N. RB 153 jet engine development,  
characteristics and  
capabilities 06 p0943 A66-17019  
Aircraft batteries design, considering  
plastics, separators, alloys and operating  
conditions including thermal stability,  
explosion risks, etc 08 p1173 A66-19658  
Thermal stability of endothermic  
hydrocarbon heat-sink fuels, noting  
application flying in 10 Mach speed  
range 11 p1759 A66-23124  
Small gas turbines, market, technical  
problems, etc  
[ASME PAPER 66-GT-90] 14 p2372 A66-26994  
Incompressible fluid static thrust  
augmentation devices for aircraft propulsion  
for cases of presence and absence of heat  
and work exchange  
[ASME PAPER 66-GT-116] 14 p2373 A66-27008  
Airframe structure and power plant  
configuration effects on transport V/STOL  
performance 17 p2846 A66-32885  
USAF Aero Propulsion Laboratory research  
in weapon systems and turbine engines,  
ramjets, etc 18 p3269 A66-34956  
Nickel-cadmium batteries commercial  
aircraft application and maintenance  
problems 20 p3497 A66-37162  
Sealed nickel-cadmium batteries for  
aircraft-electrical systems, noting T-39B  
aircraft 20 p3497 A66-37163  
Method of weight analysis for constant  
frequency aircraft electrical generating  
system equipment 20 p3498 A66-37171  
Frequency sensing for protection of  
frequency aircraft electric power systems,  
applying storms saturating reactor  
concept 20 p3499 A66-37175  
Function, method of operation, complexity  
and effect on weight and cost for BITE  
/built-in test equipment/ as applied to  
electric power systems for jet  
aircraft 20 p3499 A66-37189  
HF electric power transmission lines in  
aircraft noting effect of frequency, ground  
plane elevation and feeder configuration on  
impedance 20 p3499 A66-37190  
Jet aircraft electric power system  
performance affected by transmission line  
impedances 20 p3499 A66-37191  
Power plant development trends and effect  
on short and vertical takeoff aircraft design,  
noting improvement in thrust-weight  
ratio 24 p4262 A66-43051  
**AIRCRAFT PRODUCTION**

requirements 22 p3922 A66-39691

## AIRCRAFT RELIABILITY

### SA AIRWORTHINESS REQUIREMENT SA COMPONENT RELIABILITY SA STRUCTURAL RELIABILITY

Changes to improve reliability of attack aircraft, estimating cost and gains in operational effectiveness 01 p0167 A66-10049

Military specifications MIL-HDBK-217 and MIL-R-22256, 22973 and 23094A with respect to reliability design of aircraft electronic equipment 01 p0034 A66-10059

DC-9 reliability program emphasizing simplicity improved proven components rather than completely new equipment 01 p0010 A66-10088

Triple redundancy with majority logic voting in application for increased safety and reliability of aircraft stability augmentation and/or automatic flight control 01 p0103 A66-10665

Reliability factors in flight controls, particularly automatic landing systems and controls for VTOL aircraft in transitional regime 02 p0231 A66-11863

Verdan digital computer operation in aircraft noting problems of reliability 02 p0194 A66-11965

Aid to air navigation problem discussing reliability and accuracy, hybrid system, redundancy and credibility, display, operational environment and navigation technique 02 p0256 A66-11966

Aircraft Unserviceability Analysis 03 p0322 A66-13107

British short-range aircraft operating cost affected by reliability, design and engines 06 p0804 A66-15991

Reliability factors considered by aircraft designers and manufacturers including bad design, indifferent manufacture, inadequate testing, human error, etc 10 p1538 A66-21134

Dimensionality theory for determining failure rate of aircraft components not in operation 11 p1637 A66-22862

Defining fatigue load environment for business aircraft [SAE PAPER 660215] 13 p2199 A66-26392

British Air Registration Board approach to safety of advanced complex aircraft and assessment of aircraft reliability 13 p2088 A66-26690

Reliability of military aircraft from viewpoint of user 13 p1996 A66-26691

Probability assessment of reliability effect on sortie of patrolling aircraft 13 p1996 A66-26695

Data recording and information transfer for defects in aircraft 16 p2715 A66-31200

Computer program for airborne surveillance system reliability 18 p3052 A66-34212

Optimum number of test aircraft in test program to predetermine endurance and service life of same aircraft in serial production 20 p3493 A66-36921

Predelivery reflight policies role in airplane system reliability, noting failures during various test and retest flights 20 p3495 A66-37178

XB-70A reliability program applied to initial system design stage from inception to present flight test program 20 p3568 A66-37917

UH-1D helicopter reliability determination and maintenance through planned data acquisition, analysis and corrective action program 20 p3572 A66-37946

### AIRCRAFT SAFETY

Safety education, management process and aerospace accidents 01 p0169 A66-10073

Air Force system safety management progress in issuance of new instruction manuals and in revision of system specifications 01 p0169 A66-10074

Safety and management in aerospace industry, noting importance of military specification 01 p0169 A66-10075

Arresting transport type aircraft, preventing overshooting runways, noting field tests 02 p0179 A66-12222

Structural design of transport aircraft to reduce fatalities, analyzing protective shell to withstand ground impact load and fuel containment [AIAA PAPER 65-773] 03 p0434 A66-12592

Computer-directed malfunction checkout of rockets, boosters and modern military aircraft 04 p0526 A66-14020

Supersonic flight control, discussing reliability and safety devices, computer application and multiplex systems 06 p0816 A66-16055

Stall indicator modification, describing design in combination with speed indicator LUN-1106 06 p0893 A66-16971

Mathematical formulation of lateral and longitudinal separation standards for subsonic and supersonic aircraft operation 07 p1066 A66-17680

International Air Transport Association, Technical Conference, Miami, April 1965, Volume 2 07 p1071 A66-17757

Operational requirements for improved worldwide navigational ability, initially applied in North Atlantic area 07 p1072 A66-17761

Optical and atmospheric conditions contributing to visibility loss at high altitude for high-speed aircraft approaching each other with very rapid closing times 10 p1494 A66-22134

Aircraft crew fatigue on long distance jet flights, measuring flight safety parameters such as heartbeat, pulse rate and temperature 12 p1808 A66-23753

North American Sabreliner laminate windshield for bird-proofing pilot compartment [SAE PAPER 660214] 13 p1995 A66-26389

FAA research, development and airworthiness compliance for general aviation aircraft [SAE PAPER 660217] 13 p1996 A66-26394

Rain repellent polymers for aircraft windshields 13 p2116 A66-26544

British Air Registration Board approach to safety of advanced complex aircraft and assessment of aircraft reliability 13 p2088 A66-26690

Aircraft maintenance, ground servicing, and safety precautions for XB-70 aircraft [SAE PAPER 660275] 14 p2269 A66-27286

Airworthiness and operational standards approaches for safety in supersonic transport, noting problems with temperature, altitude, radiation, ozone, etc [SAE PAPER 660293] 14 p2222 A66-27288

Aircraft safety, noting minimization of clear air turbulence, mountain wave and wind shear effects 15 p2533 A66-28933

Clear air turbulence, noting importance of good detection system and history of incidents in six-year period 15 p2426 A66-28934

Flight tests on various agricultural aircraft noting safety record data 16 p2634 A66-31284

Fail-safe concept application to rotorcraft noting fatigue requirements, accident prevention methods, etc 17 p2843 A66-32721

Hughes OH-6A helicopter fail-safe structural composition noting design, fatigue testing, application of redundant design features, etc 17 p2845 A66-32736

Helicopter airframe fatigue testing noting fail-safe design, crack detection, loads applied, test facilities and techniques, etc 17 p3027 A66-32737

Head-up display systems, discussing state of the art and arguments in favor of their use 17 p2952 A66-33202

Separation standards and navigation in long-range air traffic control region 17 p2954 A66-33213

Airworthiness codes for supersonic transports, noting current regulations, codes, etc 18 p3268 A66-34622

FAA safety research on aircraft reliability, discussing power spectral gust design, structural strength, turbine performance and lightning strike effects 20 p3540 A66-36992

Pilot protection from aircraft vibration caused by atmospheric turbulence 20 p3508 A66-36997

Allotment of probability shares method applied to improving safety in design by diagnosing failure and probability of accident 20 p3494 A66-36999

Airline evaluation of aircraft survival equipment, noting Arctic survival exercises and testing 20 p3494 A66-37002

XB-70 aircraft safety program developed during flight tests applied to future SST civil aircraft 20 p3494 A66-37006

Safety-factor problem in glider design, discussing limiting load concept in form of extreme load in exceptional cases of

operation 21 p3696 A66-3861

Promotion of aviation safety, discussing adoption of new accident statistics, elimination of catastrophes and STO design extension to medium and long-range aircraft 23 p4152 A66-4130

### AIRCRAFT SPECIFICATION

AFSC 375 series of systems management manuals with emphasis on specification programs 01 p0168 A66-1000

Reliability problems associated with producing to specification from viewpoint aircraft manufacturer 13 p2088 A66-26690

### AIRCRAFT STABILITY

Aileron traverse effect on amount coupling from roll to yaw during abrupt aileron roll of conventional aircraft 01 p0011 A66-101

Triple redundancy with majority logic voting in application for increased safety and reliability of aircraft stability augmentation and/or automatic flight control 01 p0103 A66-10665

Variable stability system /VSS/ incorporated into X-22A aircraft to obtain flight data on VTOL aircraft [AIAA PAPER 65-706] 01 p0013 A66-109

Preflight checking of aircraft gyroscope and accelerometers noting built-in speed detection, torque generator and gimbal check 01 p0070 A66-109

Free oscillation device for studying dynamic stability of models in hypersonic range of intermittent wind tunnels 02 p0210 A66-112

Changes in dynamics of aerospace vehicle flight in low altitude turbulence at satellite spin decay 02 p0178 A66-119

Vestibulo-ocular disorganization in aerodynamic spin, noting roll plane skull 03 p0325 A66-123

Tail aircraft in deep stall conditions at fixed-base cockpit simulation at large angle of attack [AIAA PAPER 65-781] 03 p0322 A66-130

Wing-fuselage interaction effects on static and dynamic stability at low and moderate hypersonic Mach numbers by small disturbance approximation to shock expansion method [AIAA PAPER 65-719] 04 p0454 A66-135

Pitch, roll and yaw axis stability augmentation system providing automatic failure detection of portions of system at further stability augmentation after a single failure 04 p0544 A66-141

Vibrational analysis of multicomponent systems using Rayleigh-Ritz type approximation, treating cases of fuselage and T tail assembly 04 p0594 A66-143

Aerodynamic coupling between longitudinal and lateral-directional rigid body modes of aircraft trimmed at nonzero sideslip angle and degradation of Dutch roll damping 05 p0606 A66-150

X-22A variable stability and control VTOL aircraft 06 p0809 A66-168

Capability of Cornell Aeronautical Laboratory /CAL/ system for measuring dynamic airloads in wind tunnel [AIAA PAPER 66-15] 06 p0803 A66-170

Aircraft erect and inverted spin characteristics, discussing Hawker-Siddeley Hunter T.Mk. 7 spin properties and application of controls for recovery 07 p0987 A66-174

Deep-stall characteristics of T-tailed aircraft configurations and recovery procedures, noting parameters of pitch-up angle of attack, etc [AIAA PAPER 66-13] 07 p0989 A66-184

Dynamic response of supersonic transport to runway unevenness during takeoff landing 09 p1330 A66-206

Longitudinal stability and controllability characteristics of glider, considering effect of elastic warp of wing 09 p1331 A66-207

Load factor estimation for flights in turbulent conditions by replacing exact transfer function with equivalent statistical model 10 p1482 A66-213

Drone aircraft onboard stabilization circuit design for control signal transmission at transient response irrespective of noise background 11 p1778 A66-233

Aircraft vibration in transonic regime caused by aileron oscillations, eliminated by friction dampers 12 p1801 A66-240

Automatic stabilization of helicopters by using autopilots 12 p1801 A66-24388

Aeronautical stability problems, discussing background, rigid and elastic stability and adaptive control 13 p1994 A66-25582

Lateral stability and control of STOL airplane at low speed 13 p1995 A66-26380

Automatic stabilization systems reduce accidents due to disorientation, emphasizing sensor-servo system for roll axis control [SAE PAPER 660201] 13 p1996 A66-26390

Light aircraft lateral stability augmentation system for wing leveling, noting operation and pilot performance [SAE PAPER 660220] 13 p1996 A66-26397

Text on longitudinal static stability of low-speed aircraft including effect on pilot, flight test, pitch maneuverability, etc 14 p2222 A66-26792

Stabilizing methods for hypersonic aircraft, noting effect of aircraft characteristic parameters on magnitude of balancing coefficients of lifting force 14 p2223 A66-27680

Dynamic programming design of invariant multiloop feedback autostabilizers and matrix-Ricatti equation 14 p2268 A66-28184

Stability of wing mounted pro-rotor pylon systems in fully converted aircraft configuration, showing in-plane force generated by blade flapping as destabilizing factor 16 p2633 A66-30599

Aircraft stabilization for solar eclipse observation, emphasizing use of autopilot for maximum control 16 p2743 A66-30823

Aileron traverse effect on amount of coupling from roll to yaw during abrupt aileron roll of conventional aircraft 16 p2633 A66-31115

Spiral instability in STOL aircraft prevented by larger wing dihedral setting, noting permissible dihedral levels and tests 16 p2634 A66-31395

Wind shear problems in terminal operations, considering effects on aircraft as longitudinal and lateral components 17 p2843 A66-32202

Aeroelastic stability of light aircraft, examining appearance of structural nonlinearities in global vibration test for determining critical flutter speed 17 p3023 A66-32331

Integrated Helicopter Avionics System flight control, noting stability augmentation, long-term motion control, outer and inner loop function separation and fail-safe capability 17 p2951 A66-32730

XV-5A V/STOL aircraft flight testing, noting handling qualities and sequential diversion capability 17 p2844 A66-32731

Lift engine technology, noting effect on operational transport aircraft design, VTOL capabilities, low speed control, etc 17 p2844 A66-32732

Flight control design parameters and performance effects on VTOL aircraft handling qualities, noting manufacture and flight test results 17 p2845 A66-32733

Gust alleviation systems for transport aircraft using linkage, noninteracting and split control 18 p3052 A66-34493

Aircraft bumpiness conditions in free atmosphere relation to turbulence and other aerological data 18 p3049 A66-34613

VTOL aircraft performance characteristics noting flying qualities, hover dynamics, transition flight and variable stability system 18 p3052 A66-34623

Normal modes of vibration in aircraft design, noting mass distribution effect on calculation accuracy 21 p3823 A66-38562

Automatic resonance testing technique for exciting normal modes of vibration of complex aircraft structures 21 p3823 A66-38566

Mechanics of linear vibrations - Symposium, Paris, April 1965 21 p3824 A66-38576

Linearized equilibrium conditions for force densities of aircraft oscillating in flight, determining Rayleigh-Ritz equations, measuring elastomechanical parameters by vibration tests 21 p3825 A66-38579

Aeroelastic instability of aircraft with automatic pilot, determining domain in which sensor position and other adjustable parameters may vary without risking instability 21 p3695 A66-38580

Static stability of rolling motion of aircraft for given aileron angle when inertia cross-coupling is present, with numerical solution of nonlinear equations 22 p3848 A66-40493

Performance of two-dimensional curtain jets of air cushion vehicles based on incompressible flow theory, noting stability criteria 22 p3844 A66-40499

Hovercraft difficulty in accelerating through hump, noting wave resistance increase for pressure differential between two compartments of cushion with transverse stability skirt 22 p3901 A66-40678

Capability of Cornell Aeronautical Laboratory /CAL/ system for measuring dynamic airloads in wind tunnel [AIAA PAPER 66-15] 23 p4051 A66-40977

Stability of vehicle passing from water to air as function of neutral point, maneuver point and center of gravity 23 p4015 A66-40987

Midpath airplane interference to digital transmission in tropospheric radio, considering scattering of radiant energy by atmospheric layers 23 p4040 A66-41594

# AIRCRAFT STRUCTURE

## SA AIRFRAME

Structural response theory and acoustic fatigue aspects contributing to estimation of fatigue life of aerodynamic structures 01 p0147 A66-10122

Computer programming of diagonal tension analysis of flat panels in shear 01 p0152 A66-10345

Engineering exploitation of glass fiber reinforced plastics for aircraft structures [AIAA PAPER 65-762] 03 p0386 A66-12590

Cost barrier breakthrough in air vs surface cargo transportation by structural weight fraction reduction, using new material [AIAA PAPER 65-763] 03 p0382 A66-13058

Aircraft structural design errors due to use of idealized models 04 p0587 A66-13505

Royal Aircraft Establishment facilities in England for aircraft structure testing under supersonic conditions, simulating aircraft takeoff, flight and landing 04 p0508 A66-14021

Supersonic transport design in thermal insulation, structure and air traffic control 06 p0805 A66-16324

Synthetic spherulites in plastic foam and synthetic tube segments in honeycomb form as fillers in sandwich construction 10 p1614 A66-21390

Aircraft structure weight reduction, using redux bending and spot welding instead of bolts and rivets 12 p1963 A66-24036

Basic principles of structural design as applied to aircraft, discussing loads and strengths and effect of accidents and costs 12 p1971 A66-24972

Optimization of minimum weight multirib or multiweb wing box structure subjected to vertical shear and unidirectional bending moment 13 p2195 A66-25593

YS-11 transport aircraft fatigue testing, noting wing fatigue damage and equipment used 13 p2197 A66-26099

Aerospace application of aluminum and its alloys 14 p2313 A66-27012

Forced oscillations of three-layer plate used as vibration dampers for engine components 14 p2400 A66-27696

Starting weight increments in aircraft designs having various structural features and dimensions 14 p2223 A66-27697

Nondestructive metal testing in SST development, noting welded titanium structures 15 p2509 A66-29319

Book on dynamics of elastic structures in free flight 16 p2815 A66-30612

Design, fabrication and test of sandwich construction box beam made of D-43 columbium and Haynes 25 superalloy for use as hot redundant structure for hypersonic vehicles 16 p2816 A66-30894

Aircraft mass and stiffness estimations by displaced frequency method 18 p3254 A66-33949

Maintenance and inspection of air transport vehicle structures 19 p3278 A66-35399

Aircraft structures strength and longevity obtained by applying standards and criteria to design and manufacture including static, fatigue and fail-safe tests 20 p3666 A66-37000

Lifting aircraft structures subjected to

acoustic pressures, noting estimation of panel joint rms stress 20 p3666 A66-37422

Flight tests on aircraft and analysis by automatic filter, noting structural and aerodynamic problems resulting from use of transient method 21 p3824 A66-38574

Response of continuous structure to random forces distributed over surface of structure estimated through normal mode method, exemplifying with aircraft fuselage in vibration 21 p3824 A66-38575

Matrix methods of forces and displacements applied to free oscillations of aircraft structures, proposing procedure yielding coherent mass matrix 21 p3825 A66-38582

Book on manufacturing of welded and soldered structures of aircraft including material selection, plasma and ultrasound techniques, economics, etc 21 p3744 A66-38951

Aircraft materials and structures for extreme ranges of velocity and temperature 22 p3990 A66-40120

Status of aircraft structural design analysis methods, examining structural elastic behavior on basis of stress analysis 23 p4138 A66-41381

# AIRCRAFT TIRE

Landing gear with one to eight wheels, weight, wheel well volume and allowable traffic on heavy airplanes, noting flexible pavement design and tire pressure [SAE PAPER 650799] 01 p0053 A66-10815

Tire traction on wet runways, possible improvement via jets mounted ahead of tires and pavement grooving [AIAA PAPER 65-749] 03 p0319 A66-12585

Aircraft tire performance at high rolling speeds 14 p2223 A66-27711

Static and dynamic forces against pneumatic tire used to predict off-runway takeoff and landing performance [AIAA PAPER 66-328] 16 p2634 A66-31320

Snow runway construction, discussing physical characteristics of snow, mechanical properties related to supporting capacity temperature effect, etc 17 p2904 A66-32933

# AIRCREW

Medical wastage of aircrew in Royal Air Force related to age, noting causes 06 p0815 A66-16050

Noise and vibration causing acoustic fatigue leading to deafness of aircrew 06 p0811 A66-16065

Location of flight control system for simplifying crew procedure and reducing navigation error in areas of high traffic density 07 p1068 A66-17697

Hearing acuity requirements of aircraft personnel, examining discrimination from background noise and acoustic trauma causative factors 10 p1493 A66-22130

German Air Force functional tests for early diagnosis of cardiovascular disease among aircrew, also discussing therapy 16 p2640 A66-31133

Aircrew helmet design for protection against buffeting and against crash impacts 17 p2865 A66-32188

Analogies between nutritional requirements of aircrew and cosmonauts, evaluating physiological factors involved 23 p4029 A66-41204

# AIRFIELD SURFACE MOVEMENT

Soft and rough airfield landing gears, discussing ground flotation and shock absorbers for aircraft of several sizes [SAE PAPER 650844] 01 p0011 A66-10834

Electronic techniques applied to taxiing, takeoff, aerial navigation and landing 02 p0255 A66-11466

Airport operation under low visibility conditions, discussing use of pictorial display to aid in surface movement 17 p2953 A66-33208

# AIRFLOW

Nonequilibrium expansion of air through hypersonic nozzle extended to higher reservoir temperatures and pressures 02 p0303 A66-11565

Two-dimensionality effect on suppression of thermal turbulence in air between two horizontal plates 02 p0218 A66-11954

Air intake with boundary layer trap, examining flow structure under external supersonic pressure and uniformity parameters

[ONERA TP 288] 03 p0316 A66-12898  
Mass transfer by sublimation from surface of stationary or rotating naphthalene cone in axisymmetric airstream 04 p0595 A66-13388  
Hypersonic airflow at alpha angle of attack about flat wing with shock wave on upstream side attached 04 p0454 A66-13572  
Heat transfer and flow in turbulent separated airflow over downward step in plate surface with suction and injection [ASME PAPER 65-WA/HT-2] 05 p0664 A66-15656  
Geometrical approach to investigate airflow toward and within updraft of severe storm cell [AFCLR-SR-32-65] 07 p1061 A66-17368  
Supersonic airflow past blunt body with various dissociation reactions 08 p1165 A66-19192  
Temperature-velocity phase lag of vibrations of air columns excited by heat supply 08 p1320 A66-19555  
Plane nonlinear stationary problem of hill slope winds reduced to set of finite difference equations and solved by simple and matrix factorization combined with iteration by computer 09 p1398 A66-19885  
Nonsteady isentropic compression wave to generate high-velocity air flows with very low ambient dissociation levels 11 p1684 A66-22831  
Flow field near leading edge of heated flat plate in Mach 0.5 airflow 11 p1634 A66-22934  
Severely turbulent airflow at low levels over United Kingdom 11 p1730 A66-23015  
Interferometer apparatus used in combination with Fabry-Perot etalon to study properties of low density air streams 11 p1709 A66-23298  
Heat transfer between longitudinal flow of air and staggered cluster of tubes 11 p1787 A66-23311  
Hydraulic resistance of air flow through porous steel plate 13 p2065 A66-26483  
Mean velocity, rms velocity fluctuations and Reynolds shear stress for air flow at high Reynolds number in rectangular channel partially roughened, measuring turbulence intensity 13 p2070 A66-26703  
Acoustic pressures on vibrating walls for turbulent airflow through rectangular hard-walled duct exposed to traveling sound waves 17 p2905 A66-31944  
Vibrational and rotational nonequilibrium flow effects in hypersonic conical nozzle expansion of nitrogen flows and airflows 17 p2842 A66-33478  
Heat transfer between copper sphere and air flow at normal and reduced pressure for various Reynolds numbers 21 p3835 A66-38904  
Heat transfer between turbulent flow of air and isothermal wall plate and constant thermal flux at surface 21 p3835 A66-38907  
Dissociation of hypersonic airflow past circular cylinder at zero angle of incidence 21 p3695 A66-39230  
Heat transfer and flow in turbulent separated airflow over downward step in plate surface with suction and injection [ASME PAPER 65-WA/HT-2] 22 p3898 A66-40025  
Equation for calculating entrainment ratio of ejectors as function of velocity numbers of two frictionless one-dimensional streams flowing side by side in pressure equilibrium 22 p3899 A66-40371  
Shock tunnel external burning experiments to investigate effects of reactive fuel injection into air stream flowing around body [AIAA PAPER 66-744] 22 p3893 A66-40631  
Balance bridging techniques using air supply lines for powered lift-fan model testing [AIAA PAPER 66-751] 22 p3893 A66-40637  
Surface catalytic and Reynolds number effects on nonequilibrium hypersonic stagnation flow of air or diatomic gas on highly cooled blunt body 22 p3847 A66-40919  
Flows with relaxation involving very rapid flow processes accompanied by reactions without chemical or thermodynamic equilibrium, using characteristics 23 p4014 A66-42048  
Single air flow acceleration and deviation for propulsion and lift of high speed

aircraft, analyzing long-range flight paths [ICAS PAPER 66-41] 23 p4122 A66-42070  
Thermodynamics of real air expansion using state equation applied to large temperature range, including contribution of vibrational energy 24 p4293 A66-42155  
Thermoanemometric and high speed motion-picture photographic experimental analysis of air vortex ring structure 24 p4196 A66-42879  
**AIRFOIL**  
SA HYDROFOIL  
SA LAMINAR FLOW AIRFOIL  
SA SUPERSONIC AIRFOIL  
SA THIN AIRFOIL  
Unsteady airfoil functions evaluated approximately 10 p1479 A66-21345  
Transition region and amplification factor of unstable disturbances in laminar boundary layers with distributed suction 10 p1522 A66-21408  
Prediction of local flow conditions at crest of aerofoil section in sonic stream 13 p1992 A66-26697  
Interference effect for biconvex aerofoil in wind tunnel with slotted liners 13 p1992 A66-26698  
Text on cascade flow through airfoils and application to turbomachine and blade design 14 p2220 A66-27699  
Surface pressure on thin two-dimensional airfoils in transonic flow 15 p2478 A66-29246  
Pressure distribution at low speeds on two-dimensional airfoils with blunt trailing edges at zero incidence, taking into account wake 19 p3278 A66-36751  
**AIRFOIL CHARACTERISTICS**  
Linear cascade of double-circular-arc airfoils in transonic shear flow compared with subsonic flow 03 p0313 A66-12394  
Change rate of pitching moment coefficient upon aerofoil correlated to deflection of flap control for application to wing reversal analysis 06 p0801 A66-16001  
Clearance loss in rectilinear cascade, emphasizing flow separation and vortices shed at blade tips 07 p0980 A66-17483  
Numerical solution of Fredholm integral equation with singularities and application to annular airfoil theory 09 p1396 A66-20626  
Longitudinal stability and controllability characteristics of glider, considering effect of elastic warp of wing 09 p1331 A66-20757  
Unsteady plane motion of pointed airfoil pair, obtaining resultant force and moment of biplane 13 p2062 A66-25400  
Electrical analog method used in determining potential gas flow past airfoil lattice, noting components of solution 13 p2068 A66-26541  
Linearized surface pressure distribution on streamlined ducted bodies in axisymmetric flow, considering aerodynamic loading on annular airfoil 13 p1993 A66-26716  
Helicopter airfoils, discussing design improvement by proper choice of camber and leading edge 17 p2840 A66-32725  
Airfoil pitching motion and flap rotational motion in two-dimensional low supersonic flow in wind tunnels 23 p4053 A66-40975  
Transonic airfoil characteristics correlation for zero incidence in slotted wall wind tunnels 23 p4007 A66-40976  
STOL flying possibilities and limitations, considering aircraft generating high lift by using fixed wing and airfoil features 23 p4016 A66-41774  
First- and second-order theory for uniform shear flow past airfoil, obtaining expressions for pressure, lift and moment coefficients 23 p4011 A66-41879  
Aerodynamic coefficients of large-aspect-ratio fan-in-wing airfoil, noting that velocity field consists of inflow to fan, parallel flow and circulation flow 24 p4158 A66-43050  
**AIRFOIL PROFILE**  
Pressure distribution and skin friction measurements confirming that effects of changing base flow conditions decay with distance upstream along airfoil surface 06 p0801 A66-15999  
Measurements of three coefficients for rectangular, trapezoidal, sweptback, triangular and parabolic wings in subsonic and supersonic flow 07 p0979 A66-17480  
Compressible subsonic flow with symmetric Zhukovskii profile calculated by correspondence principle 07 p1023 A66-18112

Airfoil section testing at transonic speeds aimed at extending NACA low-drag airfoil information 09 p1365 A66-20740  
Slender profile of infinitely thin supersonic wing that provides minimum mean heat-transfer coefficient at given lift-drag ratio 09 p1328 A66-20754  
Book on theory of optimum aerodynamic shapes 11 p1629 A66-22501  
Airfoil cascade oscillation in near-sonic gas flow 12 p1798 A66-24432  
Airfoil equilibrium stability under elastic force and uniform wind action 13 p2062 A66-25402  
Airfoil theory in incompressible flow for boundary layer suction or Helmholtz type wake 16 p2629 A66-31039  
Transonic flow around airfoils and wing profiles in uniform asymptotic transonic stream studied, using hodograph plane and method for smoothing results 16 p2629 A66-31040  
**AIRFOIL SECTION**  
Lift force of airfoil section determined for sudden change in angle of attack, analyzing Prandtl vortex positions 03 p0314 A66-12526  
Rolling moments of five symmetrical, untwisted airfoils of various planform tested in high-speed wind tunnel as functions of angle of attack and angle of yaw 07 p0980 A66-17481  
Airfoil shape construction by conformal mapping and development of analog computer program to plot two-dimensional potential flow about various airfoil sections 16 p2629 A66-31116  
Fluidic system design of single and double airfoil amplifiers based on airfoil surface characteristics 21 p3698 A66-39464  
Lighthill integral transform methods in hodograph transformation theory of plane compressible transonic shock-free potential flows around airfoil sections in solution space of Chaplygin equation [ICAS PAPER 66-26] 23 p4007 A66-41008  
**AIRFOIL THICKNESS**  
Transonic airfoil problem solved via differentiation of airfoil thickness ratio by infinitesimal perturbation method [AIAA PAPER 66-90] 06 p0802 A66-16410  
Jet drag solutions for symmetrical struts of various shapes, thickness ratios and slot widths in quiescent and uniform streaming flow 12 p1800 A66-25005  
Wind tunnel experiments on thin two-dimensional airfoil with sharp leading edge and with jet blowing through mid-chord slot on upper surface in order to control boundary layer and circulation around it 18 p3048 A66-33950  
**AIRFRAME**  
SA FUSELAGE  
SA LANDING GEAR  
Use of monofilament composites of S-glass fibers and epoxy-resin in primary aircraft structure [AIAA PAPER 65-761] 05 p0772 A66-14729  
Structural design of Concorde supersonic airliner, noting airframe strength parameters 10 p1483 A66-21711  
Aircraft structure weight reduction, using redux bending and spot welding instead of bolts and rivets 12 p1963 A66-24036  
Helicopter airfoils, discussing design improvement by proper choice of camber and leading edge 17 p2840 A66-32725  
Hughes OH-6A helicopter fail-safe structural composition noting design, fatigue, testing, application of redundant design features, etc 17 p2845 A66-32736  
Helicopter airframe fatigue testing noting fail-safe design, crack detection, loads applied, test facilities and techniques, etc 17 p3027 A66-32737  
Airframe structure and power plant configuration effects on transport V/STOL performance 17 p2846 A66-32885  
Algorithm used in circuit design, evaluating equivalent strain at critical points of airframe structure, verifying it during fatigue tests 20 p3665 A66-36880  
SH-3A airframe fatigue test facility for automatic simulation of helicopter flight and landing loads 22 p3992 A66-40251  
Use of monofilament composites of S-glass fibers and epoxy-resin in primary aircraft structure [AIAA PAPER 65-761] 23 p4083 A66-40979

# IRFRAME MATERIAL

Fatigue failure in aircraft panels studied by determining spectral densities of response of continuous skin stringer panels under random noise  
excitation 01 p0147 A66-10130

Fatigue crack propagation in airframe materials under axial narrow and broadband random loading 01 p0148 A66-10139

Titanium alloys as basic structural material for supersonic transport noting strength, corrosion resistance, fatigue, etc [SAE PAPER 650789] 01 p0088 A66-10814

Thermal stresses arising at high velocities in aircraft skin consisting of two load-carrying layers separated by filler 09 p1468 A66-20758

Newer titanium alloys compared with present production alloys from closed die forgings in typical airframe and engine configuration 14 p2317 A66-28011

Plastic strain effect on fatigue strength of aircraft skin sheets with hole subjected to constant loading, noting stress concentration at hole 16 p2815 A66-30678

Structural design criteria for Concorde aircraft, including necessity for heat-resistant airframe material 20 p3666 A66-37400

## IRGLOW

### SA ATMOSPHERIC EMISSION

#### SA AURORA

#### SA SKY BRIGHTNESS

#### SA SKY RADIATION

Alternating-light monochromator with Fabry-Perot interferometer for measuring sodium and oxygen lines during twilight and at night 01 p0066 A66-10184

Kinetic temperatures derived from Doppler width of airglow 5577 angstroms /OI/ line measured with Fabry-Perot interferometer 02 p0221 A66-11503

Data concerning planetary scale of intensity variations of 5577 angstrom emission in night airglow 04 p0515 A66-13848

Lunar tidal effect on oxygen green line in night airglow at Honolulu from 1961 to 1963 05 p0668 A66-14801

Zenith intensity of second positive band of molecular nitrogen in dayglow calculated and compared to experimental results 05 p0668 A66-14802

Mid-day dayglow intensities arising from solar ionizing radiation fluorescence 05 p0748 A66-14942

Observation location and instrument vagaries cause discrepancy between photographic and photoelectric interferometric measurements of dayglow at 6300 angstroms 05 p0671 A66-14958

Spectrographic and interferometric techniques used in temperature determinations of auroral and airglow emissions in upper atmosphere 05 p0671 A66-15020

Night airglow intensity measured at Kerguelen Islands in 1963, rejecting observations contaminated by auroral light 05 p0672 A66-15039

Doppler temperatures obtained from 6300 angstrom line of atomic oxygen in airglow 05 p0673 A66-15047

Manned space flight observations include confirmation of normal airglow, Glenn effect and photographs of land and ocean areas that can be compared with lunar and planetary photographs for geologic interpretation 05 p0629 A66-15755

Airglow and auroral radiation and time-space variations 09 p1372 A66-20280

Intensity variation of 6300 angstrom night airglow and rate coefficient of ion-atom interchange reaction 09 p1372 A66-20381

Dayglow at 6300 and 3914 angstroms from rocket soundings and roles of ion recombination and UV dissociation 09 p1374 A66-20887

Night sky luminosity and solar UV reflection from Earth measured by Cosmos XLV 09 p1376 A66-20996

Photographic observations of rocket nightglow 10 p1528 A66-21141

UV night airglow spectrometry 10 p1528 A66-21142

Photometric monitorings of 5577 and 6300 angstrom lines during undisturbed geophysical conditions in South Atlantic 10 p1530 A66-21164

Laboratory duplication of processes exciting airglow, noting green line of oxygen atoms 11 p1699 A66-23116

Brightness of oxygen bands in twilight and day airglow, relating variation to sunspot cycle, ozone dissociation and solar eclipse 11 p1702 A66-23490

Excitation of auroral green line in terrestrial nightglow caused by interaction of three ground state oxygen atoms 11 p1703 A66-23498

Relative intensity measurements of 50 major bands of Lyman-Birge-Hopfield /LBH/ system of nitrogen 12 p1869 A66-23919

Atomic oxygen night sky emission observations with pressure scanning Fabry-Perot interferometer 12 p1873 A66-24837

Wide angle Michelson interferometer for measuring Doppler temperature from width of 5577 angstrom atomic oxygen line in nightglow and aurora 13 p2128 A66-25799

Auroral hydrogen emission in night sky, noting variance with sunspot cycle and magnetic activity 13 p2073 A66-26029

Variations of zodiacal light and airglow, suggesting correlation with solar and lunar cycle 14 p2283 A66-27096

Design and fabrication of automatic all-sky scanning and self-recording photometer for night airglow 14 p2296 A66-27724

Rocketborne photometer data analysis of night sky airglow and spectrum in 6300 angstrom region 15 p2482 A66-28494

Airglow continuum measurement with birefringent filter 15 p2484 A66-28837

Intensity of oxygen red line in night airglow analyzed, obtaining temperature dependence of rate coefficients of ion atom interchange reaction and collisional deactivation, noting red line intensity dependence on solar activity 15 p2484 A66-28905

Excitation temperature of three states of atomic oxygen determined to be 2000 degrees K from intensity ratio of three atomic oxygen 1300 angstrom triplet lines in dayglow 15 p2484 A66-28907

Airglow lines measured through photometers on OGO-II satellite, noting nadir and zenith airglow 15 p2494 A66-30044

Nightglow emission from atomic oxygen caused by dissociative recombination in F region 16 p2694 A66-30707

F-layer nightglow 6300 angstrom emission intensity and electron density data, noting variations in emissions 16 p2694 A66-30708

Spectral lines in atmospheric emission during day and night airglow in review of published works 17 p2917 A66-32026

Height measurement of nightglow by photometric ground triangulation, minimizing previous errors 17 p2917 A66-32524

Mapping 6300 angstrom airglow isophotes from observations of scanning photometer at Haleakala, Hawaii 17 p2918 A66-32534

Upper atmospheric temperature measurement from Doppler line widths of atomic oxygen auroral and nightglow emission, using Michelson interferometer 17 p2919 A66-32993

Variations of 6300 angstrom airglow emission at Sacramento Peak, New Mexico 17 p2919 A66-32994

Monte Carlo calculation of nightglow excitation and maintenance of nighttime ionosphere by low energy protons 18 p3169 A66-34518

Grille spectrometer, noting greater signal to noise ratio than that of scanning Fabry-Perot spectrometer for airglow observations 19 p3353 A66-35378

Lyman alpha airglow observations indicate diurnal variation of atomic hydrogen in thermosphere and exosphere with abundance change with solar activity 19 p3349 A66-36349

Quantitative measurement of free metallic atoms abundance and height distribution from twilight, dayglow and aurora fluorescence 19 p3349 A66-36350

Aerobee rocket measurement of nitric oxide in upper atmosphere, noting fluorescence in airglow layer, emission rate factors and NO densities 19 p3349 A66-36351

Atomic hydrogen and helium emissions in upper atmosphere determined by diffraction spectrophotometer measurement of twilight

airglow and aurora 19 p3350 A66-36352

Diurnal and latitudinal variations in 6300 angstrom nightglow intensity determined along Pacific coast of South America, noting relation between location of antisolar point and equatorial midnight enhancement 19 p3352 A66-36628

Upper atmospheric nitric oxide determined from Aerobee measurement of UV dayglow spectra 20 p3550 A66-37299

Earth albedo estimation, backscattered interplanetary radiation and resonance scattering of dayglow 20 p3553 A66-38194

Intensity measurements on molecular oxygen Herzberg I system emitting in afterglow of microwave discharge, noting dependence of transition moment on internuclear distance 20 p3555 A66-38208

Spatial inhomogeneities in green line of atomic oxygen, using electrophotometry during airglow 22 p3915 A66-40778

Quenching of metastable states by atmospheric particles on basis of rocket measurements of dayglow, noting quenching coefficients of oxygen 22 p3916 A66-40872

Image orthicon slit spectrograph for study of aurora and night glow 22 p3921 A66-40898

Altitude profiles for dayglow emissions excited by molecular ion dissociative recombination, solar radiation fluorescence, oxygen photodissociation, electron collisions and chemical reactions 23 p4064 A66-41680

Molecular nitrogen ions in nocturnal upper atmosphere at middle latitudes, noting space radiation bombardment 23 p4064 A66-41681

Rocket photometric measurements of weak airglow emission at 6300 angstrom oxygen line 24 p4199 A66-42467

Photoelectric photometer using filter that tilts relative to incident light for patrol observation of 5577 angstrom intensity in nightglow 24 p4210 A66-42468

Zodiacal light, airglow and falling atmospheric dust measurements and observations in terms of solar orbiting small diameter particle clouds 24 p4276 A66-42663

## AIRLINE

British short-range aircraft operating cost affected by reliability, design and engines 06 p0804 A66-15991

Lowering total airline operating costs through nonaircraft economizing 06 p0804 A66-15994

Navigation techniques and operational objectives due to computer-generated flight plans of United Air Lines 07 p1074 A66-17777

## AIRPORT

### SA LANDING AID

C-5A aircraft design load criteria for landing gear of large aircraft that must operate from semi-improved airfields [AIAA PAPER 65-711] 01 p0013 A66-10948

Airport pavement roughness data and aircraft response data evaluated to determine pavement design and construction criteria [AIAA PAPER 65-712] 01 p0055 A66-10949

Airport approach standards used to protect approaches to airports 02 p0260 A66-12221

Milan airport system noting air traffic 05 p0661 A66-15846

Lowering total airline operating costs through nonaircraft economizing 06 p0804 A66-15994

Deformation modulus of airfield pavement materials 09 p1365 A66-20697

Airport suitability for delta wing commercial supersonic transport, discussing noise objectives 09 p1365 A66-20698

Operation of VTOL aircraft in vicinity of airport including safety, noise and air traffic control factors 10 p1482 A66-21372

STOL aircraft characteristics compared with VTOL aircraft and helicopter, noting airport layout 10 p1519 A66-21406

Multiple-access worldwide satellite communication system for aircraft terminals with limited antenna gain and transmitter power [AIAA PAPER 66-297] 12 p1823 A66-24765

Douglas DC-8 super sixty series effect on airport requirements including noise level, runway problems and traffic [SAE PAPER 660281] 15 p2427 A66-29825

Airport pavement roughness data and aircraft response data evaluated to determine pavement design and construction criteria

- [AIAA PAPER 65-712] 16 p2683 A66-31590  
Economics of airport facilities and operations, noting safety and regularity problems 20 p3687 A66-38016  
All-weather landing systems in U.K., examining safety and reliability criteria in connection with trident airborne equipment [ICAS PAPER 66-8] 22 p3946 A66-40676  
Dispersal of supercooled fogs over airports by seeding with dry ice [ICAS PAPER 66-7] 23 p4086 A66-41255

## AIRPORT LIGHT

- Airport lighting equipment required to reduce prescribed weather minima, including light for approach, high intensity, runway, flashing, etc 11 p1683 A66-22683  
Airport lighting facilities for aiding aircraft takeoffs and landings in conditions of poor visibility 12 p1859 A66-24832

## AIRPORT PLANNING

- Mathematical model based on control and queueing theory for human controller for turn-round operations on airport apron 03 p0329 A66-12886  
Operational considerations in airport planning [AIAA PAPER 65-746] 03 p0353 A66-13054  
Organization of short-distance interurban transportation system based on STOL aircraft of Breguet type 05 p0611 A66-15194  
Layout and design of air terminal for Basel, Switzerland, noting passenger accommodation and air traffic problems 05 p0660 A66-15199  
FAA regulation of civilian use of U.S. airspace 08 p1321 A66-18548  
Airspace, accessibility and economics studied in quest for airport in New Jersey-New York area 09 p1473 A66-20693  
Methodology for evaluating current and future annual capacity and other operational factors in development of airport systems in metropolitan area 09 p1364 A66-20694  
Airport access, circulation and parking 09 p1365 A66-20695  
Measurement of aircraft noise in vicinity of airports in connection with land-use planning 10 p1483 A66-21745  
Assisted takeoff and landing for commercial aircraft using short runways [SAE PAPER 660337] 14 p2269 A66-27296  
Aircraft utilization and schedule planning, optimum use of flight performance, ground equipment, facilities and personnel [SAE PAPER 660279] 15 p2427 A66-29824  
Super airport planning concepts, satellite and unit terminal, stress decentralization to meet changing demands and increased volume of air traffic [SAE PAPER 660282] 15 p2476 A66-29826  
Airport planning with respect to transportation systems and population centers on Eastern seaboard, noting past experience and future requirements [SAE PAPER 660284] 15 p2477 A66-29828  
Transportation developments for airport planning, emphasizing need to limit carrier transport service to single airport 16 p2682 A66-31283  
Air traffic estimation, discussing installation locations and parameters for airport site choice 21 p3838 A66-39433

## AIRWORTHINESS REQUIREMENT

- Maintenance and airworthiness philosophy in aerospace engineering 12 p1801 A66-23858  
Airworthiness codes for supersonic transports, noting current regulations, codes, etc 18 p3268 A66-34622

## AIRYS STRESS FUNCTION

- SA POISSON RATIO  
Elastic critical load of centrally loaded simply-supported beam which buckles laterally out of plane derived by Airy integral functions 07 p1144 A66-18049  
Airy stress function applied in solving problems for doubly connected regions with contiguous circular boundaries 13 p2204 A66-26432  
Stress intensity factors, strains and rotation in infinite eccentrically cracked strip under uniform tensile stress applied at infinity 24 p4286 A66-42157

## ALANE

- Synthesis of complex lithium aluminum hydride, lithium hexahydroalane, having hydrogen to aluminum ratio greater than four 11 p1649 A66-22400  
Preparation of aluminum difluoramide from

- trimethylamine alane and difluoramine 13 p2018 A66-26501

## ALBEDO

- SA COSMIC RAY ALBEDO  
SA EARTH ALBEDO  
Albedo and planetary radiation simulation to provide field angle and uniformity of intensity for thermal testing 02 p0211 A66-11217  
Approximation of effect of albedo inhomogeneity on flux of short wave radiation leaving Earth 02 p0222 A66-11658  
Airborne albedo measurements of ice in Ross Sea, Antarctica, for various solar elevations and altitudes 05 p0669 A66-14937  
Airborne albedo measurements of various representative underlying surfaces in Antarctica 05 p0669 A66-14938  
Spectral distribution of albedo and luminance at center of disk for diffusing and absorbing planetary atmosphere 07 p1027 A66-17247  
Directional radiative characteristics of conical cavities and relation to reflective characteristics of Moon 07 p1136 A66-17729  
Planetary albedo as affected by solar radiation reflected from surface of red clay soil or white quartz sand 15 p2597 A66-29258  
Geometric albedos and phase integral of planet Mercury compared with Moon 18 p3230 A66-34153  
Iterative solution of equations for diffuse reflection and transmission in finite plane-parallel atmosphere with arbitrary stratification 21 p3734 A66-39220

## ALCOHOL

- SA CHOLESTEROL  
SA ETHYL ALCOHOL  
SA METHYL ALCOHOL  
Critical heat flux under forced motion of underheated alcoholic aqueous solutions 09 p1470 A66-20148  
Paramagnetic resonance spectra of free radicals in hydrogen peroxide and alcohols during intense UV irradiation 11 p1650 A66-23216  
Photoionization of leucocarinols and leucocyanides of malachite green, crystal violet and sunset orange dissolved in straight chain alcohols and chlorinated hydrocarbons 14 p2232 A66-27374  
Nuclear magnetic resonance classification of alcohols and hydroxyl groups from FI-19 spectra of trifluoroacetates 15 p2447 A66-29238  
Alcohol induced hypoglycemia as factor in aircraft accidents, noting effect of post mortem changes in blood glucose level 24 p4164 A66-42458

## ALDEHYDE

- S ACETALDEHYDE  
S FORMALDEHYDE

## ALFVEN WAVE

- SA MAGNETOHYDRODYNAMICS  
Alfven waves and fast magnetosonic waves in nonisothermal plasma with molecular ions traversed by charged particle flux 02 p0268 A66-11771  
Contradictory experiments to determine whether particles responsible for auroral events are solar particles or local particles accelerated by secondary processes 03 p0421 A66-12864  
Nonlinear Alfven waves in Vlasov plasma noting particle trapping 03 p0400 A66-12949  
Velocity and attenuation of Alfven waves in hydrogenous plasma at LF and HF by experiment 03 p0406 A66-13177  
Small amplitude wave propagation in hot ionized gases, noting magnetic field presence 05 p0721 A66-14716  
Hydromagnetic waves in nonisotropic medium in presence of gravitational field 05 p0759 A66-14877  
Plasma velocity in weakly ionized gas with strong magnetic field and neutral component velocity determined independently [AIAA PAPER 66-4] 06 p0916 A66-16255  
Alfven waves in conducting nondissipative fluid permeated by external localized inhomogeneous magnetic field while in equilibrium 07 p1086 A66-17655  
Shock wave propagation in electrically conducting incompressible fluid imbedded in magnetic field 07 p1089 A66-17975  
Helicon and Alfven wave propagation in solid state plasma 07 p1101 A66-18198  
Chronological account of direct observation

- of Alfven waves and helicons in solids, noting propagation through metals and cyclotron absorption 07 p1101 A66-18199  
Polarization and Alfven wave attenuation in Doppler-like change in transverse wave velocity when drift current is passed parallel to magnetic field in solid-bismuth plasma 07 p1102 A66-18209  
Alfven wave propagation in incompressible inviscid infinitely conducting medium by canonical equations of motion 08 p1205 A66-18534  
Alfven wave generation and propagation in low pressure arc discharges of helium, argon, nitrogen and air [AIAA PAPER 66-171] 10 p1560 A66-21425  
Geomagnetic thruster form of Alfven wave propulsion system, using ionospheric plasma contacts [AIAA PAPER 66-257] 10 p1594 A66-21462  
Nonpotential Alfven drift waves and magnetic noise in magnetosonic stationary hydrogen plasma 10 p1569 A66-21964  
Cerenkov electron absorption of Alfven and magnetoacoustic waves in plasma cylinder, obtaining formula for energy absorbed by plasma and damping factor where there is no resonance layer 11 p1743 A66-22443  
Propagation of MHD emissions in Alfven mode along high latitude geomagnetic field lines, auroral zone signal energy penetration and isotropic wave mode transformation 11 p1701 A66-23151  
Propagation modes of small disturbances in homogeneous incompressible magnetoelastic medium at Alfven velocities 12 p1929 A66-24379  
Alfven wave generation in spherical system, determining velocity of MHD waves in longitudinal magnetic field by creating standing wave resonance 12 p1924 A66-24590  
Terminal properties of Alfven waveguides, deriving electrical input impedance of set of coaxial excitor electrodes 13 p2137 A66-25046  
Alfven wave propagation in inhomogeneous magnetic fields satisfying magnetohydrostatic equation and allowing for electric currents solved, using differential equation 13 p2156 A66-26710  
Excitation of Alfven waves in semimetallic plasma at low temperature, noting wave propagation below plasma or cyclotron frequency in magnetic field 14 p2363 A66-27516  
MHD wave generation in sunspots, examining depth of solar magnetic layer that affects magnetic convection 15 p2596 A66-29138  
Induction drag of long cylindrical satellites and Alfven waves emitted from them determining potential and current distribution and effect on energy loss [AIAA PAPER 66-478] 16 p2799 A66-30523  
Wentzel-Kramers-Brillouin method for Alfven wave propagation in medium slowly varying with time 16 p2804 A66-31262  
Conical refraction of magnetosonic waves occurring when Alfven waves propagate at speed of sound in conducting fluid in presence of constant uniform magnetic field 16 p2764 A66-31364  
Alfven waves in bismuth for propagation along magnetic field, noting dielectric constant variation with frequency, effect on real part of refractive index, relaxation time analysis, etc 19 p3443 A66-36006  
Ion cyclotron resonance heating applied to C stellarator plasma formed by ohmic heating, noting Alfven wave generation by Stix coil 19 p3432 A66-36594  
Alfven wave propagation equations used to study electronic properties of semimetals 20 p3615 A66-37282  
Alfven wave propagation in incompressible fluid stratified by inhomogeneous fluid density or magnetic field strength 21 p3791 A66-39170  
Nonpotential Alfven drift waves and magnetic noise in magnetosonic stationary hydrogen plasma 21 p3794 A66-39543  
Field, mass, momentum and energy conservation, entropy and evolution conditions for steady MHD oblique shock discontinuities in perfectly conducting gas flow with Mach and Alfven number parameters 21 p3795 A66-39577  
Alfven shocks for flow of highly

conducting incompressible fluid over blunt body where magnetic and flow vectors are not aligned 22 p3957 A66-40705

**CGAE**

**SA CHLORELLA**

Algatron, device for life support systems in space, providing potable water, oxygen supply, stabilizing human wastes by algal photosynthesis 13 p2015 A66-25702

Extracellular polysaccharides biosynthesis by blue-green alga *Anabaena* 13 p2009 A66-25875

*Clostridium* 13 p2009 A66-25875

Characteristics of sterols naturally occurring in species of *Chlorella* with algae grown heterotrophically on glucose 13 p2009 A66-25876

Inhibition of zoospores of unicellular chlorococcacean alga by soil bacillus through ammonium ion 17 p2860 A66-32833

Two-billion-year-old fossils related to blue-green algae considered in connection with origins of photosynthesis 19 p3285 A66-35794

Algal bioregenerative photosynthetic gas exchange system 19 p3293 A66-36239

**LGEBRA**

**SA BOOLEAN ALGEBRA**

**SA DIFFERENTIAL ALGEBRA**

**SA MATRIX ALGEBRA**

**SA TERNARY ALGEBRA**

Multiplier operators and quotient algebra 05 p0707 A66-15031

Properties of  $n$ -pi operatives and np operatives 06 p0903 A66-16905

Algebraic and graphical methods for evaluating system stability and parameter sensitivity 12 p1854 A66-24382

Derivation of expansion theorem of circuit algebra 16 p2670 A66-31032

Approximate solution of cubic equation with real roots and applications in mechanics 17 p2947 A66-33328

Structure and representations of noncommutative Jordan algebras, using proof of analog of Jacobson coordinatization theorem 18 p3127 A66-34456

Digital computer program for handling algebraic expressions in complex numbers 23 p4042 A66-41739

**LGORITHM**

Approximate solution for differential equations, using algorithm applied to boundary value problem involving linear equation 01 p0091 A66-10164

Nonlinear equations of atmospheric hydrodynamics solved, using numerical algorithm 01 p0096 A66-10751

Algorithm for allocating redundancy among subsystems to achieve maximum system reliability without exceeding multiple constraints on redundancy 02 p0236 A66-11856

Graphs for problems of computing system design automation, specifically finding algorithm for graph scheme construction 02 p0250 A66-12102

Algorithm for determining number of vertices contained in single contact network corresponding to transmission function 03 p0348 A66-12574

Inversion of correlation matrices used to obtain simple numerical algorithms and in construction of self-adjustment algorithms 03 p0338 A66-13036

Algorithms for teaching open-loop optimizing control system correct recognition of situations expressed as regions of complex configuration 04 p0503 A66-13773

Algorithm for designing miniaturized discriminators 04 p0490 A66-13969

Algorithm determining best approximation of bounded function in Chebyshev sense adapted to discrete case 04 p0540 A66-14167

Algorithm determining best approximation in Chebyshev sense of continuous function on segment 04 p0540 A66-14168

Differential correction algorithm in orbit and attitude determination having optimal property in system data error 05 p0635 A66-15800

Extension, modification and analysis of Gorenstein-Zierler decoding algorithm for binary codes of Bose, Ray-Chaudhuri and Hocquenghem /BCH/ correcting erasures and errors 06 p0837 A66-16114

Existence and uniqueness of optimum algorithms proven for application to transformation of potential

fields 06 p0875 A66-16133

Algorithm for optimum control problem based on Pontryagin maximum principle 06 p0902 A66-16424

Algorithm for mathematical expectation and dispersion of two-dimensional random sequences, obtaining linear estimation of norm of meteorological elements minimizing rms error 06 p0905 A66-16550

Algorithm determining end product concentration of mixture for chain isothermal propagation of plane flame 06 p0971 A66-16710

Optimum numerical algorithm for determining elements of inverse of Vandermonde matrix 06 p0866 A66-16751

Algorithm synthesizing sequential circuit from transition matrix, making critical races occurrence impossible during simultaneous relays starting 07 p1013 A66-17384

Algorithm used for synthesis of regular events in asynchronous automatic machines 07 p1014 A66-17437

Statistical problem of control system synthesis, discussing plant algorithm 07 p1014 A66-17438

Algorithm of stochastic search for maximum in determined field 07 p1060 A66-18507

Globally convergent iteration function for solution of polynomial equations according to certain algorithms 09 p1395 A66-20624

Algorithm to automatically ascertain admissible processing sequence for all-digital simulation of analog or analog-hybrid system 10 p1507 A66-21699

Algorithm for optimal parameter choice in reliability control of complex systems, based on dynamic programming 11 p1675 A66-22623

Algorithm for computer eigenfunction solution of boundary value problem involving partial differential equations for stress functions of semimomentless cylindrical shells 11 p1782 A66-22856

Linear cycle set factorization, showing that uniqueness of canonical procedure is incorrect and introducing new cycle division algorithm 11 p1679 A66-23247

Associative parallel processor using word and bit logic and sequential-state-transformation mode, with application to picture processing and pattern recognition 12 p1827 A66-23830

Bernstein form of polynomial with algorithm for determining upper and lower bounds for polynomial in  $x$  in closed interval  $[0, 1]$  14 p2320 A66-27114

Algorithm for perceptron-type recognition systems with input correlator 14 p2264 A66-27203

Algorithm for analyzing transient stress waves generated in cylindrical shell by application of impulsive dynamic loads 14 p2399 A66-27609

Nonlinear equations of atmospheric hydrodynamics solved, using numerical algorithm 14 p2285 A66-27850

Algorithm for mathematical expectation and dispersion of two-dimensional random sequences, obtaining linear estimation of norm of meteorological elements minimizing rms error 14 p2327 A66-28222

Positional coordinates of spacecraft determined by algorithm, using distance from three predetermined points as found by rangefinders 15 p2447 A66-28505

Existence and uniqueness of optimum algorithms proven for application to transformation of potential fields 15 p2483 A66-28667

Algorithm for SHF diagnostics of plane-laminar plasma 15 p2549 A66-28669

Algorithms for numerical determination of asymptotically stable solutions for ordinary differential equations 15 p2526 A66-28734

Optimum algorithm derived for making binary decisions in decision systems of hierarchical structure 15 p2469 A66-29054

Spatial problems in gas dynamics solved by difference methods, discussing supersonic flow 15 p2423 A66-29174

Algorithm from orthogonalization method for obtaining generalized inverse of matrix 15 p2529 A66-29847

Unstable behavior of nonlinear discretization algorithms when perturbation of computation exceeded threshold value 16 p2731 A66-30237

Test system for  $n$ -digit combinative comparison unit realizing special, previously described algorithm 16 p2656 A66-30765

Duality theory of optimal control and resulting duality correspondence between formulation of optimal control and calculus of variations, noting decomposition algorithm 16 p2671 A66-31229

Numerical differentiation by differential quotients, interpolations, Richardson-Romberg algorithm and other methods, including analysis of approximation errors 16 p2658 A66-31347

Inversion of correlation matrices used to obtain simple numerical algorithms and in construction of self-adjustment algorithms 18 p3073 A66-34999

Probe and edge theorems for nonlinear optimization algorithms using stored-program computers 19 p3309 A66-35873

Computer algorithm for geometric programming methods 19 p3309 A66-35874

Gomory all-integer linear programming algorithm based on lexicographical ordering principle and relation to cost function 19 p3309 A66-35876

Algorithm for learning without external supervision and application to learning control systems 19 p3333 A66-36666

Algorithm based on sequential optimization of nonlinear control system 19 p3334 A66-36676

Control algorithms for microminiaturized sampled data digital control systems 19 p3311 A66-36822

Control algorithms synthesis for analytical adaptive control systems with nonlinear plants investigated with hybrid computer 20 p3536 A66-36876

Algorithm used in circuit design, evaluating equivalent strain at critical point of airframe structure, verifying it during fatigue tests 20 p3665 A66-36880

Algorithm for rapid damping of multidimensional system 20 p3670 A66-37675

Dynamic programming for optimal algorithm for external control in presence of noise at system input and output 20 p3538 A66-37746

Computation of adjusted coordinates of artificial Earth satellites on basis of synchronous observations made at two known points on Earth surface 20 p3654 A66-37840

Computer algorithm for recognition and extraction of planar graph from incidence matrix 20 p3523 A66-38279

Algorithms for digital computation of vectors and eigenvalues of matrix 21 p3823 A66-38564

High-speed multiplication for R-11 microminiaturized digital computer, using modified form of Booth algorithm 21 p3707 A66-38676

Symbolic factoring of multivariate polynomial with integer coefficients, noting application of Kronecker method and techniques of implementation 21 p3708 A66-38681

No-gimbal system mechanizations evaluated by flight test and compared for advantages, noting system error 21 p3764 A66-38851

Moments of output coordinates of nonlinear system determined by algorithm based on approximation method, noting application to automatic control system 21 p3758 A66-39283

Iterative algorithms for calculating sum of some series, considering gamma and theta functions 21 p3758 A66-39368

DIVIC /digital variable increment computer/ for solving hyperbolic-navigation problems, examining computational algorithms 22 p3945 A66-40335

Algorithms for numerical determination of asymptotically stable solutions for ordinary differential equations 22 p3939 A66-40442

Algorithm construction for processing of telemetry data in determination of space vehicle trajectories, applying dynamic filtering method 22 p3980 A66-40463

Minimization of logical functions in normal disjunctive form, using Gavrilova method and ALGOL 60 algorithm 22 p3941 A66-40541

Functional analysis applied to optimum control by reduction of variational problem to finite dimensional analysis and calculation of algorithms for use with digital

High activity of alkali metal salts of  
carboxylic acids and substituted phenols as  
synergists for arylamine antioxidants in  
ester-type synthetic lubricating  
oils 11 p1711 A66-23123  
Design and construction of probe  
measuring density of neutral atoms in  
quiescent alkali metal magnetoplasma,  
noting vacuum system, electric circuitry,  
etc 12 p1884 A66-24984  
MHD nuclear electric space power systems  
using noble gases seeded with alkali metal  
vapors as working fluid 13 p1998 A66-25526  
Ionizing collisions between alkali metal  
atoms and gas molecules, with measured  
cross sections applied to physics of atomic  
collisions 13 p2131 A66-25966  
Charge exchange cross section increase  
during single collisions of alkali-metal ions  
with atoms of inert gases and atomic  
hydrogen and nitrogen  
molecules 14 p2336 A66-27155  
Effective excitation cross sections of alkali  
metal atoms during collision with slow  
electrons 15 p2543 A66-28529  
Ionization of inert-gas atoms and of  
hydrogen and nitrogen molecules by alkali  
metal ions of energies greater than 1 to 30  
keV 15 p2548 A66-29881  
Nucleate boiling instability of alkali metals  
noting effects of surface material, chemical  
treatment, heat flux and cavity geometry  
[ASME PAPER 65-HT-22] 16 p2828 A66-30986  
Color centers in alkali metal azides, noting  
change of ion from linear to bent  
configuration 16 p2777 A66-31023  
Dissociation energies of chlorides of  
alkaline-earth metals determined from  
equilibrium reactions of metals with

- chlorine in flames 16 p2830 A66-31617  
Ionization of low temperature supersonic  
plasma jets, noting kinetics of elementary  
processes, gas dynamic parameters and  
effects of combustion and alkali metal  
admixtures 18 p3143 A66-34030  
Electron excitation in germanium by alkali  
metal ions, noting effect on electrical  
conductivity 19 p3440 A66-35760  
Oxygen role in oxidation/reduction  
reaction and polyoxide formation  
mechanisms associated with refractory metal  
corrosion by liquid alkali  
metals 19 p3383 A66-36133  
Welding and annealing procedures for  
fabrication of Nb alloy liquid metal loop and  
operation in boiling alkali  
metals 19 p3370 A66-36130  
Carbon dioxide decomposition and oxygen  
reclamation by chemical reaction with  
electrochemically reduced  
lithium 19 p3292 A66-36230  
Loss rate comparison for alkali plasma  
produced by contact ionization in stellarator  
and toroidal device with minimum mean-  
properties 19 p3428 A66-36588  
Density of lithium, sodium and potassium  
up to 1600 degrees C, using pycnometric  
method, showing dependence of density on  
temperature 20 p3582 A66-36970  
Ultrahigh vacuum optical measurements of  
mirrorlike surfaces of Na, K, Rb and Cs  
prepared in ultrahigh vacuum in wavelength  
region from 3000 to 25,000  
angstroms 20 p3613 A66-37277  
Optical absorption of K, Cs and  
Na 20 p3613 A66-37277  
Charge exchange of protons in alkali metal  
vapors with formation of highly excited  
hydrogen atoms, noting cross section  
reaction mechanism, etc 22 p3953 A66-39760  
Radiation induced chemical decomposition  
in inorganic solids such as alkali metals and  
metallic sulfates 23 p4111 A66-41211  
Optimum seed concentrations of alkali  
metal in rare gas for maximum  
electroconductivity of slightly ionized  
nonequilibrium plasma 23 p4104 A66-41511  
Charge exchange cross section increase  
during single collisions of alkali-metal ions  
with atoms of inert gases and atomic  
hydrogen and nitrogen  
molecules 24 p4239 A66-42970

 Proton and alpha particle effects on thermal properties of spacecraft and solar concentrator coatings of anodic-coated aluminum, zinc oxide/ potassium silicate, etc [AIAA PAPER 65-649] 01 p0090 A66-10230  
 Recombination radiation in gallium arsenide due to alpha particles 04 p0565 A66-14269  
 Solar cosmic ray generation, discussing proton energy spectrum analysis and wave propagation in interplanetary space 05 p0751 A66-15374  
 Flux of alpha component of primary cosmic radiation determined at top of atmosphere, using nuclear emulsion stack exposed near geomagnetic equator 05 p0756 A66-15529  
 Electron energy diffusion in superconducting thin Sn and In films bombarded by alpha particles observed in terms of IR drop 06 p0927 A66-16755  
 Effectiveness of measurements of X-ray

diffraction intensities as probe of lattice defects introduced in perfect germanium crystals by energetic particle irradiation 06 p0933 A66-17121  
 High speed gross alpha autoradiographic technique to reduce exposure time if silver activated ZnS is used as intensifier 07 p1030 A66-17235  
 Low temperature alpha radiation and subsequent isothermal recovery effects on electron structure of gold, relating resulting failures to Frenkel defects 07 p1048 A66-17303  
 Intensity of cosmic ray alpha particles on July 16, 1959 when counting rates of neutron monitors were near absolute minimum value 07 p1124 A66-17997  
 Measurement of energy required to form one hole-electron pair in gallium phosphide by alpha particles 07 p1107 A66-18407  
 Pulse heights produced when argon, nitrogen and argon-nitrogen mixtures completely stop alpha particles 09 p1405 A66-20680  
 Alpha particle and X-radiation ionizing effects on cerebral astroglial cells and blood vessels of young rats 10 p1487 A66-22020  
 Parameters of dynamic modulation determined from measurements of proton and alpha particle spectra, used in cosmic-ray modulation in interplanetary space 11 p1762 A66-22411  
 Directional intensity and decay time of scintillations from anthracene and p-terphenyl single crystals under alpha particle bombardment 11 p1750 A66-22465  
 Light output of alpha particles in crystalline and vapor anthracene as function of pressure and temperature 14 p2296 A66-27796  
 Riometer absorption caused by solar protons and alpha particles in monoenergetic intensities and in spectral distributions 15 p2574 A66-28818  
 High energy primary cosmic radiation research at Bristol, England, including energy spectra for nuclear interactions, nuclear emulsion stack measurements, alpha production, etc 15 p2583 A66-29550  
 Energy spectra of atmospheric alpha rays at balloon altitude and of alpha rays from graphite nuclear interactions 15 p2583 A66-29551  
 Solar flare analysis by examination of high energy gamma rays, noting solar proton and solar material interaction, energy spectrum, generation of fast protons and alpha particles, etc 15 p2592 A66-30076  
 Alpha emitter actinide element application as heat source for isotopic generators, discussing safety precautions required, economy, etc 18 p3134 A66-34056  
 Angular distributions of elastic and inelastic alpha-particle scattering in even tin isotopes, using 40 mev alpha beam 18 p3138 A66-34166  
 Energy characteristics of 11-year cosmic ray variations, evaluating electromagnetic conditions in interplanetary space for proton, alpha particle and electron variations in energy 18 p3176 A66-34752  
 Electrons, hydrogen and helium nuclei of cosmic radiation as observed in 1964 at average residual pressure of 2.4 mb compared with 1.8 mb obtained in 1963 18 p3187 A66-34819  
 Solar modulation of galactic protons and helium nuclei from 1963 to 1965 18 p3188 A66-34821  
 Balloon-borne Cerenkov scintillation counter for measurements of primary proton and helium spectra and modulations 18 p3188 A66-34822  
 Helium nuclei flux at top of atmosphere shows independence of solar activity 18 p3189 A66-34825  
 Energy spectrum of primary helium nuclei at energies greater than 6 gev 18 p3189 A66-34826  
 Differential rigidity spectrum of alpha particles for R less than 2.5 gv at solar minimum 18 p3189 A66-34827  
 Solar cosmic ray alpha particle relation to PCA and lowest latitude of enhanced ionization 20 p3635 A66-38224  
 Artificial radiation belt sources, noting positrons and alpha particles, nuclear

explosion, etc 20 p3643 A66-38333

 MGD DC crossed field plasma accelerator capable of operating on LF AC current 08 p1262 A66-18822  
 Tunnel junction RF modes driven by AC Josephson current 09 p1417 A66-20033  
 Linear theory of alternating current fluctuations in MHD channel subject to Hall instability of Velikhov 09 p1333 A66-20399  
 Single probe method for measuring semiconductor resistivity, using alternating current, noting tests with germanium and silicon samples 11 p1705 A66-22599  
 Equivalent circuit for cycloconverter valve for AC and DC outputs, noting data on voltage drops 12 p1804 A66-24655  
 Superconductors for mixed AC-DC power transmission and thermal dissipation effect 13 p2030 A66-25217  
 Circuit with single externally driven switch, operated at fundamental frequency gives efficient conversion of DC to AC at that frequency or any specified harmonic circuit 17 p2848 A66-31811  
 Transport of AC disturbance /emission/ noise/ on electron beams magnetically compressed in microwave tubes, deriving power flow invariants 17 p2878 A66-31811  
 Alternating current losses in type I superconductor, showing dependence of magnitude and direction of local magnetic field and transport current 19 p3439 A66-35722  
 Conducting nonmagnetic circular cylinder supported on magnetic field produced by alternating current 19 p3324 A66-35722  
 Measurement of physical quantity converted to form of AC signal, noting ripple-free circuit and several clamping arrangements 21 p3709 A66-38600  
 AC losses and magnetic field aberration associated with use of high-field superconducting wire in adiabatic demagnetization apparatus 21 p3804 A66-39399  
 Electron effective mobility variation in Al for small signals as function of operating frequency of thin film transistors and dielectric diodes 24 p4181 A66-42389

**ALTERNATING CURRENT GENERATOR**  
 Transverse current MHD conduction generators for AC power generation 04 p0459 A66-13466  
 Alternating current thermionic power diode with magnetic regeneration 18 p3163 A66-33811  
 Electrical power control and conditioning subsystem for Manned Orbital Research Laboratory /MORL/, noting Brayton cycle system optimization, alternator and frequency converter selection 20 p3497 A66-37155  
 Cylindrical induction type MHD AC power generator analyzed in terms of cylindrical geometry, neglecting end effects 23 p4017 A66-41588

**ALTIMETER**  
**SA RADAR ALTIMETER**  
**SA RADIO ALTIMETER**  
 Altimetry methods reviewed for altitude in 40,000 to 80,000 ft range, noting calibration and instrument accuracy 02 p0231 A66-11986  
 Accurate and economical determination of static system position errors in pressure altimetry systems by trail cone technique 07 p1034 A66-17776  
 Internal friction and vertical separation effects on airways and traffic control at high altitude deviation in barometric altimeters 08 p1249 A66-18669  
 Pulse-radar altimeter for Saturn launch vehicle incorporating molecular and monolithic integrated circuits 08 p1225 A66-19522  
 Inertial techniques extended to height measurement in supersonic aircraft by simple computing addition to main navigation platform 09 p1400 A66-20422  
 Pressure sensing techniques applied to altimetry in supersonic aircraft 09 p1381 A66-20422  
 Geoscience information acquisition by

- radar return studied by means of terrain target scattering coefficients 14 p2244 A66-28407
- /scatometry/ 14 p2244 A66-28407
- Psychophysiological study of compensatory tracking on digital altimeter display and on combined digital and scale-and-pointer display 17 p2869 A66-33448
- Barometric instrument development and description of counter-pointer altimeter and airspeed indicator 23 p4067 A66-41164
- ALTITUDE**
- SA FLIGHT ALTITUDE**
- SA HIGH ALTITUDE**
- SA LOW ALTITUDE**
- Effect of altitude and camera field-of-view at various degrees on geographic orientation and error in target position, using TV data 08 p1225 A66-19531
- Altitude distribution of combinations of meridional gradients of pressure, temperature and density 19 p3393 A66-35394
- Altitude of lower cloud boundary functional correlation with atmospheric parameters obtained from numerical weather forecast 20 p3593 A66-38366
- ALTITUDE ACCLIMATIZATION**
- Lifetime high altitude environment effect on man, noting Peruvian natives adaptation to constant hypoxia 22 p3854 A66-40112
- ALTITUDE CONTROL**
- Vertice, navigation system for vertical plane control 07 p1069 A66-17716
- Altitude control for VTOL aircraft facilitates control of hovering flight, noting construction, operation principles and performance 10 p1484 A66-21379
- Instrumentation of Polish gliders including altimeters, rate-of-climb, turn and air speed indicators, magnetic compasses, artificial horizon, etc 12 p1882 A66-24386
- Vertice, navigation system for vertical plane control 13 p2125 A66-25863
- Approximate atmospheric entry trajectories on cylindrical planet, noting minor circle turn maneuver and bank angle schedule 21 p3811 A66-38705
- ALTITUDE SIMULATION**
- Design and operation of test stands for ELDO rocket engines under simulated high altitude conditions 10 p1519 A66-21384
- Estimation of starting pressure ratio of axisymmetric ejector-diffuser systems for rocket altitude simulation 10 p1481 A66-21933
- Altitude simulator for adjustment and calibration of high altitude meteorological instruments 14 p2325 A66-27279
- ALTITUDE TEST**
- SA HIGH ALTITUDE TESTING**
- Altitude distribution of atmospheric molecular and atomic hydrogen, showing results of Lyman alpha absorption measurements 17 p2919 A66-32995
- ALTITUDE TOLERANCE**
- Ability of airmen to withstand exposure to supersonic transport 05 p0627 A66-15000
- Altitude effect on metabolic rates of deer mice, noting direct relationship between seasons and metabolic rate at all ambient temperatures 20 p3506 A66-37365
- ALUMINATE**
- Optical absorption spectra of cobalt ion in magnesium aluminate crystal 20 p3621 A66-37822
- ALUMINIZATION**
- Coating of titanium with aluminum and silicon by immersion of titanium samples in molten aluminum or in aluminum/silicon melts 10 p1547 A66-21749
- Plane shock wave compressions of cylindrical and wedge-shaped specimens used to obtain shock Hugoniot of two unreacted, composite and double-base aluminumized propellants 12 p1934 A66-23589
- ALUMINUM**
- SA POWDERED ALUMINUM**
- Aluminum honeycomb sandwich structures under axial compressive loading in reliability safety margin analysis, using derived statistical strength data 01 p0145 A66-10086
- Increased aluminum panel acoustic resistance due to combination of surface treatment and mylar gasket-universal head mounting technique 01 p0149 A66-10144
- Luminous phenomena and electron emission discontinuity in aluminum thin film tunnel diodes 01 p0119 A66-10392
- Aluminum cold cathodes with single mode 6328 angstrom helium-neon gas laser lifetimes exceeding 3000 hours 01 p0043 A66-10855
- Stress criterion for crack growth obtained by testing aluminum sheets with transverse machined cracks 01 p0156 A66-10919
- Radiative recombination in thin film structures observing characteristic of aluminum 01 p0127 A66-11089
- Wide wedge penetration into thick aluminum target, noting adiabatic heating and softening 02 p0300 A66-11854
- Phonon spectra in aluminum single crystals investigated by means of inelastic scattering of slow neutrons 02 p0277 A66-12083
- Thermal resistance across aluminum bolted joints in vacuum environment [ASME PAPER 65-HT-53] 05 p0785 A66-14759
- Techniques of joining aluminum to stainless steel for space vehicle application [SAE PAPER 650754] 05 p0701 A66-15002
- Aluminum diffusion bonding for fabrication of Apollo cold plates, noting alternate bonding techniques 05 p0687 A66-15007
- Fatigue test of 1000 aluminum specimens in order to assess accuracy with which lower tail of probability distribution of failure curve fits experimental results 05 p0774 A66-15056
- Elastic impact and perforation of aluminum plates at minimal velocities by projectiles 05 p0775 A66-15299
- Waves in bars of mechanically unstable materials discussing differential equation of motion, jump conditions, wave velocity and application to annealed aluminum [ASME PAPER 65-WA/APM-22] 05 p0778 A66-15444
- Thin metal diaphragms in shock tubes, discussing bursting characteristics and petalling behavior [ASME PAPER 65-WA/MET-16] 05 p0661 A66-15683
- Metal ignition and combustion of aluminum and beryllium [AIAA PAPER 65-103] 05 p0793 A66-15782
- Neutron activation and cesium-aluminum sputtering in oxygenated gas atmosphere [AIAA PAPER 66-77] 06 p0913 A66-17103
- Microhardness changes in polycrystalline aluminum irradiated by alpha, beta and neutron particles 07 p1092 A66-17305
- Sodium and aluminum content in Pribram meteor measured and compared with other fallen meteorites 07 p1135 A66-17639
- Heat resistance and tensile strength of aluminum filament wire compared to ordinary wire 07 p1049 A66-17869
- Leigh theory concerning effect of electron concentration on elasticity of Al and Al alloys compared with experiment 07 p1053 A66-18520
- Quenched-in vacancy data estimated by analysis of quenched-in resistivity in zone-refined aluminum 08 p1240 A66-19062
- Isothermal annealing effect on internal friction and Young modulus of cold-rolled aluminum with different purities 08 p1240 A66-19088
- Spontaneous ignition of mixtures of aluminum trimethyl and oxygen shows ignition boundary as function of partial pressures of reactants 08 p1321 A66-19801
- Yield stress dependence on strain rates in annealed steel and aluminum subjected to ball-indentation tests 08 p1315 A66-19803
- Influence of crystal-lattice defects on Youngs modulus and damping constant of aluminum 09 p1388 A66-19980
- Magnetic field dependence of microwave surface impedance of superconducting aluminum 09 p1418 A66-20024
- Effect of static magnetic field on millimeter wave absorption in superconducting aluminum at reduced temperature 09 p1416 A66-20025
- Welding characteristics of Ti-7Al-2Cu-1Ta plate including strength, toughness and cracking resistance 11 p1717 A66-22863
- Vacuum effect on fatigue life of aluminum under constant stress cyclic bending deformation 11 p1717 A66-22995
- Magnesium fluoride overcoated aluminum mirrors, discussing thickness monitoring techniques by vacuum UV reflectance measurements 11 p1737 A66-23430
- Surface pit formation in aluminum, discussing effects of vacuum, quenching high temperature and repeated cycling 12 p1897 A66-24921
- Effect of conventional ammunition on aluminum honeycomb paneling, noting reduction of load-bearing and peel-strength properties 13 p2196 A66-25599
- Solar concentrator fabrication for space power conversion systems, emphasizing stretch-formed aluminum method [AIAA PAPER 64-731] 13 p2006 A66-26637
- Crystallization sequences in alkali aluminogermanate glass 14 p2318 A66-26947
- Aerospace application of aluminum and its alloys 14 p2313 A66-27012
- Elastic anisotropic deformation of thin polycrystalline condensed films of Al, Ag and Ni 14 p2359 A66-27184
- High purity aluminum strain rate effects with cold working 14 p2316 A66-27782
- Surface area and condition and effect on adhesion of aluminum plates 14 p2304 A66-28206
- Temperature dependence of Hall emf and electrical resistance of Sendust type Fe-Si-Al alloys 15 p2560 A66-28678
- Heat transfer coefficients between layers of thin film structure on niobium and aluminum substrates at liquid helium temperature 15 p2816 A66-28763
- Spherical substrate converted to parabolic mirror by selective evaporation of aluminum, using silver as nonuniform thickness layer 15 p2499 A66-28841
- Electron-spin paramagnetism effect on critical field of thin aluminum superconductor films 16 p2769 A66-30169
- Laser beam energy profile determined by multiple-layer aluminum foil technique 16 p2719 A66-31217
- Sputtering of aluminum thin films prepared by bell-jar vacuum systems /getter sputtering and standard diode/ for electronic application 16 p2783 A66-31423
- Modes of elastic wave propagation and orientation dependence of dislocation damping in aluminum 16 p2821 A66-31452
- Temperature dependence of magnetization and resistivity in SHF magnesium-aluminum ferrite 16 p2786 A66-31677
- Adhesive bonding of aluminum structures including aircraft and space applications 17 p3023 A66-32266
- Explosive forming process for deep aluminum shells, discussing limits and failure 17 p2930 A66-33091
- Inelastic buckling strength of aluminum columns, plates and beams in compression and in shear 17 p3032 A66-33434
- Waves in bars of mechanically unstable materials, discussing differential equation of motion, jump conditions, wave velocity and application to annealed aluminum [ASME PAPER 65-WA/APM-22] 18 p3247 A66-33571
- Use of balanced filter pairs for nondispersive analysis of aluminum and silicon in aluminum-silicon mixtures 18 p3063 A66-33693
- Metal combustion in porous plug configuration for application to solid propellants, noting aluminum porous plug fabrication [WSCI 66-7] 18 p3161 A66-34420
- Water vapor effects on burning rate of aluminum and magnesium wires at atmospheric pressure [WSCI 66-4] 18 p3264 A66-34421
- Time-resolved spectra of single titanium or aluminum particles burning in laminar gas flow recorded by optically fast slitless spectrograph [WSCI 66-5] 18 p3264 A66-34427
- Singularities of temperature dependence of electric resistivity of aluminum at helium temperatures 19 p3382 A66-36072
- Grain boundary migration in pure aluminum and lead under reversed torsional and bending stresses at elevated temperatures 19 p3386 A66-36365
- High temperature fatigue in pure lead and aluminum observed continuously by microscopic cinecamera combined with fatigue machine 19 p3386 A66-36366
- Optical absorption edges with nearly parallel bands of aluminum analyzed for all polyvalent metals with simple

structures 19 p3401 A66-36391  
Yield strength anisotropy due to preferred orientation estimated by Taylor model, considering cold rolled aluminum 20 p3585 A66-37784  
Shock propagation and attenuation in porous graphite and aluminum foams, noting effects of particle shape and size on materials response to shock loading 20 p3588 A66-38407  
Thin film transmission electron microscopic analysis of stress corrosion of heat-treated aluminum 21 p3749 A66-38471  
Transmission electron microscopy on polycrystalline Al, determining hardening and tensile yield stress variations as function of quenching temperature 21 p3753 A66-39586  
Aluminum foil and plastic film compared for wrapping aerospace hardware for moisture-vapor protection 22 p3922 A66-40038  
Neutron activation investigation of cesium ion sputtering of Al in rarefied oxygen atmosphere 22 p3950 A66-40082  
Deformation of aluminum single crystals during constant load tensile test 22 p3935 A66-40201  
Temperature homogenization effect on structure of industrial aluminum, determining mechanical properties dependency on Fe/Si ratio 23 p4081 A66-41403  
Fatigue behavior of aluminum reinforced with stainless steel wires, considering effects of fiber volume fraction and interfacial bond 23 p4081 A66-41661  
Fatigue testing machine shear strain measurements near cracks on Al flat plate surfaces by observing birefringence 23 p4147 A66-41997  
Effect of chemical attachment in boundary lubrication of aluminum thrust washer using 1-cetene and cetane 24 p4217 A66-42700  
Elastic anisotropic deformation of thin polycrystalline condensed films of Al, Ag and Ni 24 p4257 A66-42732

## ALUMINUM ALLOY

Thermal and microscopic analysis and determination of microhardness, electrical conductivity and emf in titanium-aluminum-oxygen ternary system 01 p0087 A66-10659  
Light alloys for engineering application in armor plates, aerospace and nuclear fields, noting aluminum alloy properties 02 p0244 A66-11745  
Aging characteristics of Al-Zn-Mg alloys 03 p0381 A66-12722  
Zinc effect on mechanical properties and microstructure of Al-Si-Cr-Mg alloy 03 p0382 A66-12724  
Nonconservative motion of jogged screw dislocations in high temperature deformation of Al-Mg alloys 03 p0382 A66-12937  
Effect of aluminum on stability and kinetic decomposition of beta phase in Ti-Mo-Mn alloys 03 p0384 A66-13169  
Effect of varying percentages of constituent elements in alumina dispersion-strengthened copper-nickel alloys, listing creep rupture properties 04 p0534 A66-13378  
Fracture toughness of X7000-series aluminum alloy plate weldments 05 p0686 A66-14695  
Cold deformability of alpha-titanium alloys during strip rolling, showing temperature increase of incipient recrystallization of titanium-aluminum alloys 05 p0699 A66-14699  
Metal inert gas and tungsten inert gas welding of 2014-T6 aluminum noting advantages, structures, weld strengths, etc 05 p0688 A66-15186  
Mean strain cumulative damage and effect in low cycle fatigue of 2024-T351 aluminum alloy, covering strain cycling, fatigue life, residual ductility, etc [ASME PAPER 65-WA/MET-5] 05 p0703 A66-15690  
Plane strain fracture toughness of high strength aluminum alloys measuring techniques and relevant metallurgical factors [ASME PAPER 64-WA/MET-11] 06 p0895 A66-16209  
Selective separation of nickel titanium and nickel aluminum alloys and electrochemical behavior in various electrolytes 06 p0896 A66-16542  
Aluminum alloy surface flaw detection, discussing finishing process methods and

parameters for improving penetrant response 06 p0887 A66-16798  
Aluminum alloy butt fusion welds, discussing ghost lack of fusion phenomenon mechanism, characteristics and causes 06 p0887 A66-16800  
Chemical milling techniques, particularly for aluminum alloys, comprising surface preparation, chemical etching and finishing 06 p0888 A66-17074  
Creep tests to verify validity of coincident axis and constancy of volume postulates of Alcoa 1100-0 aluminum alloy 06 p0968 A66-17178  
Text on die, permanent mold, shell and other processes for casting aluminum and aluminum alloys 07 p1047 A66-17214  
Text on aluminum metal and its alloys, stressing connecting links between classical metallurgy, physics of metals and industrial research 07 p1048 A66-17253  
Torsional fatigue induced slip bands and crack initiation in aluminum-zinc-magnesium alloy at room temperature to 250 degrees C 07 p1048 A66-17485  
Materials for extreme temperature and g loading during suborbital, manned and superorbital reentry 07 p1051 A66-18303  
Transmission electron microscopy structural analysis of dislocations in stress-corrosion cracking of 7075 aluminum alloy 08 p1236 A66-18761  
Aluminum-beryllium base alloys, noting problems of application as construction materials 08 p1239 A66-18904  
Aluminum alloys, tensile properties and testing 08 p1241 A66-19715  
Strain distribution in tensile deformation of aluminum alloy coated with gridded Prussian blue coating 08 p1241 A66-19716  
Elongation and yield strength of wrought aluminum alloys as affected by gauge length and offset in tension and compression tests 08 p1242 A66-19717  
Notch toughness of aluminum alloy sheet and plate with machine-edge and fatigue-cracked notches investigated according to ASTM practice 08 p1242 A66-19718  
Low-temperature mechanical properties and fracture toughness of commercial and extra-low-interstitial grade Ti-6Al-4V-2Sn 08 p1242 A66-19719  
Temperature change effect on cumulative fatigue damage on 24S-T3 aluminum alloy and type 301 stainless steel 08 p1242 A66-19720  
Extensometer system and specimen alignment fixture for cylindrical or flat creep specimens 09 p1465 A66-19949  
Microstructures of rapidly solidified aluminum-chromium-silicon alloys 09 p1389 A66-20804  
Quench aging, heat treatment which rationalizes role of vacancy-solute atom association and effect on precipitation hardening aluminum alloys 10 p1545 A66-21218  
Oxygen and water vapor effects on propagation of fatigue cracks in aluminum alloy sheets 10 p1614 A66-21338  
X-ray determination of elastic constant of pure nickel and alloy with aluminum 10 p1547 A66-21982  
Aging of Cu-Ti alloy stimulated by Al additions to 2 percent and retarded by Al additions of 2 to 4 percent 12 p1892 A66-23521  
Phase determination by electron-probe X-ray microanalysis of nickel aluminide self-bonding coating produced by flame-spraying 12 p1892 A66-23560  
Mechanical properties of butt welded joints in high-strength aluminum alloy sheet, noting tensile strength, welding techniques and test results 12 p1893 A66-23708  
AC resistivity profiles through anodic oxide films on Al and Al alloys 12 p1895 A66-24392  
Aluminum alloy with various metal additions analyzed for aging, using electron microscope 12 p1898 A66-25022  
Kinetics of two-phase decomposition of solid solution of magnesium-aluminum alloy, using X-ray analysis, noting grain orientation and size 12 p1898 A66-25027  
Mechanical property evaluation and reproducibility in six heats of commercial Be-Al alloy 13 p2108 A66-25769

Shot peening for resistance to stress corrosion cracking of high strength steel and aluminum alloys and to improve fatigue life of landing gears, wing spars, jet engine components and other structural parts 13 p2196 A66-25777  
Aging behavior of explosively deformed 2219 Al investigated by transmission electron microscopy 13 p2086 A66-25777  
Fracture characteristics of welds in aluminum alloys evaluated by tear and notch tensile tests 13 p2197 A66-25777  
Metals for liquid propellant rocket system in terms of environments in which performance is required 13 p2109 A66-25777  
Effect of corrosive and surface active media on fatigue strength of aluminum alloys widely used in aircraft construction 13 p2109 A66-25888  
Plastic deformation effects on preage, aluminum-copper alloy structure subjected to 40-75 percent compression 13 p2110 A66-25968  
X-ray method determining diameter of Guinier-Preston I zones and fraction of copper atoms contained in such zones in Al-Cu alloys 13 p2111 A66-26588  
Aging behavior of rods produced by extrusion of manganese-containing aluminum alloy subjected to solution heat treatment, noting microstructure and mechanical properties 13 p2111 A66-26588  
Domain boundaries and superdislocations of structure of Alnico V by thin film electron transmission microscopy 14 p2311 A66-26888  
Section size effect on room-temperature notch strength of H-11 steel, 2014-T6 and 7075-T6 aluminum alloys and Plexiglas [ASME PAPER 66-MET-4] 14 p2312 A66-26977  
Texture and anisotropic age hardening to improve mechanical properties of AlMgSi alloys 14 p2313 A66-27011  
Variation of LN 29546 test for determination of susceptibility of aluminum alloy sheet to coarse grain formation 14 p2313 A66-27011  
Strength of screw-connected aluminum alloys, noting screw grades, coatings, thread inserts required, etc 14 p2301 A66-27255  
Mathematical analysis of relationship between weld strength, maximum temperature and time at temperature of type 2219 aluminum 14 p2302 A66-27344  
Elastoplastic properties of copper, aluminum alloys and brass under explosive load, noting increased temperature effect on elastoplastic wave parameters 14 p2314 A66-27377  
Aging of aluminum alloy after quenching and strain hardening, noting Vicker hardness tests, tensile tests, precipitation phases, shearing effect, etc [PST PAPER 423] 14 p2315 A66-27466  
Creep buckling of column subjected to arbitrary temperature distribution along column, considering aluminum alloy 14 p2403 A66-27997  
Chemical composition effect on fracture properties of Al-Zn-Mg-Cu alloys 14 p2317 A66-28000  
Explosive deformation effect on stress corrosion and mechanical properties of 707 aluminum alloy 14 p2317 A66-28011  
Axially loaded cylindrical structure analyzed for optimum weight construction consistent with cost constraint, emphasizing beryllium-aluminum alloys 14 p2406 A66-28202  
Temperature of container heated during pressing aluminum alloy sections 14 p2304 A66-28202  
Precleaning treatment and coating effect on fatigue strengths of aluminum alloys 15 p2521 A66-29007  
Densities of wrought aluminum alloy computed from rule of mixtures and metallurgical phenomena and compared with observed densities 15 p2522 A66-29007  
Aluminum screw coupling resistance to stresses as affected by profile, thread depth, and composition 15 p2509 A66-29111  
Mechanical properties of Ti-Al-Mo-Zr-Si alloy as affected by varying cooling rate after heat treatment 15 p2523 A66-29191  
Electron microscope investigation of dislocation effect on stress corrosion cracking in aluminum alloy 15 p2523 A66-29411

Hot drape forming of torus and semitoroidal bulkhead segments from aluminum alloys 15 p2511 A66-29831  
 [SAE PAPER 660290] 15 p2511 A66-29831  
 Free energy of aluminum alloy containing two-dimensional Guinier-Preston zones of copper atoms 16 p2722 A66-30307  
 Trace element effect on lifetime of iron-chromium-aluminum heat-resisting alloy 16 p2723 A66-30311  
 Welding of aluminum alloy for S-IC stage of Saturn-Apollo space vehicle 16 p2713 A66-30592  
 Kinetics of natural aging process of Al-4 percent Cu alloy, experiments indicate addition of up to 1.0 percent Mg proportionately slows down aging process 16 p2723 A66-30871  
 Critical stress, stability loss and load carrying capacity of axially compressed thin walled aluminum alloy 16 p2819 A66-31142  
 Estimation of creep in Ti-Al-V alloys by high temperature bending method 16 p2724 A66-31237  
 Alloying elements effect on aluminum corrosion over wide pH range in water, alkali and 0.1N solutions of anions 16 p2725 A66-31392  
 Discoloration in contamination area of aluminum bonds in integrated circuits, noting cause and effect on interconnection bond integrity 16 p2665 A66-31434  
 Vibrational and static plastic deformation effect on structure of 40KhNMA steel and VD 17 aluminum alloy 16 p2728 A66-31800  
 Various heat treat tempers of 2014 Al alloy and corresponding values of eddy current 17 p2940 A66-33099  
 Polycrystalline nickel aluminide lightly deformed at 77, 298 and 900 degrees K exhibit fine slip band structure with mostly screw dislocations 18 p3121 A66-33747  
 Hardness and lattice parameter increase effect on oxidation temperature of internally oxidized Ag-Mg and Ag-Al alloys 18 p3122 A66-33750  
 Characteristic microstresses in plastically deformed iron and aluminum alloy under tensile testing studied by X-ray techniques 19 p3376 A66-35400  
 Specific heat and thermal conductivity of metals at cryogenic temperatures 19 p3381 A66-35849  
 X-ray determination of elastic constant of pure nickel and alloy with aluminum 19 p3381 A66-35864  
 Nickel aluminide structure, examining arrangement of Ti, Cr and W in lattice via X-ray spectroscopy 19 p3381 A66-35928  
 High strength weldable Al alloys with good cryogenic toughness, stress-corrosion cracking resistance and tensile strength 20 p3582 A66-37091  
 Effects of aging temperature and duration on strength, elongation, yield stress, plasticity and electrical conductivity of Al-Zn-Mg and Al-Zn-Mg-Cu alloys 20 p3585 A66-37698  
 Shear mode fatigue fracture in aluminum alloys studied, using fractography, metallography and Laue back reflection technique 20 p3586 A66-37800  
 High strength aluminum alloys, evaluating tensile strength, toughness and stress-corrosion resistance 21 p3751 A66-39234  
 High strength aluminum alloys manufacturing and service experience, fracture characteristics and tables on composition ranges of various alloys 21 p3751 A66-39235  
 Titanium-rich end of Ti-Al solid solution equilibrium diagram 22 p3934 A66-39781  
 Alloys and processes for Titan booster system fabrication, noting mechanical properties and behavior of welded joints 22 p3924 A66-40260  
 Electron beam welding outside of vacuum, discussing performance and tolerance parameters 22 p3924 A66-40261  
 Gas mixtures evaluation for MIG welding aluminum alloy noting nondestructive, mechanical and stress corrosion testing 22 p3925 A66-40266  
 Grain boundary cavity growth in Al-Cu alloy during compressive creep testing 22 p3935 A66-40291  
 Corrosion fatigue strength of duralumin in

presence of stress concentrators, noting parameters of resistance and alloy properties 22 p3935 A66-40679  
 Book on aluminum alloys covering mechanical properties, contact welding, manufacturing, cold deformation, etc 22 p3936 A66-40876  
 Structural, mechanical and corrosion properties of aluminum alloy of various compositions 22 p3936 A66-40877  
 Heat resistance of coarse- and fine-grained D20 aluminum alloy 22 p3936 A66-40878  
 Effect of technological factors on quality of semifinished pressed products of aluminum alloy 22 p3936 A66-40879  
 Spot and seam welding processes effect on behavior of aluminum alloy 22 p3928 A66-40880  
 Mechanical properties of semifinished products, welds and machined sections of high strength V92Ts aluminum alloy 22 p3936 A66-40883  
 Mechanical properties, coefficient of linear expansion and microstructure of aluminum-based sintered-powder alloy containing silicon and nickel 22 p3937 A66-40884  
 Susceptibility to cold deformation of semifinished B95-2 Al-Zn-Mg-Cu alloy products, noting machinability in manufacturing of parts 22 p3928 A66-40885  
 Manufacturing of semifinished pressed products of AD31 Al-Mg-Si alloy, examining coarse-grained structure occurring after hardening and machining 22 p3928 A66-40886  
 Residual stress, crack propagation and fatigue fracture mechanisms in Al alloy sheets with fatigue cracks, for use in wing panels [ICAS PAPER 66-34] 23 p4137 A66-41007  
 Effect of titanium, zirconium, vanadium and cerium additions on properties and macrostructure of aluminum alloy tested in cast and heat treated states 23 p4080 A66-41271  
 Effect of manganese and zirconium additions on recrystallization temperature and grain size of aluminum alloys 23 p4081 A66-41404  
 Nozzle for special small rocket motor, noting weight, construction material and performance 23 p4121 A66-41422  
 Aluminum alloy tube for combustion chamber of Japanese SSR, noting mechanical properties, temperature effects, etc 23 p4081 A66-41424  
 Aluminum and titanium alloys, composite materials and nonmetallic materials for supersonic transports and VTOL aircraft noting intakes, nozzles and variable-geometry wings [ICAS PAPER 66-1] 23 p4016 A66-41932  
 Cold-drawing effect on creep behavior of nickel-aluminum alloy at various temperatures through changes in fracture, precipitates and structure 24 p4227 A66-42309  
 Section size effect on room temperature notch strength of H-11 steel, 2014-T6 and 7075-T6 aluminum alloys and Plexiglas [ASME PAPER 66-MET-4] 24 p4228 A66-42581  
 Vibrational creep of Al alloy at normal temperature, noting plastic deformation magnitudes creep limit equations, etc 24 p4228 A66-42864  
**ALUMINUM ANTIMONIDE**  
 Stoichiometric thin films of AlSb prepared by coevaporation of elements onto glass substrates held at 550 degrees C 02 p0270 A66-11436  
 Weak-field magnetoresistance and impurity activation energy in n-type aluminum antimonide single crystal 08 p1275 A66-19363  
 Thin aluminum antimonide film fabrication for photoelectric cell application 09 p1359 A66-20927  
 Uniaxial compression and hydrostatic pressure effect on piezoresistance and piezo-Hall effects in n-and p-type AlSb 17 p2984 A66-33153  
 Galvanomagnetic effects in p-type aluminum antimonide, discussing field dependence of Hall effect and magnetoresistance 21 p3801 A66-38999  
**ALUMINUM CARBIDE**  
 Aluminum carbide thermodynamic properties over large temperature interval calculated from low-temperature heat capacity and high-temperature relative

enthalpy 04 p0536 A66-13832  
**ALUMINUM COMPOUND**  
 Complex permittivity and permeability of lithium aluminum ferrite in cavity resonator determined, using perturbation theory 01 p0123 A66-10590  
 Aluminum nitrate powder maser doped with ferric ions operation in X-band without external DC magnetic field 02 p0239 A66-11374  
 Thermal diffuse elastic electron scattering in polycrystalline Al foil, using retarding field apparatus 05 p0736 A66-14980  
 Premixed flames of trimethylaluminum vapors and oxygen stabilized at reduced pressure, analyzing stability region, burning velocity and emission spectrum 08 p1318 A66-19199  
 X-ray spectral analysis of chemical bond structure in aluminum semiconductor compounds 08 p1274 A66-19311  
 Plasma oscillation of electrons in aluminum compound eutectoids studied, using energy analysis of electrons passed through thin foil of eutectoid, noting dependency of oscillation energy on component grain size 09 p1429 A66-20843  
 Preparation of aluminum difluoramide from trimethylamine alane and difluoramine 13 p2018 A66-26501  
 Growth of single crystal and polycrystalline thin films of magnesium aluminum oxide and magnesium iron oxide, discussing techniques employed, results, etc 17 p2982 A66-33061  
 Aluminum welding, examining internal defects such as porosity and metallurgical changes in heat effected zone [SAE PAPER 660292] 18 p3117 A66-34944  
 Aluminide-ductile binder composite alloys containing high volume of nickel-aluminum compounds and CoAl prepared by powder blending and hot extrusion 20 p3585 A66-37783  
 Solid state maser oscillator operating in zero field configuration, using ferric ion substituted as impurity in aluminum nitrate host crystal 24 p4221 A66-42551  
**ALUMINUM FLUORIDE**  
 Oxyfluorides relationship to basic aluminic fluorides, discussing difficulties and formation 18 p3064 A66-33928  
**ALUMINUM HYDRIDE**  
**SA LITHIUM ALUMINUM HYDRIDE**  
 Rates and stoichiometry of reaction of aluminum hydride in tetrahydrofuran at zero degrees with selected organic compounds containing representative functional groups 13 p2018 A66-26500  
**ALUMINUM NITRIDE**  
 Aluminum nitride coatings on graphite deposited by introduction of plasma-generating gas into electric arc between tungsten cathode and aluminum filament anode 09 p1392 A66-20149  
 Synthesis conditions for materials of B-Al-N system determined by sintering mixtures of BN plus Al and AlN plus B powder in nitrogen atmosphere 11 p1720 A66-23473  
 Voltage dependence of barrier height in Al-AlN-Mg tunnel junction 13 p2170 A66-26596  
 Aluminum nitride coatings on graphite deposited by introduction of plasma-generating gas into electric arc between tungsten cathode and aluminum filament anode 21 p3754 A66-39419  
**ALUMINUM OXIDE**  
 Deformation resistance and stability dependence of strain-induced distortions in nickel alloys on various aluminum oxide distributions 01 p0087 A66-10749  
 IR-active lattice vibrational spectra of alpha-aluminum oxide and chromium oxide analyzed by reflection and transmission measurements 03 p0380 A66-12341  
 Dielectric relaxation effects, dissipation factor peak and capacitance and conductivity dispersions in pure and doped sapphire single crystals 03 p0409 A66-12638  
 Temperature dependence of Mie scattering, covering absorption and scattering of electromagnetic radiation on spherical aluminum oxide particles 05 p0718 A66-14917  
 Low work function collector with Ba-covered thin aluminum trioxide film electrodes for high efficiency thermionic converters 05 p0621 A66-15575

Manganese oxide effect on kinetics and mechanics of sintering of alumina powder compacts 08 p1243 A66-18774

Model derived describing oxide particle distribution obtained from internal burning cylindrically-perforated aluminized solid propellant grains

[AIAA PAPER 65-10] 08 p1282 A66-19137

X-ray spectral analysis of chemical bond structure in aluminum semiconductor compounds 08 p1274 A66-19311

Tunnel and Schottky in aluminum oxide thin film element 09 p1426 A66-20193

Silicone alumina low temperature low-pressure plastic molding technique for precision forming of ceramic materials for aerospace structural application 10 p1538 A66-21130

Economic process for vapor phase formation of refractory fibers and whiskers using hydrogen, carbon dioxide, carbon monoxide and chlorine source gases [AICE PREPRINT 18A] 10 p1548 A66-21183

Measured thermal conductivities of magnesium oxide, aluminum oxide and zirconium oxide powders 10 p1546 A66-21538

Theoretical expression for thermal conductivities of magnesium oxide, aluminum oxide and zirconium oxide powder 10 p1546 A66-21539

Internal photoemission measurements show potential barrier profile in thin anodically formed aluminum oxide films between metal electrodes 10 p1509 A66-21541

Low temperature chromatographic separation of hydrogen isotopes based on interaction with alumina surface electric fields 11 p1650 A66-23209

Vapor phase process to form aluminum oxide whiskers on nuclei suspended in reacting gas stream 12 p1896 A66-24468

Aluminum oxide inclusions effect on radioactive cobalt 60 autodiffusion observed, noting higher diffusion in samples prepared by powder methods 13 p2110 A66-25964

Voltage dependence of barrier heights in aluminum-aluminum oxide-aluminum tunnel diodes at room and liquid-nitrogen temperatures 13 p2170 A66-26595

Electron energy distribution for emission from aluminum-aluminum oxide-gold thin films 14 p2257 A66-27943

Forging and hot working of SAP samples containing 6-10 percent aluminum oxide 14 p2303 A66-28192

Variations in amount and composition of oxide phase during sintering of compacted aluminum powder, determining aluminum oxide in SAP products 14 p2303 A66-28195

Hardening and softening of nickel-alumina alloys 15 p2519 A66-28533

Photovoltage of aluminum-aluminum oxide-aluminum thin film sandwich with aluminum oxide layer of 60 angstroms measured as function of wavelength and incident light intensity 16 p2778 A66-31076

Hardness and microstructure of sintered alloys of molybdenum with oxides of aluminum and zirconium obtained by powder metallurgy methods 17 p2939 A66-32394

Transmittance of optical materials between 1050 and 3000 angstroms, noting effect of simulated high energy space environment 17 p2979 A66-32615

Dynamic Jahn-Teller effect in excited state vanadium doped aluminum oxide 17 p2981 A66-32717

Combustion behavior of aluminum-ferric oxide thermite with aluminum oxide additions used as combustion model for involatile condensed systems 18 p3259 A66-33718

Deformation resistance and stability dependence of strain-induced distortions in nickel alloys on various aluminum oxide distributions 18 p3124 A66-34983

Alumina high temperature gas discharge tube for investigation of pulsed metal vapor laser oscillations 19 p3374 A66-35810

Factors affecting strength of whisker reinforced metals, noting characteristics [ASME PAPER 66-MD-81] 21 p3750 A66-38504

Thermocompression bonding, discussing aluminum wire connection to substrate material via eyelet bond 23 p4044 A66-41197

Absorption cross section, scattering cross section and angular scattering distribution

of solid alumina particles emitted in homogeneous solid propellant rocket plume 24 p4294 A66-42778

Vacuum furnace for studying high temperature fracture of ceramic materials, noting tests on polycrystalline aluminum oxide 24 p4192 A66-43220

**ALUMINUM 26**

Determination of constancy of cosmic radiation and of terrestrial and cosmic ages of ferrous meteorites by radioactivity of Al 26 and Be 10 20 p3651 A66-37411

**AMBIPOLAR DIFFUSION**

Ambipolar diffusion and electron attachment in photoionized nitric oxide by presence of negative ions, noting electron loss and electron density 03 p0394 A66-12326

Ambipolar diffusion and electron-ion recombination coefficients dependence on electron temperature in afterglow of neon plasmas 04 p0554 A66-14294

Effects of variable ionic mobility on current collection by cylindrical body and of fringing electric field on sheath size, noting role of diffusion 05 p0722 A66-14724

Ambipolar diffusion in magnetic field showing plasma equations of momentum-transfer yield unambiguous steady state solutions 05 p0669 A66-14943

Martian ionospheric observations made by Mariner IV interpreted in terms of model show atmosphere consists mainly of carbon dioxide, low temperature and no thermosphere 06 p0953 A66-16404

Time dependent ambipolar diffusion waves, solving electron density equation 07 p1088 A66-17951

Electron conservation equation and effects of laminar or turbulent flow on breakdown in gases 08 p1206 A66-18933

Ambipolar diffusion parameter calculation by Quinn and Nisbet found erroneous for night F layer 08 p1219 A66-19420

Sounding rocket-released artificial strontium and barium ion cloud motion in upper atmosphere, based on equations of ambipolar diffusion 15 p2491 A66-29950

Ambipolar diffusion of plasma cloud imbedded in ionized gas with homogeneous magnetic field, assuming electric current is not vanishing 15 p2494 A66-30045

Ambipolar potential in magnetoactive cold plasma applied to power generation and effects of electric field on diffusion coefficient 17 p2973 A66-32984

Magnitude of vertical drifts in F-region during high and low sunspot years, considering effect of ambipolar diffusion along geomagnetic lines of force 19 p3347 A66-35923

**AMIDASE**

Dipeptidyl-beta-naphthylamidase activated by chloride in extracts of rat and bovine anterior pituitary glands 13 p2010 A66-25900

**AMIDE**

**SA POLYAMIDE**

Dipeptidyl arylamidase I of bovine pituitary tissue and chloride and sulphydryl activation of seryltyrosyl-beta-naphthylamide hydrolysis 17 p2861 A66-32899

Alpha-chloro alkanoyl valine methyl esters analyzed, finding that diastereoisomeric pairs separation by gas-liquid chromatography can assess steric conditions around amide bond 17 p2871 A66-32932

Cyclomethylenetrinitramine-hexamethylphosphortriamide complex preparation 20 p3627 A66-38416

**AMINE**

**SA AMPHETAMINE**

**SA CATECHOLAMINE**

**SA CYSTEAMINE**

**SA DIFLUORAMINE**

**SA HEXAMETHYLENETETRAMINE**

**SA NITROAMINE**

Crystal and molecular structure of chlorotetraamine /sulfur dioxide/ ruthenium chloride 06 p0820 A66-15939

High sensitivity optical resolution of amine diastereoisomers by gas liquid chromatography 17 p2869 A66-31873

**AMINO ACID**

**SA ASPARTIC ACID**

**SA GLYCINE**

**SA PROTEIN**

**SA TRYPTOPHAN**

Thermal stability to racemization and

resolution of several racemic amino acid diastereomeric derivatives by gas chromatography 01 p0021 A66-1060

Relation of earliest proteins to protocol with tabulated comparison of key properties of acid proteinoids and protein 04 p0461 A66-1336

Total optical resolution of DL-alpha amino acids from supersaturated aqueous solution by seeding with pure crystals of L-or D isomers of amino acid 04 p0473 A66-1345

Amino acid genetic code in which ion sequences in DNA spell out instruction transcribed into RNA and subsequently into proteins 11 p1644 A66-2271

Amino acids dissolved in saline water removed by ligand exchange chromatography 11 p1650 A66-2312

Behavior of synthetic polyribonucleotide in cell-free amino-acid-incorporating system from E coli, noting release of polypeptide chains into supernatant fraction 12 p1805 A66-2353

Crystalline lactic dehydrogenases in reaction with p-hydroxymercuribenzoate 13 p2009 A66-2579

Paleogenetic study of ferredoxin structure reconstructing evolution from amino acid sequence 14 p2228 A66-2781

Structural and functional properties of heart and muscle type subunits of lactate dehydrogenases investigated, using comparative amino acid analysis 15 p2446 A66-2886

Gas chromatography for resolution and separation of racemic amino acids as TFA sec-butanol ester derivatives applied to protein analysis 15 p2446 A66-2886

Pasteur Probe assay of asymmetry of D, amino acids in detection of Martia life 15 p2447 A66-3002

Synthesis of alpha-amino acid l-menthyl esters under mild conditions, using alpha-amino acid N-carboxy anhydride /NCA/ and l-menthol 16 p2646 A66-3118

Resolution method for DL-amino-acids via menthyl ester derivatives and gas-liquid chromatographic analysis of crystalline products 17 p2869 A66-3187

Amino acid content of carbonaceous and noncarbonaceous chondrites and possible origins 17 p2850 A66-3208

Amino acid, peptides and spherule obtained from sparking in closed atmosphere of ammonia, methane, hydrogen and water 17 p2851 A66-3208

Thermal synthesis of amino acids from methane-ammonia-water mixture passing through Earth-crust materials 17 p2851 A66-3208

Thermal polycondensation of free amino acids with polyphosphoric acid 17 p2852 A66-3209

Molecular biology noting hemoglobin an enzyme cytochrome evolution, amino acid code, ribonucleic acid, etc 17 p2853 A66-3210

Ribonucleoside triphosphatase in rabbit reticulocytes, discussing distribution in extracts, behavior in purification of amino acid and properties 17 p2859 A66-3255

Corticosterone injection in rats, assaying amino acid incorporation into liver microsomal and cell-sap protein 17 p2860 A66-3255

Repetitions in polypeptide sequence of cytochromes 18 p3059 A66-3419

Simulation of organismic morphology and behavior by synthetic poly-alpha-amino acids 19 p3284 A66-3557

Amino-acid-sequence determination in peptides using N-fatty acids, mass spectra of peptide derivatives and computer techniques 20 p3510 A66-3705

Gas liquid chromatography resolution of racemic hydroxy and beta-mercapto-amino acids involving suitable derivation of functional group 20 p3510 A66-3760

Optical resolution and absolute configuration of trans-beta-phenylglycidic acid 21 p3702 A66-3844

Stereoselective synthesis of optically active amino acids from menthyl esters and alpha keto acids 23 p4032 A66-4137

**AMMONIA**

**SA LIQUID AMMONIA**

Discrepancy among derived temperatures for cloud tops of Jupiter and Saturn and

expected value for model in simple equilibrium with solar radiation attributed to presence of ammonia 04 p0579 A66-14180

Thermal conductivity of liquid and gaseous ammonia between 20 and 177 degrees C and 1 to 500 atm 05 p0744 A66-15464

Stress-corrosion cracking, rate of weight loss and surface condition of 70-30 copper zinc alloy in concentrated aqueous ammonia 07 p1053 A66-18519

Temperature dependence of crystalline ammonia elastic moduli 10 p1589 A66-22166

Toxic and lethal effect on mice of ammonia in air, noting biological and physiological changes 15 p2439 A66-29494

Tuning of ammonia beam maser resonator based on frequency shift method, noting hysteresis appearance and elimination 16 p2720 A66-31696

UV radiation effect on decomposition of ammonia ejected in upper atmosphere 17 p3013 A66-33402

Temperature dependence of crystalline ammonia elastic moduli 19 p3441 A66-35780

**AMMONIUM COMPOUND**

Crystal structure of ammonium tricyanomethide determined by X-ray diffraction 04 p0474 A66-13833

HF optical modulator using Pockel effect in ammonium and potassium dihydrophosphate single crystals 06 p0889 A66-15899

**AMMONIUM PERCHLORATE**

Steady state composition mechanism of solid /heterogeneous/ propellants noting linear pyrolysis, exothermal oxidizers, fuels, etc [ONERA TP 240] 02 p0278 A66-11681

Ammonium perchlorate spheres combustion in flowing gaseous fuel similar to conditions in solid rocket combustion, noting diffusion flame significance 03 p0414 A66-13225

Temperature at which predecomposition or decomposition of ammonium perchlorate occurs, changed by perchlorate surface treatment and reflected in burning rate of propellant containing perchlorate [CI PAPER WSCI-65-36] 05 p0744 A66-15151

Theoretical detonation characteristics of ammonium perchlorate-polyurethane solid composite propellants 05 p0744 A66-15781

Ignition of ammonium perchlorate composite propellants by convective heating [AIAA PAPER 66-65] 06 p0941 A66-17101

Linear pyrolysis velocity measuring device for ammonium perchlorate in one-dimensional flow 08 p1279 A66-18723

Binder-oxidizer interaction separation in composite solid propellants containing preirradiated ammonium perchlorate 08 p1279 A66-18825

Combustion of ammonium perchlorate propellants in solid propellant rockets 12 p1978 A66-23965

Combustion of composite ammonium perchlorate based propellants near extinction pressure, noting burning rate parameters 13 p2171 A66-25181

Thermal diffusivity of ammonium perchlorate and sodium chloride powders measured as function of porosity and temperature 14 p2370 A66-27414

Ignition mechanisms of solid composite propellants containing ammonium perchlorate as oxidizer 15 p2569 A66-29308

Combustion rate of ammonium perchlorate-polystyrene and ammonium perchlorate-Plexiglas mixtures related to mixture ratio 18 p3260 A66-33720

Burning rate anomalous dependence on particle size for ammonium perchlorate-polystyrene mixture 20 p3679 A66-37703

Ignition of ammonium perchlorate composite propellants by convective heating [ATAA PAPER 66-65] 21 p3806 A66-38689

Ignition of simulated propellants based on ammonium perchlorate, determining empirical relations 22 p3969 A66-40354

Direct-casting polyurethane-ammonium perchlorate-based composite propellant grain manufacture for small rocket motor, noting inspection methods 23 p4119 A66-41432

Erosive burning in rocket engines of radial burning type, using polyurethane/ammonium perchlorate base propellant grains, examining flow channel 23 p4121 A66-41433

Effect of fuel-binders ingredients and

additives on physicomaterial properties of polyurethane-ammonium perchlorate base propellant grains 23 p4119 A66-41434

Halides used as burning rate depressants on combustion stability of polyurethane/ammonium perchlorate base propellants, examining acoustic instability 23 p4119 A66-41435

Effects of isothermal decomposition of gamma ray irradiated orthorhombic crystals of ammonium perchlorate 24 p4170 A66-42421

Chemical interaction among components of CdO, ZnO and PbO admixtures in ammonium perchlorate, noting effect on thermal decomposition 24 p4295 A66-43200

**AMMONIUM PHOSPHATE**

Absolute measurement of optical-rectification coefficient in ammonium dihydrogen phosphate 12 p1912 A66-23715

Continuous wave measurement of optical nonlinearity of ammonium dihydrogen phosphate, using helium-neon laser 12 p1912 A66-23716

**AMMONIUM PICRATE**

Rocket propellant chemistry covering synthesis, properties and capabilities of organic and inorganic rocket fuels 05 p0743 A66-14675

**AMPHETAMINE**

Effect of amphetamine on signal detectability in vigilance task 01 p0020 A66-10616

**AMPHIBIA****S FROG****AMPLIFICATION****S FLUID AMPLIFICATION****S SOUND AMPLIFICATION****AMPLIFICATION FACTOR**

Amplification factor of semiconductors for direct interband transitions and saturation effect 01 p0124 A66-10766

Current amplification factor decrease and input resistance increase with current decrease in transistor circuits in microregime 02 p0207 A66-11414

Linear coefficient of amplification of carbon dioxide subjected to HF excitation field for laser emission 02 p0241 A66-12003

Light flow amplification in inhomogeneous layer taking nonlinearity into account 05 p0692 A66-14725

Amplification factors and optimum matching conditions calculated for complex capacitive diode frequency converters 07 p1005 A66-17347

Maximum gain condition of resonance amplifier for given passband, determining amplification coefficient 07 p1005 A66-17351

Resonant amplifier stage calculations for realizing given passband width and amplification factor 08 p1193 A66-19107

Coherent amplification coefficients of neon lines in helium-neon mixture 08 p1234 A66-19310

Generalization of Manley-Rowe theorem for case in which one or more pumping generators act on nonlinear reactive element 08 p1197 A66-19603

Slow neutron scintillation counter using photomultiplier with nonactivated dynodes, with low amplification factor to measure very low intensity ion beams 09 p1380 A66-20359

Partial amplification factors of multistage cascade amplifier to determine transmission coefficient of follower 09 p1354 A66-20449

Transistor sawtooth-voltage generators with positive feedback and nonlinear distortions correction by amplification factor control 10 p1511 A66-21679

Amplification factor of semiconductors for direct interband transitions and saturation effect 11 p1748 A66-22277

Single pulse operation of lasers, noting energy storage and amplification effect for four-and three-level active medium 12 p1889 A66-23667

Stable self-adjusting system with single adjustable parameter designed, using inverse model of desired transfer function of closed-loop system in feedback control circuit with large amplification factor 12 p1851 A66-24315

Variation of antenna amplification ratio with distance as function of phase error at antenna aperture with exciter off-focus as error source 13 p2030 A66-25225

Weimer triode with contact rectifier for

use as component of microminiature radio circuits, noting effect of contact rectification on current-voltage characteristics and amplifying power of such triodes 13 p2031 A66-25228

Combined automatic control systems with automatic adjustment of amplification coefficient of disturbance controller for error reduction 13 p2045 A66-25300

Silicon UHF power transistor performance, showing parameters of amplifier gain, power output and impedance 13 p2036 A66-25512

Linear power amplification with switching techniques, using pulse width modulation 13 p2036 A66-25522

Nonlinear quantum effect in solid state lasers using paramagnetic crystals, noting Raman effect and gain dependence on pumping power 13 p2098 A66-26172

Current amplification factor of filamentary transistor with intrinsic-conductance semiconductor base 14 p2255 A66-27751

Measuring modulus and phase angle of transistor current gain 15 p2464 A66-29058

Radial amplification dependence over discharge cross section of He-Ne laser 15 p2515 A66-29208

Regenerative helium-neon laser with amplification coefficient of 1000 15 p2516 A66-29352

Charge control analysis of transistor cut-off frequency, noting current amplification factor, transit time of minority carriers, etc 15 p2468 A66-29889

Dependence of amplification factors on emitter current in p-n-p-n silicon rectifiers 15 p2468 A66-29917

Stability analysis of two types of single-stage amplifiers using Dynistor as active element 15 p2468 A66-29920

Double sideband capacitance and resistance modulation of systems and calculation of noise and amplification factors 16 p2666 A66-31561

Radial amplification dependence over discharge cross section of He-Ne laser 17 p2936 A66-33057

Dual control of plant with random amplification factor as Bayesian problem 18 p3089 A66-33738

Fluid amplifier operation characteristics, noting gain, switching circuits, power jet pressure effects, etc 18 p3054 A66-34128

Beam deflection type proportional fluid amplifier, noting pressure and flow gain parameters, transfer characteristics, etc 18 p3054 A66-34129

Generalization of Manley-Rowe theorem for case in which one or more pumping generators act on nonlinear reactive element 18 p3087 A66-34961

Regenerative helium-neon laser with amplification coefficient of 1000 20 p3576 A66-37357

Single pulse operation of lasers, noting energy storage and amplification effect for four-and three-level active medium 22 p3929 A66-39711

Theoretical static I-V characteristics of surface gate dielectric triode and geometric factors influence on amplification factor at cut-off 22 p3872 A66-39746

Criterion for spatial-amplification or nontransmittance using double Laplace transforms in light of complex values of wave vector 22 p3869 A66-40928

Equations of motion of continuous single loop adaptive control system with scan modulated parameters, noting stability analysis method 24 p4188 A66-42479

Technique for controlling logarithmic amplitude response /LAR/ and regulating logarithmic amplifiers under industrial conditions 01 p0035 A66-10219

Periodic electrostatic focusing scheme for ungridded multicavity klystron amplifier 01 p0044 A66-10932

Price determining factors considered in integrated circuit amplifier for AM receiver 02 p0203 A66-11925

Active RC synthesis using operational amplifier, noting analog computer simulation of transfer function 03 p0339 A66-12434

Equivalent circuits and characteristics of RC amplifier in which source of signal to be amplified, tunnel diode and load are connected in parallel 04 p0497 A66-13918

NEC maser amplifier for radio astronomical observation of Cygnus A, Taurus A and Orion and Omega nebulas 05 p0697 A66-15365

Transfer functions synthesis by passive RC networks with two or three computing amplifiers 06 p0861 A66-16360

Practical stability criterion for tunnel-diode circuit including bias and stabilizing circuits and requiring only plots of modulus of reflection coefficient vs frequency 06 p0858 A66-16986

Noise coefficient of amplifier using microwave modulation-demodulation principle derived by impedance-matrix method 06 p0859 A66-17185

Amplification factors and optimum matching conditions calculated for complex capacitive diode frequency converters 07 p1005 A66-17347

HF pulse rise in high-Q synchronous amplifier with one circuit per stage by approximation method 07 p1009 A66-18069

LF capacitive amplifier taking into account nonlinear-capacitance component which varies with twice heterodyne frequency, proposing equivalent circuits 08 p1193 A66-19108

HF pulse decay in input of slightly detuned multistage synchronous single-circuit amplifier 08 p1198 A66-19737

Harmonic suppression ratios in RF amplifiers calculated, using circuit parameters and applying Fourier transformations 10 p1508 A66-21299

Linear microwave amplification in n-type gallium arsenide bulk semiconductor at room temperature, noting negative conductance and peak gain 10 p1515 A66-22079

Microwave regenerative amplifier using reflex klystron, considering beam current, supply voltages, mismatch, input and output amplitudes, phase lead, etc 11 p1655 A66-22725

Selection of minimum noise temperature for HF amplifiers in SHF receivers 11 p1667 A66-22795

Information recovery from noisy measurements, employing steady quantity measurements, known waveform detection and transfer function evaluation 11 p1656 A66-22825

Circuit design techniques for linear integrated circuits, noting manufacturing methods, achievement of monolithic construction, etc 11 p1670 A66-23243

Noise characteristics, sources and bandwidths of active devices and circuits including transistors, masers, parametric amplifiers, etc, noting causes of noise 12 p1830 A66-23662

Secant correction and dynamic compensation for tracking pedestal servo loop in operational amplifier circuit 12 p1816 A66-24261

Direct-to-home TV broadcasting satellite system for upper UHF, describing

stabilization, thermal control, antenna, power amplifier, etc 12 p1955 A66-24776

[AIAA PAPER 66-309] DC behavior of negative-impedance circuit without internal bias 13 p2045 A66-25201

Noise factor of linear receiving systems in quantum and classical regions, noting role of dual push-pull amplifier and frequency converter 13 p2020 A66-25226

Vibration generator consisting of electrodynamic shake table, control amplifier, drive generator, auxiliary servo equipment and equalization console 13 p2058 A66-25496

Noise and amplification characteristics of millimeter-wave reflex klystron amplifiers 13 p2037 A66-25549

Electron precipitation onto electrodes of quadrupole amplifier and resultant impairment of output current and efficiency 13 p2043 A66-26468

Build-up oscillations in system of two identical parallel-plate capacitors flanking quadrupole capacitor in longitudinal magnetic field 13 p2044 A66-26469

Integrated circuit as exclusive-OR gate or as linear amplifier, using transistor or tunnel diode shunted by resistor 14 p2263 A66-27051

Book on solid state communications and design of equipment using semiconductors 14 p2260 A66-28367

Physical principles in plasma application for amplification and generation of electromagnetic oscillations 16 p2760 A66-30797

Book on nonlinear electron-wave interaction phenomena and application to amplifiers, oscillators and other crossed electric and magnetic field devices 16 p2653 A66-30873

Technique for controlling logarithmic amplitude response /LAR/ and regulating logarithmic amplifiers under industrial conditions 17 p2880 A66-31902

Communication satellite design noting use for educational and commercial purposes, instrumentation applied, etc 17 p2872 A66-31935

Nonlinear operational amplifier with high power switching devices, noting volt-ampere characteristics 18 p3086 A66-34494

Noise coefficient of amplifier using microwave modulation-demodulation principle derived by impedance-matrix method 19 p3314 A66-35543

Microwave power generation and amplification via transistors, noting optimum source and load impedance for microwave transistors under large signal conditions 19 p3319 A66-36166

Single-stage negative resistance reflection amplifier theory based on circuit models for frequency dependent band-limited circulators and broadband negative resistance device 20 p3524 A66-37115

Selection of minimum noise temperature for HF amplifiers in SHF receivers 20 p3525 A66-37132

Time domain characteristics application to pulse amplifier design, noting correlation with results obtained via frequency method 20 p3538 A66-37582

Input admittance, gain and noise performance in dipole antennas with Esaki diodes 20 p3531 A66-37731

Equivalent circuits and characteristics of RC amplifier in which source of signal to be amplified, tunnel diode and load are connected in parallel 20 p3532 A66-37876

Gas laser alignment, obtaining oscillation on three lines of He-Ne laser 22 p3930 A66-39718

Response of automatic gain control amplifier to two narrow-band input signals, examining weak signal suppression and cross-product generation 22 p3875 A66-40059

Slow wave circuit for traveling wave tubes operating in millimeter-wave band, examining attenuator for double-ladder traveling wave amplifier 22 p3877 A66-40187

Microwave regenerative amplifier using reflex klystron, considering beam current, supply voltages, mismatch, input and output amplitudes, phase lead, etc 23 p4045 A66-41463

Low level amplifier for IR receiver for Earth-space IR contrast

study 24 p4180 A66-42341

Multiple large signal theory for TWT amplifiers with restrictive assumptions 24 p4183 A66-42635

### AMPLIFIER DESIGN

Intermodulation effects and rule of thumb for spurious free dynamic range in wideband high sensitivity amplifiers 01 p0044 A66-10929

Parametric amplifier reconstruction by varying capacitance and modulation index while keeping pumping frequency constant 02 p0196 A66-11419

Transistorized LF amplifier design, determining transistor nonlinearity coefficients 02 p0199 A66-11755

Current gain and transconductance of silicon planar transistor for collector currents used in design of DC amplifiers 02 p0200 A66-11886

Thin film integrated wideband amplifier with details on circuit, construction, performance and outline of design process 02 p0202 A66-11916

Long range program on Ubitron TWT amplifier, noting beam synchronism and dispersion characteristics 03 p0338 A66-12433

Harmonic distortion measurements on amplifier stages using vacuum tubes and transistors with antidistortion circuit 03 p0340 A66-12472

Two-stage tuned amplifier design with digital computer 03 p0337 A66-12498

Characteristics of balanced transistor amplifiers with symmetrical directional couplers 03 p0342 A66-12708

Operational amplifier design using normal feedback equations with grounded output voltage for input, discussing frequency response and determination of open-loop gain magnitude 03 p0351 A66-13276

Linear integrated circuits discussing differential and operational amplifiers, development, use, capabilities, new techniques, special designs and reliability 03 p0347 A66-13346

High power wideband RF voltage and power amplifiers covering design, operating characteristics, differences, etc 04 p0494 A66-13683

Fluid state power amplifier discussing design, construction, operation, advantages and limitations 04 p0460 A66-13783

Gain, bandwidth and noise characteristics of UHF parametric amplifier 04 p0498 A66-14042

Automatic gain control circuits, discussing performance and comparing theoretical and experimental results 04 p0501 A66-14408

High performance operational amplifier design, discussing monolithic circuit construction and performance parameters 05 p0642 A66-14563

Microelectronic amplifiers, emphasizing reliability improvement and decreased sensitivity to parameter changes 05 p0643 A66-14564

Octave-broadband tunnel-diode amplifier design with added shunt capacitance and stabilizing circuit 05 p0643 A66-14571

Hyperfrequency parametric amplifier circuit with modulation-demodulation applicable to very rapid pulse transmission 05 p0633 A66-15102

Transistorized common-emitter amplifier design using AC-bypassed emitter resistor to eliminate degeneration effects 06 p0843 A66-16012

HF correction by series induction in transistorized wideband amplifier 06 p0849 A66-16371

Optimal regime for triode amplifier of microwave output 06 p0849 A66-16372

Characteristics of electrochemical cells in which concentration of ionic species in chamber can be varied via applied electrical signal as analog of junction transistor 06 p0852 A66-16632

Paraelectrics as prospective materials for UHF amplifiers with very low noise level 06 p0854 A66-16722

Field effect transistor circuits used to replace bipolar transistors or thermionic devices and action as variable ohmic resistor 06 p0856 A66-16862

Maximum gain condition of resonance amplifier for given passband, determining amplification coefficient 07 p1005 A66-17351

Stability and gain prediction of microwave tunnel diode reflection amplifier, using Smith chart 07 p1007 A66-17508

C-band weather radar AVQ-10 incorporating tunnel diode amplifier and p-i-n solid state protector switch 07 p1008 A66-17711

Proportional axisymmetric fluid-amplifying element, noting operation of three-terminal modulator and application to various amplifiers 07 p0992 A66-18027

Resonant amplifier stage calculations for realizing given passband width and amplification factor 08 p1193 A66-19107

Pulse amplifier with tunnel diode, achieving maximum gain for parallel-connected load and diode 08 p1194 A66-19284

Oscillator design procedure incorporating circuit and equivalent AC model and transfer functions of feedback and amplifier networks 08 p1197 A66-19560

High gain HF transistor amplifier design, considering deviations of device parameters and variations with temperature and bias 08 p1197 A66-19561

Linville technique speeds HF amplifier design, using Smith chart 09 p1351 A66-20165

Papers on fluidics, analyzing digital and fluid amplifier design 09 p1331 A66-20316

Operational pure-fluid amplifier with negative and positive gain designed by electronic principles 09 p1332 A66-20320

Fluid flow and design of fluidic amplifiers, considering flow as two-dimensional and using mathematical solutions 09 p1367 A66-20323

Superregenerative amplifier of backward wave including oscillation spectrum, resonance curve, noise coefficient, etc 09 p1357 A66-20777

One-, two-and three-circuit systems with periodically varying inductance, capacitance and resistance influencing energy transfer, noting application to amplifier design 09 p1363 A66-20782

Superconducting magnet for variable bandwidth traveling wave masers, noting amplifier bandwidth increase via gain reduction 10 p1542 A66-21417

Nonresonant solid state magnetic, semiconductor and dielectric devices, noting operation characteristics, control parameters, etc 10 p1509 A66-21418

Solid state amplifiers using streaming carriers analyzed, noting different role played by collisions when electron stream interacts with TM and TEM waves 10 p1584 A66-22072

Wideband low-level amplifier design and operation 11 p1662 A66-22404

Circuit of two-state pentode resonance amplifier with electronic passband control and slightly varying amplification coefficient 11 p1667 A66-22788

Transistorized power amplifier for CW operation, using switching transistor as key element 12 p1829 A66-23535

Approximate equations for dependence of electron-drift mode over cathode-triode /tetrode/ grid spacing on parameters of UHF triode power amplifier 12 p1830 A66-23733

Klystron and TWT, generating high powers at millimeter wavelengths, combined in single amplifier for radar systems 12 p1839 A66-24614

Monolithic silicon-transistorized integrated amplifier for use as stabilized gain block element in linear circuit 12 p1842 A66-24656

High performance active RC band pass filter design providing for independent adjustment of poles 12 p1843 A66-24675

Matrix methods for design of HF integrated circuit amplifier 12 p1844 A66-24729

Circuit design for high impedance amplifier for control systems, considering input and output impedance and amplifier gain 12 p1844 A66-24731

Integrated circuit selective amplifier for intermediate frequency application, using RC active networks 12 p1846 A66-24915

FET amplifier driving common-emitter bipolar-transistor second stage operated with channel not pinched off 13 p2029 A66-25206

Differential amplifiers using common-collector, isolated and lateral complementary transistor structures, including frequency

response, phase shift, etc 13 p2036 A66-25532

UHF transistor design and performance, noting power gain, stability, low noise figure and correlation between circuit invariants and transistor parameters 13 p2038 A66-25560

High data rate SHF communication receiver for demodulating analog or digital information, noting components 13 p2023 A66-25656

HF correction by series induction in transistorized wideband amplifier 13 p2042 A66-25959

Optimal regime for triode amplifier of microwave output 13 p2042 A66-25961

Band pass characteristics realized by four-layer distributed RC network without series resistance and amplifier scheme used as model for integrated circuits, noting frequency characteristics 13 p2051 A66-26069

Microwave L-band tunnel diode amplifier 14 p2254 A66-27733

Design, power gain and stability of transistorized linear active network HF amplifier 14 p2255 A66-27801

Input and output impedances and gain of hybrid-coil feedback amplifier 14 p2268 A66-28038

HF amplifier design, using two-port theory measurement of Si epitaxial mesa transistor y-parameters, discussing power gain, sensitivity and inherent stability 14 p2261 A66-28372

UHF amplifier design, linear active and coupling networks, loading, admittance-impedance characteristics, etc 14 p2261 A66-28373

Dual transistors for noise and drift reduction in differential direct-coupled amplifier design 14 p2262 A66-28376

Low noise linear amplifier design, noting noise voltage generator-noise current generator and direct noise figure methods 14 p2268 A66-28378

Communications circuit application, examining amplifier, oscillator, mixer converter and transmitter designs 14 p2269 A66-28385

Power conditioning and advanced propulsion system of ionic engine, noting high voltage inverter design and vaporizer heater circuit 14 p2375 A66-28416

Master-graph technique for predicting performance of amplifying and switching systems, using charts which present circuit response to basic step-function inputs 15 p2458 A66-28887

High power sources for millimeter wavelength oscillator and amplifier design 15 p2461 A66-29008

General broadband matching for passive and active 1-port load impedance and application to tunnel diode amplifier 15 p2464 A66-29321

Stability analysis of two types of single-stage amplifiers using Dynistor as active element 15 p2468 A66-29920

Network analysis and amplitude frequency response characteristic of operational amplifier for DC analog computer 16 p2659 A66-30517

Step response of saturating feedback amplifier with single time constant, noting design graph for amplifier gain 16 p2660 A66-30580

Transistorized wideband and pulse type amplifiers for nanosecond frequency range 16 p2664 A66-31357

Fabrication of linear integrated amplifier circuits 16 p2665 A66-31430

Gain-bandwidth product of Hall magnetic amplifier circuits design 16 p2666 A66-31573

X-band strip transmission line tunnel diode amplifier 16 p2667 A66-31648

Microelectronic encoder design problems, considering stability in high gain amplifiers, resistors, capacitors and voltage reference source and low resistance in multiplex switch 17 p2883 A66-32120

Very high input impedance buffer circuit using field effect transistors for voltage sensing in high impedance analog simulator 17 p2886 A66-32381

Solid state transmitter with triggered Si controlled rectifiers /SCRs/ for high power efficiency in LF and ULF bands 17 p2895 A66-33120

Optimum complementary feedback

amplifier design having high input and low output impedances, low noise and stable gain over wide frequency range 18 p3074 A66-33556

Amplifier helping backward diodes as mixers and detectors in microwave systems 18 p3088 A66-35019

Book on analysis and design of transistor circuits including transistor parameters, emitter diode equivalent circuits, FET, amplifiers, noise, etc 18 p3089 A66-35238

Tuning of power amplifiers without standard servoloop and electromechanical variable RF element, for application to transceiver 19 p3324 A66-35515

Gating circuit with MOS transistors for amplifier strobing in low-level signal transmission 19 p3315 A66-35559

Two-stage field effect transistor amplifier with high input resistance and modification of circuit enabling input resistance to be adjusted to infinity 19 p3315 A66-35560

Redundant S band power amplifier achieved through low-loss feedthrough characteristics of QKSL3000 amplitron tube 19 p3316 A66-35682

Parametric amplifier design curves to calculate gain-bandwidth product, noise temperature, pump frequency and idler loading for one-and two-port amplifiers 19 p3319 A66-36031

Black-box approach applied to design of 60-megacycle IF amplifier, considering application of AGC to circuit and design of phase modulator and balanced mixer 19 p3321 A66-36423

Amplifiers using properties of vortex flow confined within flattened cylindrical chamber, considering velocity distribution 19 p3281 A66-36634

Applicability of microelectronic technique to construction of integrated wideband amplifier consisting of symmetrical differential circuit and common-emitter circuit 19 p3323 A66-36818

Circuit of two-state pentode resonance amplifier with electronic passband control and slightly varying amplification coefficient 20 p3525 A66-37128

Quantum paramagnetic traveling wave amplifier using rutile with admixture of chromium and combined with magnet with superconducting coil 20 p3580 A66-37996

Reactance modulation amplifier with semiconductor-diode capacitance analyzed by oscillation theory 21 p3711 A66-38911

Bandpass amplifier design by selecting peak frequencies occurring in active high- and low-pass RC filter sections 21 p3711 A66-39200

Amplifying elements ensuring required dynamic properties of resolving amplifier without calculating entire amplifier circuitry 21 p3712 A66-39252

Superregenerative amplifier of backward wave including oscillation spectrum, resonance curve, noise coefficient, etc 22 p3873 A66-39836

One-, two-and three-circuit systems with periodically varying inductance, capacitance and resistance influencing energy transfer, noting application to amplifier design 22 p3884 A66-39841

Approximate equations for dependence of electron-drift mode over cathode-triode /tetrode/ grid spacing on parameters of UHF triode power amplifier 22 p3875 A66-40076

Scattering parameters for design of HF transistor circuits 22 p3877 A66-40334

HF amplifier design - WESCON, Los Angeles, August 1966 22 p3881 A66-40745

Method of characterization for germanium microwave transistors and circuit design principles for low noise performance 22 p3881 A66-40746

**AMPLITUDE**

**S PULSE AMPLITUDE**

**S SCATTERING AMPLITUDE**

**AMPLITUDE DISTRIBUTION ANALYZER**

Amplitude distribution of pulsed signal envelope at output of narrow band system 02 p0192 A66-12145

Transistorized amplitude discriminator design, operation and test results 05 p0678 A66-15119

Distribution function of zeros in harmonic signals relation to frequency characteristic

of latter undergoing maximum amplitude limitation 07 p1001 A66-17348

Amplitude distributions of radio noise at ELF and VLF related to amplitude distribution of lightning discharges 08 p1184 A66-19403

Amplitude distribution density

measurements of stochastic processes with intensity spectra ranging from 30 cps to 20 kc, using multichannel pulse-height analyzers 12 p1856 A66-24940

Amplitude distribution of pulsed signal envelope at output of narrow band system 14 p2241 A66-28101

Angle of arrival in amplitude-comparison monopulse antenna arrangement including thermal noise as interference and pulsed radar with ideal radar target 23 p4044 A66-41314

**AMPLITUDE MODULATION**

Parametric amplifier reconstruction by varying capacitance and modulation index while keeping pumping frequency constant 02 p0196 A66-11413

Price determining factors considered in integrated circuit amplifier for AM receiver 02 p0203 A66-11925

Psychophysical method measuring effects of several variables on loudness fluctuation of binaural beats when amplitude modulated 05 p0628 A66-15733

Communications and control systems that require faithful transmission of amplitude-modulated signals through linear filters 06 p0823 A66-15964

Yttrium iron garnet filters, noting envelope limiting characteristics for submegacycle range modulating frequencies and response parameters 06 p0845 A66-16089

Helium-neon gas lasers, discussing amplitude variation suppression technique 06 p0892 A66-16670

Shielding effect on modulating microwave ferrite switch in applied magnetic field and relation between inside and outside fields for thin waveguide 06 p0857 A66-16952

Bridge phase modulator with RLC circuit, noting parasitic amplitude modulation elimination 06 p0858 A66-16991

Linear demodulation of AM

electromagnetic wave propagating through dispersive medium 06 p0836 A66-17033

Oscillations in two-circuit parametric oscillator operating on fixed-bias p-n junction 06 p0860 A66-17194

Pulse-amplitude modulator using p-n junction diode for transforming weak input signals by amplifying 07 p1005 A66-17399

Amplitude modulated carrier frequency signal circuit analyzed, showing open loop linear pulse system 07 p1014 A66-17439

Cross modulation in varactor-tuned limiters 08 p1191 A66-18944

AM and FM of transferred electron microwave generators, noting voltage dependence 10 p1515 A66-22094

Semiconductor diode mixer relatively free of modulation distortion and cross modulation 11 p1669 A66-23066

Signal to noise ratio in amplitude-, angle-, and pulse-modulated systems with carrier power exceeding receiver power 12 p1820 A66-24727

Variable premodulation gain to multichannel transmission system for which AM baseband power is proportional to cumulative channel activity, showing improvement of SNR 13 p2020 A66-25151

Optoelectronic amplitude modulator using gallium arsenide diode as carrier source and lead sulfide photoconductor as modulation element 13 p2030 A66-25207

Atmospheric turbulence effects on laser beam propagation, noting beam cross section, phase variation, AM and FM, etc 14 p2235 A66-27035

Models of hybrid AM-PM signal modulated by single sinusoid and having one-sided frequency spectrum described by using MacLaurin series expansions, noting phase relation of sidebands to carrier 14 p2235 A66-27061

Correctors for variations in group propagation time of AM wave transmitted by radio carrier wave, noting circuit analysis for matched and unmatched all-pass IF

filters 14 p2252 A66-27353

Swept frequency antenna gain

measurements, evaluating mismatch losses at feedpoint and obtaining gain-frequency curves 14 p2256 A66-27911

Design and operation of ferrite rectangular waveguide modulator in 5 to 7 gc/s range 14 p2258 A66-27963

Fluorescence lifetime measuring technique employing pulsed or modulated RF discharges applied to emission of second positive and first negative systems of nitrogen 14 p2337 A66-27974

Line width and shifts in molecular spectra of gases, giving general formulas for pressure broadening, phase shift of rotation, amplitude modulation of radiation and rotationally inelastic collisions 16 p2750 A66-30118

Amplitude modulation by transistorized circuits with consideration of sideband slope, signal input resistance and inverse feedback 16 p2654 A66-31029

Energy amplitude detection based on relation between laws describing variation in total energy of oscillation system and variation of modulating function 17 p2888 A66-32706

Resonant frequency change of oscillatory circuit due to nonlinear capacitance of semiconductor diode used as amplitude detector 17 p2898 A66-33523

Simultaneous amplitude-phase modulation of periodic cosmic ray variations, examining properties of satellites produced by these variations for case of true waves 18 p3196 A66-34867

Effect of geomagnetic cavity field on cosmic ray threshold rigidity, using model of cavity field, finding cavity shape produces amplitude in diurnal variation of cosmic ray intensity 18 p3198 A66-34882

Oscillations in two-circuit parametric oscillation operating on fixed-bias p-n junction 19 p3315 A66-35552

Amplitude and phase fluctuations in two-circuit quartz-crystal oscillator with crystal positioned between grid and electron tube cathode 20 p3525 A66-37152

Low-distortion modulation of IR and submillimeter waves, using free-carrier absorption in pair of crossed reverse-biased junction diodes 20 p3528 A66-37452

Semiannual variation in geomagnetic disturbance amplitudes consisting of one-to-one correspondence between average daily amplitude index and solar declination 21 p3732 A66-38635

Amplitude modulation of radiation pulses of two-level paramagnetic maser as affected by inhomogeneous broadening and spinning of resonance line 22 p3929 A66-39652

Light absorption by optically pumped atoms undergoing magnetic resonance, noting modulation amplitudes and modulation frequency limitation for primary interaction 22 p3930 A66-39807

Equations derived for combined single sideband hybrid AM-PM signal 22 p3866 A66-40177

Plasma fluctuation effect on gas laser noise, noting relation between modulation amplitude of light output and frequency noise and oscillation spectrum 23 p4077 A66-41294

AC background in phase of output oscillation of multistage frequency multipliers attributed to presence of HF harmonics in automatic bias circuit 23 p4038 A66-41520

Bridge circuit measurement of phase at UHF and microwave frequencies, examining amplitude modulation and mixer types 24 p4171 A66-42101

AM/PM conversion factor of TWT as function of helix voltage when beam current is varied to keep gain constant 24 p4180 A66-42371

Subsidiary peaks in power spectra of Ci and Kp /magnetic indices/ attributed to amplitude modulation of 27-day components 24 p4201 A66-42607

Edser-Butler band amplitude dependence on modulating effect of interference grating 24 p4212 A66-42819

**AMPLITUDE PROBABILITY ANALYZER**

Amplitude analysis and statistical implications of random data analysis applied

to evaluation of random signals 18 p3135 A66-34498

**AN-22 AIRCRAFT**

Computer flight simulators at Langley discussing Boeing 707 jet, helicopter, air traffic control, orbital rendezvous and docking, lunar navigation and landing 01 p0055 A66-10957

Harmonic analysis on analog computer by method giving very high Q modeling filters 01 p0034 A66-11024

Simulation method for confirming computations of space vehicle motions continuing after firing around gravity center of vehicle 02 p0215 A66-11673

Parameter variation effect on performance of second order maximum effort /bang-bang/ controller, noting optimum system, stability analysis and analog computer study 02 p0207 A66-11790

Optimization of nonlinear control system with random input using analog computer, automatic optimizer and dimensional analysis 02 p0207 A66-11791

Large signal transient response simulation of p-n junction diode using RC analog network 02 p0200 A66-11882

Analog, digital and hybrid computerized systems for investigating problems in aeronautics and astronautics 02 p0193 A66-11894

Linear circuit for degenerate parametric amplification, using analog computer elements 03 p0332 A66-12425

Active RC synthesis using operational amplifier, noting analog computer simulation of transfer function 03 p0339 A66-12434

Emission factor of radiating inhomogeneous layer determined by Abel integral equation from intensity profile, using analog computer 03 p0398 A66-12524

Plasma diode analog, determining behavior of unsteady state series-parallel systems for thermionic reactor control 05 p0615 A66-15537

Fluid state analog-computation technology, and process control computation systems [ASME PAPER 65-WA/PID-11] 05 p0624 A66-15637

Switching surfaces in three-dimensional phase space obtained by analog computer, for optimizing nonlinear control systems 06 p0862 A66-16361

Navigation equipment for civil use based on miniature inertial platform, analog and digital computers, automatic chart display, etc 07 p1067 A66-17689

Two automatic astronomical navigation and tracking systems compared for accuracy and performance in civil aircraft 07 p1070 A66-17722

HF analog computers for representing algebraic and differential systems and solving problems due to loop instability and drift in DC amplifiers 07 p1003 A66-17818

Torsional vibration analog computer and determination of torsional oscillation frequencies in multimass in-line systems 07 p1144 A66-18164

Analog computers used in modeling of heat conduction and diffusion processes for Fourier differential equation 08 p1319 A66-19427

Gradient systems of differential equations for solution of linear and quadratic programming problems on analog computer 08 p1188 A66-19687

Improvement of transient response of third order servosystems by discrete control of system parameters, noting application of switching circuit 09 p1360 A66-19859

Digital application of fluid amplifiers, examining greater precision, accuracy and reliability of digital systems compared to speed of digital systems 09 p1349 A66-20324

Circuit techniques for performing analog pulse arithmetic, using logarithmic p-n junctions on amplitudes of random nuclear pulses 09 p1356 A66-20604

Analog computer techniques applied to find roots of complex functions, to generate complex functions by Cauchy integral theorem and to scan z plane 10 p1507 A66-21698

- Rail-type plasma gun analysis using analog computer for application to space vehicle propulsion 11 p1743 A66-22405
- Book on analog, digital and hybrid analog-digital computers for random process studies 11 p1659 A66-22864
- Electronic analog computer nonlinear function generation by using silicon carbide varistors 11 p1660 A66-23254
- Nonohmic-resistor analog function generator, using output voltage summation of nonlinear combination channels for input range 11 p1660 A66-23255
- Programming procedures for analog computer solution of problems consisting of more than 250 linear and nonlinear computing elements 11 p1660 A66-23324
- Multipurpose chips for reduction of analog computer integrated circuit cost 12 p1834 A66-24101
- Analog computer, programmed on digital computer, used in examination of lumped and distributed parameter models of cardiovascular system 12 p1809 A66-24230
- Real time system for measuring and analyzing meteorological data for computing launch angles for unguided rocket flights [AIAA PAPER 66-336] 12 p1953 A66-24481
- Analog computer analysis of current readout tunnel diode memory cell 12 p1846 A66-24856
- Parameter variations and stability problem in coarse-fine synchro servos leading to expressions for optimum threshold detector setting 13 p2000 A66-25840
- Synthesis problem solution for time domain sensitivity function, noting controller structure, parametric minimization and operative adjustment of parameters 13 p2051 A66-26071
- Analog computer solution of simplified turbulent viscous layer boundary value problem 13 p2064 A66-26370
- Nonlinear gyroscopic system equations solved by analog computer and verified through method of harmonic linearization 14 p2294 A66-27362
- Motion of material point in central force field, reducing problem to solution of boundary value problem based on Pontryagin maximum principle, using analog computers 14 p2245 A66-28286
- Statistical characteristics of number of pulse periods during unaffected operation of analog computer after malfunction 14 p2246 A66-28354
- Schiphol Airport /Amsterdam/ analog computer installation for air traffic control and flight path calculations, with results displayed on automatic flight progress boards 15 p2534 A66-29311
- L/D ratio for gliding recovery of first stage of launch vehicle, using stage separation conditions as parameters 16 p2807 A66-30348
- Functional time-delay device and integration into analog correlator for analysis of autocorrelation and cross-correlation functions of measured system response signals 16 p2676 A66-30445
- Network analysis and amplitude frequency response characteristic of operational amplifier for DC analog computer 16 p2659 A66-30517
- Discrete transfer functions simulated on analog computer by direct currents 16 p2656 A66-30584
- Simulation of controlled diffusion-type Markov processes applied to two stochastic equations related to problem of misadjustment on analog computer 16 p2656 A66-30763
- Method of approximating functions with aid of orthonormal systems and single channel optimization, using analog computer 16 p2656 A66-30764
- Airfoil shape construction by conformal mapping and development of analog computer program to plot two-dimensional potential flow about various airfoil sections 16 p2629 A66-31116
- Analog computer technique for solving nonlinear ODE system 16 p2658 A66-31263
- X-Y plotter for analog computers, analog to digital converters and digital computers 17 p2925 A66-32313
- Noise rejecting algorithms for ODE solutions with computer, using redundancy, placement of control and feedback techniques 17 p2877 A66-32569
- Analog computer and logic circuitry combination for variable frequency signal production, noting application to adaptive control systems 18 p3089 A66-33561
- Parameter variation effect on self-excited torsional oscillations and sustained frictional vibrations in mechanical systems, comparing results with analog computer predictions 18 p3256 A66-34558
- Gradient systems of differential equations for solution of linear and quadratic programming problems on analog computer 18 p3073 A66-34673
- Analog computer solution of high-order optimal control problem, noting application of Pontryagin maximum principle and extension to two-point boundary value problems 19 p3306 A66-35536
- Analog computer method for reconstruction of data distorted by physical system response noise 20 p3627 A66-36888
- Timing and framing synchronization of PCM communication systems using analog techniques, analyzing transient state and jitter 21 p3705 A66-39226
- Selective amplification of signal voltages in analog computers with integrated circuitry 21 p3716 A66-39623
- True height in-line computation of electron density profile from ionograms, using analog computer in real time 22 p3908 A66-39969
- Laplace transformation simulation by analog computer for real and complex values 22 p3870 A66-39996
- Digital filtering system comprising only few integrated circuits and using addershift register combination, compared with analog devices 23 p4067 A66-41168
- Analog computer analysis of input signals effect on time constant, vibration frequency and overshoot ratio of nonlinear control system 23 p4051 A66-41854
- Resistance network analog method determination of carrier density distribution and charge constant in p-n junction for two-dimensional axisymmetric case 23 p4115 A66-41858
- Versatile electric timer possessing six independent timing channels, useful in analog and hybrid computation 24 p4183 A66-42642
- Electromagnetic analog computer for solving Dirichlet and Neumann equations for half-space and associated geophysical problems 24 p4202 A66-42763
- ANALOG DATA**
- Dynamic data /waveforms/ analysis comparing analog with digital methods for speed, costs, flexibility, reliability, etc [SAE PAPER 650818] 01 p0033 A66-10480
- Limitations of communication system transmitting data from analog source obtained, using theorem in Shannon paper on information theory 06 p0828 A66-16115
- Analog message transmission by optimum angle modulation system and rate distortion function deriving mean square error 09 p1360 A66-19923
- Systematic error in processing series of analog data 11 p1707 A66-23058
- Probability distribution data analysis in real time, using delay-line time-compression storage as information source in analog and digital form 12 p1825 A66-23760
- Analog telemetering system, discussing design, transmitter principle, receiver elements, special features and test results 15 p2451 A66-29361
- Analog form data transmission via FM compared to digital form via phase shift keying, noting accuracy, power and bandwidth required, output signal to noise ratios, etc 18 p3067 A66-33902
- Continuous nonlinear recursive filtering based on Markov processes and state-variable concepts for application to optimum analog demodulation 22 p3868 A66-40717
- ANALOG SIMULATION**
- Analog simulation of operations on stochastic matrices using random transitions in automata aided by relay-contact circuits 03 p0350 A66-13037
- Relationship between three symbolic circuit representations of charge-capacitance effects in 4-terminal field effect transistors 04 p0500 A66-14099
- Analog computer simulation of silicon-controlled rectifier applied to cycloconverter 05 p0612 A66-14639
- Analog computer solution to nonlinear dynamic system model of oscillations associated with cavitating inducers and sequence of trend-and-effect of constituent influences [ASME PAPER 65-FE-14] 06 p0870 A66-16210
- Capacitive biasing transducer is electromechanical analog of parametric system 06 p0860 A66-17199
- Discontinuous system investigated, using oscillating circuit governed by second order differential equation 07 p1015 A66-17830
- Mathematical foundations of analog simulation proceeding from Laplace, diffusion and wave equations 08 p1187 A66-18861
- Potential analog synthesis of linear arrays and radiation pattern representation as function of single complex variable 09 p1356 A66-20605
- Laplace transform and analog computation applied to simulation of heat transfer between wall separated fluids, determining transfer functions and frequency responses 09 p1472 A66-20908
- Two-terminal current-controlled negative resistance devices examined, using equivalent circuit, noting stability criterion, frequency response, etc 10 p1513 A66-21860
- Analog simulation of nonlinearly rigid systems for hard and soft elasticity by electrodynamic analogy methods 11 p1779 A66-22236
- Analog simulation of peak smearing in spectrometers in terms of convolution transforms 13 p2084 A66-26751
- Supersonic transport operations, particularly analog computer facility at Langley Research Center and ATC simulator at National Aviation Facilities Experimental Center 15 p2443 A66-28744
- Analog computer simulation of gas turbine engines for control study, discussing steady state performance and transient response data, surge region, maximum acceleration, etc 15 p2570 A66-28852
- Electronic simulation for evaluation of control concepts and system behavior of regenerative gas turbines 15 p2571 A66-28853
- Gas turbine engine analog simulation for acceleration sensing fuel control studies, comparing results with actual engine performance 15 p2571 A66-28855
- Electronic analog magnetic shield simulator /Magsim/ for producing radiation-protective region around space vehicles 16 p2681 A66-30610
- Analog simulation and performance prediction techniques in reliable circuit design and analysis, emphasizing programming procedures using Monte Carlo and worst-case methods 17 p2877 A66-32302
- Very high input impedance buffer circuit using field effect transistors for voltage sensing in high impedance analog simulator 17 p2886 A66-32381
- Digitally computed tables of Chebyshev approximations of Laplace shift operator transfer function enabling analog simulation of time delay systems 18 p3090 A66-34069
- Analog simulation of operations on stochastic matrices using random transitions in automata aided by relay-contact circuits 18 p3073 A66-35000
- Capacitive biasing transducer is electromechanical analog of parametric system 19 p3356 A66-35557
- Difference analog construction for second-order elliptic differential equation in case of rectangular network 19 p3389 A66-35935
- Hover augmentation system /HAS/ design for analog computer helicopter simulation and flight control 21 p3696 A66-38901
- Analog computation of minimum fuel trajectories with soft landings in uniform gravitational field, using Pontryagin maximum principle to reduce two-point BVP with optimal controllers 23 p4133 A66-41618
- ANALOG-TO-DIGITAL CONVERTER**
- SA DIGITAL-TO-ANALOG CONVERTER**
- Analog-digital transformations in detection of microvariations in geomagnetic field 01 p0061 A66-10691
- Analog-to-digital conversion system for

automatic meteorological data collection and transmitting system 02 p0251 A66-11259  
 Digital IF amplifier for thin film radar receiver 02 p0202 A66-11917  
 Fast analog comparator for hybrid computation using wideband DC amplifier with regenerative feedback circuit providing digital output 03 p0337 A66-12573  
 Nonlinear analog-to-digital converter for more constant accuracy 03 p0338 A66-12988  
 Microminiature Loran-C Receiver/Indicator for analog-to-digital conversion, using integrated circuit 10 p1555 A66-22047  
 SCADS, programming system for simulation of combined analog-digital systems 11 p1659 A66-23109  
 Adaptive analog-to-digital converter using level sensing and current switching 11 p1660 A66-23180  
 Analog-digital transformations in detection of microvariations in geomagnetic field 14 p2286 A66-28035  
 Harmonic analysis of accuracy of reproduction in digital form of operators selecting period of time quantization, duration of analog-to-digital conversion, etc 16 p2669 A66-30758  
 X-Y plotter for analog computers, analog to digital converters and digital computers 17 p2925 A66-32313  
 PCM transmission system based on analog data conversion into binary signals, noting use of Shannon decoder for signal demodulation, circuit design and system properties 19 p3306 A66-36655  
 Digital testing techniques for analog systems, describing bomb computer set for Phantom F-4D aircraft 20 p3522 A66-37246  
 Unit for centralizing AC-carrier measurements onboard VTOL Hawker Siddeley P 1127 aircraft 21 p3741 A66-39475

**ANALYTIC FUNCTION**  
 SA COMPLEX VARIABLE  
 SA POWER SERIES  
 Representation of arbitrary functions in region of convergence through Dirichlet series expansion 01 p0096 A66-11185  
 Dirichlet series representation of arbitrary analytical functions in convex region of convergence with complex exponent 01 p0096 A66-11186  
 Theory of weight classes for differentiable functions of many variables, with application to boundary value problems for elliptic equations 02 p0250 A66-12099  
 Nonlinear differential-difference equations of form  $Ly$  equals  $f(y)$  solved by using  $f(y)$  as power series in 03 p0387 A66-12614  
 Extremum problem connected with simultaneous approximations of some functions analyzed by polynomials and derivatives 04 p0540 A66-14467

Extremum problems with asymmetrical supplementary conditions in certain classes of analytical functions 04 p0540 A66-14468  
 Resolution of two fundamental problems of elastostatic plane into complex variables under conditions of analytical limits 05 p0775 A66-15096  
 Representation of analytical periodic Fourier transforms of difference operators by sum of squares 05 p0708 A66-15328  
 Boundaries of convexity of star-shaped functions, order alpha, in open circular region  $/0, 1/$  07 p1059 A66-18098  
 Continuation of certain classes of differentiable functions beyond limits of region 07 p1060 A66-18465  
 Boundary value problems of plane theory of ideally plastic bodies, with analytical solutions 08 p1306 A66-18703  
 Three-dimensional problem of isotropic continuous nonaxisymmetrical body of revolution, applying analytic functions of complex variable 08 p1307 A66-18885  
 Position of singularities of analytic continuation of potential /geophysical/ fields 09 p1373 A66-20480  
 Equations for variation of orbital elements in two-body problem with variable mass solved analytically for various laws of mass loss, noting periodic function of eccentric anomaly 10 p1605 A66-21205  
 Analog computer techniques applied to find roots of complex functions, to generate complex functions by Cauchy integral theorem and to scan  $z$  10 p1507 A66-21693  
 Cauchy problem for two-dimensional Laplace equation in infinite strip 11 p1722 A66-22646  
 Cauchy type integral on hypersphere, defining Cauchy principal values, noting role in theory of functions of complex variables 11 p1724 A66-23366  
 Boundary value problem solutions in meteorology 12 p1905 A66-23664  
 Analytical solution for surfaces with longitudinal curvature of larger magnitude than that considered in early forms of boundary layer theory, noting condition for self-similar solutions, main flow, boundary layer equations, etc 12 p1861 A66-23811  
 Representation of arbitrary functions in region of convergence through Dirichlet series expansion 12 p1903 A66-24018  
 Dirichlet series representation of arbitrary analytical functions in convex region of convergence with complex exponent 12 p1903 A66-24019  
 Strong plane shock produced in Al by hypervelocity impact and late stage equivalence examined, using analytical and graphical solution of method of characteristics and realistic state equation 13 p2194 A66-25061  
 Analytic hyperfunction solution of elliptic equation 13 p2117 A66-25473  
 Approximate analytical solutions for distributed parameter networks with parameters as functions of spatial variable, using differential equation that reduces boundary value problem to Sturm-Liouville system 13 p2120 A66-26068  
 Numerical-analytical method of obtaining periodic solutions to  $T$  systems 14 p2321 A66-27160  
 Exact order of best approximations of analytic functions expressible as generalized gap series in Faber polynomials 14 p2321 A66-27338  
 Determination for piecewise analytic  $F(t)$  of what vectors can be represented by bang-bang control having finite number of discontinuities 15 p2469 A66-28514  
 Parametrically analytic solution of infinite differential equation system 15 p2527 A66-29047  
 Classical analytical mechanics applied to mechanics of continua, noting relation between kinetic-stress functions and Ostrogradskii-Hamilton principle and stress tensor and finite deformation 15 p2539 A66-29148  
 Multidimensional hyperbolic equations of any order with discontinuous coefficients, noting conditions for analytic or continuous solution 16 p2734 A66-30782  
 Approximating values of analytic function in form of power series, when region of

interest is outside convergence domain of series, using numerical methods, noting detached shock problem 16 p2735 A66-30944  
 Representation of analytical periodic Fourier transform of difference operators by sum of squares 16 p2735 A66-30966  
 Normality of analytic functions with multiple values, deriving criteria for meromorphic function 16 p2737 A66-31218  
 Polynomials orthogonal with respect to contours, examining analytic function representation via Fourier series expansion of such polynomials 16 p2738 A66-31409  
 Approximate analytical solution for pitching and rolling motion near resonance of sounding rocket, using nonlinear differential equation [AIAA PAPER 66-463] 16 p2811 A66-31470  
 Rational approximation and differential properties at boundary of analytic functions 16 p2739 A66-31796  
 Analytic continuation of power series with aid of lower triangular matrices 16 p2740 A66-31797  
 Continuous functions with given differential properties on perfect measure set and application to Fourier series 16 p2740 A66-31799  
 Maximum error curves for Lanczos selected point method of polynomial solution to ordinary differential equations, using Chebyshev and Legendre functions 17 p2947 A66-32858  
 Analytic solutions for predicting motion of high-thrust rockets applied in guidance and real-time targeting [AIAA PAPER 66-452] 18 p3226 A66-33648  
 Perturbation theories for equations of celestial mechanics, obtaining analytical solutions in terms of Chebyshev polynomial series [AIAA PAPER 66-534] 18 p3226 A66-33664  
 Orthogonal sets of rational functions on unit circle 18 p3128 A66-34700  
 Reduction of plane thermoelastic problem of anisotropic body to determination of three analytical functions of complex variables, solving temperature stress distribution in anisotropic plate 18 p3258 A66-34702  
 Dynamic systems described by nonlinear differential equations containing analytical functions for random initial conditions 18 p3091 A66-34984  
 Position of singularities of analytic continuation of potential /geophysical/ fields 19 p3345 A66-35498  
 Boundary value problem solutions in meteorology 19 p3394 A66-36194  
 Optimal scanning problem variant with simple analytical solution, determining cessation moment 20 p3537 A66-37110  
 Mean value theorem for curves arising in solution of ordinary differential equation by series method 20 p3590 A66-37525  
 Eigenfunction expansion of analytic linear ordinary differential operators of boundary value problem with normalized irregular disintegrating boundary conditions 20 p3592 A66-38432  
 Eigenvalue problem for Laplace operator for two-dimensional region with boundary composed of piecewise-analytical simple closed curves solved by finite difference method 22 p3938 A66-39901  
 Multidimensional hyperbolic equations of any order with discontinuous coefficients, noting conditions for analytic or continuous solution 22 p3939 A66-40444  
 Mixed boundary value problem of the theory of analytic single-value function 23 p4086 A66-41873  
 Analytical method based on Taylor series to substitute linear control system for nonlinear control system 24 p4188 A66-42482

 Lift force of airfoil section determined for sudden change in angle of attack, analyzing Prandtl vortex positions 03 p0314 A66-12526  
 Relation between angle of attack envelopes and correlation parameter for spinning bodies entering atmosphere at large inclinations 03 p0432 A66-12811  
 Hypersonic airflow at alpha angle of attack about flat wing with shock wave on upstream side attached 94 p0454 A66-13572  
 Flow properties in turbulent near wake of circular and elliptic cones at zero angle of

attack in Mach 6 flow [AIAA PAPER 66-54] 07 p0980 A66-17897  
 Angle of attack, leading edge sweep and thicknesses effects on hypersonic flow field of slender delta wing 08 p1184 A66-19135  
 Impact tube pressure probe response to free molecular rarefied gas flow for arbitrary angle of attack 11 p1692 A66-22939  
 Numerical solution of problem of supersonic flow at angle of attack past arbitrarily smooth conical bodies 12 p1798 A66-24441  
 Aerodynamic characteristics of rectangular plates in hypersonic flow of rarefied gas differing in aspect ratio, thickness and angles of attack, determining maximum lift-drag ratio 12 p1798 A66-24442  
 Ideal gas flow past infinite circular cone at angle of attack, noting finite-difference method for self-similar solution of Prandtl boundary layer equation 14 p2222 A66-28283  
 Direct numerical method for calculation of supersonic inviscid flow about axisymmetric blunt body at large angle of attack [AIAA PAPER 65-24] 15 p2423 A66-29269  
 Pressure effect on cone caused by spike protruding at angles of attack may provide aerodynamic directional control at supersonic speed 16 p2629 A66-31117  
 Experimental prediction theoretical prediction comparisons of pressure distributions, force and stability coefficients for spherically blunt cone at various angles of attack 17 p2839 A66-32473  
 Navy angle of attack system as aid in transition from propeller airplanes to turbojets, emphasizing application to commercial aircraft 17 p2843 A66-32684  
 Oscillatory motion of angle of attack for space vehicles entering Earth atmosphere at hypersonic speeds from satellite orbits 17 p3016 A66-32893  
 Head wave of frictionless flow of real gas past positioned circular cone for small or zero angles of attack 17 p2842 A66-33169  
 Partial differential equations for three-dimensional inviscid flow solved for flow field over blunt body shapes at various angles of attack, for application to Apollo spacecraft [AIAA PAPER 66-413] 18 p3045 A66-33638  
 Nose bluntness and angle of attack effects on hypersonic flow, noting shock wave deflection decrease of minimum possible shock angle, varying specific heat ratio, convective heating, boundary layer transition, etc [AIAA PAPER 66-414] 18 p3046 A66-33639  
 Tangent cone method extended to determine pressure coefficients of yawed circular cones and ogives at angle of attack 18 p3048 A66-33820  
 Structure of flow past bodies with radial cross section in wind tunnel at various Mach numbers and angles of attack, noting position of shock waves 19 p3276 A66-36473  
 Separation of laminar boundary layer of gas flow from cone as function of angle of attack, Mach number, etc 19 p3277 A66-36478  
 Low speed handling with special reference to super stall, emphasizing rate of change of angle of attack and flight trials of BAC 111 and VC10 aircraft 19 p3280 A66-36748  
 Theoretical nonlinear method for calculating aerodynamic forces on low-aspect-ratio wings at high angles of attack and wide range of Mach numbers 20 p3491 A66-36907  
 Instrument for continuous variation of angle of incidence between ion beam and axis of RF quadrupole mass spectrometer from zero to 90 degrees 20 p3561 A66-38174  
 Irreversible trimmed stalls at high angles of attack for aircraft with aft-mounted engine nacelles and high-or T-tails 20 p3496 A66-38255  
 Mass transfer from cone in supersonic flow in tests performed at zero angle of attack, preserving Mangler transformation which transforms flat plate solution to cone 22 p3843 A66-40036  
 Supersonic flow past pointed bodies of revolution at small angles of attack 24 p4157 A66-42611  
**ANGULAR ACCELERATION**  
 Hypoxic hypoxia and hyperventilation effect on nystagmus induced by angular acceleration 03 p0326 A66-13356

Two-axis pedestal tracking limitations in station vicinity such as angular acceleration, velocity and reacquisition capability [ASME PAPER 65-WA/MD-17] 05 p0635 A66-15522  
 Instantaneous center of vector accelerations of free solid body 11 p1736 A66-22848  
 Cardiovascular stress resulting from radial acceleration gradient impeding venous return analyzed by rotation of seated subject about Z axis /Rz/ 12 p1807 A66-25016  
 Interplanetary trajectory adaptive gyrocompass system, discussing orbital angular velocity, angular acceleration, error sensitivity coefficients, error sources, etc 13 p2124 A66-25256  
 Abrupt angular acceleration effect on man, noting physiological responses such as blood pressure, EKG, EEG, cardiovascular, respiratory and nervous reactions, etc 15 p2434 A66-29447  
 Vestibular neuronal response to rotating linear acceleration vectors, noting generation of compensatory ocular nystagmus 17 p2858 A66-32177  
 Manually imposed angular accelerations during weightlessness period of parabolic flight, obtaining electrooculographic recordings for analyzing nystagmic response 19 p3286 A66-36382  
 Elimination of rate gyro angular acceleration error and scale factor sensitivity to wheel speed by integration of output signal 21 p3767 A66-38895  
**ANGULAR CORRELATION**  
 Optical heterodyne system, discussing angular alignment reduction by signal beam focusing to Airy pattern 05 p0695 A66-14912  
 Angular correlation of photons measured for positrons annihilating in normal and superconducting lead without observing any effect on Fermi surface 07 p1109 A66-18440  
 Positron annihilation of single oriented crystals of vanadium silicide, measuring angular correlation between gamma rays for calculation of Fermi surface 09 p1419 A66-20046  
 Gemini noncoherent pulse radar system using interferometer methods for angle information, noting failures of diode capacitor combination and methods of reliability improvement 13 p2035 A66-25508  
 Bolivian Air Shower Joint Experiment /BASJE/ fast-timing methods compared with arrival directions measured in cloud chamber pictures 18 p3210 A66-35123  
 Subshell photoelectron emission in germanium at angle of 90 degrees to converting X radiation determined for two radiation sources using photographic techniques and track counting method 20 p3621 A66-38096  
**ANGULAR DISTRIBUTION**  
 Extension of measurements in Van Allen belt concerning particle equator crossing at given pitch angle between magnetic mirrors, suggesting repulsing force from equator 01 p0132 A66-10495  
 Angular and spectral distribution of outgoing radiation in cloudy atmosphere in spectral range beyond absorption band 01 p0133 A66-10757  
 Angular distribution of diffusely reflected light flux as function of scattering indicatrix, survival probability of light quantum and conditions of medium illumination 04 p0541 A66-13415  
 Rocket measurements of energetic particles discussing electron fluxes, energy spectra, angular distribution and data 05 p0745 A66-14777  
 Rocket measurement of energetic particles discussing proton flux, energy spectra, pitch angular distribution and data 05 p0746 A66-14778  
 Off-specular peaks in directional distribution of reflected thermal radiation as function of angle of incidence, surface roughness and wavelength [ASME PAPER 65-WA/HT-19] 05 p0790 A66-15845  
 Angular distribution of annihilation gamma quanta in CdS single crystals of high and low resistivity 06 p0928 A66-16921  
 Vertical intensity and angular distributions of penetrating cosmic ray muons measured by scintillators, Geiger counters and neon

flash tubes, underground in India 06 p0877 A66-17039

Angular distribution of secondary particles from interactions in nuclear emulsions, determining energy release ratio in electron photon cascade 07 p1113 A66-17541

Energy spectrum shape and absolute abundance of nuclear active particles at low altitude determined, using ionization calorimeter, plotting angular distribution of particles 07 p1115 A66-17551

Angular moments of lateral-angular distribution functions in electromagnetic cascade theory calculated by method of moments 07 p1116 A66-17561

Cathode sputtering theory, explaining sputtering dependence on ion angle of incidence, with application in electromagnetic isotope separators, etc 08 p1257 A66-18695

Measurement of radiation pattern of ruby laser emission for various resonators and operating regimes, noting laser effect on angular half-width values 10 p1544 A66-22028

Angular distribution of stimulated Raman radiation, discussing axial and off-axial Stokes and surface radiation mechanism 13 p2090 A66-25189

Angular and spectral distribution of outgoing radiation in cloudy atmosphere in spectral range beyond absorption band 14 p2285 A66-27856

Distribution of arrival directions of muon-rich air showers, using equatorial and galactic coordinate systems 15 p2579 A66-29524

Structure of air showers, considering muon components and distribution of arrival directions of muon-rich EAS 15 p2580 A66-29530

Arrival directions of large EAS falling in 10 to 80 degree band of north declination, noting angle, azimuth and sidereal time 15 p2580 A66-29532

Cosmic ray intensities underground and energy spectrum of cosmic ray muons at sea level, tabulating depths, operation time, angular distribution, telescope aperture, etc 15 p2587 A66-29572

Angular distribution and energy loss of fast muons 15 p2547 A66-29594

Measurement of radiation pattern of ruby laser emission for various resonators and operating regimes, noting laser effect on angular half-width values 16 p2718 A66-30847

Off-specular peaks in directional distribution of reflected thermal radiation as function of angle of incidence, surface roughness and wavelength [ASME PAPER 65-WA/HT-19] 16 p2828 A66-30989

Angular discrimination improvement in radar beacon systems using null-type antenna superposed on normal directional beam 17 p2872 A66-31957

Electron angular distribution in copper and gold thin films attributed to individual close interaction scattering phenomena 17 p2987 A66-33314

Angular sizes of sources of Jovian radio bursts measured by using interferometers suggest they are produced by diffraction or focusing process in interplanetary space 18 p3237 A66-35083

Azimuthal angular distributions of secondary particles in cosmic jets, discussing shower particles from fireball model 18 p3215 A66-35163

Angular distribution of high-energy jets analyzed by kinematic approach, assuming constant transverse momentum of secondary pions 18 p3217 A66-35178

Angular distribution of secondary particles in multiple production at high energy, noting multiplicity and inelasticity dependence on primary energy 18 p3218 A66-35181

Data on energy and angular distribution of high energy muons, noting detector and structural bursts 18 p3220 A66-35193

Angular distribution and energy spectrum of cosmic particle showers at large zenith angles analyzed, using ionization calorimeter 18 p3220 A66-35196

Vertical intensity and angular distributions of penetrating cosmic ray muons measured underground by scintillators, Geiger counters, etc 18 p3221 A66-35205

Various light nuclei considered as possible solar neutrino detectors, deriving cross sections and angular distributions of electrons 18 p3223 A66-35216

Effect of binding on distribution in angle of charged particles having suffered scattering with lattice atoms 19 p3403 A66-36172

Orbit determination from only angular data spread over large time 19 p3463 A66-36242

Distorted wave calculation from rotational excitation of molecular hydrogen and molecular deuterium in thermal collisions with atomic hydrogen, presenting angular distributions, cross sections, etc 19 p3403 A66-36329

Secondary ions energy spectra dependent on incidence angle of primary ions for varying escape angles, using molybdenum targets 19 p3403 A66-36454

Book on human spatial orientation and effect on behavior 20 p3508 A66-37011

Mass spectrometer used for analysis of spatial distribution of molecular beams, with data on angular distribution of magnesium atom beam 20 p3559 A66-37522

Radiative heat transfer effect on propagation of plane pressure waves in inviscid nonheat-conducting gas applied in theory of angular intensity distribution of integral radiation 20 p3548 A66-38107

Pitch angle diffusion perturbing relativistic electrons in Van Allen zones and violating adiabatic invariants of electron motion, using Fokker-Planck equation 20 p3641 A66-38328

Omnidirectional characteristics of scattering of acoustic waves from statistically rough surfaces, measuring scattering cross section as function of incidence and observation angles 21 p3770 A66-38649

Charged particle and electromagnetic wave interaction with nonequilibrium plasma, noting conversion of transverse into longitudinal waves and angular distribution of scattered radiation 21 p3781 A66-39011

Langmuir electron oscillation behavior in inhomogeneous plasma in magnetic field when applied at angle to oscillation axis 21 p3781 A66-39012

Angular wind wave spectrum of deep ocean and variations in coastal zone, noting data on energy distribution of spectrum 21 p3760 A66-39362

Pitch-angle dependence of first-order Fermi acceleration of particles trapped between shock front and moving magnetic mirror 21 p3776 A66-39564

Angular distribution of Earth outgoing thermal radiation in IR region measured by geophysical rocket 22 p3913 A66-40470

Angular, spectral and geographical distributions of outgoing fluxes of thermal radiation and Earth albedo measured, using Cosmos satellite 22 p3913 A66-40471

Auroral zone electron source properties deduced from electron fluxes, spectrums and angular distributions measured by rocket flown into breakup phase of IBC I aurora 24 p4199 A66-42584

Auroral zone proton-electron anticorrelations, proton angular distributions and electric fields 24 p4199 A66-42585

Angular distribution of secondaries in elementary multiple high energy production event, evaluating expected frequency of asymmetrical showers 24 p4267 A66-42905

Angular and energy distributions of muons produced by interaction of atmospheric neutrinos with matter underground 24 p4270 A66-42933

**ANGULAR MOMENTUM**

Equations of motion for rigid body with fixed point derived by expression of angular velocity 07 p1080 A66-17845

Dynamic calculation for 2 sigma pi resonant system /meson-baryon/ in P 3/2 state, using Balaz type N/D method 08 p1259 A66-19077

Large-scale aspects of gaseous components of our Galaxy, noting dynamics of gaseous systems with magnetic fields, virial theory, angular momentum, spiral structure of galactic disk, etc 11 p1767 A66-22263

Temporal spectra of atmospheric angular momentum transfer from wind data at

various tropospheric and lower stratospheric levels 11 p1697 A66-22568

High energy cosmic ray jet showers noting energy, angular momentum, collision inelasticity, secondary meson distribution, etc 11 p1763 A66-22705

Solar system origins and planet evolution as subcondensations in differentially rotating medium, discussing orbit and spin angular momentum 12 p1946 A66-23653

Ginzburg-Pitaevskii two-fluid formulation of superfluidity problem describing behavior of helium 2 in rotating annular cylinder, considering constant angular velocity and angular momentum 13 p2128 A66-26272

Energy dependence of elastic resonance scattering of low energy electrons from He, Ne, Ar and nitrogen gases at angles ranging from 8 to 110 degrees 14 p2337 A66-27797

Variation in Earth-Moon distance as result of meteoritic impact 15 p2597 A66-29261

Energy from hydrogen molecule interaction with magnetic field and from hyperfine interaction expressed as products of irreducible spherical tensors 15 p2548 A66-29806

Line width and shifts in molecular spectra of gases, giving general formulas for pressure broadening, phase shift of rotation, amplitude modulation of radiation and rotationally inelastic collisions 16 p2750 A66-30118

Moderately long-range relativistic intermolecular forces, obtaining interaction energies 17 p2960 A66-32401

Relativistic precession measurement using satellite as precise orbiting gyroscope [AIAA PAPER 65-36] 17 p3001 A66-32450

Angular momentum distribution in planetary systems computed, based on mass of star and period of revolution of planet-like companion 18 p3236 A66-34891

Control moment gyroscope for angular momentum transfer with minimum power consumption, noting design and application for free body motion stabilization 19 p3360 A66-35962

Close binary systems involving transfer of angular momentum, considering circulatory patterns of gaseous flow and axial rotation of component stars 21 p3815 A66-39483

Theorem concerning use of instantaneous axis of rotation for simplification of small oscillation equation of angular momentum 22 p3992 A66-40300

Energy, linear and angular momentum conservation principles for elastic body with finite number of defects 23 p4091 A66-41855

**ANGULAR MOTION**

Damping effects on initial angular motion of spinning shell with overturning and yawing moment 09 p1466 A66-20260

Angular velocity effect on radial hydromagnetic oscillations of rotating plasma cylinder 10 p1566 A66-21732

Capacitive torsional vibration transducer for measuring angular displacement of vibrations in engine shaft 12 p1880 A66-23845

Alignment of angular positions of spherical mirror and grating of Fastie-Ebert spectrometer, using bright collimated monochromatic beam of He-Ne laser 13 p2084 A66-26564

Angular transducer using Hall effect, noting errors due to distortions in magnetic circuit and temperature effects 16 p2709 A66-31577

Angular measuring system for radio telescopes, noting application of Raksyn variable capacitor block as nonwearing rotating pinion 18 p3113 A66-34274

Fluid-damped rotary oscillators, discussing angular deflection effect, suspension torsion, electric modulator, mechanical boundary layer forces and static characteristics 19 p3360 A66-36306

Stabilization and control system of Tiros-wheel satellite, using current-carrying coil interaction with geomagnetic field 21 p3821 A66-38878

DME-A satellite attitude control, discussing performance of spin control system 21 p3821 A66-38879

Linear dynamic analysis of angular motion of spinning axisymmetrical rocket or spacecraft, emphasizing rigid body with thrust misalignment and another motion caused by deflection of control surfaces or

jets 22 p3988 A66-40618  
 Angular stabilization of flight vehicle by introduction of cubic terms of variable parameters into control 23 p4088 A66-40968  
 law 23 p4088 A66-40968  
 Angular variation of position of energy loss maxima in indium 23 p4110 A66-41180  
**ANGULAR VELOCITY**  
 Angular velocity and linear acceleration measurement by three accelerometers mounted on three mutually orthogonal rotating disks 03 p0369 A66-12667  
 Plotting Burmeister curves and points from given position, velocity and acceleration of first 3-orders of Ball point for constant angular velocity of mobile plane 03 p0324 A66-13297  
 Equations of motion for rigid body with fixed point derived by expression of angular velocity 07 p1080 A66-17845  
 Unaided visual detection of target satellite for rendezvous purposes, discussing intensity and angular velocity in star field 08 p1176 A66-18815  
 Motion of orthogonal trihedron, determining accurately angular position in translational motion relative to coordinate system 08 p1249 A66-18878  
 Pendulum motion in system of coordinates related to pendulum base, considering damping of absolute and relative angular velocity 08 p1223 A66-18892  
 Vehicle angular velocity determined, using configurations with only linear accelerometers and no gyroscopes for inertial navigation 08 p1224 A66-19488  
 Analogy between eigenvalues for fluid convection and flow stability extended to rotating cylinders with corresponding temperature distribution for given angular velocities 08 p1212 A66-19821  
 Measurement of magnetic field produced by rotating singly and multiply-connected superconductors, formulating macroscopic electrodynamics of rotating body at low angular velocities 09 p1418 A66-20041  
 Solid rotating mercury cylinder, reversibly obeying London equation when cooled through superconducting transition, at given angular velocity 09 p1419 A66-20042  
 Centrifugal-tangential sensor for angular velocity detection, noting dynamics and parameters 09 p1380 A66-20309  
 Perceiving undetectable rotation in semicircular canals by employing self-induced Coriolis stimulation, determining psychophysical functions for direction or rotation discrimination at different yaw velocities 09 p1337 A66-20531  
 Dynamics of pump rotor allowing for hydrodynamic forces arising in seals, determining region of unstable rotor motion and amplitude of oscillations 12 p1964 A66-24049  
 Forced oscillations of coaxial multidisk rotors, allowing for gyroscopic effect and rotating at different angular velocities determined by replacing differential equations with integral equations 12 p1964 A66-24050  
 Vortices disintegration in rotating helium 2 in presence of oscillating disk when container stops rotating, noting role of helium angular velocity 12 p1865 A66-24880  
 Stable resonant spins for planet in eccentric orbit, particularly Mercury rotation, analyzing motion equation for angular position of long axis relative to inertial line fixed in space 12 p1952 A66-24968  
 Stability of commensurate spin angular velocity for Venus, assuming solar tidal torque action and suggesting Venus rotation period is commensurate with synodic period 12 p1953 A66-24969  
 Tachometer measuring angular velocity from time of definite number of rotations, noting diagram of basic circuit 13 p2077 A66-25327  
 Ginzburg-Pitaevskii two-fluid formulation of superfluidity problem describing behavior of helium 2 in rotating annular cylinder, considering constant angular velocity and angular momentum 13 p2128 A66-26272  
 Sensing device of angular velocity vector with respect to inertial system, noting sensitive mass and parasitic terms arising

from nonlinearity 14 p2296 A66-27888  
 Spin angular velocity stability of gyroscope with incompressible fluid-filled cavity as function of three degrees of freedom 14 p2277 A66-28051  
 Stress distribution in thin circular annular disk, rotating with variable angular velocity, having transient shearing stress applied on outer edge 15 p2510 A66-29732  
 Flow in viscous incompressible conducting fluid subjected to magnetic field in concentric cylinders rotating at different angular velocities, assuming planar motion, using differential equations 16 p2757 A66-30214  
 Orbital rendezvous, stressing necessity of measuring absolute angular velocity of line of sight connecting two vehicles, noting details on gyroscopes, coupling, optimization, etc 16 p2743 A66-30314  
 Centrifuge performance, noting angular velocity constancy vibration levels in terms of acceleration, temperature effects, etc 16 p2679 A66-30476  
 Portion of human vestibular system response determined through eyeball counterroll measurement, noting experimental techniques and methods of computing results 16 p2639 A66-30807  
 Angular dependence of spin-lattice relaxation times in ruby evaluated, using second order perturbation wave function and field coupling representation 16 p2781 A66-31220  
 Ancient solar eclipses analyzed, determining secular decrease in angular velocity of Earth by computation based on ephemeris time and astronomical constants 17 p2999 A66-32067  
 Miele solidification principle for uniformly spinning rotor mounted on rigid body applied to case where modulus of angular velocity of rotor is allowed to vary 17 p2909 A66-32478  
 Absolute angular velocity determination and distance to center of attraction along vertical established by accelerometer measurements 17 p3003 A66-32588  
 Longitudinal acceleration and angular velocity of rotation effect on flexural vibration of elongated body of revolution in supersonic flow applied to critical flutter calculation 17 p3027 A66-32603  
 Separated unsteady flow about flat plate rotating impulsively from rest to uniform angular velocity about axis along leading edge, noting torsional oscillations [AIAA PAPER 66-427] 17 p2910 A66-32753  
 Ring laser sensor parameters and characteristics, noting application to measurement of angular rate, mass flow, navigation and guidance 19 p3356 A66-35533  
 Gravity on planets explored by reference system expressing gradient magnitudes, data on equipotential and application to system with continuous rotation in space 19 p3346 A66-35627  
 Ephemeral georotational variations from deviations in quartz oscillator clocks of Paris and Greenwich observatories 19 p3351 A66-36370  
 Motion of arbitrary gyro-stabilizer in central Newtonian force field, applying Liapunov stability conditions for regular precession 19 p3362 A66-36841  
 Semipassive two-gyroscope damper for countering high angular rates of Earth-pointing satellites 20 p3659 A66-36868  
 Velocity and angle dependence of rain erosion for various materials, using rotating arm apparatus with high circumferential speeds 20 p3588 A66-37810  
 Photoelectric photometer used for tracking entry of artificial satellites into shadow of Earth 20 p3518 A66-37839  
 Effect of random fluctuations of voltage and frequency of gyrorotor feed current on change in rotor angular velocity, noting gyro drift 21 p3738 A66-38970  
 Generator of plasma with supercritical rotational velocity in crossed electric and magnetic fields 21 p3789 A66-39063  
 Floating vibratory gyroscope having enhanced sensitivity to angular velocity 21 p3739 A66-39329  
 Human performance analysis based on two criteria, zero and 100 percent legibility of moving targets consisting of black

alphanumeric symbols, finding mean angular velocities 21 p3701 A66-39423  
 Vortices disintegration in rotating helium 2 in presence of oscillating disk when container stops rotating, noting role of helium angular velocity 23 p4053 A66-41087  
 Retrograde rotation of cloud formations of Venus with angular velocity corresponding to one rotation in four days analyzed by high resolution photography 23 p4128 A66-41181  
 Incompressible fluid motion inside cylinder rotating at constant angular velocity with generatrix forming curve 23 p4055 A66-41560  
 Angular velocity of solar corona determined as function of radial distance from Sun including effect of solar wind, magnetic field and viscosity 23 p4130 A66-41811  
**ANHYDRIDE**  
 Synthesis of alpha-amino acid l-menthyl esters under mild conditions, using alpha-amino acid N-carboxy anhydride /NCA/ and l-menthol 16 p2646 A66-31186  
**ANIMAL PERFORMANCE**  
 Cystamine hydrochloride, strychnine nitrate and hexobarbital injections effect on mice subjected to vibration, noting vibration effect on swimming 15 p2431 A66-28740  
 Physiological functioning of monkeys under restricted mobility noting appetite, orientation reflexes, bioelectrical activity of brain, etc 15 p2436 A66-29470  
**ANIMAL STUDY**  
 SA BIRD  
 SA CAT  
 SA CHICKEN  
 SA DOG  
 SA FISH  
 SA MAMMAL  
 SA MONKEY  
 SA MOUSE  
 SA ORGANISM  
 Hypoxia protection on taking of second graft of homologous bone marrow in previously irradiated and grafted mice 01 p0020 A66-10609  
 UV radiation effect on viscosity and optical density of DNA solutions from calf thymus and rat spleen 01 p0018 A66-11193  
 Survival of Earth organisms under environment simulated low pressure, low oxygen, low temperature and low extraterrestrial conditions 02 p0181 A66-11605  
 Alveolar nitrogen concentration and environmental pressure influence upon rate of gas absorption from nonventilated lung in dog 03 p0324 A66-12357  
 Anatomical studies in dog anesthetized with pentobarbital and chlorpromazine and subjected to repeated prolonged positive G 03 p0327 A66-12362  
 Animal temperature sensing for studying effect of prolonged orbital flight on circadian rhythms of pocket mice 03 p0328 A66-12767  
 Heart and breathing rate and electroencephalo-graphic responses of rats during weightlessness 04 p0467 A66-14083  
 Monitoring human performance during manned orbital flight for assessment of central nervous system function, noting animal studies during simulated stresses of space flight 04 p0468 A66-14088  
 Prolonged centrifugation effects on growth and organ development of weanling and mature rats 05 p0625 A66-15412  
 Conduction velocity of single units, verified components of spinocervical tract and over-all conduction velocity determined in dorsal column of cat 06 p0810 A66-15941  
 Animal exposure to low pressure-high oxygen environment noting pressure control, electronic watering device and constant environmental temperature 06 p0815 A66-15942  
 Protective effect of adrenaline, subgaleally injected, on survival time of rats subjected to acute hypoxia 06 p0811 A66-16064  
 Organic superconductor and dielectric IR waveguide, resonator and antenna models of insects sensory hairs, spines and pit pegs 06 p0847 A66-16103  
 Biological effects of chronic acceleration studied by using birds and animals in centrifuges with specially designed cages 06 p0819 A66-16605

Endocrine and metabolic response of restrained dogs to body vibration, nonanesthetized or anesthetized, showing increase in plasma and blood epinephrine 06 p0812 A66-16822

Infantile treadmill experience effect on body weight and resistance to exhaustion in rat 07 p0997 A66-17460

Rats exposed to space cabin atmosphere for two weeks, noting mortality rate, organism functioning, growth rate, etc 07 p0998 A66-17663

Zero-gravity effect on opossum fetus observed by TV system in proposed satellite 08 p1176 A66-18726

Cytoplasmic alterations and fat vacuole formation in pneumocytes of guinea pigs exposed to severe hypoxia in low pressure chamber 08 p1175 A66-18769

Experiments with anesthetized dogs subjected to *g* accelerations, observing behavior of arterial oxygen saturation and pulmonary ventilation during short periods 08 p1175 A66-19083

Experiments with rats under anesthesia subjected to acceleration, noting electroencephalograms 08 p1175 A66-19085

Ionizing radiation effects in mice protected with hypoxia or with chemicals 08 p1175 A66-19086

Acute inhalation toxicity of oxygen difluoride in albino rat 08 p1175 A66-19723

Inhalation toxicity at ambient and reduced pressures in monkeys, dogs and rodents upon exposure to ozone, nitrogen dioxide and carbon tetrachloride 08 p1176 A66-19724

Internal organ injury mechanism of cats subjected to severe vertical sinusoidal vibration and observed by high speed X-ray cinematography 09 p1335 A66-20525

Positive pressure breathing effect on vibration tolerance of mice 09 p1335 A66-20529

Acetate conversion to lipids and carbon dioxide by liver, kidney and inguinal adipose tissues of rats under centrifugation stress 09 p1336 A66-20634

Mice susceptibility to pentobarbital sodium, showing short term fluctuations in toxicity 09 p1338 A66-20964

Mathematical theory relating neuronal geometry to parameters of excitation in unconditioned response of planarians to electric shock 10 p1486 A66-21296

Alpha particle and X-radiation ionizing effects on cerebral astroglial cells and blood vessels of young rats 10 p1487 A66-22020

Subgravity tower and axis results obtained on man and animals, discussing transition from acceleration to weightlessness and vice versa 11 p1641 A66-22480

Vestibular function in conditions of subgravity 11 p1641 A66-22481

Low-gravity vibration stress effects on weight, growth, metabolism, white blood cells and endocrine system of albino Wistar rats 11 p1643 A66-22581

EEG and cortical and subcortical responses analysis of sensory stimulation in restricted dogs and normally reared littermates 11 p1644 A66-22950

Importance of neural site and experimental conditions in determining motivational direction /positive or negative/ produced by electrical stimulation of brain in animals 11 p1644 A66-22976

Miniature long-life telemetry system for implanting in animal to study deep body temperature 11 p1649 A66-23499

EEGs of monkeys stimulated cyclically by whole-body vibration, plotting coherence functions relating brain records to acceleration records 12 p1806 A66-24228

Responses of neuronal elements in visual cortex of unanesthetized cats shown to depend on time interval length 12 p1806 A66-24232

Chromosome injury in mouse bone marrow due to distant ionizing radiation 12 p1806 A66-24396

Continuous exposure of rats to 100 percent oxygen at 450 mm Hg for 64 days shows no physiological effects 12 p1807 A66-25013

Cosmic and UV radiation effects on breakdown of DNA and production of tumors in mice 13 p2008 A66-25642

Holtzman strain experiments on rats, determining if electrical stimulation of

various neural sites produce motivational consequences of appetitive or defensive behavior 13 p2009 A66-25790

Immunochemical studies on interspecies molecular hybrids of hemoglobin 13 p2010 A66-25898

Protein synthesis in liver of adrenalectomized and hypophysectomized rats exposed to centrifugation stress 13 p2010 A66-25899

Spatial interrelations between mitochondrial apparatus of capillary cells and synapses of these cells in utricular receptor of animals at rest and after exposure to accelerations, using electron microscopy 13 p2011 A66-26250

Effect of oxygen deficiency on acoustic organ of cats, determining content of potassium and sodium ions in perilymph, cerebrospinal fluid and blood serum 13 p2011 A66-26251

Changes in shock-evoked response complex /SERC/ recorded from visual cortexes of cats after retinal illumination, noting enhancement of waveform after photic stimulation and role of barbiturate anesthetization 13 p2012 A66-26581

Sodium excretion during extracellular volume expansion and associated changes in renal blood flow and intrarenal blood distribution during natriuresis accompanying saline loading in dogs 13 p2012 A66-26582

Effect of unilateral renal vasodilatation on sodium excretion by infusing acetylcholine into renal artery of dogs 14 p2227 A66-26793

Chronic hypoxia effects on thyroid function of rats, discussing radioiodine trapping and acinar cell length 14 p2227 A66-26811

Adrenocorticotrophin-releasing hormone appears in peripheral blood of rats under physiological stress, noting role of pituitary gland 14 p2228 A66-27811

Effects of alpha glycerophosphate and of palmitoyl-coenzyme A on lipid synthesis in yeast extracts 15 p2429 A66-28616

Ambient pressure effect on tolerance of mice to air blast 15 p2430 A66-28655

High oxygen at reduced pressure effect on metabolism of radioactive acetate in rats 15 p2430 A66-28658

Structural and functional properties of heart and muscle type subunits of lactic dehydrogenases investigated, using comparative amino acid analysis 15 p2446 A66-28864

Long duration flight physiological data on ducks and chickens in closed ecological systems, including oxygen and food requirements and carbon dioxide output 15 p2435 A66-29452

Prolonged optokinetic stimulation effect on rabbits studied by corneoretinal potential changes during eyeball motion 15 p2437 A66-29471

Centrifugal acceleration effect on sexual apparatus, cardiovascular system and respiratory organs of female monkey 15 p2437 A66-29472

Vibration effect on reception of certain organs and tissues of white mice to dye introduced intravenously 15 p2437 A66-29477

Effect of combined action of accelerations, vibration and radiation of nuclei of bone marrow cells in mice 15 p2437 A66-29478

Adaptation rearrangements in organisms of mice during and after exposure to high concentrations of carbon dioxide 15 p2438 A66-29479

Injurious effect of gamma radiation and 660 and 120 mev protons on white mice and protective action of certain pharmacochemics 15 p2438 A66-29480

Effect of shielding individual parts of rats on variations in reaction to radiation during exposure to gamma rays and high energy protons 15 p2438 A66-29481

Pathomorphological changes in hemopoietic organs of mice after irradiation with high energy protons 15 p2438 A66-29482

Preference of mice for oxygen-poor atmosphere after removal from 60 and 90 percent oxygen atmospheres 15 p2439 A66-29489

Increased partial oxygen pressure effect on morphological composition of peripheral blood of rats and mice 15 p2439 A66-29490

Hypoxia in cats and rats due to gradual

and abrupt drops in oxygen content of air 15 p2439 A66-29491

Effects on white mice of exposure to oxygen-enriched air, noting biological and physiological observations 15 p2439 A66-29493

Toxic and lethal effect on mice of ammonia in air, noting biological and physiological changes 15 p2439 A66-29494

Irritability, by injected apomorphine, of emetic center of dogs with functioning and removed labyrinths subjected to various motions 15 p2439 A66-29495

Semiconductor cooler creating hypothermia in small animals, operating on Peltier effect and employing quaternary metal alloy 15 p2444 A66-29497

Electrode implantation in dogs and detection of action currents in vegetative nerves after ten months 15 p2444 A66-29499

Blood flow rate in surface veins of brains of animals subjected to accelerations, noting thermal transducer 15 p2445 A66-29500

Hematocrit index and arterial-blood gas composition in white rats during artificial hypothermia 15 p2440 A66-29511

Simulation of solar flare radiation effects on white mice in spacecraft along circumlunar trajectory 15 p2445 A66-29512

Cardiovascular measurement on anesthetized dogs subjected to vibration, noting recording techniques, instrument sensitivity, etc [AIAA PAPER 66-442] 16 p2642 A66-30622

Low atmospheric pressure and oxygen-rich environment effect on characteristics of uninterrupted long-term exposure to toxic gases of space cabin atmospheres, noting animal testing 16 p2642 A66-30623

Short-term starvation effect on gastric mucosa of weanling vs post-weaned rats 16 p2638 A66-30636

Chronic exposure of rats to gaseous environments of varied composition and pressure, noting exposure capsules, gas flow system, respiratory gas analyzer, etc 16 p2643 A66-30650

Hamsters, mice and rats exposed to elevated oxygen tensions for 60-day periods with nitrogen at high or minimal levels 16 p2640 A66-31125

Blood pressure and heart rate during hypothalamic self-stimulation in dogs, discussing experimental methods and results, physiological response, etc 16 p2640 A66-31154

Receptive field organization of rat retinal ganglion cells, examining maintained impulse activity with stationary spots of light 16 p2640 A66-31184

Stress and dietary influence on direct oxidative pathway of carbohydrate metabolism in jejunal mucosa of rats 16 p2641 A66-31383

Chorioretinal lesion produced by pulsed ruby laser beam and complex changes in retinal excitability in cats 16 p2841 A66-31761

Dendritic arborization of retinal ganglion cells of rat stained in vivo with methylene blue, relating it to receptive field organization of these cells 17 p2849 A66-31995

Immobilization effect on monkeys noting influence on calcium, phosphorus and nitrogen metabolic balance 17 p2855 A66-32140

Nitrogen, phosphorus and calcium determination from perchloric acid digestion, process includes sample collection, preparation, digestion and determination 17 p2870 A66-32143

Correlation between survival time of rats under acceleration stress and cerebral level norepinephrine 17 p2855 A66-32145

Altered physiologic function of dogs produced by exposure to pulsed microwaves including study of combined effect of X-irradiation 17 p2856 A66-32156

Increase of arterial lactate and pyruvate in blood glucose of fasted anesthetized dog after hydrazine injection 17 p2856 A66-32157

Calorimetric study of effects of hydrazine on heat balance, source of metabolic energy and rate of protein catabolism of rats 17 p2856 A66-32158

Toxic effects of hydrazine derivatives tested in dogs, producing methemoglobin and pigmentation in blood 17 p2856 A66-32159

- Effect of 0.6 LD/50 intraperitoneal dose of hydrazine on coagulation mechanism in rats, comparing results with saline injected controls 17 p2857 A66-32167
- Lysosomal enzymes in rats exposed to 100 percent oxygen to determine possibility of accelerated in vivo lipid peroxidation 17 p2857 A66-32169
- Oxygen consumption of rabbits decreases in proportion to inert gas concentration dissolved in tissues 17 p2857 A66-32174
- Parasympathetic control of heart rate in monkeys under acceleration stress, noting ECG changes and effect of atropine sulfate on change of rate 17 p2857 A66-32176
- Vestibular neuronal response to rotating linear acceleration vectors, noting generation of compensatory ocular nystagmus 17 p2858 A66-32177
- Proliferative pulmonary lesions in monkeys under high oxygen concentration for various periods 17 p2858 A66-32181
- Gravitational environment, effect of change on frogs measured using gravitoceptors in vestibular apparatus 17 p2865 A66-32183
- Squirrel monkey physiological response to, and survival under short duration very high acceleration stress 17 p2858 A66-32187
- Hazards of macrofractionated gamma ray irradiation hazards upon Rhesus monkeys 17 p2858 A66-32189
- Myocardiograph study of dogs leading to development of flight-rated vibrophonocardiographic system for monitoring cardiac dynamics in flight environment 17 p2924 A66-32191
- ECG P wave changes due to body tilt in space of rabbits deprived of afferent impulses from pressure-receptive areas 17 p2859 A66-32230
- Medial forebrain bundle, lateral hypothalamic area and reinforcing brain stimulation, discussing self-stimulation 17 p2859 A66-32552
- Ribonucleoside triphosphatase in rabbit reticulocytes, discussing distribution in extracts, behavior in purification of amino acid and properties 17 p2859 A66-32553
- Corticosterone injection in rats, assaying amino acid incorporation into liver microsomal and cell-sap protein 17 p2860 A66-32554
- Age effect on liver glycogenesis in rats exposed to acceleration stress 17 p2860 A66-32555
- Pathomorphological changes in hemopoietic organs of mice under combined effects of proton radiation and vibration and gamma radiation and acceleration 17 p2861 A66-32937
- Vibration exposure of mice 4 and 24 hours prior to irradiation tends to lessen mortality and increase mean longevity 17 p2861 A66-32938
- Radiation-protective agents /anoxia, serotonin, amino thiols/ tend to increase sulfhydryl groups in mice spleen and Ehrlich ascite carcinoma cells 17 p2861 A66-32939
- Space medicine and biology studies of space flight environmental factors based on experiments with animals and manned spacecraft 18 p3056 A66-33699
- Capability of white mice to sustain extreme accelerations after exposure to ionizing radiation 18 p3058 A66-33844
- Neuronal circuitry relations of cat mammillary nuclei derived from neuron population ratio computed from population data 18 p3058 A66-34067
- Effect of head-to-foot accelerations of up to 10 g on rabbits, noting changes in ECG, EEG, brain histology, etc., leading to ischemic conditions 18 p3060 A66-34408
- Ascorbic acid concentration in urine and organs of guinea pigs exposed to high oxygen concentrations 18 p3060 A66-34410
- Effects of radiation protective pharmacological agents /cystamine, serotonin, AET, strychnine, etc/ on animals subjected to centrifugation, for application to astronauts 19 p3283 A66-35292
- Rapid decompression effects on dogs and subhuman primates, studying physical and physiological responses after loss of consciousness and recompression effects 19 p3285 A66-35839
- Effect of sudden intense noise and near vacuum decompression on cardiac rate of anesthetized and unanesthetized dogs 19 p3286 A66-36380
- Residual pathologic changes in central nervous system of dog following rapid decompression to 1 mm Hg 19 p3286 A66-36381
- Response characteristics of lateral geniculate cells of macaque monkey, discussing hue, saturation and brightness encoding in primate color visual system 20 p3504 A66-36946
- Neuronal circuitry and neuron populations of structures in normal animal brains and brains modified by unambiguous lesion arrays 20 p3505 A66-37053
- Myocardial glycogenolysis in rat ventricle and relation to severity of exercise 20 p3505 A66-37058
- Altitude effect on metabolic rates of deer mice, noting direct relationship between seasons and metabolic rate at all ambient temperatures 20 p3506 A66-37365
- Dissociation of rhinencephalic or thalamic self-stimulation and epileptiform activity in rats 20 p3506 A66-37602
- Combination of renal vasodilation and angiotensin infusion effect large changes in renal hemodynamics, excretion and reabsorption of sodium in anesthetized hypopenic dogs 20 p3507 A66-37607
- Partial restraining device for rats in operant conditioning studies 20 p3508 A66-38419
- Liquid breathing effects on dogs in hyperbaric chamber 21 p3699 A66-38447
- Inertial navigation in relation to animal navigation, considering three principal characteristics and biological analogs 21 p3760 A66-38450
- PAH transport mechanism in dogs with hydrazine-depressed para-aminohippurate treated with acetate, 6,8-epidithioacetate and 6,8-epidithioacetamide 22 p3854 A66-39795
- Bioelectric potentials in animals, investigating electrical materials, anatomical sites and means of increasing output and long-term implants 22 p3857 A66-39797
- Sound pressure in external auditory meatus and near center of cat head in absence of animal as function of frequency 22 p3854 A66-40166
- Hypoxia of simulated high altitude exposure prolongs synaptic delay and conduction time in brain system of rats 22 p3855 A66-40403
- Sleep deprivation in rats induced by injections of dextroamphetamine or forced treadmill activity resulted in temporary increase in daily sleep time 22 p3855 A66-40481
- Thromboelastographic investigation of short duration high-intensity chest-to-back impact deceleration in rats 22 p3856 A66-40502
- Respiratory activity and hematological factors of avian blood cells, discussing oxygen consumption, thermal effects, tissue and erythrocyte metabolism 23 p4024 A66-41043
- Physiological and mechanical effects of radial accelerations on brain temperature of dog and rabbit 23 p4026 A66-41336
- Twofold transversely applied 8-g centrifuging effect on functional state of otolithic part of vestibular apparatus of guinea pigs 23 p4026 A66-41337
- Repeated vertical/head-tail vibration effect on functional state of spinal reflex arc of guinea pigs 23 p4026 A66-41338
- Repeated vertical vibration and noise effects on conditioned reflexes of rats 23 p4026 A66-41339
- Vibration effect on bioelectric activity of brain and oxygen consumption, using experimental rats 23 p4027 A66-41340
- Vibration stimulus effect on oxygen metabolism of brain in rats with partial destruction of auditory and vestibular apparatus and in anesthetized control rats 23 p4027 A66-41341
- Vibration effect on conditioned reflexes, oxidation mechanism and electric activity of brain in rats 23 p4027 A66-41342
- Vibration effect on external respiration of rats, noting independence of oxidation metabolism from respiratory changes 23 p4027 A66-41343
- X-ray irradiation effect on venous blood flow in rabbit brain vessels 23 p4027 A66-41344
- Neutron, proton and gamma radiation effect on small animals examined, using conditioned response drinking method 23 p4027 A66-41345
- Gamma and fast neutron radiation effect on nervous activity of mice examined, using conditioned reflex drinking method 23 p4028 A66-41346
- Gamma radiation, fast neutron and proton effect on conditioned and motor responses, nervous activity, excitation and inhibitory processes of white rats 23 p4028 A66-41347
- Effect of total chronic and acute gamma radiation on higher nervous activity of white rats 23 p4028 A66-41348
- Conditioned motor food reflexes of rats exposed to vibration, vibrostand noise and X-ray 23 p4028 A66-41351
- Mortality and histopathology of germ-free rats and mice exposed to pure oxygen, noting effect of chronic respiratory condition 24 p4162 A66-42315
- Cardiopulmonary hemodynamics in dogs under transverse acceleration studied in terms of changes in heart and lungs 24 p4163 A66-42450
- Neuronal spike populations and EEG activity in chronic unrestrained cats, noting multiple unit responses of acceleration/inhibition during behavioral conditioning procedures 24 p4169 A66-43098
- Main stages of development of space biology and medicine in U.S.S.R., discussing biological effects in dogs in suborbital flight vehicles and satellites 24 p4169 A66-43135
- Electromagnetic and corpuscular radiation hazards to astronauts deduced from data on dogs 24 p4166 A66-43140
- Electric impedance measurements in hippocampus, amygdala and midbrain reticular formation during altering, orienting and discriminative responses in cat 24 p4166 A66-43167
- ANION**
- SA ANODE
- SA CATION
- Spectroscopic measurements using membrane-type shock tube for absolute determination of continuous absorption coefficients of negative hydrogen ions 04 p0553 A66-14279
- ANISOTROPIC FLUID**
- Hydromagnetic stability of interface formed by two superposed columns of dilute plasmas with anisotropic pressure 01 p0116 A66-11198
- Definition, equations, static and dynamic problems and normal and shear stress functions of subfluids 03 p0354 A66-12531
- Current distribution for cylindrical dipole of infinite length immersed in homogeneous lossless magnetotonic anisotropic ionosphere 06 p0827 A66-16033
- Stationary flow of viscous incompressible anisotropically conducting fluid in coaxial channel 11 p1743 A66-22235
- Current distribution and input impedance of infinite cylindrical antenna in anisotropic plasma, treating it as boundary value problem 11 p1661 A66-22396
- Steady flow of anisotropic conducting medium in half-space under influence of magnetic field 13 p2142 A66-25632
- Instability of unbounded anisotropic plasma containing beam 13 p2149 A66-26039
- Surface electron density in magnetoplasmas and microwave reflection from anisotropic plasma surface 13 p2149 A66-26241
- Compressivity tensors as parameters to characterize two-fluid compressible plasma in external magnetic field 13 p2149 A66-26273
- Input impedance of small loop of uniform electric current immersed in anisotropic cold magnetoplasma calculated by induced emf method 15 p2548 A66-28593
- H-plane bifurcation of parallel plate waveguide filled with anisotropic plasma 15 p2457 A66-28597
- Generalized model of ideal compressible anisotropic fluid, determining dependence of free energy on density gradient 16 p2689 A66-31517
- Optimum MHD generators using anisotropic plasma, discussing conducting-gas MHD flow, Hall effect, ion slip effect,

etc 18 p3152 A66-35075  
 Turnstile multiple-probe microwave  
 polarimeter for anisotropic plasma  
 diagnostics 20 p3609 A66-37630  
 Potentials for cylindrical warm plasmas,  
 noting anisotropic effects caused by  
 external magnetic field 20 p3611 A66-38362  
 Periodic flows of orientable anisotropic  
 fluids tending to be unoriented at rest  
 considered through linear equations which  
 predict resonance  
 phenomenon 21 p3727 A66-39173  
 Homogeneous rotating low density plasma  
 permeated by magnetic field with  
 anisotropic velocity distribution may exhibit  
 hose instability as well as gravitational  
 instability 21 p3794 A66-39562  
 Radiation in relativistically moving  
 anisotropic plasma medium, noting Lorentz  
 type transformation of plasma electron  
 volume density 23 p4105 A66-41638

**ANISOTROPIC MATERIAL**  
 Electromagnetic wave propagation through  
 multilayer isotropic and anisotropic  
 structure 01 p0025 A66-10525  
 Anisotropy of ytterbium iron garnet and  
 ytterbium-doped yttrium iron garnet crystals  
 measured by torque method in applied  
 magnetic fields 04 p0563 A66-13812  
 Anomalous behavior of radiation resistance  
 of antennas in anisotropic  
 media 04 p0500 A66-14101  
 Photocapacitative effect for determining  
 degree of anisotropy of zinc sulfide with  
 stacking faults 04 p0571 A66-14498  
 Theoretical anisotropic energy gap of  
 superconducting lead when photon density  
 of states is principal source of gap  
 anisotropy 05 p0741 A66-15866  
 Dyadic Green function for anisotropic and  
 compressible media based on reformulation  
 of governing equations for electromagnetic  
 phenomena in compressible anisotropic  
 plasma 06 p0832 A66-16455  
 Two-fluid anisotropic warm plasma,  
 characterizing macroscopic electromagnetic  
 properties via compressivity and  
 permittivity tensor and  
 permeability 06 p0920 A66-16975  
 Model of elastoplastic body undergoing  
 strain hardening, examining microstresses  
 via internal viscosity 07 p1143 A66-17629  
 Anisotropic transverse magnetoplasma  
 effects in cubic semiconductors, examining  
 reflectance and elliptic  
 polarization 07 p1102 A66-18204  
 Approximate method for examining stress-  
 strain state of anisotropic body with  
 elliptical holes via reduction to infinite  
 algebraic system 08 p1304 A66-18591  
 Generalized strength criterion for  
 anisotropic materials with different tensile,  
 compression and shear  
 strengths 08 p1307 A66-18881  
 Balanced anisotropic photoelectromagnetic  
 effect in germanium 09 p1413 A66-20003  
 Collective energy losses by plasmas in  
 crystals caused by excitation of volume or  
 surface plasmons 09 p1427 A66-20350  
 Radiation resistance of linear current strip  
 of finite width immersed in uniaxially  
 anisotropic plasma 09 p1408 A66-20370  
 Structural anisotropy coefficients of  
 crystallization in carbon-graphite materials  
 from X-ray and linear expansion  
 data 10 p1548 A66-21240  
 UHF ferrites as magnetically anisotropic  
 media in which electromagnetic wave  
 propagation rate assumes two values and  
 magnetic permeability is of tensor  
 nature 11 p1658 A66-23233  
 Torsional stress distributed on ends and  
 lateral face of anisotropic rod with variable  
 elastic moduli 12 p1969 A66-24353  
 Equation relating sound velocity in  
 polymer sample with angle between axes of  
 molecules and fibers of  
 sample 13 p2113 A66-25910  
 Cross section for inelastic scattering of  
 electromagnetic radiation by electron  
 density fluctuations in anisotropic solids,  
 using laser sources, investigating Landau  
 and collision damping of  
 plasmons 13 p2132 A66-26153  
 Compression of anisotropic fiber  
 monofilaments extended to measurements of  
 expansion of horizontal diametral plane and

contact widths for polyethylene  
 terephthalate and nylon, as function of  
 load 13 p2115 A66-26306  
 Stress-strain relations for laminar  
 anisotropic medium from known mechanical  
 properties of layers for application to fiber-  
 reinforced plastics 13 p2205 A66-26451  
 Ghost modes in open microwave resonator  
 waveguides containing dielectric slabs of  
 rectangular geometry with anisotropic  
 dielectric constant 14 p2246 A66-26796  
 Radiation due to time-harmonic source and  
 field solution of electric dipole in moving  
 uniaxial anisotropic medium by Minkowski  
 theory 14 p2234 A66-26861  
 Magnetoionic couplings and electromagnetic  
 wave propagation in horizontally stratified  
 layer of gyrotropic  
 medium 14 p2283 A66-27125  
 Cross correlation of satellite signals  
 through slab containing small anisotropic  
 irregularities 14 p2237 A66-27398  
 Theoretical and experimental investigations  
 of electromagnetic scattering by conducting  
 cylinder coated with anisotropic ferrite  
 sheath magnetized along  
 axis 15 p2449 A66-28594  
 Bending center of prismatic anisotropic rod  
 of arbitrarily asymmetrical cross  
 section 15 p2608 A66-28774  
 Steady state creep equations derived for  
 anisotropic material under multiaxial stress  
 states, based on perfect plasticity  
 analogies 16 p2820 A66-31275  
 Hot electrons in anisotropic semiconductor,  
 considering case of scattering by acoustic  
 phonons within one energy valley with  
 nondegenerate bottom 17 p2977 A66-32318  
 Specimen anisotropy during tensile  
 elongation to rupture of composite solid  
 propellants, based on analysis of dilatational  
 behavior 17 p2989 A66-32451  
 Hertzian contact of anisotropic bodies,  
 reducing problem to one of evaluating  
 contour integrals by Fourier transform  
 method 17 p3029 A66-32792  
 Admittance problem of cylindrical antenna  
 in homogeneous anisotropic medium  
 formulated and analyzed, using Fourier  
 transforms and Wiener-Hopf  
 technique 17 p2897 A66-33428  
 Structural anisotropy coefficients of  
 crystallization in carbon-graphite materials  
 from X-ray and linear expansion  
 data 19 p3388 A66-35863  
 Diffraction of electromagnetic plane by  
 half-plane in uniaxially anisotropic medium  
 solved in terms of Sommerfeld  
 approximation 19 p3304 A66-36284  
 Photoelastic Wertheim law in general  
 tensor coordinate system derived for  
 linearly anisotropic or isotropic  
 homogeneous matter 19 p3474 A66-36320  
 Properties of anisotropic continuous media  
 with energy and stresses depending on  
 deformation-tensor gradients and other  
 tensor magnitudes 19 p3476 A66-36833  
 Linear elastostatic BVPs for  
 inhomogeneous anisotropic elastic body  
 including existence-uniqueness theorem,  
 based on Korn inequality 21 p3755 A66-38463  
 Generalized reciprocity theorem for  
 antenna systems containing anisotropic  
 media and antenna systems radiating  
 directly through arbitrary  
 apertures 21 p3711 A66-38835  
 Three-dimensional linear-anisotropic  
 elasticity with inertia effects analyzed in  
 isotropic and anisotropic Cosserat continua,  
 deriving static and kinematic  
 components 23 p4141 A66-41945  
 Displacement matrix analysis of three-  
 dimensional anisotropic and inhomogeneous  
 elastically deformable bodies represented as  
 tetrahedral assemblies 23 p4146 A66-41989  
 Design synthesis relationship derived for  
 primary structural weight of membrane type  
 pressure vessels of anisotropic  
 materials 24 p4286 A66-42151  
 Anisotropy in mechanical properties of  
 lamellar solids due to abrasiveness,  
 examining wear and surface damage  
 produced by laminar solid on metal during  
 slipping and hardness 24 p4229 A66-42701  
 Electromagnetic wave transmission through  
 and reflection from homogeneous nonlinear  
 anisotropic slab between two linear isotropic  
 media 24 p4173 A66-42706

Electromagnetic propagation in slowly  
 rotating anisotropic dielectric single band  
 waveguide modulator 24 p4175 A66-42967

**ANISOTROPIC PLATE**  
 Critical loads for anisotropic plates on  
 various configurations and boundary  
 conditions, detailing stability of rectangular  
 plate and orientation of  
 axes 01 p0154 A66-10477  
 Large amplitude oscillation of anisotropic  
 triangular plates 04 p0591 A66-14202  
 Classical theory of bending of anisotropic  
 plates, using asymptotic integration method  
 and expressing stressed state as sum of  
 three stressed states 07 p1145 A66-18255  
 Stress-strain state of infinite plate with  
 two holes of different diameter solved  
 using integral equation derived for two-  
 dimensional problem in elasticity theory for  
 anisotropic medium 08 p1314 A66-19577  
 Elastoplastic behavior of anisotropic plate,  
 elastically uniform in depth, using  
 asymptotic integration for bending  
 problem 12 p1966 A66-24057  
 Elastic bending of anisotropic plates with  
 stresses represented by Legendre  
 polynomial series 12 p1968 A66-24344  
 Stability of rectangular transversely  
 isotropic plate hinged at three sides under  
 uniform pressure applied to two opposite  
 hinged sides 13 p2205 A66-26451  
 Stress distribution in anisotropic plate with  
 form of infinite wedge loaded at vertex by  
 concentrated force 17 p3018 A66-31833  
 Bending problem of anisotropic plate  
 solved by method of small  
 parameter 17 p3030 A66-32811  
 Reduction of plane thermoelastic problem  
 of anisotropic body to determination of  
 three analytical functions of complex  
 variables, solving temperature stress  
 distribution in anisotropic  
 plate 18 p3258 A66-34702  
 Stress and strain fields caused by straight  
 line dislocation located in anisotropic elastic  
 plate 20 p3671 A66-38111  
 Bending of nonorthotropic clamped plates  
 solved, using small parameter  
 method 21 p3826 A66-38611  
 Stability of circular transversely isotropic  
 plates under various attachment conditions  
 along contour based on Ambartsumian plate  
 theory 21 p3826 A66-38611  
 Bending problems of transversely isotropic  
 circular plates based on Ambartsumian  
 theory of anisotropic  
 plates 21 p3830 A66-38982  
 Stress distribution in elastically  
 nonhomogeneous rotating thin circular disk  
 of varying thickness of anisotropic  
 material 21 p3745 A66-39595  
 Nonlinear differential equations for  
 cylindrically anisotropic plates, noting error  
 of Wolmir method 22 p3988 A66-39651  
 Bending of anisotropic elliptical plate  
 weakened by elliptical hole solved by  
 infinite system of linear algebraic  
 equations 23 p4138 A66-41444  
 Vibrations of transversal-isotropic circular  
 plates solved, using refined theory  
 anisotropic plates 23 p4138 A66-41444  
 Linear viscoelastic bending analysis of  
 anisotropic plates 23 p4145 A66-41977

**ANISOTROPIC SHELL**  
 Uniqueness of mixed problem of  
 anisotropic body dynamic thermoelasticity  
 when radiative heat transfer is absent, using  
 thermodynamics and Onsager  
 relations 02 p0300 A66-12007  
 Matrix displacement analysis of anisotropic  
 shells, determining bending and membranal  
 stiffnesses of triangular element and effects  
 of initial strains 06 p0961 A66-16007  
 Asymptotic integration of elasticity theory  
 equations and analysis of stressed state of  
 anisotropic shell 15 p2609 A66-28997  
 Hooke law analysis of dynamic stability of  
 closed circular cylindrical anisotropic shell  
 compressed by longitudinal  
 force 15 p2609 A66-29147  
 Thermal stresses in anisotropic hollow  
 cylinder by arbitrary radial temperature  
 distribution 17 p3020 A66-31919  
 Stability of structurally anisotropic circular  
 cylindrical shell under nonuniform  
 compression 21 p3829 A66-38977

**ANISOTROPY**  
 SA CRYSTAL STRUCTURE

Anisotropy of scattering in tellurium, correlating cyclotron frequency data and alvanomagnetic measurements 05 p0738 A66-15353

Diffuse X-ray scattering in crystal structure of Ni-Be and Cu-Be alloys during first stage of aging due to anisotropic monoclinic lattice distortions 08 p1235 A66-18589

Perturbation solutions of stress and deformation problems for homogeneous anisotropic shells constructed from orthotropic material 08 p1309 A66-19004

Perpendicular anisotropy of Ni and Fe films and saturation magnetization under various pressures 08 p1270 A66-19011

Electron microscopic estimation of perpendicular anisotropy of magnetic thin film originating from nonmagnetic grain boundaries 08 p1270 A66-19012

Magnetocrystal anisotropy of hexagonal ferromagnetic substances in neighborhood of Curie point 08 p1273 A66-19249

Magnetic measurements and exchange interactions in thin anisotropic ferromagnetic films 09 p1410 A66-19905

Cosmic ray distribution intensity over celestial sphere determined, detecting anisotropy against background of isotropic variations, using spherical analysis 09 p1439 A66-20220

Electromagnetic-wave radiation peculiarities in homogeneous anisotropic dispersive magnetic plasma 09 p1343 A66-20342

Strain anisotropy matrix analysis 09 p1466 A66-20462

Anisotropy of scattering in tellurium, correlating cyclotron frequency data and alvanomagnetic measurements 09 p1431 A66-20894

Singlet and triplet pairs coexistence in anisotropic superconductor 10 p1583 A66-21971

Reverse magnetization and energy of anisotropy of single crystal ferromagnetic films 11 p1754 A66-22815

Coercive force of single crystal iron films with two-axial magnetic anisotropy 11 p1754 A66-22817

Induced anisotropy of ferromagnetic atom pairs and magnetostriction stresses in Fe-Ni thin films subject to annealing 11 p1755 A66-22818

Turbulent channel flow, discussing friction law anisotropy and homogeneity, vortex flow, channel viscosity, etc 12 p1860 A66-23532

Anisotropy of weak cosmic ray bursts studied by examining diurnal variations for rays with increased solar flare activity 12 p1942 A66-24178

Microwave Faraday effect in n-type germanium, discussing Faraday rotation, ellipticity, magnetoabsorption, complex conductivity tensor elements and measurement of microwave polarization anisotropy 14 p2349 A66-26826

High energy Alnico alloys, discussing crystal growth, anisotropy, recrystallization, etc 14 p2311 A66-26883

Uniaxial permalloy film anisotropy at cryogenic temperatures and magnetization characteristics 14 p2355 A66-26914

Fine-line absorption spectrum anisotropy with respect to crystallographic axis of cadmium sulfide 14 p2308 A66-27646

Anisotropy and annealing behavior in extrinsic single-crystal tellurium studied by measuring electric resistivity and Hall coefficient 15 p2562 A66-28725

Anisotropic vector functions of vector argument connected with crystal symmetry 15 p2526 A66-28951

Temperature dependence of line width and anisotropy field in Mn substituted MnO 15 p2565 A66-29028

Structure of air showers, considering muon components and distribution of arrival directions of muon-rich AS 15 p2580 A66-29530

Anisotropy of arrival directions of extensive air showers /EAS/ with one or more high energy nuclear active particles 15 p2580 A66-29531

Magnetic anisotropy of vacuum deposited permalloy films under applied magnetic field

and obliquely incident molecular beam 16 p2773 A66-30686

Anisotropy of electrical resistance of indium in magnetic field shown to be nearly absent, confirming absence of open Fermi surface 17 p2977 A66-32315

Apparent HF stability of highly anisotropic plasma, noting charge exchange and trapped proton energy spectrum 18 p3142 A66-33671

Anisotropy of secondary electron emission in ion bombarded Si single crystals, using electron microscope 19 p3445 A66-36340

Effects of nonmagnetic impurities upon anisotropy of superconducting energy gap 21 p3797 A66-38559

Singlet and triplet pairs coexistence in anisotropic superconductor 21 p3805 A66-39550

Induced uniaxial anisotropy energy of manganese-bearing ferrites, noting effect of metal additives 24 p4253 A66-42360

Anisotropy of cosmic rays in N-S direction determined by comparison of intensity variations observed in Arctic and Antarctic regions 24 p4263 A66-42464

## ANNEALING

Superconducting transition temperatures measured for various tin-gallium compositions in quenched and annealed states 02 p0271 A66-11482

Dependence of magnetic moment and thermal coefficient of permanent magnets on annealing temperature and length/diameter ratio 02 p0232 A66-12147

Molybdenum machine parts produced by plasma powdering process, noting improvement due to annealing 04 p0525 A66-13434

Audiofrequency hysteresis loops and initial permeabilities of single-crystal yttrium iron garnet cores with annealing and silicon substitution 04 p0562 A66-13750

Isochronal annealing from 80 to 360 degrees K of defects induced by 45-mev electrons in floating zone and pulled n-type silicon 05 p0742 A66-15873

Thorium dioxide strengthened nickel and nickel molybdenum alloys, discussing production via selective reduction, strength, creep rupture, stability and ductility characteristics 06 p0893 A66-15943

Radiation damage resistance and characteristics of aluminum- and boron-doped silicon solar cells, noting annealing 06 p0809 A66-16567

Gamma irradiated germanium at zero degrees C, studying annealing of recombination center, obtaining life times from transient decay of photoconductivity 06 p0934 A66-17126

Ripening of defects induced by fast neutrons in germanium in course of low temperature annealing 06 p0937 A66-17143

Ion damage and successive annealing of germanium observed by electron microscope 07 p1097 A66-17528

Zone melting effect on mechanical properties of niobium on isochronal annealing after cold swaging 07 p1052 A66-18351

Diffraction contrast analysis, using transmission electron microscope, of two-dimensional defects present in mechanically damaged silicon after annealing 07 p1109 A66-18516

Isothermal annealing effect on internal friction and Young modulus of cold-rolled aluminum with different purities 08 p1240 A66-19088

Annealing and diffusion processes effect on lifetime of minority carriers in p-silicon used in production of rectifiers 08 p1272 A66-19245

Molybdenum single crystal dislocation redistribution and subgrain boundaries formation during annealing at high temperatures 09 p1391 A66-20873

Tensile, static notch, stress rupture, creep and salt stress corrosion tests at appropriate temperatures, evaluating effect of solution annealing temperatures of Ti-8Al-1Mo-1V 12 p1892 A66-23625

Carbide formation from beta-titanium and graphite 12 p1895 A66-24377

Annealing of deformed sodium, noting activation energy distribution annealing kinetics, etc 12 p1897 A66-24923

Cosmic annealing of Chesterville meteorite 14 p2330 A66-27349

Anisotropy and annealing behavior in extrinsic single-crystal tellurium studied by measuring electric resistivity and Hall coefficient 15 p2562 A66-28725

Phase transformations in titanium alloys annealed at high temperatures and subjected to aging processes 15 p2522 A66-29181

Hardenability /ratio between phase transformation and cooling rates at given point of sample cross section/ in several titanium alloys after annealing 15 p2522 A66-29190

Effect of annealing and aging on structure, hardness, strength and plasticity of VT15 alloy welds 15 p2523 A66-29192

Effect of annealing in magnetic field on structural and magnetic properties of thin films prepared from nickel alloy 16 p2774 A66-30695

Effect of annealing on thin gold films sandwiched between two evaporated layers of zinc sulfide, presenting resistance curves 16 p2779 A66-31083

Arsenic overpressure, obtained by including metallic arsenic along with gallium arsenide, depresses defect concentration identifying primary defect species as arsenic monovacancies 16 p2779 A66-31086

Annealing of lightly deformed columbium single crystals with parallel twins or parallel and intersecting twins 16 p2726 A66-31461

Fluorescence bands produced by electron bombardment of ZnSe show threshold of annealing stages of radiation damage 17 p2985 A66-33154

Recrystallization of Ge and Si thin films and structural changes due to electron bombardment and thermal annealing 17 p2988 A66-33456

Temperature dependence of sputtering yields of germanium under low energy ion bombardment, observing atom ejection patterns above annealing temperatures 19 p3436 A66-35422

Welding and annealing procedures for fabrication of Nb alloy liquid metal loop and operation in boiling alkali metals 19 p3370 A66-36139

Chemical vapor deposited thermoprotective coatings for tungsten- and molybdenum-based refractory alloys, discussing diffusion barrier selection, interfacial microhardness, high temperature diffusion-annealing tests, etc 19 p3383 A66-36142

Molybdenum machine parts produced by plasma powdering process, noting improvement due to annealing 20 p3575 A66-38136

Radiative recombination in annealed electron irradiated zinc doped gallium arsenide 24 p4250 A66-42229

Superconductivity degradation in betungsten structure compounds, niobium selenide and niobium aluminide, noting tin loss and transition temperature for high temperature annealing 24 p4257 A66-42614

Birefringence recording device for measurements within very short wavelengths, describing photoelastic applications for identifying degrees of annealing and homogeneity of glass 24 p4292 A66-42965

## ANNUAL VARIATION

Atmospheric ozone variations, distributions, continents and planetary circulation according to IGY data 05 p0674 A66-15222

Annual variations of ionospheric absorption at medium and long wavelengths measured by A3 method at midlatitudes 08 p1220 A66-19779

Annual variation of auroral absorption attributed to frictional interaction between streaming plasma and geomagnetic field 10 p1530 A66-21161

Correlation between amplitudes and phase angles of first two harmonics of monthly mean Sq and solar activity for period 1905-1960 14 p2376 A66-27395

Speculative mean monthly Arctic stratospheric temperatures estimated from radiosonde and meteorological rocket wind and temperature data 16 p2696 A66-30928

Low and medium frequency absorption measurements at steep ionospheric incidence for demonstrating diurnal, annual and sunspot cycle changes in lower

ionosphere 19 p3351 A66-36360  
 Iterative method for extracting annular and Chandlerian terms of variation of Earth rotation from experimental data of universal time 20 p3550 A66-37410  
 Magnetosphere tail, annular magnetospheric configurative variation and seasonal variation in polar cap magnetic intensity 20 p3657 A66-38229  
 Annual variations of ionospheric absorption at medium and long wavelengths measured by A3 method at midlatitudes 21 p3732 A66-38775

**ANNULAR FLOW**  
 Behavior of unassisted annular cowed compressor intakes under cross-flow conditions [AIAA PAPER 65-707] 01 p0130 A66-10945  
 Heat transfer and shear between coaxial cylinders of different temperatures for large Knudsen numbers 03 p0445 A66-12959  
 Conductive heat transfer through gases contained between two concentric cylinders, comparing results with different methods [ASME PAPER 65-HT-4] 04 p0595 A66-13390  
 Laminar flow of viscous electrically conducting fluid through annular channel in presence of transverse magnetic field 04 p0551 A66-13824  
 Laminar and turbulent flow in eccentric annular ducts compared 04 p0511 A66-13938  
 Heat transfer by laminar forced convection for dissipative fluid in annulus calculated, using complex variable method 04 p0598 A66-14211  
 Film boiling of saturated nitrogen flowing upward in vertical heated tube, noting annular-flow regime change to vapor matrix [ASME PAPER 65-WA/HT-26] 05 p0793 A66-15677  
 Radial variation of circumferential-average flow properties inside turbomachine blade row [ASME PAPER 65-WA/GTP-1] 05 p0608 A66-15717  
 Slip and compressibility effect on velocity and pressure drop characteristics of rarefied gas flows in rectangular and annular ducts [ASME PAPER 65-FE-20] 06 p0871 A66-16218  
 Temperature distribution in homogeneous eccentric annular layer with constant internal heat generation 06 p0971 A66-16471  
 Vortex flow of incompressible viscous fluid bounded by two parallel finite flat plates [AIAA PAPER 66-88] 07 p1026 A66-18454  
 Annular flow and two-dimensional forced convective boiling heat transfer to hydrogen in nucleate and film boiling regimes 08 p1316 A66-18832  
 Similarity hypothesis applied to turbulent flow in annulus 09 p1366 A66-20177  
 Heat convection in vertical annular tube filled with mechanically incompressible viscous liquid 09 p1471 A66-20823  
 Unsteady motion of viscous incompressible liquid flow between two concentric cylinders 09 p1368 A66-20828  
 Radial variation of circumferential-average flow properties inside turbomachine blade row [ASME PAPER 65-WA/GTP-1] 10 p1480 A66-21501  
 Behavior of unassisted annular cowed compressor intakes under cross-flow conditions [AIAA PAPER 65-707] 10 p1594 A66-21890  
 Heat-transfer coefficient for annular dispersed flows in absence of vaporization, explaining high values obtained by flux profile effect 12 p1973 A66-23523  
 Elastico-viscosity, cross-viscosity and suction variation effects on rheological behavior of fluid moving steadily past porous circular cylinder and between two coaxial right circular cylinders 12 p1865 A66-24808  
 Temperature effect on motion stability of fluid between rotating cylinders 14 p2415 A66-28323  
 Vortex tube with double row nozzle, discussing energy separation efficiency, velocity profile, temperature characteristics, etc 16 p2685 A66-30801  
 Incompressible viscous conducting flow between two concentric cylinders in radial magnetic field 16 p2765 A66-31376  
 Flow field, pressure drop and friction factor characteristics of turbulent flow in

eccentric annular ducts 16 p2690 A66-31656  
 Resistance coefficient calculation procedure for turbulent flow in circular pipes extended to case of annular conduits 17 p2906 A66-32034  
 Viscous incompressible fluid motion between two parallel planes and between two co-axial circular cylinders with one boundary moved by impulse 17 p2916 A66-33418  
 High performance annular Hall-current accelerator using radial magnetic field and axial electric field with cesium as propellant [AIAA PAPER 65-300] 19 p3450 A66-35614  
 Pulsating laminar flow of viscous incompressible conducting fluid in annular channel between circular cylinders under radial magnetic field, solving MHD equations 19 p3432 A66-36643  
 Annular vortices method applied to determine aerodynamic characteristics of lifting propeller in axial and oblique flows 23 p4010 A66-41785  
 Sliding magnetic field effect on electric current in conducting annular channel flow, noting energy-transfer efficiency and acoustic resonance 23 p4107 A66-42030  
 Slow steady viscous flow through annulus between porous circular cylinders with uniform arbitrary injection and suction velocities, calculating wall porosity effect on velocity and pressure distributions 24 p4193 A66-42156

**ANNULAR JET**  
 Fluid digital amplifiers of axisymmetric focused jet design, based on focused-jet stalling effect known in ground effect vehicle aerodynamics 09 p1332 A66-20322  
 Ground effect takeoff and landing /GETOL/ aircraft, noting problems in controlling it and configurations of annular jet 16 p2635 A66-31396

**ANNULAR NOZZLE**  
 Unsteady laminar forced and free convection in coaxial sector tubes in presence of constant axial temperature gradient, accounting for oscillation and resonance 13 p2210 A66-26719  
 Feasibility of rocket motor using detonation wave rotating in annular combustion chamber wherein propellant is injected continuously and expelled through annular nozzle 18 p3162 A66-33807  
 Annular nozzle shapes established via method of straight line characteristics, noting flow patterns at various regions 23 p4009 A66-41731

**ANNULAR PLATE**  
 Approximate yield conditions for perfectly plastic annular plate under combined tension and bending, noting shallow shell problem 03 p0437 A66-12932  
 Classical theory of flexural motions of elastic plates used to determine natural frequencies of uniform annular plates for nine combinations of boundary conditions 10 p1616 A66-21490  
 Membrane creep and plastic deformation of annular flat plate bounded by concentric circles and subjected to evenly distributed pressure 12 p1958 A66-23710  
 Plate loaded over ring-shaped zone, determining bending moment, torque and shearing force 12 p1967 A66-24111  
 Linearized surface pressure distribution on streamlined ducted bodies in axisymmetric flow, considering aerodynamic loading on annular airfoil 13 p1993 A66-26716  
 Stress distribution in thin circular annular disk, rotating with variable angular velocity, having transient shearing stress applied on outer edge 15 p2510 A66-29732  
 Elastic large-deflections of annular membrane treated by modified Föppl-von Karman equation 17 p3024 A66-32359  
 Stress-strain state of annular plate made of incompressible nonlinear elastic material, noting power function describing relation between maximum tangential stress and displacement 17 p3026 A66-32596  
 Stability of annular plate with nonuniform stress field and nodal diameters arising with stability loss, obtaining solution for radial force intensity ratio 17 p3026 A66-32597  
 Elastoplastic bending of thin annular plates with free inner edge, based on Mises yield condition and Hencky stress-strain relation 20 p3671 A66-38102

Lateral buckling of annular plate compressed radially at inner or outer edge 20 p3674 A66-38229  
 Time-dependent stress distribution annular hereditary-elastic cylindrically anisotropic plate 22 p3989 A66-3989

**ANNULUS**  
 Elastic strip and elastic annulus differential-difference equations, using Fourier transforms and analytic continuation 11 p1780 A66-2247  
 Series in function of complex variable applied to mixed problem of equilibrium of annulus 15 p2607 A66-286  
 Plane contact problem for circular ring a elastic or absolutely rigid disk, using method of successive approximations 18 p3252 A66-337

**ANODE**  
 SA ANION  
 SA CATHODE  
 Progressive modification of anode surface of negative point-to-plane system used in corona discharge with microcrystals becoming seat of luminous phenomena 03 p0395 A66-129  
 Anode current in cut-off smooth-beam magnetron 14 p2248 A66-270  
 Additional measurements from electrostatic magnetic field interactions and power limitations in coaxial filament and anode geometry in electron bombardment heater thruster 17 p2990 A66-3247  
 Hydrogen ions detected near anode of glow discharge at various pressures, using mass spectrometer 19 p3410 A66-3647  
 Transient charge and discharge currents in tantalum oxide with anodic electrolyte at tantalum oxide with anodic metal 19 p3448 A66-367  
 Anodic oxidation process for sliced examining current flow in strong electric field as function of time, Curie-Schweidler law and Tafel law 19 p3448 A66-367  
 Electrolysis of wet hydrogen fluoride noting analysis of anode products by gas chromatography and water content measurement by IR spectroscopy 23 p4118 A66-412

**ANOMALY**  
 SA GEOMAGNETIC ANOMALY  
 SA MAGNETIC ANOMALY  
 Bjerrhammar gravimetric boundary value problem with gravity reduction defined integral equation 19 p3345 A66-353  
 Anomalous photocurrent generation transistors, noting carrier generation a transport processes 20 p3526 A66-373  
 Anomalous photovoltaic effect in semiconductor Ge, Si, CdTe and GaAs thin films due to photodiffusion and microtransitions 20 p3620 A66-377

**ANOXIA**  
 Effects of cold and abnormal atmosphere discussing tolerance limits to hypercapnia anoxia induced hypothermia and hypoxia 04 p0464 A66-140  
 Respiration and anoxia, noting anoxia, reduced oxygen carrying capacity blood and inadequate flow of oxygenated blood to tissues 10 p1488 A66-221  
 Increased blood circulation for compensating anoxia by changes in cardiac output, blood distribution and red blood cell volume 10 p1489 A66-221  
 Anoxia effect on central nervous system forms of personality, vision and consciousness impairment 10 p1489 A66-221  
 Anoxia induced changes in normal cellular metabolism as evidenced by oxidative reduction system, lactic acid and glucose content and nerve conduction 10 p1489 A66-221  
 Radiation-protective agents /anoxia, serotonin, amino thiols/ tend to increase sulfhydryl groups in mice spleen a Ehrlich ascites carcinoma cells 17 p2861 A66-328  
 Prolonged exposures to acute anoxia cause reductions in viability of hydrated r seeds, findings suggest helium may harmful as atmospheric component manned space capsules 22 p3855 A66-404

**ANTARCTICA**  
 Radiation measurements made at Antarctic station at Mirny including solar radiative total radiation and short and long wave

- reflection and radiation  
 alance 02 p0220 A66-11260  
 Comparison of diurnal variations of  
 onization level in F region at geographically  
 and geomagnetically conjugate stations in  
 Arctic and Antarctic 04 p0516 A66-13851  
 Airborne albedo measurements of ice in  
 loss Sea, Antarctica, for various solar  
 elevations and altitudes 05 p0669 A66-14937  
 Airborne albedo measurements of various  
 representative underlying surfaces in  
 Antarctica 05 p0669 A66-14938  
 Cosmic radiation measured by neutron  
 monitor in Antarctic during enhanced solar  
 activity in September 1963, determining  
 ares connected with particles producing  
 orbrush effects 07 p1118 A66-17642  
 Effects of AZA and PCA on radio wave  
 ropagation in Antarctic, noting reliability  
 nd radiation power  
 equirements 12 p1817 A66-24275  
 Rocket observation of atmospheric density  
 t high latitudes in Arctic and Antarctic  
 ocations  
 AIAA PAPER 66-345] 12 p1872 A66-24485  
 Flows and fractures as types of  
 eformation occurring on Earth under huge  
 ads of ice suggested by isostatic  
 ompensation of Antarctica, Arctic basin and  
 aciated region in North  
 merica 12 p1875 A66-24894  
 Satellite signals wave polarization by  
 onosphere above  
 Antarctic 18 p3106 A66-34366  
 Glassy spherules found in precipitate of  
 melted ice in Antarctica may be cosmic dust  
 articles /microtektites/ 19 p3465 A66-36389  
 Antarctic pack ice boundaries established  
 rom TV and IR pictures taken by Nimbus I  
 eteorological satellite 21 p3735 A66-39491  
 Double cloud vortex near Antarctica  
 etected by Nimbus I high resolution  
 R 22 p3942 A66-40053

 Aperture antenna subdivided into reflector,  
 horn, lenses, surface and leaky wave  
 antennas 04 p0491 A66-13403  
 Minimal number of controlled elements for  
 antenna array of point transmitters with

electrical scanning distributed uniformly along straight line 04 p0483 A66-14049

Circular array phased to produce main beam in one direction by feeding elements from set of series-connected phase shifts 04 p0500 A66-14105

Energy calculation as time function required to switch toroidal ferrimagnetic core from one remanent state to another, considering core type used in antenna phased arrays 05 p0642 A66-14564

Current and directive gain for maximum directivity of orthogonal antenna array with individual elements possessing directivity 05 p0651 A66-15879

Relationship between two-and three-channel monopulse systems, with some logical extensions to various symmetrical configurations 06 p0824 A66-15981

Concentric ring antenna arrays with low sidelobes, estimating currents from Fourier-Bessel series 06 p0825 A66-16017

Antenna array excitation for maximum power gain in terms of network parameters defined at input terminals 06 p0843 A66-16022

Minimization of grating lobes in slotted waveguides as array elements by using linearly nonuniform array with equal power division between elements 06 p0827 A66-16034

Integration of Poynting vector over real and imaginary space to determine input admittance of one slot in infinite planar array as function of beam pointing direction 06 p0827 A66-16041

Impedance variation in scanning arrays approximated without beam forming and steering system 06 p0850 A66-16398

Equation determining maximum spacing between adjacent array elements in scanned antenna, considering sidelobe level 06 p0851 A66-16456

Angular-frequency sensitivity of antenna arrays and relation to feeder waveguide 06 p0859 A66-17183

Optimum geometry of nonuniformly spaced antenna arrays improves relation between beamwidth and sidelobe levels 08 p1192 A66-19098

Compact multielement antenna with omnidirectional radiation pattern in horizontal plane and compressed in vertical plane 08 p1193 A66-19106

Comparison of detection and resolution performance of multiplicative and additive aerial array in presence of noise 08 p1193 A66-19119

High-directional spherical antenna array, determining shape of radiation pattern as function of orientation of individual antennas and amplitude distribution of excitation currents 08 p1197 A66-19608

Book on antenna systems of non-Soviet communication links via satellites 09 p1342 A66-19974

Ground antenna for satellite tracking and orbit calculation 09 p1355 A66-20587

Diffraction of plane electromagnetic wave at planar array consisting of thin rectangular plates 09 p1347 A66-20787

Antenna array and radiometer selection for orbiting LF radio astronomical observatory 10 p1507 A66-21122

Shortest short-backfire antenna with two plane reflectors spaced about half-wavelength apart 10 p1510 A66-21648

Celestially referenced electronic space tracking system for augmenting accuracy of existing antenna 10 p1505 A66-21895

Ground diffraction pattern caused by radio wave reflection from F region, using array of three aerials 11 p1651 A66-22374

Space-tapered array analysis, noting that very few yield reasonably low sidelobe level and none are optimum 11 p1662 A66-22542

Wide-angle impedance matching /WAIM/ method reducing variation of reflection coefficient with scan angle and polarization by dielectric sheet located in front of array antenna face 11 p1663 A66-22547

Moderately superdirective antenna with directivity slightly greater than uniform-current distribution of same size 11 p1664 A66-22560

Unequally spaced array antennas, noting broadband characteristics, high resolution, radiation patterns, etc 11 p1664 A66-22637

Cross correlation radar system for mapping of target distribution 12 p1813 A66-23789

Asymmetric nonuniformly spaced antenna array design by orthogonal function expansion of radiation pattern, using Schmidt orthogonal method 12 p1836 A66-24301

Phase shifters for signals arriving from North-South arm elements of Northern Cross radio telescope reflector antenna array 12 p1836 A66-24304

Antennas, microwaves, electron devices - IEEE International Convention, New York, March 1966 12 p1838 A66-24613

Superdirective array of normal mode helical dipoles 12 p1840 A66-24625

Explicit relation between mutual coupling and radiation pattern of array antenna evaluated via scattering formalism, based on spherical modes 12 p1841 A66-24627

Nonuniformly spaced antenna array synthesis using lambda function via Chebyshev-Gauss quadrature and Hankel transform 12 p1841 A66-24629

Fresnel zone beam scanning antenna array, considering patterns, maximum scan ability and effect of interelement spacing 12 p1841 A66-24633

Electronically despun switched antenna using variable phase shifters to control phase of incident power to circular array of elements [AIAA PAPER 66-302] 12 p1844 A66-24769

Electronic self-steering techniques applied to satellite communications systems with high gain antennas, noting transdirective array and self-phasing array [AIAA PAPER 66-326] 12 p1824 A66-24796

Vertical incidence fading amplitude experiment using array of receiving antennas, obtaining data on ground diffraction pattern of reflected radio waves, noting correlation function shapes 12 p1824 A66-24840

Bilinear transformation reduces linear uniformly spaced array to examination of rational fraction on imaginary axis of complex plane 13 p2029 A66-25202

High resolution East-West antenna array for solar studies designed to operate at 408 mc 13 p2180 A66-25428

Radar observation of Sun, noting continuous wave transmitter, antenna, etc 13 p2022 A66-25537

Aperture synthesis technique for increasing information rate to radio astronomy array by rejecting restriction of fractional bandwidths 13 p2037 A66-25553

Antenna drive with feedback control system for radio telescope, noting design, construction and operation 13 p2038 A66-25640

Antenna array response to pulse compression signals, showing dependence of array response on compressed pulse shape 13 p2023 A66-25665

Noise suppression, signal reception, and polarization measurement in cross correlated antennas as function of dipoles imbedded in random field, surrounding noise field and coherency matrix of cross correlation function 13 p2044 A66-26746

Yagi-Uda antenna array discussing wave theory of semiinfinite and finite arrays, excitation by reflected wave proportional to incident wave and King-Sandler theory 14 p2255 A66-27907

Swept frequency antenna gain measurements, evaluating mismatch losses at feedpoint and obtaining gain-frequency curves 14 p2256 A66-27911

Log periodic Yagi-Uda dipole antenna array and extension of frequency bandwidth 14 p2256 A66-27920

Theoretical gains and current distribution in supergain endfire antenna arrays 14 p2256 A66-27922

Distant-field antenna model of current sheet array used to approximate ultimate decay of mutual coupling in planar array antenna 14 p2257 A66-27926

Asymptotic behavior of coupling coefficients of infinite array of thin walled rectangular waveguide 14 p2257 A66-27927

Gain optimization problem for antenna arrays responding to quasi-monochromatic periodic signal 14 p2240 A66-27929

Antenna array output SNR and directive

gain indices optimization 15 p2455 A66-2855

Passive series fed generation of multiple radar beam from single aperture 15 p2455 A66-2855

Multibeam hexagonal triangular-grip planar arrays 15 p2455 A66-2855

Phase array antenna system based on 4 element subarray 15 p2455 A66-2855

Internally and externally observable mutual coupling effects and seriousness in closely spaced arrays used for electronic scanning application 15 p2456 A66-2855

Cumulative coupling and impedance mismatch and radiation pattern problems in large uniformly spaced flat phase array 15 p2456 A66-2855

Wide angle impedance matching /WAIM/ of planar array antenna by dielectric sheet for reduction of reflection coefficient variation with scan angle and polarization 15 p2456 A66-2855

Dichroic Cassegrain subreflector utilized array of nonresonant elements 15 p2457 A66-2855

Antenna array receiving line-of-sight ground-to-ground transmissions over 28-km path, measuring amplitude and relative phase of arriving wave, noting perturbations in amplitude 15 p2461 A66-2855

Eigenvalues design method for nonuniformly spaced arrays that will approximate any required radiation pattern 15 p2463 A66-2904

Large aperture antenna arrays analyzed as means of increasing space communication capability 17 p2872 A66-3195

Angular discrimination improvement in radar beacon systems using null-type antenna superposed on normal directional beam 17 p2872 A66-3195

Height finding technique using phase-space principle for radar system with single antenna and feed structure 17 p2872 A66-3195

Minimal number of controlled elements in antenna array of point transmitters with electrical scanning distributed uniformly along straight line 17 p2884 A66-3225

Probability distribution of phase difference between two spaced antennas excited by random fan of rays plus specular component 17 p2874 A66-3235

Haar theorem for synthesis of nonuniformly spaced linear discrete antenna arrays 17 p2886 A66-3235

Beam position selection and antenna location connection to receiver processing channels in multiple-beam receiver system 18 p3074 A66-3325

Beamwidth and operating regions for patterns for space tapered arrays 18 p3074 A66-3325

Calibration of spherical reflector at Arecibo Ionospheric Observatory antennas using analytical photogrammetric methods 18 p3075 A66-3374

Coherent optical system for simplifying signal processing from antenna arrays in simultaneous beam forming and correlation 18 p3069 A66-3425

High scanning frequency for transmitting radar information to vehicles with beams arranged to form coded pulse signal 18 p3070 A66-3425

Vertically-fed steerable parabolic reflector system for communications satellite Earth station 18 p3081 A66-3425

Antenna design techniques, describing methods of improvement in resolution and sensitivity of radio telescopes 18 p3081 A66-3425

Accuracy limitations in control of construction of large steerable parabolic antennas 18 p3081 A66-3425

Electronic compensation for phase errors in surface profile of reflecting antennas 18 p3081 A66-3425

Optimum number of arrays for hemispherical coverage in electronically steerable antenna 18 p3084 A66-3435

Antenna structure analysis by finite element method and energy method considering Cassegrain antenna 18 p3255 A66-3435

High-gain surface wave antenna arrays for satellite communication, comparing volumetric array and parabolic dish antenna 18 p3085 A66-3435

High-directional spherical antenna array, determining shape of radiation pattern as function of orientation of individual antennas and amplitude distribution of excitation currents 18 p3088 A66-34964

Statistical characteristics of radiation pattern of antenna array with randomly positioned radiators determined from density distribution of radiators 19 p3311 A66-35306

Angular-frequency sensitivity of antenna arrays and relation to feeder waveguide 19 p3314 A66-35541

Information theory criterion applied to nonlinear processing antenna systems yielding optimum system, considering SNR 19 p3318 A66-35885

Current magnitude and phase associated with individual elements of slot Yagi-type antenna array on planar and curved surfaces 19 p3321 A66-36406

Doppler tracking loops for antenna array system adaptive to changes in signal and noise levels, maintaining constant SNR in tracking loop 19 p3321 A66-36413

Space factor of linear array with isotropic sources determined, using illumination function and convolution theorem 19 p3321 A66-36414

Directive gain characteristics of nonuniformly spaced arrays, plotting values representing gain of space tapered arrays as function of elements, optimized gain vs number of elements, etc 19 p3321 A66-36415

VHF aircraft antennas for propagation and communication via synchronous satellite, discussing nose radome yagi and window cavity arrays 20 p3525 A66-37235

Japanese antenna engineering, discussing linear, microwave, slot and plate antennas, arrangement, radiation and temperature characteristics, etc 20 p3529 A66-37704

Antenna radiation pattern synthesis for various array distributions, noting methods applied 20 p3529 A66-37706

Slot antenna research, discussing arrays and polarization characteristics 20 p3530 A66-37710

Folded antennas, discussing Franklin array and current distribution via equivalent circuit analysis and application for TV transmission and reception 20 p3530 A66-37712

Scanning antenna operating principles, noting adjustment of directivity to receive radio waves from long distance 20 p3530 A66-37713

Medium frequency, FM, VHF and UHF TV broadcasting and receiving antennas 20 p3530 A66-37717

Formula derivation for directivity of short endfire antenna array, obtaining current amplitude and phases for maximum gain 20 p3531 A66-37725

Multielement antenna scanning grid-phasing method having random function distribution at aperture 20 p3533 A66-37994

Transhorizon microwave propagation measurements using rapidly scanning phased-array antenna 20 p3520 A66-38356

Iterated theoretical admittance of cylindrical antenna, determining effective length and approximating ideal independent susceptance 20 p3534 A66-38365

Point detector array design for optimal detection of known spatially invariant signal fields corrupted by additive, zero-mean, covariance-separable and spatially isotropic noise field 21 p3711 A66-39136

Short distance receiving radiation field pattern of phase-biased array of two isotropic point antennas 21 p3713 A66-39373

Erectable antenna for S-band communication between LEM and Earth 21 p3714 A66-39522

Diffraction of plane electromagnetic wave at planar array consisting of thin rectangular plates 22 p3862 A66-39846

Rake system equipment for tropospheric scatter, noting delay-resolution capabilities and circuit stability 22 p3865 A66-40067

Space antenna arrays - WESCON, Los Angeles, August 1966 22 p3881 A66-40747

Adaptive antenna system circuitry for maximum signal to noise ratio of signals reaching ground station from deep space probe 22 p3881 A66-40750

Antenna patterns for spacecraft antenna

array with aperiodic arrangement of large elements provide high aperture efficiency 22 p3882 A66-40751

Electronically despun antenna and electronically controlled phase shifters to increase transmitter output power for spin-stabilized communication satellites 23 p4036 A66-41142

Auroral disturbances resulting in multipath distortion in propagation by ionospheric reflection and description of chirp ionosonde and antenna systems 23 p4036 A66-41143

Angle of arrival in amplitude-comparison monopulse antenna arrangement including thermal noise as interference and pulsed radar with ideal radar target 23 p4044 A66-41314

Spaced antenna reception by quadratic addition of signals providing efficient operation at various statistical characteristics of radio channel 23 p4038 A66-41518

Complexity and reliability of telemechanics systems and distribution law of number of interrogations for telemechanics systems with dispersed objects 23 p4038 A66-41570

Impedance of flat strip antenna embedded in planar dielectric slab surrounded by layers of compressible isotropic electron plasma 23 p4047 A66-41639

Jupiter radiation recorded almost every night with antenna arrays shows emission dependency on Jupiter longitude and Io position 23 p4131 A66-41817

Antenna systems for deep space communication emphasizing ground station, balancing of ground antenna aperture with spacecraft performance, arrays, etc 24 p4171 A66-42244

Wide frequency bandwidth properties of arrays of shunt slots in ridged waveguide 24 p4187 A66-43194

Electromagnetic excitation of spherical radially laminar medium with interfaces solved rigorously by derived algorithm 03 p0331 A66-12286

Reciprocity of radiation patterns of receiving and transmitting antennas in assessing performance 03 p0341 A66-12523

Design and installation of antennae for airborne command and control systems, noting antenna system for SAC Airborne Command Post [AIAA PAPER 65-730] 03 p0334 A66-12581

Linear superdirectional antennas discussing directional properties and formulas for optimal directive gain stability 03 p0337 A66-13315

Antenna characteristics, design and selection noting use in broadcasting, radio navigation, etc 04 p0491 A66-13401

Plasma sheaths on radiation patterns of antennas on hypersonic vehicles, noting permittivity and transmission loss 04 p0474 A66-13426

Sampling of independent orthogonally polarized antenna output to increase signal levels at least 10 decibels over one-antenna systems 04 p0481 A66-13729

Algorithm derived for processing packet of binary-quantized signals according to maximum likelihood for various types of target fluctuations 04 p0482 A66-13919

Anomalous behavior of radiation resistance of antennas in anisotropic media 04 p0500 A66-14101

Basic radar equation, giving geometrical relationship between radar antenna and target based on antenna gain, aperture and target cross section 04 p0484 A66-14107

Radiation field of single-filament logarithmic-elliptical helical antenna, assuming traveling wave along helix 04 p0501 A66-14408

Fresnel gain of aperture antenna, developing rigorous analytical formula for circular aperture antennas with parabolic tapered illumination 05 p0651 A66-15837

Field of linear array consisting of coaxial spherical antennas, each representing pair of hemispheres separated by narrow clearance with applied voltage 05 p0651 A66-15880

Field amplitude and phase measurements close to number of driven periodic arrays of monopoles used to determine frequency dependence of propagation constant 06 p0825 A66-16016

Cylindrical receiving and scattering antennas, determining current from admittance, charge distribution and near field for incident plane wave 06 p0827 A66-16036

Radiation pattern of slotted-cylinder antenna in presence of inhomogeneous lossy plasma 06 p0827 A66-16045

Current distribution on L-band loop antenna composed of four quarter-circular sections 06 p0850 A66-16446

Blake procedure effectiveness and applicability in computing beam loss of radars, extrapolating for rapid-scan systems 06 p0832 A66-16452

Field-strength measurements at 11 gc over 35 km near-optical path for receiving antenna of variable height in shadow of two knife edges 06 p0836 A66-16982

Aerial radiation patterns, discussing determination through near field pattern processing 06 p0858 A66-16994

Tuning antennas of radio telescopes with flat reflectors by in-phase addition of reflected fields 06 p0859 A66-17193

Circuitry of system for simultaneously

obtaining several independent radiation patterns from one ultra-short-wave receiving antenna 07 p1005 A66-17344

Effect of various geometries on performance and characteristics of helical antennas, considering input impedance and radiation pattern 07 p1006 A66-17474

Electromagnetic field near highly conducting cylindrical antenna of finite length excited by plane electromagnetic wave 08 p1189 A66-18668

Wideband annular-zone directional antenna, with individual radiators arranged in log-periodic concentrated groups on ring fed by conical line 08 p1190 A66-18682

Polarization pattern dependence on phase-amplitude distribution of field at microwave antenna aperture 08 p1190 A66-18912

Spatial radiation patterns of curved high-directivity antenna array as function of amplitude distribution and directivity 08 p1191 A66-18913

Multimode antennas, discussing mode and mode generation, radiation sum and difference pattern control, discontinuity reflections, monopulse antennas, etc 08 p1191 A66-18945

Compact multielement antenna with omnidirectional radiation pattern in horizontal plane and compressed in vertical plane 08 p1193 A66-19106

Radiation pattern of two annular slot-coupled antennas mounted on elongated spheroid 08 p1193 A66-19187

Power flux distribution of symmetrical wave outside and inside antenna septum with anisotropic medium 08 p1193 A66-19189

High-gain narrow-pulse radar antenna with rectangular beam shape in vertical plane, noting design requirements and experimental results 08 p1196 A66-19511

Antenna radiation shows relationship to tangential component of electric field intensity along antenna 08 p1197 A66-19606

High-directional spherical antenna array, determining shape of radiation pattern as function of orientation of individual antennas and amplitude distribution of excitation currents 08 p1197 A66-19608

Transient processes in thin open-loop and closed-loop antennas studied by method that takes transmission line processes into account 08 p1199 A66-19759

Antenna radiation pattern in anisotropic medium such as ionosphere in presence of Earth magnetic field 09 p1340 A66-19842

Admittance measurements for antenna in ionosphere, effect of local magnetic field variations, plasma frequency and gyrofrequency 09 p1341 A66-19854

Transient condition effects on radiation resistance and expansion in linear antennas 09 p1352 A66-20348

Radiation resistance of linear current strip of finite width immersed in uniaxially anisotropic plasma medium 09 p1408 A66-20370

Cross-polarization radiation of axisymmetric mirror antennas 09 p1353 A66-20448

Potential analog synthesis of linear arrays and radiation pattern representation as function of single complex variable 09 p1356 A66-20605

Polarization patterns of microwave antennas with sine-phase /complex/ apertures of rectangular, circular, annular or rhombic form 09 p1356 A66-20771

Antenna field calculations in Fresnel and induction regions 09 p1356 A66-20772

Error assessment in antenna radiation patterns at small distances by means of collimator which shapes plane wave region 09 p1358 A66-20807

Anechoic chamber design for higher measurement accuracies for radar cross section and antenna parameters 10 p1501 A66-21623

Radar range with discretely located passive reflectors for obtaining full scale bistatic radar cross section measurement 10 p1501 A66-21625

Sand table simulation of full-scale ground-plane range 10 p1502 A66-21631

Microwave transmission tests in pure air plasma using hypersonic shock tunnel, obtaining electron density and collision frequency profiles, predicting propagation path signal loss and antenna radiation

pattern distortion [AIAA PAPER 66-173] 11 p1742 A66-22211

Aperture field of leaky-wave antenna of finite length 11 p1661 A66-22394

Angular autocorrelation function of circular-aerial radiation 11 p1662 A66-22397

Correlation method measuring far-field patterns of large-aperture antennas, using radio star sources and auxiliary antenna for providing reference signal for cross correlation with test antenna signal 11 p1662 A66-22540

Tube shaped and solid cylinder antennas compared, calculating surface current distribution and radiation patterns 11 p1662 A66-22543

Feed polarization incident upon conic reflector in antenna system specified in terms of crossed electric and magnetic dipoles 11 p1663 A66-22544

Geometrical theory of diffraction applied to calculation of radiation pattern and impedance of monopole antenna 11 p1663 A66-22545

Electrical and mechanical features of millimeter-wave antenna facility, including measurement of lunar surface during eclipse of December 1963 11 p1770 A66-22551

Radiation characteristics of dielectric coated half-wave resonant slot antenna, examining effects of improper dielectric scaling 11 p1663 A66-22553

Minor lobe suppression in rectangular horn antenna through utilization of high impedance choke flange 11 p1663 A66-22556

Exact expressions for antenna-tracking parameters when transmitter-receiver scattering angle is constant 11 p1653 A66-22557

Quasi-optical design of lens-fed millimeter-wavelength antenna combination whose radiation is of azimuthally symmetric split-beam type 11 p1663 A66-22559

Angular sectors of transparency of scanning antennas with periodic waveguide 11 p1666 A66-22718

Antenna theory, analyzing radio astronomical methods such as antenna axis, radiation pattern, gain, efficiency, etc 11 p1658 A66-23219

Nonsteady radiation field of antenna systems for arbitrary signals via Huygen-Kirchhoff principle 11 p1670 A66-23225

Radiating mechanisms in reflector antenna system including aperture radiation, direct feed radiation and diffracted radiation 11 p1673 A66-23481

Antenna orientation effect on polarization components of radio waves reflected from ionosphere, noting occurrence and properties of magnetoionic component of polarization 12 p1869 A66-24273

Asymmetric nonuniformly spaced antenna array design by orthogonal function expansion of radiation pattern, using Schmidt orthogonal method 12 p1836 A66-24301

Field intensity and polarization characteristics of turnstile antenna with arbitrary phase and amplitude relationship between two exciting elements 12 p1838 A66-24610

Far field simulation of antennas with complex aperture distribution functions 12 p1840 A66-24624

Explicit relation between mutual coupling and radiation pattern of array antenna evaluated via scattering formalism, based on spherical modes 12 p1841 A66-24627

Pattern synthesis method for linear array using integral mean of Fourier approximation 12 p1841 A66-24628

Approximate theory for lumped impedance loaded traveling wave linear antenna, considering possibility of nondissipative loading 12 p1841 A66-24631

Fresnel and Fraunhofer patterns of overmoded feeds and reflector antennas 12 p1841 A66-24632

Fading and multipath propagation mechanism for communication links involving satellites and aircraft with antenna beams, assuming fading models and estimating margin required for FSK teletype transmission [AIAA PAPER 66-294] 12 p1822 A66-24763

Variation of antenna amplification ratio

with distance as function of phase error at antenna aperture with exciter off-focus and error source 13 p2030 A66-25222

Radiation pattern excitation of elongated impedance spheroid by annular slot with uniform field distribution 13 p2042 A66-26044

Modeling and data reduction techniques for obtaining spectrum signatures of low gain LF airborne antennas 13 p2044 A66-26744

Optimum antenna placement within metallic enclosure 13 p2044 A66-26744

First-order formula for component of electric field very near surface and parallel to axis of perfectly conducting center-driven cylindrical antenna 14 p2247 A66-26866

Radiation pattern of dielectric antenna using integral equations, noting differences between real antenna and idealized linear traveling wave antenna 14 p2250 A66-27144

Random error effect on directional gain of sectional parabolic antenna with automatic phasing, setting sections effectively by three control points method 14 p2250 A66-27144

Emission of axisymmetric parabolic antenna with antiphase field distribution at aperture, calculating radiation pattern of principal and cross polarization components of field 14 p2250 A66-27144

High directional antenna with variable aperture and signal processing after frequency conversion 14 p2251 A66-27232

Radiation characteristics of horn antenna analyzed, using edge diffraction theory, noting intensity at backlobe and far sidelobe 14 p2255 A66-27902

Broadband slotted cone antenna exhibiting multioctave bandwidth properties in UHF/VHF range 14 p2256 A66-27911

Mutual and self-impedance of linear antennas in interface between dielectric layers computed, noting cases of symmetric and antisymmetric excitations 14 p2256 A66-27911

Endfire effect in dielectric foam rods and mode control by varying dielectric constant of rod 14 p2256 A66-27922

Stationary phase technique synthesis of continuous linear antenna and integral equation for determining radiation pattern 14 p2259 A66-28151

Vector potential representation of planar logarithmic spiral antenna field 14 p2259 A66-28151

Linear superdirectional antennas, discussing directional properties and formulas for optimal directive gain, stability 14 p2242 A66-28282

Electromagnetic and acoustic wave coupling in homogeneous compressible isotropic plasma and diffraction by half plane due to sharp structural discontinuities in antenna configurations 15 p2448 A66-28558

Antenna tolerance theory, presenting axial loss of gain and pattern degradation as function of reflector surface rms error 15 p2462 A66-29022

Eigenvalues design method for nonuniformly spaced arrays that will approximate any required radiation pattern 15 p2463 A66-29022

Radiation pattern of dielectric coated cylindrical core loop antenna in lossy plasma sheath 15 p2452 A66-29711

Ionospheric sounding using random diffusion of electromagnetic wave by ionospheric plasma with continuous wave through two separate antennas 16 p2653 A66-30955

Transmitting antenna of Cassegrain type, noting conical horn, primary and secondary mirror, etc 16 p2661 A66-30955

Geometrical characteristics of framework and reflecting surface of ionospheric diffusion probe antenna, noting specifications on design, manufacture, erection, alignment and adjustment 16 p2662 A66-30955

Coherent optical systems in signal processing techniques, information theory and antenna pattern simulation 16 p2657 A66-31224

Design and testing of cross polarized feed for 10 ft diameter parabolic dish, noting coincidence of focal and aperture plane 16 p2666 A66-31566

Boresight shift in phase sensing monopulse antennas due to reflected signal 16 p2667 A66-31644

Equivalent linear antenna substitution for antenna with plane aperture in statistical analysis of antennas 17 p2879 A66-31861

Directional properties of surface antennas with linear, squared and cubic phase distortions for symmetrical and asymmetrical amplitude distribution laws 17 p2880 A66-31903

Determination of radio brightness distribution across sky dependent upon conditions of radio telescope operation 17 p2999 A66-32236

Characteristics of lunar radio emission considered, taking into account averaging effect of antenna radiation pattern 17 p2999 A66-32237

Optimization of radiation characteristics of satellite mounted antennas 17 p2894 A66-32990

Radiation characteristics of circular aperture and linear antenna with partially coherent illumination 18 p3074 A66-33536

Radiation fields of center-fed cylindrical antenna surrounded by plasma sheath, graphically presenting far-field patterns and surface wave fields 18 p3141 A66-33538

Radiation from spherical aperture antenna immersed in compressible plasma 18 p3066 A66-33541

Beamwidth and operating regions of patterns for space tapered arrays 18 p3074 A66-33543

Array of circumferential slots on large cylinder as omnidirectional antenna 18 p3074 A66-33544

Source distribution determination from radiation pattern and field amplitudes expressed as Fourier transform pair 18 p3066 A66-33545

Near field phase and amplitude measurements of small radiating structures, using standard microwave equipment 18 p3075 A66-33619

Instant antenna patterns for estimating far field characteristics, noting location of peaks and zeros of radiation patterns, voltage ratios, etc 18 p3077 A66-34063

Radiation pattern of ground surveillance radar antenna measured with aid of airborne signal generator 18 p3070 A66-34266

Tolerance theory for parabolic reflector antenna, noting gain and radiation-pattern distortion 18 p3082 A66-34285

Diffraction pattern analysis of fields generated by hoghorn-fed Cassegrain antenna operating in Fresnel zone 18 p3083 A66-34289

Optimum shape of feed patterns for paraboloidal antennas 18 p3083 A66-34293

Improved feed synthesis using multimodes for large circular paraboloids at Parkes 18 p3084 A66-34310

Amplitude-comparison tracking antenna utilizing parabolic reflector, determining parameters from radiation patterns 18 p3086 A66-34396

High-directional spherical antenna array, determining shape of radiation pattern as function of orientation of individual antennas and amplitude distribution of excitation currents 18 p3088 A66-34964

Radiation pattern of linear nonequidistant antenna array 19 p3311 A66-35307

Tuning antennas of radio telescopes with flat reflectors by in-phase addition of reflected fields 19 p3314 A66-35551

Coupled waveguides structure proposed as leaky-wave antenna, extending previous coupled-mode theory 19 p3320 A66-36401

Broadband signals effect on far-zone field of linear arrays studied in terms of energy radiation pattern 19 p3320 A66-36402

Electric dipole radiation through finite conical plasma sheath about reentry vehicle, calculating radiation pattern 19 p3304 A66-36403

Radiation pattern synthesis for circular aperture horn antennas, assuming aperture distribution consisting of fields of cylindrical waveguide modes and by linear combination of radiation pattern functions 19 p3320 A66-36404

Scale model of submerged VLF antenna using lossy ceramic powder to model ice and snow for submarine communication, geophysics, etc 19 p3321 A66-36416

Radiated fields for plasma external to dielectric coating surrounding biconical

antenna, equivalent circuit developed for terminating impedance 19 p3305 A66-36422

Radio astronomy instrumentation, describing antenna parameters, design characteristics, instrumentation needs, etc 20 p3524 A66-36962

Gain loss ratio between one antenna and two antennas used to analyze antenna gain loss for long-range tropospheric propagation of ultrashort waves 20 p3525 A66-37124

Dual beam technique and antenna used to observe variations in flux of radiosource 3C 273 20 p3650 A66-37344

Axially oriented point source current and filament with triangular current distribution in magnetoionic medium, examining ion sheath effect on radiation characteristics 20 p3516 A66-37624

Near electric field of antenna in magnetoactive plasma, noting frequency effect 20 p3529 A66-37637

Antennas with leaky wave characteristics, noting similarities and differences with wave diffraction 20 p3529 A66-37707

Power transmission, gain, directivity pattern and reception between large aperture antennas in near-field region 20 p3529 A66-37709

Antenna measurement for input impedance, gain and directivity characteristics 20 p3531 A66-37722

Algorithm derived for processing packet of binary-quantized signals according to maximum likelihood for various types of target fluctuations 20 p3518 A66-37877

Vehicle structures combining as antenna functions, using spaces between bolts of flange joints as slot antennas 20 p3533 A66-38260

Two-dimensional reflector with large angular field theoretically and experimentally studied, using geometrical optics 21 p3710 A66-38745

Generalized reciprocity theorem for antenna systems containing anisotropic media and antenna systems radiating directly through arbitrary apertures 21 p3711 A66-38835

Radio astronomy satellite with extendible antennas achieves gravity gradient stabilization while receiving electromagnetic radiation, analyzing dynamic behavior and effect of passive damper 21 p3820 A66-38863

Parabolic reflector design modified to reduce temperature noise level by increasing diameter and extending cylindrical mantle around antenna rim 21 p3714 A66-39513

Radio source flux density relation to antenna temperature studied, using antenna integral and convolute integral 22 p3862 A66-39814

Polarization patterns of microwave antennas with sine-phase /complex/ apertures of rectangular, circular, annular or rhombic form 22 p3873 A66-39830

Antenna field calculations in Fresnel and induction regions 22 p3873 A66-39831

Bornis U function applied to design of electron tube having drift space between collector and grid controlling current 22 p3876 A66-40173

Angular sectors of transparency of scanning antennas with periodic waveguide 23 p4045 A66-41456

Antenna radiation theory, noting reiteration of incorrectness of infinity catastrophe theory and application to oscillating dipole in uniaxial medium 23 p4047 A66-41633

Radiation resistance of antennas in magnetoplasma, considering inapplicability of reversible power concept to steady state mode 23 p4047 A66-41634

Propagation and radiation of radio waves from dielectric coated prolate spheroidal core loop antenna surrounded by plasma sheath 24 p4184 A66-42745

# ANTHEUS AIRCRAFT

S ANTONOV AN-22 AIRCRAFT

# ANTHRACENE

Directional intensity and decay time of scintillations from anthracene and p-terphenyl single crystals under alpha particle bombardment 11 p1750 A66-22465

Excited-singlet even parity states of anthracene in near UV, noting role of absorption spectroscopy 13 p2132 A66-26143

Light output of alpha particles in crystalline and vapor anthracene as function of pressure and temperature 14 p2296 A66-27796

Recombination rate of electron-hole pairs in anthracene determined and compared with theoretical value based on hypothesis of Coulomb capture in dielectric 14 p2369 A66-28272

Transitions and excited states in anthracene, using two-photon spectroscopy 16 p2717 A66-30203

Current decay in anthracene irradiated by gamma ray 18 p3157 A66-34476

# ANTHROPOMETRY

SA BODY MEASUREMENT /BIOL/

SA HUMAN ENGINEERING

Morphological characteristics and functional data in pilot trainees, noting anthropometric data and vital capacity, oxygen intake, heart rate, etc 08 p1175 A66-19084

Mass measurement of man in zero gravity environment, discussing laboratory device using linear harmonic motion 17 p2924 A66-32171

Text evaluating application of human body size and mechanical capabilities to equipment design for man-machine integration 23 p4030 A66-41619

# ANTIBIOTICS

Physiologically active compounds and cultured antibiotic fluids used to eliminate effects of ionizing beta radiation on plant seeds 15 p2438 A66-29487

# ANTIBODY

SA ANTIGEN

SA GAMMA GLOBULIN

Virus purification methods including density gradient centrifugation, liquid-phase partition, etc, evoke high antibody levels 09 p1333 A66-19899

Antibody globulin coupled to diazotized aminoaryl derivative of carboxymethyl-cellulose to form immunoadsorbent for extracting antigens 12 p1805 A66-23568

# ANTICYCLONE

SA CYCLONE

Lower atmospheric diurnal variations in air temperature, directional wind velocity and gradients, during clear anticyclonic weather 16 p2742 A66-30774

# ANTIFERROELECTRICITY

Temperature dependence of dielectric properties of antiferroelectrics of perovskite structure in SHF range 10 p1589 A66-22168

Temperature dependence of dielectric properties of antiferroelectrics of perovskite structure in SHF range 19 p3441 A66-35782

# ANTIFERROMAGNETISM

SA FERROMAGNETISM

SA HYSTERESIS

Gyrotropic properties in simple and canted two-sublattice antiferromagnetics in small static magnetic field 01 p0122 A66-10569

Low temperature excitation spectrum for ferro- and antiferromagnets with large crystalline field splittings 05 p0741 A66-15867

Phase transitions theory analyzed by simple self-consistent equations including ferromagnetism, antiferromagnetism, liquid-gas condensations and melting and freezing 09 p1424 A66-20076

Low temperature measurement of magnetic susceptibility of CdS single crystals with manganese impurity, considering effects of antiferromagnetic exchange 09 p1424 A66-20078

Spin wave sideband in absorption spectrum at low temperatures for transition of manganese ion in antiferromagnetic manganese fluoride 11 p1740 A66-22970

Minimum electric resistivity of chromium in antiferromagnetic state shows no disappearance in longitudinal magnetic field 19 p3444 A66-36071

Physics of ferro- and antiferromagnetism - All-Union Conference, Sverdlovsk, U.S.S.R., July 1965 20 p3616 A66-37475

Spectral analysis of interacting electromagnetic, plasma and spin waves in antiferromagnetic semiconductors and metals with easy-axis and plane type anisotropy 21 p3804 A66-39311

# ANTIGEN

SA ANTIBODY

SA GAMMA GLOBULIN

Virus purification methods including density gradient centrifugation, liquid-phase

partition, etc, evoke high antibody levels 09 p1333 A66-19899  
C and D antigens of coxsackievirus, centrifugation separation and similarity to poliomyelitis 09 p1335 A66-20633  
Antibody globulin coupled to diazotized aminoaryl derivative of carboxymethyl-cellulose to form immunoadsorbent for extracting antigens 12 p1805 A66-23568

ANTIGRAVITY

S GRAVITY

ANTIMATTER

Theory of antimatter applied to cosmology and development of metagalactic system, discussing ambiplasma 04 p0578 A66-14009  
Comets hypothesized to consist of antimatter, originating from parts of galaxy consisting entirely of antimatter 11 p1774 A66-23039

Carbon 14 content in growth rings of tree 60 km from epicenter of 1908 explosion of Tungus meteorite, considering antimatter as possible explosion cause 18 p3233 A66-34553

Ambiplasma sources of positronium, protonium and muonium radiation, theorizing that quasars may be ambiplasmas containing admixtures of matter and antimatter 24 p4280 A66-43027

ANTIMISSILE MISSILE

Intercepting moving completed powered-flight of ICBM missile 04 p0581 A66-13458  
Ballistic missile defense and national security, discussing defense system requirements, strategy types, etc 08 p1322 A66-18560

Digital simulation of guidance and control of exoatmospheric interceptor missiles for study of parameter variations effect on overall mission effectiveness 20 p3596 A66-37230

Antimony ionization in p-germanium single crystals, based on diffusion of Sb into Ge 12 p1930 A66-24460

Energy levels and interband oscillator strengths of antimony calculated in Brillouin zone by pseudopotential method, predicting polarization effects and spin-orbit splittings 19 p3446 A66-36392

Alfven wave propagation equations used to study electronic properties of semimetals 20 p3615 A66-37282

Antimony ionization in p-germanium single crystals, based on diffusion of Sb into Ge 20 p3620 A66-37692

Cs-Sb film thickness measurement method in various compositions and relation between thickness and composition 24 p4251 A66-42301

Antimony abundance in meteorites determined by neutron activation analysis 24 p4274 A66-42432

ANTIMONY ALLOY

Thermal and electrical properties of copper antimony telluride/tin telluride system as function of composition 01 p0116 A66-10190

Electronic band structure of BiSb alloy tunnel junction for various Sb concentrations 16 p2770 A66-30178

ANTIMONY COMPOUND

Electron spin resonance of radical cations produced by oxidation of aromatic hydrocarbons with antimony pentachloride 03 p0330 A66-12336

Thermoelectric properties of solid solution of germanium telluride in copper antimony telluride 23 p4114 A66-41572

Magnesium antimonide and magnesium bismuthide as materials for power generating thermocouples 24 p4227 A66-42111

ANTIOXIDANT

Fuels and lubricants with thermally stable molecular structure and antioxidants to meet requirements of supersonic transport 03 p0414 A66-13221

ANTIPARTICLE

Microscopic model of symmetry between particle and antiparticle populations in expanding universe 23 p4131 A66-42065

ANTISUBMARINE WARFARE AIRCRAFT

A-NEW MOD 1 digitally controlled navigation system for antisubmarine warfare aircraft employing Univac CP-754-8 thin film computer 01 p0098 A63-10002

CHSS-2 Haul Down and Handling System for operating large /SH-3A/ helicopter from small ships 10 p1484 A66-21891

New antisub aircraft operating from ships and land bases 11 p1637 A66-23161

A-NEW MOD 1 digitally controlled navigation system for antisubmarine warfare aircraft employing Univac CP-754-8 thin film computer 13 p2124 A66-25596

ASW aircraft performance and technology for contact investigation, patrol and convoy escort [AIAA PAPER 66-727] 20 p3496 A66-38037

ANTONOV AN-22 AIRCRAFT

Principal civil aircraft at 26th Aeronautical and Space Exhibition, detailing AN 22 Antaeus cargo aircraft 07 p0989 A66-17820

ANVIL

Robustness, axial alignment and low friction through limited angular excursion of pivot, noting lapping fixture and anvil assembly 24 p4218 A66-43222

AOSO

Stabilization, communication, data handling and power subsystem requirements for AOSO [AIAA PAPER 64-333] 08 p1303 A66-18817

AOSO stabilization and control system for solar experiments, noting closed loop stability and gain stability 21 p3819 A66-38854

APERIODIC FUNCTION

Optimal control and trajectory optimization in aperiodic discrete time functional systems 11 p1681 A66-23422

Volterra series analysis of aperiodic solutions to certain second order integrodifferential equations with nonlinear damping and nonlinear restoring force 16 p2737 A66-31334

APERTURE

Fresnel gain of aperture antenna, developing rigorous analytical formula for circular aperture antennas with parabolic tapered illumination 05 p0651 A66-15837

Polarization patterns of microwave antennas with sine-phase /complex/ apertures of rectangular, circular, annular or rhombic form 09 p1356 A66-20771

Aperture field of leaky-wave antenna of finite length 11 p1661 A66-22394

Radiation pattern from circular aperture with symmetrical inphase illumination described by Neumann series, noting sidelobe level 11 p1652 A66-22398

Far field simulation of antennas with complex aperture distribution functions 12 p1840 A66-24624

Equivalent linear antenna substitution for antenna with plane aperture in statistical analysis of antennas 17 p2879 A66-31861

Radiation pattern synthesis for circular aperture horn antennas, assuming aperture distribution consisting of fields of cylindrical waveguide modes and by linear combination of radiation pattern functions 19 p3320 A66-36404

Polarization patterns of microwave antennas with sine-phase /complex/ apertures of rectangular, circular, annular or rhombic form 22 p3873 A66-39830

Antenna patterns for spacecraft antenna array with aperiodic arrangement of large elements provide high aperture efficiency 22 p3882 A66-40751

Scherzer theorem on aperture aberration extended to monochromatic nonrelativistic system with electrostatic or magnetic quadrupole fields with common planes of optical symmetry 24 p4239 A66-43215

APOGEE

Results of approximate computation of rocket apogee from data on flight duration between different trajectory points 14 p2383 A66-27815

APOLLO PROJECT

Apollo manned space flight program including mission profile, spacecraft and

constituent systems 01 p0143 A66-10799

Basic navigation concepts and techniques used by MIT Instrumentation Laboratory to design Apollo guidance and navigation system 02 p0254 A66-11313

Evolution of navigation systems in Mercury and Apollo manned space vehicles and role of astronaut plays in design of system 02 p0293 A66-11373

Apollo hardware and technology for future manned space exploration, noting MORV spacecraft use 02 p0288 A66-11503

Apollo extension systems, developing technology for long-term manned space mission 02 p0293 A66-11503

Ground support equipment and launch installations for Apollo launch operation and testing 02 p0215 A66-11633

Gemini and Apollo Earth-orbital programs 02 p0185 A66-11633

Apollo Extension Systems program for exploiting capabilities in Saturn/Apollo space vehicle system 02 p0293 A66-11633

Structural, propulsion, guidance and flight control systems of Saturn IB and V Apollo launch vehicles 02 p0294 A66-11633

Navigation concepts and techniques for Apollo manned lunar landing mission 02 p0260 A66-12053

Apollo space suit design discussing construction, purpose and operating conditions of liquid-cooled life support system 03 p0328 A66-12673

Integrated operating mode of Apollo mission simulator with mission control center for combined training of Apollo flight and ground crews [AIAA PAPER 65-266] 03 p0353 A66-12773

Voice communication in space discussing Gemini subsystem, Apollo Command Module system and laser communication techniques 04 p0477 A66-13553

Apollo unified S-band system covering station locations, uplink and downlink spectrums, spacecraft gross parameters, theory of operation, etc 04 p0478 A66-13553

Practice techniques for maintaining astronaut psychomotor skills during extended missions, with star sighting and flight control test results 05 p0626 A66-14633

Conditioning and isolation of Apollo stabilization and control system signals using field effect transistors 05 p0646 A66-14633

Aluminum diffusion bonding for fabrication of Apollo cold plates, noting alternate bonding techniques [SAE PAPER 650779] 05 p0687 A66-15063

Space flight posture of U.S. at completion of AES program and alternate approaches for further lunar exploration and exploitation [SAE PAPER 650833] 05 p0760 A66-15033

Apollo spacecrew training from simulation and actual past space flights [ASME PAPER 65-WA/HUP-17] 05 p0628 A66-15613

Man in Project Apollo including module and module docking, lunar landing, maneuvering, reentry, etc 07 p1140 A66-17213

Apollo and LEM mission simulators, noting computer complex providing real time simulation, mathematical models, telemetry display equipment, aural effects, etc 07 p1018 A66-18333

S-band tracking and communication systems to connect 15 ground stations with large parabolic antennas and Apollo command module and lunar excursion module 07 p1018 A66-18333

Apollo lunar landing spacecraft design, noting command, service, lunar excursion module, etc 08 p1300 A66-18553

Design and program for Apollo Lunar Excursion Module, noting propulsion, guidance, control, ground support, etc 08 p1300 A66-18553

Astronaut selection and crew preparation procedures for Gemini and Apollo programs 08 p1176 A66-18553

Television camera system circuit design, mission requirements and optical response for Apollo mission to Moon 08 p1222 A66-18773

Apollo extension system /AES/ for lunar surface exploration [SAE PAPER 660145] 08 p1296 A66-19333

Gemini and Apollo space programs, present

status, future plans and development trends 09 p1453 A66-20168  
 Gemini and Apollo Earth Orbital flights as precursors to Apollo extension and ORL Earth Orbital missions 10 p1611 A66-21528  
 Astronomical research possibilities, using manned Earth orbital spacecraft 10 p1608 A66-21531  
 Post-Apollo experiments for space 11 p1775 A66-23075  
 Manned space flight program management noting system efficiency, cost factors, reliability and performance reports based on Apollo project 11 p1789 A66-23437  
 Weather support problems in Gemini and Apollo programs [AIAA PAPER 66-334] 12 p1953 A66-24475  
 Evolutionary manned interplanetary exploration program with modular elements used for flyby, orbital capture and Mars landing, noting influence of Apollo program 13 p2179 A66-25241  
 Servo tester with automatic data acquisition and reduction /STADAR/, discussing design and operational capability in Apollo program 13 p2027 A66-25661  
 Audio signal processing techniques in future space exploration, discussing channel capacity, speech processing, bandwidth narrowing, etc 13 p2025 A66-26024  
 Fuel cell power plant for Apollo command and service module from engineering viewpoint [AIAA PAPER 64-748] 13 p2007 A66-26649  
 Structural dynamics/manned space flight relation, discussing man-machine dynamics, Apollo command module LF studies, pilot control of spacecraft and launch vehicle, etc 14 p2230 A66-28017  
 Apollo Manned Space Flight Network /MSFN/ tracking and communications systems for tracking lunar spacecraft 15 p2450 A66-28748  
 High reliability digital test command system for use as part of prelaunch acceptance checkout equipment for Apollo program 15 p2460 A66-28989  
 Apollo/Saturn S-II telemetry data processing systems 16 p2652 A66-30567  
 Lunar charting for project 16 p2743 A66-30669  
 Digital guidance and control computer used in Apollo Guidance and Navigation System 18 p3073 A66-33874  
 Design of Apollo project lunar-based telemetry system for transmitting experiment data to Earth for one year 19 p3300 A66-35671  
 Mobility aids for wheeled surface vehicles and flyers for Apollo lunar surface exploration 19 p3340 A66-35963  
 Apollo Spacecraft Test Data Evaluation System, noting functions, operation and performance 20 p3662 A66-37247  
 Acceptance checkout system for checkout assistance to Apollo CSM and LEM facilities during countdown, discussing system configuration variability, composition and operation 20 p3543 A66-37579  
 Apollo command service module /CSM/ parts management 20 p3684 A66-37882  
 Training seminar for reliability surveyors organized by NASA, particularly for Apollo program, noting content, participation, methodology, etc 20 p3686 A66-37957  
 Trajectories for manned lunar landing, discussing various mission alternatives in planning and realized stages and Apollo project characteristics 20 p3656 A66-38032  
 LEM program history and management in RCA, discussing Apollo mission studies and initial assignments 21 p3822 A66-39516  
 Apollo mission evolution, with particular reference to lunar descent, landing, takeoff and rendezvous performed by LEM 21 p3822 A66-39517  
 Cassegrain monopulse tracking antenna for LEM and Command Module rendezvous guidance 21 p3714 A66-39524  
 Apollo environmental control system simulation chamber for suit and manned system evaluation and operational verification 22 p3892 A66-40241  
 Dynamic stability and aerodynamic damping derivative of Apollo launch escape vehicle, using wind tunnel tests [AIAA PAPER 66-770] 22 p3895 A66-40651

Navigation, guidance and control system instrumentation for Apollo manned lunar landing mission [AGARDOGRAPH 105] 24 p4236 A66-43124  
**APOLLO SPACECRAFT**

**APPROXIMATION METHOD**  
 Approximate solution for differential equations, using algorithm applied to boundary value problem involving linear equation 01 p0091 A66-10164  
 Velocity distribution in turbine stage with compressible medium for repeating axial velocity profile derived, employing approximation method 01 p0130 A66-10211  
 Approximate calculation of Wiener integration 01 p0092 A66-10317  
 Charge trapped in electron or ion beams at pressures below breakdown determined from general integro-differential equation, using approximation method 01 p0111 A66-10375  
 Attached coordinate system for approximate solution of compression waves emitted by expanding sphere at constant rate in ideal medium 01 p0057 A66-10420  
 Approximate determination of flow characteristics around multistage nonstationary blade configuration, using singularity method 01 p0006 A66-10442  
 Intermediate stages of wave-type bending process in elastic plate investigated by system of approximate methods 01 p0157 A66-10983  
 Covariance matrix approximation and conservative error volume estimate 02 p0249 A66-11568  
 Approximation method reproducing assigned time functions by using exponential polynomials in synthesis problems of electrical circuits 02 p0207 A66-11752  
 Approximate solution of principal boundary value problem of electrostatics 02 p0262 A66-12246  
 Approximation method for momentary peak shaft loads, computing starting and stalling torques of power transmission system 02 p0238 A66-12266  
 Successive approximations for variational problems in control theory including pulse amplitude and pulse width modulation, using quasi-linearization techniques 03 p0349 A66-12685  
 Approximation of band-limited function by sum of cosines arising in design of phased array antennas 03 p0342 A66-12709  
 Continuous periodic functions approximation by Fejer and arithmetic means 03 p0388 A66-12712

Class of periodic functions for which given method of summation gives trigonometric approximation of optimal order 03 p0388 A66-12713  
 Scalar quantity spectrum in statistically stationary turbulent velocity field, using closure approximations to provide unified comparison, noting eddy diffusivity, transfer function, etc [AIAA PAPER 65-814] 03 p0357 A66-13082  
 Method which for given relation yields high order approximation for any type of transistor 03 p0345 A66-13239  
 Uniqueness of optimum approximation sums of single variable functions for multivariable functions in Lebesgue space 04 p0538 A66-13485  
 Approximation of spherical functions by analogs of Fejer and Vallee-Poussin sums 04 p0539 A66-13486  
 Number theoretic method to approximate solution of linear integral equations 04 p0539 A66-13488  
 Reduction of Rabotnov approximate equation describing steady creep in circular cylindrical shells, under axisymmetric loading, to system of integral equations 04 p0588 A66-13567  
 Successive linearization for variational problems of flight mechanics 04 p0458 A66-13698  
 Approximate determination of correct detection probability in optimum signal reception of unknown phase 04 p0482 A66-13913  
 Local gravity anomalies for circular cylinder with vertical axis, discussing solution to direct and inverse problems of quantitative interpretation of fields 04 p0516 A66-13960  
 Rotating polytrope structure analyzed, using approximation technique of integrating outwards from center and inward from surface 04 p0578 A66-14018  
 Bergeron and first approximation method for solving problems of unsteady fluid flow in pipeline 04 p0511 A66-14157  
 Extremum problem connected with simultaneous approximations of some functions analyzed by polynomials and derivatives 04 p0540 A66-14467  
 Approximation formulas for minimum and maximum roots of nth order polynomials 05 p0707 A66-14624  
 Approximate solution of first biharmonic problem for spatial simply-connected finite region 06 p0902 A66-16231  
 Linear dynamical systems with weak coupling solved approximately, noting examples and definition 06 p0862 A66-16362  
 Maximum accuracies of parameter estimates for complex signals reflected from several points 06 p0837 A66-17191  
 Approximate methods for plotting logarithmic frequency responses of discrete systems with and without time lag, noting PAM systems 07 p1012 A66-17382  
 Approximate method determining nonstationary thermal fields in solid bodies with thermal capacity and thermoconductivity coefficient depending linearly on temperature 07 p1148 A66-17392  
 Point-matching method, approximate technique for wave equations of uniform waveguides with very general cross sections 07 p1007 A66-17510  
 Radiant transport with isotropic scattering, evaluating approximate solutions for reflection and transmission of parallel plane radiation 07 p1152 A66-17589  
 Approximation theorem and uniqueness theorem for abstract equations with almost periodic coefficients 07 p1056 A66-17603  
 Networks method applied to approximate solution of heat conduction equation for spatial boundary conditions with aid of theory of hypermatrices 07 p1153 A66-17863  
 Optimum control calculated by iteration method 07 p1016 A66-17910  
 Approximate solution of magnetospheric free boundary for steady state interaction between field-free streaming plasma and magnetic dipole 07 p1088 A66-17952  
 Second approximation of compressible subsonic flow over given wing profile reduced to regular Dirichlet problem 07 p0981 A66-18110  
 Hypersonic gas flow past axisymmetric

slender blunt body by Chernyi approximate method 07 p0983 A66-1814  
 Nonsimilar solution of incompressible boundary layer over flat plate in presence of shear flow, using approximate method 08 p1204 A66-1852  
 Approximate method for examining stress-strain state of anisotropic body with elliptical holes via reduction to infinite algebraic system 08 p1304 A66-1855  
 General relation between third-order approximation stress function and complete displacement function in problem of finite plane deformations of incompressible materials 08 p1304 A66-1855  
 Stress concentration study using third-order approximation operators for tangential stress components of cylindrical shell with elliptical, triangular and square holes 08 p1305 A66-1855  
 Scattering by small discontinuities in single or multimode waveguides by lowest order approximation 08 p1189 A66-1860  
 Reentry guidance by threshold network, storage of precomputed optimum command, using analogy of surface approximation problem in N plus one-dimensional space [AIAA PAPER 66-52] 08 p1249 A66-1899  
 Lunar crater distribution measurements from Ranger VII photographic data analysis deriving approximate expression for secondary distribution 08 p1297 A66-1941  
 Approximation method solution for elastoplastic distribution of stresses infinite plane with square hole for case compressive force plane deformation 08 p1313 A66-1941  
 Digital simulation of magnetic hysteresis using analytic approximation of magnetic curves by seventh degree polynomials 08 p1187 A66-1951  
 Approximate method for solving inverse scattering of radio waves from conducting bodies of complex shape 08 p1185 A66-1961  
 Uniform approximation by polynomial solutions for differential equation 08 p1245 A66-1961  
 Phased oscillator stability solved, using hydrodynamic approximation 08 p1266 A66-1961  
 Schuessler-elliptic low pass filters, discussing solution of approximation problem for low pass filters with good transient response 08 p1198 A66-1974  
 Radio wave absorption coefficients, calculated, using approximations of magnetoionic formulae 09 p1341 A66-1986  
 Intrinsic noise effect on synchronization of self-excited oscillators, determining phase diffusion coefficient, frequency fluctuation spectra and spectral line length 09 p1344 A66-2034  
 Approximate analysis of spacecraft trajectories in circular extra-atmospheric, anaorbital flight 09 p1457 A66-2051  
 Runge-Kutta fourth order formula used to obtain approximate solution to differential equations 09 p1395 A66-2063  
 Numerical integration of coupled first order ODE of greatly differing time constant 09 p1395 A66-2063  
 Power series drawbacks as tool for numerical solution of differential equations 09 p1395 A66-2063  
 Deriving interpolatory type quadrature formula by inverting linear systems of differentiation formulas 09 p1395 A66-2063  
 Tensor product analysis of alternative direction implicit iteration techniques for approximate solution of elliptic partial differential equations 09 p1396 A66-2063  
 Approximate solution for elasticity problems, noting mathematical determination of stress distribution in any homogeneous isotropic body 09 p1468 A66-2066  
 Characteristic TWT equation solved for large space-charge parameter 09 p1357 A66-2071  
 Transistorized LR oscillator design using piecewise linear approximation in oscillation theory 09 p1357 A66-2071  
 Floquet form of solution to system of linear differential equations with periodic parameters 09 p1363 A66-2071  
 Upper atmosphere temperature and pressure measured with manometers mounted on rockets, using method of

successive approximations 09 p1375 A66-20988  
 Monte Carlo linear extrapolation of  
 multivariable functions, introducing  
 truncation procedure which saves on  
 machine time and serves for variance  
 reduction 10 p1549 A66-21215  
 Comparing modified method of averaging  
 and two-variable expansion procedure in  
 nonlinear oscillations of autonomous  
 system 10 p1555 A66-21344  
 Unsteady airfoil functions evaluated  
 approximately 10 p1479 A66-21345  
 Aerodynamic forces of oscillating lifting  
 surfaces of large aspect ratio in subsonic  
 range investigated by approximation  
 method 10 p1479 A66-21378  
 Bimodal formulation applied to chemical  
 reactions in turbulent wake flow behind  
 hypersonic spheres, using quasi-one-  
 dimensional model 10 p1480 A66-21771  
 Multidimensional radiation transport  
 equations for nonscattering quasi-  
 equilibrium gray gas obtained by spherical  
 harmonic approximation  
 [ATAA PAPER 65-81] 10 p1621 A66-21774  
 Phased oscillator stability solved, using  
 hydrodynamic  
 approximation 10 p1568 A66-21835  
 Computational solution of functional  
 differential equations, using successive  
 approximations 10 p1551 A66-21922  
 Approximation of continuous and  
 differentiable functions by algebraic  
 polynomials on closed  
 interval 10 p1551 A66-21976  
 Theorems for uniform approximations by  
 algebraic and trigonometric rational  
 functions, noting application in determining  
 functional properties 10 p1552 A66-21984  
 Model approximation method for induced  
 elastic and thermal characteristics of  
 materials reinforced by circular cylindrical  
 fibers 11 p1720 A66-22231  
 Successive approximations method for  
 calculating optimum regimes of some  
 systems with distributed parameters, using  
 gradient procedure 11 p1674 A66-22357  
 Diffraction by conducting cylinder solved  
 by approximation method, using expanded  
 series of diffraction field of cylinder with  
 polygonal section 11 p1662 A66-22464  
 Hartree-Fock approximation method for  
 calculating efficiencies of multiple-photon  
 processes 11 p1737 A66-22495  
 Successive approximation method for  
 elastic-plastic plane stress-strain  
 analysis 11 p1781 A66-22690  
 Shock structure calculations from kinetic  
 theory, using ellipsoidal distribution  
 function 11 p1690 A66-22912  
 Theoretical and machine aspects of  
 ignoring singularity in approximate  
 integration, relating uncertain cases to  
 diophantine  
 approximation 11 p1722 A66-22981  
 Computational aspects of uniform  
 polynomial approximation to function and  
 derivative 11 p1722 A66-22983  
 Error bounds in best approximation of  
 given function in Banach space constrained  
 by inequality  
 relationships 11 p1722 A66-22984  
 Numerical analysis of thin cylindrical shell  
 under action of external forces for small  
 deformations, using first-order  
 theory 11 p1783 A66-23016  
 Multidimensional spline theory generalized  
 from one-dimensional spline theory and  
 preserving minimum curvature, best  
 approximation and convergence  
 properties 11 p1723 A66-23182  
 Mathematical approximation for alpha of  
 drift transistors derived in terms of  
 equivalent dominant pole and excess  
 phase 11 p1671 A66-23245  
 Successive approximation methods of  
 solving optimal control problems, based on  
 variational calculus and Euler-Lagrange  
 equation 11 p1679 A66-23273  
 Parameter estimation utilizing state vector  
 model, regression methods, asymptotic  
 methods, etc 11 p1680 A66-23278  
 Approximation of function of many  
 variables by linear  
 methods 11 p1723 A66-23313  
 Takeoff dynamics of VTOL aircraft, noting  
 thrust-weight ratio, wing load, initial thrust  
 angle, engine tilt, etc 11 p1733 A66-23339

Graphical-analytical method using  
 successive approximations determines  
 guided missile trajectory 11 p1734 A66-23344  
 Approximation methods for matrix  
 computation, considering characteristic  
 roots 11 p1723 A66-23361  
 Linear approximation method for  
 continuous periodic functions based on  
 theorems concerning relation between  
 triangular matrix and continuity modulus of  
 subset of functions 11 p1724 A66-23365  
 Schauder-type solution estimates to first  
 boundary value problem for parabolic  
 equations of order 2p 12 p1901 A66-23663  
 Construction of rational second order  
 kernels with aid of rational functions of  
 order n, applying result to theory of  
 approximation of  
 functions 12 p1902 A66-23765  
 Space and time dependent randomly  
 distributed stress and temperature fields in  
 cylinder with deformable surface calculated,  
 using approximation  
 method 12 p1959 A66-23864  
 Transformation relation for prestress  
 tensor in problem of indifferent equilibrium  
 of elastic bodies derived, using  
 approximation method 12 p1959 A66-23865  
 Approximate solution of equation with  
 normally distributed  
 operators 12 p1902 A66-23899  
 Approximation of expectation values for  
 nonequilibrium properties via perturbation  
 theory, obtaining values for molecular  
 polarizability 12 p1917 A66-23935  
 Quantitative information regarding validity  
 of certain approximations applicable to  
 sandwich plate analysis 12 p1960 A66-23972  
 Approximate determination of flexural  
 vibrations of shells of revolution with  
 vibrations involving appearance of nodal  
 lines along generatrix and meridional  
 directions 12 p1964 A66-24047  
 Supersonic flow around blunt body  
 calculated via integral relations, using  
 simultaneous approximation function in two  
 directions 12 p1797 A66-24208  
 Solution of Kepler equation by stepwise  
 approximation, discussing elliptical orbit,  
 parabolic ellipse and hyperbolic  
 orbit 12 p1950 A66-24398  
 Hypersonic flow of inviscid gas past cone,  
 obtaining solution for entire flow including  
 turbulent boundary layer and velocity field,  
 using zero approximation  
 method 12 p1798 A66-24440  
 High performance active RC band pass  
 filter design providing for independent  
 adjustment of poles 12 p1843 A66-24675  
 Strong plane shock produced in Al by  
 hypervelocity impact and late stage  
 equivalence examined, using analytical and  
 graphical solution of method of  
 characteristics and realistic state  
 equation 13 p2194 A66-25061  
 Statistical distribution of first occurrence  
 and recurrence of crossing of given level in  
 continuous random process determined,  
 using approximate forms and exponential  
 distribution 13 p2116 A66-25141  
 Successive approximations to determine  
 vector in theory of optimal  
 control 13 p2045 A66-25294  
 Monte Carlo calculations of cross section  
 magnitude of electron-positive-molecular-ion  
 dissociative  
 recombination 13 p2130 A66-25375  
 Numerical values describing molecular  
 rainbow scattering in Airy approximation for  
 12-6 potential 13 p2130 A66-25379  
 Plane electromagnetic wave diffraction by  
 narrow strip-grating, obtaining reflection  
 coefficient via optical approximation  
 method 13 p2021 A66-25395  
 Approximate solution of Navier-Stokes  
 equations applicable to viscous and  
 incompressible fluids 13 p2062 A66-25429  
 Explicit approximate solution for  
 distribution of constraints along wall of  
 revolution assuming limiting equilibrium and  
 for case of system with discontinuity  
 line 13 p2195 A66-25443  
 Second order approximation and  
 perturbation theory applied to determine  
 effect of instantaneous pulse on oscillation  
 amplitude 13 p2127 A66-25451  
 Quasi-linear approximation method and  
 Poisson equation used in determining static

fields and electron redistribution in plasma  
 waveguides 13 p2039 A66-25678  
 Integral relations method to reduce by  
 approximation PDEs to ODEs or to algebraic  
 or transcendental  
 equations 13 p2119 A66-25854  
 Method for automatically adjusting  
 networks for best approximation to desired  
 responses, using iterative gradient  
 techniques, constraint equations and Carroll  
 programming technique 13 p2051 A66-26070  
 Iterative approximation of rational transfer  
 function in Laplace transform variable s,  
 optimal with respect to given input and  
 output time functions, and deviation from  
 desired output-input-time functional  
 relation 13 p2054 A66-26087  
 Ionization cross section for rare gases and  
 hydrogen atoms calculated from  
 perturbation theory, noting ruby laser  
 photon absorption 13 p2133 A66-26188  
 Stressed state of isotropic elastic medium  
 with two circular holes solved, using  
 approximation method for concentrated  
 loads 13 p2202 A66-26417  
 Approximation method for determining  
 limit and breaking load for infinite brittle  
 body weakened by plane crack, noting crack  
 propagation 13 p2203 A66-26423  
 Stress-strain state of plate with circular  
 hole, noting stress concentration, material  
 creep properties and solution by successive  
 approximation 13 p2204 A66-26436  
 Nonlinear ordinary differential equations  
 applicable to damped oscillatory circuits  
 with exploding wires, obtaining conservation  
 law and approximate solutions by Picard  
 method 13 p2129 A66-26667  
 Approximation method for evaluating body  
 flexibility effects on slender aircraft static  
 stability, noting application to sounding  
 rocket 13 p1994 A66-26734  
 Justification for multiple isothermal layer  
 approximation to real atmospheric acoustic-  
 gravity wave propagation 14 p2234 A66-26857  
 Equations from hydrodynamic equations,  
 determining steady state fields and currents  
 in plasma caused by microwave field, using  
 quasi-linear  
 approximation 14 p2341 A66-27153  
 Approximation of variable time delays and  
 design of constant and variable delay  
 circuits, noting simulation of delays in  
 automatic control systems by  
 computers 14 p2266 A66-27528  
 V-I characteristics of tunnel diode by  
 approximation method of polynomials of  
 degree no higher than  
 sixth 14 p2254 A66-27739  
 Results of approximate computation of  
 rocket apogee from data on flight duration  
 between different trajectory  
 points 14 p2383 A66-27815  
 Molodenskii first approximation equations  
 used in determination of characteristics of  
 terrestrial gravitational field, noting  
 techniques to average  
 corrections 14 p2288 A66-28213  
 Laminar fluid flow in channel generated by  
 arbitrary generatrix, allowing for interaction  
 between boundary layer and flow core,  
 calculating boundary  
 layer 14 p2278 A66-28316  
 Approximate synthesis of second-order  
 optimum system with controlled  
 coefficients 14 p2269 A66-28479  
 Polynomial approximation method for  
 determining satellite orbits from large-time-  
 interval trajectory  
 measurements 15 p2592 A66-28488  
 Successive linearization for variational  
 problems of flight  
 mechanics 15 p2425 A66-28539  
 Input and output coupling constants of  
 spin-2 mesons with two pseudo-scalar  
 mesons obtained by producing resonances at  
 experimentally observed  
 positions 15 p2544 A66-28947  
 Minimax problem for pursuit problem of  
 two linearly controlled objects describable  
 by identical differential  
 equations 15 p2526 A66-28948  
 Boundary between applicability ranges of  
 network and steepest descent methods in  
 equation integration of Timoshenko theory  
 in analysis of plate  
 deformation 15 p2608 A66-28962  
 Iterative derivation of approximation of

real function by exponential series 15 p2527 A66-29056

Kosmodamianskii approximate method for solution of tension problem of isotropic plate with two similar circular holes reinforced by rigid rings 15 p2613 A66-29431

Approximation method for solution of bending problem of isotropic plate resting on rigid columns to cover case of anisotropic plate with reinforced elliptic hole 15 p2613 A66-29434

Approximate solution of free axisymmetric oscillations of circular structurally orthotropic plate of specific laws of variable thickness 15 p2613 A66-29436

Uniqueness, existence and stability of solutions to polyvibrant systems with delayed remainder and arguments 15 p2528 A66-29652

Approximate method, using power polynomials, for calculating distance between detached shock wave and profile 15 p2425 A66-29721

Multicategory pattern recognition, noting mathematical treatment, dimensional and correlational effects, etc 15 p2453 A66-29774

Approximation method for thermal diffusion factor of almost Lorentzian gas mixture with better convergence properties than Chapman-Enskog approximation 16 p2824 A66-30119

Planar subsonic flow around circular cylinder using Kisseleff approximation method for compressible fluid 16 p2627 A66-30210

Hermite interpolation combined with Ritz method for numerical approximation of solution of two-point boundary value problems 16 p2732 A66-30243

Differential approximation linearization technique compared with Galerkin method 16 p2732 A66-30265

Approximation method for limit Nusselt number for channels of nonuniform geometrical configuration and linearly variable wall temperature 16 p2684 A66-30677

Unperturbed motion for follow-up systems in critical case of double zero root, noting stability and correspondence of root to solution of first approximation equation 16 p2733 A66-30738

Closed-loop automatic control system with univalued substantially nonlinear element, using approximation of characteristics by Fourier series 16 p2669 A66-30754

Approximation method determining follow-up failure conditions for nonlinear automatic systems in presence of control and noise signals 16 p2669 A66-30755

Function approximation from finite number of arbitrary points, using iteration methods 16 p2734 A66-30760

Reliability of finite automata determined from analysis of elements capable of misalignment, input errors and structural design 16 p2669 A66-30761

Method of approximating functions with aid of orthonormal systems and single channel optimization, using analog computer 16 p2656 A66-30764

Approximate analysis of nonlinear systems similar to harmonic oscillators, using Chaplygin theory of differential inequalities 16 p2705 A66-30781

Uniform approximation by polynomial solutions for differential equation 16 p2736 A66-30982

Error estimates for approximation formulas for Bessel functions and Hankel functions obtained, using Luke trapezoidal rule 16 p2736 A66-31021

Harmonic approximation of infinite crystal dynamics problem, noting collisional case and action of external force on atoms 16 p2820 A66-31169

Segmental differential approximation in system identification with data available 16 p2656 A66-31227

Generalization of Barbier-Eddington approximation, for inversion of darkening law 16 p2803 A66-31258

Collision cross sections of ions in isoelectronic sequence of lithium, noting dipolar transitions of type  $2s$  to  $np$  16 p2754 A66-31261

Numerical differentiation by differential quotients, interpolations, Richardson-Romberg algorithm and other methods,

including analysis of approximation errors 16 p2858 A66-31347

Approximate substitution of ordinary dynamical systems for systems with retardation by increasing order of ordinary differential equations 16 p2748 A66-31505

Improved Donnell equations for concentrated load of circular cylindrical shell 16 p2823 A66-31717

Flowgraph techniques for closed systems, discussing properties, approximation method, topology equation, frequency response, constraints, oscillatory and stochastic processes, etc 17 p2898 A66-31954

Steady state circuit analysis of basic linear parametric amplifier using successive approximation 17 p2880 A66-32058

Approximate calculation of free convective heat transfer in rectangular region 17 p3034 A66-32562

Necessary condition for optimal control in nonlinear automatic control system determined, using method of successive approximations 17 p2902 A66-32574

Successive approximation solution to integral kinetic equation and corrections to moments of distribution function for viscous and rarefied gases 17 p2909 A66-32585

Assessment of error of method of successive approximations in determination of circular plate deflections 17 p3026 A66-32598

Computer solution using Bubnov-Galerkin method to determine concentrated force effect on shallow spherical dome 17 p3026 A66-32601

Electron capture detector parameters in pulse sampling mode analyzed, noting kinetic processes, temperature effect, etc 17 p2961 A66-32660

Approximation theory by generalized rational functions 17 p2947 A66-32843

Section moments of inertia by approximation method 17 p3030 A66-32967

Iteration scheme based on Newton approximation method applied to two-dimensional and rotationally symmetric flows past obstacles 17 p2913 A66-33066

Radar return from perfectly reflecting target in presence of second medium, obtaining first approximation for return and accounting for multiple reflections and dispersion 17 p2876 A66-33104

Point matching method calculation of cut-off frequencies and field configurations of waveguides with general cross section 17 p2896 A66-33278

Textbook on numerical solution of initial value problems and approximate numerical integration 17 p2948 A66-33436

Approximate solution of boundary layer problems by variational techniques, using multiparameter approach 18 p3096 A66-33594

Rational approximations for lower natural frequencies of uniform beam with concentrated mass or rotary inertia obtained by expanding eigenvalue equation into power series 18 p3249 A66-33599

Solution method for use when linear combinations of given approximate solutions are used for representing exact solution of general ordinary linear homogeneous differential equation 18 p3125 A66-33627

Plane contact problem for circular ring and elastic or absolutely rigid disk, using method of successive approximations 18 p3252 A66-33710

Approximation method for compressible laminar heat transfer to blunt axisymmetric bodies in high speed flow 18 p3048 A66-33824

Approximation techniques for determination of optimum uniform or nonuniform quantizer 18 p3068 A66-33904

Approximation solution to plane bend problem in thin rod of variable rigidity 18 p3254 A66-33933

Diffraction of linearly polarized electromagnetic wave by coaxial cylinders, deriving approximate solution for wavelengths smaller than distance between cylinder centers 18 p3068 A66-33977

Correction of magnetic measurements made by Mariner II, noting use of second-order approximation for interplanetary magnetic field 18 p3106 A66-34333

N/D and determinantal methods of partial wave dispersion relations applied to Yukawa potential scattering 18 p3138 A66-34453

Transport properties of ionized monatomic gases, using Chapman-Enskog-Burnett approximation method for determination of thermal conductivity, diffusion coefficient and viscosity 18 p3149 A66-34927

Approximate method for solving inverse scattering of radio waves from convex conducting bodies of complex shape 18 p3072 A66-34967

Asymptotic expression for difference between continuous periodic function and typical mean of Fourier series 18 p3128 A66-35011

Approximation technique for flow graph that eliminates nonessential equivalent circuit elements, providing for derivation of most concise model with preassigned accuracy 18 p3092 A66-35044

Radiation transport in spectral lines and consecutive photon absorptions and emissions, discussing contemporary theories, approximation methods and applications 18 p3120 A66-35073

Dispersion degree of coherent scattering regions, microdeformation and packing defects probability in fcc metals determined, using approximation method 19 p3438 A66-35498

Maximum accuracies of parameter estimates for complex signals reflected from several points 19 p3297 A66-35544

Stratification with bottom heating analysis, using approximate integral approach 19 p3477 A66-35631

Error in plane-layer approximation of boundary layer emission associated with gray gas flow past plane plate 19 p3341 A66-35758

Reduction of variance by least squares polynomial approximations, noting exact functional dependence of variance on degree of polynomial 19 p3388 A66-35833

Two-dimensional problems in which heat flow is predominantly in one direction solved by approximate methods, noting constant profile of temperature role 19 p3478 A66-35852

Missile and rocket launching with static instability, deriving approximate solution for equations of longitudinal accelerated motion 19 p3470 A66-36068

Approximation of continuous and differentiable functions by algebraic polynomials on closed interval 19 p3390 A66-36182

Theorems for uniform approximations by algebraic and trigonometric rational functions, noting application in determining functional properties 19 p3390 A66-36188

Schauder-type solution estimates to first boundary value problem for parabolic equations of order  $2p$  19 p3390 A66-36188

Approximation technique for analysis of two-dimensional boundary layer flows with arbitrary external velocity distribution 19 p3341 A66-36322

Approximation method for transitive section calculation of turbulent jet obtaining velocity profiles for initial arbitrary sections 19 p3276 A66-36446

Numerical approximation of Riemann integration for plane gas flow at supersonic speeds 19 p3276 A66-36478

Approximation method for checking stability of compression members in rigid joint space truss or stability against out-of-plane buckling of compression members in rigid-joint plane truss 19 p3475 A66-36488

Propagation of spherically symmetric cylindrically symmetric and plane waves examined via analytic perturbation method in solving gas dynamics equation for nonstationary compressible flow 19 p3343 A66-36667

Approximation theory for calculating linearized subsonic and supersonic flow over pulsating bodies with low aspect ratio noting structure of flow field 19 p3277 A66-36667

Iterative approximation method for solution of proper elements/eigenvalue/Sturm-Liouville equation 19 p3392 A66-36747

Fourth-order multipoint iterative method for solving equations which cost or function and two derivative evaluations per iteration, for use in root finding 19 p3392 A66-36747

Transfer process effect on stability

- plane flame front, deriving revised  
approximate solution for large finite  
keynolds numbers 19 p3479 A66-36829
- Synthesis parametry of ensemble-averaged  
second-order polynomial approximation to  
performance index of optimal guidance  
linear feedback control system 20 p3589 A66-36858
- Unimodal function minimum located by  
successive approximations to interval of  
uncertainty 20 p3589 A66-36903
- Approximate solution for dipole radiator  
field in space containing two conducting  
ong cylinders with parallel  
axes 20 p3512 A66-37146
- Maximum sample excursions of Kiefer-  
Wolfowitz stochastic approximation  
processes 20 p3590 A66-37364
- Self-focusing and self-trapping of intense  
light beams in nonlinear medium examined,  
using approximations of geometrical optics  
and accounting for diffraction  
effects 20 p3602 A66-37372
- Monotony principle for linear  
approximations to determine upper and  
lower bounds of minimum deviation in  
approximating functions of real variable by  
generalized polynomials 20 p3590 A66-37529
- Monograph on approximate analysis of  
randomly excited nonlinear controls,  
discussing feedback system performance,  
functional and quasi-functional  
representation, zero mean systems,  
etc 20 p3538 A66-37577
- Open and closed-loop network synthesis  
using transient-response  
approximation 20 p3538 A66-37581
- Approximate method of integrating  
linearized equation for laminar boundary  
layer to establish relations of velocity  
distribution with friction  
stress 20 p3546 A66-37679
- Approximate determination of correct  
detection probability in optimum signal  
reception of unknown  
phase 20 p3518 A66-37871
- Bounds on reliability, life distributions and  
open problems for  
structures 20 p3574 A66-37964
- Monograph on solving shell stability  
dynamic problems by geometric  
approximation 20 p3671 A66-37983
- Second approximation of transonic theory  
as laws for thin bodies 20 p3493 A66-37988
- Successive approximation method for  
solving fundamental equations of nonlinear  
flexural vibration for rectangular elastic  
plate, noting effect of temperature and  
large amplitude 20 p3672 A66-38236
- Atmospheric turbulence coefficient  
determination from flow fluctuations,  
measuring error as function of observation  
duration 20 p3594 A66-38379
- Sudden approximation applied to rotational  
transition probabilities and inelastic total  
cross sections for scattering of homonuclear  
atomic molecules by  
atoms 21 p3774 A66-38526
- Extension of pairing theory of  
superconductivity to electron-phonon  
coupling, applying Landau quasi-particle  
approximation 21 p3796 A66-38552
- Krylov-Bogoliubov method applied to linear  
differential equations, noting transcendental  
functions and error  
analysis 21 p3755 A66-38596
- Approximate method for solution of  
dynamic stability problem of shafts  
subjected to pulsating moment and constant  
axial force 21 p3743 A66-38621
- Metric vector space with one-dimensional  
linear subspace not  
approximating 21 p3756 A66-38809
- Energy transport by electromagnetic  
waves, using successive  
approximations 21 p3770 A66-38946
- Approximate method for determining  
damping factors of mechanical oscillatory  
systems with many degrees of freedom  
described by linear differential equations of  
-th order with constant  
coefficients 21 p3770 A66-38971
- Generalized Rolle and Bernstein theorems  
applied to polynomial approximation of  
ordinary differential equations over compact  
linear space 21 p3758 A66-39259
- Moments of output coordinates of  
nonlinear system determined by algorithm  
based on approximation method, noting  
application to automatic control  
system 21 p3758 A66-39283
- Nonlinear automatic system with logical  
device analyzed in presence of external  
action, obtaining harmonic linearization  
coefficients 21 p3719 A66-39284
- Difference approximations to PDEs of fluid  
dynamics used to determine necessary  
condition for stability, examining advective,  
diffusive and inertial  
terms 21 p3730 A66-39471
- Approximation of nonlinear characteristics  
of conservative vibrations by two polygon  
characteristics chosen so that mechanical  
energy of system remains  
same 21 p3833 A66-39599
- Amplitude friction effect in single degree  
of freedom vibrating system by developing  
amplitude into approximate trigonometric  
series 22 p3917 A66-39669
- Characteristic TWT equation solved for  
large space-charge  
parameter 22 p3874 A66-39838
- Transistorized LR oscillator design using  
piecewise linear approximation in oscillation  
theory 22 p3874 A66-39843
- Time dependent Ising-model description of  
binary liquid mixture near critical  
temperature 22 p3947 A66-39922
- Conditions under which optimal wave  
functions satisfy various time-dependent  
Hellmann-Feynman  
theorems 22 p3947 A66-39923
- Asymptotic formulas for approximate  
solutions of Cauchy problem by difference  
techniques, considering error of tabulated  
elements 22 p3939 A66-40154
- Addition of uniform and Gaussian  
distributions, exact and approximate  
solutions 22 p3939 A66-40171
- Statistical properties of dynamic response  
of structure to random load field, examining  
simple deterministic  
loadings 22 p3993 A66-40359
- Euler-Lambert equation for orbital transfer  
in Newtonian field solved by approximate  
method 22 p3981 A66-40475
- Nonlinear boundary value problem for  
temperature distribution in convex solid  
with radiation boundary  
condition 22 p3999 A66-40565
- Supersonic flow around blunt body  
calculated via integral relations, using  
simultaneous approximation function in two  
directions 22 p3844 A66-40572
- Approximate solution of PDE for heat  
transfer in uniform-property universal  
turbulent boundary layer 22 p4001 A66-40923
- Reduction of PDE system of heat transfer,  
using Hermitian approximating polynomials  
to obtain solution to initial  
system 23 p4041 A66-40971
- Approximate solution of boundary value  
problems in elasticity theory as applied to  
thin plate theory, using homogeneous  
equations 23 p4136 A66-41000
- Analytical approximate solution of motion  
equations for ballistic vehicles during  
atmospheric entry, examining velocity and  
inclination angle error dependence on height  
eccentricity and apogee radius  
[ICAS PAPER 66-38] 23 p4007 A66-41010
- Approximation method for maximizing  
nonlinear separable function with two-sided  
limitations on unknowns, given common  
lower boundary for difference modulus of  
unknowns 23 p4088 A66-41059
- Particle-in-cell /PIC/ method for  
approximate solution of propagation and  
reflection of plane shock waves in dusty  
gases 23 p4054 A66-41158
- Disperse material heating by simultaneous  
radiative and convective energy with  
temperatures expressed as integral  
equations 23 p4148 A66-41270
- Successive approximation method for  
optimization of nonlinear systems of  
ordinary differential equations with  
limitations on phase  
coordinates 23 p4084 A66-41352
- Reciprocal theorems of best  
approximations of complex variable,  
considering domain restricted by finite  
number of smooth curves forming nonzero  
angles at junction points 23 p4084 A66-41353
- Supersonic gas flow problems around  
lattice of conical blades solved in any  
approximation of perturbation  
theory 23 p4008 A66-41358
- Electric microfields in plasma taken as  
system of charged particles moving in  
uniform neutralizing background, using  
approximations and Monte Carlo  
study 23 p4101 A66-41363
- Kinetic equations in hydrodynamic  
approximation for weakly reacting and  
excited Bose systems, finding asymptotic  
expressions for Green  
function 23 p4055 A66-41412
- Stochastic form of decaying isothermal  
second-order reactions, comparing exact  
solution with various closure  
approximations 23 p4055 A66-41498
- Quasi-linear approximation for turbulent  
plasma obtained via Wiener-Hermite  
functional expansion for electric field and  
distribution function 23 p4104 A66-41504
- Phase plane method in study of transfer  
functions of higher order relay  
servosystems 23 p4050 A66-41613
- Approximate solution to digital sequential  
least squares estimation of eigenstates of  
nonlinear processes 23 p4050 A66-41614
- Approximate solution of certain mixed  
plane boundary value problems involving  
isotropic elastic body 23 p4140 A66-41836
- One-dimensional approximation analysis of  
excess carrier density distribution in  
illuminated semiconductor and radiative  
recombination effects 23 p4115 A66-41857
- Approximate second-order supersonic delta  
wing theory taking into account second-  
order differential equation via approximate  
particular integral 23 p4011 A66-41897
- Approximate integral method for  
determining thermal boundary layer and  
heat transfer on flat plate with insulated  
surface 23 p4150 A66-41920
- Perturbation approximations of order  
greater than unity used to study behavior of  
oscillator 23 p4096 A66-41946
- Inviscid hypersonic flow past flat wings at  
large angle of attack analyzed, using  
homogeneous layer concept of shock layer  
theory 23 p4013 A66-42014
- Rational one-dimensional theory of wave  
propagation and vibrations in elastic bars  
with rectangular cross  
section 24 p4284 A66-42137
- Dumbbell librations of satellites in elliptic  
orbits of small eccentricity determined via  
WKBJ approximation 24 p4272 A66-42158
- Stability of solution obtained in first  
approximation, introducing concept of  
quantity gamma for n-dimensional  
systems 24 p4230 A66-42216
- Thermodynamics and approximation theory  
of viscoelastic materials, developing  
Coleman-Noll theory, thermodynamic theory  
for fluids, etc 24 p4288 A66-42278
- Drift approximation of motion equations  
for relativistic charged particle in  
electromagnetic field, adiabatic trap, HF  
magnetic field, etc 24 p4241 A66-42332
- Local approximation of continuous periodic  
function by Fourier  
series 24 p4231 A66-42513
- Analytical method for studying pattern of  
flow from nozzle into vacuum used to  
calculate plume shape for rocket exhausting  
into hypersonic stream 24 p4158 A66-42790
- Reentry heat flux condition transformation  
into specified convective coefficients and  
temperatures, accounting for variation of  
flux with wall  
temperature 24 p4261 A66-42795
- Method of weighted residuals /MWR/,  
Galerkin method and variational method  
compared for approximate solution of  
differential equations 24 p4232 A66-42836
- Approximate solution of variation problems  
in heat explosion theory, noting difficulty  
resulting from heat libration dependence on  
temperature 24 p4295 A66-42884
- Equations from hydrodynamic equations,  
determining steady state fields and currents  
in plasma caused by microwave field, using  
quasi-linear  
approximation 24 p4244 A66-42973
- Approximation method for calculating  
transient temperature field in solid for case  
where heat-transfer coefficient  
varies 24 p4296 A66-43224

APSIDAL ANGLE

Optimum impulsive transfer between

elliptic and noncoplanar circular orbits, noting paths with up to three apsidal impulses 09 p1459 A66-20884

**APTITUDE**

**SA PERSONNEL SELECTION**  
Criteria for aircrew selection, describing aptitude and performance tests used by RAF 10 p1494 A66-22137

**ARC**

**S AURORAL ARC**  
**S CARBON ARC**  
**S ELECTRIC ARC**  
**S MAGNETIC ANNULAR ARC**  
**S MERCURY ARC**  
**S PLASMA ARC**

**ARC CHAMBER**  
Variable-volume arc chamber in Ling-Temco-Vought hypervelocity wind tunnel, examining design, performance and calibration technique 11 p1686 A66-22843  
Cylindrically symmetric plasma column produced by wall-stabilized arc constrained to operate within transparent tube 13 p2148 A66-25822  
Stagnation-point heat-transfer measurements in partially dissociated supersonic air arc tunnel 17 p3040 A66-33484  
Hypersonic plasma generator for reentry vehicles with arc tunnel experimental data and analysis of nonequilibrium chemical reaction between cesium atoms and ionized air species 20 p3497 A66-37158  
Lanthanum germanide synthesis using arc furnace, noting chemical properties 20 p3584 A66-37416  
High temperature high density carbon plasma production in arc chamber of shock tube 22 p3955 A66-40092

**ARC DISCHARGE**  
Equilibria and stability of confined arc column noting electron temperature, temperature gradients and radiative transport [AIAA PAPER 65-541] 01 p0109 A66-10182  
Nonlinear effect of modulation by propagating wave in arc discharge 01 p0110 A66-10349  
Book on UV radiation covering arcs, incandescent radiation sources, solar radiation, transmission, reflection, detectors and application 01 p0107 A66-10979  
High pressure argon arc with intense continuum as possible source in UV radiometry 02 p0212 A66-11225  
Fluid-transpiration plasma source and liquid-cooled mechanically sealed short arc source for solar simulation 02 p0213 A66-11229  
Compact arc lamps, arcs in enclosed quartz glass filled with gas or vapor, most powerful and concentrated sources of UV, near IR and visible radiation 02 p0213 A66-11231  
Spectral radiance measurements for vortex stabilized arcs in argon, oxygen, air and nitrogen 02 p0263 A66-11232  
Dispersion relation of density waves in low pressure arc discharges 02 p0269 A66-11953  
Performance of vortex-stabilized arc radiation source in which arc current, gas pressure, gas flow rate and nozzle diameter are prime variables 02 p0270 A66-12209  
Arc column parameters calculated for argon atmosphere, obtaining curves of thermal-electrical conductivity vs temperature and conductivity zone vs temperature 03 p0398 A66-12511  
Plasma density enhancement in arc discharge by applying converging magnetic field 04 p0551 A66-13742  
Inhomogeneous plasma from hot-cathode arc discharge at various pressures using various gases, recording oscillations from plasma instability with Langmuir probes 04 p0552 A66-13868  
Inhomogeneous plasma from hot-cathode arc discharge at various pressures using various gases, recording oscillations from plasma instability with Langmuir probes 05 p0727 A66-15459  
Current-voltage characteristics of low-voltage arc in cesium vapor, noting ionization process 06 p0915 A66-16150  
Electron concentration and temperature distribution in argon DC arc measured with hot wire probe 06 p0918 A66-16834  
Transition probabilities and line-shape parameters for three argon lines in wall-stabilized Ar arc containing trace of

H 08 p1261 A66-18766  
Demountable high-power xenon arc lamp with replaceable silica discharge tube 08 p1168 A66-19296  
Radial inhomogeneity, temperature dependence and ion and atom concentration of growing luminous cloud from arc discharge 08 p1266 A66-19771  
Vapor jet pressure and velocity in heavy-current arc between two graphite electrodes, comparing results from universal 09 p1368 A66-20826  
Alfven wave generation and propagation in low pressure arc discharges of helium, argon, nitrogen and air [AIAA PAPER 66-171] 10 p1560 A66-21425  
High density plasma with high optical emissions produced by wall stabilized pulsed arc discharge in xenon, noting absorptivity and electric conductivity [AIAA PAPER 66-184] 10 p1561 A66-21433  
Auxiliary arc heating hollow cylindrical cathode and preionization of interelectrode space, obtaining thermionic emission [AIAA PAPER 66-191] 10 p1562 A66-21437  
Vacuum arc thruster experiments in development of electric propulsion system for spacecraft [AIAA PAPER 66-202] 10 p1592 A66-21444  
Ion engine arcing frequency from micrometeoroid impact [AIAA PAPER 66-205] 10 p1592 A66-21446  
Discharge and exhaust beam of small low-power DC magnetic expansion thruster [AIAA PAPER 66-195] 11 p1743 A66-22216  
Arc discharge in cesium vapor within diode, noting plasma parameter distribution in electrode spacing during low, luminous and arc discharge phases 13 p2142 A66-25681  
Operation and performance characteristics of shock tube using arc discharge heating of driver gas, noting results on radiative emission from aerodynamic plasmas 13 p2059 A66-26711  
Arc discharges in supersonic flows, discussing problem of obtaining stable transverse electric arc in supersonic plasma jet 14 p2375 A66-28177  
Arc cathodes as heat sources in low pressure gas flows, noting loss of material and other effects 14 p2346 A66-28178  
Large annular steady state stable hot-electron plasma blanket formed by magnetically trapping electrons originating in intense arc gas 14 p2347 A66-28304  
Quasi-steady-state operation of arc thruster obtained with pulse time of few hundred microseconds, producing continuous plasma stream [AIAA PAPER 65-338] 15 p2572 A66-29276  
Current-voltage characteristics of low-voltage arc in cesium vapor, noting ionization process 15 p2429 A66-29880  
Magnetic properties of thin Permalloy films prepared in glow and arc discharge in inert gas 16 p2774 A66-30692  
Axially flowing gas through arc discharge, examining effect on I-V characteristic and radial temperature distribution in arc column 16 p2762 A66-31159  
Pressure rise in inner region of hydrogen arc discharge in axial magnetic field 16 p2764 A66-31352  
Electric conductivity parameters for plasma gap formed by discharge in argon and potassium mixture in electric-arc heater 16 p2766 A66-31601  
Plasma plate and cylinder oscillation compatibility with radiation from positive argon column at four discrete frequency bands and low pressure 17 p2962 A66-31815  
Velocity of arc wind measured for various magnetic fields and distances above arc path, using temperature probe and dragmeter 17 p2969 A66-32639  
Symptomatic behavior and anode regimes of arc for electric arc with superimposed subsonic flow of argon [AIAA PAPER 66-479] 17 p2970 A66-32768  
Dissociation rate of undiluted carbon monoxide behind strong shock waves produced in arc discharge shock tube [AIAA PAPER 66-518] 18 p3063 A66-33660

**ARC GENERATOR**  
Origin of arc in hollow anode of argon high pressure arc plasma generator shown to be not static 02 p0264 A66-11241

**ARC HEATING**  
Large solar simulator using interreflector to collect energy from high pressure arc 02 p0214 A66-11231  
Arc temperature field with transpiration, cooled anode in argon atmosphere measured by spectroscopy, noting semiluminous region [AIAA PAPER 65-94] 02 p0303 A66-11531  
Spectroscopic analysis of helium plasma heated by reflected shock in T-tube discussing luminous front and preceding shock 09 p1409 A66-20851  
Arc plasma generator for anode research noting design operation techniques and results [AIAA PAPER 66-162] 10 p1485 A66-21681  
Arc heating, self-magnetic acceleration and supersonic flow in plasma thruster [AIAA PAPER 66-237] 11 p1760 A66-22221  
Arc-driven vortex type heater-accelerator for possible use in reentry flight simulation 11 p1684 A66-22833  
Excitation temperature measurement of arc-heated argon plasma jet by spectroscopic method at supersonic nozzle outlet 12 p1920 A66-23851  
Enthalpy of gas stream, calorimeter surface treatment and heat transfer measurement errors in arc-heated tests 14 p2411 A66-27421  
Electrical discharge probe for transient density measurements in rarefied gas flow noting density range, flow velocity, etc 16 p2701 A66-30316  
High intensity fast molecular beams obtained by skimming and collimating core of supersonic plasma jet from arc-heated source 16 p2760 A66-30416  
Argon arc torch as compact heat source for thermophysical studies 17 p2928 A66-33501  
Arc burning mechanism of vortex-stabilized plasmatrons, noting effect of arc shunting on volt-ampere characteristics 18 p3143 A66-34011  
Error analysis of absorbed energy flux density and ignition exposure time data accuracy, precision and confidence limit estimates for arc image furnace ignition experiments [AIAA PAPER 66-669] 18 p3261 A66-34221  
Arc heated impulse wind tunnel facilities including Mach 16 contoured nozzle [AIAA PAPER 66-759] 22 p3894 A66-40611  
Gas heating in wall stabilized electric arc with axial flow applied to nitrogen arc obtaining highest enthalpy flux and efficiency 24 p4295 A66-43011

**ARC JET**  
Optical processes effect on integral wall plasma radiation to determine atmospheric pressure and temperature 03 p0399 A66-12811  
Visible and near UV radiation intensity profiles for ablating Teflon boundary layer in hot subsonic arc-jet flow at or near atmosphere [AIAA PAPER 66-56] 07 p0983 A66-18411  
Large vacuum facility tests of MPD arc thruster [AIAA PAPER 66-117] 08 p1282 A66-19011  
Current density distribution in MPD arc jet exhaust measured, using Hall effect sensors [AIAA PAPER 66-116] 09 p1433 A66-20011  
Varying instability frequency in simulated arc jet-Hall accelerator [AIAA PAPER 66-156] 10 p1559 A66-21411  
Friction factors and mean electric conductivity for argon arc plasma flow examining laminar-turbulent flow modes [AIAA PAPER 66-189] 10 p1561 A66-21411  
Criterion of electron-heavy particle thermal nonequilibrium encountered in subsonic arc jet plasma at pressure of 1 atm [AIAA PAPER 66-192] 10 p1562 A66-21411  
Lithium, ammonia and hydrogen-fueled MPD arc jets [AIAA PAPER 66-239] 12 p1936 A66-24511  
Experiments with arc jet characterized by composite electromagnetic and vortex stabilization and propelled by hydrogen, nitrogen, noting heat loss through electrodes 14 p2373 A66-27011  
Lithium-hydrogen bipropellant arc jet 14 p2374 A66-27411  
Transpiration cooling of hemispherical models in arc jet wind tunnel to obtain mass injection effects into boundary layer of aerodynamic

- configuration 14 p2412 A66-27446  
Liquid cooled high specific impulse arc jet engine has measured engine thrust not completely aerodynamic in nature  
[AIAA PAPER 64-669] 14 p2374 A66-27470  
Laminar argon arcjet mixing with coaxial flow of cool helium, considering turbulent characteristics and heat transfer  
[AIAA PAPER 65-587] 17 p3033 A66-32442  
Profile of ionized calcium resonance lines radiated from arc plasma jet observed by Fabry-Perot etalon 17 p2970 A66-32714  
Large vacuum facility tests of MPD arc thruster  
[AIAA PAPER 66-117] 21 p3777 A66-38716  
Langmuir type probe in argon arc jet, discussing surface contamination problems, causes of high electron temperature and development of automatic cleaning technique 22 p3899 A66-40368  
Photometric device for measuring propagation velocity of light fluctuations in arc-heated plasma jet 24 p4212 A66-42776  
Energy storage film capacitors for pulsed plasma thrusters developed for coaxial plasma gun and pulsed arc gun  
[AIAA PAPER 65-337] 24 p4261 A66-42780  
**ARC LAMP**  
Optical conversion efficiencies computed from spectral distribution measurements of pulsed and continuous xenon arc discharges 08 p1259 A66-19703  
Model L/C water-cooled DC power supply for short arc lamps, noting SCR selection 16 p2635 A66-30495  
Maximum efficiency contour /MEC/ source collector designed for compact arc sources used in solar simulators 16 p2681 A66-30508  
Four-foot diameter solar radiation simulator system using single xenon arc source and closed-loop heat exchange system for electrode cooling 22 p3887 A66-40206  
**ARC MELTING**  
Solid solution and carbide strengthened arc melted alloys of hafnium with tungsten and ternary alloys of tantalum, columbium, rhenium and carbon 06 p0894 A66-16078  
Grain size effects on tensile and creep properties of arc-melted and electron-beam-melted tungsten 07 p1048 A66-17475  
**ARC WELDING**  
**SA PLASMA ARC WELDING**  
**SA SPOT WELDING**  
Out-of-position gas metal-arc and gas tungsten-arc welding of fuel and LOX tanks of S-1C Booster for Saturn V 02 p0235 A66-11467  
Arc welding of two stainless maraging steels 02 p0235 A66-11468  
Inherent self-control of arc made possible by elimination of drift in current source output and electrode feed rate 02 p0236 A66-12226  
Notch-tough high-strength butt welds in alloy titanium plate with gas metal-arc welding, using spray type or short circuiting metal transfer 02 p0236 A66-12228  
HF multiple-seam arc welding unit that produces six welds simultaneously 03 p0374 A66-13118  
Alternating current rectified by tungsten electrodes of argon shield welding unit and DC component generated affects arc welding performance 03 p0375 A66-13121  
Effects of drop formation on rate, duration and size of welding and quality of welds in submerged-arc welding 03 p0375 A66-13123  
Submerged arc welding of 18 percent maraging steel 05 p0685 A66-14516  
Short-circuiting gas metal-arc welding of high nickel alloys for manufacture of liquid rocket engine components with aerospace quality 05 p0686 A66-14691  
Electrode tip geometry effect on characteristics of gas tungsten arc welding operating in cathode spot mode 05 p0686 A66-14693  
Theoretical and experimental evaluation of arc-image welding technique using solar energy as high temperature source 05 p0686 A66-14694  
Argon-arc welding of 3-mm high-strength steel sheet and molten slag arcless electric welding of 100-mm high-strength steel plate 08 p1231 A66-19168  
Fusion welding processes dependent upon electric heat source 09 p1384 A66-20610  
Submerged arc welding of Ti-Ni-Co-Mo maraging steel 10 p1539 A66-21169  
Fabrication of 260-inch diameter rocket cases by automatic gas tungsten arc welding techniques, using 18 percent nickel maraging steel 10 p1540 A66-21767  
Spray transfer gas metal-arc welding of titanium plate, using flux backing technique 13 p2087 A66-26016  
Porosity at weld fusion zone-base material interface in gas tungsten-arc and electron beam welds of tantalum 13 p2110 A66-26018  
Argon arc and resistance diffusion /vacuum/ welding of Ti and Ti alloys and protective metallic coating deposition on welded parts 13 p2110 A66-26027  
Gas shielded metal arc welding, discussing power sources, wire feed mechanism, torch and carbon dioxide cylinders 13 p2088 A66-26764  
Pulsed spray arc welding compared with continuous spray processes 14 p2301 A66-27342  
Porosity in titanium arc welds, noting sources of gas evolution and probable causative gases, particularly molecular hydrogen and oxygen 14 p2302 A66-27346  
Gas tungsten arc welding process automation based on feedback control concept 16 p2715 A66-31435  
Welding characteristics of four advanced commercial columbium base alloys using gas tungsten arc and electron beam processes 16 p2725 A66-31437  
Electron beam welding suitable for joining tungsten sheet for fabrication of solid rocket nozzles and nozzle accessories 19 p3369 A66-36128  
Quantitative analysis of drops of material transferred during arc welding 21 p3743 A66-38938  
Vacuum pressure effect on separation distance for arcing of DC current between spacecraft material 21 p3771 A66-39214  
Conventional arc welding processes and application to aerospace industry 22 p3925 A66-40267  
Plasma arc welding of aerospace materials, comparison with TIG method, penetration of thick sections, tests, etc 22 p3926 A66-40272  
**ARCTIC**  
Comparison of diurnal variations of ionization level in F region at geographically and geomagnetically conjugate stations in Arctic and Antarctic 04 p0516 A66-13851  
Arctic short-wave atmospheric radiation absorption, long-wave radiation loss, and tropospheric radiation balance 12 p1949 A66-24203  
Rocket observation of atmospheric density at high latitudes in Arctic and Antarctic locations  
[AIAA PAPER 66-345] 12 p1872 A66-24485  
Flows and fractures as types of deformation occurring on Earth under huge loads of ice suggested by isostatic compensation of Antarctica, Arctic basin and glaciated region in North America 12 p1875 A66-24894  
Speculative mean monthly Arctic stratospheric temperatures estimated from radiosonde and meteorological rocket wind and temperature data 16 p2696 A66-30928  
**ARGENTINA**  
Aerospace studies in Argentina during 1964 using rockets and balloons and including winds, E layer, satellite tracking, etc 09 p1458 A66-20706  
Space research in Argentina in 1965 15 p2602 A66-29942  
**ARGON**  
High pressure argon arc with intense continuum as possible source in UV radiometry 02 p0212 A66-11225  
MHD experiments with high enthalpy flow of argon 03 p0445 A66-13214  
Potassium content and K-A ages of 18 amphoteric chondrites determined from isotope dilution 04 p0580 A66-14486  
Heat transfer from Ar and Xe to end wall of shock tube measured, using thin film gauge monitored by IR photocell 05 p0782 A66-14705  
Speed of sound in ionized argon, noting electronic excitation influence 05 p0723 A66-15167  
High-pressure pulse arc created by discharging capacitor bank through steadily burning argon arc 06 p0919 A66-16874  
Atmospheric argon effect on hypersonic stagnation point convective heat transfer, using arc-heated shock tube simulating flight velocities up to 34,000 fps  
[AIAA PAPER 66-29] 07 p1153 A66-17891  
Ionization rate behind shock waves in argon, allowing for excitation and ionization by atom-atom collisions 07 p1020 A66-17938  
Neutral atomic beam used to measure total ionization cross section of argon atoms incident on low density argon gas 07 p1083 A66-18421  
Extraterrestrial dust as atmospheric argon source and influx of black spherules 08 p1287 A66-18770  
Thermodynamic parameters of carbon dioxide and argon mixture behind straight shock wavefront 09 p1470 A66-20146  
Pulse heights produced when argon, nitrogen and argon-nitrogen mixtures completely stop alpha particles 09 p1405 A66-20680  
Free piston argon shock tunnel using helium as driver gas, considering interface shock, pressure and stagnation point heat transfer  
[AIAA PAPER 66-169] 10 p1519 A66-21419  
Heat transfer measurement to side wall of shock tube behind incident shock wave in argon and xenon  
[AIAA PAPER 66-160] 10 p1560 A66-21428  
Ionization phenomena in argon due to laser radiation by measuring electron density and energy as time function after laser pulse initiation at different gas pressures and preionized conditions  
[AIAA PAPER 66-176] 10 p1565 A66-21690  
Argon-oxygen phase diagram determined by X-ray diffraction 11 p1650 A66-23208  
Shock compression of liquid argon at very high pressures and temperatures by reflecting shock wave from tungsten wall for testing interatomic potential 11 p1694 A66-23210  
Thermal decomposition of difluorocarbene radical diluted in argon analyzed behind incident shock waves at high temperatures 12 p1811 A66-23623  
Electrical precursors in immediate vicinity of ionizing shock waves in argon analyzed, using model describing electron diffusion through shock 12 p1923 A66-24579  
Metal wall ionized argon lasers, discussing use of water-cooled quartz discharge channels, CW lasers, development of satisfactory metal, etc 13 p2091 A66-25555  
Electron impact excitation mechanism of argon-ion continuous and long pulse lasers 13 p2102 A66-26206  
Transition probabilities and lifetimes in ionized argon gas lasers 13 p2102 A66-26207  
Pressure effects of argon on fine structure components of first two members of cesium principal series 13 p2135 A66-26263  
Differential scattering of ionized helium on neon and argon and ionized argon on argon measured at various relative energies and scattering angles 13 p2135 A66-26269  
Static pressure distributions in supersonic nozzle flows of dissociated hydrogen plus argon 14 p2219 A66-27442  
Argon flow through long tube compared with Weber theoretical model, applying classical continuum equations 14 p2274 A66-27444  
Argon diffusion from biotite of mica schist due to intrusion of dyke analyzed on basis of thermal metamorphism and isotope migration 14 p2364 A66-27848  
Ionization cross sections for low energy collisions of neutral nitrogen molecules or neutral argon atoms, using asymmetric charge transfer 14 p2337 A66-27980  
Motion of potassium ions in argon, using apparatus for simultaneous measurement of mobility and diffusion coefficients 14 p2345 A66-28140  
Intensity growth and decay in Ar and Hg lines after switching on mercury vapor discharge lamps filled with Ar 15 p2542 A66-29716  
Fundamental vibration spectrum of HD in liquid argon, noting rotation-translation coupling, quantized translational energy levels and perturbation treatment of interaction 16 p2645 A66-30120

Spatial distribution of high energy Ar atoms scattered by various surfaces 16 p2753 A66-30398  
High energy argon atom interactions with surfaces and variations in accommodation coefficient 16 p2702 A66-30399  
Thin film heat transfer gauges to measure axial extent of curved shock fronts in argon 17 p2908 A66-32416  
Measurable range of ionizational relaxation behind shock front in argon extended to equilibrium region by mm-wave technique 17 p2912 A66-32982  
Argon arc torch as compact heat source for thermophysical studies 17 p2928 A66-33500  
Electrodeless annular discharges in argon and air 18 p3144 A66-34039  
Radiation spectra of plasma jets from IR to UV, determining electron density and argon excitation temperature, noting bremsstrahlung 18 p3144 A66-34103  
Polarization difference in elastic scattering of proton from Ar 40 and Ca 40 due to spin-orbit force difference 18 p3140 A66-35037  
Light energy measurements made with argon bomb used as chemically powered laser pump 19 p3373 A66-35388  
Sputtering yields of various semiconducting single crystals under argon ion bombardment 19 p3436 A66-35420  
Temperature dependence of dissociative recombination coefficients in argon according to hypotheses of Bates and Palgarno 19 p3404 A66-36758  
Numerical calculations of parameters of steady state HF high pressure vortical discharge of argon in air 20 p3607 A66-36975  
P-V-T behavior of argon, nitrogen and argon-nitrogen gas 20 p3677 A66-37089  
Thermodynamic parameters of carbon dioxide and argon mixture behind straight shock wavefront 21 p3836 A66-39417  
Intracavity interferometer laser measurements of power gain and output in single-frequency Ar laser and 6328-angstrom Ne isotope shift 22 p3932 A66-40110  
Temperature measurement in shock tubes and transition probabilities of argon spectrum lines from emission intensities 22 p3956 A66-40406  
Methane/deuterium exchange reaction rate measured in shock tube, using vibrational excitation mechanism to explain data 22 p3860 A66-40903  
Charge exchange cross sections for argon ions incident on hydrogen and deuterium measured over energy range of 30 to 1000 ev, taking into account ion-molecule reactions 23 p4098 A66-41267  
Shock tube monitoring of electron-generation rate in argon-xenon ionization cross section implies that atom-atom processes in noble gases ionization cross section is independent of electronic structure 23 p4099 A66-42080  
Time resolved emission measurements for Cr-Ar mixtures in three spectral regions and ionization occurrence in excited state inelastic collisions 23 p4033 A66-42083  
Argon entropy diagram calculation from sound velocity data and P-V-T relation 24 p4238 A66-42887

ARGON PLASMA

Acceleration and dynamics of argon plasma in inductive hydrodynamic shock tube 01 p0113 A66-10638  
Origin of arc in hollow anode of argon high pressure arc plasma generator shown to be not static 02 p0264 A66-11241  
Argon arc stabilized by cooled walls, considering radiation calculated with aid of dependences describing transport properties of argon plasma 02 p0265 A66-11390  
Arc column parameters calculated for argon atmosphere, obtaining curves of thermal-electrical conductivity vs temperature and conductivity zone vs temperature 03 p0398 A66-12511  
Spectral line energy emitted by homogeneous argon plasma 03 p0399 A66-12715  
Current, potential electron and atom temperature distributions between anode and cathode in low pressure crossed-field plasma accelerator 03 p0416 A66-12784  
Thermal conductivity measurements of

argon plasma produced by stabilized electrical arc 03 p0399 A66-12825  
Electrical conductivity of argon plasma 03 p0400 A66-12834  
Electrical characteristics of plasma torch types with plasma jets used in buildup welding 03 p0374 A66-13120  
Probes in atmospheric pressure argon plasma where ion diffusion is function of temperature 03 p0406 A66-13280  
Spatial distribution and temporal decay of electron and atom concentrations in pulsed /argon afterglow/ plasma measured with laser interferometer 04 p0551 A66-13741  
High pressure high current argon discharge, calculating statistical variations of photon radiation, electron and ion densities 05 p0720 A66-14504  
Reflected shock waves in helium and argon plasmas noting electron density, Saha equations and Newtonian technique 05 p0720 A66-14505  
Isentropic expansion of argon plasma in Laval nozzle, discussing parallel flow parameters, frozen flow, thermodynamic equilibrium, energy balance, etc 05 p0720 A66-14509  
Output spectra of argon ion laser in ring resonator and two mirror resonators 05 p0694 A66-14904  
Electric arc interaction with argon flow analyzed in crossed convective and magnetic fields [ASME PAPER 65-WA/ENER-1] 05 p0728 A66-15626

Nonequilibrium ionization of K-seeded or Na-seeded argon for MHD generators, noting current density-electric field characteristics 05 p0625 A66-15811  
Boundary layer between argon plasma and solid wall at atmospheric pressure 05 p0728 A66-15815  
Electron temperature spectroscopy for atmospheric argon plasmas, sodium vapor seeded at high temperatures, noting relationship with current density 06 p0915 A66-16178  
Electron concentration and temperature distribution in argon DC arc measured with hot wire probe 06 p0918 A66-16834  
Argon plasma temperatures measured by spectral method in internal and external arc plasmatrons, using copper impurity line 06 p0918 A66-16837  
Sorption of low energy argon ions by titanium films as function of ion energy, density of ion beam and method of preparation of film 06 p0928 A66-16886  
Behavior of small cylindrical Langmuir probe in steady low density flow of argon plasma

[AIAA PAPER 66-5] 07 p1034 A66-17880  
Electrical characteristics of supersonic MHD generator with arc heated argon plasma, noting discharge modes 07 p0993 A66-18311  
Transition probabilities and line-shape parameters for three argon lines in wall-stabilized Ar arc containing trace of H 08 p1261 A66-18766  
Variation of electron temperature and number density, ion current density and plasma potential through low density Hall current ion accelerator as function of magnetic field strength [AIAA PAPER 66-76] 08 p1262 A66-18994  
Electron temperature variation in argon MGD channel in crossed magnetic and electrical fields 08 p1263 A66-19174  
Magnetic field effect on electron temperature, number of ionization events and potential gradient in argon and neon HF discharge 08 p1264 A66-19186  
Spectral line energy emitted by homogeneous argon plasma 09 p1406 A66-19946

High voltage vortex arc radiation source for producing reliable quantifiable plasmas, noting argon spectral distribution [AIAA PAPER 66-186] 10 p1561 A66-21434  
Friction factors and mean electrical conductivity for argon arc plasma flow, examining laminar-turbulent flow modes [AIAA PAPER 66-189] 10 p1561 A66-21436  
Criterion of electron-heavy particle thermal nonequilibrium encountered in subsonic arc jet plasma at pressure of 1 atm [AIAA PAPER 66-192] 10 p1562 A66-21438

Electric arc interaction with argon flow analyzed in crossed convective and magnetic fields [ASME PAPER 65-WA/ENER-1] 10 p1563 A66-21501

Laser induced gas breakdown at high pressures, noting effect of plasma density on index of refraction via optical frequency resonance measurement 10 p1542 A66-2156  
Anomalous diffusion and instabilities of argon plasma in strong magnetic field 10 p1564 A66-21561

Arc plasma generator for anode research noting design operation techniques and results

[AIAA PAPER 66-162] 10 p1485 A66-21681  
Variation of thermal radiation emitted with mass flow rate of argon plasma torch 10 p1621 A66-21798

Electron temperatures in hot argon potassium discharges determined, using ratio of electron energy slopes from floating double-probe curve 10 p1568 A66-21801

Spectral line shift in low-power spark discharge argon plasma, noting line broadening and incomplete ionization 10 p1572 A66-22028

RF electromagnetic fields to control state of flowing thermal plasma

[AIAA PAPER 66-166] 11 p1742 A66-22213

Temperature and electron concentration in HF induction discharge argon plasma investigated by optical method 11 p1745 A66-22581

Spectroscopic investigation of argon jet temperature at outlet of plasmatron nozzle, measuring temperature of plasma jet 11 p1745 A66-22581

Feasibility of using Langmuir probe for measuring statistical properties of unsteady or turbulent electron-rich plasmas [AIAA PAPER 65-544] 12 p1919 A66-23581

Excitation temperature measurement of arc-heated argon plasma jet by spectroscopic method at supersonic nozzle outlet 12 p1920 A66-23881

Harmonic generation in short magnetized plasma column from helical oscillation near critical magnetic field for helical instability 12 p1925 A66-24828

Free jet of arc heated low-density supersonic argon plasma examined, measuring radiative mechanisms, electron temperatures, thrust, jet structure, etc [AIAA PAPER 66-163] 13 p2138 A66-25161

Conductivity of ionized gas in DC discharge in argon for various magnetic field intensities 13 p2139 A66-25468

HF and LF alternating electric field effect on weakly ionized argon, temperature modulation and production of harmonics 13 p2141 A66-25448

Cylindrically symmetric plasma column produced by wall-stabilized arc constrained to operate within transparent tube 13 p2148 A66-25828

Resonance peaks due to electromagnetic scattering by argon plasma jet observed during change in electron concentration, noting dependence of scattering on argon flow rate and electric power of arc 14 p2341 A66-27113

Thermal radiation from argon plasma arc of wall-stabilized type with Poiseuille flow, comparing experimental measurements with theoretical reentry predictions [AIAA PAPER 65-546] 15 p2551 A66-29221

Electron temperature correlation with excitation in temperature in argon plasma established, using spectral analysis and Langmuir probe 15 p2555 A66-29768

Spectral line shift in low-power spark discharge argon plasma, noting line broadening and incomplete ionization 16 p2760 A66-30801

Spectroscopic data from argon arc nitrogen supersonic plasma jets, noting line width, intensity, temperature, etc 16 p2763 A66-31111

Electronic relaxation of shock-heated nonequilibrium argon plasma flow by microscopic-macroscopic treatment [AIAA PAPER 66-476] 16 p2765 A66-31421

Conductivity and electron-ion recombination coefficient in argon determined from collision cross sections of electrons with neutral particles 16 p2755 A66-31511

- Electric conductivity parameters for plasma  
p formed by discharge in argon and  
tassium mixture in electric-arc

Prandtl lifting line classical theory of high aspect ratio wings as singular perturbation problem yields asymptotic expansions of Navier-Stokes solution 07 p0982 A66-18124  
Rotational derivative coefficients of angular wing of arbitrary aspect ratio situated in ideal incompressible media 08 p1162 A66-18875  
Inviscid hypersonic flow over compression side of delta wing of moderate aspect ratio 12 p1796 A66-23605  
Electrical analogy for wing in unsteady supersonic flow, determining distribution of lifting power for various aspect ratios 13 p1990 A66-25405  
Circulation distribution over rectangular wings, based on Chushkin algorithm and lifting surface equation calculated by digital computer 13 p2068 A66-26540  
Cut-off wavelength of transverse electrostatic wave mode in ridged rectangular waveguide of arbitrary aspect ratio 14 p2257 A66-27951  
Flow analysis of swept back blades in water tunnel, noting flow patterns, surface pressure distribution, lift-drag ratio, etc 18 p3049 A66-34649  
Low speed three-stage axial flow compressor tests at aspect ratios of one, two and four [AIAA PAPER 66-613] 19 p3275 A66-35359  
Approximation theory for calculating linearized subsonic and supersonic flow over pulsating bodies with low aspect ratio, noting structure of flow field 19 p3277 A66-36641  
Lateral fluid jet visualization for spanwise launching on wing model with low aspect ratio in subsonic flow 21 p3731 A66-39593  
Polar auroral radar system using ionospheric propagation effects for aspect sensitive backscatter 22 p3916 A66-40811

**ASTEROID****SA METEOR**

Age of Martian craters investigated, based on asteroid collision and certain spatial distribution 01 p0136 A66-10439  
Minor planets and ephemeris calculations with bibliography 02 p0292 A66-12262  
Improved orbital data for 36 minor planets 02 p0292 A66-12263  
Moon, Martian satellites and minor planetoids for possible use in refueling space ships by generating propellants from natural chemical planetary resources 04 p0577 A66-13577  
Spatial distribution and motion of known asteroids analyzed in order to avoid or maximize encounters in planning space

**flight**

[AIAA PAPER 66-149] 06 p0957 A66-1710  
Retrograde rotation of Venus established by radar observations is attributed to collision with 200-km diam asteroid 09 p1452 A66-2012  
Various hypotheses concerning meteorite origin, noting relation with asteroids, fireball origin, chondrules, etc 09 p1460 A66-2092  
Orbital elements of 13 asteroids, using digital computer and taking Jupiter and Saturn perturbations into account 10 p1606 A66-2126  
Bronzite and hypersthene chondrites evaluating lunar or asteroidal origin 12 p1948 A66-2390  
Positions of asteroids 1221 /Amor/ and 1948 OA /Object Wirtanen/ from photographs taken at Tautenburg, East Germany 12 p1950 A66-2439  
Lunar and asteroidal meteorites 14 p2382 A66-2760  
Tables of improved orbital data for 15 minor planets prepared by use of BESM electronic computer 17 p2995 A66-3184  
Declinations of minor planets Vesta and Pallas according to observations on vertical circle at Goloseevo in 1954-1962 17 p2995 A66-3184  
Minor planets, comets and satellite motions and positions in outline of present research 17 p2998 A66-3202  
Photographic observations of minor planet at Sydney during 1964 17 p3003 A66-3282  
Possible adaptation of asteroids to support human life for indefinite periods of time 19 p3285 A66-3624  
Meteorites from asteroids in hypothesis based on chemical composition, structure and gas absorption age 20 p3647 A66-3704  
Bias free statistics of orbital elements of asteroids 20 p3656 A66-3802  
Martian surface markings, brightness along optical equator, crater erosion, asteroid collision and yellow dust clouds 22 p3981 A66-4052  
Spatial distribution and motion of known asteroids analyzed in order to avoid or maximize encounters in planning space flight [AIAA PAPER 66-149] 23 p4127 A66-4111  
Tables of observational statistics of comets, minor planets and natural satellites 24 p4273 A66-4220  
Origin, population, orbital characteristics, surface structure and chemical composition of asteroids /meteorite type/ in solar system 24 p4276 A66-4266  
Asteroid belt flyby spacecraft concept based on Atlas family with potential growth for Jupiter flyby 24 p4278 A66-4269

**ASTRONOMICS****S ASTRONAUTICS****ASTROBIOLOGY****S BIOASTRONAUTICS****S EXTRATERRESTRIAL LIFE****ASTRODYNAMICS**

Book on methods in astrodynamics and celestial mechanics including libration points, satellite motion, orbit determination, optimization, optimal control, etc 19 p3460 A66-3588

**ASTROMETRY**

Astrometry current status, examining establishment of coordinate system and determination of astronomical constants 03 p0427 A66-1292  
System of astronomical constants adopted in 1965 by International Astronomical Union for introduction in 1968, discussing difficulties in consistency, compatibility and durability 03 p0429 A66-1319  
Astronomical constants system approved by International Astronomical Union at Hamburg in August 1964 05 p0759 A66-1488  
New techniques in astronomy - Conference Kazan, U.S.S.R., May 1964 05 p0679 A66-1520  
Prime-focus field of Maksutov telescope system on Mount Kanobil, U.S.S.R. noting objective, mirror and tests for distortion and accuracy in astrometry 05 p0680 A66-1520  
Solar flare photographic observation presenting development of flare and associated prominences on limb 07 p1118 A66-1762  
Reduction of diffracted light for

astrometry near Sun 07 p1035 A66-18036  
 Determining coordinates of astrogeodetic grid points by Molodenskii integral formulas and accuracy estimation by astrogravimetric interpolation of 08 p1217 A66-19345  
 Planetary nebulas noting observational problems, parallax, proper motion, distance, etc 11 p1787 A66-22260  
 Interferometric determination of radio source positions and use of Royal Radar Establishment 11 p1657 A66-23191  
 Nutation constant for absolutely solid Earth from recent astronomical unit and lunar mass measurements 12 p1867 A66-23513  
 Astrometry current status, examining establishment of coordinate system and determination of astronomical constants 14 p2380 A66-27271  
 Classical theory of tidal oscillations of plumb line acting under solar and lunar tidal forces 15 p2596 A66-29142  
 Measurement of distance to Moon by optical radar, discussing ruby laser/photomultiplier apparatus and procedure 16 p2647 A66-30291  
 Determining coordinates of astrogeodetic grid points by Molodenskii integral formulas and accuracy estimation by astrogravimetric interpolation of 19 p3348 A66-36053  
 Nutation constant for absolutely solid Earth from recent astronomical unit and lunar mass measurements 20 p3549 A66-37027  
 Astronomical techniques on occurrence and nature of planets outside solar system 20 p3656 A66-38027  
**STRON THERMONUCLEAR REACTOR**  
 Astron facility experiments on injection of very intense pulses of relativistic electrons into cylindrical azimuthally symmetric magnetic trap 19 p3423 A66-36551  
 Electron injection and E-layer buildup in Astron device theoretically studied by one-dimensional model, using Green functions for self-electric and self-magnetic fields 19 p3423 A66-36552  
**STRONAUT**  
**SA PILOT**  
 Crew survival goals in system design for manned space mission derived from comparative examination of mortality rates of overall society [ASME PAPER 65-WA/HUF-18] 05 p0627 A66-15694  
 Astronauts with thin shielding in radiation exposure from heavy nuclei in solar particle beams 09 p1336 A66-20521  
 Effects of radiation protective pharmacological agents /cystamine, pherotonin, AET, strychnine, etc/ on animals subjected to centrifugation, for application to astronauts 19 p3283 A66-35292  
 Effect of man walking inside or outside of satellite on attitude 21 p3818 A66-38843  
 Analogies between nutritional requirements of aircrew and cosmonauts, evaluating physiological factors involved 23 p4029 A66-41204  
**STRONAUT LOCOMOTION**  
 Mathematical model study of three-mass retrieval technique using anchor mass in space for future Gemini extravehicular operation 16 p2812 A66-31538  
 Space cabin simulator to test premise that in-flight physical exercise can be used for early detection of deteriorative trends for mission preservation 17 p2924 A66-32172  
 Extravehicular astronaut maneuvering and retrieval using thrusting devices and tether lines 19 p3290 A66-35956  
 Low-thrust jet fitted shoe for zero-gravity movement 19 p3290 A66-35957  
 Astronaut maneuvering unit, discussing experiments, performance requirements, design concepts, system tradeoffs, packaging and configuration 19 p3290 A66-35958  
 Extravehicular maneuvering techniques research, discussing manual locomotion methods, powered units, computer simulation, zero-g flight and space tests 19 p3291 A66-35960  
 Modular maneuvering unit for crew members providing independent propulsion, life support, power supply and communication capability 19 p3450 A66-35961  
 Computer simulation and performance

prediction of MMU astronaut maneuvering system, discussing acceleration, velocity, displacement, fuel consumption, propulsion efficiency 19 p3291 A66-35964  
 Extravehicular environment and mobility constraints affecting design of anthropomorphic space suit for working astronaut 19 p3291 A66-35972  
 Cleaning techniques for zip gun or hand-held maneuvering unit and environmental life support system or ventilation control module used for astronaut White walk in space 22 p3886 A66-40039  
**ASTRONAUT PERFORMANCE**  
**SA PILOT PERFORMANCE**  
 Measurement schedules effect on work load of astronaut performing navigation function, stressing tradeoff between number of measurements and accuracy level 01 p0102 A66-10044  
 Physiological test results on cosmonauts during Voskhod I and II flights including electrocardiograms, electroencephalograms, pneumograms, blood tests, spacesuit parameters, etc 01 p0017 A66-10416  
 Ionizing radiation dosimetry for space pilots on short-and long-term space flights 01 p0021 A66-10803  
 Problem areas in long duration manned space flight noting vehicle maintenance, extravehicular activities, visual skill performance, spacecraft control, etc [SAE PAPER 650809] 01 p0021 A66-10818  
 American and Soviet experience considering weightlessness, ionizing radiation, dynamic and biological factors, etc [SAE PAPER 650812] 01 p0021 A66-10819  
 Radiation hazard for cosmonaut inside or outside space from Earth radiation belt, considering electron radiative effect, tissue sensitivity, etc 02 p0182 A66-11663  
 Astronaut selection including dynamic testing, discussing examination methods, biological parameters, laboratory and radiological procedures, blood chemistry techniques, etc 04 p0469 A66-14064  
 Biological hazards of radiation exposure of man in space discussing recovery, delayed effect, injury treatment and dose 04 p0467 A66-14078  
 Vestibular sickness susceptibility under conditions of weightlessness 04 p0467 A66-14082  
 Spatial orientation disturbances and vegetative disorders occurring in cosmonauts during space flight due to disturbances in physiological interplay of sensing mechanisms governing space perception 04 p0468 A66-14084  
 Man-machine relationship during space flight 04 p0471 A66-14085  
 Perception of apparent vertical without visual cues depending on longitudinal axes of body and head to direction of resultant acceleration above 1 g 04 p0468 A66-14086  
 Space biology and medicine research, stressing flight experiments performed with Russian satellites and spacecraft 04 p0468 A66-14089  
 Astronaut physiological responses to space flight conditions measured for clinical or experimental purposes 04 p0471 A66-14091  
 Comparison of manned and unmanned spacecraft 04 p0472 A66-14092  
 Practice techniques for maintaining astronaut psychomotor skills during extended missions, with star sighting and flight control test results 05 p0626 A66-14635  
 LEM mission and pilot role in spacecraft control including guidance and control systems, retromaneuvering, landing-site inspection, etc 05 p0713 A66-15166  
 Physiological and psychomotor test performed in revolving space station simulator for design criteria for spacecraft with artificial gravity 06 p0815 A66-16051  
 Clinical aspects of interplanetary flights noting models of future cosmic diseases, automation of diagnostics, medical aid aboard spacecraft, etc 06 p0815 A66-16052  
 Simulation and environment effect on astronaut performance in space to understand work-task effort 06 p0817 A66-16239  
 Two-man space station simulator for 15-day integrated test program, primarily to study maintenance of operational mission element 06 p0868 A66-16242

Flight crew capability determined for Manned Orbital Research Laboratory /MORL/ 06 p0818 A66-16243  
 Human performance measurement capability and limitations for defining mans role in future space missions 06 p0818 A66-16244  
 Book on physiological and medical observations on cosmonauts Bykovskii and Tereshkova during simultaneous flights in Vostok V and VI 06 p0820 A66-16917  
 Correlation analysis to study reactions of human cardiovascular system during space flight of Voskhod 06 p0814 A66-17175  
 Water balance test for investigation of kidney functions of astronauts of Voskhod I spacecraft 06 p0814 A66-17176  
 Man in Project Apollo including module to module docking, lunar landing, maneuvering, reentry, etc 07 p1140 A66-17279  
 Human performance capabilities in space based on laboratory and spaceflight research 08 p1176 A66-18581  
 Human adjustment to shift in day-night cycle and effect of space flight on sleep and activity cycles of astronauts 08 p1174 A66-18582  
 Upper atmosphere and outer space research carried out by U.S.S.R. in 1964, including cosmonaut responses and launching tables 09 p1458 A66-20691  
 Layman book on lunar exploration including topographical data, lunar water, food, shelter and travel, space suits, working conditions, etc 10 p1609 A66-21900  
 Measurement schedules effect on work load of astronaut performing navigation function, stressing tradeoff between number of measurements and accuracy level 10 p1554 A66-21953  
 Emotional problems of astronauts during space flight 11 p1642 A66-22488  
 Extraterrestrial environment and calculation of realistic metabolic requirements for astronauts 11 p1648 A66-23003  
 Pre-and postflight medical examinations of Voskhod I cosmonauts 11 p1645 A66-23049  
 Mars exploration by astronauts, considering Mariner IV observations, noting low pressure and temperature, existence of frozen hydrosphere, etc 12 p1952 A66-24723  
 Model for social system for extended-duration spaceflight crews subject to isolation, confinement and/or stress 13 p2013 A66-25279  
 Medical evaluation of Martian environment based on Mariner IV photographs and extrapolations from manned flight, noting effects of Martian gravity on astronauts 13 p2014 A66-25293  
 Preflight medical tests of responses of Soviet cosmonauts Beliaev and Leonov to simulated weightlessness and performance during simulated space walk 13 p2009 A66-25889  
 Vestibular reactions of deaf during angular and coriolis accelerations 13 p2010 A66-25892  
 Physiological responses of astronauts Komarov, Feoktistov and Egorov during 24-hour orbital flight 13 p2011 A66-26229  
 Electrocardiogram P wave changes relation to body position changes in space 14 p2227 A66-26810  
 Role of man in space exploration, noting astronauts personal reports, scientific ability, superiority over instruments, etc 14 p2229 A66-26919  
 Structural dynamics/manned space flight relation, discussing man-machine dynamics, Apollo command module LF studies, pilot control of spacecraft and launch vehicle, etc 14 p2230 A66-28017  
 Experimental psychological testing and role in choice and training of cosmonauts 15 p2434 A66-29442  
 Entropy concept of information theory applied to space flight physiological data analysis 15 p2444 A66-29461  
 Electroencephalograms, cutaneous galvanic reactions and electrooculograms of Nikolaev, Popovich, Bykovskii and Tereshkova as recorded during space flight 15 p2436 A66-29463  
 Biological and medical tests during training and flight of Russian

astronauts 15 p2436 A66-29464  
Physiological reactions of Russian astronauts under prolonged weightlessness, noting motor activity, heart and pulse beat, breathing rates, arterial pressure, etc 15 p2436 A66-29467  
Soviet book on physiological methods in astronautics including collection, transmission and procession of medical information from long space flights 15 p2445 A66-29734  
Lowering of psychic tone, absentmindedness and vigilance decline during astronaut weightlessness on long space flights 15 p2442 A66-30003  
Simulated lunar landing maneuver of Apollo spacecraft, determining pilot control problems and handling 16 p2743 A66-30886  
Simulation testing pilot performance in orbiting Gemini spacecraft based on tracking rate errors and fuel consumption 17 p2872 A66-31963  
Psychiatric evaluation of candidates for space mission, developing rank order of candidates and stressing empathic approach of psychiatrist 17 p2862 A66-31982  
Visual requirements of space missions, discussing navigation, rendezvous and docking, lunar landing and lunar exploration 17 p2862 A66-32136  
Simulated orbital flights with extravehicular activities, determining incidence and severity of flyers bends due to decompression and exercise 17 p2856 A66-32148  
Factors affecting determination of selenographic latitude and longitude by astronaut landed on Moon, defining selenocentric system and lunar prime meridian 17 p3001 A66-32344  
Physiological reactions of astronauts to acceleration of Voskhod spacecraft characterized by greater emotional stress than during centrifuge simulation 17 p2861 A66-32936  
Flight activities of Russian cosmonauts in assessment of medical preparedness for orbital flight 19 p3283 A66-35291  
Weightlessness effects on man with data from Voskhod flights 19 p3284 A66-35568  
Human performance in space simulation chambers and physiological limitations 19 p3288 A66-35838  
Space tool kit development and evaluation program, examining design requirements for in-orbit and lunar surface repair and assembly tasks 19 p3363 A66-35948  
Controller, employing voice recognition principle, for attitude control system of astronaut maneuvering unit in various space tasks 19 p3291 A66-35973  
Man/machine problems in performance of space maintenance, noting conditions for shirtsleeve and pressurized suit, glove-tool interface, etc 19 p3292 A66-35974  
Heart rate response to Valsalva maneuver performed regularly during space flight suggests application to development of astronaut orthostatic intolerance 19 p3286 A66-36376  
Vestibular tolerance differences among members of crew of Voskhod to 24-hour stay in zero-weight environment 19 p3286 A66-36377  
Physical and psychological aspects of man in space, examining oxygen supply, temperature extremes, meteorites, radiation and effects of confinement, isolation and sensory impoverishment 19 p3287 A66-36645  
Extravehicular activity during Voskhod II flight, discussing motion and orientation of Soviet cosmonaut in space 21 p3701 A66-39337  
Mars exploration by astronauts, considering Mariner IV observations, noting low pressure and temperature, existence of frozen hydrosphere, etc 22 p3976 A66-39775  
Storage, dumping and regeneration techniques in air, water and food needed to keep astronauts alive 22 p3857 A66-40022  
Life support systems for crew comfort and safety, considering thermal and radiation environmental control, carbon dioxide removal, cryogenic gas storage, etc 22 p3857 A66-40129  
Astronaut observation in Gemini and Mercury space flights that stars cannot be

seen in daytime, noting first-magnitude stars and background illumination 22 p3982 A66-40523  
Preflight consideration of astronaut performance testing program for Gemini XI flight, noting manual operations and devices used 24 p4168 A66-42742  
Psychological effects of velocity and hermetic compartments on astronaut performance 24 p4166 A66-43146  
**ASTRONAUT TRAINING**  
**SA PILOT TRAINING**  
Program for engineering development of integrated spacecraft environmental control and life support systems and solution of man-machine integration problems [SAE PAPER 650813] 01 p0021 A66-10820  
Integrated operating mode of Apollo mission simulator with mission control center for combined training of Apollo flight and ground crews [AIAA PAPER 65-266] 03 p0353 A66-12777  
Apollo spacecrew training from simulation and actual past space flights [ASME PAPER 65-WA/HUF-17] 05 p0628 A66-15695  
Two-man space station simulator for 15-day integrated test program, primarily to study maintenance of operational mission element 06 p0868 A66-16242  
Psychophysical orientation mechanisms of man under weightlessness simulation, gravity conditions encountered on Earth, in orbital flight and during free floating in space 06 p0814 A66-17177  
System costs and pharmacological techniques as function of exercise program designed to maintain space crew physical fitness 07 p0999 A66-17658  
Astronaut selection and crew preparation procedures for Gemini and Apollo programs 08 p1176 A66-18578  
Training and selection procedures used at USAF Aerospace Research Pilot School 08 p1176 A66-18579  
Medical tests of spacemen Beliaev and Lenov during training and orbital flight 15 p2442 A66-28502  
Spacecraft crew training, noting universal multipurpose, complex and specialized functional training 15 p2443 A66-29440  
Astronaut training based on environmental factors, rated efficiency and physical and mental condition 15 p2443 A66-29441  
Immunological reactions of Russian spacemen before and after space flight 15 p2436 A66-29468  
Visual simulation device for aircraft pilot and astronaut 16 p2643 A66-30952  
Integrated mission simulation technique tests pilot reliability for seven-day manned lunar mission [AIAA PAPER 65-275] 18 p3061 A66-33792  
T-27 Space Flight Simulator, for extravehicular activity training, utilizing closed-circuit TV system 19 p3291 A66-35966  
First half of Gemini program noting design, prelaunch operations, astronaut training, EVA, etc 19 p3469 A66-35977  
Rescue teams for manned testing in environmental chamber for Gemini spacecraft noting personnel, chamber and personal equipment, test operations and rescue function and drill 22 p3857 A66-40240  
Engineering psychology of man-machine interface and relation to spacecraft piloting and systems control 24 p4169 A66-43147  
Professional training of Soviet astronauts, instilling high resistance to weightlessness, isolation, radiation, acceleration and other space flight stimuli 24 p4169 A66-43148

 Astronomical satellite application to sky mapping, stellar photometry, interstellar grains and gas study and statistical stellar sampling 15 p2594 A66-28987
- ## ASTRONOMICAL MODEL
- Magnetohydrostatic models of long-duration sunspot of depth 1000 km 06 p0954 A66-16466  
 Observed line spectra of nine quasi-stellar radio sources representation for single temperature, electron density and ionization level 09 p1456 A66-20416  
 Evolution of 9 solar masses stellar model of population I initial composition from main sequence through core helium burning 11 p1773 A66-22781  
 Model of oscillating cosmos which rejuvenates during contraction 14 p2378 A66-27021  
 Cosmological models for studying infinite universe 14 p2379 A66-27225  
 Principle of matter inexhaustibility applied to construction of finite and infinite cosmological models 14 p2379 A66-27227  
 Soft X-ray spectrum of Sun analyzed, using isothermal model of quiet corona providing representation of line intensities of C and Mg ions 17 p2994 A66-32657  
 Physicochemical quantitative analysis of cometary nucleus-coma buildup relationship, discussing gas liberation, entropy and enthalpy variation, change of state and gross energy balance 17 p3010 A66-33374  
 Grid computations of model atmospheres for A-type stars, considering effects of Balmer-line blanketing 18 p3227 A66-33762  
 Solar wind models analyzed, taking into account solar ejected high-velocity gas jets and southward component of interplanetary magnetic field 18 p3167 A66-34339  
 Galactic model for studying hydromagnetic stability of spiral arm in which field lines are helices around axis 18 p3237 A66-35043  
 Astronomical model for diffusion of galactic cosmic rays in solar system, based on zonal character of solar activity 20 p3630 A66-37329  
 Meteorite size prior to entering atmosphere, noting radius and use of isotope activity 21 p3812 A66-38953  
 General relativity theory, examining Schwarzschild surface which allows matter and light to pass through in one direction only 21 p3774 A66-39532  
 Solar rotation rate determined from longitudinal motion of sunspots, noting parameters of observation 21 p3816 A66-39555  
 Simulator for star motion in proximity of Sun consisting of sphere upon whose surface stars are uniformly distributed 22 p3977 A66-40001  
 Electromagnetic field of concentric rotating mass shells, noting Machian effects on cosmological models with near-Schwarzschild radius 22 p3948 A66-40525  
 Theoretical model for high energy phase of solar flares including radio bursts, proton acceleration and plasma cloud ejection 22 p3973 A66-40535  
 Theoretical model for quasars characterizes them as galactic flares, based on study of high energy phenomena associated with solar flares 22 p3982 A66-40536  
 Result of testing cosmological models with red shift magnitude observations of cluster galaxies and quasi-stellar radio sources 23 p4125 A66-41066
- ## ASTRONOMICAL OBSERVATORY
- ### SA CELESTIAL OBSERVATION
- ### SA OAO
- ### SA SOLAR OBSERVATORY
- Equal altitude method for calculating deviations of vertical, geographical coordinates and time correction for radio time signal from astronomical measurements 01 p0063 A66-11099  
 Steerable radio telescopes noting Mark I radio telescope at Jodrell Bank, England 01 p0139 A66-11156  
 Photographic, photometric and polarimetric observation of Mars from 1954 to 1958 at Pic du Midi noting seasonal variation of surface markings, clouds, diameter, etc 02 p0286 A66-11355  
 Catalog of radio telescope sky survey covering declination range between plus 40 and plus 44 degrees 05 p0759 A66-14806  
 Night airglow intensity measured at Kerguelen Islands in 1963, rejecting observations contaminated by auroral light 05 p0672 A66-15039  
 Experimental astronomical dome of glass-fiber-reinforced plastic distinguished by lightness, stability, smooth and silent operation and ease of assembly 05 p0660 A66-15219  
 Effect of lateral refraction and thermal conditions near Pavlov passage instrument on azimuthal position values and time measurement results 05 p0766 A66-15424  
 Radio astronomy observatory at Nancay, reviewing principles of electromagnetic radiation in Hertzian range 06 p0869 A66-16936  
 Antenna array and radiometer selection for orbiting LF radio astronomical observatory 10 p1507 A66-21122  
 Astronomical research possibilities, using manned Earth orbital spacecraft 10 p1608 A66-21531  
 Solar chromosphere observations in 1960-1963 by Istanbul University, noting flares, filaments, observation duration, etc 10 p1609 A66-21833  
 Astronomical yearbook of Cracow Observatory covering ephemerides of 787 eclipsing binaries, Lagrangian points, precession coefficients, etc 11 p1768 A66-22333  
 Annual astronomical almanac compiled by Madrid Observatory 11 p1770 A66-22638  
 Astronomical instruments and observation procedures for soft X-rays and extreme UV radiation 12 p1880 A66-23944  
 Manned orbiting astronomical observatories would enable astronomer astronauts to erect large sensors in space and avoid atmospheric effects 13 p2192 A66-25689  
 German and Austrian astronomical observatories reports on personnel, equipment, projects and publications 13 p2189 A66-26736  
 Lunar astronomical research, establishment of lunar observatory and mathematical model for analysis of logistics implications 14 p2390 A66-28410  
 Swiss space research program, apparatus and experiments 15 p2600 A66-29904  
 National report on space research in Sweden 15 p2601 A66-29933  
 Tabular data on magnetic storms and on geomagnetic and solar data furnished by Swiss Federal Observatory 16 p2801 A66-30726  
 Collected reports on new development of telescopic, photometric, spectrometric, meteorological, interferometric and detection equipment at various solar and stellar observatories 17 p2923 A66-32020  
 Lunar photography with 74-inch reflector of Helwan Observatory, detailing original negatives 17 p3006 A66-33018  
 Meteorological observations of Earth from lunar surface 19 p3455 A66-35286  
 Space systems for astronomical observations including OAO, rocket and balloon programs and manned space observatories 19 p3466 A66-36648  
 Solar physics, Communications of Shemakha Astrophysical Observatory 22 p3984 A66-40849
- ## ASTRONOMICAL PHOTOGRAPHY
- ### SA ELECTRONIC PHOTOGRAPHY
- ### SA HELIOGRAPHY
- ### SA LUNAR PHOTOGRAPHY
- ### SA SATELLITE PHOTOGRAPHY
- ### SA SPACE PHOTOGRAPHY
- Image translation from plate into coordinate system on another plate using homographic coordinates of object applied to astrometry 01 p0135 A66-10276  
 Reduction of photographic positions for arbitrary optical center 03 p0370 A66-12923
- Time-referencing of moment of photographing to determine satellite coordinates with aid of reference stars 04 p0524 A66-14394  
 Meteor photography by instantaneous exposure technique, effective tool for studying shape, dimensions and brightness distribution 05 p0759 A66-14884  
 Optical systems with improved aperture ratios, noting concentric optical system with corrected chromatic aberrations for photographing meteors, satellites, auroras, etc 05 p0679 A66-15203  
 Improved photographic images of meteors, using method of instantaneous exposure 05 p0681 A66-15218  
 Jupiter in 1964/65 photographic observation 11 p1771 A66-22648  
 Hybrid narrow band filter compared with Lyot filter, noting long-term instability and need for temperature control 11 p1706 A66-22892  
 Error analysis for statescope or radar altimeter phototriangulation readings and radio geodetic coordinate photography phototriangulation 12 p1867 A66-23517  
 Positions of asteroids 1221 /Amor/ and 1948 OA /Object Wirtanen/ from photographs taken at Tautenburg, East Germany 12 p1950 A66-24399  
 Comet Tomita-Gerber-Honda, noting direct photored photograph, spectrum of head and spectrum of tail 13 p2182 A66-25577  
 Reduction of photographic positions for arbitrary optical center 14 p2291 A66-27272  
 Flare initiated filament oscillations, noting photographic measurement of oscillation frequencies 15 p2573 A66-28646  
 Photographs from observatories of comet Ikeya-Seki discovered in constellation Hydra 16 p2804 A66-31309  
 Photographic atlas of Moon, particularly Ranger VII transmissions and Pic-du-Midi ground observation, with discussion of lunar physical and dynamic properties 16 p2807 A66-31747  
 Solar magnetic field measurements noting magnetic flux, development of bipolar magnetic region, etc 17 p2996 A66-31918  
 Solar corona emission spectrum and narrow passband photography of solar disk, noting measurement of intensity variation and absorption coefficient 17 p2999 A66-32133  
 Geocentric velocity of Leonids measured via meteor radar equipment 17 p3000 A66-32339  
 Earth shadow enlargement during lunar eclipse, noting contacts of lunar formations with shadow 17 p3000 A66-32341  
 Photographic observations of minor planets at Sydney during 1964 17 p3003 A66-32822  
 Data from ground photography of Mars covering portions of Mariner IV path, noting position of oases and canals 17 p3005 A66-33008  
 Rapid drift in longitude of small dark spot on south edge of Jupiter North Temperate Belt, noting sinusoidal displacement characteristics and measurement with blue and UV photography 17 p3005 A66-33009  
 Telescopic and photographic observation of cometary structure, particularly coma region 17 p3010 A66-33377  
 Comet Moorhouse III photographic analysis, noting tail motion, composition, angular motion of rays, etc 17 p3012 A66-33395  
 Astronomical photography of solar disk, revealing facula at 2190 angstroms and producing limb darkening curves 18 p3236 A66-34899  
 Thermal history, chemical composition and interior of Moon evaluated from Ranger VII, VIII and IX and terrestrial photographs 19 p3456 A66-35438  
 Lunar and Planetary Laboratory of University of Arizona, summarizing conclusions concerning lunar surface 19 p3457 A66-35440  
 Brightness of white corona in vicinity of solar prominences determined by trichromatic selection from color pictures of Sun during eclipse 19 p3454 A66-36610  
 Lunar profiles determined from photographs of annular solar eclipses of 1962 and 1963 20 p3655 A66-38021  
 Error analysis for statescope or radar altimeter phototriangulation readings and radio geodetic coordinate photography

phototriangulation 21 p3732 A66-38661  
Photographic data on iron meteor 36221  
noting trajectory, velocity, light curve, orbit  
and spectral emission 22 p3977 A66-39860  
intensities  
Retrograde rotation of cloud formations of  
Venus with angular velocity corresponding  
to one rotation in four days analyzed by  
high resolution 23 p4128 A66-41181  
photography

# ASTRONOMICAL PHOTOMETRY

Optical thickness, phase variation and  
albedo of rings A and B of  
Saturn 05 p0758 A66-14804  
Coarse-wire objective grating method  
applied to determination of coma-magnitude  
scale distortion and magnitude errors in  
long-focus refracting  
telescope 05 p0678 A66-15090  
Iris microphotometer on MF-2  
base 05 p0681 A66-15215  
20-inch mirror telescope with photoelectric  
astrophotometer for photometric,  
colorimetric and polarimetric  
measurements 05 p0683 A66-15419  
Photocathode scanned storage tube for  
detection of faint optical  
images 06 p0883 A66-17016  
Secular variations in absolute brightness of  
periodic comets attributed to instrumental  
and geometrical effects 07 p1133 A66-17519  
Isophotometric representation of solar  
corona, using photographs of equal  
density 07 p1136 A66-17735  
Separation problems of gas and aerosol  
components in brightness of atmospheric  
layer for photometric data pertaining to  
Mars atmosphere 08 p1295 A66-19330  
Difference between values for atmospheric  
pressure at Martian surface when obtained  
by photometry or by spectroscopy, due to  
nonconsideration of light scattering by  
aerosol particles 08 p1295 A66-19331  
Photometric examination of brightness  
distribution along disk of  
Mars 08 p1295 A66-19332  
Spectral reflecting power curve for  
Martian disk center compared with  
terrestrial equivalent 08 p1295 A66-19333  
MF-4 microphotometer modifications  
eliminating dependence of readings on  
brightness fluctuations of illuminating lamp  
and permitting negative processing in terms  
of intensity 08 p1224 A66-19336  
Optical parameters of Mars atmosphere and  
surface from photometric data for spherical  
and elongated scattering  
indicatrices 08 p1295 A66-19337  
Absolute calibration of Arizona  
Photometry 09 p1402 A66-20293  
UV color and flux at 2200 and 2600  
angstroms measured for A and B stars,  
using rocketborne  
photometers 10 p1602 A66-21096  
Zodiacal light and atmospheric continuum  
examined via new photoelectric 30-cm  
telescope 10 p1526 A66-21125  
Millimeter wavelength brightness  
temperatures of Mars, Jupiter and Saturn  
calculated from antenna  
temperatures 11 p1769 A66-22532  
Photoelectric observations and orbital  
solutions of BV 267, obtaining new light  
elements, system light change and orbital  
solutions 11 p1769 A66-22533  
Koval method for correcting distortions in  
photometric cross sections for Martian disk  
brightness distribution 12 p1944 A66-23502  
Image converter tube spectrophotometry of  
zonal variation of methane absorption bands  
on Jovian disk in near IR  
region 12 p1944 A66-23504  
Design parameters of astronomical camera  
for lunar charting 12 p1876 A66-23644  
Evidence that Martian maria corresponds  
to elevated land areas, citing radiometric  
measurement results 13 p2189 A66-26601  
Spectrophotometric measurements of ring  
nebula NGC 7662 in  
Andromeda 14 p2386 A66-28121  
Temperature and radii of nova  
photospheres 16 p2800 A66-30640  
Photometric measurements of solar flares  
and prominences for central intensities in  
hydrogen alpha 16 p2804 A66-31397  
Lunar topography and cartography, noting  
application to lunar atlas preparation,  
absence of magnetic field,

etc 17 p2999 A66-32132  
Photoelectric photometry of comet  
Everhart 1964 h, noting density of carbon  
radicals and CN 17 p3000 A66-32338  
molecules  
Photometry of nuclear condensation used  
to determine dimensions of cometary  
nuclei 17 p3009 A66-33369  
Resolution spectra and photometric  
profiles of comet heads in monochromatic  
light and physical state and chemical  
composition of comets 17 p3011 A66-33383  
Equidensitometric photographic  
isophotometry of comets and other luminous  
objects 17 p3011 A66-33385  
Integrated brightness observations of  
comets, using Baker-Nunn satellite tracking  
camera 17 p3011 A66-33386  
Cometary trail classification using  
Bredikhin method, noting  
spectrophotometric data on meteoritic  
microstructure 17 p3012 A66-33393  
Comet Humason photographic analysis  
noting tail movement, curvature and  
emanation of lateral jets 17 p3012 A66-33398  
Polarization and visible and IR reflectivity  
studies of Mars indicate that hematite is  
stable form on Martian  
surface 18 p3228 A66-34016  
Geometric albedos and phase integral of  
planet Mercury compared with  
Moon 18 p3230 A66-34153  
Thermal contrast of satellite eclipse  
shadows and band structure during 1965  
apparition of Jupiter 18 p3230 A66-34156  
Photoelectron counter stellar photometer  
noting design, applicability of secondary  
electron multipliers, etc 18 p3113 A66-34617  
Lunar photometric brightness variational  
function based on JPL study of Moon  
topology 18 p3235 A66-34656  
Optical photometric properties of lunar  
surface, discussing brightness effects, solar  
wind, albedo, reflectivity, backscatter,  
chemical composition, ion bombardment  
effects, etc 19 p3457 A66-35444  
Mass and diameter of planet Pluto  
determined by gravitational effects on orbits  
of Neptune and Uranus and photometric  
detection of occultations 19 p3463 A66-35945  
Koval method for correcting distortions in  
photometric cross sections for Martian disk  
brightness distribution 20 p3646 A66-37015  
Image converter tube spectrophotometry of  
zonal variation of methane absorption bands  
on Jovian disk in near IR  
region 20 p3646 A66-37017  
Digital video system for measuring  
broadband spectral intensity of stars and  
coordinates onboard OAO 20 p3557 A66-37202  
Pinhole photometric observation of umbra  
intensity profiles of large  
sunspot 21 p3808 A66-38469  
Multicolor photometric work on bright  
stars by Lunar and Planetary  
Laboratory 21 p3811 A66-38523  
IR astronomical measurements for  
computation of bolometric corrections and  
effective temperatures of stars of various  
spectral types 21 p3815 A66-39486  
IR photometric measurement of Comet  
1965f, noting absolute intensity dependence  
on distance from Sun, tail intensities and  
nature of particle  
emissions 21 p3816 A66-39557  
Primary nucleus splitting in comet Ikeya-  
Seki, noting mechanics and velocity of  
splitting process 22 p3977 A66-39861  
Photographic photometry of comet Ikeya-  
Seki using telescope in red region of  
spectrum, obtaining stellar  
magnitude 22 p3977 A66-39862  
Martian surface markings, brightness along  
optical equator, crater erosion, asteroid  
collision and yellow dust  
clouds 22 p3981 A66-40520  
Comparison of faint and bright solar  
prominences, analyzing hydrogen and  
metallic spectra of three bright and four  
faint prominences 23 p4126 A66-41074  
Liquid filter cell for telescopes, using half-  
saturated solution of cupric sulfate to block  
red leak of UG filter  
glass 23 p4071 A66-41927

# ASTRONOMICAL SPECTRUM

Spectral data of Galilean satellites of  
Jupiter 03 p0427 A66-12919  
Enhanced intensity of forbidden lines of

neutral oxygen in 28 planetary nebulae  
spectra linked to lower ionization  
levels 05 p0759 A66-14877  
Fabry-Perot fine etalon in astronomical us,  
such as H-alpha emission line profile  
measurement 05 p0681 A66-1521  
Detection of 3.1 micron mu cephei  
absorption band due to interstellar ic  
particles 05 p0768 A66-15777  
Comet spectrum analysis and variation  
with distance of comet from  
Sun 06 p0952 A66-15944  
Three Sun-mass star evolution from main  
sequence to helium exhaustion in core  
noting chronology of  
process 08 p1288 A66-18777  
Spectrographic analysis of Ikeya-Seki  
comet 08 p1289 A66-18799  
Indicatometric measurement of Martia  
surface composition, noting loamy an  
dustlike limonites, terra rossa and  
ferruginized soils 08 p1295 A66-19333  
Spectra of lunar occultations of emissio  
source 3C 273 08 p1297 A66-19444  
Variations in optical spectrum of quasi  
stellar radio source 3C  
345 09 p1456 A66-20414  
Earth, balloon and satellite spectroscopy  
observations of Mars to determine  
atmospheric composition and pressure a  
surface level 10 p1602 A66-21066  
Rocket and satellite observations of L  
radio waves from extragalactic  
sources 10 p1603 A66-21111  
Photoelectric observations and orbital  
solutions of BV 342, obtaining light elemen  
and light curve data 11 p1769 A66-22533  
Lunar spectral reflectivity distributio  
determined by comparison of lunar spectra  
with solar spectrum and spectra of earl  
star classes 12 p1945 A66-23504  
Hydrogen and helium spectra of gaseous  
nebulae in theory and  
observation 13 p2183 A66-25611  
IR reflection spectrum of Jupiter from  
second flight of Stratoscope II, discussin  
deep absorption features 13 p2184 A66-25611  
Empirical curve of growth on S/I line o  
1-0 hydrogen quadrupole band obtained  
laboratory and planetary hydrogen  
quadrupole spectra corrected for  
saturation 13 p2184 A66-25624  
Spectral data of Galilean satellites o  
Jupiter 14 p2380 A66-27266  
Absorption lines of quasi-stellar object 3C  
191 14 p2387 A66-28132  
Daylight observations of 1965 f comet,  
noting influence on solar corona, spectra a  
various wavelengths, polarization data an  
results of photoelectric  
scans 15 p2592 A66-28644  
Solar eclipse coronal isotopes, noting  
spectrum in region of maximum visual  
sensitivity, eulipticity figures, Luderndorff  
coefficient, luminosity gradients,  
etc 15 p2593 A66-28867  
High resolution power spectrum o  
international magnetic character, showing  
two subsidiary peaks on both sides of 27-day  
period 16 p2695 A66-30711  
Aircraft instrumentation for spectroscopic  
observation of solar middle corona a  
medium dispersion on May 30,  
1965 16 p2705 A66-30826  
Solar class 2 flares, noting activity on  
September 16, 1963, associated ionospheric  
disturbances, etc 16 p2795 A66-31149  
Quasi-stellar object origin noting spectrum,  
intensity distance, etc 17 p2995 A66-31910  
Spatial cross-correlation analyses between  
radial velocity and continuum brightness  
fluctuations of solar disk center  
spectrograms 17 p2996 A66-31919  
Mars disk intensity, noting  
spectrophotometric measurements in search  
for limonite near IR spectral  
features 17 p2997 A66-31922  
Cosmic radio source strength, explaining  
spectral output from substructures o  
3C-273 17 p3007 A66-33084  
Rotational line intensities of lambda 4300  
band of CH in spectrum of comet  
Ikeya 17 p3010 A66-33379  
Continuous spectrum of comet Alcock  
/1963 b/ observed with quartz spectrograph  
at Haute-Provence observatory in  
France 17 p3011 A66-33386  
Cometary trail classification using

- Bredikhin method, noting  
spectrophotometric data on meteoritic  
microstructure 17 p3012 A66-33393
- Laboratory work on comets, discussing  
spectroscopic data, incompleteness of  
knowledge of dissociation energies and  
ionization potentials, etc 17 p3012 A66-33400
- Cometary and hydrocarbon flame spectra  
compared, discussing Swan, HCO and other  
band systems 17 p3013 A66-33404
- Physical characteristics of ten periodic  
comets compared, considering continuum,  
triatomic carbon radical and other emissions  
intensity tail and photometric  
parameters 17 p3014 A66-33412
- Nonsolar absorption lines in spectra of  
inner three Galilean satellites of  
Jupiter 18 p3230 A66-34155
- Spectra of lunar occultations of emission  
source 3C 273 18 p3232 A66-34478
- Quasi-stellar radio source characteristics,  
noting methods of identification, emission of  
high energy particle flux,  
etc 18 p3176 A66-34751
- Catalog of neutral H-line profiles at 21 cm  
wavelength noting intensity, radial velocity,  
line widths, etc 19 p3460 A66-35792
- Stellar evolution of stars between 1 and 3  
solar masses, noting nuclear reactions and  
chemical composition 19 p3467 A66-36792
- Lunar spectral reflectivity distribution  
determined by comparison of lunar spectra  
with solar spectrum and spectra of early  
star classes 20 p3646 A66-37019
- Spectral study of Jupiter, Saturn and rings  
of Saturn, determining methane  
concentration in cloud  
layers 20 p3647 A66-37035
- Interferometric observation of cosmic  
emission at OH frequency, noting emission  
source dimensions 21 p3814 A66-39268
- High resolution spectroscopic study of  
comets, examining mechanism involved in  
excitation of cometary  
spectra 21 p3816 A66-39533
- Abundance and temperature of carbon  
dioxide in Martian atmosphere, noting  
implications, observation methods and  
results 21 p3816 A66-39558
- New absorption bands in near IR spectrum  
of Mars found by Fourier spectroscopy via  
carbon dioxide absorption  
measurements 22 p3981 A66-40486
- Forms of red shift magnitude relation for  
Friedmann type relativistic model  
universes 23 p4125 A66-41046
- Absorption lines on Venus spectrograms of  
rotational fine structure of excited  
vibrational transition of carbon  
dioxide 23 p4130 A66-41816
- 3 cm hydrogen line from solar flares,  
estimating line-to-continuum ratio during  
flare 23 p4124 A66-41928
- Planetary atmosphere resolution spectrum  
noting carbon dioxide lines, radiation  
transfer, composition, temperatures,  
pressures, etc 24 p4277 A66-42667
- Venus atmosphere noting pressure induced  
absorption in carbon dioxide-nitrogen  
atmosphere as indicated in decline of  
microwave brightness  
temperature 24 p4277 A66-42668
- Maser amplifier based on UV continuum  
pumping from nearby stars, explaining 18-cm  
OH emission from anomalous H-2  
regions 24 p4280 A66-43042
- ASTRONOMICAL TELESCOPE**

 Annual review of astronomy and astrophysics, Volume 4, covering measurements in IR, polarization of cosmic radio waves, pulsation theory, etc 21 p3815 A66-39482

## ASTROPHYSICS

- Collected works of K. E. Tsiolkovskii on astronomy, natural science and technology 01 p0135 A66-10295  
 Dimensions, form and structure of entire known universe, examining discontinuous emission of energy from stars as they cool 01 p0135 A66-10299  
 Theoretical and experimental studies in astronomy and astrophysics, relating them to physical and mathematical sciences 02 p0285 A66-11296  
 Space physics - Proceedings of Summer School, Alpbach, Austria, July-August 1963 03 p0419 A66-12839  
 Textbook on celestial mechanics, meridian astronomy, instrumentation, solar research and astrophysics 05 p0760 A66-15087  
 Fundamental problems in cosmic radiation astrophysics 05 p0752 A66-15379  
 Cosmic rays and problems in space physics - Conference, Yakutsk, U.S.S.R., August 1962 06 p0945 A66-16568  
 Stellar neutrino emission mechanism and neutrino-electron scattering 06 p0946 A66-16570  
 Interferometric techniques in visual and radio regions for astrophysics 07 p1035 A66-18151  
 Text on sources of stellar energy, internal structure of stars and evolution of stars 09 p1447 A66-20090  
 Milky Way composition and light radiation characteristics, outlining definitions, basic relations, star categories, color diagrams, etc 09 p1454 A66-20288  
 Data on stars having space velocity greater than 65 km/sec 11 p1767 A66-22261  
 Stellar dynamics of Galactic system, discussing relations between density and velocity distributions of stars 11 p1767 A66-22262  
 Chinese-English/English-Chinese astronomical and astrophysical dictionary 12 p1949 A66-24200  
 Relativistic astrophysics covering evolution of moderate to supermassive stars, radiation and gravitational field and stellar collapse 14 p2385 A66-27948  
 Dynamic stability of supermassive stars with nuclear-energy generation, noting rotation and limiting mass for hydrogen burning 14 p2385 A66-28117  
 Temperature and radii of nova photospheres 16 p2800 A66-30640  
 Review of literature on planets, natural satellites, Moon and origin of solar system 17 p2998 A66-32023  
 Space astronomy discussing history, solar XUV, galactic UV, galactic X-rays and gamma rays, visible and IR observations, laboratory astrophysics, etc 17 p3002 A66-32549  
 Nature and origin of comets - International Colloquium on Astrophysics, Liege, Belgium, July 1965 17 p3008 A66-33367  
 Cometary origin through survey of literature for last 13 years 17 p3013 A66-33405  
 Upper limit on fractional binding energy of nonrotating magnetoturbulent supermassive star and for mass which can reach radiative equilibrium 18 p3229 A66-34141  
 Semiconvective zone in very massive stars

- during hydrogen burning, noting factors leading to instability 18 p3229 A66-34142  
 Stellar formation rate in young clusters according to simultaneous formation hypothesis and continuous formation hypothesis 18 p3229 A66-34143  
 Stellar evolution - International Conference, Goddard Institute for Space Studies, New York, November 1963 19 p3466 A66-36788  
 Interferometric techniques in visual and radio regions for astrophysics 21 p3735 A66-38508  
 Papers on astronomy and astrophysics including objective prisms, lunar gravity, relativistic degenerate gas, solar system, etc 21 p3812 A66-38820  
 Annual review of astronomy and astrophysics, Volume 4, covering measurements in IR, polarization of cosmic radio waves, pulsation theory, etc 21 p3815 A66-39482  
 Soviet papers on problems of astrophysics 23 p4125 A66-41072

## ASYMPTOTIC FUNCTION

- Matched asymptotic expansion to derive dynamical displacements of infinite elastic space embedded with light rigid axisymmetric body 02 p0299 A66-11806  
 Laplace transform technique to develop asymptotic solutions to integral equations describing influence of scattering law on radiation damage displacement cascade 02 p0245 A66-11946  
 Asymptotic solution of some nonstationary boundary value problems of cylindrical surface 02 p0250 A66-12098  
 Global asymptotic stability problem for complex high order system solved by transformation into interconnected set of lower subsystems 05 p0654 A66-14608  
 Asymptotic theory of photoionization chamber noting charged particle densities, sheath equations and quasi-neutral plasma 05 p0721 A66-14717  
 Asymptotic behavior of solutions of boundary value problem for second-order elliptic equations 07 p1056 A66-17602  
 Richardson critical number and asymptotic equation applied to stably stratified ground atmospheric layer 07 p1062 A66-17924  
 Prandtl lifting line classical theory of high aspect ratio wings as singular perturbation problem yields asymptotic expansions of Navier-Stokes solution 07 p0982 A66-18124  
 Conservation laws involving mass, momentum and energy applied to asymptotic properties of hypersonic flow 09 p1327 A66-20266  
 Construction method for asymptotic series of given class of functions and application to diffraction theory 09 p1394 A66-20459  
 Asymptotic behavior of probability distributions and density functions of processes with independent increments 09 p1397 A66-20645  
 Asymptotic representation of maximum of normal stationary process over large time interval 09 p1397 A66-20647  
 Asymptotic behavior, at plus infinity, of first order linear differential-difference-delay equation solutions, discussing asymptotic oscillatory number 10 p1549 A66-21224  
 Unilateral estimates under conditions of asymptotic stability of solutions to differential equations with unbounded operators 10 p1552 A66-21985  
 Approximate solutions of second order differential equations for nonlinear electronic circuits with strong disturbance 11 p1676 A66-22735  
 Asymptotic expansions to heat-transfer rate for laminar boundary layer flow at small or large Prandtl number 11 p1786 A66-23012  
 Approximate oscillatory solution of second order linear equations, with application to Bessel equation 11 p1724 A66-23425  
 Blast wave theory with and without entropy layer effect, determining asymptotic flow, far downstream of blunted nose, past given body 12 p1861 A66-23808  
 Richardson critical number and asymptotic equation applied to stably stratified ground atmospheric layer 12 p1905 A66-23885  
 Sufficient conditions for boundedness of

- solutions of nonlinear differential equations and oscillatory and asymptotically stable solutions 12 p1904 A66-24193  
 Asymptotic behavior of two-dimensional inviscid flow at infinite Mach number past power-law body, considering flow over flat plate and blunt body followed by cylindrical afterbody 13 p2060 A66-25156  
 Species diffusion in frozen hypersonic boundary layer with Falkner-Skan velocity profiles, where surface is linear, given as Meili transform, constructing series and asymptotic expansion of surface concentration 13 p2060 A66-25156  
 Existence and stability of periodic motions in dynamic systems applied to analysis of uniformly asymptotically stable solutions of differential equations 15 p2525 A66-28508  
 Stability analysis of symmetrically loaded thin walled spherical shell, noting construction of asymptotic expansion, error estimation and application of elasticity theory 15 p2608 A66-28952  
 Asymptotic behavior of solution to ordinary differential equation, noting transformation to nearly diagonal system of first order 16 p2733 A66-30741  
 Asymptotic behavior of nonlinear integral equations with certain conditions on kernels and nonlinearities 16 p2738 A66-31703  
 Asymptotic efficiency for maximum likelihood estimator 17 p2946 A66-32298  
 Discreteness conditions for spectrum of one-term differential operator, considering asymptotic distribution of eigenvalues 18 p3126 A66-33933  
 Asymptotic behavior of transition probability matrices, analyzing limit theorems involving capacities in Markov chains 19 p3389 A66-35984  
 Unilateral estimates under conditions of asymptotic stability of solutions to differential equations with unbounded operators 19 p3390 A66-36190  
 Interpretation of results obtained by Liapunov method, using parallelepiped imbedded in region of asymptotic stability 19 p3337 A66-36712  
 Flight stability, discussing quasi-critical case in neighborhood of asymptotic stability boundary of autonomous systems and that of variable system parameters 21 p3696 A66-39594  
 Energy spectral density of ideal sonic boom pressure signatures and equations for HF and LF asymptotic spectral behavior 22 p3848 A66-40307  
 Approximate solutions of second-order differential equations for nonlinear electronic circuits with strong disturbance 23 p4049 A66-41477  
 Transcendental case of dynamical asymptotic stability of motion of autonomous system with one zero 23 p4090 A66-41551
- ASYMPTOTIC METHOD**  
 Asymptotic behavior of solution to system of differential equations with random limited coefficients 01 p0095 A66-10733  
 Cauchy problem for linearized Boltzmann equation in kinetic theory of gases 01 p0107 A66-11017  
 Spectral matrix of fourth-order differential operator on half-axis 02 p0250 A66-12107  
 Text on aerodynamics of wings and bodies emphasizing matched asymptotic expansion methods for boundary value problems and numerical techniques for loading predictions via computers 03 p0313 A66-12297  
 Existence of stable periodic solution of Liénard equation, using asymptotic methods 03 p0392 A66-12615  
 Asymptotic solution of Dirichlet problem for diffusion processes and small parameters in elliptic equations with discontinuous coefficients 03 p0388 A66-12923  
 Derivation of asymptotic form of Green's function, using hydrodynamic approximation method 04 p0510 A66-13871  
 Asymptotic methods for hydrodynamic stability of slightly nonuniform plasma 05 p0727 A66-15262  
 Book on asymptotic expansions in powers of small parameter applied to nonsteady oscillations in nonlinear systems with one or more degrees of freedom 05 p0776 A66-15322  
 Effective transformation and asymptotic behavior of class of nonlinear differential

- equations 05 p0709 A66-15343
- Asymptotic solutions of second-order ordinary differential equations in region containing irregular singularity of rank one, with application to Whittaker functions 05 p0710 A66-15475
- Asymptotic solutions of second-order differential equations having irregular singularity of arbitrary rank 05 p0710 A66-15476
- Asymptotic error estimates in solving elliptic equations of fourth order by method of finite differences 05 p0710 A66-15477
- Asymptotic solutions for viscous flow of transparent radiating gas in stagnation region, using method of matched inner and outer expansions [AIAA PAPER 66-105] 06 p0871 A66-16254
- Shell linear theory, discussing classical elasticity theory, bending equations, edge effect and asymptotic theory 06 p0962 A66-16350
- Asymptotic solutions of problems in wave propagation, examining electromagnetic field equations, hyperbolic equations, radiation from sources, etc 06 p0835 A66-16900
- Gas flow dissipation in transonic plane-symmetric nozzle, obtaining asymptotic solutions for flow parameter 07 p0979 A66-17264
- Asymptotic behavior of solutions of ordinary linear differential equations involving continuous complex valued functions 07 p1058 A66-17913
- Circulation distribution for swept-back wing of finite span and large aspect ratio in subsonic flow by asymptotic method 07 p0981 A66-18033
- Statistical approach to derivation of quadrature formulas 07 p1061 A66-18510
- Asymptotic formulas derived, describing stress-strain state of circular cylindrical shell subject to concentrated heating 08 p1305 A66-18602
- Asymptotic solution of problem of thin spherical shell free vibration for axisymmetric and general cases 08 p1308 A66-18888
- Dynamics of two-channel automatic control systems taking into account nonlinear interaction between channels 08 p1201 A66-19676
- Saddle point, Watson transformation and residue series in survey of asymptotic methods for HF scattering 10 p1498 A66-21596
- Asymptotic expansions of double and multiple integrals occurring in diffraction theory, using stationary phase method 10 p1550 A66-21850
- Chaplygin asymptotic series solution method for differential equation systems 10 p1551 A66-21915
- Asymptotic method of integral estimation of space-time broadband random vibrations boundary value problem for elastic systems 11 p1781 A66-22616
- Liapunov first method and applicability to asymptotic stability of stationary points of nonlinear differential systems 11 p1721 A66-22641
- Asymptotic solution of rarefied gas flow, using free molecular approximations 11 p1692 A66-22919
- Asymptotic approximations in hydrodynamic stability problems including Couette, spiral and parallel shear flows 12 p1860 A66-23548
- Asymptotic theory where limit  $R$  / Rayleigh number/ approaches infinity 12 p1976 A66-23550
- Stability of two-dimensional parallel flows, using Orr-Sommerfeld equation and adjoint equation with asymptotic solution 12 p1861 A66-23809
- Asymptotic series solution to problem of laminar film condensation on nonisothermal vertical plate, considering inertia and convection effects 12 p1978 A66-23996
- Extended Dirichlet problem for cross section of cylindrical shell, showing asymptotic solution is valid, approximation to Dirichlet integral applied to electrostatic problem of condenser and closed tubes torsion 12 p1968 A66-24196
- Asymptotic solution to motion of solid containing cylindrical or spherical cavities filled with viscous liquid 12 p1863 A66-24356
- Asymptotic solution, valid in physical space, obtained for kinetic layers in slip flow of linearized Couette problem 12 p1865 A66-24589
- Aerodynamic resistance of transonic wing profile analyzed, using asymptotic flow at long distance downstream of shocks 13 p1990 A66-25456
- Free oscillation of thin elastic shell, using asymptotic method for integrating dynamic equations in classical linear theory 13 p2196 A66-25630
- Motion equation for rotation of Mercury solved by asymptotic expansion 13 p2187 A66-26287
- Derivation of asymptotic form of Green function, using hydrodynamic approximation method 14 p2275 A66-27578
- Orthotropic-elasticity solutions applied to wave propagation in infinite cylindrical shell, obtaining asymptotic solutions for HF range 14 p2400 A66-27662
- Asymptotic stability of equilibrium states of nonholonomic systems 14 p2336 A66-28052
- Exact solutions for unsteady two-dimensional gas dynamics equations for self-similar flow behind shocks and expansion waves 14 p2278 A66-28143
- Nonhomogeneous solid sphere radiative cooling asymptotic representation based on heat conduction theory by Laplace transforms 14 p2414 A66-28144
- Statistical thermodynamics analysis of interaction limit problem for real system 14 p2414 A66-28277
- Asymptotic estimates of characteristic values of differential equation with periodic coefficients 15 p2524 A66-28507
- Asymptotic integration of elasticity theory equations and analysis of stressed state of anisotropic shell 15 p2609 A66-28963
- Asymptotic methods of nonlinear mechanics, involving averaging for differential equations, applied to motion equations of satellites and resonance in electric circuits 15 p2541 A66-29162
- Asymptotic solutions of boundary value problems for elastic semiinfinite circular cylindrical shells by removing restriction of slow circumferential variation 15 p2609 A66-29239
- Rational approximation of transcendental functions for cylindrical cavity subject to internal pressure 15 p2528 A66-29254
- Effective transformation and asymptotic behavior of class of nonlinear differential equations 15 p2530 A66-29979
- Asymptotic behavior of solutions to equations for laminar boundary layer far from wall 16 p2684 A66-30582
- Asymptotic behavior of solutions of ordinary linear differential equations involving continuous complex valued functions 16 p2736 A66-30976
- Robbins-Monro stochastic approximation method extended and results applied to least squares method 17 p2946 A66-32296
- Large deflections of symmetrically loaded shallow membrane shells of revolution, considering existence of boundary layer near edges and using asymptotic analysis 17 p3025 A66-32480
- Random delay effect on excitation of vibrations in nonlinear systems, using Krylov-Bogoliubov method 17 p2958 A66-32710
- Asymptotic methods of nonlinear mechanics applicable to nonlinear differential equations with random arguments 17 p2958 A66-32711
- Asymptotic theory of spherical electrostatic probe in collision-dominated partially ionized gas by quasi-linearization 18 p3146 A66-34583
- Asymptotic expression for difference between continuous periodic function and typical mean of Fourier series 18 p3128 A66-35013
- Generalized method of averaging and von Zeipel method as applied to perturbed Hamiltonian system of appropriate form [AIAA PAPER 65-687] 19 p3462 A66-35893
- Derivative-expansion method of first-order asymptotic expansion of takeoff of satellite from circular orbit by small thrust inclined at finite angle to radius vector [AIAA PAPER 65-688] 19 p3462 A66-35894
- Matched asymptotic expansions and patched conics used to simplify flyby interplanetary trajectories [AIAA PAPER 65-689] 19 p3462 A66-35895
- Asymptotic representations of perturbation methods used to solve differential equations of satellite orbit mechanics 19 p3462 A66-35897
- Asymptotic solution of nonlinear hyperbolic equation in gas dynamics, with applications in explosion theory, astrophysics, etc 19 p3390 A66-36200
- Asymptotic property derived for particular solutions of Hamilton-Jacobi equation of conservative systems with two degrees of freedom 19 p3401 A66-36252
- Asymptotic calculation of effect of small tangential thrust on satellite motion, problem solved for satellite orbit in first and second approximation 19 p3472 A66-36842
- Dynamics of two-channel automatic control systems taking into account nonlinear interaction between channels 20 p3538 A66-37268
- Asymptotic representation of systems of nonlinear differential equations, setting up lemmas and theorems 20 p3590 A66-37484
- Asymptotic solutions of differential equations of mass transfer with chemical reaction without assumptions concerning kinematics, showing existence of five regimes 20 p3679 A66-37789
- Block diagonalization theorem for linear ordinary differential equation systems and applications 21 p3755 A66-38597
- Asymptotic forms exhibited by powers of nonnegative matrix, discussing index of convergence and associated values 21 p3755 A66-38602
- Decomposition of system of linear differential equations, using asymptotic techniques of Krylov and Bogoliubov 22 p3940 A66-40459
- Adiabatic motion of auroral particles in model of electric and magnetic fields surrounding Earth, commenting on importance of higher order terms in asymptotic expansion 22 p3914 A66-40561
- Asymptotic method for solving equations of theory of elasticity and mathematical physics 22 p3996 A66-40687
- Correct conductance and susceptance of infinite cylindrical antenna determined via asymptotic evaluation of parametric integrals 23 p4047 A66-41636
- Viscous supersonic flow near wall with large local curvature, using asymptotic solutions to Navier-Stokes equations 23 p4056 A66-41721
- Asymptotic solutions for viscous flow of transparent radiating gas in stagnation region, using method of matched inner and outer expansions [AIAA PAPER 66-105] 23 p4057 A66-41881
- Asymptotic solution of broadband random vibration BVP for elastic systems, based on excitation spectral width and natural frequency density 23 p4142 A66-41953
- Incompressible viscous flow around right angle corner, noting effect of geometry on boundary layer and cross flow 24 p4194 A66-42410
- Book on asymptotic methods of integrating linear differential equations with varying coefficients, emphasizing equations for oscillatory processes 24 p4231 A66-42613
- Asymptotic behavior of solution to system of differential equations with random limited coefficients 24 p4232 A66-42749
- Linear second-order partial differential equations of elliptic type analyzed, using maximum principle and barrier functions 24 p4233 A66-43065
- ATHENA ROCKET**
- Real time ground computer for Athena system and input/output data requirements in multiprocessing jobs 12 p1827 A66-23836
- Motion equations, attitude and ignition time of third and fourth stage of USAF Athena, noting solution derivation using Taylor series constraints, accuracy, etc 16 p2743 A66-30908
- ATLANTIC AIRCRAFT**
- S BREGUET 1150 AIRCRAFT**
- ATLANTIC OCEAN**
- Spherules from Atlantic Ocean sediments studied by electron microprobe, noting terrestrial alteration and contamination of surfaces 16 p2803 A66-31222

## ATLAS AGENA LAUNCH VEHICLE

Comet mission study using space probes boosted by Atlas Agena and Atlas Centaur launch vehicles for interception from 1967 to 1975 04 p0577 A66-13579

Comet missions, discussing spacecraft exploration criteria for short period and long period first-aparition comets 06 p0952 A66-15923

Communication satellite design noting use for educational and commercial purposes, instrumentation applied, etc 17 p2872 A66-31935

Selection of elliptic orbit for solar probe craft without undue perihelion growth [AIAA PAPER 64-646] 19 p3459 A66-35601

## ATLAS CENTAUR LAUNCH VEHICLE

Comet mission study using space probes boosted by Atlas Agena and Atlas Centaur launch vehicles for interception from 1967 to 1975 04 p0577 A66-13579

Atlas-Agena and Atlas-Centaur launch vehicles to investigate comets 06 p0951 A66-15903

Aborted Atlas-Centaur launch data of environmental conditions and use in engineering design 14 p2395 A66-28446

Suitability of Saturn IB/Centaur and Atlas/Centaur launched solar-electric propulsion vehicles for performing 0.1-AU solar probe mission [AIAA PAPER 66-496] 17 p2991 A66-32773

## ATLAS LAUNCH VEHICLE

Physical and biological blast effects from explosive fragmentation of gaseous nitrogen flight pressurized Atlas missile without propellants [AIAA PAPER 65-195] 16 p2810 A66-30897

Atlas E/F launch vehicle, discussing structure, mission capabilities, launch facility, reentry, etc [SAE PAPER 660444] 18 p3245 A66-33890

Advanced Atlas launch vehicle technology, discussing tank configurations, engine ratings, guidance systems, autopilot, thrust augmentation, payloads, launch facilities, etc [SAE PAPER 660445] 18 p3245 A66-33891

## ATMOSPHERE

Cosmic space physics - All-Union Conference, Moscow, June 1965 09 p1460 A66-20986

Soviet papers on atmospheric boundary layer, wind profiles, meteorological effects, etc 16 p2741 A66-30769

Propagation modes of infrasonic waves in isothermal atmosphere with constant horizontal winds and under effect of gravity 17 p2959 A66-33032

Graphite and C-H-O gas phase equilibrium at high temperatures and pressures in implication of Earth ocean and atmosphere development 17 p3015 A66-33432

Solution method for nuclear cascade equation representing process of propagation of pions through atmosphere 24 p4270 A66-42925

## ATMOSPHERE EXPLORER

S EXPLORER XVII SATELLITE

ATMOSPHERE EXPLORER-A

S EXPLORER XVII SATELLITE

## ATMOSPHERE MODEL

Equations of quasi-stationary mean flow of momentum and heat on spherical Earth averaged over long period and over latitude circle 02 p0221 A66-11574

Average atmosphere encountered by geomagnetically trapped

protons 03 p0364 A66-12676

Cyclogenesis prediction by two-level primitive equation model with constant static stability for two cases characterized by typical baroclinic development 05 p0711 A66-14936

Earth atmosphere, discussing properties of high altitude neutral atmosphere combined with measurement of solar output variations 05 p0675 A66-15743

Emission and absorption of radiant energy in model Martian atmosphere composed of 15 percent carbon dioxide and 85 percent nitrogen by volume 05 p0768 A66-15777

Martian ionospheric observations made by Mariner IV interpreted in terms of model show atmosphere consists mainly of carbon dioxide, low temperature and no thermosphere 06 p0953 A66-16404

Homogeneous isotropic turbulence in atmosphere model showing accretion qualities for small droplets during diffusion dissociation 08 p1212 A66-18673

Abundance of molecules, ions and atoms in late-type dwarf, giant and supergiant atmospheres 08 p1288 A66-18781

Nine-level general circulation model of atmosphere for resolving surface boundary layer fluxes as well as radiative transfer by ozone, carbon dioxide and water vapor 08 p1213 A66-18924

Numerical experiment with general circulation model with simple hydrologic cycle 08 p1247 A66-18925

Cumulus cloud simulation by dropping solid piece of carbon dioxide into hot water 08 p1248 A66-19388

Static diffusion models of upper atmosphere with density and composition determined for wide exospheric temperature ranges 09 p1370 A66-19901

Planetary environments in various models 09 p1454 A66-20287

Neutron star atmosphere models for determining, surface temperature, cooling time and X-ray emission 10 p1599 A66-21103

Harris and Priester model used to compute amplitude of diurnally varying component of horizontal pressure acceleration, showing increase with altitude 10 p1529 A66-21150

Numerical experiments with large-scale seasonal forcing, treating six different heating fields in general circulation model for periods of five and 100 years 10 p1530 A66-21273

Upper atmosphere model for calculating neutral properties from 100 to 10,000 km as function of local time and solar activity 10 p1531 A66-21280

Nickel abundance in solar spectrum determined, based on atmospheric model 11 p1772 A66-22774

Blanketing and convection effect on theoretical models of solar photosphere 11 p1772 A66-22775

Modified Eliassen finite difference grid solution of primitive hydrostatic equations system for barotropic and baroclinic model of atmosphere 11 p1730 A66-22946

Atmospheric density models for solar radiation cycle variation in upper atmosphere [AIAA PAPER 66-355] 12 p1951 A66-24490

Computer program for predicting satellite long-term orbit decay and digital simulation of atmosphere and reentry conditions [AIAA PAPER 66-357] 12 p1951 A66-24491

Mars atmosphere definition important in advanced landing vehicle design with increased payload capability and reduced complexity [AIAA PAPER 65-22] 12 p1952 A66-24697

Goldberg method for determining Doppler widths in calculations of depth dependence of solar turbulence 13 p2183 A66-25615

Upper atmospheric model of variations for solar minimum conditions based on satellite drag and rocket sounding 13 p2073 A66-26130

Justification for multiple isothermal layer approximation to real atmospheric acoustic-gravity wave propagation 14 p2234 A66-26857

Response of atmosphere to impulsive point disturbances 14 p2386 A66-28123

Atmospheric model describing generation of clear air turbulence /CAT/, noting horizontal shear effect 15 p2532 A66-28915

Atmosphere models for seasonal and latitudinal variation in thermosphere as

function of solar flux and geomagnetic index 15 p2492 A66-3003

Numerical model of Earth atmosphere used to compute hydro-and thermodynamic evolution of global moist atmosphere, considering solar heating, evaporation, etc 16 p2697 A66-3094

Stability of baroclinic axially symmetric vortex on F plane to axially symmetric disturbances 16 p2700 A66-3164

Ten micron stellar flux measurements of 42 stars with 200 inch Hale telescope and predictions of model atmospheres and line blanketing theory 17 p3000 A66-3226

Grid computations of model atmospheres for A-type stars, considering effects of Balmer-line blanketing 18 p3227 A66-3376

Three-dimensional polarizations of high latitude micropulsations derived for conjugate point observatories from hydromagnetic wave-ionospheric current model 18 p3107 A66-3452

Equatorial electrojet model construction to fit direct measurements 19 p3348 A66-3592

Physical structure of upper atmosphere given by pressure and density scale height and mean molecular mass due to diffusion 19 p3349 A66-3634

Negative ion density and composition in lower ionosphere 19 p3350 A66-3635

Atmospheric models, comparing Chamberlain evaporative and solar breeze models, Opik and Singer evaporative model and Parker solar wind model 19 p3465 A66-3660

Photospheric structure and temperature distributions, determined from center limb variations of central intensities in neutral titanium lines, used in connection with model atmosphere 19 p3465 A66-3660

CIRA 1965, COSPAR International Reference Atmosphere covering mean atmospheric structure variations from 30 to 100 km and from 120 to 800 km 19 p3352 A66-3679

Thermal escape of neutral hydrogen and distribution in Earth thermosphere, noting collision in transition regions 20 p3549 A66-3729

Baroclinic instability of quasi-geostrophic perturbation to zonal wind in two-layer inviscid model, examining short wavelength cut-off in terms of potential vorticity 20 p3550 A66-3746

Least squares iterative procedure for resolving individual particle distributions comprising model atmosphere density profile above 110 km 20 p3551 A66-3751

Equations describing motion of satellite in Paetzold-Zschoerner model of Earth atmosphere 20 p3654 A66-3784

Modified Eliassen finite difference grid solution of primitive hydrostatic equations system for barotropic and baroclinic model of atmosphere 20 p3593 A66-3785

Transmission and coupling resonance of hydromagnetic disturbances in nonuniform model magnetosphere calculated by approximate dipole coordinates valid near equatorial plane 21 p3734 A66-3921

British stratospheric and mesospheric temperature measurements compared with values from available atmospheric models 22 p3913 A66-4051

Statistical properties of phase and amplitude fluctuations during total reflection of waves from ionospheric layer 22 p3869 A66-4076

Mariner IV models of three Mars atmospheric layers analogous to terrestrial E, F-1 and F-2 layers, considering relative mass densities, temperatures, carbon dioxide photodissociation and ionization profile 23 p4129 A66-4177

## ATMOSPHERIC ABSORPTION

Visibility range of 100-watt lamp and relation to absorption coefficient of tropospheric fog 01 p0096 A66-1022

Aurora position and brightness determination by S-180 camera as affected by such factors as distortion and vignetting 02 p0226 A66-1134

Graphical method to determine detection range for narrow IR windows in dependence of atmospheric absorption and emission 02 p0223 A66-12064

Influence of absorption of aerosol particles on extinction of solar and sky

radiation 02 p0225 A66-12214  
 Slant path measurement of atmospheric  
 absorption spectra of 43 mu band, using  
 Sun as radiation source 03 p0359 A66-12301  
 Relationship between phase-structure  
 function and statistics governing geometric  
 shape of randomly distorted wave  
 front 03 p0391 A66-12302  
 Energy flux of electron beam absorbed by  
 atmosphere derived from resulting intensity  
 of first negative system of molecular  
 nitrogen 05 p0670 A66-14948  
 Atmospheric oxygen absorption factor of  
 centimeter and millimeter radio  
 waves 05 p0636 A66-15878  
 Absorption effect on Rayleigh atmosphere,  
 calculating reflected and transmitted  
 intensities and polarizations for C  
 wavelength pair used for Umkehr  
 measurements 07 p1028 A66-17364  
 Characteristics of solar radio bursts in  
 microwave region and measurements of  
 atmospheric absorption and solar flux at 17  
 gc/s 07 p1028 A66-17419  
 Theoretical model of isolated Lorentz line  
 of IR absorption by gases applied to  
 atmospheric optics and spectroscopy  
 problems 08 p1248 A66-19307  
 Estimation of ozone concentration at  
 altitudes of 44 to 102 km from nighttime  
 geophysical rocket measurements of  
 atmospheric brightness 08 p1221 A66-19796  
 Vertical temperature and humidity  
 distributions of atmosphere determined  
 from satellite measurements of carbon  
 dioxide and water-vapor absorption  
 bands 09 p1376 A66-20999  
 Solar X-ray and UV radiation  
 measurements by monitoring satellite,  
 including instrumentation 10 p1598 A66-21085  
 Atmospheric radio wave absorption  
 coefficient and altitude determined and  
 linked to effects of colliding paramagnetic  
 oxygen molecules 13 p2020 A66-25224  
 Atmospheric absorption in IR region,  
 noting effects of water vapor, ozone, carbon  
 dioxide and collision-induced dipole  
 moments 13 p2075 A66-26603  
 Mass calculation for absorbing gases such  
 as water vapor, carbon dioxide and ozone  
 along oblique paths between two arbitrary  
 points in atmosphere, considering vertical  
 distribution, refraction and Earth  
 curvature 14 p2284 A66-27541  
 Diurnal variation of average energy  
 spectrum of auroral X-rays observed from  
 balloon flights, assessing effect of  
 atmospheric absorption 14 p2376 A66-27614  
 Effect of radiative sound absorption in  
 atmosphere, calculating absorption due to  
 radiation by water vapor in far-IR rotation  
 spectrum 14 p2334 A66-27659  
 Atmospheric propagation of radio waves at  
 wavelength of 33 mm 14 p2240 A66-27919  
 Contaminating effect of water vapor in  
 optical path of spectrometer on  
 measurements of stratospheric water vapor  
 absorption 15 p2530 A66-28601  
 Radiometric measurements of atmospheric  
 absorption at 600 gc/s by DICKE type  
 superheterodyne receiver, using harmonic  
 mixing 15 p2450 A66-28999  
 Vacuum spectrometer measurement of  
 absorption band of atmospheric water  
 vapor 15 p2542 A66-29346  
 UV solar radiation absorption in upper  
 atmosphere determined from measurement  
 of photoelectron currents emitted by planar  
 metallic orthogonal photocathodes onboard  
 Cosmos II satellite 15 p2592 A66-30051  
 Solar radiation absorption by atmospheric  
 water vapor, deriving formulas that include  
 scattering and absorption by aerosol as  
 additional parameter 16 p2691 A66-30228  
 Visibility range of 100-watt lamp and  
 relation to absorption coefficient of  
 tropospheric fog 17 p2948 A66-31907  
 Atmospheric ozone absorption coefficients  
 measurement, determining errors in  
 extraterrestrial constant of Dobson  
 spectrophotometer 17 p2923 A66-33359  
 Solar extinction measurements and  
 interpretation of terrestrial atmosphere  
 microwave absorption spectrum near 1-cm  
 wavelength 18 p3105 A66-34012  
 Theoretical model of isolated Lorentz line  
 of IR absorption by gases applied to  
 atmospheric optics and spectroscopy

problems 19 p3400 A66-36043  
 Radio wave absorption factors in  
 atmospheric water vapor and oxygen,  
 deriving expressions for effective length,  
 mean temperature and total vertical  
 absorption 20 p3512 A66-37134  
 Vacuum spectrometer measurement of  
 absorption band of atmospheric water  
 vapor 20 p3602 A66-37351  
 Microwave antenna design elements, feed  
 equipment and performance  
 characteristics 20 p3530 A66-37716  
 Sound absorption in air at 1/3-octave  
 frequency intervals as function of humidity  
 and temperature at normal atmospheric  
 pressure for studies in room  
 acoustics 21 p3769 A66-38648  
 Estimation of ozone concentration at  
 altitudes of 44 to 102 km from nighttime  
 geophysical rocket measurements of  
 atmospheric brightness 21 p3733 A66-38792  
 Direct solar radiation predetermination and  
 extinction coefficient 22 p3912 A66-40243  
 Solargraphic measurements of solar  
 radiation absorption by atmospheric dust  
 and pollutants and effects on solar energy  
 transmission 22 p3912 A66-40244  
 Nocturnal high altitude ozone distribution  
 determined, using small geophysical  
 sounding rockets with Moon as light source  
 to measure atmospheric absorption of UV  
 radiation 22 p3914 A66-40559  
 Absorption and brightness temperature  
 variations of atmosphere on basis of  
 statistical characteristics of vertical  
 temperature and humidity  
 structures 23 p4087 A66-41802  
 Mass calculation for absorbing gases such  
 as water vapor, carbon dioxide and ozone  
 along oblique paths between two arbitrary  
 points in atmosphere, considering vertical  
 distribution, refraction and Earth  
 curvature 24 p4198 A66-42326  
 Venus atmosphere noting pressure induced  
 absorption in carbon dioxide-nitrogen  
 atmosphere as indicated in decline of  
 microwave brightness  
 temperature 24 p4277 A66-42668  
 Stellar extinction measurements made in  
 Gemini IX flight, determining existence and  
 location of Link layer from airglow  
 study 24 p4280 A66-43026

## ATMOSPHERIC ATTENUATION

Aerosol component of transparency  
 attenuation coefficient relation to humidity  
 characteristics of individual atmospheric  
 layers 04 p0513 A66-13417  
 Ultrashort wave attenuation and damping  
 on long open tracks, discussing wave  
 scattering and reflection in inhomogeneous  
 atmosphere 04 p0482 A66-14006  
 Atmospheric spatial inhomogeneities  
 degradation in radar signal-target  
 information 04 p0486 A66-14120  
 Sunlight attenuation reaching Aries II  
 satellite after passing through Earth  
 atmosphere along almost horizontal  
 path 05 p0672 A66-15023  
 Atmospheric attenuation of light with  
 average turbulence 08 p1248 A66-19319  
 Atmospheric optics noting attenuation,  
 reflectance, flux and optical  
 radiation 09 p1398 A66-20274  
 Electromagnetic wave propagation in  
 meteorology and geophysics, noting  
 expression for refractive modulus in  
 troposphere, considering attenuation and  
 backscattering 09 p1343 A66-20276  
 Beer and square root law compared in  
 relation to use for atmospheric extinction  
 correction in IR  
 spectrum 09 p1372 A66-20292  
 Optical radiation absorption and  
 attenuation by atmosphere polluted with  
 carbon dust, including transmission  
 coefficient calculation 09 p1402 A66-20313  
 Illuminance of Earth shadow at three  
 wavelengths by numerical integration,  
 accounting for light attenuation, ozone  
 absorption and extinction, Rayleigh  
 scattering and refractive beam  
 divergence 11 p1770 A66-22570  
 He-Ne laser IR radiation emission  
 attenuated by atmospheric  
 methane 11 p1657 A66-23090  
 Ultrashort wave attenuation and damping

on long open tracks, discussing wave  
 scattering and reflection in inhomogeneous  
 atmosphere 12 p1813 A66-23868  
 High-resolution interference spectrometer  
 to observe water vapor absorption in 500 to  
 1500 gc region 13 p2020 A66-25203  
 Q band propagation test carried out over  
 12-km path, comparing rainfall attenuation  
 with rainfall rate over path, noting scatter  
 of measured values 13 p2023 A66-25567  
 Attenuation of coherent optical waves  
 propagating in troposphere, noting molecular  
 scattering, bending of refractive index  
 homogeneities due to temperature gradients  
 in air, etc 15 p2448 A66-28578  
 Atmospheric optical properties and  
 directional reflectances of ocean water and  
 other surfaces, for unobscured low  
 Sun 15 p2531 A66-28832  
 Humidity attenuation in 8 to 13 micron IR  
 window used in radiance measurement from  
 orbiting satellite 15 p2531 A66-28848  
 Millimeter wave transmission and reception  
 of television signals, examining picture  
 quality and tropospheric scintillation and  
 attenuation relative to  
 weather 15 p2450 A66-28997  
 Atmospheric turbidity measurements over  
 India, using daily direct solar radiation  
 measurements for selected spectral regions  
 and entire spectrum 15 p2485 A66-29065  
 Possible use of IR radiation to improve  
 visibility through fog, including atmospheric  
 attenuation effects and radiant energy  
 source 16 p2740 A66-30088  
 Flux density of nonthermal radio sources  
 at 8000 mc noting measurement correction,  
 correlation between curvature index spectral  
 index and component  
 separation 17 p2995 A66-31911  
 Direct measurement of attenuation length  
 of extensive air showers through  
 water 18 p3212 A66-35136  
 Radiation attenuation effect of atmospheric  
 aerosols on air-weather aircraft landing  
 guidance systems using  
 lasers 19 p3397 A66-36051  
 Detectability of coronal IR lines due to  
 Mg, Al and Si ions with practicable IR  
 spectrometers and photoconductive  
 detectors, considering atmospheric  
 attenuation 20 p3649 A66-37333  
 Aerosol component of spectral  
 transmittance of artificial fog, comparing  
 calculated and experimental values for  
 absolute attenuation  
 factor 21 p3759 A66-38916  
 Fog transmittance attenuation factor,  
 comparing photometric values and values  
 calculated from microstructural observations,  
 using flow trap 21 p3759 A66-38917

## ATMOSPHERIC CHEMISTRY

Electrochemical and chemiluminescent  
 ozonesonde performance, using analysis of  
 comparative ascents 04 p0517 A66-14451  
 Physics of lower thermosphere studied by  
 using conditions applying to oxygen  
 atmosphere and oxygen-nitrogen  
 atmosphere 05 p0671 A66-15018  
 Upper atmospheric helium ion chemical  
 loss process, distribution of nitrogen ion and  
 rate coefficient of helium ion-molecular  
 nitrogen reaction 11 p1701 A66-23153  
 Oxygen photochemical equilibrium above  
 150 km, assuming dominant role of radiative  
 recombination above 120  
 km 15 p2486 A66-29089  
 Chemical release at high altitudes in order  
 to obtain information about atmosphere by  
 ground observation 16 p2697 A66-31012  
 Aerosol particle precipitation in surface  
 layer of atmosphere measured by modified  
 method of Alexandrova 21 p3760 A66-39366

## ATMOSPHERIC CIRCULATION

### SA WIND CIRCULATION

Nonlinear equations of atmospheric  
 hydrodynamics solved, using numerical  
 algorithm 01 p0096 A66-10751  
 Stationary distribution of ozone density  
 with height in presence of long waves in  
 atmosphere, solving continuity equation for  
 ozone and considering photochemical  
 processes 01 p0062 A66-10752  
 Planetary wave analysis using zonal  
 harmonics in connection with atmospheric  
 circulation and weather  
 forecasting 01 p0064 A66-11106  
 Phases of lower stratospheric circulation

and temperature variation 02 p0221 A66-11571

Stratospheric dynamics north of 40 degrees N with reference to kinetic energy variation, wave disturbances and shallow layer 02 p0253 A66-11572

Equations of quasi-stationary mean flow of momentum and heat on spherical Earth averaged over long period and over latitude circle 02 p0221 A66-11574

Dynamic equations in quasi-static and quasi-solenoidal approximations to describe synoptic meteorologic processes in spherical coordinate system 04 p0540 A66-13412

Air currents and temperature distribution in stratosphere and mesosphere in Northern Hemisphere from rocket observation 04 p0513 A66-13438

Vorticity equation describing properties of large-scale atmospheric motions 04 p0542 A66-14304

Cumuli above sea in spite of stable layer between sea surface and cloud boundary, noting condensation around salt particles penetrating ascending thermals 04 p0542 A66-14306

Cellular convection in conditionally unstable atmosphere, determining preferred areas of ascending and descending regions and current distribution 05 p0666 A66-14542

Positions of monthly mean troughs and ridges in Northern Hemisphere from 1949 to 1963 05 p0711 A66-14939

Correction to paper on rocket studies of sporadic-E ionization and ionospheric winds 05 p0671 A66-14957

Air motions and physical factors affecting general circulation in mesosphere and lower thermosphere 05 p0711 A66-15027

Climatic conditions at Earth surface, relation to long-term planetary trends in atmospheric circulation 05 p0712 A66-15221

Atmospheric ozone variations, distributions, continents and planetary circulation according to IGY data 05 p0674 A66-15222

Numerical experiment where conditionally unstable environment was present for study of cumulus-like circulations developed from initial state 06 p0905 A66-16267

Cumulus modification experiment using station network, radiosonde and pilot balloon stations, cameras, radar data, etc 06 p0905 A66-16268

Reflection and ducting of atmospheric acoustic-gravity waves whose temperature and horizontal wind velocity vary arbitrarily with height 06 p0876 A66-16278

Nonlinear stability of zonal flows in two-dimensional quasi-solenoidal model when absolute eddy is monotonic function of width 06 p0905 A66-16549

Skua Meteorological Rocket program including analysis of stratospheric winter circulation and spring reversal and temperature soundings on Outer Hebrides 07 p1063 A66-18336

Closed vertical and horizontal air circulation effect on steady state distribution of ozone in Earth atmosphere 08 p1213 A66-19031

Ionospheric drift in F region compared with overall circulation in troposphere and stratosphere 08 p1214 A66-19048

Time-space spectral analysis of meteorological fields based on time-dependent spectra of wind velocity, temperature, pressure and turbulent pulse and heat fluxes 09 p1397 A66-19883

Macro-turbulent transfer and meridional circulation in northward drift of atmospheric ozone 09 p1370 A66-19891

Empirical wind structure models, considering mean wind as height function, wind shear, tropospheric wind profiles for vehicle design, etc 09 p1398 A66-20271

Model atmosphere structural parameters and improvement proposals for 1964 COSPAR International Reference Atmosphere 09 p1375 A66-20989

Numerical experiments with large-scale seasonal forcing, treating six different heating fields in general circulation model for periods of five and 100 years 10 p1530 A66-21273

System of equations derived for dynamics of convective atmospheric vortices for model with unstable stratification and basic vorticity 10 p1530 A66-21274

Inaccuracy in rocketsonde data on HF of midwinter easterlies in stratosphere over Cape Kennedy 10 p1531 A66-21281

Temporal spectra of atmospheric angular momentum transfer from wind data at various tropospheric and lower stratospheric levels 11 p1697 A66-22566

Sudden increase in radioactive fallout traced to stratospheric origin due to debris age exceeding assumed mean tropospheric residence time of one month 11 p1699 A66-23095

Investigation of two cold air fronts of polar origin that occurred in Alpine region in April 1962, using data from Tiros IV 11 p1730 A66-23096

Mean wind vector shear and shear interval and standard deviation, examining correlation 11 p1730 A66-23097

Winds in upper atmosphere as revealed by sodium vapor trails explained on basis of prevailing and tidal components critically analyzed 11 p1701 A66-23147

Kinetic energy generation and dissipation in large-scale atmospheric circulation, using six months aerological data from North American network 11 p1731 A66-23487

Changes in current kinetic theory of NO-O reaction, based on observation of release of nitric oxide in E region 11 p1703 A66-23494

Terrestrial atmosphere circulation and circulation of solar photophere 14 p2282 A66-26928

Synoptics of stratosphere and stratospheric warming of winter of 1963 14 p2283 A66-27095

Entrainment problem, convective clouds and atmospheric thermal convection 14 p2325 A66-27280

Nonlinear equations of atmospheric hydrodynamics solved, using numerical algorithm 14 p2285 A66-27850

Stationary distribution of ozone density with height in presence of long waves in atmosphere, solving continuity equation for ozone and considering photochemical processes 14 p2285 A66-27851

Cumuli above sea in spite of stable layer between sea surface and cloud boundary, noting condensation around salt particles penetrating ascending thermals 14 p2327 A66-28219

Nonlinear stability of zonal flows in two-dimensional quasi-solenoidal model when absolute eddy is monotonic function of width 14 p2327 A66-28221

Behavior of superpressure balloons in vertical air currents, noting various combinations of wind speed and wave amplitude 15 p2426 A66-28941

Atmospheric motions from sodium cloud firings in 80 to 200 km height region, noting internal gravity waves, atmospheric tides and drift 15 p2489 A66-29661

Wind shear theory of formation of temperate zone blanketing sporadic E layers, noting motion equation for ions in ionospheric E region 15 p2490 A66-29948

Meteorological Rocket Network observations of complex circulation system in middle and upper atmosphere 15 p2491 A66-29953

Diurnal and semidiurnal oscillations in atmospheric density, temperature, pressure and wind in subtropical Southern Hemisphere 15 p2491 A66-29964

Meteorological rocket measurement of wind patterns noting velocities, turbulences, stratospheric diffusion coefficients, etc 15 p2492 A66-30028

Average rotational speed of upper atmosphere above 200 km evaluated from changes in orbital inclinations of 13 satellites 15 p2496 A66-30082

Mars atmospheric circulation, diurnal heating, thermal tides and effects on Earth atmosphere 16 p2797 A66-30353

Atmospheric wind measurement technique utilizing acoustic noise of rocket exhaust [AIAA PAPER 66-440] 16 p2741 A66-30601

Dynamic influence of orography on atmospheric motion examined, using fluid mechanics analogy with periodicity as boundary condition 16 p2699 A66-31637

Initial value problem for small amplitude wave perturbations solved on zonal atmospheric flow with constant vertical shear and vanishing temperature lapse

rate 16 p2699 A66-31637

Organized convection as photographed by Gemini astronauts 18 p3129 A66-3421

Atmospheric circulation - International Space Science Symposium, Argentina, Mar 1965 19 p3346 A66-3563

EOLE system consisting of balloons and satellite, interrogation for synoptic data on atmospheric circulation over Southern Hemisphere 19 p3346 A66-3563

Balloon sounding of Southern Hemisphere by global horizontal sounding technique /GHOST/, providing data on atmospheric circulation 19 p3279 A66-3563

Hydrodynamic and thermodynamic equations for biennial variations of zonal atmospheric circulation in equatorial area 19 p3346 A66-3564

Meteorological rocket network observation of gross global circulation patterns in stratosphere and mesosphere for analysis of vertical structure and synoptic processes 19 p3347 A66-3564

Atmospheric circulation and eddy diffusion based on thermal structure, oxygen transport continuity and sodium trail spreading in thermosphere 19 p3347 A66-3564

Quasi-geostrophic wave motions of inertial gravity wave type and Rossby wave type in equatorial area 19 p3348 A66-3605

Latitudinal effect on behavior of ionospheric absorption determined by absorption measurements at four stations 19 p3350 A66-3636

Pressure gradients in F region from model atmosphere, estimating from motion equations variation of magnitude and direction of wind with local time, season and epoch of solar cycle 19 p3352 A66-3662

Quasi-geostrophic instability of disturbance of small amplitude in baroclinic zonal flow, caused by barotropic, baroclinic or critical layer instabilities 20 p3550 A66-3746

Vertical velocities in atmospheric motions, noting pressure and temperature field distributions and application of computer to solve obtained equations 20 p3593 A66-3775

Internal atmospheric gravity waves in isothermal medium, solving hydrodynamic equations, determining wave propagation in realistic atmosphere for range of wave parameters, wind amplitude, reflected energy, etc 20 p3554 A66-3820

Horizontal temperature gradient produced by water body effect on distribution of wind velocity and direction in atmospheric boundary layer 20 p3594 A66-3837

Wind distribution in atmospheric boundary layer under conditions of advection from pilot balloon observations 20 p3594 A66-3837

Polar vortex breakdown and explosive warming in upper stratosphere in numerical tests based on observed height pattern noting kinetic energy 21 p3759 A66-3920

Ionization irregularities in bottomside an topside ionosphere, noting circulation effect 22 p3911 A66-3998

Planetary scale atmospheric circulations of Jupiter and Saturn using fluid dynamics, noting rotation effects 23 p4129 A66-4167

Atmospheric ozone data on basis of meteorological observations and synoptic maps on ship in Atlantic 23 p4065 A66-4180

Rocket observation of upper atmospheric wind around ionospheric E layer by sodium release method, noting cloud drift 24 p4199 A66-4246

Stress, eddy viscosity and viscous dissipation estimations in jet stream obtained during Project TOPCAT in Australia, using aircraft soundings 24 p4234 A66-4298

**ATMOSPHERIC COMPOSITION**

Stable elementary particle detection of mass greater than that of proton in hydrogen, deuterium and atmospheric air sample, using mass spectrometer 01 p0060 A66-1025

Atomic hydrogen reaction with HO-2 as a source of hydrogen molecules in lower thermosphere 02 p0221 A66-1150

Further evidence of correlation of atmospheric ozone and relative sunspot number 02 p0222 A66-1182

Aerospace Breathing Chart used in analytical evaluation of breathable atmospheres and emergency oxygen system

[AIAA PAPER 65-723] 03 p0328 A66-12544  
 Redetermination of isotopic composition of  
 atmospheric neon resulting from  
 measurements of neon in  
 meteorites 04 p0517 A66-14323  
 Atmospheric ozone concentration variation  
 during total eclipse of sun affected by limb  
 darkening and solar radiation  
 intensity 05 p0666 A66-14545  
 Mass spectrometer application to  
 measurement of chemical and ionic  
 composition of upper  
 atmosphere 05 p0676 A66-14683

 reaction between helium metastables and  
 oxygen atoms 05 p0669 A66-14940  
 Solar radiation attenuation in UV region  
 provides data on production of atomic  
 oxygen by photodissociation of oxygen and  
 ion and electron formation by  
 photoionization of nitrogen and  
 oxygen 05 p0748 A66-15022  
 Human thermal comfort prediction in  
 oxygen-nitrogen  
 atmospheres 06 p0817 A66-16235  
 Nature and momentum spectra of nuclear  
 active particle flux at low altitudes,  
 determining root mean square  
 error 07 p1115 A66-17552  
 Nucleon passage through atmosphere and  
 meson production data including nuclear  
 cascade intensity, gamma ray production,  
 etc, and mean free path values for nucleon  
 interaction 07 p1115 A66-17553  
 Atmospheric argon effect on hypersonic  
 stagnation point convective heat transfer,  
 using arc-heated shock tube simulating  
 flight velocities up to 34,000 fps  
 [AIAA PAPER 66-29] 07 p1153 A66-17891  
 Extraterrestrial dust as atmospheric argon  
 source and influx of black  
 spherules 08 p1287 A66-18770  
 Measurement of radioactivity in air of free  
 atmosphere and interior of cloudy areas and  
 absorption of radioactive aerosols by water  
 droplets 08 p1283 A66-19305  
 Probability of presence of nitrogen, oxygen  
 and water in atmosphere of Venus, based on  
 spectroscopic studies 08 p1294 A66-19323  
 Separation problems of gas and aerosol  
 components in brightness of atmospheric  
 layer for photometric data pertaining to  
 Mars atmosphere 08 p1295 A66-19330  
 Total mass of Earth atmosphere computed,  
 using atmospheric pressure and land-height  
 distribution data 09 p1369 A66-19871  
 Liquid and particulate content of  
 atmosphere noting surface rates of rainfall,  
 particle size distribution, cloud data,  
 aerosols, etc 09 p1398 A66-20272  
 Earth atmosphere composition noting  
 extent and effects of ozone, absorption,  
 ionization, electron attachment and  
 detachment, etc 09 p1371 A66-20273  
 Spectral distribution of direct sunlight at  
 Earth surface at sea level, as function of air  
 mass and concentration of aerosol, ozone  
 and water vapor 09 p1375 A66-20962  
 Data compendium on neutral composition  
 of atmosphere at altitudes from 100 to 200  
 km, noting nitrogen and oxygen  
 concentration values from optical and mass  
 spectroscopic studies 09 p1376 A66-20991  
 Earth, balloon and satellite spectroscopic  
 observations of Mars to determine  
 atmospheric composition and pressure at  
 surface level 10 p1602 A66-21065  
 Seasonal variation of atmospheric ozone,  
 determining via IR method total amount and  
 vertical distribution 10 p1526 A66-21124  
 Reconciling observed ozone distribution in  
 atmosphere with that of photochemical  
 theory, using accepted rate  
 constants 10 p1531 A66-21278  
 Atmospheric properties important to  
 aviation and aerospace medicine including  
 composition, weather conditions, radiation,  
 temperature effect at various heights,  
 etc 10 p1553 A66-22105  
 Atmospheric aerosol size distribution from  
 scattered light measurements by  
 rocketborne equipment 11 p1697 A66-22565  
 Carbon 14 content of dendrochronologically  
 dated tree rings used to determine  
 atmospheric C-14 variation over past six  
 millennia 11 p1697 A66-22568  
 Secular variation of atmospheric  
 radiocarbon concentration, noting

dependence on geomagnetic field  
 strength 11 p1698 A66-22569  
 Vertical distribution of neutral composition  
 of atmosphere between 100 and 200 km,  
 comparing mass spectrometer with optical  
 measurement 11 p1698 A66-23038  
 Height dependence of albedo in Earth  
 upper atmosphere, calculating total quantity  
 of neutral hydrogen in  
 ionosphere 11 p1699 A66-23044  
 Ozone photochemistry in atmosphere  
 containing hydrogen, calculating equilibrium  
 vertical distribution, rate of formation of  
 hydroxyl, diurnal variation,  
 etc 11 p1700 A66-23138  
 Influence coefficients for computation of  
 atmospheric components of reentry vehicle  
 circular error probable /CEP/, using Bliss  
 adjoint method, noting effects of certain  
 inadequacies on system performance  
 [AIAA PAPER 66-358] 12 p1908 A66-24517  
 Finite-difference scheme for short-term  
 operational weather forecasts from two-level  
 model atmosphere 12 p1909 A66-24870  
 equations 12 p1909 A66-24870

 etc 13 p2083 A66-26502  
 Altitude simulator for adjustment and  
 calibration of high altitude meteorological  
 instruments 14 p2325 A66-27279  
 Drag coefficient of spherical satellites at  
 various heights, based on gas-surface  
 interactions and atmospheric  
 composition 14 p2382 A66-27617  
 Mass spectrometry of composition and  
 density of neutral atmosphere, noting  
 diffuse separation of  
 gases 14 p2285 A66-27621  
 Composition and temperature variation of  
 thermosphere, using mass spectrometry and  
 optical methods 14 p2285 A66-27622  
 Atmospheric exploration with lidar, noting  
 high resolution and  
 sensitivity 15 p2530 A66-28600  
 Atmospheric mixing time and lifetime of  
 atomic and molecular oxygen at high  
 altitude, noting agreement with barometric  
 distribution law, concentration pattern,  
 etc 15 p2486 A66-29088  
 Estimation of ion formation rate at various  
 altitudes in ionosphere and zenith angles  
 during low and high solar activity  
 periods 15 p2487 A66-29105  
 Mars upper atmosphere and single-layer  
 ionosphere UV photoionization, temperature  
 profile and chemical  
 composition 15 p2598 A66-29417  
 Seasonal-latitude variations in lower  
 thermospheric density, temperature and  
 composition 15 p2490 A66-29820  
 Rocket measurement of diurnal variation  
 of ozone profiles above maximum  
 concentration level 15 p2495 A66-30058  
 Atmospheric neutral and ion composition  
 and ionization radiation rates from rocket  
 data compared with electron densities  
 around 200 km 15 p2496 A66-30081  
 Neutral particle densities of nitrogen,  
 molecular and atomic oxygen and argon in  
 upper atmosphere, noting density profile

irregularities, diffusive separation altitude,  
 etc 15 p2497 A66-30086  
 Chronic exposure of rats to gaseous  
 environments of varied composition and  
 pressure, noting exposure capsules, gas flow  
 system, respiratory gas analyzer,  
 etc 16 p2643 A66-30650  
 Atomic-to-molecular oxygen concentrations  
 ratio values in upper atmosphere used to  
 determine strength of turbulent mixing in  
 atmosphere, noting definition of turbopause  
 height 16 p2694 A66-30704  
 Mars atmosphere models based on Mariner  
 IV occultation deriving electron number  
 density, temperature, pressure, mass  
 density, etc, noting carbon dioxide  
 presence 16 p2800 A66-30713  
 Dust flux in upper atmosphere and on  
 polar ice sheets 16 p2696 A66-30931  
 Electromagnetic spectrum of upper  
 atmosphere examined, using microwave  
 techniques, noting molecular rotation of  
 gases with permanent electric or magnetic  
 dipole moments 16 p2698 A66-31044  
 Atmospheric ozone and effect on  
 geophysics, noting concentration at ground  
 level, distribution, temperature, origin,  
 etc 16 p2700 A66-31744  
 Methane content of upper atmosphere  
 determined by Fabry-Perot interferometer  
 measurement of radiation transmission in  
 methane absorption band 17 p2926 A66-32948  
 Variations in atmospheric radio carbon  
 activity related to secular variations in  
 carbon-14 production rate, carbon residence  
 times and carbon reservoir  
 times 18 p3104 A66-33552  
 Variation in radiocarbon content in  
 atmosphere studied from measurement of  
 concentration in wood sample nearly 2000  
 years old 18 p3199 A66-34889  
 Venus atmosphere, surface temperature  
 and radiation  
 characteristics 19 p3460 A66-35799  
 Nitrogen temperature and density in  
 thermosphere region from thermosphere  
 probe data, examining inconsistency with  
 satellite drag estimates 19 p3349 A66-36347  
 Aerobee rocket measurement of nitric  
 oxide in upper atmosphere, noting  
 fluorescence in airglow layer, emission rate  
 factors and NO densities 19 p3349 A66-36351  
 Atomic hydrogen and helium emissions in  
 upper atmosphere determined by diffraction  
 spectrophotometer measurement of twilight  
 airglow and aurora 19 p3350 A66-36352  
 Auroral spectrum emission intensity in  
 upper atmosphere used to determine  
 densities of metastable atoms and molecules  
 and rates of dissociation and  
 ionization 19 p3350 A66-36353  
 Upper atmospheric nitric oxide determined  
 from Aerobee measurement of UV dayglow  
 spectra 20 p3550 A66-37299  
 Small-scale fluctuations in vertical  
 distribution of atmospheric ozone analyzed,  
 examining possible transport mechanisms in  
 Southern Hemisphere 20 p3551 A66-37469  
 Possible enhancement to low-energy  
 atmospheric proton flux induced by passage  
 of Ikeya-Seki comet examined, using  
 balloon-borne scintillation counter and pulse  
 height analysis  
 techniques 20 p3631 A66-37617  
 Statistical characteristics of atmospheric  
 ozone distribution, determining  
 autocorrelation and cross correlation  
 functions, concentration and temperature  
 profiles 20 p3552 A66-37751  
 Ionization and constitution of neutral  
 atmosphere, including solar EUV, X-ray and  
 corpuscular sources 22 p3905 A66-39944  
 Finite-difference scheme for short-term  
 operational weather forecasts from two-level  
 model atmosphere  
 equations 22 p3943 A66-40331  
 Prolonged exposures to acute anoxia cause  
 reductions in viability of hydrated rye  
 seeds, findings suggest helium may be  
 harmful as atmospheric component in  
 manned space capsules 22 p3855 A66-40480  
 Cylindrical functions for calculating free  
 oscillations of Saturn rings and estimation  
 of upper limit to mass of ring if motion is  
 stable against axisymmetric  
 perturbations 23 p4125 A66-41063  
 Muon production in atmosphere and energy

- dependence of positive excess 24 p4271 A66-42938  
 Detecting concentration of nitric oxide in metastable state in upper atmosphere, using giant-pulse Raman laser sources 24 p4203 A66-43022  
 Low level atmospheric flow structure resolution, noting equipment and results on wind speed variations 24 p4235 A66-43077
- ATMOSPHERIC CONDITION EFFECT**  
**SA WEATHER FORECASTING**  
 Atmospheric conditions effect on supersonic jet traffic 02 p0178 A66-12030  
 Determination of contrast range of optical images obtained in aerial camera as function of atmospheric and optical factors 03 p0368 A66-12504  
 Atmospheric model applied to fogs forming in valley bottoms and data acquisition in connection with this phenomenon 03 p0389 A66-12705  
 Changes in apparent radio path length of ground-to-ground microwave links caused by atmospheric changes 04 p0481 A66-13730  
 Propagation of optical waves through atmosphere, considering attenuation of optical waves and noise generation 04 p0545 A66-13756  
 Automatic atmospheric measuring system at Marshall Space Flight Center 05 p0661 A66-15485  
 Extensive air showers and intensity of cosmic rays of moderate energy 06 p0949 A66-16586  
 Solar absorptance and thermal emittance of vacuum-deposited aluminum, zinc oxide-potassium silicate white paint and high emissivity black paint after exposure to salt atmosphere [AIAA PAPER 66-41] 07 p1053 A66-17892  
 Effect of space environment on ceramic materials, considering atmosphere /including vacuum/, thermal, radiation and meteoroid environments 07 p1147 A66-18307  
 Two-year study of solar seeing conditions with recording monitor near Sydney, Australia indicates average of 23 sec per hour of observation 11 p1768 A66-22365  
 Meteorological effects on atmospheric concentrations of radon beta activity in ground proximity, noting effects of wind, temperature, radioactive precipitation and atmospheric scavenging 11 p1731 A66-23489  
 Magnetospheric and upper atmospheric meteorological effects on cosmic ray intensity variation and solar corpuscular streams 12 p1940 A66-24163  
 Factors connected with atmospheric dynamic processes, applying hydrodynamic equations to wind field and pressure field variations 12 p1909 A66-24786  
 SST flight performance as affected by wind, temperature and radiation 14 p2224 A66-28233  
 Preference of mice for oxygen-poor atmosphere after removal from 60 and 90 percent oxygen atmospheres 15 p2439 A66-29489  
 Thunderlike acoustic effects associated with extinction of meteors 16 p2796 A66-30272  
 Barotropic atmospheric model for forecasting in tropics, discussing wind analysis area covered, accuracy, etc 17 p2948 A66-31943  
 Effect of stratified atmospheric models on sonic boom generated by aircraft in steady level flight, using propagation of weak shock waves theory as base for analysis 17 p2847 A66-33024  
 Sonic boom phenomena, noting atmospheric dynamic effects, acceleration and lateral spread, variations in pressure signatures, etc 17 p2847 A66-33026  
 Regression calculations correlating daily average meson intensity with barometric pressure, atmospheric temperature and neutron monitor intensity 18 p3195 A66-34862  
 Daily correction of meson diurnal variation for ground-level air temperature and barometric pressure effects 18 p3195 A66-34863  
 Energy spectrum of cosmic ray diurnal variation determined from IGY neutron monitor data by introducing upper energy cut-off parameter 18 p3195 A66-34864  
 Altitude distribution of combinations of meridional gradients of pressure, temperature and density 19 p3393 A66-35394  
 Morning humidity variation relation to dew content and visibility of atmosphere, noting role of water vapor 19 p3393 A66-35395  
 Coherent laser light use in atmospheric communications system, discussing effect of atmospheric turbulence and small vibrations on coherent detection efficiency and SNR 20 p3511 A66-36930  
 Polar cap absorption and upper atmosphere solar-terrestrial disturbances due to solar flare and type IV outburst 20 p3636 A66-38227  
 Biological effect of atmospheric conditions and physical and psychological factors on living organisms 24 p4165 A66-43134
- ATMOSPHERIC CONDUCTIVITY**  
 LF anisotropic electric conductivity in upper atmosphere, noting Hall current 08 p1214 A66-19050  
 Weather forecasting from atmospheric electric conductivity measurements, noting polarization by neutrinos 11 p1729 A66-22865  
 Radiative energy transfer between concentric spheres separated by absorbing and emitting gas, noting analogy to atmosphere with spherical symmetry 15 p2615 A66-28620  
 Laser communications system design, describing range equation, modulation and detection techniques, atmospheric effects, etc 20 p3515 A66-37257  
 Optical communication systems, discussing available equipment, transmission characteristic, lack of long distance operation reliability, etc 24 p4174 A66-42805
- ATMOSPHERIC DENSITY**  
**SA SPACE DENSITY**  
 Atmospheric density and heating as function of altitude determined from satellite drag measurements [AIAA PAPER 65-507] 01 p0134 A66-10192  
 Formula for average rate of atmospheric particle fallout in terms of height-averaged values of density and viscosity of atmosphere 01 p0097 A66-10760  
 San Marco project, joint effort of NASA and Italian Space Commission to launch satellite for atmospheric and ionospheric measurements 01 p0143 A66-10809  
 Atmospheric density calculations from observing Sputnik III satellite, examining solar activity effect 03 p0361 A66-12624  
 Increased diurnal amplitude in density of thermosphere between 200 and 300 km for decreasing solar activity 05 p0671 A66-15019  
 Seasonal variation in short-wave signal absorption at different latitudes reflected in seasonal variation of gas density and ionospheric absorption at D region and lower E region 05 p0672 A66-15025  
 Atmospheric density effects on frequency of extensive air showers 06 p0948 A66-16578  
 First-order perigee to perigee changes in nonequatorial orbital elements due to spherical, rotational, exponential, time-invariant atmospheric drag 06 p0955 A66-16909  
 Contraction of satellite orbits due to atmospheric drag, extending theory to atmosphere with day-to-night sinusoidal variation with air density 07 p1132 A66-17256  
 Effect of Earth oblateness on lifetime of satellite in time-varying atmospheric density [AIAA PAPER 66-63] 07 p1139 A66-18451  
 Static diffusion models of upper atmosphere with density and composition determined for wide exospheric temperature ranges 09 p1370 A66-19901  
 Earth atmosphere physical properties including temperature, density, pressure and water vapor 09 p1398 A66-20270  
 Lower atmospheric density measurements through light scattering from Q-spoiled ruby laser beam, using optical radar detector 09 p1373 A66-20398  
 Shock wave propagation in atmosphere whose density is exponentially decreasing 09 p1367 A66-20405  
 Atmospheric structure in lower thermosphere, examining grenade clouds to determine density 09 p1375 A66-20892  
 Atmospheric density distribution at altitude from 200 to 300 km, based on Soviet satellite observations during minimum solar activity 09 p1375 A66-20990  
 Wave reflection in density-inhomogeneous atmosphere from plane solid obstacle larger than wavelength 11 p1735 A66-22601  
 Existence of significant latitudinal variation in density from 200 to 800 km 12 p1868 A66-23554  
 Data on satellite orbits used for Earth figure, upper atmosphere density, solar radiation, etc, 12 p1868 A66-23637  
 Upper atmosphere temperature, pressure and density determined by photographic observations of meteors, based on calculating height of homogeneous atmosphere 12 p1870 A66-24299  
 Atmospheric environment effects on Saturn IB launch vehicle design, showing density profiles for various altitudes and listing extremes of thermodynamic variables at specific altitudes [AIAA PAPER 66-347] 12 p1906 A66-24477  
 U.S. Standard Atmosphere supplements 1966 [AIAA PAPER 66-342] 12 p1906 A66-24488  
 Rocket observation of atmospheric density at high latitudes in Arctic and Antarctic locations [AIAA PAPER 66-345] 12 p1872 A66-24488  
 Atmospheric density models for solar radiation cycle variation in upper atmosphere [AIAA PAPER 66-355] 12 p1951 A66-24499  
 Mars atmosphere and ionosphere analyzed by measuring effect on radio occultation of planet, determining shape, atmospheric density profile, diurnal variations, etc 13 p2178 A66-25230  
 Falling sphere, solar XUV radiation absorption and pressure gauge mass spectrometry for density measurements of thermosphere, comparing results and noting discrepancies 14 p2284 A66-27611  
 Air density at heights near satellite perigee by analyzing changes in satellite orbit 14 p2382 A66-27616  
 Distribution and variation of atmospheric density over thermosphere, including auroral region, noting wind motion and high altitude circulation 14 p2382 A66-27616  
 Density variation observed from satellites in upper atmosphere 14 p2284 A66-27611  
 Density distribution in exosphere, particularly Maxwellian velocity distribution disturbed by light particle escape 14 p2284 A66-27620  
 Mass spectrometry of composition and density of neutral atmosphere, noting diffuse separation of gases 14 p2285 A66-27622  
 Formula for average rate of atmospheric particle fallout in terms of height-averaged values of density and viscosity of atmosphere 14 p2327 A66-27859  
 Atmospheric drag effect on satellite trajectories in eccentric orbits, assuming spherical atmosphere with exponentially distributed density 14 p2384 A66-27882  
 Meteor luminosity/ionization ratio dependence on air density found through analysis of ablation rate of meteor 14 p2387 A66-28177  
 Energy spectrum of primary photoelectron using data from atmospheric density distribution, fluxes of solar XUV radiations and absorption and ionization cross sections 15 p2574 A66-28906  
 Density, temperature and wind data of strato- and mesosphere, together with water vapor measurements in central tropical Pacific, using rocket and balloon soundings 15 p2485 A66-28937  
 Rejection of Jones ionospheric mode where Venus microwave emission is attributed to free-free electron emission analyzing formation of dense Cytherean ionosphere 15 p2597 A66-29258  
 Extensive air showers at various atmospheric depths analyzed, using hodoscope counters and ionization chambers, noting differential spectra of densities 15 p2580 A66-29526  
 Drag coefficients and absolute atmospheric densities at high altitudes calculated, using spin and orbital decays of Explorer VI satellite conjugated with models of surface particle interaction 15 p2489 A66-29818  
 Latitudinal and seasonal variations in atmospheric densities during low solar activity obtained by inflatable air density satellites 15 p2490 A66-29819  
 Seasonal-latitudinal variations in lower

- thermospheric density, temperature and composition 15 p2490 A66-29820
- Shape and location of diurnal bulge in upper atmosphere, analyzing density and temperature distribution at high latitude from satellite drag data 15 p2490 A66-29821
- Falling sphere measurements of atmospheric density, noting temperature and density profiles, pressure distribution, etc 15 p2494 A66-30041
- Mars atmospheric density determined from photoelectric measurements of eclipses of Phobos 15 p2604 A66-30049
- Cosmos satellite observational values of atmospheric density during low solar activity 15 p2496 A66-30083
- Day-to-night and semiannual variations in exospheric density during low solar activity from observations of Echo II orbital period changes 15 p2497 A66-30084
- Atmospheric density statistics from cumulative frequencies for seasons as function of altitude for design of booster vehicles 16 p2741 A66-30602
- Anderson hypothesis on semiannual variation in upper atmosphere density and relation to geomagnetic latitude effects, analyzing Samos II motion 17 p2920 A66-33087
- Atmospheric density measurements for altitudes up to 74 km from X-15 flights using stagnation pressure method [AIAA PAPER 66-441] 18 p3104 A66-33646
- Upper atmospheric density determination from data of satellite orbit evolution, noting effect of solar activity 19 p3343 A66-35253
- Falling sphere experiment instrumentation for aerospace density determination including sensor, transit-time accelerometer and telemetry system 19 p3356 A66-35672
- Atmospheric density and scale height from satellite 1964-30A decay 19 p3463 A66-35922
- Meteorological rocket measurements of diurnal oscillations of pressure and density in upper stratosphere and lower mesosphere 20 p3551 A66-37515
- Least squares iterative procedure for resolving individual particle distributions comprising model atmosphere density profile above 110 km 20 p3551 A66-37516
- Processing of satellite observations obtained within INTEROBS program dealing with atmospheric density determination and calculation of satellite orbital elements 20 p3518 A66-37847
- Upper atmospheric density determination on basis of changes in orbital elements of artificial Earth satellites 20 p3553 A66-37850
- Satellite orbit determination and air density and scale height analysis, using visual observation 23 p4128 A66-41359
- Time dependent behavior of temperature and density in monoconstituent atmosphere under diurnal photoheating and cooling by conduction, analyzing effect of atmosphere rotation eastward 23 p4064 A66-41678
- ATMOSPHERIC DIFFUSION**
- Diffusion from elevated point source into turbulent atmosphere flow over horizontal ground 01 p0061 A66-10483
- Diffusion of heavy contaminant in turbulent atmosphere, approximating vertical wind profile and turbulent diffusion coefficient by power functions of height 01 p0096 A66-10754
- Vertical and horizontal turbulent diffusion in lower atmospheric layer as two-layer problem 04 p0513 A66-13442
- Observed and predicted standard deviations compared for cross-wind deposits 04 p0541 A66-13670
- Diffusion of toxic fumes driven by winds of variable velocity from given site over irregular terrain 10 p1553 A66-21580
- Model of high energy collision processes, based on terms of four-momentum transfer and spectra variation, used for calculation of atmospheric diffusion of heavy triplets produced by primary cosmic radiation 11 p1741 A66-23190
- Atmospheric diffusion study to determine toxic hazard exclusion distances for rocket launching personnel under operating conditions [AIAA PAPER 66-376] 12 p1907 A66-24502
- Ablation particulate dispersion in atmosphere estimation by calculating particle deposit concentration at Earth surface [AIAA PAPER 66-379] 12 p1951 A66-24504
- Light diffusion of Martian atmosphere measured by spectroscopic evaluation of polarization variation from disk center to edge 13 p2181 A66-25461
- Concentration distribution at Earth surface associated with precipitation of cloud of interacting particles forming dust source, due to turbulent scattering in time and space 13 p2122 A66-26248
- Diffusion of heavy contaminant in turbulent atmosphere, approximating vertical wind profile and turbulent diffusion coefficient by power functions of height 14 p2326 A66-27853
- Average rate of eddy mixing obtained from some eddy transport problems in thermosphere, noting molecular diffusion 15 p2490 A66-29945
- Atmospheric diffusion coefficients by measuring radial growth of chemiluminous trails deposited in upper atmosphere 16 p2695 A66-30712
- Atmospheric decay of rocket-released Li due to diffusion, wind and chemical reaction 16 p2697 A66-31008
- Vertical atmospheric distribution of Rn, Tn and short-lived decay products under stationary conditions 16 p2698 A66-31345
- Terrestrial aureole structure in daylight, twilight and night and explanation for luminous particles observed in wake of Voskhod spacecraft 19 p3347 A66-35646
- Altitude of lower cloud boundary functional correlation with atmospheric parameters obtained from numerical weather forecast 20 p3593 A66-38366
- Meteorological characteristics for atmospheric boundary layer under stationary conditions, considering thermal stability and turbulent energy 20 p3593 A66-38367
- Molecular diffusion coefficient calculated in 130-200 km region from time variation of radiance distribution from glow clouds produced by grenade detonation 21 p3734 A66-39339
- Concentration distribution at Earth surface associated with precipitation of cloud of interacting particles forming dust source, due to turbulent scattering in time and space 22 p3942 A66-39710
- Effective diffusion cross section for meteor atoms in atmosphere, using Thomas-Fermi-Dirac and dumbbell molecule models 22 p3983 A66-40764
- Upward heat flux with vanishing counter potential temperature gradient in lower atmosphere and in laboratory experiments 24 p4202 A66-42983
- ATMOSPHERIC ELECTRIC FIELD**
- Lightning discharges investigated by oscillographic method in field laboratory at Pirkuli in 1963 01 p0096 A66-10191
- Particle-field interaction in magnetosphere discussing categories, properties, scale model experiments, etc 03 p0363 A66-12646
- Electrical effect of large meteorite moving in lower atmosphere 04 p0577 A66-13846
- Electrostatic fluxmeter measuring electrostatic field in atmosphere 04 p0523 A66-14307
- Precipitation formation considering collision efficiency of different-size droplets, noting influence of gravitational and electric fields, space charge, atmospheric turbulence, etc 06 p0905 A66-16269
- Electrical structure of thunderstorms, particularly weak portion of squall line thunderstorm complex, using aircraft photography, radar data, etc 06 p0905 A66-16270
- Ionospheric plasma diffusion, noting electric field effect in derived equation of continuity for F region 08 p1215 A66-19206
- True height variations of F-2 layer for bay disturbances of geomagnetic field obtained from ionograms, assuming they are caused by horizontal electric field 08 p1216 A66-19213
- Design feasibility of dipole antenna for measuring electric fields at VLF from satellite moving through ionosphere 09 p1340 A66-19848
- Magnetospheric electric fields, noting implications of magnetic storm theories 10 p1528 A66-21149
- Strong electric-field radiosonde for thunderclouds, noting sounding results 11 p1725 A66-22198
- Doppler frequency changes in vertically incident and reflecting sounding wave associated with geomagnetic disturbances yields information on ionospheric electric field 14 p2234 A66-26856
- Meteor stream effect on atmospheric electric field variation 14 p2284 A66-27543
- Electrostatic fluxmeter measuring electrostatic field in atmosphere 14 p2297 A66-28220
- Correlation between clear air turbulence and aircraft electrical activity, describing corona discharges from DC-8 tail antenna 15 p2426 A66-28922
- LF electrostatic field characteristics of clear air turbulence, noting theory and application of field sensing antennas, turbulence generated signals, etc 15 p2532 A66-28923
- Critical electric field for charged droplets atomizing, noting spark discharge and ion concentration in clouds 16 p2742 A66-31109
- Lightning flash mechanisms and electric field strengths in clouds 21 p3759 A66-38533
- Atmospheric electric field change compensation during measuring air-Earth ionic conduction and electron precipitation current densities 22 p3920 A66-40804
- Meteor stream effect on atmospheric electric field variation 24 p4198 A66-42327
- ATMOSPHERIC ELECTRICITY**
- SA LIGHTNING**
- Electric conductivity, electric field and space charge of atmosphere under fair weather or thunderstorms 09 p1371 A66-20275
- Tornado dehydration and burning effects in terms of conventional hot wind mechanism, corona discharge mechanism and new ring-current mechanism 13 p2122 A66-26126
- Giant-pulse laser-induced atmospheric electric breakdown causing optical frequency discharge 13 p2134 A66-26194
- Atmospheric electrode effect equations solved for case with no nuclei and convection and constant ionization 17 p2922 A66-33350
- Atmospheric electrode effect where condensation nuclei are present 17 p2922 A66-33351
- Autocorrelation statistical method applied to atmospheric electricity 17 p2923 A66-33363
- Photometric studies of lightning with correlated photographs of discharge channels to determine photoelectric pulse profile characteristics 18 p3129 A66-34018
- Sferics from lightning from warm cloud, noting microsecond pulse-train format and temporal duration 22 p3942 A66-39678
- Visibility and small ion density correlated by comparing light scattering with ion attachment processes on airborne scatters 23 p4065 A66-41842
- ATMOSPHERIC EMISSION**
- SA AIRGLOW**
- Terrestrial albedo of 40 to 190 kev X-rays measured, using directional detectors at balloon altitude 03 p0419 A66-12683
- Spectral emissivity calculations for parallel bands of carbon dioxide at 4.3 microns between 150-600 degrees K, comparing experimental measurements with theoretical calculations 03 p0393 A66-13104
- IR emission observation used to deduce composition, temperature and energy budget of stratosphere and mesosphere 05 p0672 A66-15024
- Airborne measurement of microwave emission from Earth surface and atmosphere for potential application of radiometry to weather satellite reconnaissance 05 p0675 A66-15765
- Statistical radio emission characteristics of cloudy atmosphere 06 p0837 A66-17181
- Space correlation of main emission lines for night sky emission spectra and altitude distribution of sodium luminescence 15 p2495 A66-30060
- Naturally occurring electromagnetic radiation in audiofrequency range studied at Kiruna Geophysical Observatory 16 p2691 A66-30232
- Spectral lines in atmospheric emission during day and night airglow in review of

published works 17 p2917 A66-32026  
 Atmospheric radio noise variations at LF  
 noting daytime increases, distribution of  
 mean source localizations, solar activity  
 effect, etc 18 p3104 A66-33960  
 Statistical radio emission characteristic of  
 cloudy atmosphere 19 p3297 A66-35539  
 ULF radio emission of upper atmosphere  
 and other related geophysical phenomena,  
 analyzing hisses, choruses and contribution  
 to Earth radiation belt 20 p3551 A66-37487  
 Search for 22.235 gc/s emission line from  
 stratospheric water vapor, noting absence of  
 noise temperature enhancement 22 p3916 A66-40810  
 Temperature profiles across argon plasma  
 arc calculated from measured radiation  
 intensities at arc currents from 1 to 400  
 amp 23 p4104 A66-41495  
 Altitude profiles for dayglow emissions  
 excited by molecular ion dissociative  
 recombination, solar radiation fluorescence,  
 oxygen photodissociation, electron collisions  
 and chemical reactions 23 p4064 A66-41680

**ATMOSPHERIC ENERGETICS**  
 Acoustic, gravitational and gyroscopic  
 oscillation spectra of baroclinic atmosphere  
 over rotating spherical Earth with emphasis  
 on energy composition 01 p0062 A66-10858  
 Coupling coefficients in high energy region  
 of Earth atmosphere, considering  
 interactions between primary nucleons and  
 nuclei of air atoms 06 p0950 A66-16594  
 Atmospheric energetics during January-  
 February 1963 stratospheric warming  
 investigated, using spectral energy equations  
 for zonal and eddy kinetic and potential  
 energies 07 p1027 A66-17360  
 Heat transfer and mass flux expressions  
 for recombination interactions at solid-gas  
 interface due to transport of atomic and  
 ionized particles to spacecraft in  
 ionosphere 08 p1161 A66-18747  
 Kinetic energy variations in different parts  
 of baric centers during atmospheric  
 motion 08 p1217 A66-19301  
 Charge transfer and charge rearrangement  
 in atmospheric ion-neutral particle  
 collisions 10 p1557 A66-21143  
 Differential equations describing air  
 movement, heat exchange and exchange of  
 moisture 11 p1730 A66-22942  
 Energy conversion between four different  
 forms of kinetic energy in  
 atmosphere 15 p2489 A66-29662  
 Generalized vertical coordinate system for  
 application in atmospheric  
 dynamics 18 p3129 A66-33965  
 Kinetic energy variations in different parts  
 of baric centers during atmospheric  
 motion 19 p3348 A66-36038  
 Differential equations describing air  
 movement, heat exchange and exchange of  
 moisture 20 p3593 A66-37855  
 Frontogenetic potentialities of wind  
 deformation fields determined, using  
 mathematical model of  
 atmosphere 24 p4234 A66-42979

**ATMOSPHERIC ENTRY**  
 Theoretical and experimental work in flow  
 field analysis has enhanced ability to predict  
 aerodynamic heating in atmospheric  
 entry 01 p0143 A66-10800  
 Planetary entry trajectory control of  
 manned vehicles for Earth and Mars  
 atmospheres 03 p0431 A66-12741  
 Orbiter injected sterilized ballistic skipout  
 capsule for in-flight Martian stratosphere  
 measurements, using nonablative heat shield  
 and outside atmospheric propulsion  
 maneuvers [AIAA PAPER 65-23] 03 p0431 A66-12764  
 Glider reentry descent trajectories from  
 near Earth orbit calculated, emphasizing  
 landing accuracy and mechanical and  
 thermal stresses 04 p0584 A66-13525  
 Calculating meteor braking from  
 theoretical and observational data, showing  
 braking dependence on zenith  
 distance 04 p0577 A66-13844  
 Meteor radiation curves showing that  
 integral radiation calculated for  
 nondisintegrating meteoric body is greater  
 than observed radiation 04 p0577 A66-13845  
 Convective and radiative heat transfer  
 during atmospheric reentry examined, using  
 double-diaphragm shock tube operated in  
 expansion tube mode 11 p1684 A66-22828

Aerodynamic analysis of vapor pressure of  
 tektite glass and bearing on atmosphere  
 entry trajectories of 12 p1952 A66-24895  
 Aerodynamic heating of vehicles entering  
 Earth atmosphere at hypersonic speed,  
 noting blunt body concept, radiative and  
 convective heating, heat shield weights,  
 etc 13 p1989 A66-25153  
 High-temperature gas radiance in simulated  
 planetary atmosphere at various entry  
 velocities 13 p1990 A66-25169  
 [AIAA PAPER 66-183] Manned Mars entry and landing, discussing  
 aerobraking as feasible entry 13 p1991 A66-25272  
 mode Problem of operational flexibility in Mars  
 landing mission, discussing use of lifting  
 vehicles 13 p1991 A66-25273  
 Mars atmospheric composition and laminar  
 convective heating and ablation studied to  
 predict performance of heat protection  
 systems during entry 13 p2208 A66-25274  
 Inviscid equilibrium gas stability  
 characteristics for pointed and spherically  
 blunt bodies in unsteady supersonic flight in  
 Mars atmosphere 13 p1991 A66-25275  
 Monograph on atmospheric reentry,  
 discussing reentry trajectories, atmospheric  
 kinematics, reentry flow fields,  
 etc 13 p1993 A66-26466  
 Hypersonic wake studies in ballistic missile  
 research program, discussing reentry of  
 hypervelocity vehicles, laminar flow,  
 atmospheric turbulence, 14 p2218 A66-27402  
 Recovery of interplanetary vehicles by low  
 thrust braking outside 14 p2391 A66-27472  
 atmosphere Global coverage by banked aeroglide  
 atmospheric entry from spherical Earth  
 analysis of bank-speed schedule and  
 necessary L/D 14 p2395 A66-28453  
 Reentry scattering due to equilibrium  
 incidence without using Allen  
 hypothesis 16 p2796 A66-30315  
 Material properties and thermal inputs on  
 heat shields for Mars entry, noting  
 importance of insulation vs ablation due to  
 uncertainties in radiant heating  
 inputs 16 p2809 A66-30895  
 Terrestrial origin of tektites, noting  
 possible connection with cometary collision  
 and evidence of lunar origin for  
 some 16 p2802 A66-30926  
 Wind tunnel test of dynamic stability  
 characteristics of spherically blunted 10  
 degree cones [AIAA PAPER 66-465] 17 p2841 A66-32764  
 Second-order theory used to provide nearly  
 exact solution for entry mechanics including  
 solution of nonoscillating and oscillating  
 trajectories [AIAA PAPER 66-488] 17 p3016 A66-32771  
 Oscillatory motion of angle of attack for  
 space vehicles entering Earth atmosphere at  
 hypersonic speeds from satellite 17 p3016 A66-32893  
 Oscillatory trajectories in atmospheric  
 entry of lifting vehicles at subcircular  
 speeds and constant angles of attack with  
 initial conditions deviating from equilibrium  
 glide 17 p3016 A66-33065  
 Basic shock layer radiation data obtained  
 in shock tube and free-flight ballistic range  
 facilities, applicable to Venus or Mars  
 atmosphere entry [AIAA PAPER 66-421] 18 p3046 A66-33641  
 Optimum entry vehicle design using  
 aerobraking for manned Earth entry at  
 hyperbolic speeds, examining blunted conic,  
 biconic and tetrahedral configurations  
 [AIAA PAPER 66-489] 18 p3239 A66-33657  
 Friable structure of meteorites, examining  
 disintegration under aerodynamic pressure  
 in atmosphere 18 p3227 A66-33838  
 Simulator results on guidance and control  
 during supercircular atmospheric entry  
 maneuvers 18 p3244 A66-33878  
 Atmospheric reentry trajectory of space  
 vehicle at orbital velocities and constant  
 lift-drag ratio 18 p3244 A66-33879  
 Disintegration of meteoric bodies in  
 terrestrial atmosphere, disputing conclusion  
 of Kramer 19 p3455 A66-35271  
 Figure that results from disintegration of  
 package of plates during fall through  
 atmosphere, deriving equations for

rotational motion of 20 p3493 A66-38118  
 plates Approximate atmospheric stability of  
 aerodynamic entry trajectories  
 on cylindrical planet, noting minor circle  
 turn maneuver and bank angle  
 schedule 21 p3811 A66-38705  
 Meteorite size prior to entering  
 atmosphere, noting radius and use of  
 isotope activity 21 p3812 A66-38953  
 nomogram Approximation of aerodynamic stability of  
 coasting vehicle leaving atmosphere at high  
 speeds, assuming linear theory and constant  
 aerodynamic coefficient 22 p3986 A66-40346  
 Reentry simulation systems using MHD  
 accelerators, technical difficulties,  
 performance and efficiency  
 [ICAS PAPER 66-39] 22 p3996 A66-40661

**ATMOSPHERIC HEAT BUDGET**  
 Thermal balance of Earth in light of IGY  
 data 05 p0674 A66-15223  
 Mesosphere of integral terrestrial  
 thermal radiation field determined from  
 outgoing radiation, cloudiness and satellite  
 data 07 p1029 A66-17922  
 Mesosphere of integral terrestrial  
 thermal radiation field determined from  
 outgoing radiation, cloudiness and satellite  
 data 12 p1869 A66-23883  
 Upper atmosphere radiative and heat flux,  
 balance and dynamics from balloon-borne  
 measurements 19 p3347 A66-35641  
 Monthly variations in Southern Hemisphere  
 heat budget calculated from Tiros satellite  
 radiation measurements 19 p3347 A66-35642  
 Energy and momentum budget of  
 atmosphere above tropopause determined by  
 computing momentum and heat transports  
 from wind and temperature observations up  
 to 30 km 19 p3347 A66-35643  
 Turbulence energy balance equation used  
 in air mass transformation 20 p3594 A66-38369  
 problem Solar radiation control for changing  
 meteorological conditions in lower  
 atmospheric layer 20 p3594 A66-38373  
 Angular distribution of Earth outgoing  
 thermal radiation in IR region measured by  
 geophysical rocket 22 p3913 A66-40470

**ATMOSPHERIC HEATING**  
 Atmospheric density and heating as  
 function of altitude determined from  
 satellite drag measurements  
 [AIAA PAPER 65-507] 01 p0134 A66-10192  
 Stationary heat sources effect on  
 convective fluxes in unstable  
 atmosphere 04 p0513 A66-13413  
 Cellular convection in horizontal layers  
 heated from below, noting effect of critical  
 Rayleigh number and width-height ratio of  
 cells 05 p0666 A66-14543  
 Transient behavior of heated stellar  
 atmosphere, examining unsteady flow caused  
 by sudden application of heat to static  
 adiabatic atmosphere 08 p1286 A66-18541  
 Thermospheric heating effect on F-region  
 ionization and electron density in daily basis  
 study 08 p1218 A66-19404  
 Phase difference between atmospheric  
 large-scale disturbances and heating due to  
 sea-surface evaporation and turbulent  
 exchange 11 p1694 A66-22199  
 Radiant heat flux in spectral region from 4  
 to 40 microns at various atmospheric  
 levels 11 p1698 A66-22945  
 Radiation effect on hydrodynamic shock  
 wave parameter distribution for bodies  
 entering dense atmospheric layers at  
 supersonic velocities 11 p1635 A66-23051  
 Radiant heat flux in spectral region from 4  
 to 40 microns at various atmospheric  
 levels 20 p3553 A66-37858  
 Dynamic stability of waves in stratosphere,  
 examining vertical transfer of energy from  
 troposphere to stratosphere weakened at  
 tropopause 21 p3734 A66-39219

**ATMOSPHERIC IMPURITY**  
 Gaseous impurity distribution /oxygen/  
 between scale and diffusion layer after heat  
 treatment of various titanium  
 alloys 05 p0699 A66-14700  
 Deposition of black magnetic spherules  
 from atmosphere at two stations in New  
 Mexico believed to be of extraterrestrial  
 origin 09 p1370 A66-19879  
 Kinetics of oxidation of various  
 atmospheric contaminants over several  
 catalysts tested in catalytic reactor

[AICE PREPRINT 26C] 10 p1491 A66-21190  
Kinetics of oxidation of various  
atmospheric contaminants over several  
catalysts tested in catalytic reactor  
[AICE PREPRINT 26C] 17 p2888 A66-32680  
Impurities effect on electrical conductivity  
of air between 1000 and 10,000 degrees  
K 19 p3406 A66-35743  
Bomb debris motion following Star Fish  
test, noting formation of MHD shock wave,  
production of stationary plasma through X-  
ray ionization and collision in neutral  
air 20 p3644 A66-38345  
Gerdien-condenser rocketborne probe used  
to measure ion densities in D region of  
atmosphere 22 p3905 A66-39947  
**ATMOSPHERIC IONIZATION**  
Tropospheric ion mobility distribution,  
conductivity and densities above exchange  
layer 02 p0222 A66-11824  
D-region atmospheric processes such as  
electron attachment, photo and other  
detachment processes, recombination and  
neutralization as studied in  
laboratory 03 p0362 A66-12640  
Particle bombardment produces ionized  
layers in high latitude ionosphere similar to  
sporadic E layers of lower  
latitudes 03 p0363 A66-12657  
Ionic reactions and photoionization  
processes in D, E and F regions of  
ionosphere 03 p0365 A66-12874  
Ionizing radiation as potential lightning  
hazard, noting lightning protection device  
for medical and industrial  
buildings 03 p0423 A66-13266  
Correlation dependence of F-2 layer on  
solar wave energy entering Earth  
atmosphere 04 p0515 A66-13850  
French FR-1 satellite for observation of  
ionized layers of atmosphere by propagation  
of VLF waves in  
ionosphere 04 p0586 A66-14385  
Atmospheric ionization, discussing  
formation of different ionospheric  
regions 05 p0675 A66-15744  
Hypersonic wake ionization dependence on  
ablation products, investigating laminar and  
turbulent flow regions  
[AIAA PAPER 65-54] 05 p0793 A66-15778  
Ultrahigh-energy primary cosmic ray  
particle interactions cause electron photon  
cascades and muon  
emission 07 p1117 A66-17570  
Extensive air shower high energy gamma  
rays in upper third  
of  
atmosphere 07 p1118 A66-17575  
Mean free path for nucleon-light atom  
interaction changed from 75 to 90 g/sq cm  
affecting air shower  
characteristics 07 p1118 A66-17575  
Papers on interactions of space vehicles  
with ionized atmosphere 08 p1302 A66-18742  
Shock wave induced thermal ionospheric  
ionization from Tungusk explosion of 1908,  
with recalculation of shock  
magnitude 08 p1290 A66-19053  
Position determination of equatorial  
boundary of abnormally high nocturnal  
atmospheric ionization for various levels of  
planetary magnetic  
activity 08 p1221 A66-19793  
Ionospheric ionization  
physics 09 p1371 A66-20279  
Upper atmospheric parameters that control  
daytime electron density distributions in F-1  
region determined with use of N/h/  
profiles 09 p1372 A66-20369  
Dayglow at 6300 and 3914 angstroms from  
rocket soundings and roles of ion  
recombination and UV  
dissociation 09 p1374 A66-20887  
Bremsstrahlung produced during stoppage  
of electrons generated by thunderstorms can  
create ionized columns extending to  
ionospheric heights 10 p1529 A66-21158  
Equilibrium theory of ionization transport  
in ionosphere predicts tendency for thin  
layers of overdense ionization to form in E  
region 10 p1531 A66-21279  
Surface boundary layer charge of  
isothermal atmosphere of fully ionized  
equilibrium plasma in gravitational  
field 10 p1609 A66-21813  
Anomalous ionization of lower ionosphere  
at medium latitudes during worldwide  
geomagnetic storm result in increased radio  
wave absorption in

ionosphere 11 p1696 A66-22416  
Lower ionosphere ionization for quiet and  
disturbed Sun calculated for comparison of  
experimental and theoretical values for  
electron concentration and effective  
recombination 11 p1696 A66-22417  
Outer radiation belt particle penetration  
into stratosphere, accounting for increased  
total ionizing radiation recorded at  
Murmansk 11 p1762 A66-22426  
Critique of local ionospheric electron  
concentration determined by dispersion  
method with aid of satellite and new  
ionization maximum 11 p1697 A66-22428  
Substantiating possibility of determining  
local electron concentration by dispersion  
method with aid of satellites and new  
ionization maximum 11 p1697 A66-22429  
Chemical and photochemical reactions  
controlling ion composition of atmosphere  
between 150 and 300 km 11 p1699 A66-23041  
Meteor trail formation by ionization,  
examining HF radio wave reflection in  
communications field 12 p1947 A66-23795  
Wind velocity measurement using radar  
detection of artificially ionized air column  
by radioactive source 12 p1908 A66-24516  
[AIAA PAPER 66-404] 12 p1908 A66-24516  
Threshold data for ruby and neodymium  
laser pulse-induced breakdown in Xe, Ar,  
Kr, Ne, He, oxygen, nitrogen, air and carbon  
dioxide 13 p2100 A66-26191  
Sporadic E ionization, considering sheets  
and winds 14 p2282 A66-26854  
Extraterrestrial dust as possible cause of  
background ionization and stratification in  
sporadic E layer 14 p2282 A66-26855  
Plasma due to high-altitude nuclear  
explosion and effect on radar  
propagation 14 p2237 A66-27510  
Stratospheric small-ion density  
measurement from high-altitude jet aircraft,  
noting dust effect 14 p2297 A66-28334  
E layer ionization and characteristic  
number as affected by solar X radiation in  
44-60 angstrom range 15 p2487 A66-29097  
Frequency correlation of ionospheric radio  
waves in inhomogeneous thin layer medium  
and effect of irregular horizontal ionization  
gradients 15 p2451 A66-29111  
Ion composition and effective  
recombination coefficient variation of  
ionosphere in study of X and UV radiation  
ionization of E layer 15 p2495 A66-30059  
Mass spectrometric investigations of  
interaction of atmospheric ions with  
molecules of rocket gas  
release 15 p2495 A66-30061  
Maximum ionization in ionospheric F  
region around geomagnetic equator, noting  
instruments and observed  
variations 16 p2697 A66-30995  
E-2 layer of atmosphere, discussing  
maxima, minima, variations and shielding  
effect of E-layer 17 p2918 A66-32877  
Cosmic radio wave absorption dependence  
on frequency and number of electron-ion  
collisions during atmospheric magnetic  
storms 19 p3344 A66-35267  
Rocket probe measurements indicate  
existence of maximum ion concentration in  
stratosphere and lower ion concentration at  
equator than at  
midlatitudes 19 p3345 A66-35288  
RF mass spectrometer with small  
dimensions and power requirements and  
high sensitivity designed for analysis of  
upper atmosphere ion and neutral  
composition 19 p3353 A66-35289  
Aerobee rocket measurement of nitric  
oxide in upper atmosphere, noting  
fluorescence in airglow layer, emission rate  
factors and NO densities 19 p3349 A66-36351  
Siting of static discharger to control  
nature and occurrence positions of coronas  
to minimize RF noise capable of causing  
hazard to aircraft navigational aid  
systems 19 p3282 A66-36752  
Air ionization effect on vigilance task  
performance, noting smaller decrement for  
environment containing negative  
ions 20 p3504 A66-36933  
Anomalous enhancement of F-2 ionization  
in high latitude around geomagnetic noon  
due to formation of irregularity or new  
layer around locality 20 p3658 A66-38234  
Upper atmospheric parameters that control  
daytime electron density distributions in F-1

region determined with use of N/h/  
profiles 20 p3636 A66-38235  
Position determination of equatorial  
boundary of abnormally high nocturnal  
atmospheric ionization for various levels of  
planetary magnetic  
activity 21 p3733 A66-38789  
Height distributions for atmospheric  
ionization rate and Balmer radiation  
resulting from precipitation of auroral  
protons 21 p3734 A66-39338  
Ionization and constitution of neutral  
atmosphere, including solar EUV, X-ray and  
corpuscular sources 22 p3905 A66-39944  
Riometric data on ionospheric absorption  
applied to determination of dissociative  
recombination coefficient, noting  
atmospheric ionization by fragment gamma-  
radiation 22 p3973 A66-40468  
Ionic reaction in nitrogen-oxygen system,  
discussing reactions of He and N  
ions 23 p4063 A66-41039  
Variation in energy of energetic electron  
precipitating into atmosphere as function of  
initial energy, pitch, angle and altitude,  
neglecting scattering  
effect 24 p4262 A66-42463  
Pressurized Ar-filled ionization chamber  
response to charged particles in cosmic  
radiation determined as function of  
atmospheric depth 24 p4264 A66-42604  
High energy particle interactions initiate  
large ionization bursts, noting pion  
production 24 p4267 A66-42907  
Extent of maximum in altitude dependence  
curve for extensive air showers, noting  
energy dissipation among secondary  
particles 24 p4270 A66-42927  
**ATMOSPHERIC MOISTURE**  
**S HUMIDITY**  
**ATMOSPHERIC NEUTRON FLUX**  
Neutron flux in atmosphere measured by  
method of indium  
activation 02 p0284 A66-12130  
Detection of slow neutrons escaping from  
atmosphere by counters filled with boron  
fluoride onboard high altitude  
balloons 05 p0754 A66-15401  
Neutron albedo flux at 45 degree  
geomagnetic latitude 07 p1121 A66-17982  
Neutron intensity increase observed by  
boron fluoride proportional counter at high  
altitude associated with auroral zone X-ray  
event 07 p1121 A66-17983  
Intensity of cosmic ray alpha particles on  
July 16, 1959 when counting rates of  
neutron monitors were near absolute  
minimum value 07 p1124 A66-17997  
High-energy neutron emission from Sun  
studied by balloon-borne nuclear emulsion  
recording of proton track colliding with  
neutron 13 p2175 A66-26349  
Neutron flux in atmosphere measured by  
method of indium  
activation 14 p2377 A66-28087  
Barometric air pressure correction anomaly  
for nucleonic component monitors, noting  
time variation in attenuation  
coefficients 18 p3194 A66-34856  
Attenuation and multiplicity effect used as  
indexes of properties of radiation recorded  
by IGY neutron monitors in lower  
atmosphere 18 p3194 A66-34859  
Modulation data for primary cosmic ray  
spectrum at low rigidities determined from  
daily latitude curves of cosmic ray nucleonic  
component obtained from IGY neutron  
monitors 18 p3194 A66-34860  
Counting rate of high latitude NM-64  
neutron monitors, examining dependence on  
atmospheric temperature and water vapor  
content 18 p3195 A66-34861  
Smooth curves of cosmic ray neutron  
component intensity variations compared  
with H component of geomagnetic field  
during IGY and IGC 18 p3196 A66-34868  
Atmospheric neutron flux measured by  
balloons, using polyethylene-moderated  
boron fluoride counter 18 p3197 A66-34875  
Low energy fast cosmic ray neutrons,  
measurements of energy spectrum and  
primary intensity variations, using organic  
scintillator in field of photomultiplier  
tube 18 p3199 A66-34885  
Solar minimum measurements of fast  
neutrons at high altitude using balloons and  
rockets carrying anthracene-plastic  
phoswich 24 p4262 A66-42293

ATMOSPHERIC NOISE  
 S ATMOSPHERICS  
 ATMOSPHERIC PRESSURE  
 SA BAROMETER  
 SA ISOBAR  
 Soviet, Swedish and Norwegian data on solar activity and barometric pressure, showing corpuscular flux effect on barometric pressure even at Earth surface 01 p0060 A66-10272  
 Survival of Earth organisms under environment simulated low pressure, low oxygen, low temperature and low extraterrestrial conditions 02 p0181 A66-11605  
 Numerical objective analysis for stratospheric constant pressure data at various levels 02 p0254 A66-11983  
 High precision digital atmospheric-pressure recorder that does not require mercury barometer readings for barogram processing 02 p0232 A66-12148  
 Temperature of hydrogen plasma jet at atmospheric pressure by measuring electric field on profile of Stark broadened line 03 p0403 A66-12973  
 Probes in atmospheric pressure argon plasma where ion diffusion is function of temperature 03 p0406 A66-13280  
 Geomagnetic relationship of daily variation of cosmic ray neutron intensity corrected for barometric pressure variation at various ground stations 03 p0423 A66-13360  
 Optimization of fin geometry to maximize free-convection heat transfer in air at atmospheric pressure [ASME PAPER 65-HT-12] 05 p0783 A66-14738  
 Atmospheric pressure variation at troposphere, relation to solar activity 05 p0759 A66-14882  
 Simulated flights evaluating verbal communication intelligibility in oxygen breathing mixtures at low atmospheric pressures compared with results obtained in room air at ground level 06 p0813 A66-16827  
 Difference between values for atmospheric pressure at Martian surface when obtained by photometry or by spectroscopy, due to nonconsideration of light scattering by aerosol particles 08 p1295 A66-19331  
 Earth atmosphere physical properties including temperature, density, pressure and water vapor 09 p1398 A66-20270  
 Earth, balloon and satellite spectroscopic observations of Mars to determine atmospheric composition and pressure at surface level 10 p1602 A66-21065  
 Book on aviation physiology including atmospheric pressure effect, visual factors in aviation, British Institute of Aviation Medicine, etc 10 p1487 A66-22104  
 Pressure cabin design and utilization, noting relation between air speed and environmental temperature on kinetic heating, contamination of cabin air, pressurization control, sealed cabin advantages, etc 10 p1492 A66-22110  
 High precision digital atmospheric-pressure recorder that does not require mercury barometer readings nor barogram processing 14 p2297 A66-28103  
 Quasi-stationary solar corpuscular fluxes, examining effect on atmospheric pressure in Earth polar cap regions 15 p2576 A66-29134  
 Distribution of solar-tropospheric disturbances over Earth surface, based on simultaneous observations of 103 U.S.S.R. stations 15 p2533 A66-29135  
 Spherical semipassive probe for density/altitude and pressure/altitude profile of planetary atmospheres, notably Mars and Venus 16 p2801 A66-30889  
 Slide-wire microbarometer with pressure changes transformed into frequency changes of output signal designed for operation on moving objects 16 p2709 A66-31795  
 Electric conductivity in low voltage atmospheric pressure gas discharge, noting Maxwellian electron density distribution 17 p2968 A66-32484  
 Hot flame gases ionization by electron reactions at atmospheric pressure 18 p3137 A66-34116  
 Barometric coefficients of Leeds IGY and NM-64 neutron monitors, noting variation from solar minimum to maximum 18 p3194 A66-34857  
 Latitude and altitude survey in North

America made by road transport carrying neutron monitor, meson telescope, mercury barometer, etc 18 p3198 A66-34879  
 Barometric effect and density spectrum of photon-initiated EAS 18 p3208 A66-35115  
 muons  
 Empirical formula for calculating surface wind conditions from barometric field 19 p3394 A66-36453  
 Comparison of magnitude of collision frequency of electrons in D and E regions obtained by satellites, rockets, etc, with cross sections measured in laboratory 19 p3352 A66-36627  
 Book on physiological responses of healthy mammals to natural changes or extremes of physical environment, considering heat, cold, light, atmospheric pressure and water 20 p3505 A66-37253  
 Meteorological rocket measurements of diurnal oscillations of pressure and density in upper stratosphere and lower mesosphere 20 p3551 A66-37515  
 Phase relationships of normal stress perturbations in cylindrical combustor operating near atmospheric pressure with premixed air and natural gas 20 p3680 A66-38038  
 Sound absorption in air at 1/3-octave frequency intervals as function of humidity and temperature at normal atmospheric pressure for studies in room acoustics 21 p3769 A66-38648  
 Increased ambient pressure effect on hearing function in divers 22 p3853 A66-39787  
 E layer properties noting role of pressure, temperature, composition and recombination coefficient when varying with height and time 22 p3907 A66-39960  
 Graphical determination of atmospheric pressure from rocketsonde temperature measurements 22 p3943 A66-40056  
 Two-layer model of pressure jump produced by mountains 22 p3944 A66-40966

## ATMOSPHERIC RADIATION

## SA SKY RADIATION

## SA STRATOSPHERE RADIATION

Angular and spectral distribution of outgoing radiation in cloudy atmosphere in spectral range beyond absorption band 01 p0133 A66-10757  
 Equations for reflecting effect of underlying surfaces on long wave radiation fluxes in free atmosphere 01 p0062 A66-10761  
 Five-year measurements of circumglobal radiation and of short wave radiation from lateral half-spaces 02 p0220 A66-11258  
 Radiation measurements made at Antarctic station at Mirny including solar radiation, total radiation and short and long wave reflection and radiation balance 02 p0220 A66-11260  
 Interpretation of inverse relationship between long-lasting radioactivity and relative humidity in near-ground layer of atmosphere 02 p0279 A66-11261  
 Atmospheric source of diurnal variation of cosmic radiation whose properties undergo substantial variation 02 p0281 A66-11337  
 Solar UV radiation measurements in stratosphere for calculating ozone production 02 p0283 A66-11573  
 Approximation of effect of albedo inhomogeneity on flux of short wave radiation leaving Earth 02 p0222 A66-11658  
 Solar radiation measurements made in four stations from 1957 to 1963 show dependence of atmospheric long-wave radiation on water-vapor pressure and cloudiness 04 p0542 A66-13818  
 Isotropic scattering of radiation from point source in finite atmosphere bounded by totally absorbing spherical shell, deriving iterative series solution 04 p0548 A66-13828  
 Dependence of vertical structure parameters of atmospheric temperature and humidity fields on atmospheric long-wave radiation field, noting transport equation 04 p0542 A66-14303  
 Time and altitude dependence of 55-mev trapped protons in South Atlantic region detected by nuclear emulsions onboard satellites 05 p0747 A66-14784  
 Atmospheric radiation calculations emphasizing carbon dioxide and nitrous oxide absorption spectrum, spectral energy distribution, quasi-statistical band model,

etc 05 p0748 A66-14918  
 Atmospheric showers and high energy nuclear-active particles 05 p0756 A66-15410  
 Atmospheric thermal radiation calculated from unresolved molecular absorption spectra of atmospheric carbon dioxide and water 05 p0675 A66-15860  
 Nuclear interaction at high energies, discussing active component structure ionization calorimeter application, energy spectrum of particles, etc 07 p1113 A66-17536  
 Ascending and descending fluxes of long wave radiation in free winter atmosphere as affected by temperature stratification, water-vapor distribution and clouds 07 p1029 A66-17923  
 Intensity variation of nucleonic component of atmospheric cosmic radiation, geomagnetic threshold rigidity and calculation of cosmic ray equator 08 p1284 A66-19398  
 Neutrino detecting equipment located in South African mine, discussing theory of neutrino production 08 p1285 A66-19600  
 Radiometersonde observations of atmospheric IR irradiance, noting measurement results with improved equipment 09 p1369 A66-19869  
 Equilibrium air total radiation mechanism, vacuum UV radiation and relation to hypervelocity entry studied, using shock tube blunt model test flow [AIAA PAPER 66-103] 09 p1469 A66-20087  
 Primary ultrahigh energy cosmic radiation composition analyzed, using Cerenkov flash 09 p1437 A66-22050  
 IR radiation source, characteristics, transmission and detection, noting atmospheric absorption and emission, IR celestial backgrounds, etc 09 p1371 A66-20277  
 Reflectivity of atmospheric shock front determined, using laser range finder and wide-bandwidth dual-beam oscilloscope 09 p1367 A66-20396  
 Angular distribution of IR radiation of Earth and atmosphere from rocket and balloon sounding 09 p1376 A66-20997  
 IR radiation in upper atm layers investigated by rocket and balloon, noting solar radiation effect 09 p1377 A66-21006  
 Interpretation of outgoing IR radiation data from meteorological satellites, including cloud cover identification and Earth surface temperature 10 p1525 A66-21046  
 Diurnal properties of horizontal geomagnetic micropulsation field in New Zealand, noting variation of period, field rotation and direction of oscillating vector 10 p1529 A66-21152  
 Meteorological satellite terrestrial UV radiation and cloud formation photographic data interpretation 11 p1728 A66-22317  
 Atmospheric high resolution transmission in carbon dioxide bands between 12 and 18 microns evaluated, using mixed Doppler-Lorentz broadening and new method for slant-path calculations 11 p1736 A66-22881  
 Radioactivity of Cosmos III satellite after U.S. thermonuclear explosion over Johnston Island 11 p1764 A66-23053  
 Ascending and descending fluxes of long wave radiation in free winter atmosphere as affected by temperature stratification, water-vapor distribution and clouds 12 p1869 A66-23884  
 Arctic short-wave atmospheric radiation absorption, long-wave radiation loss, and tropospheric radiation balance 12 p1949 A66-24203  
 Spectral and vertical distribution of atmospheric IR radiation flux divergence for five model atmospheres, noting dependence on sighting angle 12 p1874 A66-24868  
 IR radiation measurement from Earth-space transition region /project TACITE/ 13 p2192 A66-25498  
 Intensity and polarization of radiation diffusely transmitted and reflected by Rayleigh atmosphere for optical thickness from 1.0 to 10.0 13 p2072 A66-25806  
 Effect of aperture and atmospheric turbidity on readings of pyrheliometers considered, based on measurements concerning radiation intensity within solar aureole 14 p2282 A66-26930  
 IGY and IGC data on atmospheric washout of radioactive fission products by precipitation 14 p2376 A66-27540

Angular and spectral distribution of outgoing radiation in cloudy atmosphere in spectral range beyond absorption band 14 p2285 A66-27856

Equations for reflecting effect of underlying surfaces on long wave radiation fluxes in free atmosphere 14 p2285 A66-27860

Dependence of vertical structure parameters of atmospheric temperature and humidity fields on atmospheric long-wave radiation field, noting transport equation 14 p2327 A66-28217

Outgoing Earth and atmospheric radiation observed in IR spectrum at various altitudes by geophysical balloons and rockets 15 p2483 A66-28739

Cosmos-65 spectrophotometric measurements of atmosphere-reflected UV radiation spectra 15 p2485 A66-29076

Air showers size, lateral distribution and arrival direction at 5,200 m altitude 15 p2578 A66-29521

Energy spectra of atmospheric alpha rays at balloon altitude and of alpha rays from graphite nuclear interactions 15 p2583 A66-29551

Cosmic ray showers, discussing high energy interactions of nuclear active particles, intensity and energy spectra of gamma rays and muons, young air showers, ionization bursts, etc 15 p2584 A66-29555

Atmospheric high-energy cosmic ray cascade, using fire ball and gev-range nucleon isobars in model 15 p2586 A66-29565

Radiation data measured by Tiros IV satellite for determination of global distribution of atmospheric water vapor 15 p2533 A66-30029

Vertical profile of atmospheric radiative balance from balloon-borne actinometry at 25 to 32 km 16 p2698 A66-31344

Radiant equilibrium temperature of opaque absorbing body relation to radiative temperature variations of air 18 p3265 A66-34611

Energy spectra of muon, electron and N components of extensive air showers /EAS/ 18 p3210 A66-35129

Airborne scintillation counter-spark chamber observations of particle energy flow and incident zenith angle distribution of air showers 18 p3211 A66-35131

Extensive air showers /EAS/, discussing lateral distribution function variation with atmospheric density, primary energy dissipation, shower front radius of curvature, etc 18 p3211 A66-35133

Design and test flying of transistorized sonde used with Suomi-Kuhn radiometer for measurement of heat loss by long wave radiation from atmosphere 19 p3353 A66-35316

Galactic and atmospheric X-ray characteristics determined by two scintillation counters borne on sounding rocket booster 19 p3452 A66-35354

Tiros IV atmospheric IR radiation measurements and application to weather analysis, using quasi-global synoptic maps of troposphere relative humidity 19 p3393 A66-35637

Ionosphere as anisotropic dissipative medium where charged particles random thermal motion acts as thermal radiation source, noting relation between driven AC conduction current density and applied AC electric field intensity 19 p3352 A66-36630

Random Elsasser band model to compute atmospheric transmission of Earth and Mars for 2-micron carbon dioxide bands 20 p3655 A66-38024

Atmospheric thermal radiation in clouds and rainfall causing antenna radio noise, considering long waves due to heterodyning of molecular radiations 20 p3520 A66-38143

Numerical evaluation of intensity of radiation scattered outward from turbid atmosphere 20 p3593 A66-38190

Solar terrestrial physics - Symposium, Japan, December 1965 20 p3634 A66-38211

Transfer equation for radiation escape from semiinfinite atmosphere with nonconservative scattering 21 p3808 A66-38639

Vacuum UV radiation in equilibrium air measured by photoelectric gauge 21 p3835 A66-38732

Total solar radiation intensity

measurements by pyranometric and heliographic methods, noting relation to sunshine duration 21 p3733 A66-39101

Spectral and vertical distribution of atmospheric IR radiation flux divergence for five model atmospheres, noting dependence on sighting angle 22 p3912 A66-40329

Statistical correlation of IR cooling measurements by Tiros II /Channel 2 and Channel 4/ and radiometersonde 22 p3944 A66-40431

Low level amplifier for IR receiver for Earth-space IR contrast study 24 p4180 A66-42341

Vertical profile of atmospheric radiative balance from balloon-borne actinometry at 25 to 32 km 24 p4201 A66-42652

Energy spectra of muonic and electronic neutrinos in atmosphere 24 p4270 A66-42930

Decay of small temperature perturbations by thermal radiation in atmosphere, noting gray and line absorption, relaxation time constants and numerical computations 24 p4203 A66-42986

## ATMOSPHERIC REFRACTION

### SA LIGHT TRANSMISSION

Aerial observation of rare halo formation consisting of small ring, large ring, secondary sun of small ring, horizontal ring and extraordinary secondary sun 02 p0220 A66-11263

Simultaneous lower atmosphere observations with radar and aerological measurements by airborne meteorograph and electrometeorograph 02 p0253 A66-11273

Vertical profile of refractive index in lower atmospheric layer measured by modified A-22-IV radio probe on captive balloon 02 p0253 A66-11274

Diurnal and seasonal variations in refractive index of atmosphere near Earth surface based on meteorological station data in Transbaikalian region 02 p0253 A66-11275

Polar interferometric method for measuring north-south component of ultrashort wave refraction in ionosphere and optical thickness gradient 02 p0190 A66-11415

Astronomical and parallax refraction determined for satellites, elevated targets and meteors inside and outside atmosphere 03 p0429 A66-13199

Manned space flight observations include confirmation of normal airglow, Glenn effect and photographs of land and ocean areas that can be compared with lunar and planetary photographs for geologic interpretation 05 p0629 A66-15755

Orientation of satellite-borne dipole emitter and influence on ground-based recording of Faraday effect 07 p1028 A66-17455

Frequency-dependent ionospheric refraction effects on Doppler shift of satellite signals 08 p1181 A66-18714

Brightness calculation of aureole visible in daytime at Earth edge from spacecraft 08 p1217 A66-19302

Optical turbulence simulation with small transparent solid bodies immersed in index-matching liquids 08 p1186 A66-19702

Photoelectric focus and seeing monitor for solar telescopes, noting atmospheric blurring 09 p1382 A66-20513

Sunspot phenomena and observation as affected by image perturbation caused by atmospheric inhomogeneities 11 p1770 A66-22647

Refraction angle of radio waves in troposphere and stratosphere, using refractive index of air 11 p1658 A66-23220

Electronic trispheration, three-dimensional analog of triangulation, for long distance geodetic surveys 12 p1875 A66-24936

Mass calculation for absorbing gases such as water vapor, carbon dioxide and ozone along oblique paths between two arbitrary points in atmosphere, considering vertical distribution, refraction and Earth curvature 14 p2284 A66-27541

Atmospheric refraction data acquisition using radiating source, receiver/transmitter and receiver/recorder 14 p2285 A66-27842

Atmospheric refraction dependence on wavelength solved numerically 15 p2483 A66-28644

Atmospheric refractive index variation

measured by microwave refractometer 16 p2693 A66-30337

Height distributions of atmospheric refractive index variations over Japan 16 p2653 A66-30798

Conical refraction of magnetosonic waves occurring when Alfvén waves propagate at speed of sound in conducting fluid in presence of constant uniform magnetic field 16 p2764 A66-31364

Variational method calculation of refraction angle in inhomogeneous laminar medium, using approximate integration of series of exponential functional of electron concentration 17 p2873 A66-32241

Brightness calculation of aureole visible in daytime at Earth edge from spacecraft 19 p3348 A66-36039

Tropospheric and ionospheric refraction, aspect sensitivity and height of radio aurora, backscatter radar aurora observation and geomagnetic field anomalies 20 p3520 A66-38199

Spectral-transmittance aerosol component for atmospheric haze, taking account of refractive index and polydispersity 21 p3759 A66-38910

Tropospheric duct propagation above sea in experiment and mode theory of Booker and Walkinshaw 22 p3863 A66-39934

Turbulent refractivity spectrum and optimization of airborne radar CAT detectors 22 p3944 A66-40429

Mass calculation for absorbing gases such as water vapor, carbon dioxide and ozone along oblique paths between two arbitrary points in atmosphere, considering vertical distribution, refraction and Earth curvature 24 p4198 A66-42326

Refraction due to acoustic focusing of sound waves in lower troposphere, noting effect of wind profile 24 p4203 A66-43108

## ATMOSPHERIC SCATTERING

### SA LIGHT SCATTERING

### SA WAVE SCATTERING

Time variation in radiance of contaminant glow clouds released in upper atmosphere, noting solar radiation scattering 02 p0221 A66-11474

Radiation transport in optically thick medium where natural wings of lines are important and 1304 OI triplet in upper atmosphere 02 p0282 A66-11501

Angular volume-scattering functions measured as function of scattering angle for natural fogs in atmosphere, using coherent and incoherent radiation 02 p0262 A66-12211

Ground-based absolute measurements of energy in solar spectrum using relative aureole criterion of atmospheric scattering 03 p0422 A66-12912

Upper atmospheric observation using normal-pulse ruby laser techniques, presenting height distribution curves of scattered light 04 p0528 A66-13376

Isotropic scattering of radiation from point source in finite atmosphere bounded by totally absorbing spherical shell, deriving iterative series solution 04 p0548 A66-13828

Light intensity in homogeneous turbid medium for unresolved absorption bands calculated from distribution of photon optical paths in absence of absorption, considering atmospheric scattering 04 p0542 A66-14302

Upper atmospheric research using spectroscopic study of absorption bands and night-sky radiation, celestial bodies as UV and X-ray sources and atmospheric light scattering 06 p0876 A66-16310

Diffusive reflection of light from and passage through optically thick atmosphere with nonspherical indicatrix 07 p1080 A66-17921

Measurement of light scattering matrix in lower atmosphere, discussing apparatus and results 08 p1247 A66-19303

Model of Mars atmosphere and surface close to terrestrial conditions, with scattering atmospheric spectrum and surface covered with limonitic dust 08 p1295 A66-19329

Optical parameters of Mars atmosphere and surface from photometric data for spherical and elongated scattering indicatrices 08 p1295 A66-19337

Power loss of optical-heterodyne system with angle tracking in signal propagation

through turbulent medium 08 p1185 A66-19701

Average transfer function from statistics of wave-front distortions in light propagating through atmosphere 08 p1256 A66-19705

Visible and IR radiation observations made above atmosphere 10 p1603 A66-21107

Radiative transfer and imperfect scattering in planetary atmospheres from Chapman approach 11 p1776 A66-23414

Diffusive reflection of light from and passage through optically thick atmosphere with nonspherical indicatrix 12 p1913 A66-23882

Ruby laser optical radar detection of upper atmospheric backscattering 12 p1818 A66-24395

Wavelength dependence of angel echoes, using radar backscatter from clear atmosphere 12 p1825 A66-24890

Nonuniqueness of solutions of nonlinear integral equation for Chandrasekhar S-function for homogeneous semiinfinite atmosphere 13 p2127 A66-25612

Solar near-IR scattering by sunlit terrestrial clouds as affected by cloud type, altitude and scattering angle 13 p2073 A66-25989

Laser radiation coherence property deterioration and molecular scattering during propagation through turbulent atmosphere 14 p2236 A66-27131

Ground-based absolute measurements of energy in solar spectrum using relative aureole criterion of atmospheric scattering 14 p2376 A66-27261

Measurement apparatus and procedure for aureole scattering function in lowest layer of atmosphere 14 p2325 A66-27536

Electrostatic interaction effect on EM wave scattering by atmospheric aerosol particles 14 p2284 A66-27539

Angular divergence effect of light beam on illuminance of turbid scattering medium 14 p2326 A66-27542

Concepts, symbols, units and nomenclature for transmission of radiant flux through Earth /variable density/ atmosphere 14 p2335 A66-27776

Light intensity in homogeneous turbid medium for unresolved absorption bands calculated from distribution of photon optical paths in absence of absorption, considering atmospheric scattering 14 p2327 A66-28216

Solar UV reflection and scattering from Earth atmosphere, use in determining total concentration and vertical distribution of ozone 15 p2486 A66-29090

Kaon decay contribution to sea level muon flux at large zenith angles, using Ashton and Wolfendale procedure 15 p2588 A66-29579

Rocketborne spectrograph measurement of UV reflectivity of Venus and Jupiter, noting atmospheric Rayleigh scattering effects 15 p2603 A66-29963

Atmospheric refractive index variation measured by microwave refractometer 16 p2693 A66-30337

Monograph on intensity distribution and polarization of scattered radiation in ozone absorption bands at selected levels of terrestrial Rayleigh atmosphere 16 p2698 A66-31226

Ground reflection effect on polarization of radiation scattered from top of Rayleigh atmosphere, using Fresnel and Lambert models [AIAA PAPER 66-514] 16 p2699 A66-31498

Lidar detection of backscatter from upper atmosphere 17 p2875 A66-32929

Upper atmospheric light scattering of vertically fired ruby-laser pulse 17 p2922 A66-33348

Absorption lines and bands in scattering and absorbing medium elucidated by study of distribution of photon optical paths in scattering atmosphere 18 p3230 A66-34148

Diffuse reflection by planetary inhomogeneous atmosphere with albedo for single scattering decreases exponentially with optical depth 18 p3230 A66-34149

High resolution spectrophotometric system for measuring atmospheric transmittance spectra 18 p3130 A66-34610

Measurement of light scattering matrix in

lower atmosphere, discussing apparatus and results 19 p3393 A66-36040

Book on atmospheric optics of twilight phenomena 19 p3394 A66-36732

Numerical evaluation of intensity of radiation scattered outward from turbid atmosphere 20 p3593 A66-38190

Loss rates of trapped electrons by atmospheric collisions 20 p3640 A66-38321

Transfer equation for radiation escape from semiinfinite atmosphere with nonconservative scattering 21 p3808 A66-38639

Iterative solution of equations for diffuse reflection and transmission in finite plane-parallel atmosphere with arbitrary stratification 21 p3734 A66-39220

Solar radiation passage through Earth atmosphere in triplet lines O I, considering molecular hydrogen absorption and brightness distribution of radiation 22 p3973 A66-40472

Daytime sky brightness relationship to atmospheric anisotropic light scattering 22 p3917 A66-40960

Monograph on absorption, scattering and attenuation of light and IR radiation in atmosphere 23 p4087 A66-41272

Multiple air scattering in mesosphere as function of zenith distance of Sun and brightness of twilight sky 23 p4087 A66-41803

Complete Rayleigh scattered field within homogeneous plane parallel atmosphere, noting scalar transfer equation extension 23 p4065 A66-41813

Measurement apparatus and procedure for aureole scattering function in lowest layer of atmosphere 24 p4233 A66-42322

Electrostatic interaction effect on EM wave scattering by atmospheric aerosol particles 24 p4198 A66-42325

Velocity characteristics of clear-air dot angel echoes determined via Doppler radar measurements 24 p4234 A66-42990

**ATMOSPHERIC STRATIFICATION**

Geostrophic coefficient of friction dependence on stratification from wind profile measurements at lower atmospheric layer 06 p0906 A66-16555

Richardson critical number and asymptotic equation applied to stably stratified ground atmospheric layer 07 p1062 A66-17924

Earth atmosphere layers described according to thermal structure 09 p1371 A66-20269

Internal gravity wave propagation in thermally stratified atmosphere 11 p1697 A66-22567

Richardson critical number and asymptotic equation applied to stably stratified ground atmospheric layer 12 p1905 A66-23885

Extraterrestrial dust as possible cause of background ionization and stratification in sporadic E layer 14 p2282 A66-26855

Geostrophic coefficient of friction dependence on stratification from wind profile measurements at lower atmospheric layer 14 p2328 A66-28227

Thermal stratification and thermostability effects on turbulent diffusion approximated by Swinbank exponential wind profile 15 p2530 A66-28603

Numerical analysis of wind velocity profile measurements and theoretical calculation of profile by numerical methods, based on geostrophic friction coefficient 16 p2741 A66-30771

Vertical wind shear effect on development and structure of convection, noting perturbation growth rate and unstable stratification 16 p2742 A66-31110

Nonstationary models of cumuli and thermals in stratified atmosphere 18 p3130 A66-34606

Annual frequency of noctilucent clouds linked to low temperatures in mesopause region 19 p3345 A66-35396

Physical structure of upper atmosphere given by pressure and density scale heights and mean molecular mass due to diffusion 19 p3349 A66-36348

Atmospheric stratification effect on radiative thermal flux, including diagrams for flux estimate from temperature gradient 20 p3594 A66-38372

Stepped structure of sunrise fall observed at various frequency bands of atmospheric activity suggest it is due to wave

propagation between Earth and E and D layers 21 p3706 A66-39374

Radio wave diffraction in stratified troposphere solved for case of exponential refractivity profile 22 p3863 A66-39935

Relation between diurnal, seasonal and cyclic variations of stratifications in E layer and fine structure of sporadic E layer and E-2 layer 22 p3914 A66-40761

Wind and temperature profiles for constant flux atmospheric boundary layer in lapse stratification implying relation between eddy transfer coefficient ratio and stability parameter 24 p4202 A66-42982

**ATMOSPHERIC TEMPERATURE**

**SA IONOSPHERIC TEMPERATURE**

**SA ISOTHERM**

Planetary temperature including oceans and atmosphere related to types of organic life, gravity, specific heat and thickness of atmosphere 01 p0136 A66-10301

Temperature and wind velocity fields of stationary atmospheric boundary layer derived from semiempirical turbulence theory 01 p0062 A66-10859

Magnetic storm accompanied by Forbush decreases taking into account atmospheric temperature, noting cyclonic storm origin 02 p0282 A66-11388

Kinetic temperatures derived from Doppler width of airglow 5577 angstroms /OI/ line measured with Fabry-Perot interferometer 02 p0221 A66-11503

Phases of lower stratospheric circulation and temperature variation 02 p0221 A66-11571

Stratospheric monthly temperature variation at latitude 15 degrees N between 25 to 55 km in phase angles and amplitude 02 p0223 A66-11959

Air currents and temperature distribution in stratosphere and mesosphere in Northern Hemisphere from rocket observation 04 p0513 A66-13438

Harmonic analysis of solar diurnal and semidiurnal variations of wind, pressure and temperature in stratosphere, comparing observed and wind-derived heights and temperature 04 p0515 A66-13672

Dependence of vertical structure parameters of atmospheric temperature and humidity fields on atmospheric long-wave radiation field, noting transport equation 04 p0542 A66-14303

Ionospheric F region electron density and electron and ion temperatures measured by ground-based radar backscatter 05 p0670 A66-14950

Photometric measurements of twilight brightness for upper atmospheric temperature determination 05 p0674 A66-15528

Atmospheric temperature of route of SST and influence on navigation, fuel management and operating economics 07 p0988 A66-17694

Atmospheric diurnal variation investigated, using temperature controlled high-counting neutron and meson monitors 07 p1126 A66-18008

Correction of cosmic ray meson intensity monitor counting rates for atmospheric temperature variation 07 p1127 A66-18012

Temperature changes in entire atmosphere and effect on diurnal variation of meson component of cosmic rays 07 p1129 A66-18025

Dynamical properties of solar wind and solar corona atmosphere with extended temperature bound strongly by gravity 07 p1132 A66-18263

Variations in vertical temperature and humidity profiles used to determine underlying terrestrial surface temperature from outgoing radiation 09 p1398 A66-19888

Relation between ascending fluxes of Earth and troposphere long-wave IR radiation and temperature of mean energy level 09 p1398 A66-19889

Effect of atmospheric temperature changes on diurnal variation of meson component, using temperature coefficient and crossed telescopes methods 09 p1439 A66-20219

Earth atmosphere physical properties including temperature, density, pressure and water vapor 09 p1398 A66-20270

Upper atmosphere temperature and pressure measured with manometers mounted on rockets, using method of

successive approximations 09 p1375 A66-20988  
 Aerodynamics of manometers and mass spectrometers used on rockets and satellites for determination of atmospheric temperature and density 09 p1383 A66-20993  
 Fields of outgoing radiation in 8-12 micron region, calculating surface temperature and effective water vapor content 11 p1698 A66-22943  
 Atmospheric conditions during total eclipse of February 15, 1961 in France, particularly temperature curves 12 p1868 A66-23533  
 Mars upper atmosphere thermal structure from spectroscopic measurements and Mariner IV occultation experiment 12 p1947 A66-23660  
 High temperature anomaly in stratosphere over Australia during 1963-64 12 p1871 A66-24464  
 Monthly temperature variations in tropical stratosphere and mesosphere between 25 and 80 km [AIAA PAPER 66-344] 12 p1872 A66-24474  
 Flight data used to determine relationship between atmospheric temperature changes and clear air turbulence occurrence at jet altitudes [AIAA PAPER 66-365] 12 p1906 A66-24477  
 Two-channel satellite-borne radiometric system to furnish temperature information for SST flight planning, discussing conceptual design, operating mode and data handling procedures [AIAA PAPER 66-372] 12 p1872 A66-24500  
 Heat transfer equations for rocketborne stratospheric temperature sensor in form of spherical bead thermistor and experimental analysis of physical, thermodynamic and electrical characteristics of rocketsonde [AIAA PAPER 66-385] 12 p1882 A66-24508  
 Laboratory studies of heat balance in rocketsonde thermistors for measurement of upper air temperature, noting dissipation constant and solar radiation effect [AIAA PAPER 66-386] 12 p1883 A66-24509  
 High altitude mesospheric temperature measurements, discussing air-to-sensor heat transfer mechanism, bead thermistor and descent rate [AIAA PAPER 66-388] 12 p1908 A66-24510  
 Atmospheric vertical temperature profile determined from outgoing radiation spectrum, evaluating error probability and accuracy 12 p1874 A66-24869  
 Structural constant of temperature fluctuations in atmosphere determined by methods involving turbulent energy dissipation velocity and velocity distribution probability 12 p1875 A66-24871  
 Atmospheric noise temperature spectra observed from satellite at wavelength near rotational lines of water vapor molecule 13 p2075 A66-26742  
 Breakdown of biennial oscillation of ozone and of lower stratospheric temperature of Southern Hemisphere and relation to sunspot cycle observations 14 p2286 A66-27904  
 Dependence of vertical structure parameters of atmospheric temperature and humidity fields on atmospheric long-wave radiation field, noting transport equation 14 p2327 A66-28217  
 Nonoptimum flight conditions effects on SST fuel performance, noting sonic boom and atmospheric temperature variations 14 p2224 A66-28230  
 SST air traffic control and fuel consumption dependence on wind drift and atmospheric temperature 14 p2328 A66-28231  
 Low atmospheric temperature and humidity changes beneath subsidence inversion above Southern England 15 p2530 A66-28599  
 Exospheric temperature, scale heights and mean molecular weight up to 3500 km derived from satellite accelerations in 1964 15 p2484 A66-28819  
 Clear air turbulence detection and warning by airborne devices including radar, IR spectrum, air temperature probes, ozone detection, etc 15 p2500 A66-28917  
 Atmospheric temperature changes as factor in detection of clear air turbulence, especially above 25,000 ft, noting aircraft instrumentation used 15 p2532 A66-28918  
 Clear air turbulence detection by measuring associated air temperature

gradient by airborne IR radiometer 15 p2500 A66-28927  
 Vertical atmospheric temperature and wind distribution in optimal parametric representations 15 p2489 A66-29775  
 Seasonal-latitude variations in lower thermospheric density, temperature and composition 15 p2490 A66-29820  
 Diurnal and semidiurnal oscillations in atmospheric density, temperature, pressure and wind in subtropical Southern Hemisphere 15 p2491 A66-29964  
 Mass spectrometric measurements of upper atmosphere temperature 15 p2495 A66-30062  
 Air-temperature and wind profiles in atmospheric boundary layer and dependence upon stability criteria of ground layer 16 p2741 A66-30772  
 Speculative mean monthly Arctic stratospheric temperatures estimated from radiosonde and meteorological rocket wind and temperature data 16 p2696 A66-30928  
 Atmospheric heat and moisture transfer during developing cloud conditions 16 p2742 A66-31342  
 Upper atmospheric temperature measurement from Doppler line widths of atomic oxygen auroral and nightglow emission, using Michelson interferometer 17 p2919 A66-32993  
 Objective analysis of wind and temperature distribution in vertical cross section through atmosphere derived from radiosonde and rawinsonde data 17 p2949 A66-33336  
 Upper air sounding analysis using electronic computer 17 p2921 A66-33340  
 Ambient temperature measurements from radiosondes flown on constant-level balloons 17 p2949 A66-33342  
 Atmospheric contribution to diurnal variation of cosmic ray meson intensity at Deep River, Canada 17 p2994 A66-33429  
 Temporal variations in temperature and drift velocity in ionosphere determined from nighttime variations of F-region electron density profiles at Puerto Rico 18 p3107 A66-34522  
 Numerical solution of integral form of radiative transfer equation from measurements in finite set of spectral intervals for deducing atmospheric temperature profiles, using satellites 18 p3129 A66-34554  
 Difficulties and instabilities accompanying inversion of radiance data to infer temperature structure related to interdependence existing among nominally independent measurements 18 p3130 A66-34555  
 Atmospheric temperature profile determination by satellite-borne IR spectrometer, noting instrument design 18 p3113 A66-34556  
 Optimum averaging periods in measurements of wind velocity profile, temperature gradient, vertical thermal turbulent flow and atmospheric drag 18 p3130 A66-34609  
 Radiant equilibrium temperature of opaque absorbing body relation to radiative temperature variations of air 18 p3265 A66-34611  
 Cosmic ray intensities in stratosphere over Antarctica and Murmansk, noting differences not due to low energy primary particles or temperature 18 p3196 A66-34869  
 Fields of outgoing radiation in 8-12 micron region, calculating surface temperature and effective water vapor content 20 p3553 A66-37856  
 Substantial pulse type stratospheric temperature fluctuations over Armenia based on diurnal observations 21 p3734 A66-39293  
 Limitations imposed on upper atmospheric sonic thermometry by lowering of density with increasing altitude 21 p3741 A66-39428  
 Clear air turbulence detection and warning by airborne devices including radar, IR spectrum, air temperature probes, ozone detection, etc 22 p3945 A66-40325  
 Atmospheric vertical temperature profile determined from outgoing radiation spectrum, evaluating error probability and accuracy 22 p3912 A66-40330  
 Structural constant of temperature fluctuations in atmosphere determined by methods involving turbulent energy

dissipation velocity and velocity distribution probability 22 p3912 A66-40332  
 British stratospheric and mesospheric temperature measurements compared with valves from available atmospheric models 22 p3913 A66-40519  
 Time dependent behavior of temperature and density in monoconstituent atmosphere under diurnal photoheating and cooling by conduction, analyzing effect of atmosphere rotation eastward 23 p4064 A66-41678  
 Absorption and brightness temperature variations of atmosphere on basis of statistical characteristics of vertical temperature and humidity structures 23 p4087 A66-41802  
 Atmospheric heat and moisture transfer during developing cloud conditions 24 p4234 A66-42650  
 Temperature and humidity variations in weak convection over England, noting measurement techniques and results 24 p4235 A66-43076

## ATMOSPHERIC TIDE

Atmospheric tidal oscillations, Coriolis forces dominate diurnal tide causing small scale depth 05 p0672 A66-15026  
 Spherical harmonic analysis of diurnal surface pressure oscillation indicates that it can be represented by wave traveling westward with Sun 07 p1027 A66-17224  
 Possible effects of oceans on atmospheric lunar tide 07 p1061 A66-17363  
 Vertical distribution of heights of lower boundary of polar auroras, examining dependence on intensity and lunar hour angle 08 p1220 A66-19782  
 Upper atmospheric diurnal tide determined via sodium vapor trail measurements 11 p1701 A66-23146  
 Prevailing and tidal wind shears in sporadic E region determined from 29 sodium vapor trails 14 p2280 A66-26840  
 Annual variations in atmospheric lunar tides attributed primarily to vertical shear of zonal wind systems 16 p2698 A66-31112  
 Vertical and horizontal structure of negative eigenvalue modes of diurnal atmospheric oscillation 18 p3107 A66-34524  
 Tidal dissipation function in solar system, examining cases having appreciable evolution since origin of planets and satellites 20 p3655 A66-38023  
 Dynamical effects of liquid nucleus of Earth in diurnal terrestrial tides 20 p3553 A66-38068  
 Vertical distribution of heights of lower boundary of polar auroras, examining dependence on intensity and lunar hour angle 21 p3732 A66-38778  
 Diurnal heating of ozonosphere near stratopause level results in diurnal temperature variation of 15 degrees C and development of tidal circulation in stratospheric wind field 22 p3916 A66-40874  
 Tidal circulation system induced by stratospheric wind field perturbations via diurnal ozonospheric heating 24 p4203 A66-42985

## ATMOSPHERIC TURBULENCE

### SA CLEAR AIR TURBULENCE

Diffusion from elevated point source into turbulent atmosphere flow over horizontal ground 01 p0061 A66-10483  
 Air data equipment trends in subsonic and supersonic control 01 p0033 A66-10680  
 Atmospheric density variations due to turbulence incorporated in analysis of nonsymmetrical tensor of turbulent momentum transfer 02 p0220 A66-11257  
 Karman vortex street pattern of mesoscale eddies in wake of islands [AIAA PAPER 65-16] 02 p0221 A66-11548  
 Parametric fluctuations of spatially restricted light beam in turbulent atmosphere 02 p0191 A66-11838  
 Evaporation as molecular diffusion from large rough surface into random-lived internal scale turbulent eddies 02 p0223 A66-11960  
 Changes in dynamics of aerospace vehicle, flight in low altitude turbulence and satellite spin decay 02 p0178 A66-11990  
 Optical scintillation frequency noting propagation of electromagnetic and acoustic waves in turbulent atmosphere 02 p0262 A66-12207  
 Soviet monograph on continuous

measurement of cosmic ray mu component, covering experimental apparatus, data analysis, atmospheric dynamics, etc 03 p0423 A66-13287

Vibration exposure with varying peak and rms acceleration and frequency in low altitude high-speed flight 03 p0329 A66-13355

Statistical characteristics of fluctuations in radio emission of atmosphere producing turbulent pulsations and displacements of hydrometeorological formations in scan field of radiotelescope, noting distribution function 04 p0517 A66-14046

Wind velocity, vertical wind profile and temperature fluctuations in near-water air layer measured, noting differences from pulsation measurements 04 p0542 A66-14300

Vertical distribution of turbulence and wind velocity characteristics in atmospheric boundary layer, considering temperature stratification in boundary layer 04 p0542 A66-14301

Two-point correlation function expressed in terms of structural function of velocity field 04 p0542 A66-14305

Atmospheric whistler activity, discussing anomaly of low geographic latitude detection and various propagation modes at Rabat, Morocco from 1956 to 1958 05 p0673 A66-15048

Airborne laser-radar light detection and ranging /LIDAR/ systems applied to detection of clear air turbulence /CAT/ 05 p0697 A66-15297

Phase perturbation of optical beams due to atmospheric turbulence, using modulated interferometer to produce Doppler beats between two coherent beams 06 p0909 A66-16434

Measurements of pulsation spectra of vertical component of wind velocity, using acoustic anemometer mounted on aircraft 06 p0906 A66-16552

Atmospheric turbulence, power fluctuation and radar detection in laser systems design 07 p1041 A66-17294

Mesoscale eddies in wake of islands describing properties, characteristic parameters via Karman vortex street pattern, drag theory and empirical observation 07 p1061 A66-17365

Separable nongeostrophic baroclinic stability problem of Eady 07 p1062 A66-17373

Random process theory analysis of equipment performance for measuring time spectra of turbulent fluctuations in lower atmosphere 09 p1398 A66-19886

Spectra of vertical turbulent thermal fluxes and momenta in lower atmospheric layer, including review of relevant literature sources 09 p1398 A66-19893

Accurate calibration of Doppler winds for use in computation of mesoscale wind fields 09 p1399 A66-20728

Tiros IV satellite photographs of various storms, relating equivalent black body temperatures shown on IR analysis to cloud height 09 p1399 A66-20731

Low altitude turbulence model for aircraft gust load estimation related to meteorological parameters, terrain conditions and height [AIAA PAPER 65-14] 09 p1400 A66-20741

System of equations derived for dynamics of convective atmospheric vortices for model with unstable stratification and basic vorticity 10 p1530 A66-21274

Stability of baroclinic circular vortex in incompressible inviscid fluid for axially symmetric disturbances 10 p1530 A66-21275

Winter jet stream structure and turbulence over Australia 10 p1552 A66-21317

Load factor estimation for flights in turbulent conditions by replacing exact transfer function with equivalent statistical model 10 p1482 A66-21385

Phase difference between atmospheric large-scale disturbances and heating due to sea-surface evaporation and turbulent exchange 11 p1694 A66-22199

Monin-Obukhov similarity theory for turbulent structure of thermally stratified surface layer of atmosphere 11 p1725 A66-22266

Four wind profiles analyzed for vertical scale structure and wind shear in mesosphere due to falling sphere 11 p1729 A66-22564

Turbulence-excited atmospheric velocity, critical frequency of atmosphere, solar atmospheric power spectrum of acoustic field velocity correlation, solar convection zone, etc 11 p1772 A66-22777

Severely turbulent airflow at low levels over United Kingdom 11 p1730 A66-23015

Time and height variations of temperature, wind speed and moisture content during dissipation of low level jet on May 14, 1962 before sunrise near Dallas 11 p1730 A66-23379

Directional fluctuations in light waves propagating from edge of solar disk caused by atmospheric turbulence 12 p1913 A66-23775

Light intensity fluctuations along inclined inhomogeneous path with variable turbulence characteristics in lower atmospheric layer 12 p1913 A66-23776

Statistical research on g-loadings and atmospheric turbulence in field of structural strength limits for sporting gliders 12 p1801 A66-23855

Automatic system ensuring landing in absence of visibility and atmospheric turbulence by controlling motion of aircraft leveling out, consisting of time-dependent input signal shaping device and amplifiers 12 p1909 A66-24321

Universal turbulence measuring system giving quantitative measure of turbulent intensity independent of type or speed of aircraft, using all-weather sensor [AIAA PAPER 66-364] 12 p1906 A66-24476

Ballistic wind and density predictions, measuring wind and D-value at 500 mb, calculating missile response to atmospheric effects [AIAA PAPER 66-359] 12 p1906 A66-24478

Wind and turbulence distribution caused by barriers and complex surfaces adjacent to missile launching sites [AIAA PAPER 66-335] 12 p1906 A66-24483

Design of control deflections and structural loads of space vehicle for flight stability through atmospheric disturbances [AIAA PAPER 66-350] 12 p1954 A66-24487

Relationship between atmospheric gust criteria and performance of supersonic inlet and propulsion [AIAA PAPER 66-367] 12 p1801 A66-24495

Unbounded isothermal atmosphere response to time harmonic point disturbances, exact solutions obtained for frequency ranges of acoustic waves, trapped oscillations and gravity 13 p2183 A66-25613

Northward momentum transfer across asymmetric jet in three-dimensional atmosphere analyzed, using initial value problem, noting energy transfer and transformation 13 p2064 A66-26128

Atmospheric radio noise in tropics, noting structural characteristics such as amplitude probability, pulse rate distribution of noise envelope, effects of thunderstorms, etc 14 p2234 A66-27034

Atmospheric turbulence effects on laser beam propagation, noting beam cross section, phase variation, AM and FM, etc 14 p2235 A66-27035

Laser radiation coherence property deterioration and molecular scattering during propagation through turbulent atmosphere 14 p2236 A66-27131

Hypersonic wake studies in ballistic missile research program, discussing reentry of hypervelocity vehicles, laminar flow, atmospheric turbulence, etc 14 p2218 A66-27402

Disturbance propagation in baroclinic atmosphere in presence of radiation and turbulent heat conduction 14 p2325 A66-27535

Effective early warning system to enable pilot to cope with clear air turbulence /CAT/ 14 p2326 A66-27819

Vertical distribution of turbulence and wind velocity characteristics in atmospheric boundary layer, considering temperature stratification in boundary layer 14 p2327 A66-28215

Two-point correlation function expressed in terms of structural function of velocity field 14 p2327 A66-28218

Measurements of pulsation spectra of vertical component of wind velocity, using acoustic anemometer mounted on aircraft 14 p2327 A66-28224

Head-on collision between two pressure jumps in two-layer atmospheric 14 p2289 A66-28335

Quantitative assessment of deterioration that light beam undergoes on passing through turbulent atmosphere 15 p2448 A66-28579

Plane wave propagation statistics in turbulent atmosphere 15 p2448 A66-28582

Economic effects of turbulence on airline operations, considering costs on temporary grounding for repairs, passenger injuries, information dissemination on turbulence, etc 15 p2618 A66-28916

Errors in wind speed measurements under conditions of turbulence, noting quantitative aspects of lateral, vertical and data processing errors 15 p2533 A66-28940

Lower thermospheric turbulence investigated for scale size, turbulent velocity spectra and energy dissipation rate 15 p2491 A66-29954

Rocket observation of upper atmospheric winds, noting wind shear, velocity, pressure, wind vector rotation, etc 15 p2492 A66-30027

Experimental data analysis of turbulence of atmospheric boundary layer 16 p2696 A66-30770

Large and small-scale atmospheric eddy velocities and scale lengths estimated, noting eddy Reynolds number ascertained from dispersion of chemical contaminants 16 p2696 A66-30927

Wing penetration into zone of sharply localized gust, deriving equations for forces and moments acting on wing 16 p2630 A66-31292

Wind tunnel, simulator and flight test results to evaluate cockpit accelerations, handling qualities and stability and control of jet transports in severe turbulence [AIAA PAPER 65-330] 16 p2634 A66-31317

Pulsation spectrum of vertical wind-velocity component at 70 m 16 p2742 A66-31343

Prediction and avoidance of atmospheric turbulence affecting large aircraft 17 p2842 A66-31989

Statistical characteristics of fluctuations in radio emission of atmosphere producing turbulent pulsations and displacements of hydrometeorological formations in scan field of radiotelescope, noting distribution function 17 p2917 A66-32212

Data processing techniques for analyzing turbulence records and for estimating response of aircraft to atmospheric turbulence 17 p2843 A66-32329

Fluctuations in mean refractive index over long path through turbulent atmosphere examined, using Michelson interferometer with He-Ne laser source 17 p2948 A66-32618

Optimal gain settings for atmospheric turbulence in 407 Jimsphere wind profiles [AIAA PAPER 66-484] 17 p2902 A66-32770

Aircraft bumpiness conditions in free atmosphere relation to turbulence and other aerological data 18 p3049 A66-34613

Nature of middle-latitude ionospheric perturbations 19 p3344 A66-35262

Semiempirical law for spectrum of wind velocity fluctuations and energy in lower layer of atmosphere 19 p3393 A66-35332

Turbulence coefficient and mean altitude of atmospheric boundary layer determined from diurnal temperature variations and wind profile 19 p3348 A66-35939

Coherent laser light use in atmospheric communications system, discussing effect of atmospheric turbulence and small vibrations on coherent detection efficiency and SNR 20 p3511 A66-36930

Pilot protection from aircraft vibration caused by atmospheric turbulence 20 p3508 A66-36997

Atmospheric turbulence determined from velocity fluctuations in flight path direction measured by wing-tip mounted hot-wire anemometer 20 p5593 A66-37470

Energy balance equation obtained from turbulent winds from chemical release studies and turbulent diffusion analysis of globe expansion 20 p3554 A66-38205

Wind velocity profile for nonstationary atmospheric boundary layer, noting effect of time-dependent variations on turbulence and pressure gradient coefficient 20 p3594 A66-38368

# ATOMIC COLLISION

## SA MOLECULAR COLLISION

Helium afterglow discussing stability of collisional-radiative recombination of ions with electrons and neutral particles 04 p0547 A66-13652  
 Ionization rate behind shock waves in argon, allowing for excitation and ionization by atom-atom collisions 07 p1020 A66-17938  
 Effective excitation cross sections of alkali metal atoms during collision with slow electrons 09 p1406 A66-20940  
 Molecular oxygen dissociation resulting from collisions with neon and argon metastable atoms in auroral afterglow 11 p1696 A66-22419  
 Structure of conducting and insulating liquids as affected by interatomic forces 11 p1693 A66-22979  
 Numerical values describing molecular rainbow scattering in Airy approximation for 12-6 potential 13 p2130 A66-25379  
 Low energy atomic collisions, considering Schrodinger equation for proton interchange 13 p2130 A66-25380  
 Ionizing collisions between alkali metal atoms and gas molecules, with measured cross sections applied to physics of atomic collisions 13 p2131 A66-25966  
 Amplification of interaction of atoms and of pulsed or periodic cooling of transparent media produced by laser beam, noting changes in kinetic energy of atoms 13 p2093 A66-26021  
 Effective excitation cross sections of alkali metal atoms during collision with slow electrons 15 p2543 A66-28529  
 Average diffusion cross section for elastic collisions of electrons with heavy particles, comparing calculated and measured values 15 p2551 A66-29225  
 Interaction of nuclear active particles with atomic nuclei, using ionization chamber at 3260 m above sea level 15 p2584 A66-29558  
 Output power frequency response of single mode helium neon laser, determining effects of atomic collisions on frequency response of individual atoms 15 p2518 A66-29812  
 Cesium ionization cross section measurement from threshold to 50 ev, noting apparatus used and results obtained 15 p2548 A66-29814  
 Atomic scattering from perfect crystal, considering effects of absorption potential, surface vibrational modes momentum and energy exchange etc 16 p2752 A66-30389  
 Interactions occurring when beam of thermal atoms strikes surface 16 p2753 A66-30396  
 Spatial distribution of high energy Ar atoms scattered by various surfaces 16 p2753 A66-30398  
 Interaction between atoms of solid surface and gas phase, obtaining closed-form solution of motion equations 16 p2753 A66-30786  
 Electronic relaxation of shock-heated nonequilibrium argon plasma flow in microscopic-macroscopic treatment [AIAA PAPER 66-476] 16 p2765 A66-31475  
 Collision cross sections and energy scattering of atoms with slow electrons 18 p3137 A66-34024  
 Born cross sections for double-transition collisions of hydrogen atoms 18 p3138 A66-34150  
 Energy transfer in low velocity inelastic atomic collisions 19 p3401 A66-35464  
 Transitions induced by electron impact between all ground-state terms of atomic systems with computed cross sections satisfying unitarity 19 p3463 A66-35990  
 Relaxation of optically pumped Rb atoms on paraffin-coated walls, using Franzen

sequence, analyzing physical meaning of optical signal 19 p3374 A66-35992  
 Distorted wave calculation from rotational excitation of molecular hydrogen and molecular deuterium in thermal collisions with atomic hydrogen, presenting angular distributions, cross sections, etc 19 p3403 A66-36329  
 Neutral-impurity scattering and scaled electron-hydrogen-atom collision problem for hydrogenic-type impurities in semiconductor studied by method using highly spin-polarized carriers 19 p3448 A66-36763  
 Recharge cross section in collisions of slow atoms or ions involving interparticle transfer of one electron 20 p3604 A66-36987  
 Bomb debris motion following Star Fish test, noting formation of MHD shock wave, production of stationary plasma through X-ray ionization and collision in neutral air 20 p3644 A66-38345  
 Classical cross section for producing specified energy transfer in collision of two particles in laboratory system applied to atomic collision cross sections 21 p3774 A66-38544  
 Collision integrals, effective cross sections and deflection angles for Morse potential calculated, using dimensionless relative kinetic energy of pair of atoms 21 p3775 A66-39073  
 Atomic collisions, excitation, transfer processes and energy level transition probabilities in plasma of gas lasers 21 p3748 A66-39305  
 Coupled equations for open-channel components of wave function derived in total-angular-momentum representation in Feshbach approach to scattering theory for rigid rotator and atom 22 p3950 A66-39914  
 Initial phase of shock produced ionization in argon, krypton and xenon to elucidate atom-atom ionization reaction to determine cross section 23 p4098 A66-42079

### S NUCLEAR ENERGY

## ATOMIC EXCITATION

Modifications of impulse approximation allowing for motion of bound electrons, providing simple analytic expressions for atomic ionization and detachment cross sections 03 p0394 A66-12328  
 FM laser oscillation theory discussing effect of arbitrary atomic line shape, saturation, mode pulling, power output, sideband amplitude, distortion, etc 04 p0530 A66-13954  
 Structural changes in radiation field following quantum reemission after photoexcitation of atom when true absorption is low 05 p0765 A66-15416  
 Solid state laser system, describing quantum mechanical treatment of self-sustained oscillation for one mode 07 p1044 A66-17817  
 Excitation cross sections of helium lines in electron/atom collisions 07 p1044 A66-17874  
 Frequency stabilization of gas lasers, using atomic resonance and interferometers 07 p1045 A66-18357  
 Coherent excitation of mercury resonance state by irradiation with light modulated at Larmor frequency 08 p1233 A66-19089  
 Gas laser emission solution by determining emission field density dependence on resonator parameters, relaxation characteristics and atom excitation in gas discharge plasma 08 p1234 A66-19271  
 Regularities in solid substance vaporization from probe surface in plasma arc allowing quantitative control without change in atomic excitation characteristics 08 p1266 A66-19770  
 Galactic center dynamics revealed by hydroxyl radicals present in interstellar medium, noting detection of radio emissions caused by star-excited atoms and molecules 09 p1453 A66-20239  
 Effective excitation cross sections of alkali metal atoms during collision with slow electrons 09 p1406 A66-20940  
 Effective excitation cross sections for resonance doublets of cesium and rubidium, using slow electrons 10 p1544 A66-21981  
 Degree of excitation of metastable state determined, using luminescence saturation phenomenon, calculating population of working level of laser

substance 10 p1544 A66-22020  
 Quantum mechanical nonlinear theory of intensity and phase fluctuations of homogeneously broadened laser noise 11 p1711 A66-22460  
 Lifetimes of orientation and alignment of excited atomic states examined in level crossing and optical double resonance experiments employing polarized light 11 p1740 A66-22960  
 First order wave function of helium due to one- and two-electron excitation determined by solving differential equations, noting contribution to second order energy 11 p1741 A66-23400  
 Pulse excitation of volume of gas to coherently radiating state applied to beam maser spectrometer 12 p1879 A66-23730  
 Thermionic energy converter energy loss through resonance emission and excited atom diffusion, accounting for de-excitation at electrodes 12 p1922 A66-24210  
 Differences between thermodynamic equilibrium of hydrogen plasma, accounting for increased atomic energy levels 13 p2141 A66-25430  
 Consistency of Gunn effect with excitations of conduction band electrons from high mobility minimum to low mobility valleys 13 p2164 A66-25510  
 Electron impact excitation mechanism of argon-ion continuous and long pulsed lasers 13 p2102 A66-26200  
 Measurement of total cross section for excitation of metastable atoms of helium by electron bombardment 13 p2135 A66-26260  
 7P terms of excited chromium configurations examined, using level crossing and double resonance spectroscopy, noting core polarization 13 p2135 A66-26260  
 Values for contribution of core polarization to hyperfine structure of excited states of chromium compared theoretically and experimentally, extracting core contribution to magnetic field 13 p2135 A66-26260  
 Rotational excitation of oxygen by slow electrons, calculating electron energies quadrupole moments and energy loss rates 13 p2135 A66-26270  
 Semiconductor GaAs quantum generator with two-photon absorption of neodymium laser emission 14 p2307 A66-27150  
 Effective excitation cross sections of alkali metal atoms during collision with slow electrons 15 p2543 A66-28529  
 Ruby phosphorescence under intense optical excitation, inferring possible recombination characteristics from initial brightness decay 15 p2558 A66-28860  
 Excitation temperature of three states of atomic oxygen determined to be 200 degrees K from intensity ratio of three atomic oxygen 1300 angstrom triplet lines by dayglow 15 p2484 A66-28900  
 Calculation of effective excitation cross sections of hydrogen atoms for collision with nitrogen molecules and hydrogen atoms 15 p2545 A66-29210  
 Transverse and axial magnetic field effects on gas lasers, deriving expression for atomic and macroscopic polarization, determining oscillation mode characteristics, frequency responses, etc 15 p2518 A66-29810  
 Pressure dependent energy loss process determined in atomic light analysis of helium positive column, noting molecular-ion concentration relation to 3 D superpopulation 16 p2750 A66-30110  
 Collective oscillations of atoms in Hartree-Fock approximation 16 p2751 A66-30150  
 Degree of excitation of metastable state determined, using luminescence saturation phenomenon, calculating population of working level of laser substance 16 p2718 A66-30840  
 Electron vibration spectra of light absorption in molecular crystals, taking oscillation frequency changes as principle mechanism of exciton-phonon interaction 16 p2780 A66-31170  
 Collision cross sections of ions in isoelectronic sequence of lithium, noting dipolar transitions of type 2s to np 16 p2754 A66-31260  
 Semiconductor lasers with high power efficiency obtained via electron beam excitation on crystals of mixed cadmium sulfide-selenide alloy 16 p2720 A66-31530

Probability of atomic excitation by electron bombardment 18 p3143 A66-34033  
 Individual efficiency curves for excitation of two metastable electron energy states of helium by electron impact 18 p3139 A66-34504  
 Optical pumping of rubidium atoms, describing design and operation of equipment, concepts of resonance, atomic orientation, nuclear magnetic moments, etc 18 p3120 A66-35028  
 Optical pumping of rubidium atoms, treating oriented atoms as magnetized macroscopic gyroscope 18 p3120 A66-35029  
 Effective excitation cross sections for resonance doublets of cesium and rubidium, using slow electrons 19 p3402 A66-35860  
 Approximation method using sum rules for energy shift in atomic system due to interaction of electrons with vacuum electromagnetic field applied to hydrogen, helium and lithium atom ground states and hydrogen molecule 19 p3402 A66-35995  
 High energy cross sections for electron excitations of excited hydrogen atoms in which principal quantum number is changed by 2 19 p3409 A66-36327  
 Excitation of ground state hydrogen atoms by fast protons, evaluating total Born cross section in limit of infinitely massive protons 19 p3403 A66-36333  
 Atomic energy levels in plasma, considering energy spectrum of hydrogen-like atom in plasma, based on cut-off Coulomb potential model 20 p3607 A66-37373  
 FORTRAN program for calculation of approximate total half-intensity line widths of several spectral lines for atoms in common analytical flames 20 p3605 A66-37758  
 Electron excitation of high eigenstates of hydrogen atom and convergence of total wave function expansion 21 p3774 A66-38532  
 Beam foil excitation technique application in measuring mean lives of 2p and 3p levels of hydrogen 21 p3774 A66-38543  
 Gas laser frequency and emitted power dependence on resonator tuning 21 p3748 A66-39308  
 Collisional excitation in Van de Graaff accelerator of beams of light elements producing light emission in 2700-6600 angstrom range 21 p3776 A66-39396  
 Ground state resonance, noting absence of Doppler broadening of signals in forward scattered light 22 p3931 A66-39810  
 Thermionic energy converter energy loss through resonance emission and excited atom diffusion, accounting for de-excitation at electrodes 22 p3957 A66-40583  
 Collective oscillations of electron shells of atom, discussing energy, excitation and damping 22 p3959 A66-40940  
 Spectrophotometry of four bright prominences with respect to kinetic temperature, Doppler half-widths and population levels 23 p4126 A66-41075  
 Semiconductor GaAs quantum generator with two-photon absorption of neodymium laser emission 24 p4226 A66-43085  
**ATOMIC EXPLOSION**  
**S NUCLEAR EXPLOSION**  
**ATOMIC GAS**  
**SA DIATOMIC GAS**  
**SA MONATOMIC GAS**  
 Bethe approximation of ionization cross sections of excited states of atomic hydrogen by high energy electrons 06 p0912 A66-17037  
 Interaction mechanism between internal gravity waves and radiative photochemical processes, noting solar radiation absorption, heat of atomic oxygen recombination, etc 13 p2073 A66-26129  
 Atmospheric mixing time and lifetime of atomic and molecular oxygen at high altitude, noting agreement with barometric distribution law, concentration pattern, etc 15 p2486 A66-29088  
 Spatial distribution of high energy Ar atoms scattered by various surfaces 16 p2753 A66-30398  
 Breakdown by neodymium glass laser radiation in atomic and molecular gases, determining power densities, noting relation of pressure to breakdown power 16 p2718 A66-30938  
 Altitude distribution of atmospheric molecular and atomic hydrogen, showing

results of Lyman alpha absorption measurements 17 p2919 A66-32995  
 Lyman alpha airglow observations indicate diurnal variation of atomic hydrogen in thermosphere and exosphere with abundance change with solar activity 19 p3349 A66-36349  
 Thermal conductivity and accommodation coefficient measurements in gas mixture of atomic and molecular oxygen 21 p3836 A66-39174  
**ATOMIC PHYSICS**  
**S NUCLEAR PHYSICS**  
**ATOMIC RECOMBINATION**  
 Inviscid supersonic nozzle flow of ideal dissociating gas, sudden freezing, equilibrium-recombination mechanism and velocity distribution [AIAA PAPER 66-1] 08 p1163 A66-18983  
 Dissociated laminar boundary layer with heterogeneous recombination 10 p1524 A66-21805  
 Nonequilibrium effects in recombination dissociation kinetics, using iterative perturbation procedure 11 p1738 A66-22884  
 Excitation of auroral green line in terrestrial nightglow caused by interaction of three ground state oxygen atoms 11 p1703 A66-23498  
 High resistivity silicon single crystals, discussing carrier lifetime, photoconductivity and recombination levels 17 p2987 A66-33312  
 Measurement apparatus for studying kinetics of catalytic recombination of gas atoms at solid surfaces of refractory metals, semiconductors and dielectrics 21 p3735 A66-38522  
 Recombination of carbon monoxide and atomic oxygen in expansion wave at high temperature in single pulse shock tube 22 p3860 A66-40527  
 Plasmoid-like RF helium plasma, noting molecular ion formation and destruction leading to evaluation of lower limit for molecular collisional-radiative recombination coefficient 22 p3957 A66-40908  
**ATOMIC STRUCTURE**  
 Long-range interatomic forces from thermal energy spectra, elastic scattering cross sections for atomic beams and limiting curve of dissociation 16 p2751 A66-30161  
 Theoretical band structure, Fermi surface, electronic structure, magnetic and optical properties of rare earth metals 20 p3614 A66-37277  
 Electronic energy band structure and optical properties of heavy rare earth metals 20 p3614 A66-37278  
 Free-atomic pseudopotentials, sizes, s-p splittings and pseudowave functions 22 p3951 A66-40910  
 Cross section for lambda, kappa and sigma particle production in cosmic ray interaction with C, Cu and Pb nuclei dependent on atomic weight of target material 24 p4268 A66-42911  
**ATOMIZATION**  
**SA AEROSOL**  
**SA LIQUID ATOMIZATION**  
 Average heat of atomization in correlating physical properties of vitreous semiconductor 08 p1268 A66-18655  
 Plasma atomization of molybdenum, discussing variable process parameter effects on size grading of spherical powdered molybdenum 08 p1238 A66-18895  
 Atomization of fluids by using nozzles and rotating disks, comparative analysis between these methods and applications 13 p2059 A66-25076  
 Three-dimensional Hueckel molecular orbital calculations performed on series of molecules made from atoms of H, C, N, O, F and Cl 23 p4031 A66-41223  
 Atomization of water drops by high speed airstreams, noting dependency on time 23 p4016 A66-42053  
**ATP**  
**S ADENOSINE TRIPHOSPHATE /ATP/**  
**ATS**  
**S APPLICATIONS TECHNOLOGY**  
**SATELLITE /ATS/**  
**ATTACK AIRCRAFT**  
 Changes to improve reliability of attack aircraft, estimating cost and gains in operational effectiveness 01 p0187 A66-10049  
 Boundary layer control for improvement of lift at lower angles of attack by carrier-

based supersonic aircraft [AIAA PAPER 65-751] 03 p0321 A66-13055  
 Assault helicopter cost and system effectiveness in mission of delivering cargo from carrier to landing zone, evaluating avionics system [AIAA PAPER 64-785] 05 p0610 A66-15079  
 Attack aircraft optimized for attack and strike 07 p0987 A66-17283  
**ATTENUATION**  
**S ABSORPTION**  
**S ACOUSTIC ATTENUATION**

**S NOISE ATTENUATION**  
**S RADAR ATTENUATION**  
**S RADIO ATTENUATION**  
**S SHOCK WAVE ATTENUATION**  
**S WAVE ATTENUATION**  
**ATTENUATION COEFFICIENT**  
 Visible and IR radiation attenuation by artificial fogs found to depend on droplet size and distribution 01 p0097 A66-10860  
 Aerosol component of transparency attenuation coefficient relation to humidity characteristics of individual atmospheric layers 04 p0513 A66-13417  
 Attenuation coefficients deduced in lower atmosphere near Rome, using IGY cosmic ray neutron monitor 07 p1032 A66-17465  
 Q band propagation test carried out over 12-km path, comparing rainfall attenuation with rainfall rate over path, noting scatter of measured values 13 p2023 A66-25567  
 Surface wave propagation along plasma column noting discharge tube properties, density distribution variation with magnetic field, attenuation due to collisional losses, etc 17 p2970 A66-32651  
 Horn radiators with high attenuation capabilities, noting design features, application to parabolic antennas, etc 17 p2894 A66-32989  
 Ultrasonic attenuation in lithium fluoride from liquid helium to room temperature, finding anharmonic attenuation of slow transverse mode to vary with frequency 19 p3447 A66-36398  
 Short distance expansion method used to calculate ground radio wave propagation over mixed path on spherical Earth 19 p3305 A66-36421  
 Uppsala IGY-neutron monitor multiplicity measurements indicate increase of attenuation coefficient with increasing multiplicity 20 p3632 A66-38079  
 Ultrasonic attenuation coefficient of transverse wave in gapless superconductor, noting effect on critical field and parameter amplitude 21 p3797 A66-38558  
 Amplifying elements ensuring required dynamic properties of resolving amplifier without calculating entire amplifier circuitry 21 p3712 A66-39252  
 Horowitz minimum sensitivity decomposition does not lead to optimally sensitive networks for selected class of RC networks 24 p4181 A66-42372  
**ATTENUATOR**  
 Wideband UHF-power regulator design, based on use of electrically controllable semiconductor attenuator 09 p1358 A66-20795  
 Electron density in gas-discharge attenuator with hollow cathode 09 p1358 A66-20811  
 Field effect transistor application to linear amplifier and attenuator circuits 11 p1673 A66-23470  
 P-i-n diode coaxial attenuators and levers noting design, performance parameters and application 12 p1831 A66-23812  
 Computer program with data compilation, using equivalent circuit for p-i-n diode, employed in design of coaxial wideband variable attenuator 14 p2246 A66-26833  
 Formula derived for estimating reflection coefficient of cylindrical resistive-film attenuator for traveling wave tube 16 p2660 A66-30617  
 Wideband UHF-power regulator design, based on use of electrically controllable semiconductor attenuator 22 p3874 A66-39854  
 Slow wave circuit for traveling wave tubes operating in millimeter-wave band, examining attenuator for double-ladder traveling wave amplifier 22 p3877 A66-40187

## ATTITUDE

SA HORIZONTAL ATTITUDE

SA PITCH ATTITUDE

SA SATELLITE ATTITUDE

DISTURBANCE

SA YAW ATTITUDE

Staff flight test design velocity comparison technique for estimating in-flight inertial platform attitude 18 p3132 A66-34044

## ATTITUDE CONTROL

SA FLIGHT CONTROL

SA HORIZON SENSING

SA ROLL CONTROL

SA SATELLITE ATTITUDE CONTROL

Automatic flight control system for A-7A featuring high fixed gain dual channels, series servos and control augmentation in addition to normal attitude and path control functions 01 p0098 A66-10007

Self-organizing adaptive systems for spacecraft attitude control in which reward-punishment reinforcement process is used to obtain on-line synthesis of plant actuation signals 01 p0140 A66-10019

Reentry guidance for manned Mars mission return considering capture and acceleration control, skip range and terminal range controls 01 p0101 A66-10041

Design requirements for LEM, describing stabilization and control elements of abort system 01 p0140 A66-10046

Availability concept in attitude control system for manned Mars expedition 01 p0018 A66-10084

Pulse operated bipropellant control valve design for attitude control systems of space vehicles 01 p0015 A66-10668

Spacecraft attitude control system selection constraints and tradeoffs of components 01 p0142 A66-10681

Attitude control by means of reaction wheel driven by photoelectronically commutated DC torquer 02 p0179 A66-11278

Brushless DC reaction wheel operation, examining use of current limiting to achieve constant torque 02 p0179 A66-11279

Three-axis control system of Mariner IV for midcourse maneuver, communication, scientific instruments orientation, etc 03 p0430 A66-12480

Star pattern recognition system for spacecraft attitude control [AIAA PAPER 64-652] 03 p0390 A66-12755

Solar sail attitude stabilizer integration with thermionic power generation to obtain weight, simplicity and reliability advantages 03 p0431 A66-12762

Thrust modulation with minimum limit cycle in bang-bang system, reducing fuel consumption for spacecraft attitude control system 03 p0432 A66-13206

Low thrust cold gas reaction jet system for small spacecraft with nitrogen, ammonia, Freon-12 and Freon-14, analyzing thrust chamber pressure history [ASME PAPER 65-WA/AUT-11] 05 p0624 A66-15608

V/STOL Aircraft Symposium, Wright-Patterson AFB, Ohio, November 1965 06 p0805 A66-16808

Reference-point results applied to variations in laminar heat transfer to total vehicle over range of vehicle attitudes and associated trajectories [AIAA PAPER 66-28] 07 p0980 A66-17890

Navigation, guidance and control of spacecraft in interplanetary space, considering free-fall flight and thrust-vector stabilization during accelerated flight 08 p1248 A66-18586

Spinning rocket attitude measured from geomagnetic field and solar cell data, using digital computer technique, noting instrumentation 08 p1225 A66-19492

Three-axis limit cycle operation of reaction jet attitude stabilization system 08 p1304 A66-19515

Equipment located between Diamant second-stage propulsion unit and jettisonable rear skirt of third stage including antennas, auxiliary rockets, attitude changing apparatus, control and guidance, etc 10 p1518 A66-21258

Influence on stability of masses which are in relative motion with respect to projectile determined, noting engine thrust effect on attitude control system performance 10 p1611 A66-21386

Ion thruster, including mercury feed system and shielded neutralizer, designed and tested for spacecraft station keeping and attitude control

[AIAA PAPER 66-247] 10 p1593 A66-21456  
Telemetry and data processing systems and sensor equipment of Mariner IV including TV camera, magnetometer, ion chamber, plasma probe, etc 11 p1778 A66-23115

Impulse bit-size, gas consumption and specific impulse of cold-gas attitude control reaction jet system 12 p1954 A66-24710

Stabilite system, three-axis attitude control system utilizing single reaction wheel [AIAA PAPER 66-307] 12 p1955 A66-24774

Spacecraft attitude perturbation due to meteoroid impacts, anisotropy of incident flux and possibility of steady state disturbance torque 14 p2392 A66-27878

Boresighted scanning star tracker for precise attitude sensing and control of sounding rocket 14 p2329 A66-28452

Versatile air-bearing table with three-axis attitude control system for variety of nonspinning zero-g space stations 15 p2534 A66-29362

High precision attitude control system using pulse width modulation evaluated by hardware fabrication and digital computer simulation 15 p2606 A66-29651

Test program for Gemini Attitude Control and Maneuver Electronics /ACME/ system, establishment and execution 16 p2676 A66-30438

Model reference adaptive techniques applied to feedback attitude control system to minimize instrumentation 16 p2809 A66-30830

Two-dimensional dynamic analysis of probe and drogue docking concept noting design, operation and performance 16 p2809 A66-30896

Torque-free precession of spin stabilized spacecraft, showing thrust misalignment as cause for final burnout impulse 16 p2810 A66-30903

Motion equations, attitude and ignition time of third and fourth stage of USAF Athena, noting solution derivation using Taylor series constraints, accuracy, etc 16 p2743 A66-30908

Rocket attitude determined by simultaneous measurement of geomagnetic field and electromagnetic field generated by radio wave transmitted by rocket-mounted dipole 16 p2810 A66-30958

Pilot performance evaluation method based on analysis of control of aircraft attitude in fixed wing aircraft 17 p2864 A66-32162

Dynamical attitude equations for rotational motion of set of  $n$  rigid bodies interconnected by dissipative elastic joints and subjected to arbitrary forces and torques 17 p3001 A66-32345

Systems and operation of quantized data attitude control system for spacecraft [AIAA PAPER 64-660] 18 p3240 A66-33787

Solar alignment system for Skylark rocket attitude control, describing system composition, operation and results 18 p3243 A66-33856

Optimum three-dimensional attitude control of spacecraft with two pairs of reaction jets 18 p3244 A66-33863

Automatic control systems for attitude control of Apollo spacecraft 18 p3244 A66-33876

Ion engine satellite control system noting design and laboratory tests [AIAA PAPER 65-417] 19 p3450 A66-35616

Control moment gyroscope for angular momentum transfer with minimum power consumption, noting design and application for free body motion stabilization 19 p3360 A66-35962

Controller, employing voice recognition principle, for attitude control system of astronaut maneuvering unit in various space tasks 19 p3291 A66-35973

Linear filtering technique for estimation of azimuth alignment of inertial guidance system in presence of disturbances with no measurement noise 19 p3398 A66-36689

Rigid body rotational attitude control in three dimensions with linear transformation as output variable, noting advantages, applications and results 19 p3471 A66-36693

Liapunov method synthesis of time variable nonlinear multivariable systems deriving simplified control law for tracking of linear noninteracting model 19 p3335 A66-36699

Acquisition phase of attitude control function of space vehicle, using noisy measurements on one state 20 p3658 A66-36861

Automatic self-monitor techniques for attitude and heading reference systems 20 p3596 A66-37184

Combined computer and physical simulation of manual tracking system for coupled-camera photography of one space vehicle from another when viewfinder is used 20 p3597 A66-37234

Nitrogen powered hydraulic attitude control system of Little Joe II solid propellant launch vehicle for flight testing escape mechanism used on Apollo 20 p3499 A66-37314

Adaptive control system requirements for launch vehicles includes insensitivity to parameter variations and adjustability as function of measured flight conditions 20 p3664 A66-38182

Low-thrust rockets for spacecraft attitude control, noting subliming solid rockets 21 p3807 A66-38806

Second-order solution for strapped-down attitude computation compared with first order solution 21 p3763 A66-38842

Rotating spacecraft attitude changes due to energy dissipation from angular deformation treated by modal method 21 p3819 A66-38844

Spacecraft attitude reference system using passive temperature control device and four gyros in skewed position 21 p3764 A66-38853

Flight control system of Saturn V launch vehicle, discussing attitude/attitude rate scheme, gain required and stability achieved 21 p3820 A66-38875

Simulation results of adaptive tracking filter application to stabilization of structural bending modes of SI-B launch vehicle 21 p3821 A66-38877

Attitude control system/engine control system for hover control of VTOL aircraft 21 p3697 A66-38902

Attitude, translation and descent engine control for attitude and position control of LEM 21 p3808 A66-39518

Mechanical and thermal requirements of attitude, translation and descent engine controls of Lunar Excursion Module /LEM/ 21 p3808 A66-39519

Automatic flight control system for A-7A featuring high fixed gain dual channels, series servos and control augmentation in addition to normal attitude and path control functions 23 p4088 A66-40983

Control moment gyros with reaction control jet torque sources for attitude control of spinning and nonspinning space stations [AIAA PAPER 65-405] 23 p4132 A66-41097

Apollo spacecraft attitude control, noting phases of application [AGARDOGRAPH 105] 24 p4284 A66-43129

## ATTITUDE GYRO

Error sources in strapdown inertial attitude reference system consisting of three pulse torqued gyros and digital differential analyzer 21 p3763 A66-38840

Strapdown attitude reference system with two rotor gyros using gas bearing in space vehicle 21 p3763 A66-38847

Control moment gyros with reaction control jet torque sources for attitude control of spinning and nonspinning space stations [AIAA PAPER 65-405] 23 p4132 A66-41097

Error sources in strapdown inertial attitude reference system consisting of three pulse torqued gyros and digital differential analyzer 23 p4088 A66-41101

IMU /inertial measurement unit/ gyrocompass as attitude reference in space 24 p4214 A66-42955

Space vehicle guidance and navigation, noting instrument techniques, gyroscopic units for reference coordinate realization, inertial navigation systems, etc [AGARDOGRAPH 105] 24 p4235 A66-43123

## ATTITUDE INDICATOR

Unconventional attitude sensors required to make strapped-down gimballess inertial

guidance system practical 01 p0139 A66-10004  
Bubble level for sensing local vertical of attitude stabilized 08 p1223 A66-18816  
satellite  
Electro-optical attitude and velocity sensors for interplanetary navigation and stellar aberration and Doppler shift measurements 08 p1252 A66-19502  
High reliability system for sensing excessive and potentially dangerous turning rates of Gemini launch vehicle 08 p1225 A66-19525  
Spatial disorientation experiences of Army helicopter pilots, noting accident and incident statistics, methods of correction, etc 11 p1648 A66-22578  
Attitude detectors, characteristics and performance 12 p1879 A66-23745  
Tiro IX satellite design and performance, noting wheel configuration, TV camera, control systems, etc 15 p2606 A66-28968  
**AUDIO EQUIPMENT**  
Distortion measurement by total harmonic distortion analysis and intermodulation distortion analysis 01 p0037 A66-10499  
In-flight entertainment system discussing video, audio and motion picture systems 02 p0231 A66-12015  
Auditory threshold location and uncertainty as function of tone parameters and fatigue examined for pulsed and continuous tones, using Bekesy audiometer 09 p1337 A66-20954  
**AUDIOFREQUENCY**  
**SA SOUND WAVE**  
Design and performance of two multirange current transformers for audio frequencies operating 400 hz to 10 khz with minimum error 07 p1004 A66-17215  
Stability of vertical water jet examined by imposing audiofrequency disturbances 13 p2060 A66-25133  
**AUDIOLOGY**  
**SA DEAFNESS**  
**SA HEARING**  
Difference between earphone /MAP/ and sound field /MAF/ threshold sound pressure levels /SPL/ for spondee 09 p1338 A66-20955  
**AUDITORY FATIGUE**  
Auditory threshold location and uncertainty as function of tone parameters and fatigue examined for pulsed and continuous tones, using Bekesy audiometer 09 p1337 A66-20954  
Psychological reactions to jet aircraft noise, including behavioral reactions and auditory fatigue 12 p1806 A66-24234  
Human auditory response under conditions of intermittent long-term action of medium intensity sound 15 p2435 A66-29451  
Noise effect on human performance 20 p3504 A66-36932  
Human engineering of acoustic fatigue for optimum data processing performance [ASME PAPER 66-MD-25] 21 p3700 A66-38481  
**AUDITORY PERCEPTION**  
**SA HEARING**  
Information processing in auditory neural mechanism, examining synthesis operation of cortex neurons and function of centrifugal nerve paths 02 p0180 A66-11365  
Auditory threshold location and uncertainty as function of tone parameters and fatigue examined for pulsed and continuous tones, using Bekesy audiometer 09 p1337 A66-20954  
Hearing acuity requirements of aircraft personnel, examining discrimination from background noise and acoustic trauma causative factors 10 p1493 A66-22130  
Inter- and intramodal comparisons of light and tone durations in two-alternative forced-choice situation, noting possible judgment errors 13 p2015 A66-25789  
Human subjects making comparisons of duration of two tones in forced choice situation for signal with same or different intensities 14 p2229 A66-27309  
Fluctuations in human acoustic sensitivity after 24 hours in room under effect of Coriolis accelerations of various magnitudes 17 p2861 A66-32941  
Binaural unmasking of tones masked by broadband Gaussian noise including theoretical work on equalization and cancellation model 21 p3702 A66-38646

Vibration stimulus effect on oxygen metabolism of brain in rats with partial destruction of auditory and vestibular apparatus and in anesthetized control rats 23 p4027 A66-41341  
**AUDITORY SENSATION AREA**  
Stochastic behavior of primary auditory neurons illustrated by functional model subjected to steady HF sinusoidal tone bursts 01 p0019 A66-10400  
Stimulus coding in cochlear nucleus, noting different discharge patterns of units in different subdivisions 16 p2641 A66-31187  
**AUDITORY SIGNAL**  
Audio signal processing techniques in future space exploration, discussing channel capacity, speech processing, bandwidth narrowing, etc 13 p2025 A66-26024  
**AUDITORY STIMULUS**  
**SA NOISE**  
Behavior and physiological correlates of human response time to high intensity auditory stimuli 02 p0187 A66-11832  
Temperature effect on amplitude of cochlear microphonic and on latency action potential of auditory nerve 06 p0812 A66-16405  
Sound pressure in external auditory meatus and near center of cat head in absence of animal as function of frequency 22 p3854 A66-40166  
Response patterns to tone-burst stimulation of cochlear nucleus and dependency on stimulus parameters 22 p3855 A66-40375  
**AUDITORY TASK**  
Performance sharing when two audio visual vigilance tasks are performed concurrently 11 p1646 A66-23374  
Information feedback and psychophysical variables in two-alternative temporal forced-choice auditory-signal-detection task 18 p3063 A66-35023  
**AUREOLE**  
Fast photoionization aureole detection and cloud of concentrated long-lived ionization from spark shock wave in laser beam 01 p0080 A66-10263  
Fast photoionization aureole detection and cloud of concentrated long-lived ionization from spark shock wave in laser beam 03 p0379 A66-13308  
Brightness calculation of aureole visible in daytime at Earth edge from spacecraft 08 p1217 A66-19302  
Measurement apparatus and procedure for aureole scattering function in lowest layer of atmosphere 14 p2325 A66-27536  
Brightness calculation of aureole visible in daytime at Earth edge from spacecraft 19 p3348 A66-36039  
Fast overlap of microwave radiation by ionization aureole of spark in laser beam 19 p3376 A66-36719  
Measurement apparatus and procedure for aureole scattering function in lowest layer of atmosphere 24 p4233 A66-42322  
**AURORA**  
**SA AIRGLOW**  
**SA POLAR AURORA**  
**SA RADIO AURORA**  
Monographs on auroras, geomagnetic disturbances and ionosphere at high latitudes 01 p0064 A66-11160  
Micropulsations of Earth magnetic field and relation to various types of auroras 04 p0515 A66-13849  
Visible and invisible aurora discussing morphology, occurrence, magnetic activity, absorption, geophysical and energy particle 05 p0675 A66-15746  
Rocket and satellite data contribution to new physical description of aurora in which Earth magnetosphere acts like gigantic cathode ray tube 06 p0875 A66-16015  
Relative intensity measurements of 50 major bands of Lyman-Birge-Hopfield /LBH/ system of nitrogen 12 p1869 A66-23919  
Auroras, frequency, geographical distribution, types, evolutionary processes and auroral phenomena 15 p2482 A66-28517  
Auroral occurrence rate at zenith as function of latitude for magnetically quiet and magnetically disturbed periods 15 p2486 A66-29092  
Patches and irregular bands and eastward motions in morning sector of auroras 16 p2693 A66-30336

Equatorward motions of auroras 17 p2923 A66-33356  
**AUROLAL ABSORPTION**  
Shift of anomalous absorption region from riometric observation 02 p0225 A66-12138  
Electron density and collision frequency observation during auroral absorption event, discussing rocket experiment techniques and results of analysis 03 p0363 A66-12645  
Auroral type of riometer absorption and magnetic disturbances for stations situated at different longitudes in auroral zone 03 p0364 A66-12660  
Untamated solar cosmic ray data obtained when polar cap absorption events removed toward magnetic poles from auroral zones 03 p0418 A66-12662  
Auroral absorption height obtained from statistical satellite data on average precipitation rate of electrons in auroral zone as function of energy 03 p0364 A66-12663  
Electron energy spectrum during auroral absorption measured by Nike-Cajun analyzer 03 p0366 A66-12880  
Energy flux of electron beam absorbed by atmosphere derived from resulting intensity of first negative system of molecular nitrogen 05 p0670 A66-14948  
Auroral phenomena in integral-invariant coordinate system, discussing pole-centered circular nature of isochasms in geomagnetic dipole coordinates 06 p0876 A66-16280  
Auroral absorption measured, using riometers compared with energetic particle fluxes simultaneously detected by passing satellite, showing absorption and particle flux correlation 09 p1374 A66-20881  
Annual variation of auroral absorption attributed to frictional interaction between streaming plasma and geomagnetic field 10 p1530 A66-21161  
Effects of AZA and PCA on radio wave propagation in Antarctic, noting reliability and radiation power requirements 12 p1817 A66-24275  
Radio wave absorption at high latitudes dependent on frequency, noting AZA and PCA are inversely proportional to powers of frequency 12 p1817 A66-24276  
Auroral absorption at 18-mc/s in middle latitudes, noting daily and seasonal variation 13 p2074 A66-26361  
Auroral absorption of cosmic radio noise which is not identical at magnetic conjugate point 13 p2076 A66-26743  
Shift of anomalous absorption region from riometric observation 14 p2287 A66-28094  
Auroral absorption of cosmic radio radiation recorded by shipboard station drifting in North Geographic Pole region in winter 1963-64 15 p2487 A66-29099  
Auroral absorption of cosmic radio noise 18 p3238 A66-35086  
Auroral absorption analysis during geomagnetic storm, noting satellite measurement of energetic particles 20 p3642 A66-38335  
Sudden cosmic radio noise absorption, polar cap absorption and auroral absorption 24 p4202 A66-42832  
**AUROLAL ACTIVITY**  
Nocturnal auroral drift in meridional direction 01 p0064 A66-11163  
Ionospheric, auroral and geomagnetic observation at Syowa Base, Antarctic 02 p0222 A66-11684  
Current theories for auroral excitation, general excitation and ionization by fast particles in air and relation between luminosity and ionization in aurora 03 p0418 A66-12656  
Effects connected with auroras and magnetic storms in lower ionosphere considering radio wave attenuation, cosmic ray absorption, etc 03 p0365 A66-12854  
E-layer disturbances caused by particles impinging upon atmosphere during auroras noting ionization, X-rays and electrical conductivities 03 p0365 A66-12858  
Contradictory experiments to determine whether particles responsible for auroral events are solar particles or local particles accelerated by secondary processes 03 p0421 A66-12864  
Auroral zone X-ray bursts and polar magnetic substorms 03 p0422 A66-12873  
Ionospheric disturbances traveling at

subauroral latitudes compared at different altitudes 04 p0514 A66-13481

Dipole latitude of auroral activity during periods of zero and very weak magnetic disturbance 04 p0517 A66-14375

Neutron intensity increase observed by boron fluoride proportional counter at high altitude associated with auroral zone X-ray event 07 p1121 A66-17983

Penetration of interplanetary plasma into magnetosphere, connected to aurorae and magnetic storms, noting that plasma need not behave like magnetofluid 07 p1138 A66-18081

Aurora production via magnetic field induction during geomagnetic storms by ring current growth in Van Allen belt region 07 p1029 A66-18088

Polar electrojet causing magnetic substorms in high latitudes flows westward along closed oval curve and is connected with auroral activity and outer radiation belt 08 p1216 A66-19216

Airglow and auroral radiation and time-space variations 09 p1372 A66-20280

Comparison between auroral effects and experimentally observed electron leakage from magnetic mirror with electron acceleration 09 p1373 A66-20471

HF noise signals and association with auroral disturbances analyzed, using data from IGY network of backscatter sounders 11 p1701 A66-23154

Diurnal variation of average energy spectrum of auroral X-rays observed from balloon flights, assessing effect of atmospheric absorption 14 p2376 A66-27614

Short-lived oscillation in light emitted in active aurora 14 p2286 A66-27985

Canadian space program including nonmilitary activities, upper atmosphere research, rocket sounding, aurora studies, satellite use, etc 15 p2601 A66-29937

Polar magnetic substorms associated with westward traveling surge 16 p2693 A66-30334

Poleward motion of auroral bands in midnight sector during early phase of auroral substorm and cause of planetary scale auroral displays 16 p2693 A66-30335

Proton data from rocket flight into breakup phase of IBC-I aurora, noting proton movement in atmosphere 16 p2794 A66-30701

VLF emission associated with flickering aurora 16 p2696 A66-30721

ESRO-I satellite design and auroral activity study 16 p2810 A66-31000

Dynamics of geomagnetic tail, noting transformation of magnetic energy into kinetic energy due to pinch instability and auroral activity phenomena 18 p3106 A66-34162

Pulsating auroras observed near equatorward boundary of auroral displays during postbreakup phase with image orthicon TV and photometers 18 p3107 A66-34519

Riometer recordings at high geomagnetic latitude of intense and sporadic absorption events correlated with occurrence of auroral and geomagnetic disturbances 18 p3108 A66-34531

Ascent and descent in 80-year cycles of solar activity based on Schöve decadal numbers of auroral frequency 18 p3239 A66-35246

Auroral oval, auroral substorm and relations with internal magnetospheric structure during growth and decay of ring current and neutral sheet 20 p3549 A66-37296

Electron precipitation in auroral zones caused by magnetospheric instability 20 p3609 A66-37820

Magnetospheric tail instabilities, auroral electron acceleration and deformation due to dipole magnetic field acceleration of plasma particles 20 p3635 A66-38222

Nonadiabatic and adiabatic acceleration and diffusion of particles trapped in Earth magnetic field, examining particle drift, trapping boundary, auroral substorms and bounce resonances 20 p3658 A66-38326

Upper atmospheric phenomena and particle precipitations noting ionization cross section, energy and spatial distribution and auroral activities 20 p3642 A66-38334

Enhanced activity in ionospheric E region at Cape Hallett and Campbell Island for

information on diurnal variation and sunspot cycle changes of overhead and auroral activity 22 p3916 A66-40809

Image orthicon slit spectrograph for study of aurora and night glow 22 p3921 A66-40898

Auroral zone electron source properties deduced from electron fluxes, spectrums and angular distributions measured by rocket flown into breakup phase of IBC I aurora 24 p4199 A66-42584

Auroral zone proton-electron anticorrelations, proton angular distributions and electric fields 24 p4199 A66-42585

Auroral zone microbursts associated with geomagnetic storms, negative magnetic bays and electron precipitation observed by balloon and rocket 24 p4201 A66-42600

**AURORAL ARC**

Homogeneous auroral arcs orientation and relation to magnetic disturbance currents 01 p0064 A66-11164

Aurora heights determined from wide-angle photographs at Tiksi Bay in 1964 support existence of coastal effect 02 p0224 A66-12121

Visibility conditions for fibrous structure of auroral arcs and bands 04 p0516 A66-13863

Aurora heights determination from wide format photographs, presenting data concerning upper and lower edges and vertical length of homogeneous arcs 08 p1213 A66-19029

Aurora relations with ionospheric currents responsible for magnetic disturbance, noting sign of bay 08 p1215 A66-19054

Aurora heights determined from wide-angle photographs at Tiksi Bay in 1964 support existence of coastal effect 14 p2287 A66-28080

**AURORAL BOMBARDMENT**

Behavior patterns exhibited by polar ionospheric phenomena indicated by statistical analysis of IGY data 03 p0364 A66-12664

Lunar X-ray detectability, noting generation by solar wind electron bombardment and flux intensity 09 p1459 A66-20885

**AURORAL ECHO**

Particle bombardment produces ionized layers in high latitude ionosphere similar to sporadic E layers of lower latitudes 03 p0363 A66-12657

Connection between occurrence of auroral green line of atomic oxygen and head echo by meteors suggests common mechanism for both phenomena 07 p1135 A66-17636

Radio auroral echoes and correlation to geomagnetic disturbance 08 p1215 A66-19205

Data on Northern Hemisphere radio aurora obtained on radar located in England, showing delay in onset of auroral echoes following sudden commencement, depending on local time of SC occurrence 11 p1695 A66-22375

Theoretical calculation of propagation path geometry of VHF aurora backscatter communications compared with experimental observations 19 p3306 A66-36653

Auroral radar echo wavelength dependence determined by two-frequency radar at Homer, Alaska 24 p4172 A66-42593

Auroral radio reflections in analysis of polar current eddy structure, noting effect of geomagnetic and solar activity 24 p4205 A66-43157

**AURORAL ELECTROJET**

Location of latitude over which aurora current passes as function of geomagnetic storm intensity 02 p0225 A66-12139

Ring current growth tendency prior to sudden magnetospheric compression 08 p1219 A66-19406

Auroral electrojet index and universal time variations, discussing polar disturbance statistics 10 p1528 A66-21144

Localization and motion of energetic electron precipitation regions during negative magnetic bays, noting similarity of motion to that of auroral electrojets 10 p1599 A66-21147

Magnetospheric electric fields, noting implications of magnetic storm theories 10 p1528 A66-21149

Location of latitude over which aurora current passes as function of geomagnetic storm intensity 14 p2287 A66-28095

Growth and decay of ring current and

polar electrojet, using magnetic storm examples 22 p3974 A66-40562

**AURORAL EMISSION**

Catalog of observations on auroral phenomena in Western Europe below geomagnetic latitude of 55 degrees for years 1601 to 1700 01 p0139 A66-11104

Correlation of hydrogen emission and oxygen line in diffusive auroras and sporadic E layer 01 p0064 A66-11162

Short period fluctuations in intensity of auroral luminescence and relation to geomagnetic fluctuations 01 p0065 A66-11161

Book on geo-and heliophysical effects in cosmic rays and auroras 02 p0280 A66-11329

Pulsations of aurora luminescence and irregular quasi-periodic oscillations of geomagnetic field 02 p0224 A66-12120

Rocket-mounted spectrometer with solid state detectors for measuring interaural energy spectra of auroral electrons and protons in 40-104 keV range 03 p0369 A66-12650

Balloon measurements of solar protons and auroral X-rays discussing radiation detector flight techniques, instrumentation and results 03 p0417 A66-12654

Auroras and magnetic storm models including those of Chapman and Ferraro, Alfven, and Axford and Hines, noting magnetization of solar plasma 03 p0365 A66-12856

Geomagnetic disturbances and related visual auroras noting pulsations, excitation processes, etc 03 p0365 A66-12857

Visual aurora morphology and dynamics, luminosity curves, angular and energy distributions of auroral electrons, etc 03 p0365 A66-12858

Cometary emissions and excitation processes and prediction of major atomic and molecular emissions of UV spectrum of aurora 03 p0425 A66-12869

Rocket launching through aurora of high luminosity spectrograph and liquid ammoniated to study behavior under solar radiation 03 p0426 A66-12870

Appearance frequency and brightness distribution of band and other auroral forms 04 p0516 A66-13864

Pearl micropulsations in auroral zone at Flin Flon, Manitoba 05 p0667 A66-14790

Night airglow intensity measured at Kerguelen Islands in 1963, rejecting observations contaminated by auroral light 05 p0672 A66-15039

ULF radiation of polar lights, detailing apparatus for receiving and recording signals 06 p0876 A66-16592

Molecular oxygen dissociation resulting from collisions with neon and argon metastable atoms in auroral afterglow 11 p1696 A66-22419

Rocketborne measurements of electron precipitation and relative brightness of ionized molecular nitrogen ion and atomic oxygen auroral emissions 11 p1764 A66-23139

Excitation of auroral green line in terrestrial nightglow caused by interaction of three ground state oxygen atoms 11 p1703 A66-23498

Pitch-angle distribution and differential energy spectrum of polar aurora protons penetrating Earth atmosphere 12 p1870 A66-24283

Auroral hydrogen emission in night sky, noting variance with sunspot cycle and magnetic activity 13 p2073 A66-26029

Simultaneous IR emission and auroral X-ray observations from high altitude balloon flights 14 p2376 A66-27399

Pulsations of aurora luminescence and irregular quasi-periodic oscillations of geomagnetic field 14 p2287 A66-28079

Fast auroral waves differ from flaming aurora in which waves of luminosity appear to converge toward magnetic zenith 15 p2484 A66-28820

Dependence of frequency distribution of auroral displays in zenith on latitude and local time in magnetically quiet and disturbed periods analyzed by all-sky camera network in Northern Hemisphere 15 p2488 A66-29227

Relation between frequency spectrum of pulsations in auroral luminosity and energy spectrum of auroral electrons, using photometer 15 p2489 A66-29235

- Proton bombardment for generation of polar glow aurora 16 p2693 A66-30338
- UV emissions in 1000-1350 angstrom range measured from rocket launched into aurora from Fort Churchill 17 p2917 A66-32523
- Upper atmospheric temperature measurement from Doppler line widths of atomic oxygen auroral and nightglow emission, using Michelson interferometer 17 p2919 A66-32993
- Tilting interference filter photometer to investigate morphology of hydrogen emission and relation to visible aurora 18 p3109 A66-35087
- Time structure of auroral X-rays at Swedish and Finnish locations, using simultaneous balloon flights 19 p3452 A66-35562
- Energy spectrum of auroral X-rays in range from 20 to 150 kev according to balloon measurements show remarkable diurnal variation 19 p3452 A66-35563
- Quantitative measurement of free metallic atoms abundance and height distribution from twilight, dayglow and aurora fluorescence 19 p3349 A66-36350
- Atomic hydrogen and helium emissions in upper atmosphere determined by diffraction spectrophotometer measurement of twilight airglow and aurora 19 p3350 A66-36352
- Auroral spectrum emission intensity in upper atmosphere used to determine densities of metastable atoms and molecules and rates of dissociation and ionization 19 p3350 A66-36353
- Energy spectrum of primary auroral electrons determined from vertical luminosity profiles of 16 auroral arcs 20 p3550 A66-37297
- Aerobee rocket instrumentation and rocket sounding techniques for investigating far UV auroral emission 20 p3552 A66-37594
- Height distributions for atmospheric ionization rate and Balmer radiation resulting from precipitation of auroral protons 21 p3734 A66-39338
- Upper and lower limits to expected alpha and beta hydrogen and helium line emissions due to protons and alpha particles penetrating auroral atmosphere 22 p3913 A66-40554
- Initial energy spectrum and flux of low energy protons responsible for luminescence of hydrogen in auroras 22 p3974 A66-40753
- Spatial distribution of auroral radio signal reflection centers based on radar observations 22 p3915 A66-40777
- Height-luminosity distribution of auroral hydrogen beta emission measured with rocket mounted photometer 23 p4065 A66-41690
- AURORAL IONIZATION**
- Discrepancies in data concerning aurora type sporadic ionization in E region obtained by various high latitude stations 02 p0225 A66-12136
- Visible and invisible aurora discussing morphology, occurrence, magnetic activity, absorption, geophysical and energy particle 05 p0675 A66-15746
- Ionization structure of polar auroras from spatial distribution of radar-reflecting zones, taking into account magnetic field variations 12 p1871 A66-24293
- Discrepancies in data concerning aurora type sporadic ionization in E region obtained by various high latitude stations 14 p2287 A66-28092
- Elementary geomagnetic polar disturbances, lip-shaped auroral ionization patterns and existence of energetic electrons on night side of magnetosphere 15 p2485 A66-28909
- AURORAL SPECTROSCOPY**
- Double-focusing miniaturized beta-spectrometer for measuring low energy electrons within small band spread associated with auroral phenomena 03 p0369 A66-12651
- Artificial aurora, describing time delays between intensity variations of high altitude nuclear explosion generated spectral lines 05 p0667 A66-14789
- Spectrographic and interferometric techniques used in temperature determinations of auroral and airglow emissions in upper atmosphere 05 p0671 A66-15020
- Wide angle Michelson interferometer for measuring Doppler temperature from width of 5577 angstrom atomic oxygen line in nightglow and aurora 13 p2128 A66-25799
- Brightness fluctuations in quiet-form auroras, noting peaks and anisotropy of spectrum 14 p2286 A66-27983
- Power spectrum analysis of intensity variation of pulsating aurora from Tromso during winter 1964/65 15 p2488 A66-29234
- Upper and lower limits to expected alpha and beta hydrogen and helium line emissions due to protons and alpha particles penetrating auroral atmosphere 22 p3913 A66-40554
- AURORAL TEMPERATURE**
- Rotational temperatures derived from molecular nitrogen ion in aurora along with simultaneous height measurements 02 p0223 A66-11833
- Auroral excitation rates and molecular vibrational temperatures in nitrogen 2PG from Franck-Condon factors obtained from intensity measurements and high resolution absorption spectral data 16 p2692 A66-30328
- AURORAL ZONE**
- Auroral zone absorption, reporting periodic variation of sporadic E layer in Antarctica, considering magnetospheric time-of-flight spectrometer effect 01 p0061 A66-10497
- Geomagnetic pulsation pc-5 in and near auroral zones based on data collected during IGY period, noting local time dependence 01 p0062 A66-10889
- Progressive change in worldwide current systems and auroral zone electrojets of geomagnetic bays examined with magnetic data during IGY 01 p0063 A66-10890
- Broadband VLF emissions observed to determine whether whistler mode signals appearing below ionosphere travel toward polar regions and at low latitude from auroral zone 01 p0012 A66-10893
- Diurnal velocity variations of ionospheric wind in auroral zones and disturbance daily solar variation 01 p0064 A66-11161
- Corpuscular flux entry zone and spiral time distribution of disturbance maxima 01 p0133 A66-11165
- Relative position of solar disturbance daily variations mean flux system compared with auroral region of same period 01 p0065 A66-11169
- Ionosphere electron content near auroral zone obtained from differential Faraday observations of multifrequency beacon satellite Explorer XXII, noting corpuscular radiation role 02 p0223 A66-12017
- Charged particles in auroral zone, measuring energy and pitch angle distribution of electrons and protons with rocket mounted solid state detectors 03 p0417 A66-12653
- Enhanced audiofrequency electromagnetic radiation between 500 and 1000 cps recorded in auroral zone by swept-frequency analyzer 03 p0418 A66-12659
- Electric current system arising from sudden enhancement of ionospheric conductivity in auroral zone 04 p0516 A66-13853
- Structure of Arctic auroral zone in period of minimum solar activity 05 p0673 A66-15050
- Time-agreement of sudden commencements indicated by geomagnetic micropulsation results from Byrd Station and Great Whale river 06 p0875 A66-16271
- Occurrence frequency of midlatitude geomagnetic transition bays and relation to spatial movement of overhead electrojet current systems 08 p1218 A66-19395
- Spatial and temporal character of fast variations in auroral zone X-rays, describing balloon experiment and results 08 p1284 A66-19397
- Diurnal variation of aurora zone geophysical disturbances, examining VLF phenomena including noise, aurora and ionospheric absorption 09 p1372 A66-20375
- Latitudinal dependence of geomagnetic disturbance magnitude along noon and midnight meridians for different seasons, noting effect on auroral zone 09 p1373 A66-20386
- Morphological analysis of daily variability of geomagnetic field regular daily changes, noting current systems in polar and nonpolar regions 10 p1526 A66-21126
- Energy spectrum of auroral zone X-rays, noting electron precipitation and diurnal pattern for occurrence of bremsstrahlung 10 p1599 A66-21145
- Energy spectrum for auroral zone X-rays, measuring simultaneously bremsstrahlung X-rays and ionospheric absorption 10 p1599 A66-21146
- VHF hiss zone morphology and correlation with particle precipitation events, from Alouette I satellite observations 11 p1700 A66-23136
- Auroral zone, ionospheric scattering and nongreat-circle HF propagation statistically analyzed 11 p1700 A66-23141
- Propagation of MHD emissions in Alfvén mode along high latitude geomagnetic field lines, auroral zone signal energy penetration and isotropic wave mode transformation 11 p1701 A66-23151
- X-ray produced auroral light emission in air and excitation of second positive and first negative bands in nitrogen 11 p1765 A66-23152
- Auroral zone electron flux and relation to broadbeam radiowave absorption 11 p1703 A66-23495
- Corpuscular intrusions into Earth magnetosphere involving entire auroral zone and occurring only on night side 12 p1871 A66-24296
- Enhanced ionization along midnight auroral zone during elementary geomagnetic disturbances 12 p1872 A66-24472
- Simultaneous observations of auroral zone X-ray microbursts, using two balloon-borne radiation detectors separated by 300 km to estimate size of region of electron precipitation 12 p1944 A66-24841
- Radioactive debris over Fairbanks, Alaska, on February 18, 1965, investigating bremsstrahlung X-rays in auroral zone 12 p1875 A66-24896
- Distribution and variation of atmospheric density over thermosphere, including auroral region, noting wind motion and high altitude circulation 14 p2382 A66-27618
- Auroral zone position changes as function of magnetic activity and time of day 15 p2486 A66-29091
- Diurnal and seasonal variations of sporadic layer in auroral zone 15 p2487 A66-29098
- Temporal variation in scintillation rate spectrum of satellite signals analyzed in auroral zone 16 p2691 A66-30231
- Correlation of simultaneous optical and radio auroral data showing that radio wave scattering belt includes visual auroral belt 16 p2692 A66-30329
- Electron precipitation in auroral zone, using observations from riometer, balloon, rocket and satellite experiments 17 p2917 A66-32363
- Data on geophysical phenomena at magnetically conjugate points on Earth including cosmic noise absorption, conjugacy of visual auroras, magnetic variations, VLF phenomena, etc 19 p3453 A66-35981
- Statistical analysis of diurnal variation in southern boundary of aurora, HF backscatter records and geomagnetic latitude of dayside aurora 20 p3553 A66-38193
- Precipitation of electrons and protons into atmosphere from inside magnetosphere, within auroral zone and at polar caps 20 p3640 A66-38320
- Electron density profile measurements in auroral zone D layer during quiet ionospheric conditions, using partial reflection method 22 p3906 A66-39951
- Latitudinal and diurnal variations of ionospheric electron content near auroral zone in winter from Faraday rotation data 22 p3911 A66-39985
- Auroral disturbances resulting in multipath distortion in propagation by ionospheric reflection and description of chirp ionosonde and antenna systems 23 p4036 A66-41143
- AUSFORMING**
- Ausforming effect on rolling contact fatigue life of M-50 bearing steel [ASME PAPER 65-LUB-9] 04 p0536 A66-14243
- Ausforming, process of plastically deforming austenitic steel at high temperatures, without recrystallization and prior to transformation 13 p2107 A66-25639

## AUSTENITIC STEEL

## SA MARTENSITIC STEEL

Heat resistance in air of four industrial austenitic-ferrite steels with low nickel content at 750-1050 degrees C, noting oxide scale formation 01 p0088 A66-10988

Heat treatment cycle effect on mechanical properties of corrosion resistant precipitation hardened steel AM 355 in terms of metallographic structure 02 p0242 A66-11304

Interface discontinuities from improper heat balance and effects on fatigue life of spot welded joint in austenitic stainless steel 02 p0235 A66-11469

Tensile testing study of hardening mechanisms when niobium carbide precipitation occurs during deformation of 18Cr/12Ni/Nb austenitic stainless steel at 650 degrees C 02 p0246 A66-12195

Mechanical characteristics of columbium steels and synthetic iron-carbon-niobium alloys as function of temperature at which they are converted to austenite 03 p0381 A66-12540

Temperature effect of plastic deformation on aging kinetics of heat resistant austenitic steels 03 p0385 A66-13171

Stress effect on negative creep in chromium-nickel-titanium steels, noting temperature effect and specific volume change 05 p0699 A66-14684

Effect of gamma phase aging and phase cold hardening on austenitic strength of Fe-Ni-Ti steels, noting martensitic point and segregation 05 p0699 A66-14689

Impact strength of austenitic stainless steel welds discussing effects of heat treatment, carbon and ferrite content [ASME PAPER 65-WA/MET-1] 05 p0704 A66-15692

Austenitic chromium-nickel-manganese steel, describing temperature effects on crystal structure and experimental techniques 05 p0704 A66-15819

Maraging steel response to heat treatment including formability, machinability, stress-corrosion resistance and cold-working behavior of austenitic and martensitic phases 08 p1239 A66-18959

Feasibility, reliability and applicability of maraging steels 08 p1240 A66-18960

Aus-bay quenching, heat treatment process which minimizes distortion and increases tensile strength 10 p1545 A66-21219

Effect of molybdenum, niobium and tungsten on structure and properties of nitrogen containing austenitic chromium-manganese steels 12 p1893 A66-23726

High temperature plastic deformation and hardening effects on brittleness, strength and viscosity of austenitic steel and alloys 13 p2106 A66-25328

Ausforging, process of plastically deforming austenitic steel at high temperatures, without recrystallization and prior to transformation 13 p2107 A66-25639

Elastic and plastic deformation of polycrystalline metals exposed to ultrasonic load and high temperatures 15 p2523 A66-29601

Surface finishing effect on stress corrosion resistance of austenitic stainless steels 17 p2942 A66-33445

Austenite-martensite interface dislocations in stainless steel shown as probable pinned Shockley partials 18 p3123 A66-33927

Optimum alloying level defined as one beyond which net positive effect is reduced by decline in some product property, noting steels 20 p3585 A66-37697

Electron microprobe for studying thermoelectric materials and heat-resistant steel for gas-turbine blading 24 p4211 A66-42507

## AUSTRALIA

Upper atmosphere sounding rocket program in increased space research activities in Australia 09 p1458 A66-20707

Winter jet stream structure and turbulence over Australia 10 p1552 A66-21317

Meteorological interpretation of Tiros satellite photographs of Australian area 11 p1728 A66-22319

Annual report, 1964-65 /Aeronautical Research Laboratories, Australian Defence Scientific Service/ on aerodynamics, guided weapons and systems and flight

research 13 p2056 A66-25120  
Australian space program noting rocket soundings, Beacon satellites, station development, etc 15 p2600 A66-29909

## AUSTRIA

German and Austrian astronomical observatories reports on personnel, equipment, projects and publications 13 p2189 A66-26736

Space research activities in Austria 15 p2601 A66-29934

## AUTOCORRELATION

Autocorrelation and spectral density of energy of stationary electromagnetic wave expressed as function of same parameters of its component trains of waves 01 p0106 A66-10645

Itinerant oscillator model of liquids covering classical velocity autocorrelation function of atom and neutron scattering experiments 04 p0547 A66-13809

Numerical characteristics of signal-noise mixture at output of autocorrelation device for sinusoidal signal and Gaussian noise 04 p0501 A66-14407

Single-sideband optical correlator using ultrasonic transducer for variable reference function 06 p0881 A66-16641

Relationship between geometric optic and autocorrelation approach to lunar and planetary radar echoes for Gaussian autocorrelation function 09 p1341 A66-19870

Statistics of product of Gaussian noise process and pseudorandom binary code 09 p1342 A66-19919

Cross correlation and autocorrelation functions of nonstationary signals based on optimal approximation of ensemble correlation function for one pair of signals 10 p1517 A66-21694

Vibrational analysis, discussing spectrum analyzers, correlation and autocorrelation analysis and hybrid and digital computer applications 12 p1970 A66-24722

Electron irregularity size and motion in interplanetary medium determined from radio source scintillation phenomena 13 p2182 A66-25571

Two-time probability distribution function, autocorrelation function, Liouville equation and fluctuation theory of plasma kinetics 13 p2156 A66-26685

Autocorrelation and hypergeometric function applied in evaluating response of nonlinearities to Gaussian noise 14 p2287 A66-27726

High resolution power spectrum of international magnetic character, showing two subsidiary peaks on both sides of 27-day period 16 p2695 A66-30719

Autocorrelation functions and spectra for mechanical systems subjected to random vibrations 16 p2823 A66-31687

[ONERA TP-340] Oscillatory component in solar granulation continuum brightness fluctuations, secondary maxima in temporal autocorrelation functions and power spectra 17 p2996 A66-31920

Autocorrelation statistical method applied to atmospheric electricity 17 p2923 A66-33363

Frequency measurement using autocorrelator as frequency discriminator, noting technique and high-noise sensitivity 19 p3306 A66-36657

Improper random process where impulse occurrence times constitutes stationary point process, noting autocorrelation function and spectral density 22 p3885 A66-40870

Autocorrelation as pulse compression system, giving effective time resolution as inverse of correlation bandwidth and compression ratio of time resolution to signal duration 23 p4034 A66-41022

Stochastic process explaining statistical properties of radar echo patterns 24 p4175 A66-42987

## AUTOIONIZATION

## S SELF-IONIZATION

## AUTOMATIC CONTROL

## SA CYBERNETICS

## SA SERVOCONTROL

Automatic flight control system for A-7A featuring high fixed gain dual channels, series servos and control augmentation in addition to normal attitude and path control functions 01 p0098 A66-10007

Sectionalized, automatic approach and landing system with monitor channel added developed by Boeing-Bendix for all-weather landing 01 p0101 A66-1003

Automated techniques for providing reliability assurance in launch operations of Saturn IB space vehicle 01 p0052 A66-1011

Optimum prognosis for random processes by applying asymptotically optimal succession of automatic systems 01 p0050 A66-1065

Difficulties in control system synthesis for launch vehicles exhibiting severe mode interaction 01 p0104 A66-1067

Realizable transfer function of closed-loop automatic control system calculated with aid of minimum mean square error criterion 01 p0051 A66-1070

Probability of averting failure in system containing automatic safety devices 01 p0043 A66-1070

Statistical characteristics of angular drift velocity of gyrostabilizer employing floating gyroscopes 01 p0068 A66-1071

Propeller control at low airspeed of turboprop engines in any fixed-wing aircraft with special reference to thrust or drag approach and landing 01 p0013 A66-1094

[AIAA PAPER 65-709] Gradient method of solving terminal control problems in linear automatic control system 01 p0051 A66-1101

Transient process of nonlinear automatic system calculated by numerical digital computer method based on convolution integral 01 p0045 A66-1102

Optimal transfer function of linear automatic system determined from criterion of minimum mean square error 02 p0206 A66-1131

Disturbance signals used to synthesize optimal structure of rapid action automatic systems 02 p0206 A66-1131

Stability of automatic control system with variable structure studied for application to stabilization of linear objects whose parameters vary quite rapidly within wide limits 02 p0207 A66-1131

Comparison of differentiating and integrating correction circuits for stability of forced gyrostabilizers for high value of amplification coefficient 02 p0226 A66-1131

Hot wire Wheatstone bridge used in automatic control and method to obtain linear response in large speed fields 02 p0229 A66-1176

Human pilot behavior compared with automatic pilots in terms of adaptability response time and reliability 02 p0187 A66-1186

Control problems associated with stable platforms using single-axis integrating gyroscopes including axes design, drift due to vibration and compensation 03 p0390 A66-1253

Stability of automatic control system with nonlinear elements, obtaining quadratic equations by using Liapunov method 03 p0349 A66-1270

Optimal control approach and uncertainty to feedback control problems 03 p0349 A66-1299

Time lapse in variable-structure automatic control systems 03 p0350 A66-1304

Cybernetics role in space flight including control circuits for guidance and electronic equipment automation and development 04 p0469 A66-1349

Automatic command control system using phonetic voice pattern recognition 04 p0469 A66-1349

Automatic control in captive testing of large space-vehicle propulsion systems and components 04 p0507 A66-1361

Control system 465L used by Strategic Air Command noting automated functions, data processing, integration of human and electronic elements, etc 04 p0507 A66-1368

Frequency characteristics of pulse automatic control systems determined by auxiliary pulse system 04 p0502 A66-1370

Automatic control of flow rate and pressure in mixing process involving several components 04 p0504 A66-1377

Sampled-data control systems analyzed by signal flow graphs 04 p0504 A66-1377

Noise rejection improvement of class of

automatic control systems by means of nonlinear control laws 04 p0504 A66-13976  
Pitch, roll and yaw axis stability augmentation system providing automatic failure detection of portions of system and further stability augmentation after any single failure 04 p0544 A66-14136  
Centralized vibration control of vibration testing noting details of automatic equalizers, switching panel, data reduction, etc 04 p0508 A66-14446  
Limited transients for certain single-loop systems containing nonlinear amplifier and linear system 05 p0656 A66-14727  
Man-powerplant reliability interface, emphasizing manned vs automatic sensing and control 05 p0627 A66-15013  
[SAE PAPER 650810] 05 p0627 A66-15013  
Book on theory of random functions in probability methods for automatic control systems 05 p0657 A66-15066  
Book on structural synthesis of high-accuracy automatic control systems with large stable amplification 05 p0657 A66-15086  
Digital electrometric device with automatic discrete compensation 05 p0680 A66-15211  
Book on asymptotic expansions in powers of small parameter applied to nonsteady oscillations in nonlinear systems with one or more degrees of freedom 05 p0776 A66-15327  
Invariance provided for in nonlinear control systems by reducing problem to construction of inverse operator 05 p0709 A66-15342  
Automation of equalizer consisting of delay line with adjustable taps 06 p0831 A66-16343  
Determination of automatic control in automatically controlled plants 06 p0862 A66-16419  
Nonlinear automatic control system, discussing optimum tuning via parametric stability region 06 p0863 A66-16528  
Automatic relay systems, describing self-oscillation induced parameter variation 06 p0863 A66-16530  
Graphic-analytical method for calculating optimum adjustment of disturbance-compensating system incorporating dynamic elements 06 p0863 A66-16532  
Frequency domain stability criteria, discussing generation and validity of stability criteria 06 p0864 A66-16736  
Upper bound on dynamic/transient and steady state/quantization error in digital control systems, using direct method of Liapunov 06 p0865 A66-16741  
Optimum numerical algorithm for determining elements of inverse of Vandermonde matrix 06 p0866 A66-16751  
Synthesis of automation elements and finite automata in graphical form 07 p1012 A66-17383  
Mean time of failureless operation of duplicated devices with automatic control and switching 07 p1013 A66-17388  
Technique for evaluating accuracy of nonlinear automatic system using structural diagrams 07 p1013 A66-17430  
Nonlinear optimal filtration problem solved, using quasi-orthogonal representations of random functions 07 p1014 A66-17432  
Fault location in modern airborne radar, discussing maintenance reduction techniques and reliability improvement 07 p1006 A66-17495  
Slope quantized binary pulse code modulation by coding signal slopes with unidigit 1/0 pulses, using special feedback circuit and threshold in coder comparator 07 p1002 A66-18248  
Constant time loci in phase-plane and isoclines for nonlinear and piecewise linear systems 07 p1016 A66-18345  
Practical determination of stability region of equilibrium point of second-order nonlinear recurrence with real variables 08 p1255 A66-18639  
Semiconductor diodes and transistors applied to temperature measurement and control, examining automation application 08 p1221 A66-18697  
Thyatron temperature regulator, operation and application 08 p1223 A66-18799  
Mathematical foundations of analog simulation proceeding from Laplace, diffusion and wave

equations 08 p1187 A66-18861  
Microminiaturization in control equipment and computers 08 p1194 A66-19300  
Intermediate text on dynamic analysis and automatic control 08 p1200 A66-19464  
Dynamics of two-channel automatic control systems taking into account nonlinear interaction between channels 08 p1201 A66-19676  
Attenuation factor and degree of stability of automatic control systems determined by Mikhailov criterion and Chebyshev polynomials 08 p1201 A66-19684  
Wiener problem applied to synthesis of automatic control system incorporating minimum phase, nonminimum phase or unstable element 08 p1201 A66-19686  
Reliability of automatic control systems, considering properties of controlled plant, taking error probability in control as criterion 08 p1201 A66-19691  
Propeller control at low airspeed on turboprop engines in any fixed-wing aircraft, with special reference to thrust or drag in approach and landing 09 p1329 A66-20242  
[AIAA PAPER 65-709] 09 p1329 A66-20242  
Pure-fluid amplifier in automatic control 09 p1331 A66-20299  
Automatic system dynamics analysis, considering variations of random parameters, determining reliability of representative servosystems 09 p1361 A66-20302  
Predicting change in state of automatic control system, using correlation analysis 09 p1361 A66-20304  
Sensitivity of transistor multiple loop feedback amplifier to parameter variations evaluated via replacement with equivalent circuit systems 09 p1355 A66-20603  
Generation of Liapunov functions for second method solution of stability problems in automatic control 09 p1362 A66-20650  
Automatic control systems commutable rigid feedback to create astaticism in variable structured systems 09 p1364 A66-20912  
Automatic time-domain equalizer consisting of delay line with adjustable taps 10 p1503 A66-21649  
Pneumatic fluid elements used in automatic control systems, noting viscous fluid properties and application to turbine rpm control 10 p1486 A66-21753  
Equations of linear automatic control systems decomposed 10 p1518 A66-21979  
Sufficient conditions of optimality having control region dependent on phase coordinates 10 p1518 A66-21980  
Theoretical and engineering aspects of applying predicting systems to automatic guidance and control 11 p1673 A66-22201  
Lowering order of transfer function of automatic control system based on use of generalized integral quadratic estimates of transient processes of system 11 p1673 A66-22203  
Optimization of terminal state of controlled system when equations of motion contain derivatives of control parameters 11 p1674 A66-22350  
Optimum control in nonlinear automatic control systems and linear systems with distributed parameters 11 p1674 A66-22352  
Absolute stability of automatic control system with allowances for external load of hydraulic servomotor 11 p1674 A66-22358  
Generalized statistical linearization method for multivariable systems and arbitrary periodic and random signal effect on nonlinear automatic system 11 p1674 A66-22359  
Rms approximation theory applied to linear self-adaptive models 11 p1674 A66-22360  
Realizable transfer function of closed-loop automatic control system calculated with aid of minimum mean square error criterion 11 p1675 A66-22618  
Probability of averting failure in system containing automatic safety devices 11 p1664 A66-22620  
Statistical characteristics of angular drift velocity of gyrostabilizer employing floating gyroscopes 11 p1705 A66-22625  
Forced sliding regimes in automatic control systems 11 p1675 A66-22640  
Spontaneous switching from closed to open state observed in four-layer silicon diodes

serving as keying elements in automatic systems 11 p1667 A66-22743  
Variable-structure system dynamics in sliding regime investigated, using structural analysis methods of infinite gain and relay systems 11 p1676 A66-22755  
Design of variable structure automatic control system frequency characteristics, using harmonic linearization 11 p1677 A66-22763  
Automatic control theory application to null-balance processing of spectral data generated by vidicon television camera 11 p1706 A66-22890  
Automatic control - Conference, Rensselaer Polytechnic Institute, Troy, New York, June 1965 11 p1659 A66-23108  
Nonlinear servomechanism analyzed, using Fokker-Planck equation, discussing tracking failure 11 p1670 A66-23224  
Automatic control systems, discussing optimal and on-line adaptive control in electricity, nuclear research, steel industry, numerical problems, etc 11 p1679 A66-23272  
Relations between coefficients of characteristic equation of automatic systems and parameters of root loci with hyperbolic branches 11 p1680 A66-23325  
Adaptation, learning and self-learning in automatic systems, discussing stochastic approximation, pattern recognition, adaptive filters, etc 11 p1680 A66-23332  
Existence of Liapunov functions for problem of Lure with removal of complete controllability and observability 11 p1681 A66-23451  
Self-diagnosable DX-1 computer design to achieve maximum operational availability 12 p1828 A66-23843  
Optimum prognosis for random processes by applying asymptotically optimal succession of automatic systems 12 p1848 A66-24006  
Automatic control system relay represented by means of limit toward which continuous function tends when chosen parameter increases indefinitely 12 p1848 A66-24029  
Overall stability of equilibrium position in critical Liapunov case, using extension of Malkin method 12 p1848 A66-24030  
Systems design of automatic dynamic control for piloted aircraft, discussing stability, accuracy, response and behavior to external perturbations 12 p1803 A66-24090  
Bang-bang damping rate on system components with time delay and lag 12 p1850 A66-24263  
Two theorems on Liapunov second method, discussing related automatic control system techniques and asymptotic system stability 12 p1850 A66-24264  
Automation of control processes - International Federation on Automatic Control Congress, Basel, Switzerland, August-September 1963 12 p1850 A66-24314  
Control of radio telescope, noting servosystem ability to keep tracking position errors and wind-caused error within certain limits 12 p1851 A66-24319  
Control system of microwave antenna positioning used in communication satellite tracking, noting servosystems, converter, Leonard drive, control panel, etc 12 p1817 A66-24320  
Pressure regulation in equalization chamber of model blowdown wing tunnel used at various Mach numbers, calculating compressed-air flow through control valve and characteristics of transfer function 12 p1857 A66-24322  
Discrete and self-adaptive systems - International Federation on Automatic Control Congress, Basel, Switzerland, August-September 1963 12 p1851 A66-24323  
Stability and quality evaluation of nonlinear sampled data control systems using Popov criteria for continuous nonlinear systems 12 p1852 A66-24325  
Applicability and limitations of analytical methods in study of nonlinear sampled data automatic control systems 12 p1852 A66-24326  
Automatic system optimization techniques using independent random trial signals, relying on correlation functions 12 p1853 A66-24332  
Dominant operator method to determine characteristic of self-adaptive automatic

control system 12 p1853 A66-24335  
 Space structure welding-automation system consisting of Sciaky-welding system, automation control and seam-tracking system [ASTME PREPRINT MS66-708] 12 p1886 A66-24409  
 System approach and requirements of particular switching system of Automated Patching System /Aps/ for use on Atlantic Missile Range /AMR/ 12 p1818 A66-24596  
 Automatic control, systems science, cybernetics, biomedical engineering, human factors - IEEE International Convention, New York, March 1966 12 p1854 A66-24634  
 Control problems regarding space developments, considering automation, reliability, computer role, human operator, etc 13 p2056 A66-25231  
 Combined automatic control systems with automatic adjustment of amplification coefficient of disturbance controller for error reduction 13 p2045 A66-25300  
 Phase stability of system of particles in cyclic accelerator with automatic frequency correction of accelerating field, noting kinetic equation method 13 p2147 A66-25748  
 Equalization systems for stochastic processes, discussing automatic adaptive servocontrol, feedback control and vibration simulation equipment 13 p2048 A66-25848  
 Automatic control system stability reserve using amplitude phase criteria with respect to modulus and phase 13 p2049 A66-26055  
 Method for automatically adjusting networks for best approximation to desired responses, using iterative gradient techniques, constraint equations and Carroll programming technique 13 p2051 A66-26070  
 Synthesis problem solution for performance criteria defined by time domain sensitivity function, noting controller structure, parametric minimization and operative adjustment of parameters 13 p2051 A66-26071  
 Nonlinear signal comparators in feedback structures used for input-output invariance of single piecewise constant parameter 13 p2054 A66-26090  
 Sensitivity comparison of closed-loop and open-loop systems 13 p2054 A66-26092  
 Automatic stabilization systems reduce accidents due to disorientation, emphasizing sensor-servo system for roll axis control [SAE PAPER 660201] 13 p1996 A66-26390  
 Soviet book on automation and control of air breathing gas turbine and ramjet engines 13 p2173 A66-26463  
 Synthesis of automatic control system for tracking random moving coordinate solved by dynamic programming methods 13 p2055 A66-26467  
 Meteorological data from weather satellites equipped with TV and IR sensors, noting Automatic Picture Taking /APT/ recorder 14 p2289 A66-26806  
 Random error effect on directional gain of sectional parabolic antenna with automatic phasing, setting sections effectively by three control points method 14 p2250 A66-27141  
 Effect of relay response time on dynamic properties of automatic system incorporating linear group and relay element with pure delay 14 p2264 A66-27358  
 Synthesis of linear automatic control system with constant parameters for integral Q-factor, noting effect of small parameters on properties of optimum system 14 p2265 A66-27521  
 Solution of optimum filtering problems when input signals of automatic control system are described by different differential equations at successive time intervals 14 p2265 A66-27523  
 Approximation of variable time delays and design of constant and variable delay circuits, noting simulation of delays in automatic control systems by computers 14 p2266 A66-27528  
 Minimum effort control problem in rotund reflexive Banach space and extension to Hilbert space under bounded linear transformation 14 p2266 A66-27631  
 Automatic control of wideband vibration testing of nonrigid structure with wide range of acceleration levels requiring computation of feedback signal 14 p2267 A66-27665  
 Motion control for nonlinear system with

small initial perturbation 14 p2267 A66-27673  
 Autocorrelation and hypergeometric function applied in evaluating response of nonlinearities to Gaussian noise 14 p2267 A66-27726  
 Automatic preworkshop screening test apparatus for determining which components removed from aircraft during ground maintenance need to be sent to workshop 14 p2224 A66-28298  
 Frequency characteristics of pulse automatic control systems determined by auxiliary pulse system 15 p2469 A66-28544  
 Automatic device for reversible hypothermia in living organism, considering parameters of physiological functions, included in logic circuits 15 p2444 A66-29498  
 Plant physiological process measuring devices for automatic growth control in closed system 15 p2445 A66-29506  
 Dynamic characteristics of automatic control plants determined, using term-by-term integration of differential equations 15 p2475 A66-29768  
 Invariance provided for in nonlinear control systems by reducing problem to construction of inverse operator 15 p2530 A66-29977  
 Graphic analysis of behavior of stepwise extremal control system adapted to process showing inertia after static characteristic 16 p2668 A66-30585  
 Closed-loop automatic control system with unvalued substantially nonlinear element, using approximation of characteristics by Fourier series 16 p2669 A66-30754  
 Approximation method determining follow-up failure conditions for nonlinear automatic systems in presence of control and noise signals 16 p2669 A66-30755  
 Nonlinear automatic control system, discussing optimum tuning via parametric stability region construction 16 p2670 A66-30838  
 Graphic-analytical method for calculating optimum adjustment of disturbance-compensating system incorporating dynamic elements 16 p2670 A66-30839  
 Instruments and measurements, automatic control - International Conference, Stockholm, September 1964 16 p2706 A66-30879  
 Statistical decision theory determination of parameter variations in closed-loop automatic adaptive control system 16 p2670 A66-30880  
 Automatic level-control systems requirements for powerline carrier engineering 16 p2654 A66-31028  
 Book on automatic control of linear and nonlinear systems, particularly aircraft utilization 16 p2744 A66-31058  
 Automatic control systems with carrier frequency information transmission channel, deriving transfer functions 16 p2672 A66-31552  
 Stability of pulse-type automatic system described by matrix algebra 16 p2673 A66-31793  
 Reliability of back-up system with consideration of failures in switches and automatic control systems 17 p2880 A66-31904  
 Nonlinear automatic systems analyzed by reduction to first and second order systems by linear nonsingular transformation of variables 17 p2901 A66-32250  
 Synthesis method for automatic control systems, examining controller design for turbo-prop engine 17 p2901 A66-32311  
 Necessary condition for optimal control in nonlinear automatic control system determined, using method of successive approximations 17 p2902 A66-32574  
 Stability of automatic systems for tracking point targets, noting nonlinear dependence of signals on channel mismatch and its limiting values 17 p2902 A66-32579  
 Nonstationary automatic control systems design by reaction quenching method 17 p2902 A66-32580  
 Reliability of stand-by system with automatic reserve cut-in, considering probability method 17 p2888 A66-32709  
 Level quantization effect in statistical analysis of closed-loop digital automation systems 18 p3089 A66-33736  
 Peaceful uses of automation in outer space - Symposium, International Federation of

Automatic Control, Stavanger, Norway, June 1965 18 p3240 A66-33844  
 Automatic starter for nuclear reactor rocket engine with automatic power control system 18 p3133 A66-33874  
 Automatic control systems for attitude control of Apollo spacecraft 18 p3244 A66-33870  
 Nonlinear control laws for takeoff and landing of circular-orbit winged glide space vehicle 18 p3132 A66-33880  
 Operational circuits found in measuring devices and in regulation or control systems for low power signal transformation for space application 18 p3076 A66-33888  
 Spacecraft trajectories prediction under discrete control 18 p3228 A66-33886  
 Automatic control equipment for FR-1 and D-1 satellites 18 p3246 A66-33981  
 Attenuation factor and degree of stability of automatic control systems determined by Mikhailov criterion and Chebyshev polynomials 18 p3091 A66-34677  
 Wiener problem applied to synthesis of automatic control system incorporating minimum phase, nonminimum phase or unstable element 18 p3091 A66-34677  
 Reliability of automatic control systems considering properties of controlled plants taking error probability in control as criterion 18 p3091 A66-34677  
 Optimal set of parameters for radioelectronic equipment automatic control using nonlinear programming 18 p3091 A66-34981  
 Dynamics of nonlinear control systems by constructing cross sections of parameter space 18 p3091 A66-34981  
 Variable-structure automatic control system with switchable phase-shifting filters for linear plants, converting error signal to control switching device 18 p3092 A66-34999  
 Stability analysis of automatic control systems with random parameters, applying Mikhailov criterion 18 p3092 A66-34999  
 Time lapse in variable-structure automatic control systems 18 p3092 A66-35004  
 Graphical analysis of extremal control system stepwise adapted to process with extremal characteristic located between two first-order linear operators 19 p3324 A66-35581  
 Mikhailov criterion for exponential polynomials, determining existence of zeros in right half-plane 19 p3388 A66-35824  
 Equations of linear automatic control systems decomposed asymptotically 19 p3324 A66-35851  
 Sufficient conditions of optimality having control region dependent on phase coordinates 19 p3325 A66-35851  
 Automatic system with stored experience, examining probability density of useful signal 19 p3325 A66-35947  
 Self-oscillations of pulse type extremum system with plant having extremal characteristics shaped by multiplication of two coordinates 19 p3325 A66-35981  
 Invariance effect for finite number of coordinates in infinite dimensional automatic control system 19 p3325 A66-35981  
 Synthesis of automatic control systems for linear plants with variable parameters satisfying specified performance criteria 19 p3328 A66-36024  
 Stability, reproducibility and sensitivity of combined systems of automatic control with variable structure determined by presence of sliding mode region 19 p3329 A66-36021  
 Automatic control - Conference, University of Washington, Seattle, August 1966 19 p3330 A66-36660  
 Algorithm based on sequential optimization of nonlinear control system 19 p3334 A66-36676  
 Optimum discrete information system and relations between measurement quality decisions and system performance 19 p3310 A66-36681  
 Distributed parameter systems in discrete time models compared with response obtained by approximating transcendental transfer function with root factor and other approximations 19 p3282 A66-36683  
 Sequential estimation on states of linear systems disturbed by white noise, determining relations between covariance matrices 19 p3338 A66-36736

Microminiaturization in automatic control equipment and digital computers - Symposium, International Federation of Automatic Control and International Federation for Information Processing, Munich, October 1965 19 p3322 A66-36806

Automatic tracking radar control via nonstationary filter, noting design principle and operation 20 p3536 A66-36866

Control algorithms synthesis for analytical adaptive control systems with nonlinear plants investigated with hybrid computer 20 p3536 A66-36876

Forced modes of automatic continuous system with linear controlled plant with variable dynamic properties and learning model self-adjusted by search modulation 20 p3536 A66-36878

Equivalent transfer function of linear two-channel system of automatic control, discussing system stability dependence on cross links 20 p3537 A66-36891

Transient processes in linear automatic control systems dependent on parameters which appear when differential equations of analyzing system are transformed by Laplace-Karson method 20 p3537 A66-36892

Stability and quality of automatic control of plant with pure time delay, using regulator with constant and switching parameters 20 p3537 A66-36894

Automation of air traffic control, discussing radar, data handling and data communication 20 p3595 A66-37003

Space packaged automatic checkout system for aerospace vehicles including test equipment, control, measurement capability and computer program 20 p3542 A66-37244

Dynamics of two-channel automatic control systems taking into account nonlinear interaction between channels 20 p3538 A66-37268

Automatic control of spacing of Fabry-Perot interferometers to transmit at given wavelength 20 p3558 A66-37286

Operational reliability of finite automatic systems in terms of entropy in individual components 20 p3538 A66-37486

Effectiveness of shock-absorber parameters of instrument with weakly damped sensitive elements 20 p3560 A66-37677

Temperature automatic control system in photographic laboratory compensating for humidity changes by using semiwet bulb controller 20 p3561 A66-38049

Semiautomatic mechanical system for evaluation of rocket booster test stand oscillograms 20 p3561 A66-38065

Aircraft gas turbine starting with automatically controlled electronic unit, noting system design, operation and performance 20 p3540 A66-38299

Photoelectric solar power plant for water pumps in grazing areas noting design, construction and automatic control system testing 20 p3503 A66-38438

Automatic feedback table leveling system, noting tilt to simulate aerodynamic drag 21 p3722 A66-38887

Damping by hemispheric torquing to actively control spin axis in rotor while remaining unchanged with respect to case fixed reference 21 p3737 A66-38896

Autonomy in multiply connected variable structure automatic control systems 21 p3719 A66-39247

Moments of output coordinates of nonlinear system determined by algorithm based on approximation method, noting application to automatic control system 21 p3758 A66-39283

Nonlinear automatic system with logical device analyzed in presence of external action, obtaining harmonic linearization coefficients 21 p3719 A66-39284

Synthesis of control device for class of nonlinear sampled data system, obtaining processes with minimum control time 21 p3719 A66-39286

Time domain analysis and synthesis of time-varying linear sampled data automatic control system with separable impulsive responses 21 p3719 A66-39429

Effect of signal frequency maladjustment and automatic phase control circuit parameters on amplitude and phase shift of reflex amplifier, analyzing filtering properties 22 p3875 A66-40071

Adaptation, learning and self-learning in automatic systems, discussing stochastic approximation, pattern recognition, adaptive filters, etc 22 p3884 A66-40412

Book on synthesis of multiloop control systems for application to automatic control and computer circuit construction 22 p3885 A66-40854

Text on theory of automated air navigation, examining methods of flight preparation and precision 22 p3946 A66-40855

Stability of automatic control systems with nonlinearity and nonunique equilibrium state 23 p4048 A66-40967

Analytical design of controllers for linear autonomous systems of arbitrary order 23 p4048 A66-40969

Automatic flight control system for A-7A featuring high fixed gain dual channels, series servos and control augmentation in addition to normal attitude and path control functions 23 p4088 A66-40983

Stable transmission of given transient response in closed loop nonlinear servosystem under fixed initial condition and in presence of possible disturbances 23 p4048 A66-41393

Recognition and prediction systems, developing criteria for resolvable arguments 23 p4041 A66-41395

Automatic control system analysis via space-state method, using n first-order differential equation 23 p4049 A66-41399

Spontaneous switching from closed to open state observed in four-layer silicon diodes serving as keying elements in automatic systems 23 p4046 A66-41481

Automatic tracking from video signals, discussing characteristics of single and multiple gate trackers and measured performance 23 p4089 A66-41672

Motion stability conditions of plant equipped with automatic control device in certain critical cases 24 p4236 A66-42213

Chemical and electrical energies in manufacturing noting role of numerical control, hydrostatic processes, forming, electrochemical machining, etc 24 p4217 A66-42336

Analog and digital controls used in electron beam welding and metal working machinery including electron beam milling machine 24 p4217 A66-42345

Input signal level for stability loss or self-oscillations in automatic control system, using analysis for nonlinear systems with forced vibrations 24 p4188 A66-42476

Diagrams of computers calculating parallax angle of azimuthally mounted astronomical telescopes 24 p4211 A66-42484

Absolute stability of specific class of nonlinear pulsed automatic systems, noting error signal and amplitude modulation 24 p4189 A66-42948

**AUTOMATIC DATA PROCESSING SYSTEM**

Mass spectrometric electron impact ionization potentials rapidly obtained by electronic control and automatic data processing systems 07 p1091 A66-18489

Satellite Telemetry Automatic Reduction System /STARS/ capable of processing data at capacity of 200 million data points per day [ISA PAPER 7.2-2-65] 10 p1507 A66-21904

Automatic recording, printing and punching of meteorological data from signals measured by automatic bridges and potentiometers on high tower of Institute of Applied Geophysics 16 p2704 A66-30776

RT Data Automation System automatically controls and synchronizes data-gathering sequence of cruise instruments of Mariner IV spacecraft 19 p3307 A66-35668

Automatic telemetry checkout station for Saturn V systems using real time signal digitizer and general purpose computer 19 p3339 A66-35677

Automatic, multichannel system for data recording and processing obtained in studies of ionospheric structural inhomogeneities, containing magnetic-tape memory and device for digital tape memory and device for digital computer input 22 p3920 A66-40772

Steady and dynamic loads on tandem rotor, controls and airframe flight tested with Army helicopter, using automatic data processing [AIAA PAPER 66-735] 23 p4008 A66-41324

## AUTOMATIC FREQUENCY CONTROL

Automatic frequency control of laser local oscillator for heterodyne detection of laser signal and use of 2.5 gc frequency offset to permit retrieval of microwave data 05 p0633 A66-14908

Mean square phase fluctuations at phase detector input of automatic frequency control system with proportional integrating filter 06 p0859 A66-17192

Nonlinear forced oscillations in phase automatic frequency control system, accounting for nonlinearity of system 07 p1001 A66-17353

Filtering properties of frequency-stability transport circuits of molecular beam generator, noting design considerations for high efficiency 09 p1353 A66-20442

Residual difference between oscillator frequencies used to investigate noise immunity of phase automatic frequency control 14 p2236 A66-27245

Mean square phase fluctuations at phase detector input of automatic frequency control system with proportional integrating filter 19 p3324 A66-35550

## AUTOMATIC GAIN CONTROL /AGC/

Automatic gain control of emitter current to increase dynamic range and calculate amplitude characteristics of transistorized resonance amplifier 04 p0496 A66-13914

Automatic gain control circuits, discussing performance and comparing theoretical and experimental results 04 p0501 A66-14409

Single-pulse detection probability data for system with instantaneous automatic gain control and 5/1 bandwidth ratio obtained by Monte Carlo simulation 06 p0841 A66-15957

Amplitude and phase direction-finding characteristics of monopulse automatic tracking system operating on sum-difference principle 08 p1190 A66-18911

Automatic gain control for reducing dynamic range of signals at output of phase radio range finder, noting effect of parasitic phase shifts 14 p2236 A66-27356

Diode bridge variable attenuator used to overcome error signals and harmonic distortion in wide range AGC 14 p2267 A66-27805

Black-box approach applied to design of 60-megacycle IF amplifier, considering application of AGC to circuit and design of phase modulator and balanced mixer 19 p3321 A66-36423

Automatic gain control of emitter current to increase dynamic range and calculate amplitude characteristics of transistorized resonance amplifier 20 p3532 A66-37872

Response of automatic gain control amplifier to two narrow-band input signals, examining weak signal suppression and cross-product generation 22 p3875 A66-40059

## AUTOMATIC LANDING SYSTEM

Automatic and semiautomatic vectoring and landing capability of U.S. Navy carrier-based aircraft F-4G Phantom II 01 p0099 A66-10009

All-weather landing system for C-141 jet cargo transport using vertical navigation computer for military operations 01 p0101 A66-10035

Automatic landing equipment for 707/720 airplanes used under low visibility conditions noting autopilot, auto-throttle, yaw damper, etc 01 p0103 A66-10663

Outer loop control mechanization for automatic landing systems associated with flight control, noting series servo concept as compared to parallel servo mechanization 01 p0014 A66-10664

Electronic techniques applied to taxiing, takeoff, aerial navigation and landing 02 p0255 A66-11466

Present status of all-weather landing system 02 p0256 A66-11861

Reliability factors in flight controls, particularly automatic landing systems and controls for VTOL aircraft in transitional regime 02 p0231 A66-11863

Autoland, stalling and jet V/STOL systems for flight testing of aircraft [AIAA PAPER 65-783] 03 p0318 A66-12557

Head-up display /HUD/ developed for automatic landing in civil aircraft 03 p0329 A66-12884

Boeing Lower Minimums Program in terms of certified components and systems for Category II and for Automatic Landing

- [AIAA PAPER 65-765] 03 p0390 A66-13060  
All-weather landing progress based on improved airborne equipment, pilot qualification, approach lighting and ground environment
- [AIAA PAPER 65-767] 03 p0391 A66-13062  
One-way microelectronic airborne digital data converter intended for use in automatic carrier
- landings 06 p0824 A66-15969  
Inertial navigation systems for automatic landing, using category I instrument landing system 07 p1069 A66-17714  
Schuler tuned inertial system as flight sensor and control of VTOL aircraft translational velocity during hover phase and landing 07 p1070 A66-17724  
Feasibility of using Elliott Automatic Landing System, developed for medium-haul aircraft, on short-haul aircraft 10 p1553 A66-21361  
Automatic landing development in autopilot and autoflares for Trident aircraft 10 p1553 A66-21362  
All-weather landing systems evaluated 11 p1732 A66-23163  
Automatic system ensuring landing in absence of visibility and atmospheric turbulence by controlling motion of aircraft leveling out, consisting of time-dependent input signal shaping device and amplifiers 12 p1909 A66-24321  
Flight control systems, automatic landing devices and inertial navigation with gyros 15 p2534 A66-29365  
Guidance control technique for soft automatic lunar landing 16 p2743 A66-30887  
Operational all-weather landing system described, examining history and present status of all-weather operations 17 p2953 A66-33211  
Automatic landing system on trident aircraft 18 p3131 A66-33560  
Automatic landing of aircraft in blind flying conditions, Royal Aircraft Establishment equipment accuracy and safety 18 p3133 A66-35243  
Para-Visual Detector, flight director display unit, considered by British European Airways 20 p3595 A66-37005  
Manual steering, hybrid guidance system, in-flight computations and trajectory for automatic descent and landing system for LEM 21 p3768 A66-38899  
Sud-Lear all-weather landing system using automatic guidance 21 p3768 A66-39400  
Information and failure warnings monitoring by flight crew during autopilot operation, particularly during very low visibility landing
- [ICAS PAPER 66-17] 22 p3945 A66-40671  
All-weather landing systems in U.K., examining safety and reliability criteria in connection with trident airborne equipment
- [ICAS PAPER 66-8] 22 p3946 A66-40676  
Duplicate monitored system for automatic landing control of VC10 and Concorde 23 p4088 A66-41163  
VC10 test flight of autoflare and automatic landing instrumentation 23 p4015 A66-41165
- ### AUTOMATIC PATTERN RECOGNITION
- Automatic pattern recognition and application to space navigation 04 p0543 A66-13511  
Automatic vortex recognition system for Tiros satellite photograph analysis, noting phases of development and results obtained 16 p2658 A66-31251  
Images of automatic recognition system for two-dimensional patterns move in rapid nonstop manner across stationary scanning unit composed of bank of photodiodes 21 p3705 A66-39145  
Pattern recognition computer operating under automatic control and stored program control for data transfers, system operation, man-machine interface and display operations 23 p4041 A66-41056
- ### AUTOMATIC PICTURE TRANSMISSION
- /APT/  
Automatic picture transmission of Nimbus I meteorological satellite, considering frequency choice, vehicle position, antenna, image reception, etc 08 p1180 A66-18612  
Incorrect input-induced errors in meteorological satellite photogrids 11 p1704 A66-22318  
Device for automatically feeding experimental curve coordinates in large quantities into digital computer for high noise level photographic image 11 p1659 A66-22432  
Graphical method by which small local users of meteorological satellite pictures can identify geographical position of features in image
- [AIAA PAPER 66-439] 16 p2708 A66-31467  
APT signal reception from Nimbus and Tiros satellites, describing APT equipment and signal conversion 20 p3518 A66-37849  
High resolution IR scanning system and vidicon automatic picture transmission of Nimbus II and ground station printout instrumentation 21 p3821 A66-39497
- ### AUTOMATION
- Gas tungsten arc welding process automation based on feedback control concept 16 p2715 A66-31435  
Legal problems in space law, noting automation and new space public domain 19 p3484 A66-36220  
Behavioral analysis of stochastic automata in random media, discussing automata design with quasi-linear behavior and expedient behavior 20 p3537 A66-36895
- ### AUTOMATON
- SA FINITE-STATE MACHINE  
Analog simulation of operations on stochastic matrices using random transitions in automata aided by relay-contact circuits 03 p0350 A66-13037  
Probability analysis of finite automata with unreliable binary elements and regular structural design 03 p0350 A66-13038  
Coding states of partial automaton where memory-element transition functions depend on minimum possible number of variables 03 p0338 A66-13041  
Comparison of manned and unmanned spacecraft 04 p0472 A66-14092  
Global search of performance surface to find parameters optimizing performance of learning control system, using variable structure stochastic automaton 05 p0653 A66-14598  
Common framework for automata theory and control theory 06 p0863 A66-16619  
Algorithm used for synthesis of regular events in asynchronous automatic machines 07 p1014 A66-17437  
Infinite automata theory and structural logical design of digital machines 11 p1659 A66-22707  
Minimizing number of states of automaton with consideration of transition 11 p1676 A66-22708  
Abstract automata analysis based on solution of system of equations in algebra of events 11 p1676 A66-22709  
Limit behavior of closed system of automata with random input 11 p1676 A66-22710  
Automata theory and control theory analytically compared for general and linear systems and tolerance 11 p1680 A66-23275  
Probabilistic automata as generalization of deterministic and nondeterministic finite model, theorems and concept of definiteness 12 p1853 A66-24338  
Random distribution function of nonfailure operation time, taking into account exponential time distribution law of fault occurrence 16 p2672 A66-31407  
Probabilistic logical analysis of neurons and neurophysiological functional organization of core of reticular formation 18 p3056 A66-33761  
Analog simulation of operations on stochastic matrices using random transitions in automata aided by relay-contact circuits 18 p3073 A66-35000  
Probability analysis of finite automata with unreliable binary elements and regular structural design 18 p3092 A66-35001  
Coding states of partial automaton where memory-element transition functions depend on minimum possible number of variables 18 p3074 A66-35004  
Self-reproducing array with simple programming using finite automaton as basic unit 19 p3306 A66-35335  
Learning control system design, discussing hill-climbing and pattern recognition schemes in framework of statistical decision,
- automata and information theory 19 p3333 A66-36662  
Asymptotically optimal stochastic automata in random medium, discussing penalization 23 p4051 A66-41840
- ### AUTOMOBILE
- SAE handbook, 1966, supplies definitions testing methods, measurement methods and data for engineering materials, machine elements and vehicle components 10 p1540 A66-21700
- ### AUTONOMIC NERVOUS SYSTEM
- SA CENTRAL NERVOUS SYSTEM  
Interaction between optokinetic and vestibulo-ocular responses during head rotation in various planes 11 p1643 A66-22587  
Blood pressure and heart rate during hypothalamic self-simulation in dogs, discussing experimental methods and results, physiological response, etc 16 p2640 A66-31154
- ### AUTOPILOT
- Evolution of Honeywell first generation adaptive autopilot inner loop and application to F-94, F-101, X-15 and X-20 vehicles 01 p0099 A66-10000  
Category II lower weather minimums for aircraft landing of airlines of western world [AIAA PAPER 65-766] 03 p0391 A66-13062  
Flight evaluation of long range inertial navigation and steering in autopilot and manual operation 07 p1076 A66-17792  
Optimum autopilot design for maneuverable lifting bodies 11 p1733 A66-23342  
Drone aircraft onboard stabilization circuit design for control signal transmission and transient response irrespective of noise background 11 p1778 A66-23348  
Automatic pilot consisting of guidance system for flight trajectory control and stabilization system for angular acceleration control 12 p1909 A66-23815  
Automatic stabilization of helicopters by using autopilots 12 p1801 A66-24388  
Motion equations for dynamics of aircraft control surface controlled by autopilot 14 p2328 A66-27687  
Category II lower weather minimums for aircraft landing of airlines of western world [AIAA PAPER 65-766] 14 p2328 A66-28107  
Duplex pitch channel in Hawker Siddeley Trident autopilot for glide path extension and flareout control 14 p2328 A66-28229  
Aircraft stabilization for solar eclipse observation, emphasizing use of autopilot for maximum control 16 p2743 A66-30823  
Textbook on automatic guidance of missiles and space vehicles 17 p2951 A66-33151  
Simulator results on guidance and control during supercircular atmospheric entry maneuvers 18 p3244 A66-33879  
Evolution of Honeywell first generations adaptive autopilot inner loop and application to F-94, F-101, X-15 and X-20 vehicles 19 p3397 A66-36483  
Adaptive roll autopilot in air-to-air interceptor missile, noting application of dither principle, simulation results and noise rejection qualities 19 p3398 A66-36691  
Simulation and analysis of adaptive roll autopilot for air to air missile, using limit cycle with small amplitude controlled by gain changing loop 20 p3595 A66-36865  
Aeroelastic instability of aircraft with automatic pilot, determining domain in which sensor position and other adjustable parameters may vary without risking instability 21 p3695 A66-38580  
Information and failure warnings monitoring by flight crew during autopilot operation, particularly during very low visibility landing
- [ICAS PAPER 66-17] 22 p3945 A66-40671
- ### AUTORADIOGRAPHY
- Autoradiography of components of a disassembled nuclear reactor as final phase in evaluating performance of experimental Kiwi rocket engine 06 p0907 A66-16430  
High speed gross alpha autoradiographic technique to reduce exposure time if silver activated ZnS is used as intensifier 07 p1030 A66-17235  
Autoradiography used to determine dislocation density in germanium, silicon and copper single crystals, with aid of tagged atoms 24 p4257 A66-42535

# AUXILIARY POWER SOURCE

## SA CHEMICAL AUXILIARY POWER SOURCE

Rechargeable chemical batteries using nickel-cadmium and silver-cadmium electrodes and chemical reaction 01 p0014 A66-10365  
Integrated secondary power system to provide additional capabilities for supersonic aircraft  
[SAE PAPER 650828] 01 p0016 A66-10828  
X-15 research vehicle auxiliary power system discussing operation, hardware and major components 01 p0016 A66-10829  
New cathode and electrolyte materials for high energy electrochemical batteries 05 p0612 A66-15307  
Noble gas-filled thermionic converter characteristics, performance and application 05 p0617 A66-15555  
Cesium diode with cylindrical molybdenum emitter and niobium collector fueled with uranium dioxide in out pile test 05 p0618 A66-15557  
Current and power gain of noble gas filled converter as affected by auxiliary emitter position to electrode and geometry 05 p0618 A66-15560  
Negative resistance of dynatron type and oscillations in reverse current range of cesium thermionic energy converter 05 p0620 A66-15572  
Solar-heated thermionic generator design and fabrication evaluation, considering mirror configurations 05 p0623 A66-15598  
Cavitation damage in high-temperature liquid metal pumps for Rankine cycle space power plants studied in water model 07 p1038 A66-18175  
Mercury lubricated hybrid bearings for lubrication requirements of mercury Rankine Silent Compact Auxiliary Power (SCAP) system  
[ASLE PREPRINT 65AM 3A3] 07 p1039 A66-18288  
Auxiliary power devices using solar, chemical and nuclear sources 07 p0992 A66-18305  
Automatic battery formation system for silver-cadmium electrochemical cells 08 p1169 A66-19505  
Charge current control circuit for nickel-cadmium cells with control electrodes 08 p1169 A66-19506  
Silicon photovoltaic cells in economic solar energy conversion on Earth 08 p1174 A66-19665  
Auxiliary turbine power generator using gas from solid propellant 09 p1333 A66-20331  
Fuel cell development in U.S., Europe and Great Britain, noting design, performance and problems 11 p1639 A66-22247  
Auxiliary power generating systems for 24-man space laboratory, evaluating power requirements, cost, weight and deployed area  
[AIAA PAPER 64-719] 13 p2004 A66-26614  
Shaft-power turbine design, including rotor vibration problems, computer high speed testing, application as auxiliary power supply in turbojets, etc  
[ASME PAPER 66-GT-87] 14 p2225 A66-26992  
Small gas turbines, market, technical problems, etc  
[ASME PAPER 66-GT-90] 14 p2372 A66-26994  
Multiple quick-disconnect valve used in auxiliary power unit (APU) of aircraft and serving several systems at once while preventing fluid leakage from one system to another 14 p2226 A66-28032  
Auxiliary power unit turbine-engine starting system analyzed to determine sufficiency of selected accumulator 16 p2637 A66-31224  
Auxiliary propulsion for satellite attitude control 17 p2990 A66-32374  
Bismuth telluride alloy solar thermoelectric flat plate generators applied to auxiliary power systems for exploratory missions toward Sun 20 p3497 A66-37166  
Dynamic power generating systems using Rankine and Brayton cycles for space application 20 p3598 A66-37256  
Electrochemical power generator using silver cathode and zinc anode 21 p3698 A66-39474  
Nuclear power systems using radioisotope

and reactor power sources 22 p3946 A66-40127  
Nuclear reactor as power source in remote location 23 p4089 A66-41608  
Reciprocating engine for space power, noting power capacity as function of piston displacement 23 p4022 A66-41762  
Spacecraft turboelectric generation system using superconducting field as stator and rotor as armature to deliver 5000 vdc 23 p4023 A66-41764  
Potassium Rankine-cycle space power plant design for four turbine inlet temperature levels, noting construction materials 23 p4023 A66-41765

## AVALANCHE

### SA ELECTRON AVALANCHE

Punch-through avalanche phenomena, describing fast rise pulse production in junction transistors of variable base width 05 p0651 A66-15840  
Avalanche multiplication factors other than impact ionization leading to breakdown in p-n junctions 06 p0850 A66-16445  
Microwave power generation from avalanching diffused and epitaxial silicon and gallium arsenide varactor diodes 06 p0851 A66-16462  
Gas breakdown by laser can be accounted for by both microwave breakdown theory and inverse bremsstrahlung 06 p0893 A66-17040  
Silicon diode microwave oscillators and amplifiers, noting application of avalanche transit time for increased efficiency of p-n junctions 10 p1515 A66-22090  
Microwave generation with conventional transistors in avalanche mode, describing circuit, mounting construction and avalanche oscillator frequency 12 p1830 A66-23757  
Threshold energy for avalanche multiplication in semiconductors obtained from energy band structure and crystal momentum conservation in ionization process 13 p2157 A66-25035  
Nonlinear dielectric laser light absorption by neutral gas resulting in avalanche breakdown of gas due to thermal ionization 13 p2090 A66-25425  
Sensitivity and operation of IR detector using avalanche multiplication in microplasmas in silicon junctions, noting SNR at room temperature 13 p2164 A66-25490  
Circuit of step voltage generator using two transistors operating in avalanche breakdown regime 16 p2664 A66-31358

## AVALANCHE RECTIFIER

One-sided avalanche injection in n-p-p diodes as cause of negative resistance for carrier concentrations smaller than impurity concentration 10 p1515 A66-22085  
Noise current spectrum of Read type avalanche diode with ideal uniform avalanche behavior in thin zone 10 p1515 A66-22086  
Spectral density of white noise generated in uniformly multiplying p-n junction calculated for any distribution of injected carriers 10 p1515 A66-22087  
Electronic tuning effects through DC avalanche current variation in negative-resistance diode 10 p1515 A66-22088  
Time dependence of multiplication and refinement in silicon technology needed to establish uniform multiplication for Read diode prototype 10 p1515 A66-22089  
Avalanche breakdown voltages of abrupt and linearly graded p-n junction in Ge, Si, GaAs and GaP 14 p2356 A66-27027  
Microplasma breakdown in high voltage avalanche rectifiers, considering leakage current and junction impurity dislocation migration 14 p2363 A66-27583  
Controlled noise generation at high pulse rate with avalanche diodes, noting spectral voltage density and temperature coefficient 15 p2458 A66-28894  
Phase locking range of avalanche diode CW oscillator to external microwave signal by direct injection 15 p2463 A66-29042  
Low noise photodiodes with avalanche multiplication for high sensitivity, noting capability for low intensity wideband signal detection, performance in IR region, etc 17 p2880 A66-31934  
Solid state high speed pulse generators

utilizing avalanche transistor 17 p2893 A66-32927  
Avalanche transistor generation of jitter-free nanosecond current pulses for driving GaAs laser diodes at low temperatures 20 p3528 A66-37453  
Differential minority carrier storage circuit with avalanche pulse energization and fast rise/fall adjustable length pulse output 22 p3872 A66-39717  
Coupling of two avalanche diode oscillators to obtain increased continuous wave microwave power output 22 p3877 A66-40180  
Voltage control by means of Zener diode, transistor and variable-gain amplifier circuit 23 p4044 A66-41214  
Avalanche radiation from bulk of long thin forward-biased p-n-p silicon diodes 24 p4180 A66-42258  
Curves computed for avalanche multiplication and Zener tunneling for gallium arsenide specimens of various thicknesses 24 p4258 A66-42958

## AVIATION

### S AERONAUTICS

### S CIVIL AVIATION

### S MILITARY AVIATION

## AXIAL COMPRESSION

Electrical resistivity and Hall coefficient of undoped n-type gallium arsenide with carrier concentrations measured at various temperatures as function of uniaxial compression and hydrostatic pressure 03 p0412 A66-13149  
Statistical study of linear buckling of circular cylindrical shells under axial compression, showing preferred mode shape [ASME PAPER 65-APMW-23] 04 p0592 A66-14224  
Strain dependence of impurity conductivity measured in compensated p-type germanium, using uniaxial compression 06 p0922 A66-16171  
Deleterious effect of heterogeneity on stability of composite cylindrical shells under axial compression 06 p0968 A66-17083  
Strain energy method used to examine stability and supercritical strains of rib-reinforced cylindrical shells under axial compression 08 p1305 A66-18595  
Stress-strain state of elastic space, examining circular crack for axial tensile load effects 08 p1305 A66-18597  
Axisymmetric creep in cylindrical shells, noting creep buckling collapse after high temperature compression loading [AIAA PAPER 66-123] 08 p1308 A66-19002  
Elastic general instability of orthotropically stiffened cylinders under axial compression [AIAA PAPER 66-139] 08 p1308 A66-19003  
Edge conditions effect on elastic stability of cylindrical shells extended to additional combinations of boundary conditions, considering cylinders under axial compression 08 p1310 A66-19144  
Idealized cylindrical shell buckling under axial compression derived from generalized integral expression 08 p1310 A66-19166  
Microwave reflection measurements for precursor in electromagnetically driven shock tube, discussing axial distribution and electron density 09 p1409 A66-20855  
Statistical study of linear buckling of circular cylindrical shells under axial compression, showing preferred mode shape [ASME PAPER 65-APMW-23] 10 p1615 A66-21474  
Structural efficiency of orthotropic materials for cylindrical shells under axial load, including examination of fibrous composites characteristics [AIAA PAPER 65-73] 12 p1956 A66-23583  
Dynamic buckling of imperfection sensitive models, specifically cylindrical shells under axial compression 12 p1957 A66-23590  
Stability and buckling of core-filled axially compressed circular cylinder 12 p1957 A66-23603  
Initial deflection effect on stability of rib-reinforced cylindrical shells under axial compression 12 p1967 A66-24109  
Stability analysis of shells of revolution with curvilinear generatrices under axial compression, using strain energy technique 12 p1967 A66-24110  
Imperfections and edge restraint effect on buckling of axially compressed

- cylinders 14 p2404 A66-27988  
 Longitudinal stiffeners eccentricity /one-sidedness/ effect on buckling strength of axially compressed cylinders 14 p2404 A66-27989  
 Supersonic flutter of circular cylindrical shells subjected to internal pressure and axial compression [AIAA PAPER 65-407] 15 p2610 A66-29281  
 Stiffener eccentricity and end moment effect on stability of cylindrical panel in axial compression 15 p2610 A66-29283  
 Stability analysis of elastic axially compressed orthotropic glass-fiber-reinforced-plastic cylindrical shell with linear heredity properties 15 p2611 A66-29341  
 Metal hardening by explosive loading under near triaxial compression determined by charged power and independent of plastic deformation magnitude 15 p2523 A66-29599  
 Cylindrical thin shells with axial stringers under axial compression 15 p2614 A66-29636  
 Bending stresses in cylindrical shell with rigid circular inclusion examined under axial tension and internal pressure [AIAA PAPER 66-525] 16 p2813 A66-30526  
 Critical stress, stability loss and load carrying capacity of axially compressed thin walled aluminum alloy rods 16 p2819 A66-31142  
 Weight savings derived from use of contrasting ring, stringer and wall materials in J-stiffened axially compressed cylinders [AIAA PAPER 66-508] 16 p2821 A66-31480  
 Heterogeneity effect on multilayer composite cylindrical shell stability under axial compression 17 p3025 A66-32454  
 Thin circular cylindrical shell behavior in axial compression, noting buckling under stress, boundary condition detail effects, etc 17 p3031 A66-33064  
 Propellant composition influence on finite-amplitude axial wave mode instability in solid propellant rockets [AIAA PAPER 66-600] 18 p3161 A66-34431  
 Ring stringer eccentricity effects on structural optimization of stiffened axially compressed cylinders 20 p3672 A66-38166  
 Shell stability in Euler formulation, taking into account actual redistribution of stresses that results from initial deflection and creep, noting buckling of closed cylindrical shell under axial compression 21 p3829 A66-38978  
 Postbuckled equilibrium configurations of axially compressed circular cylindrical shell determined from large deflection theory and principle of stationary potential energy 22 p3993 A66-40340  
 Structural efficiency of orthotropic materials for cylindrical shells under axial load, including examination of fibrous composites characteristics [AIAA PAPER 65-73] 23 p4138 A66-41107  
 Energy method application to buckling of axially compressed cylindrical shells with ring-stiffened edges, noting upper and lower bounds and critical rigidity ratio 23 p4140 A66-41912  
 Stress distribution and displacements in neighborhood of circular hole in cylindrical shell subjected to load such as torsion or axial compression 23 p4142 A66-41959  
 Large deflection postbuckling analysis of thin walled oval cylinders under axial compression 23 p4143 A66-41961  
 Approximate finite deflection analysis of buckling of long slightly curved panels in axial compression 23 p4143 A66-41963  
 Postbuckling behavior of circular cylindrical shell locally buckled under axial compression 23 p4143 A66-41964  
 Classical critical stress values for buckling of thin walled circular cylindrical shells in axial compression as function of edge conditions 23 p4143 A66-41965
- AXIAL FLOW**  
 Torsional oscillations of plane with large suction effect on magnitude of induced axial steady inflow toward surface of disk 01 p0057 A66-10429  
 Incompressible laminar axisymmetric near wake behind very slender cylinder in axial flow 02 p0175 A66-11527  
 Couette flow, unpressurized axial flow in annular gap between two cylinders and flow between two rotating cylinders, taking into account energy dissipation and dependence of viscosity on temperature 04 p0512 A66-14423  
 Corrugation growth on infinitely conducting fluid sheets, discussing acceleration induced by constant axial and linearly increasing currents 06 p0871 A66-16276  
 Doppler broadened Cv spectral line from theta pinch and microscopic plasma velocities by reducing axial motion effect 07 p1086 A66-17654  
 Arc plasma generator for anode research, noting design operation techniques and results [AIAA PAPER 66-162] 10 p1485 A66-21687  
 Hypersonic rarefied gas flow in short ducts, measuring wall static pressure and stream total pressure distributions 11 p1634 A66-22932  
 Free-molecule flow through conical tubes noting mass transport, axial momentum, energy, flow distribution and speed ratio 11 p1635 A66-22938  
 Noise measurement in axial flow fans for military vehicle cooling installations 14 p2220 A66-27567  
 Annular vortices method applied to determine aerodynamic characteristics of lifting propeller in axial and oblique flows 23 p4010 A66-41785
- AXIAL FLOW COMPRESSOR**  
**SA CENTRIFUGAL COMPRESSOR**  
 Acoustical fatigue study of propeller duct designed for minimum weight to maintain specified thrust-to-weight ratio 01 p0150 A66-10155  
 Axial compressors with nonuniform inlet flow, investigating size of gap between blade rows and rotating stall 01 p0008 A66-10953  
 Correction factors derived for avoiding formation of stagnation cores near hub of axial compressors 01 p0008 A66-11094  
 Performance of blade rows in transonic axial-flow compressor for V/STOL aircraft 03 p0313 A66-12393  
 Rotating stall and blade row interference in axial compressor 03 p0313 A66-12395  
 Visualizing rotating stall in axial compressor simulated by rotary-cascade machine using water 03 p0313 A66-12396  
 Book on matched parameters of gas turbine engines for aircraft including rpm and peripheral speed, calculating parameters for axial-flow compressors, centrifugal compressors, turbojet, turboprop, etc 04 p0573 A66-14004  
 Outlet angle in axial compressor cascades, accounting for effect of shear flows, Bernoulli surface rotation and flow separation [ASME PAPER 65-WA/FE-2] 05 p0608 A66-15714  
 Multiple stage axial flow compressor with blades staggered differently at different stages 06 p0801 A66-16000  
 Theory of highly rarefied cascade flow and proposal for new axial flow molecular pump in free molecule range 06 p0803 A66-16945  
 Flow through straight slot cascade, investigating application to axial compressors for optimum slot parameters 06 p0803 A66-16968  
 SNECMA axial flow transonic compressor development during last ten years 09 p1433 A66-19866  
 Number of working blades effect on magnitude of total work coefficient and other characteristics of axial radial compressor 09 p1435 A66-20763  
 Vibration suppression in axial flow compressors, discussing blade root damping and pin hole stress 09 p1469 A66-20968  
 Versatile facility applicable as high-speed annular cascade wind tunnel or as transonic axial flow test compressor 12 p1859 A66-24928  
 Stress analysis of rim-straddling fastenings for axial compressor and turbine blades 13 p2171 A66-25081  
 Mathematical analysis of noise generation mechanism in axial-flow compressor rotors [ASME PAPER 66-GTIN-42] 14 p2372 A66-26987  
 Recent progress in aerodynamic design of axial flow compressors and components in U.S. [ASME PAPER 66-GT-95] 14 p2217 A66-26998
- Adjustable stator blades in axial compressors, noting advantages of system for constant-speed electric or variable-speed turbine drives 14 p2373 A66-27017  
 Vibration suppression in axial flow compressors, discussing blade root damping and pin hole stress 15 p2468 A66-29926  
 Two-stage radial-flow turbomolecular vacuum pump noting design, measured and predicted performance, application, etc 16 p2710 A66-30382  
 New type of vacuum pump is multistage axial compressor known as /turbomolecular/ pump 16 p2715 A66-31308  
 Noise sources in axial flow fans, including broad frequency band lift fluctuations, turbulent wakes, velocity fluctuations, etc 17 p2989 A66-31946  
 Transonic stage design in axial compressor 17 p2838 A66-32310  
 Low speed three-stage axial flow compressor tests at aspect ratios of one, two and four [AIAA PAPER 66-613] 19 p3275 A66-35359  
 Recent progress in aerodynamic design of axial flow compressors and components in U.S. [ASME PAPER 66-GT-95] 19 p3278 A66-36756  
 Inhomogeneity of axial velocity component in or near blades forming impeller intake of radial compressor attributed to flow deflection 24 p4158 A66-43067
- AXIAL FLOW TURBINE**  
 Velocity distribution in turbine stage with compressible medium for repeating axial velocity profile derived, employing approximation method 01 p0130 A66-10211  
 Three-dimensional incompressible viscous flow calculated for axial-flow turbine stage of given blade profile, verified by computer method developed from cascade theory 05 p0605 A66-14961  
 M.A.N. RB 153 jet engine development, characteristics and capabilities 06 p0943 A66-17019  
 Ducted axial flow fan noise generation and noise spectrum 10 p1483 A66-21743  
 Size and position effect, baffle effect and wake and pressure interaction effect of upstream stator on ducted axial flow fan noise 10 p1483 A66-21746  
 Computer programs for efficiency predictions of axial flow turbines, using Ainley-Mathieson and Soderberg methods of loss correlation 13 p1991 A66-26224  
 CERCOR glass-ceramic axial flow rotary regenerator as inexpensive component for gas turbine regeneration [ASME PAPER 66-GT/107] 14 p2301 A66-27004  
 Graduate level textbook on axial flow turbine design, examining useful thermodynamic/fluid mechanic concepts, cascade potential flow, turbine efficiency, etc 17 p2991 A66-32991  
 Flow transition from propeller in free stream to axial pump in cylindrical shroud for impeller clearance between zero and infinity 21 p3695 A66-39499
- AXIAL LOAD**  
 Prebuckling deformation and stress-strain distributions in clamped thin cylindrical shell subjected to axial load, determining effect of boundary supports 02 p0297 A66-11557  
 Fracture strength of two rocket-nozzle-grade graphites under ten biaxial stress states at room temperature 03 p0435 A66-12637  
 Creep buckling, examining two-hinged H-section long column under distributed axial load and effect on buckling time, column deflection and numerical results of example 03 p0436 A66-12720  
 Reduction of Rabotnov approximate equation describing steady creep in circular cylindrical shells, under axisymmetric loading, to system of integral equations 04 p0588 A66-13567  
 Linear small deflection theory and statistical analysis in dynamic buckling of thin cylindrical shell under axial impact [ASME PAPER 65-APMW-17] 04 p0592 A66-14218  
 Reynolds equation for compressible and incompressible lubrication for load coefficients and attitude angles of axial

- groove cylindrical bearings  
[ASME PAPER 65-LUB-16] 04 p0528 A66-14248
- Parametric response of elastic columns  
discussing longitudinal inertia effects,  
analytic stability criteria and results  
[ASME PAPER 65-WA/APM-13] 05 p0777 A66-15435
- Collapse under end load of pressurized  
axially stiffened thin  
cylinders 07 p1147 A66-18282
- Self-oscillating hydraulic vibration  
apparatus capable of generating high cyclic  
actuating power for testing  
purposes 07 p1147 A66-18389
- Stresses and elongation of U-shaped  
bellows subjected to axial load solved by  
elastic theories of plates and  
shells 08 p1314 A66-19549
- Postbuckling behavior of metal plate strip  
subjected to opposing axial loads, using  
nonlinear bending theory  
[ASME PAPER 65-AV-3] 11 p1780 A66-22470
- Critical impact load under which  
axisymmetric deformation of perfect elastic  
isotropic cylindrical shell becomes unstable  
determined, using deflection  
theory 12 p1959 A66-23746
- Linear small deflection theory and  
statistical analysis in dynamic buckling of  
thin cylindrical shell under axial impact  
[ASME PAPER 65-APMW-17] 12 p1961 A66-23980
- Parametric response of elastic columns,  
discussing longitudinal inertia effects,  
analytic stability criteria and results  
[ASME PAPER 65-WA/APM-13] 12 p1961 A66-23985
- Photoelastic solution of distribution of  
stresses around centrally located elliptical  
hole in plate of finite width subjected to  
uniform axial loading 12 p1962 A66-23991
- Extensive creep deformation of thin zero-  
moment shell of revolution under action of  
internal and axial load 12 p1966 A66-24059
- Time to viscous failure of tubes subjected  
to internal pressure and axial  
load 12 p1967 A66-24066
- Stability of cylindrical nonlinearly elastic  
shell under axial loads applied to shell  
ends 15 p2607 A66-28766
- Deformation of finned conical shell under  
axial load 15 p2608 A66-28781
- Stiffness, carry-over factor and fixed-end  
moment of axially loaded nonuniform  
members under tension or  
compression 17 p3024 A66-32397
- Creep behavior of selected polypropylene  
monofilament under axial  
loading 17 p3029 A66-32789
- Boundary value problems in secondary  
creep of circular thin shells under  
axisymmetric loading, giving solutions for  
deformation rates and stress  
resultants 17 p3030 A66-32891
- Bending behavior of spherical shells  
through second-order differential equation  
with complex coefficients, noting effect of  
load 18 p3253 A66-33765
- Crack propagation, damage and fatigue  
fracture in plane rods with transverse cut  
under single step and multistep axial  
load 20 p3666 A66-37307
- Impact of elastic conical shell of revolution  
moving with constant axial velocity toward  
rigid obstacle 21 p3827 A66-38692
- Comparison between theoretical and  
experimental measurements of rotation  
caused by axial load on highly twisted bars  
following stress relieving 23 p4138 A66-41380
- AXIAL PUMP**
- Working process of axial-inflow  
turbomolecular pump for ultrahigh vacuum,  
noting pressures reached during  
tests 19 p3371 A66-36617
- AXIAL STRESS**
- Cylinders subjected to internal and  
external pressure and axial stress with  
equations for radial and tangential  
direction 02 p0299 A66-11706
- Equations of plastic interaction curves for  
cross section of beam subject to uniaxial  
stress and under simultaneous bending  
moment and normal force, using power  
series 03 p0442 A66-13306
- Biaxial uniform stressed state of physically  
nonlinear plate with circular  
hole 04 p0589 A66-14145
- Free steady state jet subject to axial  
tension applied to Newtonian liquids, noting  
effect of flow variables on dimensionless  
criterion 04 p0512 A66-14209
- Asymptotic expressions for axial stress in  
thin viscoelastic shells due to longitudinal  
impact obtained, using Laplace transform,  
determining viscosity effect on propagating  
wave shape  
[ASME PAPER 65-WA/APM-10] 05 p0776 A66-15432
- Plastic deformation effect on strain energy  
release rate, examining axial rigidity of  
plate with central propagating crack under  
uniaxial tension  
[ASME PAPER 65-WA/MET-9] 05 p0780 A66-15687
- Asymptotic expressions for axial stress in  
thin viscoelastic shells due to longitudinal  
impact obtained, using Laplace transform,  
determining viscosity effect on propagating  
wave shape  
[ASME PAPER 65-WA/APM-10] 10 p1615 A66-21476
- Transport properties of III-V and II-VI  
semiconducting compounds with zincblende  
structure under uniaxial stress, calculating  
galvanomagnetic coefficients, Faraday effect,  
plasma frequency, etc 10 p1578 A66-21665
- Evaluations for multiaxial-stress properties  
of ceramic materials including elastic and  
plastic strength, stiffness, ductility,  
resilience, etc 12 p1958 A66-23631
- Hydrodynamics of free steady state jet  
subject to axial tension, numerical  
computation of perturbation corrections for  
Newtonian jets 12 p1797 A66-24031
- Plastic deformation effect on strain energy  
release rate, examining axial rigidity of  
plate with central propagating crack under  
uniaxial tension  
[ASME PAPER 65-WA/MET-9] 12 p1970 A66-24539
- Biaxial behavior of titanium sheet,  
obtaining stress states, yield strength, burst  
strength, etc  
[ASME PAPER 66-MET-6] 14 p2312 A66-26974
- Steady state creep equations derived for  
anisotropic material under multiaxial stress  
states, based on perfect plasticity  
analogies 16 p2820 A66-31275
- Model-forming process in which plane flat  
sheet is stretched by pair of loads  
producing biaxial principal stresses,  
examining stress ratios, loads and plastic  
strains 18 p3247 A66-33573
- Comparison of characteristic roots arising  
from Fluegge and Donnell theories, when  
certain amount of axial prestress is imposed  
on circular cylinder 19 p3474 A66-36345
- Absorption of polarized electromagnetic  
waves at zero degrees K in n-type  
germanium under high uniaxial  
stress 19 p3446 A66-36396
- In-plane stiffness matrices for composite  
cylinders of filament winding determined by  
internal pressure, axial tension and torsion  
tests 20 p3666 A66-37440
- Optimal control of elastic flight vehicles,  
describing axis oscillations by equations of  
beam with variable cross  
section 21 p3768 A66-39279
- AXIAL pressure asymmetry produced by  
Hall effect in linear pinch  
discharge 23 p4104 A66-41512
- AXIS**
- S ROTOR AXIS**
- AXISYMMETRIC BODY**
- Matched asymptotic expansion to derive  
dynamical displacements of infinite elastic  
space embedded with light rigid  
axisymmetric body 02 p0299 A66-11806
- Supersonic and hypersonic flow fields  
around plane and axisymmetric bodies and  
inlets obtained by nonlinear characteristics  
method 04 p0454 A66-13519
- Computer analysis of axisymmetric free  
vibrations of orthotropic shells of revolution  
and elastic rings  
[AIAA PAPER 65-109] 05 p0781 A66-15790
- Hypersonic gas flow past axisymmetric  
slender blunt body by Chernyi approximate  
method 07 p0983 A66-18142
- Asymptotic solution of problem of thin  
spherical shell free vibration for  
axisymmetric and general  
cases 08 p1308 A66-18888
- Extended physical optics methods for  
calculating nose-on echo area of  
axisymmetric thin bodies having sharp  
apices 10 p1500 A66-21617
- Newtonian flow model minimization of  
pressure drag of slender axisymmetric two-  
dimensional body subjected to isoperimetric  
constraints 11 p1631 A66-22511
- Optimum minimal-drag shape of slender  
axisymmetric body in free molecular  
flow 11 p1632 A66-22526
- Optimum nose form determination for  
minimum drag in free-molecule flow of  
asymmetric body 11 p1635 A66-22937
- Uniqueness theorem of axisymmetric  
exterior traction boundary value problem in  
linear elastostatics theory 12 p1971 A66-24818
- Laminar separated hypersonic flow over  
spiked bodies in gun tunnel for analyzing  
parameters influencing heat transfer rates  
in reattachment region 14 p2218 A66-27403
- Axisymmetric solid motion about fixed  
point under constant momentum, using  
chain fractions and Lagrange  
method 14 p2336 A66-28063
- Similarity law for longitudinal contours of  
optimum bodies minimizing drag in  
hypersonic and low subsonic free molecular  
flows constrained on length, base width,  
wetted area, etc 14 p2221 A66-28183
- Direct numerical method for calculation of  
supersonic inviscid flow about axisymmetric  
blunt body at large angle of attack  
[AIAA PAPER 65-24] 15 p2423 A66-29269
- Contact process of linearly viscoelastic  
axisymmetric die, for case of  
noncommutative operators 15 p2611 A66-29342
- Supersonic flow over downstream-facing  
step on circumference of ducted  
axisymmetric body used in flow  
reattachment, measuring surface pressure  
distributions 17 p2839 A66-32440
- Periodic solutions of axisymmetric shell  
theory equations for displacement of shells  
of revolution and bending of thin walled  
rods 17 p3026 A66-32593
- Supersonic wind tunnel measurements in  
turbulent wake of axisymmetric slender  
body [AIAA PAPER 66-453] 18 p3046 A66-33649
- Laminar, transitional and turbulent  
boundary layer flows with adverse pressure  
gradient on axisymmetric blunted conical  
flared body at Mach 10 10
- [AIAA PAPER 66-493] 18 p3047 A66-33658
- Approximation method for compressible  
laminar heat transfer to blunt axisymmetric  
bodies in high speed flow 18 p3048 A66-33824
- Optimum stabilization problem for  
axisymmetric satellite, considering fuel  
consumption 19 p3467 A66-35277
- Optimum stabilization of axisymmetric  
satellite by system of n reactive  
jets 22 p3986 A66-40464
- Linear dynamic analysis of angular motion  
of spinning axisymmetrical rocket or  
spacecraft, emphasizing rigid body with  
thrust misalignment and another motion  
caused by deflection of control surfaces or  
jets 22 p3988 A66-40618
- Body shapes providing minimum wave  
resistance to supersonic flow of perfect gas,  
considering bodies around which flow causes  
bound shock waves 23 p4009 A66-41717
- AXISYMMETRIC DEFORMATION**
- Plastic analysis of conical shells of  
revolution under axisymmetric loads based  
on approximate parabolic hypercylindrical  
yield 01 p0153 A66-10445
- Critical load of ellipsoidal end faces of  
cylindrical reservoir assuming deformation  
beyond critical load is  
axisymmetric 01 p0155 A66-10657
- Four types of axisymmetric distribution of  
stresses and displacements in infinitely long  
rod of circular cross section with  
discontinuous boundary  
conditions 01 p0155 A66-10713
- Axisymmetrical stressed state of three-  
dimensional models exposed to transmitted  
light determined from photoelasticity by  
polarized method 01 p0158 A66-10986
- Plate theory for case of thin elastic  
deformable circular plate under rotationally  
symmetrical stress 02 p0296 A66-11243
- Large axisymmetric nonlinear elastic or  
plastic deformations of zero-moment circular

conical shells 04 p0590 A66-14160  
 Donnell-type nonlinear theory for  
 instability of cylindrical shell subjected to  
 axisymmetric moving loads with constant  
 velocity [ASME PAPER 65-APMW-35] 04 p0594 A66-14235  
 Finite element structural analysis of  
 stresses and displacements in axisymmetric  
 solids of arbitrary geometry [AIAA PAPER 65-143] 05 p0781 A66-15786  
 Nonlinear axisymmetric deformation of  
 shallow spherical shells subjected to  
 dynamic loads 05 p0781 A66-15791  
 Asymptotic solution to elasticity theory  
 problem for hollow isotropic cylinder of  
 finite dimensions and small thickness under  
 axisymmetric load distributed over entire  
 surface 07 p1144 A66-18183  
 Simplified calculation of axisymmetric  
 bending of annular three-layer plates with  
 lightweight filler by use of initial parameter  
 method 08 p1313 A66-19437  
 Stress-strain calculations for thin walled  
 axisymmetric shells with arbitrarily shaped  
 midplane based on second-order  
 theory 10 p1614 A66-21383  
 Large deflections of spherical shells under  
 concentrated loads, obtaining curves for  
 axisymmetric deformations 10 p1616 A66-21493  
 Axisymmetric imperfections effect on  
 elastic buckling of spherical caps under  
 uniform pressure 10 p1617 A66-21785  
 Edge effect in case of finite pipe under  
 arbitrary axisymmetrical load, determining  
 radial displacement 11 p1782 A66-22851  
 Aircraft fuselage design in region of  
 center section for case of asymmetric  
 bending 11 p1782 A66-22854  
 Critical impact load under which  
 axisymmetric deformation of perfect elastic  
 isotropic cylindrical shell becomes unstable  
 determined, using deflection  
 theory 12 p1959 A66-23746  
 Critical load of ellipsoidal end faces of  
 cylindrical reservoir, assuming deformation  
 beyond critical load is  
 axisymmetric 12 p1963 A66-24015  
 Inverse problem of stressed state of elastic  
 plate reinforced by members of known  
 rigidity under axisymmetric  
 load 12 p1967 A66-24107  
 Axisymmetric creep of circular cylindrical  
 shells taking into account axial  
 forces 12 p1968 A66-24347  
 First boundary value problem for general  
 case of axisymmetric stressed state of body  
 of revolution, using biharmonic solution of  
 Love and Grodskii 13 p2196 A66-25636  
 Axisymmetric deformation of cylindrical  
 shell consisting of many layers of glass  
 fabric connected by polymer  
 mass 16 p2823 A66-31626  
 Hollow metallic O rings used for sealing as  
 thin shells under axisymmetric  
 loading 17 p3020 A66-32002  
 Transient wave processes of deformation in  
 spherical shell under load abruptly applied  
 to geometrical pole 17 p3029 A66-32805  
 Donnell-type nonlinear theory for  
 instability of cylindrical shell subjected to  
 axisymmetric moving loads with constant  
 velocity [ASME PAPER 65-APMW-35] 18 p3248 A66-33574  
 Stress analysis of junction of thin elastic  
 shells of revolution, considering  
 axisymmetric wind and sinusoidal load  
 distributions 18 p3253 A66-33804  
 Moment theory for thin spherical elastic  
 shells under axisymmetric loading, noting  
 role of Poisson ratio 19 p3474 A66-35851  
 Stiffness method for analysis of elastic-  
 plastic shells of revolution with  
 axisymmetric loading implemented by step-  
 by-step method of integration in computer  
 program 20 p3667 A66-37482  
 Three-dimensional and axisymmetric  
 problem in elasticity theory with particular  
 reference to  
 photoelasticity 23 p4135 A66-40989  
 Structural dynamics of axisymmetric  
 deformation of semiinfinite plastic  
 cylindrical shell under concentrated ring  
 impact 23 p4147 A66-41999  
 Axisymmetric bending problem of idealized  
 elastic rigidly-plastic two-layer circular

plates, deriving exact mathematically strict  
 solutions and uniqueness  
 conditions 24 p4290 A66-42443  
 Numerical integration of equations of Love  
 first approximation for thin isotropic shells,  
 presenting results for torus and flask having  
 variable wall thickness 24 p4292 A66-42964  
**AXISYMMETRIC FLOW**  
 Axially symmetric potentials represented  
 as mean values in integral operators given  
 for Stokes-Beltrami  
 equations 01 p0058 A66-10505  
 Transonic flow in throat of plane  
 axisymmetric nozzle determined by taking  
 velocity potential in form of power series  
 and determining coefficients of series from  
 set of recurrence  
 equations 01 p0007 A66-10714  
 Boundary layer on spherically blunted  
 cones in supersonic air flow at given wall  
 temperature and thermally insulated wall,  
 graphing calculation 01 p0008 A66-11016  
 Inlet region of laminar meridional flow in  
 arbitrarily shaped narrow gap between two  
 axisymmetrically formed  
 walls 02 p0217 A66-11585  
 Viscosity effect on transition between  
 axisymmetric and nonaxisymmetric flow  
 regimes of vertical rotating annulus of  
 liquid 02 p0223 A66-11826  
 Nonisothermal wall problem for vertical  
 right circular cone in laminar free  
 convection for fluids with low Prandtl  
 numbers 02 p0305 A66-12200  
 Similar flows about axisymmetric bodies  
 rotating in fluid at rest 03 p0354 A66-12351  
 Axisymmetric modes and frequency  
 vibration of thin conical shells subjected to  
 rapid surface heating [AIAA PAPER 65-788] 03 p0434 A66-12558  
 Geometric shape of axisymmetric shock  
 waves from point source explosion in  
 nonhomogeneous medium 03 p0355 A66-12621  
 Turbulent mixing of axisymmetric jet of  
 partially dissociated nitrogen with ambient  
 air, establishing mixing and decay  
 characteristics 03 p0359 A66-13231  
 Thermal energy transfer in base portion of  
 stagnant region obtained from plane and  
 axisymmetric flow  
 equations 04 p0454 A66-13570  
 Closed form solution of axisymmetric  
 transonic flow about  
 obstacle 05 p0665 A66-15796  
 Propagation of shock wave of gas flow  
 from axisymmetric nozzle 06 p0802 A66-16422  
 Axisymmetric MHD flows classified by  
 configuration of electromagnetic  
 field 07 p1090 A66-18123  
 Power characteristics of linear  
 axisymmetric flow of ideal incompressible  
 conducting gas with Hall effect in two-  
 component magnetic field 08 p1168 A66-18863  
 Thermal stresses due to axisymmetric heat  
 flow past spherical cavity inside long  
 circular cylinder solved by stress functions  
 and thermoelastic displacement  
 potentials 08 p1313 A66-19547  
 Numerical method for calculating flow,  
 including gas reactions and nonequilibrium,  
 behind given axisymmetric detached shock  
 wave 10 p1481 A66-21892  
 Hydrodynamic problem of nonviscous liquid  
 flow past two spheres solved, using new  
 method of solution 10 p1525 A66-21919  
 Unsteady two-dimensional axisymmetric  
 plasma flows, classifying isentropic or  
 incompressible flows according to magnetic  
 field configurations 11 p1746 A66-23234  
 Inviscid flow of compressible conducting  
 gas with aligned magnetic field through  
 axially symmetric Laval nozzle in various  
 transition regions 11 p1636 A66-23256  
 Shock layer approximation used in inverse  
 hypersonic blunt body  
 problem 12 p1795 A66-23574

Hydrol electronic/hydraulic antiskid braking system for automatic braking pressure modulation in BAC one-eleven 400 series aircraft 07 p0992 A66-18165

Interior design of BAC 111 short haul jet transport 13 p1994 A66-25565

Low speed handling with special reference to super stall, emphasizing rate of change of angle of attack and flight trials of BAC 111 and VC10 aircraft 19 p3280 A66-36748

Detail parts production out of Flomat, structural material composed of polyester resin and woven glass reinforcement for AC 111 20 p3562 A66-37424

## BACK INJURY

Statistical analysis of vertebral fracture in U.S. Navy during 1959-1963 period 16 p2644 A66-31132

## BACKGROUND EFFECT

USAF whole body gamma spectrometry in support of Air Force aerospace mission 07 p0999 A66-17664

Standard system for radar cross section error determination, noting calibration techniques, background level reduction methods, etc 10 p1504 A66-21660

Background gamma and electron fluxes reduction in charged-particle spectroscopy with fast-gated electronics 19 p3359 A66-35918

## BACKGROUND NOISE

Random-phase pulsed signal detection by contrast reception techniques against background of normal correlated noise 02 p0191 A66-11757  
Sampling techniques for extraction of periodic signals from background of random

noise 03 p0333 A66-12470

Statistical decision theory, applying Neyman-Pearson test, used to detect and discriminate signal 04 p0485 A66-14113

Probability density and distribution functions associated with noise and signal plus noise in radar IF, after linear and square law detector, and after these detectors with subsequent video integration 04 p0485 A66-14115

Formal variance of measurement error in frequency and phase of harmonic signal in narrow-band noise 08 p1201 A66-19688

Hearing acuity requirements of aircraft personnel, examining discrimination from background noise and acoustic trauma causative factors 10 p1493 A66-22130

Detection of fluctuating signal packets from noise background with unknown parameters 11 p1658 A66-23223

Detectability criterion for signal received against random noise 14 p2242 A66-28151

Statistical theory for optimum direction-finding system for space-time signal processing against wide-band fluctuation noise background 17 p2872 A66-31851

Formal variance of measurement error in frequency and phase of harmonic signal in narrow-band noise 18 p3091 A66-34674

Two-step procedure for high energy signal detection against noise background, based on statistical probability 19 p3296 A66-35296

Optimal detection of signals by spatially distributed receiving system against random noise background, using space-time signal selection method 20 p3517 A66-37744

Simultaneous estimate of delay time and drift of carrier frequency during nonoptimum reception against correlated noise background 20 p3519 A66-38002

Approximately minimax detection of vector signal on Gaussian background 22 p3939 A66-40188

Random dispersive wave intensity detection and measurement in presence of noise 23 p4037 A66-41499

Optimum detection of Markov signals against noise background in case of discrete time 24 p4188 A66-42474

Noise limitations in obtaining three-dimensional images by holographic techniques, considering graininess of photographic emulsion 24 p4212 A66-42752

## BACKGROUND RADIATION

Ionospheric effect on spectrum of general background galactic radio emission below 10 mc/s 02 p0284 A66-12192

Cosmic ray contribution to background of NaI scintillation spectrometers noting counting rate, surrounding material and atomic number 05 p0678 A66-14967

Optimum signal to noise ratio photon detector and relation to high background radiation 10 p1505 A66-21842

Miniature proportional counters with low background level for determining ultrasmall quantities of Ar 37 and H 3 10 p1610 A66-22017

Continuous radio emission in our Galaxy, discussing radio stars, background features, corona, emission mechanisms, etc 11 p1787 A66-22259

Type IV radio event of February 1965, noting four bursts preceded by decreases in background radiation intensity interpreted as absorption of type IV 12 p1952 A66-24966

Solar noise in optical communications, background radiation dependence on detector aperture, noise power and application to GaAs diodes and gas lasers 13 p2024 A66-25833

Night sky darkness explained as limitation of background radiation by various factors in static, steady state and evolving universes 13 p2075 A66-26602

HF brightness intensity of cosmic background radiation at 20.7 cm wavelength may be primordial fireball residue of big-bang cosmology 18 p3171 A66-34717

Miniature proportional counters with low background level for determining ultrasmall quantities of Ar 37 and H 3 19 p3453 A66-36103

Electron densities, magnetic field strength and energetic particle fluxes in

magnetosphere determined, using VLF background radiation 22 p3911 A66-39990

Microwave background radiation field accounted for by integrated effect of population of radio sources if CN excitation is collisional in origin 22 p3978 A66-40004

Kaufman assumption regarding universe expansion considered untenable because it requires intergalactic hydrogen temperature to remain constant while hydrogen has expanded in volume 22 p3978 A66-40008

Cosmic microwave background radiation, considering statistically homogeneous and isotropic but nonuniform distribution of matter 22 p3978 A66-40009

Potential sensitivity of energy radiation detectors, examining measurement error causes for radiation power of natural and artificial sources 24 p4172 A66-42523

## BACKSCATTER

Directional reflective coating consisting of cylindrical dielectric fibers oriented perpendicular to absorbing substrate [AIAA PAPER 65-671] 01 p0160 A66-10232

Relative backscatter coefficients for 16-mc backscatter from land and sea 02 p0190 A66-11472

Minimization of radar cross section of thin cylinder by central loading, calculating backscatter field 05 p0632 A66-14842

Plane electromagnetic wave scattering at rectangular conducting strips, examining front end backscattering and current distribution measurements 05 p0649 A66-15121

Radar backscatter cross section from turbulent wakes 05 p0635 A66-15797

New aspect function applied to radar signal return from ground approximates measured data more accurately than any other aspect function 06 p0826 A66-16031

Cross section measurement for electromagnetic backscattering of laser beams from rough aluminum and magnesium oxide surfaces 08 p1182 A66-18930

Multifrequency radar as remote sensor for exploration of Earth and Moon surfaces, examining variation of backscattering with change in wavelength 09 p1341 A66-19868

Angular dependence of mean power backscattered from Moon and Venus indicates greater smoothness of Venus surface 09 p1452 A66-20127

Current distribution along circular loop antenna, obtaining backscattering patterns as function of rotation angle 10 p1510 A66-21592

Short-pulse scattering by simple geometric shapes useful for heuristic models of electromagnetic scattering, illustrating creeping-wave return 10 p1500 A66-21618

Short pulse radar return of cone-sphere measured to determine contribution of individual scattering elements to total scattered field, noting creeping wave contribution 10 p1502 A66-21636

Auroral zone, ionospheric scattering and nongreat-circle HF propagation statistically analyzed 11 p1700 A66-23141

HF noise signals and association with auroral disturbances analyzed, using data from IGY network of backscatter sounders 11 p1701 A66-23154

Surface roughness and tolerances in model scattering experiments, noting shape perturbation consequences, frequency characteristics wave behavior, etc 11 p1658 A66-23406

Backscattered and surface fields for acoustically hard and soft prolate spheroids at end-on incidence computed, using tabulation of spheroidal functions 12 p1815 A66-24119

Ruby laser optical radar detection of upper atmospheric backscattering 12 p1818 A66-24395

Wavelength dependence of angel echoes, using radar backscatter from clear atmosphere 12 p1825 A66-24890

Clear air turbulence detection with optical radar, using spectral analysis of backscattered Doppler-shifted light particle formation mapping via correlates of rough flying conditions 15 p2450 A66-28920

CAT detection by radar backscatter measurement of radio refractive index eddies 15 p2532 A66-28925

CAT detection from Doppler shift in laser

light backscattered from atmospheric aerosol 15 p2500 A66-28930  
 HF backscattering by plane electromagnetic wave incident on concentric conducting sphere covered with concentric layers of different materials, noting refractive index value 16 p2647 A66-30224  
 Correlation of simultaneous optical and radio auroral data showing that radio wave scattering belt includes visual auroral belt 16 p2692 A66-30329  
 Stimulated Brillouin scattering from nitrogen and methane using giant pulse laser, noting convergence angle of backscattered beam sound, velocity measurement, etc 17 p2961 A66-32627  
 Lidar detection of backscatter from upper atmosphere 17 p2875 A66-32929  
 Backscatter returns from ionospheric sporadic E on sea and land 17 p2923 A66-33357  
 End-fire radar echo of long thin body minimized by impedance loading technique 18 p3065 A66-33535  
 Phase fluctuations of ground-backscattered signals recorded, noting phase stability of sporadic E-layer-supported and F-2-layer-supported ground backscatter 18 p3071 A66-34534  
 Theoretical calculation of propagation path geometry of VHF aurora backscatter communications compared with experimental observations 19 p3306 A66-36653  
 Depolarization of electromagnetic waves backscattered from rough surface boundary 20 p3515 A66-37293  
 Statistical analysis of diurnal variation in southern boundary of aurora, HF backscatter records and geomagnetic latitude of dayside aurora 20 p3553 A66-38193  
 Earth albedo estimation, backscattered interplanetary radiation and resonance scattering of dayglow 20 p3553 A66-38194  
 Physical-optics solution for backscattering from concave ring singularity 20 p3521 A66-38364  
 Backscattering characteristics of overdense essentially collisionless spherical plasma explained by surface wave interference 22 p3955 A66-40108  
 Vector scatter theory for backscatter of circularly polarized waves from Moon and Venus 22 p3866 A66-40174  
 Modified Fock function for current distribution in penumbra and shadow region of plane electromagnetic wave incident upon convex cylinder, with application to backscattering 23 p4040 A66-41637  
 16-megacycle backscatter echoes from sporadic E region recorded near Brisbane, Australia, examining dimensions of horizontally moving irregularities 23 p4064 A66-41685  
 Coherent CW superheterodyne radar system for studying backscattering from hypersonic velocity projectile wakes 24 p4191 A66-42196  
 Daily and seasonal variation of long distance propagation related to horizontal ionospheric gradients, particularly height of layer on wave path 24 p4174 A66-42739

**BACKWARD WAVE**  
 Uniform ferrite slow wave structure analysis of parameters, discussing three applications 01 p0040 A66-10554  
 Formed point contact gallium arsenide backward diodes compared with conventional millimeter-wave diodes show advantage as low level baseband current detectors 08 p1189 A66-18658  
 Superregenerative amplifier of backward wave including oscillation spectrum, resonance curve, noise coefficient, etc 09 p1357 A66-20777  
 Time-and space-resolved measurements on self-excited moving striations and on low pressure glow discharge to externally excited pulses 10 p1564 A66-21565  
 Surface and interface waves in plasma gaps, discussing backward wave 10 p1564 A66-21584  
 Backward diode application to microwave circuit design, discussing characteristics of stripline mount with probe detector 15 p2457 A66-28886  
 Frequency converters using traveling wave and backward wave tubes, noting current-

wave amplitude distribution, velocity and voltage 16 p2666 A66-31550  
 Flow structure and heat transfer for rearward facing step in supersonic flow, discussing critical Reynolds number, flow through lip shock, etc 17 p2913 A66-33068  
 Birefringence of certain crystals sufficiently large to allow collinear backward wave interaction of three electromagnetic waves with signal frequency tunable over large portion of IR spectrum 21 p3771 A66-39113  
 Superregenerative amplifier of backward wave including oscillation spectrum, resonance curve, noise coefficient, etc 22 p3873 A66-39836

**BACKWARD WAVE OSCILLATOR**  
 Coupled monotron analysis of band-edge oscillations in high power traveling wave tubes, discussing electron beam interaction with coupled-cavity structure 06 p0855 A66-16768  
 Gain-bandwidth product determined for traveling wave quantum amplifiers with regeneration by partially reflecting mirrors 11 p1711 A66-22727  
 Mode separation in bifilar-helix backward-wave oscillator 21 p3712 A66-39228  
 Backward wave oscillator /BWO/ design parameters and components 22 p3880 A66-40736  
 Gain-bandwidth product determined for traveling wave quantum amplifiers with regeneration by partially reflecting mirrors 23 p4078 A66-41465

**BACTERIA**  
 SA AZOTOBACTER  
 SA HYDROGENOMONAS  
 SA SPORE  
 SA VIRUS  
 Contamination of carbonaceous chondrites by ordinary viable microorganisms, isolating three types of bacteria on various meteorites 03 p0325 A66-13339  
 Cascade vault sampler for bacterial aerosols 08 p1177 A66-19087  
 Resistance transfer factor episome analyzed by measuring inactivation by cobalt gamma radiation, phosphorus and tritium, suggesting existence of DNA 14 p2228 A66-27308  
 Biological procession of human secretions and water regeneration by Chlorella in bacterial colony 15 p2440 A66-29501  
 Enteric microbial flora changes in man exposed 56 days to oxygen-helium atmosphere 18 p3058 A66-33777  
 Cosmic radiation and space flight effects on lysogenic bacteria and human cells in culture 21 p3700 A66-39315  
 Space diet effect on aerobic and anaerobic microflora of human feces 22 p3854 A66-39796  
 Bacteria survival and mutation in radiation environment on Voskhod I and II 22 p3855 A66-40474

**BACTERIOLOGY**  
 Characteristics, fine structure and mode of functioning of bacterial cell and artificial synthesis possibility 11 p1644 A66-22713  
 Number of viable aerobes and anaerobes accumulating on stainless steel surface in clean room during one year under various conditions, for spacecraft sterilization purposes 13 p2015 A66-25797  
 Inhibition of zoospores of unicellular chlorococcacean alga by soil bacillus through ammonium ion 17 p2860 A66-32833  
 Oral, cutaneous and aerosol bacteriological evaluation of astronaut exposed to oxygen-helium atmosphere at low pressure 18 p3058 A66-33778  
 Survival and growth of Bacillus cereus and B. subtilis in simulated Martian environment of diurnal temperature cycling and low moisture and oxygen 19 p3284 A66-35576  
 Rotary plate airborne bacteria sampler 22 p3858 A66-40505

**BACTERIOPHAGE**  
 Proton tunneling and mutation rate of Escherichia coli B To T1 and T2 phage resistance in water 13 p2008 A66-25788

**BAFFLE**  
 Damping of liquid oscillations in cylindrical tanks, determining rigid and flexible baffle loss coefficients, baffle efficiency and maximum bending stress

[AIAA PAPER 66-97] 08 p1207 A66-1900

**BALLOUT**  
 S EJECTION  
 S PARACHUTING

**BAKER-NUNN CAMERA**  
 Tesseral harmonics of coordinates using Baker-Nunn data and geopotential and dynamical procedures, noting iterative cycle for correction determination 15 p2491 A66-2999  
 Integrated brightness observations of comets, using Baker-Nunn satellite tracking camera 17 p3011 A66-3338

**BALANCE**  
 SA COMPENSATOR  
 SA HEAT BALANCE  
 SA MASS BALANCE  
 SA MICROBALANCE  
 SA STRAIN GAUGE BALANCE  
 SA WATER BALANCE  
 SA WIND TUNNEL BALANCE  
 Book on dynamic and static balancing of rotating machine parts and devices, particularly gyroscopes, noting effect of bearings, vibration causes, etc 09 p1383 A66-2093

**BALANCE EQUATION**  
 SA MOTION EQUATION  
 SA PRESSURE FIELD  
 SA VORTICITY EQUATION  
 Stabilizing methods for hypersonic aircraft noting effect of aircraft characteristics, parameters on magnitude of balancing coefficients of lifting force 14 p2223 A66-2766  
 Balance equations derived from kinetic equations for nonequilibrium plasmas considering radiative processes and inelastic collisions between electrons and atoms 16 p2766 A66-3160  
 Friction and imbalance moments relative to gimbal axes and effects on gyroverlock motion under starting conditions 21 p3739 A66-3933  
 Balance equations for heterogeneous continua - substances consisting of materials distinct, possibly interacting constituents derived from classical continuum physics viewpoint 21 p3772 A66-3934  
 Ion energy balance equation for ionosphere including effects of O, He, and H ions thermoconductivity and cooling by atomic hydrogen and helium 24 p4198 A66-4243

**BALL BEARING**  
 Model analysis of radial oscillations of shaft with pounding of ball bearings 02 p0299 A66-1186  
 Ball bearing lubrication with vapor from volatile organic compounds for wide temperature range and long term operation [ASLE PREPRINT 65-LC-24] 02 p0237 A66-1224  
 Operating performance of deep groove ball bearing used for gas turbine at high duty values 03 p0372 A66-1246  
 Microslip between ball and track in ball thrust bearings with ball subjected to forced and spin moment 04 p0527 A66-1423  
 Compressive residual stress effects of surface layers of through-hardened bearing steels produced by prenitriding before hardening [ASME PAPER 65-WA-CF-7] 05 p0690 A66-1562  
 Properties of helical delay line used to feed frequency scanned X-band array, noting role of ball bearing inserted in helix 06 p0854 A66-1668  
 Lift in spherical ball bearings with a lubrication calculated, taking into account inertial term in general equations of aerodynamics, gap variability and compressibility 08 p1232 A66-1969  
 Lubricants for space environment, noting experiences with satellites and application to ball bearings and electrical contacts 13 p2086 A66-2573  
 Book on design and utilization of antifriction bearings 13 p2087 A66-2625  
 Motion equations for radial oscillation of shaft with ball bearing chatter 14 p2305 A66-2847  
 Jet oil lubrication and scavenging technique for 20 mm high speed ball bearing [ASLE PAPER 66AM 1B4] 16 p2710 A66-3040  
 Ball bearing life operating in vacuum with

molybdenum disulfide and oils as lubricant  
ASLE PAPER 66AM 7A3]

Split-inner-race ball bearings design for  
use as thrust bearings on aircraft gas  
urbines  
ASME PAPER 66-LUBS-10]

Jet oil lubrication and scavenging  
technique for 20 mm high speed ball  
bearing  
ASLE PAPER 66AM 1B4]

16 p2712 A66-30416

17 p2931 A66-33183

22 p3928 A66-40657

ALLISTIC CAMERA

Calibration procedures and statistical  
analysis for error reduction in ballistic  
camera lead-screw type  
comparator 02 p0228 A66-11380

BRL ballistic camera system noting optical  
and mechanical characteristics, measurement  
and computer synchronization

methods 10 p1537 A66-21872

Spectral ballistic camera instrument  
providing relative intensity data and  
scintillation information on missiles and  
emissive body

jectories 21 p3735 A66-38607

ALLISTIC MISSILE

SA INTERCONTINENTAL BALLISTIC

MISSILE /ICBM/

Low cost inertial guidance system

commands missile attitude so that modified  
ballistic trajectory is followed along direct  
line of sight to target 01 p0098 A66-10003

Reliability and maintainability concepts  
applied to solid propellant subsystems of  
mobile ballistic missiles 01 p0129 A66-10108

Relative advantages of ballistic missiles  
and orbital ferries for placing payloads in  
orbit 02 p0306 A66-11862

Rarefied hypersonic flow at high Mach  
numbers and stagnation temperatures  
encountered by ballistic missiles and  
satellites, noting air plasma with magnetic  
field

AIAA PAPER 65-754] 03 p0354 A66-12588

Evaluation of methods for estimating  
circular error probable /CEP/ or system  
accuracy of ballistic missiles employing  
inertial navigation

systems 04 p0544 A66-14444

Maximum range of ballistic missile with  
given burnout speed and altitude, optimum  
angle obtained by geometrical  
means 05 p0760 A66-14891

Optimization of multistage ballistic missile  
system operating in drag environment by  
solution of physical discontinuity problems  
[AIAA PAPER 66-91] 06 p0959 A66-16406

Military aspects of U.S. space program,  
reviewing work from ballistic missile to  
Manned Orbiting

laboratory 08 p1321 A66-18550

Ballistic wind and density predictions,  
measuring wind and D-value at 500 mb,  
calculating missile response to atmospheric  
effects

AIAA PAPER 66-359] 12 p1906 A66-24478

Real time system for measuring and  
analyzing meteorological data for computing  
launch angles for unguided rocket flights  
[AIAA PAPER 66-336] 12 p1953 A66-24481

Inertial guidance systems using three-  
gimbal, four-gimbal and ball-type platforms,  
operative control of aircraft, ships and  
ballistic missiles 13 p2125 A66-26140

Hypersonic wake studies in ballistic missile  
research program, discussing reentry of  
hypervelocity vehicles, laminar flow,  
atmospheric turbulence,

te 14 p2218 A66-27402

Recovery locations and techniques for  
atmospheric reentry vehicles in normal  
flight and impact 14 p2395 A66-28454

Reentry scattering due to equilibrium  
incidence without using Allen

hypothesis 16 p2796 A66-30315

Optimum flight of axially propelled  
nonlifting vehicles through resisting medium  
calculated by calculus of variations  
[AIAA PAPER 66-485] 16 p2799 A66-30524

High speed computer technique for  
simulating test design parameters for  
evaluation of ballistic-weapon system  
accuracy

AIAA PAPER 65-222] 16 p2809 A66-30888

Downrange radar and optical data  
reduction used for evaluation of ejection

velocities of ballistic missile penetration

aids at deployment

[AIAA PAPER 66-405] 16 p2804 A66-31464

Stellar inertial guidance system composed  
of integral inertial platform-stellar sensor  
combination, airborne digital computer and  
power supply for Polaris

missile 18 p3132 A66-34042

Preflight and in-flight testing of stellar  
sensor subsystem for guidance of ballistic  
missiles 18 p3111 A66-34046

Approximation of aerodynamic stability of  
coasting vehicle leaving atmosphere at high  
speeds, assuming linear theory and constant  
aerodynamic coefficient 22 p3986 A66-40346

Optimization multistage ballistic missile  
system operating drag environment by  
solution of physical discontinuity problems  
[AIAA PAPER 66-91] 22 p3986 A66-40362

Problems arising in production and  
implementation of ballistic missiles and  
spacecraft programs 23 p4074 A66-41652

SYSTEM /BMEWS/ P

Ballistic missile defense and national  
security, discussing defense system  
requirements, strategy types,

etc 08 p1322 A66-18560

BALLISTIC RANGE

UV radiation from shock-heated nitrogen  
measured by ballistic flight through  
nitrogen-neon mixture

[AIAA PAPER 66-422] 17 p3035 A66-32751

Ballistic range blast-traversal testing  
technique using scale models containing fast  
response FM telemetry system modulated by  
capacitance type pressure transducer  
[AIAA PAPER 66-777] 23 p4053 A66-41333

Moving source scanning spectrometer for  
ballistic range radiometry noting spectral  
resolution, operation and performance  
characteristics 24 p4208 A66-42180

High velocity impact range diagnostic  
instrumentation including timing and  
triggering devices, laser and spark  
photography, radiation monitors, ballistic  
pendulum, etc 24 p4191 A66-42187

Onboard miniaturized telemetry system for  
stagnation point temperature measurements  
on free-flight models in ballistic  
ranges 24 p4209 A66-42189

BALLISTIC TRAJECTORY

Maximum ballistic rocket trajectory range  
in view of Earth rotational and curvature  
effects 11 p1734 A66-23346

Computer program for predicting satellite  
long-term orbit decay and digital simulation  
of atmosphere and reentry conditions  
[AIAA PAPER 66-357] 12 p1951 A66-24491

Restoration of trajectory without known  
initial point, considering ballistic missile  
trajectory 24 p4171 A66-42340

BALLISTIC VEHICLE

Orbiter injected sterilized ballistic skipout  
capsule for in-flight Martian stratosphere  
measurements, using nonablative heat shield  
and outside atmospheric propulsion  
maneuvers

[AIAA PAPER 65-23] 03 p0431 A66-12764

Booster rocket survey of U.S. and Western  
Europe 10 p1612 A66-21958

Externally caused radio frequency  
interference /RFI/ in electronic subsystems  
of ballistic vehicles at orbital  
altitudes 13 p2027 A66-26744

Internal ballistic considerations in hybrid  
rocket design, noting throttling and regimes  
of operation involving effects of surface-or  
gas-phase reaction kinetics

[AIAA PAPER 66-628] 20 p3663 A66-38035

Ballistic reentry vehicle recovery via low  
speed water impact or air snatch after  
vehicle has flown unperturbed trajectory  
down to altitude of maximum dynamic  
pressure 22 p3986 A66-40597

Airdrop, delivery of personnel, supplies  
and equipment from aircraft in flight,  
increased effectiveness through new family  
of low-cost cargo parachutes, ballistically  
deployed reserve parachute and extraction-  
force transfer coupling 22 p3850 A66-40614

Analytical approximate solution of motion  
equations for ballistic vehicles during  
atmospheric entry, examining velocity and  
inclination angle error dependence on height  
eccentricity and apogee radius

[ICAS PAPER 66-38] 23 p4007 A66-41010

Chemical effects on RF attenuation during

reentry for blunt-nosed lifting vehicles and  
sphere-cone ballistic

vehicles 24 p4158 A66-42782

BALLISTICS

SA INTERIOR BALLISTICS

SA PENETRATION BALLISTICS

Burning rate equation and constant volume  
burning of solid propellant to determine  
ballistic properties 15 p2617 A66-29606

Dispersionless ballistics patterns of  
weapons analyzed as check on reported  
computer program 16 p2831 A66-31147

BALLISTOCARDIOGRAM

Triaxial ballistocardiogram in weightless  
environment 18 p3056 A66-33715

BALLISTOCARDIOGRAPHY

Accelerographic and ballistocardiographic  
evidence of increased stroke volume  
secondary to acute high altitude  
hypoxia 17 p2855 A66-32135

BALLOON

SA HIGH ALTITUDE BALLOON

PROGRAM

SA METEOROLOGICAL BALLOON

SA ROBIN BALLOON

High altitude balloons for scientific  
research noting zero-pressure  
balloon 05 p0611 A66-15271

Venus probe design of expandable balloon-  
type instrument package capable of entry  
into and of static equilibrium within Kaplan  
atmosphere 14 p2392 A66-27887

Saturn booster recovery by means of drag  
balloon which converts to hot air balloon for  
final recovery 22 p3987 A66-40608

BALLOON FLIGHT

Cosmic ray intensity measured during  
geomagnetically quiet and active days from  
1959 to 1963 by using balloon flights, noting  
role of ionization, Forbush effect,  
etc 07 p1124 A66-18000

IR spectroscopic observations with balloon-  
borne telescope, Stratoscope

II 10 p1603 A66-21108

Radioactive debris over Fairbanks, Alaska,  
on February 18, 1965, investigating  
bremsstrahlung X-rays in auroral  
zone 12 p1875 A66-24896

High altitude balloons used to carry  
scientific instruments 14 p2222 A66-26926

Balloon flight near peak of solar cycle in  
search for solar and cosmic gamma  
rays 18 p3169 A66-34515

Time structure of auroral X-rays at  
Swedish and Finnish locations, using  
simultaneous balloon

flights 19 p3452 A66-35562

Upper limits resulting from search for  
solar photons in 100-kev to 2-mev range  
from balloon observations 22 p3973 A66-40549

Spark chamber system designed to detect  
gamma rays in cosmic radiation on high  
altitude balloon flights 24 p4215 A66-43212

BALLOON SOUNDING

Polyethylene balloons for atmospheric  
research in France 01 p0011 A66-10361

Vertical distribution of atmospheric ozone  
measured by balloon-borne Sun-seeking  
guidance system and light-scattering gypsum  
screen 01 p0071 A66-11044

Vertical profile of refractive index in  
lower atmospheric layer measured by  
modified A-22-IV radio probe on captive  
balloon 02 p0253 A66-11274

Mountain lee waves at White Sands Missile  
Range investigated by balloon

soundings 02 p0253 A66-11970

Balloon measurements of solar protons and  
auroral X-rays discussing radiation detectors,  
flight techniques, instrumentation and  
results 03 p0417 A66-12654

Height, wind speed and direction errors  
arising from radar tracking with level  
balloons 04 p0541 A66-13667

Electrons, hydrogen nuclei and helium  
nuclei observed in primary cosmic radiation  
by balloon in 1963, discussing integral  
intensity and differential energy  
spectrums 05 p0746 A66-14780

Detection of slow neutrons escaping from  
atmosphere by counters filled with boron  
fluoride onboard high altitude  
balloons 05 p0754 A66-15401

Flux and energy spectrum of primary  
electron component measured by balloon at  
period near solar activity

minimum 06 p0944 A66-16075

Cumulus modification experiment using

station network, radiosonde and pilot balloon stations, cameras, radar data, etc 06 p0905 A66-16268

Balloon-borne scintillation counters combined with Cerenkov counter for measuring primary cosmic ray charge and energy spectra during 07 p1123 A66-17994

1963 Spectral variation of low energy galactic cosmic ray protons and helium nuclei measured by balloon flights 07 p1123 A66-17995

Reflection spectrum of clouds in Venus atmosphere measured, using telescope mounted on helium balloon, noting details of instrument 07 p1137 A66-18055

Spatial and temporal character of fast variations in auroral zone X-rays, describing balloon experiment and results 08 p1284 A66-19397

Sky observations with balloon-borne X-ray telescope having sodium iodine scintillator 09 p1442 A66-20466

Aerospace studies in Argentina during 1964 using rockets and balloons and including winds, E layer, satellite tracking, etc 09 p1458 A66-20706

Localization and motion of energetic electron precipitation regions during negative magnetic bays, noting similarity of motion to that of auroral electrojets 10 p1599 A66-21147

Balloon-borne instrument for measuring downward flux of thermal radiation from atmospheric water vapor, using gold doped germanium detector 11 p1706 A66-22888

Vertical distribution of atmospheric ozone measured by balloon-borne Sun-seeking guidance system and light-scattering gypsum screen 11 p1709 A66-23291

Mesoscale perturbations in vertical wind velocity profiles obtained from superpressure balloons tracked by FPS-16 radars 11 p1731 A66-23381

Motion equations for stable rising balloon systems which consider effects of apparent mass and wind accelerations, using radar tracking [AIAA PAPER 66-398] 12 p1802 A66-24513

Simultaneous observations of auroral zone X-ray microbursts, using two balloon-borne radiation detectors separated by 300 km to estimate size of region of electron precipitation 12 p1944 A66-24841

Equilibrium temperature gradient determined from theoretical calculations and balloon and aircraft measurements 12 p1875 A66-24872

French EOLE experiment for measuring tropospheric parameters, describing balloon transponder, balloon and spacecraft electronic packages, telemetry, etc 12 p1956 A66-24934

Degree of clustering expected from 500-mb horizontal sounding system, using stream functions and velocity potentials derived from historical tapes of National Meteorological Center 13 p2121 A66-25815

Diurnal variation of average energy spectrum of auroral X-rays observed from balloon flights, assessing effect of atmospheric absorption 14 p2376 A66-27614

Outgoing Earth and atmospheric radiation observed in IR spectrum at various altitudes by geophysical balloons and rockets 15 p2483 A66-28739

Behavior of superpressure balloons in vertical air currents, noting various combinations of wind speed and wave amplitude 15 p2426 A66-28941

Camera tubes for recording Stratoscope II telescope, noting photometric fidelity 15 p2500 A66-28969

Crab Nebula X-ray spectrum from 16-120 kev by balloon 16 p2792 A66-30143

Balloon-carried automatic telescope-spectrometer observation of Venus upper atmosphere and determination of water vapor content 16 p2797 A66-30352

Small-scale wind variations in stratosphere and mesosphere studied by high resolution Robin falling-sphere soundings 16 p2740 A66-30510

Vertical profile of atmospheric radiative balance from balloon-borne actinometry at 25 to 32 km 16 p2698 A66-31344

Automatic reduction of recorded flight data from balloons equipped with radiation

detectors and SPARMO

telemetry 17 p2926 A66-33148

Launching balloon measurements of cosmic ray intensity as function of atmospheric depth at cosmic equator 17 p2994 A66-33150

Ambient temperature measurements from radiosondes flown on constant-level balloons 17 p2949 A66-33342

Flux and energy spectrum of primary electron component measured by balloon at period near solar activity minimum 18 p3187 A66-34814

Balloon observation of high energy primary electrons with counter system 18 p3187 A66-34816

Low energy galactic cosmic radiation studies by high altitude balloon flights carrying nuclear emulsions, including solar activity, energy and intensity spectra, etc 18 p3189 A66-34829

Balloon flight data obtained at 50 and 65 degrees N geomagnetic latitude on spectra of primary cosmic ray hydrogen and helium nuclei, using Cerenkov scintillator technique 18 p3190 A66-34831

Balloon-borne nuclear emulsion detection of solar cosmic ray heavy nuclei during solar burst 18 p3190 A66-34836

Balloon-borne nuclear emulsion detection of finite fluxes of low energy cosmic ray heavy nuclei and interstellar cosmic radiation propagation 18 p3191 A66-34838

Balloon-borne Cerenkov scintillation counter measurements of energy spectra of primary cosmic radiation heavy nuclei at various geomagnetic latitudes 18 p3191 A66-34840

Skyhook balloon flight Geiger counter cosmic ray monitor measurements of energy and charge spectra of galactic rays at solar minimum 18 p3192 A66-34847

Balloon-borne scintillation counter measurements of isotopic composition, energy/nucleon and rigidity spectra of primary cosmic helium nuclei 18 p3193 A66-34848

Spark chamber experimental investigation of flux of high energy gamma rays at high altitudes near magnetic equator 18 p3193 A66-34849

Balloon flight experiment to search for celestial sources of X-rays in energy range 20 to 58 kev 18 p3193 A66-34852

Atmospheric neutron flux measured by balloons, using polyethylene-moderated boron fluoride counter 18 p3197 A66-34875

Energy spectrum of auroral X-rays in range from 20 to 150 kev according to balloon measurements show remarkable diurnal variation 19 p3452 A66-35563

EOLE system consisting of balloons and satellite, interrogation for synoptic data on atmospheric circulation over Southern Hemisphere 19 p3346 A66-35638

Balloon sounding of Southern Hemisphere by global horizontal sounding technique /GHOST/, providing data on atmosphere circulation 19 p3279 A66-35639

Balloon measurements of cosmic ray hydrogen and helium nuclei at locations with nominal geomagnetic threshold rigidities 19 p3452 A66-35926

Possible enhancement to low-energy atmospheric proton flux induced by passage of Ikeya-Seki comet examined, using balloon-borne scintillation counter and pulse height analysis techniques 20 p3631 A66-37617

Moisture contamination and associated water band absorption spectra recorded by balloon-borne spectrometer 20 p3554 A66-38206

Wind distribution in atmospheric boundary layer under conditions of advection from pilot balloon observations 20 p3594 A66-38376

Cosmic X-ray source near direction of north galactic pole, noting empirical results from balloon observations 21 p3810 A66-39267

Equilibrium temperature gradient determined from theoretical calculations and balloon and aircraft measurements 22 p3912 A66-40333

Upper wind evaluation by pilot and radiosonde balloon radar tracking for flat Earth and effects of Earth curvature 22 p3943 A66-40428

Balloon-borne spark chamber observations of cosmic gamma rays from 30 to 500

mev 23 p4124 A66-4206

Radiosonde for high altitude balloon soundings using large polyethylene balloon to carry payloads of electronics, cosmic ray and nuclei counters 23 p4087 A66-4208

Flux and energy spectrum of low energy heavy nuclei of primary cosmic radiation measured by balloon-mounted nuclear emulsion stacks 24 p4284 A66-4260

Vertical profile of atmospheric radiative balance from balloon-borne actinometry at 25 to 32 km 24 p4201 A66-4265

Cosmic ray electron sign ratio and absolute flux measured by balloon-borne equipment 24 p4272 A66-4304

### BALLUTE

#### SA PARACHUTE

First-stage decelerator and stabilization balloon system for payload recovery for Mach 4 and 10 flight 04 p0585 A66-1353

Parachutes and other devices for slow body falling through air including Rogall wing, ballute, ribbon parachute and vortex ring parachute 24 p4160 A66-4319

#### BALMER SERIES

Stark broadening of Balmer lines in hydrogen plasma produced by alternating axial magnetic field induced by coil surrounding discharge tube 03 p0400 A66-1293

Absolute magnitude of magnetic star HD 1732 11 p1776 A66-2342

Grid computations of model atmosphere for A-type stars, considering effects of Balmer-line blanketing 18 p3227 A66-3376

Height distributions for atmospheric ionization rate and Balmer radiation resulting from precipitation of auroral protons 21 p3734 A66-3933

#### BANACH SPACE

Stability theorems concerning unconditionality of bases, considering Riesz theorem and Banach and Gilbert spaces 01 p0093 A66-1040

Optimal control problems in Banach spaces; discussing extension to infinite dimension, and application to distributed parameter systems 04 p0506 A66-1399

Stability of solutions of Cauchy problem for linear hyperbolic differential equations 07 p1056 A66-1760

Existence and convergence theorems for minimizing sequences for extremum problems in presence of constraints 10 p1551 A66-2197

Unilateral estimates under conditions of asymptotic stability of solutions to differential equations with unbounded operators 10 p1552 A66-2198

Error bounds in best approximation of given function in Banach space constrained by inequality relationships 11 p1722 A66-2298

Stability and boundedness for solutions of class of complex differential systems obtained in terms of Liapunov-like functions 11 p1725 A66-2342

Estimates of solutions to second order differential equations generalized to include inequalities with Schwarz derivative numbers 12 p1902 A66-2376

Minimum effort control problem in reflexive Banach space and extension to Hilbert space under bounded linear transformation 14 p2266 A66-2763

Variational problem in Banach space including optimal control problems, deriving conditions for extremality and Pontryagin maximum principle 15 p2473 A66-2937

Existence theorem of recurrent solution to differential equations defined in Banach space for dynamic and nondynamic systems 16 p2735 A66-3078

Nonlinear parabolic equations, considering existence, uniqueness theorems, abstract Cauchy problem, etc 17 p2946 A66-3230

Existence and convergence theorems for minimizing sequences for extremum problems in presence of constraints 19 p3390 A66-3618

Unilateral estimates under conditions of asymptotic stability of solutions to differential equations with unbounded operators 19 p3390 A66-3619

Well-posed BVP for linear partial differential system and relation of weak solution with two Banach spaces 21 p3754 A66-3845

Existence theorem of recurrent solutions  
of differential equations defined in Banach  
space for dynamic and nondynamic  
systems 22 p3940 A66-40447  
Error free recovery of signals from  
regularly spaced samples in terms of  
completeness of sets of nonharmonic  
exponentials 24 p4189 A66-43202  
**BAND**  
ABSORPTION BAND  
BLOCH BAND  
CONDUCTION BAND  
E-BAND  
ENERGY BAND  
ERROR BAND  
FORBIDDEN BAND  
FREQUENCY BAND  
K-BAND  
L-BAND  
PHOTOLUMINESCENT BAND  
POSITIVE BAND  
SCHUMANN-RUNGE BAND SYSTEM  
SLIP BAND  
SPECTRAL BAND  
SWAN BAND  
**BAND PASS FILTER**  
Open periodic structures applied as high  
power limited passband loss filter in  
microwave radar and communications  
transmitters 01 p0044 A66-10935  
Multiple passband monochromatic filter  
used in telescopes for spectrophotometry of  
red shifts of distant  
galaxies 02 p0227 A66-11352  
Figure of merit and methods of finding  
optimal filters for pulse-forming networks,  
taking into account frequency response as  
well as time response 02 p0208 A66-11910  
Working characteristics of transmission  
channel, calculating relationships between  
probability characteristics and output signal  
to noise ratio, considering band  
filter 04 p0496 A66-13903  
Coaxial helical resonator for VHF filters  
with sharp selectivity 05 p0644 A66-14578  
Hyperfrequency parametric amplifier  
circuit with modulation-demodulation  
applicable to very rapid pulse  
transmission 05 p0633 A66-15102  
Microwave filters, discussing cascaded lines  
of cavities, band pass and band stop filters,  
group delay, dissipation loss,  
etc 06 p0844 A66-16080  
Interdigital band pass filters and related  
coupled structures, deriving exact  
equivalent circuits from impedance  
matrices 06 p0845 A66-16085  
Circular TE sub 011 mode, trapped mode  
band pass filters, discussing energy radiation  
mechanism, design, operation and test  
results 06 p0845 A66-16087  
Frequency and resonance characteristics of  
two- and three-circuit band filters used in  
parallel spectral analysis 06 p0848 A66-16135  
Design and construction procedures for  
band-passed matched filter with 200 mc  
center frequency 06 p0853 A66-16658  
Filter used as input/output network in  
resonant transfer system, noting steady  
state passband and transient  
response 06 p0853 A66-16668  
Four formulas for Kuroda identities for  
band pass and band stop transmission line  
filters, noting role of transient  
response 06 p0854 A66-16685  
Suppression of FM in parallel signal  
channels, using Mix-On-Self /MOS/  
loop 06 p0834 A66-16858  
Maximum gain condition of resonance  
amplifier for given passband, determining  
impedance coefficient 07 p1005 A66-17351  
Quadrature modulation single-sideband  
circuit as frequency translating two-port,  
comparing performance with conventional  
modulator-with-SSB filter  
circuit 07 p1015 A66-17746  
Two-frequency volume resonator with  
independent tuning within wide frequency  
band 08 p1191 A66-18918  
Possible amplitude-frequency and phase-  
frequency characteristics of selective  
systems with smooth passband control and  
nonminimal phase 09 p1352 A66-20294  
Phase frequency characteristics of two- and  
three-circuit band pass filters used in radio  
receiving devices 09 p1354 A66-20450  
Band pass filter network with constant  
input resistance over entire frequency

range 10 p1517 A66-21655  
Exponential resonators in filters and  
matching networks, determining reactance  
or susceptance frequency behavior by  
plotting curves with analog  
computer 11 p1661 A66-22382  
Coaxial helical resonator for VHF filters  
with sharp selectivity 11 p1666 A66-22688  
Hybrid narrow band filter compared with  
Lytot filter, noting long-term instability and  
need for temperature  
control 11 p1706 A66-22892  
Ten-element band pass filter section and  
derivatives with classification of image-  
impedance functions 11 p1669 A66-23113  
Jacobi elliptic functions for designing low-  
pass filters whose attenuation is represented  
by universal normalized  
curve 12 p1829 A66-23661  
High performance active RC band pass  
filter design providing for independent  
adjustment of poles 12 p1843 A66-24675  
Calculation of loss in interdigital and  
combine filters due to finite conductivity of  
materials 13 p2029 A66-25204  
Band pass characteristics realized by four-  
layer distributed RC network without series  
resistance and amplifier scheme used as  
model for integrated circuits, noting  
frequency characteristics  
variation 13 p2051 A66-26069  
Passband filters with three coupled  
circuits, determining circuit characteristics  
by method based on use of right angle  
triangles 13 p2043 A66-26315  
Passband filters with three coupled  
circuits 14 p2246 A66-26802  
Junction filters for eight channels in SHF  
range with provision for 1800 paths, noting  
bandpass width signal mixing for antenna  
feed, attenuation, capability,  
etc 14 p2252 A66-27351  
Correctors for variations in group  
propagation time of AM wave transmitted  
by radio carrier wave, noting circuit analysis  
for matched and unmatched all-pass IF  
filters 14 p2252 A66-27353  
Transfer function for quadrature  
modulation single band signal generating all-  
pass filter, using differential operational  
amplifier 14 p2253 A66-27586  
Octave band all-pass filter with  
electronically tunable  
limiter 15 p2463 A66-29037  
Pole-sharing method for reducing number  
of poles required for synthesis of bank of  
contiguous bandpass  
filters 15 p2463 A66-29038  
Lumped-constant filters whose bandpass  
depends only on one parameter of  
transmission coefficient, having lower  
bandpass for given transient process delay  
time 15 p2464 A66-29120  
Formula involving two impedances leads to  
equations for positive real functions, for  
application to power gain of symmetric and  
antisymmetric filters 15 p2464 A66-29322  
Pulse generator network synthesis and low-  
pass/ bandpass  
conversion 17 p2900 A66-32198  
Asymmetrical property of binary  
pseudorandom noise generators, noting  
Gaussian probability density function in  
output of low pass filter 17 p2894 A66-33110  
Bandpass filter design with three coupled  
circuit and determination of amplitude  
curve and circuit  
constants 17 p2895 A66-33243  
Half-wavelength resonators as capacitive-  
gap strip-line bandpass-type microwave  
filters, discussing parameter derivation for  
equivalent circuit and Cohn synthesis  
method 18 p3087 A66-34621  
Possible amplitude-frequency and phase-  
frequency characteristics of selective  
systems with smooth passband control and  
nonminimal phase 18 p3087 A66-34958  
Synthesis of HF multicircuit band filters  
with indirect couplings 19 p3312 A66-35324  
Working characteristics of transmission  
channel, calculating relationships between  
probability characteristics and output signal  
to noise ratio, considering band  
filter 20 p3531 A66-37861  
Bandpass amplifier design by selecting  
peak frequencies occurring in active high-  
and low-pass RC filter  
sections 21 p3711 A66-39200

Multiple access to ideal bandpass limiter  
channel in pseudonoise system  
analysis 23 p4040 A66-41593  
Small and low cost voltage-tunable audio  
filter using field effect transistors as tuning  
element in place of inductors for space  
communications 24 p4180 A66-42334  
**BANDWIDTH**  
Synchronous tuning of microwave filters  
involving small changes in rejection  
bandwidth and being consistent with  
Chebyshev response 01 p0044 A66-10936  
Helix traveling wave tube using beryllium  
oxide ceramic as supporting medium for  
wide band slow-wave  
structures 02 p0200 A66-11879  
Gain-bandwidth limitations for physically  
realizable systems obtained in integral form  
by employing generalized representation  
theorem for bounded-real  
functions 02 p0208 A66-11904  
Gain and bandwidth narrowing in  
regenerative helium-xenon laser  
amplifier 03 p0376 A66-12308  
Data control constant-bandwidth frequency  
system and tricom system discussed as  
examples of better methods of taking  
advantage of communication frequency  
spectrum 04 p0480 A66-13727  
Digital computer research program for  
reducing bandwidth schemes and quality for  
picture transmission 05 p0676 A66-14820  
Optical ultrasonic delay lines as correlators  
and variable code matched filters to achieve  
large time-bandwidth products and high data  
rates 05 p0631 A66-14821  
Fabry-Perot interferometer using wire  
grids instead of glass plates, covering  
operation, advantages and bandwidth  
characteristics 05 p0682 A66-15355  
Traffic aspects of communications systems  
involving single wideband facilities carrying  
simultaneously traffic of various bandwidths  
and group switching to meet individual  
traffic requests 06 p0830 A66-16334  
Gain-bandwidth limitations and optimum  
design of noninverting frequency converters  
comprised of parametric conductance in  
parallel with parametric capacitance pumped  
in time-quadrature 07 p1017 A66-18348  
Noise spectrum and noise factor of  
semiconductor switching elements, including  
transistors and electron tubes, as function  
of bandwidth 13 p2041 A66-25897  
Impedance transforming compensated  
balance to unbalanced line transformer  
/balun/, discussing  
bandwidths 14 p2258 A66-27959  
PCM picture transmission, pseudorandom  
scanning, noise, bandwidth compression and  
digital simulation 15 p2450 A66-28785  
Bandwidth of nonoverdriven abrupt-  
junction varactor-frequency doubler,  
deriving upper bounds for minimum  
constant T for lossless  
case 15 p2465 A66-29323  
Pump modulation factor of various GaAs  
and Si varactor diodes under operating  
conditions, noting experimental bandwidth  
gain via increased shot  
noise 16 p2663 A66-31017  
Three-cavity extended-interaction klystron  
with cavities consisting of resonated  
sections of bar structure tested in pulsed  
operation, noting relation between cavity  
length and efficiency 16 p2663 A66-31020  
Simple diode parametric amplifier,  
discussing bandwidth and noise  
measurements, compensating circuits for  
gain-frequency response  
improvement 17 p2892 A66-32917  
Sampling techniques for conversion of  
broadband signal into multiple narrow  
bandwidth and reconversion back to original  
signal 19 p3302 A66-35705  
PCM bandwidth halving and twin working  
method of superimposing two PCM channels  
in frequency band occupied by one PCM  
channel 19 p3305 A66-36625  
Ground-state spin memory in excited state  
of ruby under broadband optical pumping,  
observing change in relative populations of  
Zeeman components 20 p3578 A66-37596  
Broadening frequency bandwidth of full-  
wave directive loop antennas employing  
reflectors and directors 20 p3531 A66-37727  
Equivalent width of waveguides by  
considering wave propagation in direction

perpendicular to waveguide axis 21 p3712 A66-39225

Contrawound helical antenna with independent control of polarization bandwidth and gain used for receiving or low-power transmitting 21 p3714 A66-39496

Wide stop bandwidths from quasi-optical filters formed from iterations of dielectric slabs demonstrated at millimeter wavelengths 22 p3877 A66-40181

Inverse transfer function of pulse-forming network for binary code transmission with small intersymbol interference in time domain and narrow bandwidth in frequency domain 22 p3866 A66-40182

Autocorrelation as pulse compression system, giving effective time resolution as inverse of correlation bandwidth and compression ratio of time resolution to signal duration 23 p4034 A66-41022

VHF power modulator devised to give broadband output signals within frequency range of 66 to 184 megacycles at 2.5 mw and 50 ohms impedance 24 p4184 A66-42644

**BANG-BANG CONTROL**

Parameter variation effect on performance of second order maximum effort /bang-bang/ controller, noting optimum system, stability analysis and analog computer study 02 p0207 A66-11790

Thrust modulation with minimum limit cycle in bang-bang system, reducing fuel consumption for spacecraft attitude control system 03 p0432 A66-13206

Nonlinear servomechanisms using bang-bang control mode 07 p1016 A66-17850

Extension of optimal guidance method of Kelley and Breakwell to systems containing bang-bang control component, consisting of rescaling of time variable 08 p1250 A66-19145

Lapunov second method applied to stability of general second order bang-bang control systems 12 p1850 A66-24259

Bang-bang damping rate on system components with time delay and lag 12 p1850 A66-24263

Determination for piecewise analytic F/t/ of what vectors can be represented by bang-bang control having finite number of discontinuities 15 p2469 A66-28514

Iterative gradient method application to trajectory optimization problems, noting feasibility to systems with continuous bang-bang controls 17 p2903 A66-33254

Optimum control laws for bilinear system, using distributed parameter model with optimizing procedures including bang-bang control and optimum feedback control 20 p3598 A66-36856

Bang-bang principle in problem of epsilon-stabilization of linear control systems extended to systems of arbitrary dimension 23 p4051 A66-41874

**BAR**

**SA ELASTIC BAR**

**SA PRISMATIC BAR**

Longitudinal oscillations of Voigt body bar whose characteristics vary with time and are bounded 06 p0964 A66-16475

Limit load of flat notched bars subject to tension, discussing rupture force magnitude, plastic strain occurrence, rupture stress and yield limit curves, etc 14 p2398 A66-27394

Coupled-modal equations for arbitrary vibratory system, with example for longitudinal vibrations of bar 22 p3992 A66-40298

Elastic-plastic and stress shock wave propagation in finite-length bar with monotone decreasing cross-sectional area 22 p3995 A66-40509

**BARANY CHAIR**

Barany hypothesis tested to clarify mechanism of caloric nystagmus by use of zero gravity environment 17 p2857 A66-32168

**BARBITURATE**

**S PENTOBARBITAL SODIUM**

**BARIUM**

Polarization effects in magnetic and nonmagnetic barium plus bismuth oxide and magnesium-zinc ferrites when subjected to DC low-voltage electric fields 03 p0409 A66-12690

Fuel cells using metallic barium as fuel electrode and oxygen or chlorine as cathode, noting net energy densities 08 p1172 A66-19656

Sounding rocket-released artificial

strontium and barium ion cloud motion in upper atmosphere, based on equations of ambipolar diffusion 15 p2491 A66-29950

Low pressure combination of barium and cesium vapors for reduction of transport-affected losses in thermionic energy converters, noting work function and V-I characteristics 18 p3055 A66-34584

Barium ion concentration computed from Ba II 4554 angstrom line and Lyman alpha radiation intensity in lower chromosphere 20 p3646 A66-37013

**BARIUM COMPOUND**

Conditions for formation of barium and gold compound for semiconductor 04 p0570 A66-14365

Conditions for formation of barium and gold compound for semiconductor 14 p2369 A66-28264

Thermionic emission from barium telluride measured by cathodes formed by direct reaction of elements and reduction of barium tellurate 19 p3436 A66-35426

Electrical properties of barium plumbate noting conductivity, Hall field, thermoelectromotive force, magnetization, etc 24 p4253 A66-42382

**BARIUM FERRITE**

Cation distribution in barium hexaferrites 10 p1589 A66-22169

Cation distribution in barium hexaferrites 19 p3441 A66-35783

**BARIUM FLUORIDE**

Frequency and temperature effects on dielectric properties of calcium, strontium and barium fluorides 10 p1577 A66-21561

Self-lubricating properties of composites of porous nickel and nickel-chromium alloy impregnated with barium fluoride-calcium fluoride eutectic [ASLE PAPER 66AM 1C2] 16 p2710 A66-30404

UV transmittance of LiF and BaF under various storage conditions 18 p3134 A66-34001

**BARIUM TITANATE**

Optical phase modulator using ferroelectric barium titanate crystal plate 01 p0117 A66-10240

Strain-free electro-optic effect in single crystal barium titanate as function of temperature between 10 and 120 degrees C 01 p0126 A66-10969

Semiconductor characteristics of barium titanate with n-type conductivity produced after heat treatment with hydrogen and doping with lanthanum 02 p0273 A66-11716

Curie temperature, static dielectric constant and electro-optic coefficient of large single crystals of barium titanate 03 p0411 A66-13007

Amplitude distribution of ultrasonic vibrations of excited disk of barium titanate ceramic polarized perpendicularly to faces 04 p0559 A66-13471

Boundary layer thickness responsible for anomalous lattice distortions of colloidal barium titanate 04 p0571 A66-14492

Structure, electrical properties and paramagnetic resonance absorption of barium titanate with admixtures of oxides of triple valent element 05 p0730 A66-14651

Barium titanate single crystals at infralow frequencies investigated for polarization, effective permittivity and coercive field 06 p0928 A66-16713

Reversing permittivity of barium titanate single crystals measured, using lithium chloride solution for electrodes 06 p0926 A66-16714

Permittivity of barium titanate single crystals with laminar domain structure 06 p0926 A66-16715

Polarization and domain structure of barium titanate single crystals with double hysteresis loop 06 p0926 A66-16716

UHF dispersion in barium titanate ferroelectric crystals explained as microwave scattering 06 p0926 A66-16717

Slow polarization processes of barium titanate in weak field 06 p0927 A66-16718

Classification of ions capable of replacing Ti in barium titanate 06 p0927 A66-16719

Permittivity of barium titanate ferroceramic materials determined by various methods 06 p0927 A66-16721

Electromechanical hysteresis and relaxation effects in piezoelectric ceramics 06 p0927 A66-16722

Temperature autostabilization in barium and strontium titanate solid solutions during dielectric heating 06 p0927 A66-16722

Electric properties of thin ferroelectric films of barium titanate compound 06 p0927 A66-16722

Pyroelectrical effect in barium titanate ceramics used for weak thermal radiation recording 06 p0881 A66-16722

Polycrystalline barium titanate ceramic with nonlinear resistance-temperature characteristic that rises steeply at ferroelectric Curie point 07 p1100 A66-18152

Surface layers on ferroelectric barium titanate crystals, noting parameters of R induced electroluminescence 07 p1107 A66-18402

Interferometric measurement of large indices of refraction, noting applicability and accuracy 09 p1403 A66-20510

Barium titanate transition front structure noting similarity to ferroelectric and nonferroelectric crystal structure 10 p1582 A66-21882

Quadratic electro-optical effect in paraelectric phase of barium titanate single crystals as affected by temperature 10 p1587 A66-22155

Polar vapor effects on dielectric properties of barium titanate single crystals with metal admixtures 11 p1749 A66-22293

Ultrasonic piezoelectric investigation of asymmetric polarizability of barium titanate crystal 11 p1757 A66-23250

Minimum internal energy calculation of anisotropic oxygen polarizability and Lorentz correction in barium titanate crystal 11 p1758 A66-23402

Piezoelectric constants of polycrystalline ferroelectrics of barium titanate type, noting dependence on ceramic sintering temperature and applied constant voltage 13 p2160 A66-25099

Current limitation by space charge in polycrystalline barium titanate, noting voltage-ampere characteristics and hysteresis effects 13 p2164 A66-25478

Structure, electrical properties and paramagnetic resonance absorption of barium titanate with admixtures of oxides of triple valent element 13 p2167 A66-25920

Semiconductor properties of reduced barium titanate analyzed by electron spin resonance measurements at various temperatures 14 p2359 A66-27132

Flame spraying method for conversion of pure barium titanate into glass, noting dielectric Curie temperature 15 p2524 A66-29681

Doping and firing atmosphere effects on electric resistivity of polycrystalline barium titanate, noting oxidation of small grain and positive temperature coefficient effect on large grain 17 p2978 A66-32404

Piezoelectric voltage of barium titanate with stabilized domains 18 p3153 A66-33631

Quadratic electro-optical effect in paraelectric phase of barium titanate single crystals as affected by temperature 19 p3440 A66-35767

Work function of semiconducting barium titanate as function of temperature for testing Heywang theory of polycrystalline material anomalous resistance behavior 20 p3616 A66-37404

Humidity effect on ferroelectric properties of barium titanate with tantalum oxide admixture, noting growth of dielectric constant and crystal polarization 20 p3617 A66-37553

X-band spectrometric observation of ESR of trivalent gadolinium in reduced barium titanate 21 p3797 A66-38756

Mushroom-shaped barium titanate sensor for shock tube pressure recording, noting high acoustic insulation, mechanical strength and vacuum tightness 21 p3738 A66-39099

Ferroelectric transducers, discussing feasibility of using ceramic transducers as pulsed power supplies 21 p3741 A66-39504

Existence of twins in single crystalline films of barium titanate, obtaining electron diffraction patterns 21 p3805 A66-39581

Reflectance measurement of barium titanate single crystal as function of temperature 21 p3805 A66-39583

Barium titanate rods as nonlinear element of S-band resonant cavity microwave

parametric amplifier, noting variation of  
 ermittivity of rods with percentage of  
 arium titanate 22 p3872 A66-39736  
 Sputtering, slurry and doctor-blade  
 echniques for depositing thin thermistor  
 films of lanthanum-doped barium-strontium-  
 titanate for bolometer  
 application 23 p4109 A66-41127  
 Barium titanate semiconductors containing  
 controlled amounts of neodymium prepared,  
 showing dependence of electrical properties  
 on preparative conditions and amount of  
 rare earth 23 p4109 A66-41128  
**BARCKHAUSEN EFFECT**  
**ANOMALOUS FERROMAGNETISM**  
 Anomalous Barkhausen effect in  
 ferromagnetic alloys 01 p0117 A66-10239  
 Magnetic interaction between layers of  
 two-layer ferromagnetic film, discussing  
 inhomogeneity effects, Barkhausen jumps,  
 reverse magnetization nuclei,  
 etc 16 p2774 A66-30689  
**BAROCLINIC WAVE**  
 Acoustic, gravitational and gyroscopic  
 oscillation spectra of baroclinic atmosphere  
 over rotating spherical Earth with emphasis  
 on energy composition 01 p0062 A66-10858  
 Index of clear air turbulence in sloping  
 baroclinic layer 02 p0253 A66-11575  
 Dynamic equations in quasi-static and  
 quasi-solenoidal approximations to describe  
 synoptic meteorologic processes in spherical  
 coordinate system 04 p0540 A66-13412  
 Separable nongeostrophic baroclinic  
 stability problem of Eady 07 p1062 A66-17373  
 Origin of stellar magnetic fields, examining  
 surface distortions on star due to magnetic  
 field 09 p1448 A66-20095  
 Disturbance propagation in baroclinic  
 atmosphere in presence of radiation and  
 turbulent heat conduction 14 p2325 A66-27535  
 Effect of radiative and photochemical  
 processes on stability of two level baroclinic  
 flow, noting low and high shear instability,  
 wavelength, phase speed,  
 etc 16 p2700 A66-31644  
 Quasi-geostrophic instability of disturbance  
 of small amplitude in baroclinic zonal flows  
 caused by barotropic, baroclinic or critical  
 layer instabilities 20 p3550 A66-37467  
 Baroclinic instability of quasi-geostrophic  
 perturbation to zonal wind in two-layer  
 inviscid model, examining short wavelength  
 cutoff in terms of potential  
 vorticity 20 p3550 A66-37468  
 Finite amplitude disturbances in baroclinic  
 atmosphere, considering interaction with  
 zonal current and effect of upward eddy  
 transport upon time change of mean static  
 stability 21 p3759 A66-39205  
 Disturbance propagation in baroclinic  
 atmosphere in presence of radiation and  
 turbulent heat conduction 24 p4233 A66-42321  
**BAROMETRIC**  
 Slide-wire microbarometer with pressure  
 changes transformed into frequency changes  
 of output signal designed for operation on  
 moving objects 16 p2709 A66-31795  
 Freiberg radiosonde aneroid capsule design  
 modification, using U-shaped axle which is  
 synchronized with capsule  
 reflections 18 p3110 A66-33964  
 Barometric instrument development and  
 description of counter-pointer altimeter and  
 pressure indicator 23 p4067 A66-41164  
**BAROMETRIC PRESSURE**  
**ATMOSPHERIC PRESSURE**  
**BAROTRAUMA**  
 Otic barotrauma caused by difference  
 between atmospheric pressure and middle  
 ear cavity pressure arising during flight,  
 compression chamber tests, etc, and leading  
 to deafness 10 p1488 A66-22107  
 Effects and causes of sinus barotrauma  
 pressure differential between sinuses and  
 outside atmosphere/ noting prevention,  
 treatment and  
 side effects 10 p1488 A66-22108  
**BAROTROPIC FLOW**  
**BAROCLINIC WAVE**  
 Quasi-Lagrangian study of inviscid  
 barotropic fluid for analysis of certain  
 geostrophic jet flows 02 p0222 A66-11825  
 Contribution of divergent wind components  
 to energy exchange between baroclinic and  
 barotropic components 09 p1399 A66-20726  
 Equations describing motion of barotropic  
 fluid with free surface solved, using finite

difference methods based on two-step Lax-  
 Wendroff scheme 13 p2121 A66-25814  
 Difference system and boundary conditions  
 for primitive-equation barotropic  
 forecast 17 p2948 A66-31942  
 Barotropic atmospheric model for  
 forecasting in tropics, discussing wind  
 analysis area covered, accuracy,  
 etc 17 p2948 A66-31943  
 Quasi-geostrophic instability of disturbance  
 of small amplitude in baroclinic zonal flows  
 caused by barotropic, baroclinic or critical  
 layer instabilities 20 p3550 A66-37467  
**BARREL**  
**S LAUNCHING DEVICE**  
**BARRIER LAYER**  
**SA JUNCTION**  
 Dependence of barrier height of metal-  
 semiconductor systems on metal work  
 function, surface states and thickness of  
 interfacial layer 02 p0271 A66-11438  
 Nonlinear properties of complete tunnel  
 diode equivalent circuit emphasizing  
 conductance, susceptance and oscillatory  
 characteristics of barrier  
 layer 03 p0346 A66-13317  
 Photoconduction model for illuminated lead  
 sulfide films with shunt path increase  
 during barrier modulation 10 p1578 A66-21575  
 Superconducting systems partitioned by  
 thin barriers allow supercurrents to pass  
 through, noting magnetic field penetration  
 into barrier, AC supercurrents, structure in  
 DC, current-voltage characteristics of  
 barrier, etc 11 p1756 A66-22978  
 Ultrasonic generation and amplification in  
 CdS crystals with barrier layer under  
 constant drift field 13 p2159 A66-25085  
 Abrupt p-n junction irregularities in  
 barrier layer where Poisson equation is  
 reducible to quadrature 14 p2348 A66-26798  
 Properties of hydrothermally grown  
 single crystals of tetragonal lead monoxide,  
 with contacts applied by metal  
 evaporation 14 p2359 A66-27099  
 Nonlinear properties of complete tunnel  
 diode equivalent circuit emphasizing  
 conductance, susceptance and oscillatory  
 characteristics of barrier  
 layer 14 p2260 A66-28290  
 Double barrier transmission resonance in  
 metal thin film triode 15 p2563 A66-28731  
 Wave diffraction in rectangular waveguides  
 passing through double ribbon  
 barriers 19 p3311 A66-35299  
 Chemical vapor deposited thermoprotective  
 coatings for tungsten and molybdenum-based  
 refractory alloys, discussing diffusion barrier  
 selection, interfacial microhardness, high  
 temperature diffusion-annealing tests,  
 etc 19 p3383 A66-36142  
 Ultrasonic generation and amplification in  
 CdS crystals with barrier layer under  
 constant drift field 21 p3795 A66-38510  
 Barrier height determination in thin film  
 sandwich tunnel diodes, using value of  
 internal electric field and electric tunnel  
 method 22 p3959 A66-39720  
 Deep centers in conducting n-type GaAs  
 and production of Schottky  
 layer 22 p3963 A66-40088  
 I-V characteristics of junction diode with  
 antibarrier layer and oxide film pressed on  
 rear contact 23 p4045 A66-41445  
**BARYON**  
**SA MESON-BARYON RESONANCE**  
 Kinematics of collapse and discussion of  
 observable properties of baryons and  
 collapsing stars 05 p0757 A66-14524  
 High energy nuclear interaction and  
 particle structures covering meson, baryon,  
 composition and dimensional  
 analysis 05 p0749 A66-15351  
 Nonconservation of baryon and  
 cosmological theory, discussing creation of  
 matter in discrete manner around isolated  
 pockets with strong gravitational  
 fields 11 p1774 A66-23067  
**BASE**  
**S ALKALI**  
**S LUNAR BASE**  
**BASE FLOW**  
 Base bleeding effect on near-wake  
 structure for very low Reynolds  
 number 03 p0355 A66-12805  
 Base flow and near wake problem at very  
 low Reynolds numbers, using general  
 solution of Stokes equation of motion for

two-dimensional and axisymmetric  
 flows 04 p0456 A66-14469  
 Base flow and near wake problem at very  
 low Reynolds numbers, discussing influence  
 of inertia terms by using Oseen  
 approximation 04 p0456 A66-14470  
 Effect of interaction of dissipating and  
 isentropic currents on flow at base region  
 of bodies moving with hypersonic  
 velocity 05 p0607 A66-15314  
 Punch-through avalanche phenomena,  
 describing fast rise pulse production in  
 junction transistors of variable base  
 width 05 p0651 A66-15840  
 Pressure distribution and skin friction  
 measurements confirming that effects of  
 changing base flow conditions decay with  
 distance upstream along airfoil  
 surface 06 p0801 A66-15999  
 Hypersonic boundary layer separation and  
 expansion at shoulder of blunt based  
 body 21 p3693 A66-38683  
 Model of laminar hypersonic base flow  
 region of slender bodies, introducing base  
 height and Reynolds number variation of  
 base pressure ratio 22 p3843 A66-40345  
**BASE HEATING**  
 Base heating of launch vehicles examined  
 by studying heat transfer processes in two-  
 dimensional recirculation zone behind blunt  
 trailing edge in Mach 3 wind tunnel  
 [AIAA PAPER 65-825] 04 p0454 A66-13690  
 Base heating in Saturn S-IV stage from  
 exhaust reversal, comparing flight and scale  
 model data  
 [AIAA PAPER 66-45] 05 p0770 A66-15037  
 Base heating scaling criteria for four-  
 engine rocket cluster operating at high  
 altitude  
 [AIAA PAPER 65-826] 05 p0771 A66-15851  
 Heat transfer in base flow region,  
 determining parameter of correlation for  
 hydrogen injection and combustion, adiabatic  
 flame temperature, heating rates and  
 recovery temperature  
 [AIAA PAPER 66-108] 06 p0970 A66-16408  
 Base thermal environment measured on  
 flight tests of eight-engine LOX/RP-1  
 propelled Saturn I booster  
 [AIAA PAPER 65-212] 14 p3391 A66-27873  
 Short duration technique providing  
 simulation of thermodynamic properties and  
 composition of exhaust products of liquid  
 and solid propellant rocket engines  
 [AIAA PAPER 66-760] 22 p3894 A66-40643  
 Density and temperature measurement in  
 base region flow field of clustered rocket  
 model, using electron beam  
 technique 24 p4210 A66-42200  
**BASE PRESSURE**  
 Ratio base pressure of spherical cone in  
 turbulent flow at zero angle of  
 attack 05 p0609 A66-15804  
 Mach number, Reynolds number and  
 boundary layer trip devices effect on base  
 pressure 14 p2219 A66-27443  
 Variation problem solution in hypersonic  
 gas dynamics, noting intake portion  
 construction for body with minimum  
 resistance for limited length and flat  
 end 15 p2477 A66-28956  
 ONERA research on use of magnetic  
 suspension systems in hypersonic wind  
 tunnels and measurement of base pressure  
 and heat transfer rates 16 p2683 A66-31699  
 Turbulent supersonic base pressure for  
 Chapman-Korst flow model of separated  
 flows 17 p2906 A66-32077  
 Base, recompression and laminar near wake  
 regions of cones in hypersonic  
 flow 17 p2838 A66-32438  
 Nozzle precombustion chamber base  
 pressure for sudden pulsating sonic flow  
 propagation 17 p2909 A66-32582  
 Base pressure behind ridge in separated  
 supersonic flow of compressible gas  
 determined for case of turbulent  
 mixing 18 p3103 A66-35053  
 Base pressure approximation for two-  
 dimensional isentropic supersonic flow and  
 separation supersonic  
 flow 19 p3277 A66-36476  
 Base pressure and flow parameters near  
 trailing edges of axisymmetric blunt bodies  
 in supersonic flow 20 p3492 A66-37678  
 Model of laminar hypersonic base flow  
 region of slender bodies, introducing base  
 height and Reynolds number variation of

base pressure ratio 22 p3843 A66-40345  
Supersonic and hypersonic wake flow dependence on near wake pressure, using momentum integral method 24 p4158 A66-42775

**BATHYTHERMOGRAPH**

Aircraft instrumentation for oceanographic measurement platform including radiation thermometer, wave meter and expendable bathythermograph [AIAA PAPER 66-695] 20 p3496 A66-38036

**BATTERY**

SA ATOMIC BATTERY  
SA DRY CELL BATTERY  
SA ELECTRIC CELL  
SA ELECTRODE  
SA ELECTROLYTE  
SA NICKEL-CADMIUM BATTERY  
SA SILVER-CADMIUM BATTERY  
SA SILVER-ZINC BATTERY  
SA STORAGE BATTERY  
SA THERMAL BATTERY  
SA ZINC-SILVER OXIDE BATTERY

Heat dissipation values for spacecraft silver oxide-zinc primary and nickel oxide-cadmium secondary batteries determined with calorimeter 03 p0323 A66-12772

Load-voltage battery charger power-optimizing regulator for maintaining continuous maximum power loading on solar cells under various environments 08 p1169 A66-19495

Batteries - International Symposium at Brighton, England in September 1964 08 p1169 A66-19641

Design and operation of radioisotope-powered battery using direct beta-particle collection to negatively charge electrode, noting choice of isotope, dielectric, collector, etc 08 p1172 A66-19657

Aircraft batteries design, considering plastics, separators, alloys and operating conditions including thermal stability, explosion risks, etc 08 p1173 A66-19658

Three-day battery capable of operation at temperature of 425 degrees C for use on lunar and planetary probes 13 p1999 A66-25691

Organic and liquid ammonia electrolyte systems in combination with active anode materials to achieve high energy output battery system [AIAA PAPER 64-750] 13 p2007 A66-26651

Improved operating characteristics of solid-electrolyte cell at room temperature by using silver sulfur iodide 18 p3055 A66-34901

Open circuit half-cell potentials of calcium in thiocyanate-liquid ammonia solutions 18 p3055 A66-34902

Nonaqueous lithium-nickel halide batteries capabilities and limitations, explaining methods of selection and evaluation of solvent, solutes and combinations for electrolytes 23 p4021 A66-41752

**BAYESIAN STATISTICS**

Bayesian statistics in combining analytically derived design reliability data with available test data for reliability estimates 01 p0169 A66-10078

Empirical Bayes rule obtained from observing unknown signal of stochastic control 02 p0206 A66-11307

Bayesian approach in reliability evaluation, noting point estimation and confidence interval 03 p0335 A66-12902

Filtering techniques for estimating nonlinear discrete-time processes, including Bayesian estimation and weighted least squares approach 05 p0656 A66-14631

Bayes risk function of sequential games, discussing recurrence formula, decision rule and approximate computational method in pattern recognition problems 05 p0639 A66-15838

Construction of Bayes estimator, using prior estimates of random parameter, with mean square error less than that of maximum-likelihood estimator when a prior distribution of parameter is unknown 12 p1816 A66-24195

System with unknown failure-rate parameter undergoing reliability test of accept-reject variety, based on Bayesian context 12 p1888 A66-24670

Dynamic programming recursive estimation of modal trajectory for nonlinear non-Gaussian noise and comparison with Bayesian estimation and case of Gaussian

white noise 13 p2053 A66-26086

Predicting structural reliability by recent developments in statistics, reliability, cost effectiveness analysis and decision theory [AIAA PAPER 66-503] 16 p2714 A66-30607

Dual control of plant with random amplification factor as Bayesian problem 18 p3089 A66-33738

Abundance of individual effects /pt, bp, bps/ of geomagnetic pulsations and variations at Goettingen and Fuerstenfeldbruck stations 18 p3105 A66-34096

Performance criterion for adaptive pattern classification system, noting approximation to optimum Bayes discriminant function 19 p3333 A66-36665

Adaptive pattern classification system, based on typical patterns or training samples used by system to determine decision procedure that does not require a priori knowledge of probability density of class pattern vectors 20 p3522 A66-37666

Bayesian methods applied to structural design selection with known reliability without confidence coefficient 20 p3572 A66-37944

Bayesian statistics applied to reliability and maintainability transactions 20 p3574 A66-37967

Canonical theory approximation of optimum or Bayes detection procedures in critical limiting threshold mode of operation 21 p3705 A66-39146

**BCC**

S BODY CENTERED CUBIC /BCC/ CRYSTAL

**BE-A**

Total electron content from S-66 satellite received at nine stations, using differential Faraday technique 15 p2491 A66-30017

**BE-B**

S EXPLORER XXII SATELLITE

**BEACON**

S RADAR BEACON

S RADIO BEACON

BEACON EXPLORER-A

S BE-A

BEACON EXPLORER-B

S EXPLORER XXII SATELLITE

BEACON SATELLITE

Accurate tracking of Beacon-Explorer orbiting optical reflectors, using pulsed ruby laser beams 09 p1341 A66-19902

Beacon observations of differential Doppler and Faraday effects from analysis of signals emitted by Explorer XXII satellite 15 p2453 A66-30069

Ionospheric electron content over Ahmedabad and Bombay from differential Faraday rotations of plane polarized radio waves from Beacon satellite 21 p3734 A66-39229

Diurnal variation of ionospheric irregularities, using differential Doppler method for analysis of data transmitted by Beacon satellite 24 p4200 A66-42596

**BEAGLE B-206 AIRCRAFT**

British Executive and General Aviation /BEAGLE/ and development of Beagle B.206 S twin-engine executive aircraft 22 p3847 A66-39686

Airframe and landing gear of Beagle B.206 S series II low-wing monoplane of all-metal stressed skin construction 22 p3848 A66-39687

Beagle B.206 S aircraft power plant, vacuum system, air conditioning system, fire protection, hydraulics, fuel, oxygen, rain protection and deicing equipment 22 p3970 A66-39688

Aerodynamic design and development of Beagle B.206 S aircraft, examining corrections for inadequate stability margins at aft CG limit 22 p3848 A66-39689

Flight testing of Beagle B.206 S aircraft revealed need for forward shift of CG in series II model due to more powerful engines 22 p3848 A66-39690

Production methods for Beagle B.206 S aircraft, examining sequence of assembly and erection and methods of anticipating minimum customer requirements 22 p3922 A66-39691

**BEAM**

S ATOMIC BEAM

S BOX BEAM

S CANTILEVER BEAM

S CURVED BEAM

S ELECTRON BEAM

S GAMMA RAY BEAM

S I-BEAM

S ION BEAM

S MOLECULAR BEAM

S NEUTRAL BEAM

S OPTICAL BEAM SCANNING

S PARTICLE BEAM

S PHOTON BEAM

S PROTON BEAM

S RADAR BEAM

S RECTANGULAR BEAM

**BEAM COLUMN**

Beam forced vibration with harmonically time-variant motion produced by uniform distributed load, assuming one boundary condition is nonlinear 01 p0157 A66-1092

Boundary value problem of elastic/viscoplastic beams solved, using iteration method, noting wave propagation and effect of shear and inertia of axial motion of beam in motion equation 14 p2397 A66-2738

Operational calculus in determining strength and deflection of material [PST PAPER NT-147] 14 p2401 A66-2775

Pure bending of beams with hole 15 p2612 A66-2942

Dynamic hinge concept for determining fundamental frequency of beam vibration in terms of equivalent system 15 p2614 A66-2961

Stresses and deflections of biaxially loaded columns calculated from exact solution of biaxial bending equation 17 p3024 A66-3239

Elastic stresses around holes in webs of simply-supported wide-flange beams under uniform load 17 p3024 A66-3239

Shear coefficient in Timoshenko beam theory 18 p3248 A66-3358

Thin walled box beams under nonuniform torsion treated by energy method 19 p3472 A66-3531

Beam column supported by linear rotational and extensional springs representing elasticity of test rig, used in analog study of thermal buckling behavior of thin cylindrical shells 21 p3828 A66-3870

**BEAM CURRENT**

AM/PM conversion factor of TWT as a function of helix voltage when beam current is varied to keep gain constant 24 p4180 A66-4237

**BEAM-PLASMA AMPLIFIER**

Dynamic behavior of beam-plasma amplifier 01 p0038 A66-1051

Effect of nonzero plasma electron temperature considered in electron beam-plasma interaction wave growth computation 01 p0112 A66-1053

Electric wave growth and amplification in electron beam interaction with plasma in microwave amplifier, noting longitudinal inhomogeneity 01 p0112 A66-1053

Electron beam-plasma interactions used to predict occurrence of amplifying wave having growth rates maximizing near to electron plasma frequency 04 p0552 A66-1403

Beam plasma amplifier operation noting interaction region, millimeter wave operation, technological problems, etc 12 p1839 A66-2461

Ion cyclotron instabilities in bounded cold beam-plasma system, noting growth rate parameters, instability conditions, etc 13 p2138 A66-2519

Excited electron plasma nonlinear oscillations, beam-plasma interaction, Langmuir probe measurement of frequency and density, amplification of superimposed RF electric field, etc 15 p2552 A66-2940

Instability of three-component plasma system studied to analyze beam-plasma interaction, noting restraining effect of electrons on instability of beam-ion coupling 21 p3792 A66-3918

Monochromatic longitudinal wave amplification by charged particle beam in nonlinear plasma, noting amplitude dependence on coordinate 24 p4243 A66-4252

Parametric amplification in beam-plasma system and generation of stationary waves 24 p4258 A66-4300

**BEAM SWITCHING**

Photographic film used for quantitative

- measurements of intensity distribution in Q-switched laser beam 05 p0695 A66-14920
- Atmospheric turbulence effects on laser beam propagation, noting beam cross section, phase variation, AM and FM, etc 14 p2235 A66-27035
- Phased array antenna system for multidirectional transmission and reception of focused beams with high gain 17 p2872 A66-31936
- Beam position selection and antenna lead connection to receiver processing channels in multiple-beam receiver system 18 p3074 A66-33527
- Probability of recurrent event defined over state r-th-order Markov chain, specifically probability of events in Bernoulli sequence 21 p3757 A66-39103
- Laser beam deflection and scanning techniques 24 p4175 A66-42817
- BEAM WAVEGUIDE**
- Statistics of beam waveguide light-ray propagation extended to include correlations between displacements of different lenses 05 p0634 A66-15179
- Design of intentional bends of beam waveguide, giving relations between waveguide parameters and radius of curvature of guide axis 06 p0846 A66-16093
- Mode losses of single iteration in confocal beam waveguide resonator and transmission systems with circular lenses separated by twice focal length 06 p0848 A66-16107
- Random irregularities caused by mechanical distortion in lenses, reflectors or diaphragms of optical beam waveguides and increases in diffraction attenuation 09 p1345 A66-20491
- Irregularities of iris type beam waveguide, noting transmission loss during principal lightwave propagation 11 p1712 A66-22736
- Beam waveguides for long distance electromagnetic wave transmission at optical wavelengths described by theory of focusing antennas 11 p1656 A66-22737
- Equation governing properties encountered in Gaussian beam propagation represented graphically on impedance chart, showing relation between Gaussian mode and geometrical optics 11 p1656 A66-23089
- Optical guides stressing lens type beam waveguide 13 p2022 A66-25538
- Transverse beam width and phase constant of nonsquare law media for light propagation in imperfect lenslike media requiring repeater techniques 13 p2127 A66-25539
- Random variations in beam waveguide components and effects on light propagation 13 p2024 A66-25939
- Dual mode frequency discriminator for microwave source frequency stability, discussing application of beam waveguide resonator 17 p2895 A66-33274
- Irregularities of iris type beam waveguide, noting transmission loss during principal lightwave propagation 23 p4078 A66-41474
- Beam waveguides for long distance electromagnetic wave transmission at optical wavelengths described by theory of focusing antennas 23 p4037 A66-41475
- BEARING**
- SA BALL BEARING
- SA FOIL BEARING
- SA GAS BEARING
- SA JOURNAL BEARING
- SA ROLLER BEARING
- SA THRUST BEARING
- Bistable vibration of rotors in bearing clearance [ASME PAPER 65-WA/MD-1] 05 p0689 A66-15520
- Partial porous metal bearings performance during steady state operation with full film of lubricant, determining pressure distribution [ASME PAPER 65-WA/LUB-3] 05 p0689 A66-15526
- Correlation equation estimating pitting fatigue life of bearings from minimal rolling contact rig data [ASME PAPER 65-WA/CF-5] 05 p0690 A66-15624
- Service life of antifriction bearings represented by Weibull distribution law, with computer method for parameters and density function 06 p0886 A66-16486
- Flexible unbalanced rotating shaft, discussing vibration of system with axial symmetry in asymmetric bearings 07 p1037 A66-17733
- Thin section bearings used to solve spatial needs and temperature problems of high altitude flying 08 p1229 A66-18827
- High temperature bearing lubricant requirements for jet engine lubrication systems [SAE PAPER 660072] 09 p1383 A66-20157
- Operation, maintenance and installation of friction and nonfriction bearings, noting characteristics, problems, etc 11 p1711 A66-22951
- Powder metal bearings manufacture noting shapes, sizes, tolerances, materials, design, installation, etc 12 p1885 A66-24100
- Pressure distribution of viscous electrically conducting fluid in lubricating layer of cylindrical bearing 12 p1887 A66-24425
- Oil cushion resilience in hydrodynamic bearings, examining effect on dynamic behavior of unsymmetrical shaft with one disk 12 p1889 A66-24999
- Book on design and utilization of antifriction bearings 13 p2087 A66-26281
- MHD inclined slider bearing with azimuthal magnetic field, noting load capacity 15 p2509 A66-29407
- Liquid solid film lubrication of hydrodynamic bearings, including effects of solid particles in liquid base lubricant [ASLE PAPER 66AM 5DE] 16 p2711 A66-30412
- Rolling friction studies of intermetallic and zirconium oxide for control surface bearings for space reentry vehicle [ASLE PAPER 66AM 5D4] 16 p2712 A66-30413
- SNAP-8 reactor oscillating bearings to provide low friction self-lubrication at 1150 degrees F 16 p2712 A66-30414
- Bearing capacity of shallow spherical shell freely supported along contour and subjected to action of uniformly distributed normal pressure 16 p2823 A66-31632
- Starting friction and kinetic friction of PTFE fabric-lined spherical bearings and deflection and permanent set under static loading 17 p2929 A66-31932
- Shaft-rotor system with bearing configuration such that load-deflection relation at rotor is nonlinear and radially symmetric, noting harmonic whirl and free undamped vibrations 17 p2930 A66-32892
- Operating lifetime of porous bearings, discussing dependence on quality of impregnating lubricant 17 p2930 A66-33143
- Steady-state and dynamic characteristics of full circular bearing and centrally loaded arc bearing presented in design charts for turbulent lubrication analysis [ASME PAPER 66-LUBS-4] 17 p2931 A66-33178
- Superconducting bearing operating on conservation of fluxoid in closed loop of superconductor 18 p3116 A66-34243
- Load-supporting capacity of vertical plasma cylinder contained by axial pinch effect analyzed for applications to bearings with electrically conducting lubricants 23 p4101 A66-41293
- Laser beam effect on hydrodynamic bearings, discussing microcracks and critical energy, explaining breakdowns 23 p4078 A66-41409
- BED REST**
- Exercise tolerance, plasma volume, red cell mass, total blood volume and orthostatic tolerance during four weeks of bed rest 03 p0326 A66-13354
- Long-term lower body negative pressure in supine position effect on deterioration in cardiovascular function of man during prolonged bed rest 15 p2430 A66-28657
- Bed rest and water immersion effects on plasma volume and catecholamine response to tilting, noting urinary excretion of norepinephrine and epinephrine 15 p2430 A66-28661
- Prolonged hypokinesia effect on human resistance to transverse g-forces, detailing respiratory and circulatory systems, motor response and visual acuity 15 p2437 A66-29473
- Hypoxia and lower body negative pressure effects on blood volume, and orthostatic and physical tolerance after four weeks of hypoxic bed rest 16 p2640 A66-31124
- Lower body negative pressure effect on blood volume and orthostatic tolerance during prolonged bed rest 17 p2858 A66-32178
- Medical problems of weightlessness 18 p3059 A66-34365
- Tilt table response and blood volume changes associated with 30 days of bed rest, evaluating time required to recover from cardiovascular deconditioning 22 p3853 A66-39785
- BEECH MILITARY AIRCRAFT**
- S T-34 AIRCRAFT
- BEEHIVE PROJECT**
- S PROPELLANT
- BEHAVIOR**
- S CONDITIONED RESPONSE
- S GROUP BEHAVIOR
- S HUMAN BEHAVIOR
- S LEARNING
- S TRAINING
- BEHRENS-FISHER PROBLEM**
- Optimum similar solutions of Behrens-Fisher problem 07 p1060 A66-18506
- BELL MILITARY AIRCRAFT**
- S X-22 AIRCRAFT
- BELLOWS**
- Stresses and elongation of U-shaped bellows subjected to axial load solved by elastic theories of plates and shells 08 p3134 A66-19549
- Dynamic instability in undamped bellows face seals operating in cryogenic environment with torsional oscillation and diametrical rocking as primary motion [ASLE PAPER 66AM 2CE] 16 p2711 A66-30408
- Numerical analysis of stress-strain rate of sylphon bellows, using differential equations 16 p2820 A66-31145
- BELTRAMI FLOW**
- Stress function and displacement vector for linear, homogeneous, isotropic and elastic material body occupying bounded simply connected region of space 21 p3772 A66-39354
- Vector equations of steady incompressible viscous flow in absence of extraneous forces, discussing Beltrami flow, doubly laminar flow and plane flow 21 p3728 A66-39435
- Continuum mechanical Cartesian tensor analysis theorem on completeness of Beltrami stress function 23 p4139 A66-41544
- BENDING**
- SA ELASTIC BENDING
- Circle and sphere theorems for biharmonic equation and application to displacement field of stressed plate under pure bending, noting singularities 01 p0093 A66-10427
- Error estimates in application of linear plate theory to deflection and stress determination as function of boundary conditions, correlation between geometric plate parameters and load distribution 08 p1305 A66-18599
- Quenching and slow-cooling effects on ductile-brittle bend-transition temperature of chromium wire 13 p2107 A66-25587
- Heat resistance, bending and tensile creep of multicomponent Ti alloys 15 p2519 A66-28534
- Bending center of prismatic anisotropic rod of arbitrarily asymmetrical cross section 15 p2608 A66-28774
- Equivalent mass matrix for rectangular plate elements in bending, noting coordinate system 15 p2610 A66-29306
- Bending problem of three-layer plates with fillers 16 p2817 A66-31050
- Arbitrary bending of hinged thin plate reinforced with circular ring 16 p2819 A66-31141
- Periodic solutions of axisymmetric shell theory equations for displacement of shells of revolution and bending of thin walled rods 17 p3026 A66-32593
- Bending problem of anisotropic plates solved by method of small parameter 17 p3030 A66-32811
- Bending behavior of spherical shells through second-order differential equation with complex coefficients, noting effect of load 18 p3253 A66-33765
- Die friction effects on plane stress and plane strain in plastic bending of steel and titanium alloy beams 21 p3745 A66-39528

Membrane force in axisymmetric elastoplastic bending of clamped thin circular plate 23 p4142 A66-41951  
 Successive approximation analysis of large deflections of elastoplastic shell under bending deformation and load carrying capacity 24 p4290 A66-42440

## BENDING DIAGRAM

Four-point loading bend test on specimen of full plate thickness with sharp notch to 20 percent depth, with ductility criterion as fully plastic angle of bend before fracture 08 p0965 A66-16492

## BENDING FATIGUE

Constrained stress-strain test of Ni-Cr-Mo steel carried out on plane bending plastic fatigue testing machine 02 p0243 A66-11580  
 Slow-bend impact testing of embrittlement of zirconium by hydrogen 06 p0895 A66-16356  
 Fatigue damage of metals under mean stress investigated by X-ray diffraction 08 p1314 A66-19551  
 Stress concentrations in fatigue bending of perforated rectangular and tapered plates studied by photoelastic means 08 p1315 A66-19802  
 Aircraft fuselage design in region of center section for case of asymmetric bending 11 p1782 A66-22854  
 Sintered aluminum powder endurance under bending stresses and cladding effect on fatigue resistance 14 p2318 A66-28198  
 Notched and unnotched bending fatigue strength of machined work hardened AISI type 305 stainless steel affected by cold worked surface layer with high compressive residual stresses 15 p2521 A66-29073  
 Bending stresses in cylindrical shell with rigid circular inclusion examined under axial tension and internal pressure [AIAA PAPER 66-525] 16 p2813 A66-30526  
 Grain boundary migration in pure aluminum and lead under reversed torsional and bending stresses at elevated temperatures 19 p3388 A66-36365  
 Infinitely small bending deformations of convex surfaces with boundary condition of generalized slip, formulating boundary value problem for bending of surface 22 p3995 A66-40450  
 Structural integrity studies of gravitational and inertial loading effects on British solid propellant grains 23 p4115 A66-41112  
 Strength test results on special small rocket covering bending, stiffness and internal pressure strength of various components 23 p4133 A66-41423

## BENDING MOMENT

Size effect of bending and twisting fatigue strength by calculating probability of flaws on surface 02 p0243 A66-11581  
 Shells and tubes subjected to internal and external pressures including analysis of transition theory for sheet-bending, considering creep rupture and relaxation 03 p0438 A66-12696  
 Equations of plastic interaction curves for cross section of beam subject to uniaxial stress and under simultaneous bending moment and normal force, using power series 03 p0442 A66-13306  
 Tangential force and bending moment effect on behavior of internal stresses and moments near application point in spherical shell analysis 04 p0588 A66-13585  
 Semizero-moment shell with one edge braced by elastic support with small rigidity for deformation out of plane, noting magnitude of critical stress 04 p0588 A66-13586  
 Brazier effect and overlap effect in bending of slit thin walled circular tubes [ASME PAPER 65-APMW-20] 04 p0592 A66-14221  
 Contact of two axisymmetric plates, showing ability of Reissner theory to overcome classical theory problems [ASME PAPER 65-APMW-28] 04 p0593 A66-14226  
 Component balancing alone can provide better balanced high-speed rotor than common practice of balancing complete assembly of balanced components 06 p0888 A66-16433  
 Full plastic moments in struts, analyzing problem of member subjected to combined axial stress and unequal major-axis bending moments at ends 07 p1142 A66-17257

Series solution for deflection of rectangular plate subjected to concentrated load at arbitrary location, using Green function 08 p1310 A66-19161  
 Stress-strain state of shell having one end clamped and other under concentrated bending moments and concentrated force acting along generatrix solved by integral equation 08 p1314 A66-19579  
 Brazier effect and overlap effect in bending of slit thin walled circular tubes [ASME PAPER 65-APMW-20] 12 p1961 A66-23976

Variational method for determining frequencies and modes of oscillation of pinned variable incidence blade 12 p1965 A66-24052  
 Two-dimensional problems in moment theory of elasticity for multiply coupled regions weakened by finite number of arbitrarily distributed circular holes 12 p1987 A66-24106  
 Plate loaded over ring-shaped zone, determining bending moment, torque and shearing force 12 p1987 A66-24111  
 Concentrated forces and bending moments effect on shallow cylindrical shell 12 p1987 A66-24113  
 Strain gauge load measuring transducer operating in bending mode and based on elastic properties of epoxide glass fabric laminate 12 p1884 A66-24985  
 Book on stress-strain analysis including photoelastic investigations of bending impact on cantilever beam 13 p2198 A66-26298  
 Bending moment of thin nonlinearly elastic plates, noting dependence of coefficient of moment concentration on external load and material properties 13 p2203 A66-26429  
 Three-dimensional statically indeterminate frame with rigid nodes, noting effect of bending moments for shifting forces 13 p2207 A66-26498  
 Design of composite structures of minimum weight, using flat-bottomed cylindrical tank, noting continuity condition of radial bending moment of plate and shell 14 p2395 A66-27174  
 Pure bending of orthotropic plate with curvilinear hole reinforced by rigid ring 15 p2812 A66-29425  
 Approximation method for solution of bending problem of isotropic plate resting on rigid columns to cover case of anisotropic plate with reinforced elliptic hole 15 p2813 A66-29434  
 Transverse cut-out effect on fatigue strength of rotating shaft under constant bending load, noting fatigue stress concentration factor 16 p2815 A66-30679  
 Dynamic plastic bending of cantilever and variation in strength of mild steel with strain rate, considering shear force at hinge 16 p2815 A66-30808  
 Fatigue tests at high stress levels under rotating bending of carbon steel and roll material, analyzing stress-strain behavior in plastic fatigue process 16 p2815 A66-30809  
 Bending moment, longitudinal force, radial displacement and transverse deflection of circular plate undergoing elastoplastic bending accompanied by radial tension 16 p2822 A66-31622  
 Contact of two axisymmetric plates, showing ability of Reissner theory to overcome classical theory problems [ASME PAPER 65-APMW-28] 18 p3248 A66-33581  
 Multiply connected orthotropic plate of variable thickness, discussing bending stresses, load distribution, temperature distribution and boundary load 18 p3256 A66-34492  
 Finite creep equations derived for circular sandwich plate under lateral pressure, considering bending moments and tensile forces 19 p3472 A66-35392  
 Instrumentation of bending moments on large space boosters, discussing ground wind restrictions, telemetry system used, data transmission link, etc 19 p3356 A66-35678  
 Differential equations for deformations of nonuniform flat plates bent into cones 19 p3473 A66-35850  
 Bending of elliptical anisotropic plate with two elliptic holes 20 p3669 A66-37668  
 Elastic-plastic axisymmetric bending of circular cylindrical shell with constant and

variable thickness 20 p3670 A66-37677  
 Response data for uniform beam supports, on nonlinear springs and subjected to shock demonstrating usefulness of shock spectra in design situations 20 p3671 A66-37977  
 Elastoplastic bending of thin annular plate with free inner edge, based on Mises yield condition and Hencky stress-strain relation 20 p3671 A66-38101  
 Nonstationary forces and bending and torsional moments along wing computed using punch card system 20 p3674 A66-38441  
 Bending of isotropic thin plate in moment theory of elasticity, noting Kirchhoff-Lov hypothesis from which relations for bending moment torque and shear force are obtained 22 p3991 A66-40151  
 Plate and rod systems to test abrupt intensive heating effects, discussing dynamic stresses and bending moments via approximate equations 23 p4137 A66-41001  
 Critical bending angles of rollers used in shaping profiled rings and casings with titanium alloy flanges 23 p4075 A66-41761  
 Membrane theory of convex shells and approaches to construction of general moment theory of elastic shells 23 p4141 A66-41933

## BENDING THEORY

Strains and internal force in bending of two coupled orthotropic plate strips of different rigidity under effect of uniformly distributed loads 01 p0152 A66-10401  
 Flexural waves propagating over plate with thin obstacles exerting both head-on and moment impedance 01 p0152 A66-10411  
 Bending problem of circular orthotropic plate on elastic base under axisymmetric load 01 p0153 A66-10461  
 Bending of elastic rectangular plate uniformly transverse loaded along axes of symmetry 01 p0154 A66-10461  
 Bearing reactions and stresses of bridge analyzed by calculating bending of rectangular plate with two supported and two free parallel sides 01 p0155 A66-10711  
 Dynamic stability of elastic and rigid rod under longitudinal impact 03 p0441 A66-13291  
 Bending of rigidly fastened square plate with deflections 03 p0442 A66-13301  
 Maximum stress on flat plate stress corrosion strip with ends rotated 90 degrees, using nonlinear bending theory [ASME PAPER 64-WA-AV-3] 04 p0589 A66-14021  
 Bending of plate of arbitrary trapezoidal planform for various support conditions and combinations thereof 04 p0589 A66-14141  
 Shaft deflection at any point determined by geometric method for shaft diameter selection 05 p0687 A66-14991  
 Finite-difference equations derived and applied at or near flexural discontinuities in plates subjected to bending 05 p0774 A66-15061  
 Linear elastic theory of thin shells considering membrane and bending theories of open and closed cylindrical shell 05 p0775 A66-15081  
 Buckling of cantilever cylindrical shell with transverse end load inducing shear stresses and bending stresses in middle surfaces 05 p0781 A66-15801  
 Book on stress analysis and elastic body vibration covering stress and strain, bending moment, shearing forces, mechanical vibration, torsion, columns, oscillation, etc 07 p1142 A66-17236  
 Higher order approximations derived for bending equations of isotropic homogeneous thermoelastic plates 07 p1142 A66-17286  
 Classical theory of bending of anisotropic plates, using asymptotic integration method and expressing stressed state as sum of three stressed states 07 p1145 A66-18252  
 Errors in approximation equations for dynamic bending of cylindrical rod 08 p1308 A66-18889  
 Small parameter method determination of pure bending and torsion of thin plate with circular hole, where material of plate obeys nonlinear elasticity law 08 p1312 A66-19435  
 Transition process whereby plate approaches limiting load state under effect of transverse load that creates torques and bending moments in plate cross sections 08 p1312 A66-19436  
 Simplified calculation of axisymmetric

- bending of annular three-layer plates with lightweight filler by use of initial parameter method 08 p1313 A66-19437
- Large displacement bending of rods for constant deformation cross section, negligible shearing forces and exponential stress-strain relation 08 p1314 A66-19580
- Spherical shell bending examined, using quasi-linear stress-strain relationship 09 p1465 A66-19857
- Finite bending of cylindrical plates, evaluating numerical values of stress distribution in baryte sheet 09 p1465 A66-19861
- Deflection of thin circular plate under eccentric loading using complex variables, obtaining expressions in series form 09 p1467 A66-20581
- Bending of orthotropic plates and beams supported by elastic layer under uniform transverse load, noting effect of length-width ratio change 10 p1615 A66-21410
- Iterative procedure to obtain numerical solutions of von Karman equations for rectangular plates with finite deflections 10 p1615 A66-21477
- Optimum study of anticlastic deformations of elastic strips with tapered edges, using Newton-Raphson iteration method 11 p1780 A66-22328
- Postbuckling behavior of metal plate strip subjected to opposing axial loads, using nonlinear bending theory [ASME PAPER 65-AV-3] 11 p1780 A66-22470
- Flexural waves propagating over plate with thin obstacles exerting both head-on and moment impedance 11 p1780 A66-22802
- Permanent deformations in circular plates subjected to uniformly distributed impulses compared with predictions of bending theory of rigid-plastic plates 11 p1781 A66-22612
- Cylindrical bending theory for rectangular three-layer sandwich plate supported at opposite ends under variable load 11 p1783 A66-23019
- Self-equilibrating bending of complete circular cylindrical shells described by first harmonic terms of Fourier series for displacement components 12 p1962 A66-24004
- Optimum depth, minimum area design charts for laterally supported structural beams in pure bending, discussing weight parameters, elastic buckling, material characteristics, etc 12 p1968 A66-24201
- Deflections, moments and shears of circular ring plate under transverse load, comparing classical and improved theory of deformation 13 p2195 A66-25180
- Stress concentration for cylindrical bending of plates with holes, deriving equations and evaluating errors in classical theory 13 p2203 A66-26424
- Boundary conditions in bending theory of reinforced shells, noting decreased stress concentration obtained by reinforcement ring 13 p2204 A66-26431
- Nonlinear bending theory of three-layered simply supported plates 14 p2396 A66-27379
- Pure bending of beams with hole 15 p2612 A66-29424
- Symmetric bending of circular orthotropic plate of systematically variable thickness for different types of loading 15 p2613 A66-29435
- Sandwich panel bending under thermal and mechanical loads; solving differential equations for temperature distribution, transverse load and uniform edge compression with boundary conditions 16 p2812 A66-30218
- Bending equations of orthotropic three-layer plates with rigid filler 16 p2818 A66-31055
- Book on bending theories of sandwich plates including use of Fourier series, stress-strain state, trigonometry, deflection theory, etc 16 p2818 A66-31100
- Monograph on nonlinear bending theory of three layer plates, covering mathematical theory of elasticity stress-strain diagrams, Galerkin method, maximum deflection criteria, etc 16 p2819 A66-31136
- Longitudinal bending of elastic truncated conical shell subjected to edge loads 17 p3020 A66-32001
- Stresses and deflections of biaxially loaded columns calculated from exact solution of biaxial bending equation 17 p3024 A66-32395
- Bending behavior under lateral loads and stretching effects due to in-plane forces described by two uncoupled differential equations governing circular plates 18 p3253 A66-33803
- Bending characteristics of tapered cylindrical shells, discussing edge and internal influence 18 p3253 A66-33806
- Approximation solution to plane bend problem in thin rod of variable rigidity 18 p3254 A66-33933
- Monograph on thin walled rods under bending and torsion, discussing calculations in lightweight structure design 18 p3254 A66-33966
- Nearly inextensional deformations of cylindrical shells, noting bending theory 18 p3256 A66-34489
- Extension of Vlasov bending theory for thin shells to include shells with undamped solutions, obtaining partial differential equations for normal deflection and stress function 19 p3472 A66-35466
- Bending of plane electromagnetic waves around elliptically ideally conducting cylinder of infinite length and around parallel circular dielectric cylinder, with solution as Mathieu-type series 19 p3303 A66-36064
- Book on strength, stiffness and stability of sandwich structural elements for structural designer, emphasizing practical applicability 20 p3666 A66-37010
- Rigorous solutions for loadings applied at apex of spherical shell, noting cases of concentrated radial and tangential force, concentrated moment about polar and planar axis, etc 20 p3670 A66-37761
- Bending of thin rectangular sandwich plate of three layers with small flexure 21 p3829 A66-38812
- Hydraulic support system for free-flight simulation with Saturn V-Apollo vehicle, discussing stability requirements, upper bounds of system design, conversion from nonlinear to linear model, etc 21 p3722 A66-38876
- Simulation results of adaptive tracking filter application to stabilization of structural bending modes of SI-B launch vehicle 21 p3821 A66-38877
- Bending problems of transversely isotropic circular plates based on Ambartsumian theory of anisotropic plates 21 p3830 A66-38980
- Mixed bending problem of eccentric ring solved by coordinate system with origin at center of outer boundary of cut 21 p3831 A66-39290
- Bending of anisotropic cylindrical bodies with curved axis under transverse force 21 p3833 A66-39595
- Nonlinear differential equations for cylindrically anisotropic plates, noting errors of Wolmir method 22 p3988 A66-39698
- Two-dimensional elastic equilibrium problems in reinforced plates with holes and bending theory problems in reinforced thin plates 23 p4137 A66-41003
- Bending of anisotropic elliptical plate weakened by elliptical hole solved by infinite system of linear algebraic equations 23 p4138 A66-41447
- Linear viscoelastic bending analysis of anisotropic plates 23 p4145 A66-41975
- BENDING VIBRATION**
- Calculation method for natural bending pulsations of continuous medium extended to case of torsion 01 p0154 A66-10843
- Intermediate stages of wave-type bending process in elastic plate investigated by system of approximate methods 01 p0157 A66-10983
- Equations for rotational motion of satellite and rods with end loads as stabilizer, considering rods elastic deformation caused by load bending 02 p0295 A66-11651
- Resonant frequency of circular cylindrical shells under initial stress 02 p0301 A66-12165
- Behavior of centrally compressed rod beyond proportionality limit, noting system stability 04 p0590 A66-14162
- Asymptotic analysis for equations of axisymmetric vibrations of thin shells [ASME PAPER 65-WA/APM-15]
- Numerical technique to determine vibration characteristics of disk-like structures in turbine engine [ASME PAPER 65-WA/GTP-8] 05 p0777 A66-15437
- Shaft deflections in turbopumps from cavitation-induced unbalanced hydrodynamic forces in inducer 05 p0639 A66-15723
- Fatigue stress analysis, using graphical technique for complex problem of bending and torsional out-of-phase variable frequency vibrations 07 p1038 A66-18174
- Harmful oscillation elimination from high rpm gyroscopic centrifuge by introducing one elastic bearing into dynamic system 07 p1147 A66-18342
- Exact solution of wave field of point vibrator operator on free plate in form of elastic strip, comparing theory and measurement 08 p1307 A66-18877
- Formula for numerical values of propagation rates of flexural harmonic waves of various lengths 11 p1780 A66-22605
- Frequency characteristics of bending vibrations of bounded rods with electromechanical feedback, possibility of artificially attenuating resonance vibrations and conditions for self-excitation 11 p1780 A66-22605
- Parallelogrammic elements in solution of deflection and natural frequency of rhombic cantilever plate 13 p2194 A66-25088
- Calculation of natural twisting and bending vibrations of beam whose characteristics vary along length 13 p2198 A66-26237
- Dilatational wave resonance scattering of waterborne sound waves on hollow cylinder excited to oscillation by incident sound 14 p2401 A66-27983
- Flexural vibration of uniform shafts treated by impedance techniques and traveling-wave concepts 14 p2400 A66-27683
- Bending-torsional flutter of uniform swept wing with velocity component aerodynamic-strip theory 17 p3022 A66-32015
- [AIAA PAPER 66-475] 17 p3028 A66-32767
- Bending oscillations of semiminfinite beam with moving end 17 p3030 A66-32815
- Free flexural vibration of cylindrical shells stiffened by equidistant ring frames treated by finite difference calculus 17 p3030 A66-32815
- Subharmonic vibrations during resonant testing of thin walled beams for coupled torsional and bending vibrations 18 p3250 A66-33673
- Frequency characteristics of bending vibrations of bounded rods with electromechanical feedback, possibility of artificially attenuating resonance vibrations and conditions for self-excitation 18 p3256 A66-34559
- Reissner-Uflyand-Mindlin PDEs for circular ring flexural vibrations under transverse shear and rotary inertia 21 p3822 A66-38513
- Longitudinal, torsional and flexural free vibration of elastic slender bar of variable cross section with nonhomogeneous properties 22 p3992 A66-40297
- Mass point transfer matrix for coupled bending-torsion of swept wing and tail surfaces 22 p3992 A66-40299
- Orthogonality condition for eigenvalue problem of out-of-plane twist-bending vibrations of elastic ring for various sets of boundary conditions 23 p4134 A66-40986
- Nonlinear flexural vibrations of thin circular rings analyzed, using Galerkin procedure on motion equations 23 p4139 A66-41693
- BENZENE**
- Self-consistent field calculations of benzene molecule using Gaussian expansion functions, considering 42 electrons and finding interspersions of sigma and pi levels 24 p4285 A66-42142
- Crystallization kinetics of tri-alpha-naphthyl benzene in large temperature range, noting transition in morphology, crystal growth rate and viscosity 04 p0473 A66-13648
- Molecular acentricity effect on intermolecular pair potential of n-alkane homologs and benzene 08 p1179 A66-19595
- Coupling of adjacent axial modes in external Raman resonator observed as first Stokes frequency with benzene as Raman medium and Q-switched ruby laser as pump 10 p1495 A66-21803

source 21 p3747 A66-39109  
Triplet states of liquid benzene and  
toluene studied, using biacetyl  
phosphorescence  
sensitization 23 p4032 A66-42077

**BENZOIC ACID**  
Raman scattering and IR absorption  
spectra of gaseous, liquid and crystalline  
benzoyl benzoic acid and O-and M-toluic  
acids 09 p1339 A66-20941

**BERGMAN OPERATOR**  
Bergman integral operator to generate  
families of transonic flow patterns which  
yield Ringleb pattern as special  
case 17 p2909 A66-32498

**BERNOULLI EQUATION**  
Change of variables for generalization of  
Konyukov second-order nonlinear  
differential equation, using Bernoulli and  
Riccati equations 09 p1393 A66-19917  
Pitot tube technique for measuring  
velocity profiles, using Bernoulli equation in  
stress measurement in laminar viscoelastic  
flow 22 p3898 A66-40010  
Fluidmagnetic buoyancy effects in  
ferrohydrodynamic /FHD/ flows and  
implications of Ernschaw levitation  
theorem 23 p4057 A66-41885

**BERNOULLI THEOREM**  
Proof of irreducibility of Bernoulli  
polynomial, using Norlund  
notation 01 p0093 A66-10386  
Bernoulli theorem development and  
extension 17 p2911 A66-32819  
Probability of recurrent event defined over  
t-state r-th-order Markov chain, specifically  
probability of events in Bernoulli  
sequence 21 p3757 A66-39103

**BERYLLIUM**  
Acoustic fatigue characteristics of  
beryllium panels exposed to high intensity  
random noise 01 p0149 A66-10143  
Beryllium properties and fabrication  
process in space 01 p0085 A66-10364  
Beryllium technology noting fabrication  
methods, physical and mechanical properties,  
toxicity, low transverse ductility,  
application, etc 02 p0244 A66-11739  
Titanium, beryllium and refractory metals  
properties and application of their alloys in  
aircraft industry 02 p0244 A66-11743  
Metal ignition and combustion of aluminum  
and beryllium  
[AIAA PAPER 65-103] 05 p0793 A66-15782  
Radiative recombination in p-n junctions  
produced by diffusion of beryllium into  
GaAs with very high electron  
concentration 07 p1096 A66-17325  
Stacking faults and Burger vector  
dislocations in twin crystals of beryllium  
observed by electron  
microscopy 08 p1235 A66-18651  
Papers on beryllium properties and  
metallurgy, emphasizing application as  
construction material, ductility improvement  
and processing 08 p1237 A66-18839  
Powder metallurgy of beryllium, discussing  
manufacturing, compacting and  
sintering 08 p1237 A66-18840  
Melting and casting techniques in  
purification and production of beryllium,  
discussing vacuum induction and  
ingots 08 p1230 A66-18841  
Beryllium rolling and sheet metal  
fabrication, discussing billeting and  
temperature conditions in foil  
manufacture 08 p1230 A66-18842  
Extrusion process for complex beryllium  
structures, noting die-wear  
problem 08 p1230 A66-18843  
Beryllium powder forging, working  
temperatures and use of steel  
cans 08 p1230 A66-18844  
Forging techniques for vacuum hot-pressed  
unclad beryllium metal billets, noting  
temperature effect 08 p1230 A66-18845  
Metal-metal joining techniques for  
beryllium 08 p1230 A66-18846  
Surface treatment and coating for  
beryllium corrosion and surface  
damage 08 p1230 A66-18847  
Physical, thermal, electrical and optical  
properties of beryllium 08 p1238 A66-18849  
Mechanical properties of beryllium S-200  
and I-400 QMV hot-pressed block, S-200  
cross-rolled sheet and I-400 in extruded and

forged condition 08 p1238 A66-18850  
Beryllium ductility in fabrication as  
affected by single crystal slip and fracture  
and improvement by grain  
control 08 p1238 A66-18851  
Research trends of commercial beryllium  
as affected by physical and alloy  
properties 08 p1238 A66-18853  
Health hazards in handling and processing  
beryllium and its compounds, noting effect  
on lungs and reviewing AEC  
recommendations 08 p1177 A66-18854  
Suitability of beryllium reinforced plastics  
and various light metals for application in  
manned space stations 10 p1545 A66-21216  
High temperature equilibria among vapor  
species produced by fluorination of  
beryllium in Knudsen effusion cell, using  
mass spectrometer, deriving dissociation  
energy 12 p1811 A66-23621  
Oxidation of hot pressed and extruded  
beryllium during heating in air at various  
temperatures and for various heating  
times 12 p1897 A66-24902  
Rational compression curves and plastic  
deformation mechanism of cast and drawn  
polycrystalline beryllium 13 p2106 A66-25356  
Energy spectra of ions emitted by  
beryllium, carbon and molybdenum heated  
by laser 13 p2131 A66-25479  
Beryllium diffusion into gallium arsenide in  
/111/ plane with various electron  
concentrations through vacuum  
deposition 14 p2358 A66-27087  
Ductility and production techniques of  
cross rolled beryllium sheet  
[SAE PAPER 660291] 14 p2313 A66-27287  
Diffusion saturation of industrial iron,  
molybdenum, Kh18N9T steel and ZhS6-K  
alloy with powdered beryllium  
mixture 15 p2520 A66-28538  
Heat capacity of high purity beryllium  
measured at temperatures below 30 degrees  
K 16 p2775 A66-30727  
LF internal friction of beryllium, noting  
strain amplitude dependency variation with  
temperature and purity, obtaining activation  
energies 16 p2724 A66-31265  
Ti-Be system phase diagram, noting  
solubility and formation of eutectoid and  
eutectic 18 p3121 A66-33725  
Beryllium single crystal plasticity increased  
due to preprogrammed  
load 18 p3124 A66-34404  
Negative temperature coefficient of  
electrical resistance, anomalous Hall  
constant and magnetoresistance constant for  
thin films of Be and Pb 18 p3157 A66-34627  
Effect of chemical chromate film on high  
temperature oxidation behavior of  
beryllium 19 p3386 A66-36437  
Beryllium properties and application in  
aerospace noting alloy sheet fabrication,  
temperature effect, toxicity, impact tests,  
etc 21 p3752 A66-39239  
Joining processes effect on mechanical  
properties and metallurgical structure of  
beryllium 22 p3925 A66-40264  
Adhesively joined beryllium structures for  
extreme temperature application, noting  
properties in various  
conditions 22 p3926 A66-40277  
Temperature measurements of laser sparks  
from relative intensity of X-ray flux  
transmitted through beryllium foils of  
different thickness 22 p3933 A66-40421  
Beryllium diffusion into gallium arsenide in  
/111/ plane with various electron  
concentrations through vacuum  
deposition 22 p3967 A66-40843

**BERYLLIUM ALLOY**  
Diffuse X-ray scattering in crystal  
structure of Ni-Be and Cu-Be alloys during  
first stage of aging due to anisotropic  
monoclinic lattice  
distortions 08 p1235 A66-18589  
Solid solubility of Be in W and properties  
of tungsten-richest  
beryllide 08 p1235 A66-18623  
Beryllium-containing alloys, properties and  
effect of beryllium  
addition 08 p1237 A66-18848  
Powder metallurgy development of  
sintered alloys of magnesium with MgO and  
magnesium-beryllium alloys with high  
oxidation resistance 10 p1544 A66-21200  
Mechanical property evaluation and  
reproducibility in six heats of commercial

Be-Al alloy 13 p2108 A66-25769  
Welded beryllium-copper structures,  
techniques and properties 13 p2086 A66-26015  
Axially loaded cylindrical structures  
analyzed for optimum weight construction  
consistent with cost constraint, emphasizing  
beryllium-aluminum alloys 14 p2406 A66-28023  
Abnormal X-ray interference pattern  
change during aging of nickel-beryllium  
alloys 18 p3124 A66-34405  
Optimum aging temperatures obtained  
from electric resistance of beryllium alloys,  
containing chromium and  
zirconium 18 p3124 A66-34406

**BERYLLIUM COMPOUND**  
Beryllium and beryllium compounds are  
components of most efficient chemical fuels,  
theoretically known but extremely  
toxic 03 p0414 A66-12907  
Aluminum-beryllium base alloys, noting  
problems of application as construction  
materials 08 p1239 A66-18904  
Hot wire-drawn beryllium recrystallization  
analyzed by hardness measurement and  
micrography, noting dependence on initial  
deformation 13 p2107 A66-25358  
Production process for gun-drilling of holes  
in beryllium, noting filtration techniques,  
and clamping fixture  
[ASTME PAPER MR66-185] 14 p2300 A66-26959  
Thermodynamic and physical properties of  
beryllium hydroxide at four temperatures in  
1567-1808 degrees K range, with computation  
of free energy of  
formation 14 p2370 A66-27372

**BERYLLIUM OXIDE**  
Brittle and plastic behavior of hot-pressed  
polycrystalline BeO noting stress corrosion,  
fractography and X-ray rocking  
curves 05 p0701 A66-14933  
Anisotropic broadening of X-ray diffraction  
lines and increase in lattice perimeter  
resulting from neutron irradiation of  
beryllium oxide powder 06 p0896 A66-16539  
BeO properties and relationship to  
microstructure and fabrication  
variable 07 p1051 A66-18297  
Beryllium oxide properties, fabrication and  
application 08 p1243 A66-18852  
AMRA high speed tensile tester analysis of  
dynamic stress-strain behavior in beryllium  
oxide in flexure and in  
compression 13 p2115 A66-26114  
Anisotropic broadening of X-ray diffraction  
lines and increase in lattice perimeter  
resulting from neutron irradiation of  
beryllium oxide powder 15 p2524 A66-29986  
X-ray diffraction analysis of single crystal  
silicon film grown on several natural faces  
of BeO by thermal decomposition of silane  
and hydrogen reduction of silicon  
tetrachloride 16 p2782 A66-31420  
Interstitial dislocation loops in beryllium  
oxide irradiated at high  
temperatures 19 p3398 A66-35495

**BERYLLIUM POISONING**  
Safety measures in working with beryllium,  
discussing berylliosis prevention, dust  
reduction, protective  
suits, etc 05 p0687 A66-14862

**BERYLLIUM 10**  
Determination of constancy of cosmic  
radiation and of terrestrial and cosmic ages  
of ferrous meteorites by radioactivity of Al  
26 and Be 10 20 p3651 A66-37411

**BESSEL FUNCTION**  
SA LÖMMEL FUNCTION  
Solving integrals with Bessel functions as  
integrand 01 p0095 A66-11001  
Ellipsoidal wave equation /differential  
equation with ellipsoidal coordinates/  
solution expressed as Neumann  
series 02 p0249 A66-11579  
Oscillating coaxial cylinder viscometer to  
determine rheological properties of  
viscoelastic materials, using Bessel function  
approximations 05 p0678 A66-14969  
Rate of decrease of coefficients in  
expansion of potential of body of revolution  
into series of spherical  
functions 06 p0909 A66-16425  
Transversely isotropic cylindrical shell  
vibrations solved via Bessel function for  
flexural, axisymmetric and torsional  
modes 07 p1143 A66-17499  
Helium-neon gas discharge intensification  
for 6328A laser wavelength, discussing

measurement techniques, gain parameters and results 08 p1232 A66-18632  
 Rectilinear and smooth multiwave transition 08 p1191 A66-18922  
 Computation and measurement of Hall potentials and flow field perturbations in MGD flow of axisymmetric free jet 08 p1266 A66-19815  
 Sturm-Liouville series expansion of Bessel functions and Bessel differential equation eigenvalue function 09 p1394 A66-20578  
 Approximate oscillatory solution of second order linear equations, with application to Bessel equation 11 p1724 A66-23425  
 Nonuniformly spaced antenna array synthesis using lambda function via Chebyshev-Gauss quadrature and Hankel transform 12 p1841 A66-24629  
 Bessel type lambda function for describing properties of dipoles 12 p1841 A66-24630  
 Statistical theory of electronic energies, calculating binding energy at theoretical equilibrium separation of molecular hydrogen ion 13 p2130 A66-25370  
 Force-free paramagnetic model and force-free Bessel function model of stability of feeble pinch, presenting numerical calculations using Newcomb criterion 13 p2144 A66-25720  
 Solution of quasi-static problem in thermoelasticity for cylinder with time dependent boundary conditions obtained as series of Bessel functions and error functions 14 p2397 A66-27385  
 Imaginary eigenvalue existence and zeros of modified Bessel function 15 p2528 A66-29243  
 Effect of harmonic distortion on Bessel-zero technique for FM deviation measurement used in calibration of carrier deviation and FM signal generator instruments 15 p2467 A66-29857  
 FM error calculation via comparison of demodulated output with input 16 p2649 A66-30544  
 Frequency spectrum of FM signal for carrier modulation by any number of subcarriers 16 p2649 A66-30547  
 Interaction between atoms of solid surface and gas phase, obtaining closed-form solution of motion 16 p2753 A66-30786  
 Error estimates for approximation formulas for Bessel functions and Hankel functions obtained, using Luke trapezoidal rule 16 p2736 A66-31021  
 Analytic solution in terms of modified Bessel functions of synergetic turn in exponential atmosphere, using spacecraft engines only for drag cancellation and orbit trimming 16 p2811 A66-31493  
 Krylov-Bogolubov method applied to linear differential equations, noting transcendental functions and error analysis 21 p3755 A66-38596  
 Transient resonant response of inhomogeneously broadened nuclear spin system to pulsed electromagnetic field represented as series of Bessel functions modulated by time-varying coefficients 22 p3950 A66-40093  
 Uniqueness theorem for particular inverse problem of plane wave perpendicularly incident on long cylinder of complex refractive index 22 p3866 A66-40455  
 Nonaxisymmetric temperature fields for orthotropic hollow cylinder and sphere solved using Bessel functions, noting heat transfer between external and internal surfaces 22 p4000 A66-40693  
**ETA RADIATION**  
**SA LYMAN BETA RADIATION**  
 Minimization of radiation absorption in order to measure soft beta radiations in solids, liquids and gases 01 p0070 A66-10874  
 Metallic corrosion measurement by radiation backscattering and radiation induced X-rays 04 p0536 A66-13933  
 Film thickness measurements on printed circuit-board material plated with gold over copper, using X-ray emission and absorption and beta ray backscatter test methods 06 p0886 A66-16429  
 Beta-electron in nuclear photoemulsion study of primary cosmic ray properties 06 p0880 A66-16600  
 Design and operation of radioisotope-

powered battery using direct beta-particle collection to negatively charge electrode, noting choice of isotope, dielectric, collector, etc 08 p1172 A66-19657  
 Physical pattern of high altitude fission cloud and motion of gamma and beta fission fragments captured by geomagnetic field and observed by Cosmos satellite 11 p1764 A66-23043  
 Physiologically active compounds and cultured antibiotic fluids used to eliminate effects of ionizing beta radiation on plant seeds 15 p2438 A66-29487  
 Direction of collapsing star determined by detecting generated neutrino front by time delay method 18 p3223 A66-35217  
 Solar neutrino detection via -neutrino-chlorine reaction, discussing energy level positions and probabilities of beta transition 18 p3223 A66-35219  
**BETHE-HEITLER FORMULA**  
 Approximate differential operator replacing integral operator, taking ionization losses into account in electromagnetic cascade theory 24 p4269 A66-42923  
**BETHE-SALPETER EQUATION**  
**SA WAVE FUNCTION**  
 Lamb shift in lithium isotope measured by determining lifetime from photon emission and employing analog formula of Bethe and Salpeter 11 p1739 A66-22948  
**BIACETYL**  
 Sensitized and unsensitized phosphorescence and energy transfer properties of series of aliphatic alpha diketones in fluid solution 12 p1916 A66-23620  
**BIBLIOGRAPHY**  
 Survey of literature on thermodynamics from bibliographies in journals on heat and mass transfer and ASME symposia 01 p0160 A66-10178  
 Laser bibliography covering devices and related systems for period January-June 1965 02 p0239 A66-11372  
 Bibliography of current aspects of exobiology dealing with solar system, life detection system, origin of life and life in universe 02 p0182 A66-11612  
 International Satellite Bibliography including orbital theory, lunar-satellite motion, artificial asteroids, geomagnetic field, geodesy, navigation, etc 03 p0424 A66-12457  
 Bibliography of Soviet papers on space medicine and bioastronautics published in 1964 and 1965 06 p0810 A66-15910  
 Bibliography on semiconductor reliability classified under applications /computers, radio, spacecraft, etc/, costs, devices, environments, networks, production, etc 06 p0848 A66-16308  
 Soviet and foreign papers on physics of boiling including heat transfer, heat release, bubbling processes, kinetics and sonic aspects of boiling and bibliography 09 p1469 A66-20100  
 Heat Transfer Bibliography 09 p1470 A66-20180  
 Bibliography of articles on radar reflectivity and related subjects, 1957-1964 10 p1500 A66-21614  
 Bibliography of open literature on lasers, Part V 11 p1712 A66-22876  
 Review of published papers on stress-strain of perforated shells, including bibliography 13 p2201 A66-26402  
 Heat transfer bibliography of 32 Japanese works including heat transfer application, phase change, separated flow, radiation, transpiration and mass transfer 14 p2410 A66-26937  
 Heat transfer bibliography of Russian works including conductive, convective and radiant heat transfer, phase and chemical conversions, mass transfer, etc 14 p2410 A66-26938  
 Bibliographical review of German, French and English texts relative to aeronautical engineering, theoretical and applied 15 p2425 A66-29363  
 Dual-flow and single-flow jet engines 15 p2572 A66-29364  
 Flight control systems, automatic landing devices and inertial navigation with gyros 15 p2534 A66-29365  
 Bibliography of holograms 16 p2702 A66-30433

Radiation and structure of solar atmosphere, bibliographic review discussing solar spectrum, photosphere, chromosphere, corona, eclipses of 1962 and 1963, etc 17 p2997 A66-32022  
 Lunar motion and shape, reviewing observational and theoretical work of various observatories and laboratories 17 p2998 A66-32024  
 Book of astronomical literature published in 1964 17 p3000 A66-32326  
 Bibliography of programmed low-thrust trajectories and optimal low-thrust trajectories 17 p3001 A66-32350  
 Acoustics, shock and vibration bibliography of 1959-1965 meetings of Institute of Environmental Sciences 17 p2904 A66-33040  
 Heat transfer bibliography including listing of works on boundary layer flow, phase change, channel flow, MHD conduction, etc 17 p3037 A66-33043  
 Heat transfer bibliography of Russian works, including listing of works on thermodynamics, heat conduction, radiant and convective heat transfer processes, phase change, mass transfer, drying processes, etc 17 p3037 A66-33044  
 Soviet bibliography on heat and mass transfer 18 p3267 A66-35062  
 Bibliography on metal fatigue in aircraft structures, 1955-1959 19 p3473 A66-35800  
 Classified bibliography on optimization consisting of techniques, stochastic optimization and problem formulation 19 p3309 A66-35886  
 Heat transfer literature published in 1965 on conduction, channel flow, boundary layer flow, separated flow, transfer mechanism, etc 20 p3678 A66-37117  
 Annotated bibliography on R and D management with book abstracts 20 p3683 A66-37732  
 Soviet and foreign papers on physics of boiling covering heat transfer, heat release, bubbling processes, kinetics and sonic aspects of boiling, including bibliography 21 p3834 A66-38509  
 Laser bibliography July-December 1965, including references to holograms 21 p3749 A66-39541  
**BIHARMONIC EQUATION**  
**SA ELASTICITY**  
 Circle and sphere theorems for biharmonic equation and application to displacement field of stressed plate under pure bending, noting singularities 01 p0093 A66-10427  
 Approximate solution of first biharmonic problem for spatial simply-connected finite region 06 p0902 A66-16231  
 Basic biharmonic problem for any singly or doubly connected region with piecewise-smooth boundary solved by method of summary representations 11 p1778 A66-22225  
 Stress state of weakly curved cylindrical shell analyzed, finding biharmonic function from given boundary value of partial derivatives 13 p2197 A66-25853  
**BILLET**  
 Microwave attenuation method of measuring parameters of motion of billet during sheet stamping 11 p1710 A66-22859  
**BINARY ALLOY**  
 Joining and metal deposition portion of time-temperature effects on gold-aluminum thermocompression bonds 01 p0049 A66-11154  
 Binary systems of niobium pentoxides with various oxides for improvement of oxidation behavior of niobium alloys 03 p0386 A66-13210  
 Individual and combined effects of tungsten, molybdenum and zirconium additions on hardness of recrystallized niobium at various temperatures 05 p0699 A66-14698  
 Regularities in hardness variations in niobium binary alloy 05 p0704 A66-15821  
 Cobalt-vanadium-boron system, discussing phases with boron coordination number 8 07 p1047 A66-17225  
 Binary boron-metal systems, except B-Cu, show large miscibility gaps in liquid state 07 p1052 A66-18353  
 Conditions of preparation and properties of pseudobinary boron carbide-boron silicide hard alloys 08 p1239 A66-18899  
 Electrochemical and corrosion behavior of Al-based Fe, Ni, Ti, Cu and Sb alloys and intermetallic compounds 09 p1390 A66-20840

Temperature dependence of electrical resistivities of dilute binary alloys, using phenomenological approach of Krishnan and Bhatia 11 p1718 A66-23387

Book on niobium alloys including binary and ternary alloys, physical, chemical and mechanical properties, electron structure, heat treatment, resistance, etc 12 p1893 A66-23654

Electronic structure and Seebeck coefficient for chromium-iron alloys from 125 to 625 degrees K, emphasizing phonon drag and electron diffusion effects 14 p2310 A66-26879

Depressing effect of hafnium and zirconium on work function of tungsten, tantalum, niobium and rhenium 14 p2314 A66-27369

Hardening and softening of nickel-alumina alloys 15 p2519 A66-28533

Sigma-type phase occurrence in austenitic superalloys, discussing electron/atom density, residual matrix composition, etc 16 p2725 A66-31456

Chemical activities of cadmium and magnesium in binary Mg-Cd alloys based on vapor pressure measurement by Knudsen effusion method 18 p3121 A66-33729

Aging behavior and mechanical properties of three wrought high-strength magnesium-yttrium alloys 18 p3122 A66-33751

Plessite composition and texture, discussing possible origin in terms of meteorite thermal history 19 p3480 A66-35732

Order-to-disorder structural transition in binary alloys studied by method based on spectral parameters of probability distribution of various atomic configurations 19 p3402 A66-35938

Critical temperatures of binary alloy films in which major constituent is superconducting amorphous bismuth 19 p3444 A66-36007

X-ray analysis of crystal structure relationships among transition elements in binary and ternary aluminide alloys 20 p3586 A66-38092

Equilibrium diagram and existence corroboration of Ti-Rh alloy 20 p3586 A66-38093

Regularities in hardness variations in niobium binary alloy 23 p4081 A66-41386

**BINARY CODE**

Pseudorandom binary coded waveforms as modulating functions for radar signals, noting autocorrelation function 04 p0486 A66-14119

Optical ultrasonic delay lines as correlators and variable code matched filters to achieve large time-bandwidth products and high data rates 05 p0831 A66-14821

Transformations with correlation function unaltered, changing generalized Barker sequences 06 p0880 A66-18113

Extension, modification and analysis of Gorenstein-Zierler decoding algorithm for binary codes of Bose, Ray-Chaudhuri and Hocquenghem /BCH/ correcting erasures and errors 06 p0837 A66-18114

Statistics of product of Gaussian noise process and pseudorandom binary code 09 p1342 A66-19919

Simultaneous error correction and burst error detection, using binary linear cyclic codes 09 p1347 A66-20643

Telemetric technique based on data modulation and coding for satellite data transfer, stressing noise suppression, operation flexibility, error correction, etc 11 p1651 A66-22386

Residual error probability for cyclic binary code data transmission on symmetrically random noise channels 14 p2245 A66-26795

Electrohydraulic digital actuator design and conversion of discrete electric input signal in binary code to linear motion 14 p2227 A66-28366

Binary block codes simultaneously correcting additive and synchronization errors in data transmission systems 15 p2452 A66-29680

Transistor-tunnel diode RC emitter circuit for binary numeration 17 p2888 A66-32841

Asymmetrical property of binary pseudorandom noise generators, noting Gaussian probability density function in output of low pass filter 17 p2894 A66-33110

Cyclic product codes operating in variable redundancy modes used in communications systems, noting protection against errors 19 p3296 A66-35336

Existence of q-ary uniform convolutional codes where q is any prime-power, noting error-correcting ability comparable to familiar maximal-length block codes 21 p3704 A66-39138

Self-synchronizing codes derived from binary cyclic codes 21 p3720 A66-39635

Photographic data recorder noting simultaneous event and data recording capability 22 p3917 A66-39994

Inverse transfer function of pulse-forming network for binary code transmission with small intersymbol interference in time domain and narrow bandwidth in frequency domain 22 p3866 A66-40182

**BINARY DATA**

Algorithm derived for processing packet of binary-quantized signals according to maximum likelihood for various types of target fluctuations 04 p0482 A66-13919

Optimum threshold and associated error probability for detecting binary optical signals 06 p0833 A66-16683

Binary FM signal originating from single frequency source 06 p0835 A66-16861

Component characteristic determining conversion probability of input signal to output signal allowing for random dispersion of transmission characteristics of individual components 07 p1013 A66-17385

Static and dynamic characteristics of four-layer semiconductor switches as components of binary storage circuits 09 p1356 A66-20627

Pseudorandom binary sequential digital simulation of feedback control systems subjected to random input signals 13 p2030 A66-25211

Phase coherent digital M-ary transmission with binary waves through Gaussian channel 13 p2022 A66-25554

Frequency domain design of time-limited binary signals imbedded in colored Gaussian noise 13 p2052 A66-26078

Statistical properties of input signals and effect on structure of optimal binary system of signal reception 14 p2236 A66-27173

Optimum algorithm derived for making binary decisions in decision systems of hierarchic structure 15 p2469 A66-29054

Quadratic integral equation solution for bandlimited signal design for binary communication, using memoryless correlation detection 19 p3296 A66-35339

Adaptive on-off communication system for binary data transmission over noisy channel of unknown attenuation 19 p3302 A66-35709

Low error probabilities in binary communication systems estimated by statistics of bivariate extreme-value theory 20 p3514 A66-37211

Algorithm derived for processing packet of binary-quantized signals according to maximum likelihood for various types of target fluctuations 20 p3518 A66-37877

Matter exchange, period change and orbital element variation in close binary system 21 p3812 A66-38824

Optimum recognition of binary signals passed through channels with random parameters, examining case where variances are equal and case of exact estimation of parameters 21 p3705 A66-39147

Design formulae and comparative tables of three n-input universal logic circuits 22 p3883 A66-39727

Plurality-count diversity combiner for fading M-ary transmission, noting nonbinary alphabets with plurality count combining for transmission of binary data 22 p3865 A66-40069

**BINARY FLUID**

Chapman-Enskog kinetic gas theory calculation of diffusion coefficient of binary gas mixture 17 p3035 A66-32694

Rotating Couette flow of miscible binary liquid mixture between two coaxial cylinders 18 p3102 A66-34924

Concentration profile of heavy species for binary fluid mixture under body force from uniformly mixed upstream condition, considering inviscid hydrodynamical model 18 p3103 A66-34925

**BINARY INTEGRATION**

Optimum number of phase-quantization

steps in phase-shift keying communications system for maximum data transmission rate, using binary integration method 08 p1183 A66-19097

Binary communications integral equations in complex variable functions and application of Fourier transform for bandlimited signals 23 p4085 A66-41537

**BINARY MIXTURE**

Reflectance and emittance properties of binary coatings in sintered or compacted powder form in terms of properties of pure components [AIAA PAPER 65-670] 01 p0090 A66-10231

Interaction virial coefficient of binary gas mixtures by Guggenheim-McGlashan method 05 p0718 A66-15527

Stagnation point heat transfer for binary air diffusion model including dissociation and ionization 05 p0665 A66-15775

Heat conductivity of binary gas mixtures compared with theoretical and experimental results 07 p1155 A66-18159

Densities of binary mixtures of fused alkali nitrates with alkaline earth nitrates measured by manometric densitometer and expressed as linear function of temperature 08 p1177 A66-18617

Two-phase flow of evaporating cryogen in condensing binary mixture related to Gibbs potentials [AIAA PAPER 65-7] 08 p1318 A66-19153

Theoretical formulae for thermal diffusion of binary gas mixtures 08 p1320 A66-19569

Asymptotic steady state solution to problem of thermal separation of components across shear layer between cold jet mixture and hot ambient gas 09 p1470 A66-20178

Neutral disparate mass mixtures, replacing Boltzmann collision integrals by relaxation-type kinetic models with model equation terms ordered according to mass ratio, deriving two-fluid transport equations 10 p1523 A66-21802

Prediction of thermal conductivity of binary mixture of solids, particularly solid propellants utilizing metallic filaments 10 p1590 A66-21957

Shock wave structure in binary gas mixtures that are monatomic and chemically inert, using Mott-Smith method 11 p1691 A66-22914

Accuracy and applicability of approximate formulas describing heat conductivity of binary gas mixture 11 p1787 A66-23318

Detonation limits for binary mixtures of tetramethylsilane with oxygen, analyzing factors controlling transition from detonation to deflagration, noting condensation effects 13 p2209 A66-26303

Nonequilibrium laminar boundary layer of binary dissociating gas determined by solving nonlinear partial differential equations governing system [AIAA PAPER 65-129] 14 p2274 A66-27406

Hypothesis that system sodium fluoride-yttrium trifluoride serves as model for each of binary systems of rare earth trifluorides SmF<sub>3</sub> to LuF<sub>3</sub> with sodium fluoride 14 p2315 A66-27466

Thermodynamic characteristics of two volumes of binary gas mixture connected through capillary tube 14 p2415 A66-28324

Thermal diffusion factor of binary gas mixtures, discussing some relatively unknown characteristics 17 p3033 A66-32041

Liquid-vapor phase equilibria of neon-normal hydrogen system 20 p3676 A66-37087

Low temperature liquid-vapor equilibrium in neon-oxygen system at pressures up to 5000 psi from 63 to 152 degrees K 20 p3601 A66-37088

Time dependent Ising-model description of binary liquid mixture near critical temperature 22 p3947 A66-39922

Orientation relaxation in symmetrical-top gases and binary gas mixtures, noting prediction of cross sections from kinetic theory data for molecules 22 p3860 A66-40901

**BINARY STAR**

**SA ECLIPSING BINARY STAR**

Elements of eclipsing binary spherical stars determined from Fourier transforms of their light curves by defining characteristic functions of system 02 p0285 A66-11298

Gravitational emission from double star systems 06 p0955 A66-16779

- Classical spectroscopic binary star orbit determination techniques to provide orbital elements for lunar satellite tracked by Earth-based Doppler radar [AIAA PAPER 86-40] 08 p1298 A66-19727
- Origin of binary system by splitting of single star into two components due to rotational instability during contraction of star 09 p1455 A66-20407
- Angular momenta associated with orbital motion of close binaries is not due to localization of galactic rotation of prestellar media 09 p1456 A66-20408
- Superconducting behavior of various close packed low symmetry intermediate phases in various binary systems, noting relation between transition temperature and composition 12 p1928 A66-23939
- Electron scattering responsible for variable polarization in V444 13 p2184 A66-25624
- Cygni 13 p2184 A66-25624
- Classical spectroscopic binary star orbit determination techniques to provide orbital elements for lunar satellite tracked by Earth-based Doppler radar 18 p3234 A66-34596
- Angular momentum distribution in planetary systems computed, based on mass of star and period of revolution of planet-like companion 18 p3236 A66-34891
- Gravitational emission from double star systems 19 p3456 A66-35376
- Close binary systems involving transfer of angular momentum, considering circulatory patterns of gaseous flow and axial rotation of component stars 21 p3815 A66-39483
- Pulsation in cepheid instability strip in H-R diagram, giving equations for spherically symmetric motion 21 p3816 A66-39489
- BINARY SUMMATOR**
- Binary counter circuit, discussing relevance to solid state design, performance and operation 06 p0857 A66-16973
- Digital counter synthesis for fixed base and periodic sequence-variable base counters with various feedback loops 09 p1361 A66-20606
- Scope display width expansion via simple switching circuit with binary counter and several resistors 10 p1508 A66-21300
- Integrated circuit binary counters using majority logic current mode gate element 14 p2255 A66-27803
- Binary adder and other pneumatic logic elements producing any two-valued function of three two-valued input parameter by proper arrangement of input jet nozzles 20 p3496 A66-36862
- BINARY-TO-DECIMAL CONVERSION**
- Active two-input pure fluid OR-NOR gate fabrication by logic binary-to-decimal converter [ASME PAPER 85-WA/AUT-13] 05 p0624 A66-15606
- BINAURAL HEARING**
- Voice communication channels expansion, using mans binaural listening capability 02 p0187 A66-11828
- Psychophysical method measuring effects of several variables on loudness fluctuation of binaural beats when amplitude modulated 05 p0628 A66-15733
- Acoustic images arising from binaural repetitive wideband acoustic transients, noting tonal harmonic images and two dominant images of impulsive character 05 p0628 A66-15734
- Binaural interaction phenomena, examining end point of lateralization for dichotic clicks 09 p1337 A66-20952
- Masking-level differences/MLD/ for 600-cps low-pass transient noise explored as function of interaural time difference, interaural intensity difference and combinations of both 09 p1338 A66-20956
- Binaural unmasking of tones masked by broadband Gaussian noise including theoretical work on equalization and cancellation model 21 p3702 A66-38646
- BINDER**
- S ADHESIVE**
- S PROPELLANT BINDER**
- BINDING ENERGY**
- Strain field calculation from linearized elasticity theory for vacancies and dislocations in diamond structure valence crystals 06 p0938 A66-17147
- Correlation energy effect on dissociation and binding energies of diatomic and polyatomic molecules 07 p1000 A66-18343
- Binding energy between oxygen atom and dislocation in tantalum by measuring critical temperature at which discontinuous yield disappears on heating 07 p1052 A66-18514
- Structure of conducting and insulating liquids as affected by interatomic forces 11 p1693 A66-22979
- Statistical theory of electronic energies, calculating binding energy at theoretical equilibrium separation of molecular hydrogen ion 13 p2130 A66-25370
- Simplified method of evaluating thermal and ionizing energies from fission of uranium atoms 16 p2744 A66-30436
- O-O and O-N clusters in niobium detected via internal friction and elastic aftereffect measurements, noting equilibrium, kinetic properties, binding enthalpy, etc 18 p3121 A66-33728
- Upper limit on fractional binding energy of nonrotating magnetoturbulent supermassive star and for mass which can reach radiative equilibrium 18 p3229 A66-34141
- Effect of binding on distribution in angle of charged particles having suffered scattering with lattice atoms 19 p3403 A66-36172
- BINOMIAL COEFFICIENT**
- Betti numbers shown to be equal to binomial coefficients of torus, determining minimal set of van Hove critical points 15 p2559 A66-28624
- BINOMIAL THEOREM**
- Variables/attributes/error/propagation /VAEP/ method of system estimation from performance parameters, using binomial analysis 20 p3568 A66-37919
- BIOASTRONAUTICS**
- SA AEROSPACE MEDICINE**
- Cybernetics methods suited to complex systems associated with bioastronautics 01 p0021 A66-10807
- Basic environmental problems of man in space - International Symposium, Paris, October 1962 04 p0463 A66-14063
- Biological characteristics and physical conditions of space flights, such as low pressure, ionizing radiation, noise, acceleration, weightlessness, artificial atmosphere, feeding problems, etc 04 p0464 A66-14066
- Soviet biological and physiological investigations in rockets and satellites, particularly nonpathological character of physiological reactions to stress factors 04 p0466 A66-14076
- Space biology and medicine research, stressing flight experiments performed with Russian satellites and spacecraft 04 p0468 A66-14089
- Bibliography of Soviet papers on space medicine and bioastronautics published in 1964 and 1965 08 p0810 A66-15910
- Spacecraft crew monitoring system for evaluating performance capabilities and physiological state 08 p0818 A66-16241
- Neurologic adaptations and audiogenic responses in mice exposed to chronic 2X gravity field, noting development of more efficient circulatory system, growth pattern alterations, etc 07 p0998 A66-17660
- Basic physical/biological phenomena studied under zero-g conditions in Earth orbital spacecraft 10 p1491 A66-21529
- Pre- and postflight medical examinations of Voskhod I cosmonauts 11 p1845 A66-23049
- Environmental parameters affecting spacecrew comfort during weightlessness and optimization of comfort 14 p2231 A66-28412
- Soviet monographs on problems of space biology 15 p2431 A66-29439
- Human reaction to simulated landing impact overload, including analysis of EKG, kinetocardiogram, blood pressure and respiration data 15 p2443 A66-29445
- Space flight problems in maintaining personal hygiene 15 p2435 A66-29456
- Human physiological and hygienic problems when confined in closed system of circulating biological substances 15 p2443 A66-29457
- Sport-type knit suit indicated as most suitable astronaut clothing in small-volume cabin during comfortable microclimatic conditions 15 p2443 A66-29458
- Spacecraft-cabin microatmosphere composition, theoretically analyzing applicability of helium-oxygen mixtures 15 p2444 A66-29459
- Biological cybernetics applied to physiological studies during space flight, examining mathematical modelling, biological control and statistical dynamics techniques 15 p2444 A66-29460
- Immunological reactions of Russian spacemen before and after space flight 15 p2436 A66-29468
- Periodometer automatic analysis of periodic diurnal variations in EEG observations of six healthy men 15 p2440 A66-29503
- Maximum photosynthetic capacity for Chlorella determined experimentally from cell reproduction rates 15 p2440 A66-29505
- Book on extraterrestrial biology covering origin processes of life, planets, life detection, etc 16 p2639 A66-30874
- Oral, cutaneous and aerosol bacteriological evaluation of astronaut exposed to oxygen-hellum atmosphere at low pressure 18 p3058 A66-33778
- Life support requirements encountered in manned space flights, considering cycle involving oxygen, food and water in terms of process criteria 19 p3485 A66-36231
- Water-circulation-cooled space suit, discussing heat dissipation mechanism, body temperature maintenance, metabolic rates, astronaut comfort, etc 20 p3509 A66-38164
- Experimental biology in space, discussing goals, contributions and future potentials 24 p4164 A66-42670
- Book on space biology and medicine covering interplanetary trajectories, biological effects of prolonged and impact accelerations, weightlessness and cosmic radiation 24 p4165 A66-43130
- Main stages of development of space biology and medicine in U.S.S.R., discussing biological effects in dogs in suborbital flight vehicles and satellites 24 p4169 A66-43135
- Electromagnetic and corpuscular radiation hazards to astronauts deduced from data on dogs 24 p4166 A66-43140
- Professional training of Soviet astronauts, instilling high resistance to weightlessness, isolation, radiation, acceleration and other space flight stimuli 24 p4169 A66-43143
- BIOCHEMICAL FUEL CELL**
- Biochemical processes used to produce fuels for fuel-cell batteries, including fermentation processes involving microorganisms acting on carbohydrates 05 p0612 A66-15306
- Commercial fuel cells, noting biochemical, regenerative and low temperature carbon monoxide fuel cell 07 p0996 A66-18476
- BIOCHEMISTRY**
- SA PHYSIOCHEMISTRY**
- Astrophysical observation and experimental results of organic synthesis bearing on abiogenic formation of biochemical compounds formed from simple precursor in aqueous or aqueous ammonia system 02 p0181 A66-11603
- Martian life possibilities discussing its atmosphere, clouds, violet layer, temperature and biological interpretation of dark areas 02 p0181 A66-11607
- Electron micrographs from fraction I protein of Chinese cabbage leaves, noting substructure in individual particle 06 p0811 A66-16119
- Origination of organic matter and distribution of invisible bodies capable of supporting life 06 p0811 A66-16322
- Endocrine and metabolic response of restrained dogs to body vibration, nonanesthetized or anesthetized, showing increase in plasma and blood epinephrine 06 p0812 A66-16822
- Substrate specificity of proteolytic enzyme thermolysin /Thermolase/ isolated from bacterial cultures 09 p1338 A66-20582
- Characteristics, fine structure and mode of functioning of bacterial cell and artificial synthesis possibility 11 p1844 A66-22713
- Forms of water in biologic systems - Conference, New York, October 1964 11 p1844 A66-22987
- Structured water forms in biological systems, relationship to macromolecular system, detection and evaluating electron

- microscopy 11 p1645 A66-22992
- Crystalline lactic dehydrogenases in reaction with p-hydroxymercuribenzoate in urea 13 p2009 A66-25796
- Biochemical mutation, DNA, RNA and microorganisms infecting wing tanks of jet aircraft 13 p2011 A66-26546
- Synthesis of constituents of nucleic acid and protein molecule for artificial production of life 14 p2227 A66-26866
- Paleogenetic study of ferredoxin structure, reconstructing evolution from amino acid sequence 14 p2228 A66-27810
- Automatic chemical processing systems for extraterrestrial biochemical investigations 14 p2233 A66-28414
- Effects of alpha glycerophosphate and of palmitoyl-coenzyme A on lipid synthesis in yeast extracts 15 p2429 A66-28616
- Physicochemical processes in memory, learning, consciousness and other mental processes in man 15 p2431 A66-28671
- Chromatography on carboxymethyl cellulose to obtain fractions containing predominantly single bands of malate dehydrogenases 15 p2446 A66-28871
- Biological macromolecule detection using thiacarbocyanine dye and observation of absorption spectra changes 15 p2441 A66-29962
- Chemical laboratory experiments on origin, chemical components and structural attributes of life 16 p2638 A66-30357
- Cellulose and derivatives and coupling with biochemical substances 16 p2646 A66-31155
- Biochemical experiments aimed at explaining rapid eye movement sleep /REMS/ 16 p2641 A66-31399
- Book on photochemical origin of life 16 p2641 A66-31745
- Stereospecific hydrolytic action of acylase studied by gas-liquid chromatography 17 p2869 A66-31871
- Origins of prebiological systems and their molecular matrices - Conference, Wakulla Springs, Florida, October 1963 17 p2849 A66-32083
- Role of light in chemical and biochemical evolution noting photosynthetic reactions depending on chlorophylls, pigment system, etc 17 p2853 A66-32102
- GLC-mass spectrometric stereoisomer discrimination as means of detecting biological processes 18 p3059 A66-34372
- Space diet effect on aerobic and anaerobic microflora of human feces 22 p3854 A66-39796
- Chloride requirement for cathepsin C 24 p4165 A66-43099
- Molecular and ultrastructural correlates of function in neuron, neuronal nets and brain studied, using genetic and immunological concepts 24 p4165 A66-43102
- BIOCONTROL SYSTEM**
- SA MUSCULAR SYSTEM**
- SA RESPIRATORY SYSTEM**
- Probability state variable device /neurotron/, operation, functions and application 06 p0819 A66-16807
- Human accommodative system, investigating absence of odd-error signal mechanism under restricted monocular viewing conditions 06 p0819 A66-16850
- Electromagnetic energy transport between coils or coils external to human body and coil implanted inside body is increased by using suitable ferrite core for receiving coil 06 p0820 A66-16852
- Computational analysis employing digital computers to evaluate hypoxic stress reactions in man 07 p0998 A66-17659
- Eye control in relation to visual process, showing derivation of position information from pointing of eyeball 12 p1807 A66-23645
- BIOCOURIER PROJECT**
- S LIFE SCIENCE**
- BIODYNAMICS**
- Relative specific energy capabilities of fish and birds and body structure relative to environment 01 p0017 A66-10200
- Effect of varying strain rate on physical properties of bone and muscle tissue, measuring load and time displacement with constant-velocity compression test machine [ASME PAPER 65-WA/HUF-9] 05 p0626 A66-15699
- BIOELECTRIC POTENTIAL**
- Microcircuit internal medical sensors with

- high electronic gain and lower sensitivity transducers 11 p1647 A66-22298
- Electrophysiological study of responses of central nervous system on action of some factors of space flight 11 p1642 A66-22489
- Bioelectric potentials in animals, investigating electrical materials, anatomical sites and means of increasing output and long-term implants 22 p3857 A66-39797
- BIOELECTRICITY**
- Utilization of microorganisms to generate electrical energy 05 p0627 A66-15478
- Physiological functioning of monkeys under restricted mobility noting appetite, orientation reflexes, bioelectrical activity of brain, etc 15 p2436 A66-29470
- Vibration effect on bioelectric activity of brain and oxygen consumption, using experimental rats 23 p4027 A66-41340

- SA PHYSIOLOGICAL RESPONSE**
- Biological problems in extended manned missions caused by low g, artificial atmosphere and absence of terrestrial periodicities 02 p0185 A66-11622
- Vibration, acceleration and radiation effects on cell division, chromosome behavior and mitotic activity of bone marrow and spleen cells in mice 02 p0182 A66-11666
- Biological effects of laser radiation with reference to intact animals, primate eyes and skin and malignant tumors of animals and human origin 03 p0325 A66-12998
- Space radiation of solar and cosmic origin and biological effects, examining DNA structure and radiation induced changes 04 p0463 A66-13899
- Biological effects of cosmic radiation under laboratory and flight conditions on various craft to study measures for pharmacological and biological protection 04 p0466 A66-14077
- Biological hazards of radiation exposure of man in space discussing recovery, delayed effect, injury treatment and dose 04 p0467 A66-14078
- Laser beam use in biology and medicine noting interaction of electromagnetic radiation with biological systems, hazards diagnostics, therapeutics, etc 04 p0534 A66-14453
- Detonation and decompression research comparing biological effects of explosive decompression and detonation 06 p0811 A66-16087
- Biological effects of chronic acceleration studied by using birds and animals in centrifuges with specially designed cages 06 p0819 A66-16800
- Rats exposed to space cabin atmosphere for two weeks, noting mortality rates, organism functioning, growth rate, etc 07 p0998 A66-17663
- Correlation between solar corona and Wolf number, examining intensity variation effect on chemical and biological tests 07 p1136 A66-17846
- Biosatellite for TV monitoring of development of opossum embryonic fetus in space environment 08 p1174 A66-18581
- Acute inhalation toxicity of oxygen difluoride in albino rat 08 p1175 A66-19723
- Inhalation toxicity at ambient and reduced pressures in monkeys, dogs and rodents upon exposure to ozone, nitrogen dioxide

and carbon tetrachloride 08 p1176 A66-19724  
Text on life into space covering space biology, extraterrestrial environment, temperature, pressure, acceleration, radiation effects, etc 10 p1492 A66-22062  
Physiological effects of pressure breathing and aveolar oxygen tension at high altitude 10 p1489 A66-22117  
Personnel comfort and protection from thermal stress, discussing clothing, environmental temperature, metabolic heat production, solar radiation, etc 10 p1492 A66-22120  
Cathodic depolarization theory of bacterial corrosion, using Desulfovibrio desulfuricans with benzyl viologen as electron acceptor 11 p1647 A66-22303  
Psychological and medical aspects of human confinement, isolation and sensory deprivation 11 p1642 A66-22485  
Vasovagal syncope induced by application of negative pressure to lower half of human body, noting effect on lung CO diffusing capacity 11 p1643 A66-22580  
Low-gravity vibration stress- effects on weight, growth, metabolism, white blood cells and endocrine system of albino Wistar rats 11 p1643 A66-22581  
Biological effect on mice of bombardment by protons of 120 mev 11 p1645 A66-23055  
Response of tissue culture cells to low magnetic fields, noting no quantitative growth differences 12 p1807 A66-25015  
Optical ray tracing to predict focusing characteristics of laser light in refractive targets, calculating heating effects in target, noting target geometry, refractive index, thickness of skin layers, etc 13 p2090 A66-25531  
Laser safety standards, discussing nature of photobiological mechanisms responsible for tissue damage upon exposure to laser radiation 14 p2309 A66-27775  
Ambient pressure effect on tolerance of mice to air blast 15 p2430 A66-28655  
Long duration flight physiological data on ducks and chickens in closed ecological systems, including oxygen and food requirements and carbon dioxide output 15 p2435 A66-29452  
Antiradiation protection and relative biological effectiveness of seldom-ionizing radiation 15 p2435 A66-29455  
Biological experiments under flight conditions in Vostok spacecraft, noting reproduction of Drosophila melanogaster and effect of weightlessness and cosmic radiation on hereditary structures 15 p2436 A66-29465  
Space flight effect on living cells examined by using higher plants as biological dosimeters 15 p2436 A66-29469  
Vibration effect on reception of certain organs and tissues of white mice to dye introduced intravenously 15 p2437 A66-29477  
Effects on white mice of exposure to oxygen-enriched air, noting biological and physiological observations 15 p2439 A66-29493  
Toxic and lethal effect on mice of ammonia in air, noting biological and physiological changes 15 p2439 A66-29494  
Biological effects of confining fish in sealed aquarium with and without Chlorella 15 p2440 A66-29504  
Planetary quarantine constraints, noting prevention of Martian atmosphere contamination 15 p2441 A66-29966  
Pulmonary blood flow distribution under forward accelerations studied by combined use of human centrifuge and radio-isotope scanning 17 p2856 A66-32153  
Altered physiologic function of dogs produced by exposure to pulsed microwaves including study of combined effect of X-irradiation 17 p2856 A66-32156  
Increase of arterial lactate and pyruvate in blood glucose of fasted anesthetized dog after hydrazine injection 17 p2856 A66-32157  
Calorimetric study of effects of hydrazine on heat balance, source of metabolic energy and rate of protein catabolism of rats 17 p2856 A66-32158  
Toxic effects of hydrazine derivatives tested in dogs, producing methemoglobin and pigmentation in blood 17 p2856 A66-32159  
Microbial profiles of 20 men under simulated space conditions indicates that

certain men can go unwashed six weeks 17 p2856 A66-32160  
Magnetic effects on reproduction and metabolism of normal and diseased mammalian cells in vivo and in vitro 17 p2859 A66-32229  
Theoretical molecular mechanism of chemical radio-protection based on stabilization of defects of damaged biological structures by molecular adsorption 17 p2861 A66-32940  
Seed water content influence on oxygen effect as detected in gamma irradiated barley seeds and prolonged post-storage period in terms of biological effect and paramagnetic resonance 22 p3855 A66-40378  
Biological effect of atmospheric conditions and physical and psychological factors on living organisms 24 p4165 A66-43134  
Main stages of development of space biology and medicine in U.S.S.R., discussing biological effects in dogs in suborbital flight vehicles and satellites 24 p4169 A66-43135  
**BIOLOGICAL MODEL**  
Organic superconductor and dielectric IR waveguide, resonator and antenna models of insects sensory hairs, spines and pit pegs 06 p0847 A66-16103  
**BIOLOGICAL RHYTHM**  
Animal temperature sensing for studying effect of prolonged orbital flight on circadian rhythms of pocket mice 03 p0328 A66-12767  
Flight fatigue studies, discussing parametric evaluation of crew performance on overseas flights 06 p0816 A66-16057  
Human adjustment to shift in day-night cycle and effect of space flight on sleep and activity cycles of astronauts 08 p1174 A66-18582  
Light effect on rhythmic excretion of water and electrolytes in humans 09 p1335 A66-20534  
Random lighting exposure effects in rats and changes caused in adrenal cortical function, circadian rhythm, endocrine system, group running activity, etc 15 p2429 A66-28487  
Daily physiological rhythm changes associated with light intensity and color, noting body temperature oscillations vs light intensity, heart rate changes, etc 15 p2441 A66-29959  
Book on physiological responses of healthy mammals to natural changes or extremes of physical environment, considering heat, cold, light, atmospheric pressure and water 20 p3505 A66-37253  
Miniaturized implantable biotelemetry transducer for study of metabolic rhythms in extraterrestrial life 24 p4167 A66-42674  
NASA Biosatellite Program exploring dynamic space flight effects on terrestrial organisms and Earth diurnal rotation effect on biological rhythm 24 p4168 A66-42675

SA RADIOBIOLOGY  
Collected works of K. E. Tsiolkovskii on astronomy, natural science and technology 01 p0135 A66-10295  
Exobiology concepts suggest that apparent inherent limitations on temperature, pressure or chemical environment for living matter are geocentric 02 p0181 A66-11602  
Gate control system role in pain mechanism, noting specificity and pattern theories 03 p0325 A66-13337  
Relative contribution of stapedial reflex to remote and contralateral remote masking 09 p1337 A66-20953  
Response of tissue culture cells to low magnetic fields, noting no quantitative growth differences 12 p1807 A66-25015  
Proton tunneling and mutation rate of Escherichia coli B To T1 and T2 phage resistance in water 13 p2008 A66-25788  
General cosmological problem /GCP/ based on unified field theory involving cosmological expansion, oscillation and organic evolution, discussing quadrant mechanics, entropy, ether, minimum time problem, etc 14 p2389 A66-28408  
Relationship between biology and physics 18 p3060 A66-34454  
**BIOREGENERATION**  
Electrolysis-Hydrogenomonas bacterial bioregenerative life support system for manned space flight of long duration 06 p0815 A66-15929  
Biological procession of human secretions and water regeneration by Chlorella in bacterial colony 15 p2440 A66-29501  
Chemical methods for carbon dioxide conversion for oxygen recovery, including relationship to biological processes 19 p3293 A66-36235  
Algal bioregenerative photosynthetic gas exchange system 19 p3293 A66-36239  
**BIOSATELLITE**  
NASA biosatellite study of organism in space environment, with emphasis on weightlessness and radiation effect 07 p0999 A66-17615  
Design of recoverable biosatellite spacecraft for studying effects of space environment on living organisms 08 p1301 A66-18580  
Biosatellite for TV monitoring of development of opossum embryonic fetus in space environment 08 p1174 A66-18583  
Self-contained environmental control system for biosatellite study of prolonged effects of weightlessness and radiation [AICE PREPRINT 19D] 10 p1491 A66-21186  
NASA Biosatellite Program exploring dynamic space flight effects on terrestrial organisms and Earth diurnal rotation effect on biological rhythm 24 p4168 A66-42675  
**BIOSENSOR**  
S BIOINSTRUMENTATION  
**BIOSIMULATION**  
SA ARTIFICIAL INTELLIGENCE  
Analog method for simulating visual receptor network as model for inhibitory interaction in retina 06 p0819 A66-16849  
Analog computer, programmed on digital computer, used in examination of lumped and distributed parameter models of cardiovascular system 12 p1809 A66-24230  
**BIOT METHOD**  
Biot variational method applied to transient heating of porous half-space from which gas escapes [AIAA PAPER 65-118] 03 p0444 A66-12766  
Approximation method for calculating transient temperature field in solid for case where heat-transfer coefficient varies 24 p4296 A66-43224  
**BIOTECHNOLOGY**  
Medical knowledge as aid in preventing

aircraft accidents and injury through investigation of causes and results 10 p1495 A66-22142

**BIPROPELLANT**

Pulse operated bipropellant control valve design for attitude control systems of space vehicles 01 p0015 A66-10668  
Flow rate distribution and mixing ratio of two impinging jets in simulation of bipropellant liquid rocket system, using hypergolic propellants 02 p0278 A66-11590  
Lithium-hydrogen bipropellant arc jet 14 p2374 A66-27426

**BIRD**

SA CHICKEN  
SA PIGEON

Relative specific energy capabilities of fish and birds and body structure relative to environment 01 p0017 A66-10200  
Behavioral characteristics of birds that collide with aircraft in flight and methods to reduce such strikes at airports [AIAA PAPER 65-748] 03 p0319 A66-12584  
Radar cross sections of ducks and chickens at vertical polarization and 400 mc 10 p1503 A66-21647  
North American Sabreliner laminate windshield for bird-proofing pilot compartment [SAE PAPER 660214] 13 p1995 A66-26389  
Long duration flight physiological data on ducks and chickens in closed ecological systems, including oxygen and food requirements and carbon dioxide output 15 p2435 A66-29452  
Respiratory activity and hematological factors of avian blood cells, discussing oxygen consumption, thermal effects, tissue and erythrocyte metabolism 23 p4024 A66-41043

**BIREFRINGENCE**

Mechanical double refraction of unsaturated copolymer polyesters of styrene subjected at different temperatures to constant tensile stress [ONERA TP 276] 04 p0538 A66-14242  
Temperature dependence of optical birefringence on single crystals of lead zirconate-titanate solid solution measured, noting they are optically negative 08 p1269 A66-19006  
Polarization and birefringence of photoelastoplastic medium 11 p1781 A66-22613  
Mechanical and optical measurements on plasticized polyvinyl chloride, photoviscoelastic stress analysis and wave propagation effects 14 p2318 A66-27767  
Fundamental equations for birefringence of isotropic elastic solids and isotropic viscous fluid derived from Toupin theory of photoelasticity and stress optics 14 p2408 A66-28388  
Calibration of birefringent filter photometer 15 p2499 A66-28845  
Stress in viscoelastic polystyrene in Aroclor flowing in straight, converging and diverging channels 16 p2686 A66-31043  
Resonant birefringence in potassium vapor under influence of electric field of ruby laser emission 19 p3375 A66-36066  
Laser light modulation by Pockels or Kerr effect for application to telecommunications system, examining electrical birefringence modulation 19 p3304 A66-36262  
Uniqueness theorems concerning lossless birefringent networks and effects on transmittance of changing sign of crystal angles and output 20 p3599 A66-36943  
Maxwell-Lorentz field equations for Couette flow birefringence of Rivlin-Ericksen viscoelastic fluid and Noll simple fluid 21 p3724 A66-38761  
Birefringence of certain crystals sufficiently large to allow collinear backward wave interaction of three electromagnetic waves with signal frequency tunable over large portion of IR spectrum 21 p3771 A66-39113  
Optical dispersion and dispersion of birefringence, noting photoelastic methods and stress-strain optical coefficients 22 p3994 A66-40437  
Fatigue testing machine shear strain measurements near cracks on Al flat plate surfaces by observing birefringence 23 p4147 A66-41997

Adhesive backed birefringent tape for separation of thin film and printed circuit master drawings with near perfect registration for microelectronic production masking purposes 24 p4180 A66-42312  
Photoelectric photometer using filter that tilts relative to incident light for patrol observation of 5577 angstrom intensity in nightglow 24 p4210 A66-42468  
Self-trapping of laser beam due to diffraction from dielectric waveguide arising from permittivity increase of birefringent beam 24 p4222 A66-42554  
Birefringence recording device for measurements within very short wavelengths, describing photoelastic applications for identifying degrees of annealing and homogeneity of glass 24 p4292 A66-42965

**BIREFRINGENT COATING**

Photoelastic experiment by birefringent coating method to determine stress analysis applicable for any elastic body 02 p0298 A66-11583  
Dynamic strains and transient deformations on opaque body surfaces measured, using bonded birefringent strip 12 p1961 A66-23988  
Minimization technique for light scatter due to diffuse mirrored birefringent coatings used in performing photoelastic studies by fringe multiplication 18 p3257 A66-34563  
Stress-strain determination in elastoplastic problems with aid of photoelastic epoxy resin coating 23 p4135 A66-40990  
Direct determination of oblique incidence coefficients in birefringent coatings and models, eliminating error sources 24 p4292 A66-42863

**BISMUTH**

Recrystallization of bismuth films by controlled melting and resolidification 05 p0732 A66-14668  
Transport theory based on relaxation time applied to bismuth, deriving analytic expressions for electric resistance, thermoconductivity and Hall, Seebeck and Nernst coefficients 07 p0990 A66-17237  
Polarization and Alfvén wave attenuation in Doppler-like change in transverse wave velocity when drift current is passed parallel to magnetic field in solid-bismuth plasma 07 p1102 A66-18209  
Pronounced quantum effects of solid-bismuth plasma properties at quantum limit and low temperature 07 p1082 A66-18212  
Quantum size effects in thin bismuth film and specific resistance, Hall effect and reluctivity 13 p2160 A66-25107  
Magnetic hysteresis and switching property of manganese-bismuth thin magnetic films epitaxially grown by vapor deposition technique 14 p2355 A66-26913  
Excitation of Alfvén waves in semimetal plasma at low temperature, noting wave propagation below plasma or cyclotron frequency in magnetic field 14 p2363 A66-27516  
Temperature dependence of Hall effect and conductivity of lead telluride single crystals containing bismuth 14 p2364 A66-27645  
Quantum size effects in thin bismuth film and specific resistance, Hall effect and reluctivity 16 p2771 A66-30286  
Alfvén wave propagation equations used to study electronic properties of semimetals 20 p3615 A66-37282  
Elastoresistance effects in evaporated bismuth films, deposited on glass and epoxy resin substrates, used as strain gauges and transducers 22 p3962 A66-40046  
Criticism of identification of bismuth lines with lines of solar spectrum based on analysis of new tracings of solar spectrum by Kachalov 24 p4278 A66-42709  
Thermoelectric power measurement method for thin bismuth lamella, obtaining Peltier and Thomson coefficients 24 p4258 A66-43010

**BISMUTH ALLOY**

Electrical resistivity, Hall effect and magnetoresistance of bismuth antimony single crystal solid solutions 02 p0272 A66-11712  
Electronic band structure of BiSb alloy tunnel junction for various Sb concentrations 16 p2770 A66-30178

Critical temperatures of binary alloy films in which major constituent is superconducting amorphous bismuth 19 p3444 A66-36007

**BISMUTH COMPOUND**

Temperature dependence of dielectric permittivity and relative expansion of bismuth ferrite in large temperature intervals, detecting phase transitions 14 p2357 A66-27078  
Fermi surface of metals and semimetals and quantum oscillations in ultrasonic attenuation and magnetic susceptibility of InBi 14 p2366 A66-27763  
Temperature dependence of dielectric permittivity and relative expansion of bismuth ferrite in large temperature intervals, detecting phase transition 22 p3967 A66-40834  
Magnesium antimonide and magnesium bismuthide as materials for power generating thermocouples 24 p4227 A66-42111

**BISMUTH OXIDE**

Polarization effects in magnetic and nonmagnetic barium plus bismuth oxide and magnesium-zinc ferrites when subjected to DC low-voltage electric fields 03 p0409 A66-12690

**BISMUTH TELLURIDE**

Thermoconductivity decrease of bismuth-telluride based solid solutions due to forbidden bandwidth and majority and minority carrier mobility 01 p0127 A66-11029  
Assembly for determining thermal conductivity coefficients of liquid bismuth selenide-bismuth telluride semiconductor at 970 to 1280 degrees C 06 p0882 A66-16839  
Transverse reluctance of bismuth telluride in pulsed magnetic fields revealing fine structure of Shubnikov-De Haas oscillations, interpreted as spin-splitting of Landau levels 16 p2786 A66-31695  
Bismuth telluride alloy solar thermoelectric flat plate generators applied to auxiliary power systems for exploratory missions toward Sun 20 p3497 A66-37166

**BISTABLE AMPLIFIER**

Electronic relays with bistable elements based on nonlinear circuits with p-n junction capacitance 15 p2468 A66-29923

**BISTABLE CIRCUIT**

Transient processes in nonlinear trigger circuit with capacitive p-n junction used in bistable trigger systems 11 p1670 A66-23226  
Monostable and bistable counting circuits: synthesis and analysis of volt-ampere characteristics 11 p1678 A66-23238  
Bistable fluid elements without moving parts for switching fluid currents showing stability against load and supply pressure fluctuation 19 p3283 A66-36810  
Operating characteristics of pneumatic bistable element using Coanda effect, examining correlation between outlet flow and pressure and feed pressure 21 p3697 A66-38802

**BIT SYNCHRONIZATION**

Bit synchronization of coded messages transmitted by telemetering 03 p0333 A66-12474  
Operational test instrument for PCM bit synchronizers/signal conditioners, discussing importance of bit decision errors 16 p2659 A66-30541

**BLACK ARROW LAUNCH VEHICLE**

Rocket engines for Black Arrow satellite launcher, noting solid propellant motor in third stage, payload mass ratio, etc 16 p2791 A66-30349

**BLACK BODY RADIATION**

Thermal radiation absorption by droplet or spray during ignition and combustion of atomized liquid fuels 01 p0164 A66-10899  
Photographic pyrometer using variable-density filter noting temperature master curve, attenuation, calibration and error sources 02 p0229 A66-11518  
Surface cooling effect on accuracy of black body coefficient determination for highly heated materials 03 p0444 A66-12518  
IR radiation of refractory solids with radiation properties of flame-sprayed ceramic coatings, determining normal spectral emittance, integrated normal total emittance and IR intensity curves at 1300 K 03 p0386 A66-13100  
Doppler effect discussing relativistic form, transmission in dispersive media, broadening

of spectral lines, black body radiation, rocket and satellite tracking, navigation and application 04 p0546 A66-14383  
High temperature air-carbon plasma noting black body radiation, atomic constants and thermodynamic equilibrium 04 p0599 A66-14460  
Solar thermonuclear process, radiation phenomena, structural measurements, observations and properties 05 p0767 A66-15757  
Planckian black body approximation used to simulate and assign star magnitudes for nonhuman photodetector, considering relationship between star brightness and stellar spectra 07 p1003 A66-18332  
Thermal radiation into space of limited areas of inner walls of space radiators determined, assuming cylinder and cone are isothermal black body radiators 08 p1317 A66-18835  
IR fluctuations radiated by fluid mechanical turbulence of hot shear layers analyzed, assuming gas mixture is black body [AIAA PAPER 66-107] 08 p1206 A66-18955  
Radiometers observations of atmospheric IR irradiance, noting measurement results with improved equipment 09 p1369 A66-19869  
Radio observation of Mercury, Venus, Mars, Saturn and Uranus and black body temperatures of planets 09 p1450 A66-20110  
High temperature black body as spectral radiance standard for high intensity arc 09 p1471 A66-20504  
Cylindrical black body furnace with graphite resistance built in France, attaining 1600 degrees C, for calibration of radiation pyrometers 09 p1383 A66-20909  
Effects of long-wave radiation exchange near Earth surface, extrapolating air temperature measurements to ground to estimate surface temperature, obtaining equivalent black body temperature of ground 11 p1702 A66-23155  
Continuous emission and absorption of plasmas by calculating radiation of hydrogen plasma, deriving temperature and pressure conditions under which plasma radiates as black body 12 p1919 A66-23750  
Black body radiation law deduced from astochastic electrodynamics 14 p2414 A66-28173  
Equilibrium binary correlations in classical relativistic homogeneous electron gas 14 p2336 A66-28275  
Thermal conductivity coefficient and integral hemispherical degree of blackness of niobium at temperatures above 1000 degrees C 15 p2523 A66-29217  
Cosmic black body radiation at 2.6 mm wavelength from 2.7 to 3.4 degrees K, noting CN molecules 16 p2793 A66-30199  
Pyrheliometers, noting performance, application, environmental effects and calibration based on black body radiation 16 p2703 A66-30509  
Inverse Compton X-ray and gamma ray flux due to high energy electron interaction with cosmic blackbody radiation at 3.5 degrees K 17 p2992 A66-31914  
Black body radiation, pressure and temperature dependences of equilibrium composition, enthalpy, specific heat and electron density of air-carbon plasmas 18 p3144 A66-34040  
IR emitting flares, examining major parameters governing methods of analysis and performance 18 p3135 A66-34192  
High temperature light source with substantially continuous spectral emission for UV absorption spectroscopy approximating black body in visible and near UV region 19 p3353 A66-35314  
Reduced blackness coefficients measured for coaxial system of tungsten-molybdenum surfaces by calorimetric method 20 p3674 A66-36984  
IR fluctuations radiated by fluid mechanical turbulence of hot shear layers analyzed, assuming gas mixture is black body [AIAA PAPER 66-107] 22 p3899 A66-40351  
**BLACK BRANT II MISSILE**  
Development of 23KS20000 motor for Black Brant IIB vehicle with emphasis on internal ballistics 06 p0942 A66-16702

**BLACK BRANT MISSILE**  
Canadian Black Brant research rocket program for upper atmospheric sounding 13 p2184 A66-25700  
**BLACK KNIGHT ROCKET**  
Environment influence on design and development of Black Knight rocket engine 18 p3163 A66-34211  
Environment influence on design and development of Black Knight rocket engine 24 p4261 A66-42573  
**BLACKOUT**  
**S SYNCOPE**  
**BLADE**  
SA COMPRESSOR BLADE  
SA IMPELLER BLADE  
SA PROPELLER BLADE  
SA ROTOR BLADE  
SA STATOR BLADE  
SA TURBINE BLADE  
SA VANE  
Abrasion of circular self-rotating cutters as function of blade path in material being worked 11 p1710 A66-22860  
Calculation method for vibrations of twisted pinned blades under combined bending and torsion 12 p1965 A66-24053  
Nonrectilinear blade rows with zero thickness when produced by conformal transform 20 p3491 A66-36986  
Rapid opening mechanical gate valve consisting of blade assembly, blade catcher and primer holder used in conjunction with hypervelocity free flight range experiments 24 p4162 A66-43219  
**BLASIUS FLOW**  
Eigenvalues and norms arising in flow description represented by perturbations of Blasius solution 03 p0356 A66-12810  
Finite-difference method for computing transient velocity profiles in laminar boundary layer around two-dimensional cylinder, noting Blasius flow oscillations 14 p2274 A66-27434  
Effect of unsteady longitudinal vortices on Blasius profile in traditional boundary layer of flat plate 14 p2279 A66-28461  
Blasius series for heat and mass transfer in two-dimensional boundary layers, discussing velocity and concentration profiles 20 p3678 A66-37122  
**BLAST**  
**SA JET BLAST EFFECT**  
Similar solutions of partial differential flow equations for cylindrical blast uniform flow shock wave and determination of blast wave velocity 14 p2344 A66-27633  
Ambient pressure effect on tolerance of mice to air blast 15 p2430 A66-28655  
Blast environment simulation developing high pressures of relatively long duration, noting helical winding of cord explosive 16 p2681 A66-30501  
Interaction of first and second shocks of blast-bow wave in double-driver shock tube, examining stagnation point pressure prediction methods [AIAA PAPER 66-409] 17 p2840 A66-32748  
Blast waves in inviscid gaseous medium devoid of heat conduction and viscosity but with finite conductivity 20 p3609 A66-37536  
Weak oblique blast impingement on slender hypersonic wedge 21 p3724 A66-38726  
**BLAST LOADING**  
Fracture time for thin spherical shells subjected to internal blast loading 04 p0586 A66-13411  
Clamped circular rigid-plastic plates under blast loading distributed over surface [ASME PAPER 65-APMW-34] 04 p0593 A66-14234  
Drucker stability hypothesis indicates strain rate as dominant fracture criteria for thin spherical shell under blast loading 07 p1141 A66-17211  
Dynamic buckling of circular cylindrical aluminum shells subjected to axial blast loads [AIAA PAPER 66-82] 08 p1308 A66-18996  
Dynamic transient response of cylindrical shell to internal pressure pulse generated by blast wave 12 p1959 A66-23799  
Stress wave propagation in inhomogeneous rod applied to measurement of dynamic overpressure on moving vehicle subjected to sudden intense blast loading 14 p2409 A66-28398  
Energy method for analysis of lowest mode

symmetrical buckling of thin shell shallow spherical caps and cylindrical arches under blast loading 15 p2610 A66-29291  
Clamped circular rigid-plastic plates under blast loading distributed over surface [ASME PAPER 65-APMW-34] 18 p3247 A66-33569  
Equations of motion for inelastic large deformations of circular membranes subjected to blast loading, useful in metal forming 18 p3252 A66-33763  
Clamped circular plates of rigid plastic material under uniformly distributed blast loading, noting parameters of permanent central deflection 20 p3673 A66-38277  
Dynamic buckling of circular cylindrical aluminum shells subjected to axial blast loads [AIAA PAPER 66-82] 21 p3828 A66-38728  
**BLEED-OFF**  
Effect of bleeding air behind compressor for VTOL stabilization on dynamic behavior of jet engine 10 p1591 A66-21405  
**BLIND LANDING**  
**S INSTRUMENT LANDING SYSTEM**  
**BLINDNESS**  
**S FLASH BLINDNESS**  
**S VISION**

**BLOOD PLASMA**

Exercise tolerance, plasma volume, red cell mass, total blood volume and orthostatic tolerance during four weeks of bed rest 03 p0326 A66-13354

Toxicological effect of hydrazine and monomethylhydrazine in blood serum of rats 05 p0626 A66-14642

Free and esterified cholesterol in plasma extracts determined by fluorometric means 13 p2017 A66-25871

Bed rest and water immersion effects on plasma volume and catecholamine response to tilting, noting urinary excretion of norepinephrine and epinephrine 15 p2430 A66-28661

Acceleration stress-induced changes in fat metabolism, level of circulating glucose and corticosterone level in rats 15 p2431 A66-28868

Physiological factors in decompression sickness, noting recompression, plasma replacement, etc 16 p2638 A66-30624

Toxic effects of hydrazine derivatives tested in dogs, producing methemoglobin and pigmentation in blood 17 p2856 A66-32159

**BLOOD PRESSURE**

SA MANOMETER  
SA TONOMETER

Effects of water immersion, recumbency and activity without negative breathing pressures, measuring heart rate and blood pressure with and without tilting 11 p1642 A66-22573

Systolic and diastolic blood pressures continuously measured without direct arterial puncture effected, using digital pressure cuff on one arm and brachial cuff on other 12 p1810 A66-25010

Cardiovascular measurement on anesthetized dogs subjected to vibration, noting recording techniques, instrument sensitivity, etc 16 p2642 A66-30622

[AIAA PAPER 66-442] 16 p2642 A66-30622  
Sympathetic nervous system integrity following water immersion evaluated by measuring plasma-free fatty acid responses to passive tilting 16 p2639 A66-30649  
Blood pressure and heart rate during hypothalamic self-simulation in dogs, discussing experimental methods and results, physiological response, etc 16 p2640 A66-31154

Arterial blood pressure, visual accommodation power, vital capacity and body weight of pilots and tower controllers 18 p3059 A66-34407

Theoretical and experimental analysis of Korotkoff sounds at diastole which are interpreted as dynamic instability induced by application of pressure cuff 19 p3286 A66-36431

Tilt table response and blood volume changes associated with 30 days of bed rest, evaluating time required to recover from cardiovascular deconditioning 22 p3853 A66-39785

**BLOWDOWN WIND TUNNEL**

Pressure and temperature distribution measurements in test chamber of hypersonic blow-down wind tunnel located at University of Tokyo 01 p0053 A66-10632

Pressure regulation in equalization chamber of model blowdown wing tunnel used at various Mach numbers, calculating compressed-air flow through control valve and characteristics of transfer function 12 p1857 A66-24322

Blowdown-type high-speed linear cascade wind tunnel with variable exit pressure, Mach and Reynolds numbers permit boundary layer control 12 p1859 A66-24927

Shock-on-shock test facility converted from combustion driver shock tunnel, noting model surface transient pressure results [AIAA PAPER 66-764] 24 p4192 A66-42571

**BLOWER****SA BELLOWS****SA FAN**

Reduction gears, mechanical systems and automation of modern propellers, rotors and blowers 01 p0014 A66-11061

Aerodynamic characteristics of blower in form of propeller with rim 03 p0314 A66-12536

**BLOWING****SA INJECTION**

Parameter predicting transition from low to medium blowing rate in arc with transpiration cooled anode 08 p1168 A66-19156

Monograph on clearance losses between rotating blade of propeller and annular duct, determining reduction by blade blowing 09 p1327 A66-20454

Blowing system effect on fog dispersion over limited area 20 p3595 A66-38380

Mass transfer into aerodynamic body flow fields, examining model shear flow in Rayleigh problem for blowing current across gas-solid interface 23 p4058 A66-41900

Similarity solutions of boundary layer equations for blowing through porous surface, obtaining skin friction 24 p4194 A66-42541

**BLUE STREAK MISSILE**

Design and manufacture of Blue Streak satellite launcher structure, noting propellant tank 06 p0888 A66-17070

Blue streak structural problems, noting loading from ground handling to flight and strength in relation to upper stages 21 p3818 A66-38641

**BLUFF BODY**

Wake from bluff bodies interaction with initially laminar boundary layer [AIAA PAPER 66-126] 06 p0875 A66-17096

Cavitation effects on periodic wakes behind symmetric wedges, noting Strouhal number variation [ASME PAPER 65-FE-15] 12 p1864 A66-24549

Turbulent jet theory, thermal ignition theory and flameout characteristics of bluff body flame stabilizers 14 p2413 A66-27694

**BLUNT BODY**

Wake pressure of blunt body moving at supersonic speed calculated by analysis of curved half-jet mixing 01 p0007 A66-10630

Vorticity distribution in wake of circular cylinder oscillating in unperturbed flow, using Burger linearization of Navier-Stokes equations 01 p0007 A66-10715

Boundary layer on spherically blunted cones in supersonic air flow at given wall temperature and thermally insulated wall, graphing calculation results 01 p0008 A66-11016

Hypersonic laminar near wake of blunt bodies considered in terms of dual region model [AIAA PAPER 65-52] 03 p0315 A66-12789

Numerical solutions for inviscid nitrogen gas flows over circular cylinder where nonequilibrium prevails through nose region 03 p0317 A66-13211

Drag of body of revolution with blunt base substantially reduced by mounting disk behind body with smaller diameter than body 05 p0606 A66-15059

Heat transfer to blunt bodies with catalytic and noncatalytic surfaces in nonequilibrium dissociated hypersonic flow [AIAA PAPER 66-3] 05 p0609 A66-15850

Hypersonic aerodynamic stability and drag of ablating and nonablating models of blunt-faced reentry shape [AIAA PAPER 66-61] 07 p1141 A66-17898

Oscillating pressure effect on shock wave detachment and shape at blunt body surface 07 p1023 A66-18108

Hypersonic perfect gas flow around slightly blunted plate, discussing analogy between asymptotic shock behavior and explosion theory 07 p0981 A66-18109

Steady flow interactions of supersonic airstream and jet blown from hemispherical and flat body noses 07 p0982 A66-18137

Hypersonic gas flow near blunt body, examining entropy effects 07 p0983 A66-18140

Hypersonic gas flow past axisymmetric slender blunt body by Chernyi approximate method 07 p0983 A66-18142

High resolution equilibrium radiation spectra for shock layer of blunt bodies at reentry velocities and radiative recombination of N and O ions [AIAA PAPER 66-104] 07 p0984 A66-18458

Supersonic airflow past blunt body with various dissociation reactions 08 p1165 A66-19192

Nonequilibrium inviscid flow behind blunt body shock wave analysis, using series truncation and reducing truncation error 08 p1166 A66-19816

Nucleate boiling heat transfer considered as heat transfer into liquid near front of flow past blunt nosed body 09 p1471 A66-20824

Ablation of blunt metallic body near stagnation point solution using integral equations, noting pressure effect 09 p1472 A66-20833

Instability of hypersonic shock layer flow over blunt bodies with surface cavities coupled to dynamic stability of body 10 p1619 A66-21156

Thermal insulation of hypersonic blunt body by central coolant injection formation of insulating layer between body and high temperature freestream 10 p1481 A66-21797

Minimum pressure drag for nonslender hypersonic body calculated, using normalized coordinates 11 p1631 A66-22515

Shape of nonslender body of revolution for minimum total drag in viscous hypersonic flow at Newtonian pressure distribution and constant friction 11 p1631 A66-22516

Transversal contour of minimum pressure drag for body with noncircular cross section 11 p1631 A66-22517

Minimal-drag shape of nonslender body of revolution in diffuse free molecular flow 11 p1632 A66-22527

Shock layer approximation used in inverse hypersonic blunt body problem 12 p1795 A66-23574

Transient loading of rectangular and right circular cylinders by shock waves in air numerically determined by time dependent Eulerian method [AIAA PAPER 65-4] 12 p1860 A66-23581

Modified Newtonian-Prandtl Meyer approximation technique to determine pressure distribution over blunt body 12 p1796 A66-23600

Blast wave theory with and without entropy layer effect, determining asymptotic flow, far downstream of blunted nose, past given body 12 p1861 A66-23808

Supersonic viscous gas flow near blunt body numerically determined by equations similar to Navier-Stokes equations 12 p1796 A66-23900

Supersonic flow around blunt body calculated via integral relations, using simultaneous approximation function in two directions 12 p1797 A66-24208

Radiative heat transfer near stagnation point of blunt body in hypersonic flow, noting effect on convective heat transfer 12 p1978 A66-24241

Boundary value problems in plane and axisymmetric hypersonic flow of viscous ideal gas past blunt body 12 p1797 A66-24343

Supersonic air flow past blunt bodies and equilibrium physicochemical conversion effects 12 p1797 A66-24426

Heat transfer and mass transfer near stagnation point during injection and suction of various gases through blunt body surface 12 p1979 A66-24427

Static and dynamic stability and drag of blunt-nosed flare-stabilized bodies at velocities up to 8.2 km per second [AIAA PAPER 65-44] 12 p1799 A66-24699

Nonequilibrium heat transfer distributions around blunt-nosed aerodynamic bodies, using analytical method, for design analyses of hypervelocity flight vehicles 12 p1799 A66-24715

Aerodynamic heating of vehicles entering Earth atmosphere at hypersonic speed, noting blunt body concept, radiative and convective heating, heat shield weights, etc 13 p1989 A66-25153

Estimates of expected relative magnitudes of convective and radiative heat transfer at stagnation point of blunt body for superorbital speeds and altitudes with continuum flow 13 p1989 A66-25154

Supersonic flow past blunt body by Taylor series expansion from shock wave, Newton-Busemann expansion, truncated series expansion from axis, etc, and comparison with numerical solutions 13 p1989 A66-25155

Asymptotic behavior of two-dimensional inviscid flow at infinite Mach number past power-law body, considering flow over flat plate and blunt body followed by cylindrical afterbody 13 p2060 A66-25156

Viscous hypersonic blunt body problem examined, using Newtonian thin-shock-layer theory, slip effect, Navier-Stokes shock structure, etc 13 p1990 A66-25157

Approximate shape of detached shock wave calculated and results compared with empirical findings obtained by supersonic wind tunnel experiments 13 p1990 A66-25452

Rotational flow properties in ideal inviscid shear layer about arbitrarily shaped blunt-nosed body in hypersonic flow 13 p1993 A66-26727

Pressure distribution and shock standoff distance on spherically blunt cones in supersonic wind tunnel 14 p2220 A66-27968

Blockage corrections for streamline blunt-based bodies of revolution in closed wind tunnel 14 p2271 A66-28186

Approximate iterative calculation of non-Newtonian supersonic gas flow past highly blunt bodies 15 p2423 A66-28959

Conditions at head shock wave in viscous hypersonic flow past blunt body for study of boundary layer separation 15 p2423 A66-28960

Direct numerical method for calculation of supersonic inviscid flow about axisymmetric blunt body at large angle of attack [AIAA PAPER 65-24] 15 p2423 A66-29269

Integral relations method for flow field calculations of blunt body entries for determining convective heat flux to reentry body 15 p2424 A66-29305

Extension to MHD hypersonic stagnation flow theory of Bush, including viscous term and solving boundary value problem from both ends at once 15 p2424 A66-29307

Diatomic gas flow past blunt bodies, noting effect of oscillation and dissociation relaxation on mean 16 p2627 A66-30100

Unsteady interaction between blunt bodies and shock wave, comparing reflected shock

wave velocity decrease for plane spherically blunted cylinders 16 p2685 A66-30788

Hypersonic flow past blunt body near stagnation point examined, noting surface layer, characterized by increased density and decreased entropy of gas 16 p2630 A66-31305

Diffusion flame for stagnation mixing layer created by jet fuel injected into oxidant stream at stagnation region of blunt body 17 p3033 A66-32447

Experimental prediction theoretical prediction comparisons of pressure distributions, force and stability coefficients for spherically blunt cone at various angles of attack 17 p2839 A66-32473

Gap size effect on pressure and aerodynamic heating over flap of blunt delta wing in hypersonic flow [AIAA PAPER 66-408] 17 p2840 A66-32747

Wind tunnel test of dynamic stability characteristics of spherically blunted 10 degree cones [AIAA PAPER 66-465] 17 p2841 A66-32764

Implicit finite difference method applied to plane hypersonic flow over blunt circular cylinder 17 p2842 A66-33170

Integral relations method formulation of inverse blunt body problem and corresponding shock wave under supersonic flow of perfect gas 17 p2842 A66-33333

Inviscid hypersonic flow of perfect gas past symmetric two-dimensional and axisymmetric blunt bodies at angle of attack [AIAA PAPER 66-411] 18 p3045 A66-33636

Nose bluntness and angle of attack effects on hypersonic flow, noting shock wave deflection decrease of minimum possible shock angle, varying specific heat ratio, convective heating, boundary layer transition, etc [AIAA PAPER 66-414] 18 p3046 A66-33639

Optimum entry vehicle design using aerobreaking for manned Earth entry at hyperbolic speeds, examining blunted conic, biconic and tetrahedral configurations [AIAA PAPER 66-489] 18 p3239 A66-33657

Approximation method for compressible laminar heat transfer to blunt axisymmetric bodies in high speed flow 18 p3048 A66-33824

Free shear layer diffusion and vortex formation region behind bluff bodies 18 p3049 A66-34669

Separated shock wave distance from free flying blunt body influence by real gas oscillation excitation 19 p3341 A66-35746

Nonstationary flow past various bodies in wake of plane shock wave, noting cylinders 19 p3276 A66-36461

Newtonian variational problem for pressure on surface of nonshallow body moving at hypersonic velocity 19 p3276 A66-36472

Pressure distribution at low speeds on two-dimensional airfoils with blunt trailing edges at zero incidence, taking into account wake 19 p3278 A66-36751

Base pressure and flow parameters near trailing edges of axisymmetric blunt bodies in supersonic flow 20 p3492 A66-37678

Semiinfinite flow of axisymmetric flow of viscous thermoelectric gas around blunt body with ablation shield, noting magnetic field effect 20 p3611 A66-38108

Hypersonic boundary layer separation and expansion at shoulder of blunt based body 21 p3693 A66-38683

Nose-region flow of blunt body moving in supersonic or hypersonic speeds solved by variety of numerical methods 21 p3693 A66-38700

Applicability of inverse blunt-body computer program /Norair/ to supersonic and transonic flow problems 21 p3694 A66-38731

Density distribution and shock wave profile of rarefied gas slip flows past blunt bodies determined, using multibeam interferometer 21 p3724 A66-38903

Eulerian finite difference method for solving time-dependent equations of motion for compressible fluid flow, noting shock wave diffraction, supersonic blunt body interaction with shock wave, etc 21 p3730 A66-39472

Hypersonic gas flow past blunt body problem solved by integral correlation method, taking into account radiation effects and gas dynamic parameter

distribution in shock wave layer 22 p3897 A66-39902

Detached shock wave determination for calculation of shock layer or wake, discussing theories of conic and explosive wave methods for application to Apollo space capsule 22 p3900 A66-40416

Supersonic flow around blunt body calculated via integral relations, using simultaneous approximation function in two directions 22 p3844 A66-40572

Shock impingement on blunt body in hypersonic flow, noting alteration of flow and local heat transfer rate near impingement point [AIAA PAPER 66-756] 22 p3846 A66-40641

Alfven shocks for flow of highly conducting incompressible fluid over blunt body where magnetic and flow vectors are not aligned 22 p3957 A66-40705

Surface catalyticity and Reynolds number effects on nonequilibrium hypersonic stagnation flow of air or diatomic gas on highly cooled blunt body 22 p3847 A66-40919

Bluntness and boundary layer displacement effects on air breathing engine hypersonic inlet flow fields [AIAA PAPER 65-617] 23 p4007 A66-41109

Supersonic unsteady state three-dimensional flow around blunted bodies with detached shock wave 23 p4009 A66-41718

Similarity laws in hypersonic flow of real gas around thin blunted bodies, particularly bodies with rough lateral surface 23 p4009 A66-41720

Heat transfer to blunt bodies with catalytic and noncatalytic surfaces in nonequilibrium dissociated hypersonic flow [AIAA PAPER 66-3] 23 p4150 A66-41878

Distance of transition to turbulence of wake measured behind spherical and blunted-cone models at hypersonic speeds in ballistic range 23 p4011 A66-41883

Secondary injection induced shock shape and vertex location solved by equivalent blunt body in supersonic flow 23 p4058 A66-41899

Diameter and location of wake neck and trailing wake shock for pointed and blunt slender hypersonic cones 23 p4012 A66-41919

Inviscid flow near stagnation point of blunt body in hypersonic stream, using thin shock layer theory with very small density ratio 23 p4013 A66-42013

Three-dimensional supersonic gas flow past smooth blunt bodies, considering gas dynamic equations for mixed and purely supersonic regions 23 p4013 A66-42016

Radiometer system with photomultiplier tube for measuring absolute radiation from hypervelocity projectile flow fields 24 p4208 A66-42181

Chemical effects on RF attenuation during reentry for blunt-nosed lifting vehicles and sphere-cone ballistic vehicles 24 p4158 A66-42782

Velocity gradient on blunt axisymmetric bodies in stagnation region if pressure distribution is known, using isentropic flow equations 24 p4158 A66-42798

 Smoothing of intersection of surfaces of revolution with quadrics of revolution 02 p0297 A66-11244  
 Similar flows about axisymmetric bodies rotating in fluid at rest 03 p0354 A66-12351  
 Forced convective heat transfer from isothermal and nonisothermal uniformly spinning bodies of revolution obtained by similar flow analysis [ASME PAPER 64-WA/HT-15] 04 p0595 A66-13387  
 Method for steady state heat conduction of bodies of revolution 04 p0596 A66-13439  
 Electromagnetic wave diffraction by moving bodies of revolution subjected to pulsed radiation when spatial dimension of impulse may be less than linear dimension of body 04 p0483 A66-14050  
 Drag of body of revolution with blunt base substantially reduced by mounting disk behind body with smaller diameter than body 05 p0606 A66-15059  
 Longitudinal motion effect on lateral vibrations of prolate body of revolution in ideal fluid 05 p0775 A66-15315  
 Real flow and interference effects of body of revolution and stabilizing surfaces when at small angle of attack [ASME PAPER 65-FE-5] 06 p0801 A66-16212  
 Rate of decrease of coefficients in expansion of potential of body of revolution into series of spherical functions 06 p0909 A66-16425  
 Ellipsoid of revolution of large aspect ratio with axis of revolution perpendicular to uniform flow at infinity analyzed for small Reynolds number 06 p0873 A66-16995  
 Incompressible laminar boundary layer equations for flow due to jet against body of revolution extending to infinity in absence of pressure gradient but with axially symmetrical swirl 07 p0981 A66-18045  
 Three-dimensional problem of isotropic continuous nonaxisymmetrical body of revolution, applying analytic functions of complex variable 08 p1307 A66-18885  
 Unperturbed highly supersonic flow past thin profiles and bodies of revolution with generatrix equations, using law of plane cross sections for solution 09 p1328 A66-20765  
 Turbulent boundary layer in subsonic or supersonic flow past pinched-waist bodies of revolution at various Mach numbers and pressure gradients 10 p1480 A66-21387  
 Book on theory of optimum aerodynamic shapes 11 p1629 A66-22501  
 Variational calculus in one independent variable for optimum aerodynamic shapes and extension to two independent variables 11 p1721 A66-22502  
 Shape determination of bodies of revolution minimizing pressure drag in linearized supersonic flow 11 p1630 A66-22505  
 Nonslender bodies of revolution with minimum pressure drag, noting derivation of minimizing curves for Newtonian flow 11 p1631 A66-22514
- Minimum pressure drag for nonslender hypersonic body calculated, using normalized coordinates 11 p1631 A66-22515  
 Shape of nonslender body of revolution for minimum total drag in viscous hypersonic flow at Newtonian pressure distribution and constant friction coefficient 11 p1631 A66-22516  
 Minimal-drag shape of nonslender body of revolution in diffuse free molecular flow 11 p1632 A66-22527  
 Stress-strain state of shells of revolution of variable thickness and elastic parameters under effect of external loads and secondary strains obtaining strain, equilibrium and elasticity equations 12 p1963 A66-24043  
 Approximate determination of flexural vibrations of shells of revolution with vibrations involving appearance of nodal lines along generatrix and meridional directions 12 p1964 A66-24047  
 First boundary value problem for general case of axisymmetric stressed state of body of revolution, using biharmonic solution of Love and Grodskii 13 p2196 A66-25636  
 Shells produced by rotation of second-order curves about axis of symmetry evaluated for symmetric and antisymmetric loads 13 p2202 A66-26418  
 Stability loss of shells of revolution under effect of axial compression and radial pressure with no restrictions on generatrix curvature, using strain energy method 13 p2206 A66-26454  
 Velocity pattern in turbulent wake behind symmetric body and conservation of temperature and enthalpy in wake in cylindrical polar coordinates when incoming flow is nonuniform 13 p1992 A66-26704  
 Axisymmetric supersonic flow involving shock waves applied to flow near vertex region of pointed bodies of revolution with arbitrary geometry 14 p2218 A66-27354  
 Eigenvalues of truncated cones of revolution with degenerate poles and various rigidities and geometries 14 p2400 A66-27686  
 Blockage corrections for streamline blunt-based bodies of revolution in closed wind tunnel 14 p2271 A66-28186  
 Differential equations describing elastic shells of revolution under physical nonlinearities, noting positive stresses in buckling zone 15 p2611 A66-29422  
 Forced torsional vibrations of pointed bodies of revolution 15 p2510 A66-29437  
 Computer program for axisymmetric nonlinear behavior of stiffened elastic shells of revolution with variable thickness, calculating collapse pressures [AIAA PAPER 66-529] 16 p2814 A66-30527  
 Laminar boundary layer separation in supersonic flow on body with symmetry of revolution 16 p2629 A66-30583  
 Reissner variational formulation of temperature distribution boundary value problem of axisymmetric thermal stresses in isotropic sandwich shells of revolution [AIAA PAPER 66-528] 16 p2814 A66-30611  
 Stagnation region of solid body of revolution in low density hypersonic flow with low Reynolds number 16 p2629 A66-31033  
 Thin body of revolution with annular shield with zero wave resistance in supersonic axial linearized flow 16 p2629 A66-31036  
 Stagnation region for body of revolution in analyzing temperature, velocity and atom hypersonic flow with low Reynolds number, concentration under aerodynamic heating 16 p2686 A66-31037  
 Electromagnetic wave diffraction by moving bodies of revolution subjected to pulsed radiation when spatial dimension of impulse may be less than linear dimension of body 17 p2873 A66-32216  
 Large deflections of symmetrically loaded shallow membrane shells of revolution, considering existence of boundary layer near edges and using asymptotic analysis 17 p3025 A66-32480  
 Periodic solutions of axisymmetric shell theory equations for displacement of shells of revolution and bending of thin walled rods 17 p3026 A66-32593  
 Longitudinal acceleration and angular

velocity of rotation effect on flexural vibration of elongated body of revolution in supersonic flow applied to critical flutter calculation 17 p3027 A66-32603

Stress analysis of junction of thin elastic shells of revolution, considering axisymmetric wind and sinusoidal load distributions 18 p3253 A66-33804

Quantitative examination of Saint Venant principle in context of elastostatic boundary problems, i.e., axisymmetric pure torsion of bodies of revolution 19 p3473 A66-35485

Three-dimensional heat conduction of body of revolution of arbitrary shape for exponential temperature-time relationship 20 p3678 A66-37112

Nonsteady state zero-moment creep in shells of revolution with clamped edges under internal pressure, finding change range in stresses in time 21 p3826 A66-38612

Limiting equilibrium of compression-and tension-bent shallow shell of revolution 22 p3991 A66-40149

Doubly curved axisymmetric shell construction for structural analysis of shells of revolution, using direct stiffness method 22 p3993 A66-40339

Cylindrical shell analysis for short segments of shells of revolution with axisymmetric edge-loading and variable wall thickness, using matrix method 22 p3994 A66-40369

Mach number and body geometry effects on stability characteristics of oscillation in supersonic regime of bodies of revolution 22 p3844 A66-40373

Three-dimensional and axisymmetric problem in elasticity theory with particular reference to photoelasticity 23 p4135 A66-40989

Supersonic flow past pointed bodies of revolution at small angles of attack 24 p4157 A66-42611

Radiated pressure field due to LF vibration of slender body of revolution expressed as distribution of sources and doublets along body axis 24 p4238 A66-43047

**BODY SWAY TEST**

Bed rest and water immersion effects on plasma volume and catecholamine response to tilting, noting urinary excretion of norepinephrine and epinephrine 15 p2430 A66-28661

ECG P wave changes due to body tilt in space of rabbits deprived of afferent impulses from pressure-receptive areas 17 p2859 A66-32230

**BODY TEMPERATURE**

Surface temperature of solid bodies measured by crayons, thermography, hardness, etc, particularly heat transfer tubes, current-carrying bodies, etc 12 p1882 A66-24408

Potential on hot body in plasma as function of surface temperature and plasma characteristics, considering case where photoemission is present 15 p2595 A66-29087

Parabolic equations describing periodic oscillatory processes that occur in certain electrolytic systems, oil gushers and relay regulation of body temperature 24 p4230 A66-42218

**BODY TEMPERATURE /BIOL/**

**SA HYPOTHERMIA**

**SA SKIN TEMPERATURE /BIOL/**

Animal temperature sensing for studying effect of prolonged orbital flight on circadian rhythms of pocket mice 03 p0328 A66-12767

Body heat storage experiments conducted to physiological limit in pressurized suits 06 p0817 A66-16238

Daily physiological rhythm changes associated with light intensity and color, noting body temperature oscillations vs light intensity, heart rate changes, etc 15 p2441 A66-29959

Harness-mounted temperature sensor for prolonged monitoring of human skin temperature 16 p2643 A66-31128

Radio telemetry for acquisition of Circadian rhythm data on ambulatory animal, including deep body temperature, heart rate, locomotor activity and oviposition 22 p3856 A66-39792

Physiological and mechanical effects of radial accelerations on brain temperature of dog and rabbit 23 p4026 A66-41336

**BODY TEMPERATURE REGULATION**

Aircrew body heat loss from cold water immersion and developments in heating systems and insulative clothing 15 p2442 A66-28656

**BODY WEIGHT**

Prolonged centrifugation effects on growth and organ development of weanling and mature rats 05 p0625 A66-15412

Infantile treadmill experience effect on body weight and resistance to exhaustion in rat 07 p0997 A66-17460

**BODY-WING COMBINATION**

Pressure distribution along wing and body of wing-body combination 14 p2221 A66-28185

**BOEING 707 AIRCRAFT**

Automatic landing equipment for 707/720 airplanes used under low visibility conditions noting autopilot, auto-throttle, yaw damper, etc 01 p0103 A66-10663

Boundary layer control high lift system for high speed aircraft, using ejector for momentum augmentation and air bleed from propulsion system 05 p0610 A66-15070

[AIAA PAPER 64-589] Serviceability and accuracy of Sperry C-12 compass system on Boeing 707-320C aircraft from June to October 07 p1065 A66-17673

Serviceability and accuracy of dual Doppler installation on Boeing 707-320C aircraft 07 p1065 A66-17674

AD560 Doppler Radar sensor and computer in Boeing 707-138 aircraft 07 p1076 A66-17794

**BOEING 720 AIRCRAFT**

Flight operating techniques influence upon engine maintenance costs and new engine design, specifically Pratt and Whitney JT3C-12 on Boeing 720 aircraft 03 p0322 A66-13220

[SAE PAPER 650212] Pressurization effect on fuselage drag of Boeing 720 jetliner based on boundary layer measurement 05 p0606 A66-15077

**BOEING 733 AIRCRAFT**

SST flight operations, maintenance and servicing compared to subsonic aircraft [SAE PAPER 660294] 14 p2222 A66-27290

**BOEING 737 AIRCRAFT**

Aerodynamic design of Boeing 737 covering data of analytical studies, wind tunnel and flight tests, aerodynamic parameters and drag, flap system size, efficiency, wing geometry and handling qualities [AIAA PAPER 65-739] 03 p0321 A66-13047

Boeing 737 twin-jet short haul airliner, featuring wing-mounted engines and advanced technology 10 p1481 A66-21074

Boeing 737 twin-jet, discussing wing, fuselage and tail design, aerodynamic wind tunnel tests, stability and control, etc 12 p1801 A66-23785

Boeing 737 short-haul jet transport aircraft design problems, including engine placement, wing design, lift system, body shape, performance, economics, etc 15 p2426 A66-29735

**BOGOLIUBOV THEORY**

First approximations of kinetic theory for homogeneous and unstable plasma obtained from generalized Bogoliubov method 01 p0111 A66-10389

Bogoliubov adiabatic hypothesis in quasi-linear theory of plasma 01 p0115 A66-11088

Low temperature excitation spectrum for ferro- and antiferromagnets with large crystalline field splittings 05 p0741 A66-15867

Spectrum and eigenstates of Bardeen-Cooper-Schrieffer /BCS/ reduced Hamiltonian in theory of superconductivity 08 p1276 A66-19446

Chapman-Enskog method applied to equations obtained when Bogoliubov functional assumption is introduced into BBGKY hierarchy, determining transport coefficients 14 p2276 A66-27640

Prekinetic equations for multicomponent plasma, generalizing Bogoliubov theory 18 p3148 A66-34906

Potential of average force experienced by charge in plasma calculated from Bogoliubov-Born-Green-Kirkwood-Yvon equations of classical statistical mechanics without linearization 19 p3406 A66-35996

Quantum theory of laser model, deriving kinetic equations for radiation and single-particle density matrices, using Bogoliubov expansion procedure 19 p3374 A66-36008

**BOHR THEORY**

Theorem on quotients of complex-valued almost periodic functions of one real variable containing Bohr theorem 06 p0904 A66-17043

**BOILING**

**SA EVAPORATION**

**SA FILM BOILING**

**SA NUCLEATE BOILING**

**SA VAPORIZATION**

Book on boiling heat transfer and two-phase flow 06 p0971 A66-16610

Minimum heat transfer levels and vapor formation in boiling liquid metals 06 p0972 A66-16843

Pool boiling potassium, discussing heat flux behavior, experimental setup and results for burnout heat flux 07 p1152 A66-17593

Nucleation and boiling liquids phenomena, using Clapeyron equation in expressing saturation curve 07 p1154 A66-18029

Boiling heat transfer in liquid metals including boiling instability, superheats, two-phase flow, forced convection, heat flux, etc 08 p1316 A66-18684

Contact area of boiling bubbles observed through electroconductive glass/heating surface/ into tank 08 p1320 A66-19556

Time variation in boiling heat transfer caused by bubble generation 08 p1320 A66-19557

Soviet and foreign papers on physics of boiling including heat transfer, heat release, bubbling processes, kinetics and sonic aspects of boiling and bibliography 09 p1469 A66-20100

Critical heat flux under forced motion of underheated alcoholic aqueous solutions 09 p1470 A66-20148

Reversible thermodynamics laws applied to boiling, assuming uniform temperature and pressure for vapor and liquid phases 12 p1974 A66-23531

Critical heat flow for propagated heat exchange crises during boiling of liquid 14 p2410 A66-26787

Correlations between Lennard-Jones potential parameters and critical and boiling point constants of 28 nonpolar and 17 polar gases 15 p2618 A66-29718

Thermodynamic analysis of Hg-Cd and Hg-Bi alloys, noting enthalpies and entropies of mixing, boiling point and phase diagrams, vapor pressure measurements, etc 17 p3037 A66-33289

Vapor-fin heat rejection system employing boiling-condensing cycle, noting performance characteristics 18 p3055 A66-34381

Soviet and foreign papers on physics of boiling covering heat transfer, heat release, bubbling processes, kinetics and sonic aspects of boiling, including bibliography 21 p3834 A66-38509

**BOILING WATER REACTOR**

Thermal conditions in boiling liquids including container wall damage-flux density relationship, stable and unstable boiling in bubble evaporation region and film vaporization 07 p1154 A66-18066

Delay time for bubble formation associated with heating surface thermal layer formation in water moderated reactors 17 p2956 A66-32271

**BOLOMETER**

Electric resistivity of carbon resistor material determined as temperature function, calculating static response characteristics of carbon bolometer 02 p0228 A66-11445

Thermoelectric cooling of IR detectors, examining thermistor bolometers and photoconductive detectors 08 p1221 A66-18683

Output power of CW laser measured by wire bolometer in form of plane single-layer spiral as sensitive element 09 p1381 A66-20364

Output power of CW laser measured by wire bolometer in form of plane single-layer spiral as sensitive element 19 p3353 A66-35321

Sputtering, slurry and doctor-blade techniques for depositing thin thermistor films of lanthanum-doped barium-strontium-titanate for bolometer application 23 p4109 A66-41127

Bolometer mount efficiency measurement technique by impedance

method 24 p4205 A66-42104  
 Precision microwave power measurement  
 methods noting calorimetry, bolometry and  
 thin film 24 p4184 A66-42649

**BOLT**  
 High strength structural bolts under static  
 loadings of tension and 02 p0301 A66-12241  
 shear  
 Load partition in double-lap butt joints for  
 bearing type connections including  
 expressions for stress-strain relationship and  
 bolt shear deformation 02 p0302 A66-12242  
 Stress distribution in bolted fastenings  
 noting effects of internal and external  
 forces on deformation, energy and screw  
 mechanism and methods of  
 calculation 06 p0964 A66-16480  
 Aluminum screw coupling resistance to  
 stresses as affected by profile, thread depth  
 and composition 15 p2509 A66-29118  
 Stress level for crack initiation and  
 propagation and delayed failures in stainless  
 steel used for bolts 17 p2941 A66-33442

**BOLTZMANN DISTRIBUTION**  
 Axial variation of plasma column density in  
 nonuniform axial magnetic field determined  
 by theory for ambipolar diffusion and  
 Boltzmann transport 06 p0917 A66-16649  
 Self-consistent equilibrium configuration of  
 s-component plasma representing infinitely  
 extended plane layer consisting of periodic  
 sequence of current  
 quasi-filaments 07 p1085 A66-17646  
 Temperature and environment effect on  
 absorption spectra of two-level system,  
 using stochastic model and Green  
 function 09 p1348 A66-20959  
 Boltzmann modulus used to predict stress-  
 strain design parameters of viscoelastic  
 materials, including time as  
 variable 11 p1783 A66-23172  
 Small two-dimensional oscillations in XY  
 plane for isothermal magnetosphere in  
 uniform gravitational field, postulating  
 Boltzmann equilibrium density  
 distribution 12 p1943 A66-24282  
 Existence of dense and dilute distinct  
 phases in one-dimensional classical fluids  
 consisting of finite particles obeying  
 Boltzmann statistics and potential wells of  
 finite range 18 p3099 A66-34203  
 Wall term in Boltzmann H relationship  
 leads to increase in entropy for solutions to  
 Boltzmann equations 19 p3401 A66-35584

**BOLTZMANN EQUATION**  
**SA CHAPMAN-ENSKOG METHOD**  
 Equilibrium thermodynamics from  
 transport theory including interaction  
 studied up to second virial coefficient,  
 determining velocity of first sound and zero  
 sound 01 p0161 A66-10327  
 Kinetic theory of Lorentz plasma in  
 rotating magnetic fields and electromagnetic  
 fields based on Boltzmann  
 equation 01 p0113 A66-10640  
 Cauchy problem for linearized Boltzmann  
 equation in kinetic theory of  
 gases 01 p0107 A66-11011  
 Existence and uniqueness of Cauchy  
 problem for Boltzmann equation describing  
 flow past convex body of rarefied gas of  
 structureless particles 02 p0261 A66-12022  
 Locally Maxwellian solution of Boltzmann  
 kinetic equation 02 p0251 A66-12182  
 Equation for singlet distribution function  
 as quantum-mechanical analog of Boltzmann  
 equation 03 p0391 A66-12340  
 Cylindrical plasma rotational velocity  
 formulas derived by calculating Boltzmann  
 collision integral in stationary momentum  
 equation 04 p0556 A66-14339  
 Boltzmann-Landau equation to calculate  
 transport coefficients of moderately dense  
 quantum gases 04 p0549 A66-14478  
 Adherence of gas to wall, investigating  
 Boltzmann equations for perfect fluid,  
 Prandtl-type flow and state of rest  
 fluid 05 p0661 A66-14535  
 Microinstabilities in collisionless plasma  
 due to Boltzmann  
 equation 05 p0726 A66-15253  
 Structure of solutions of chain of  
 equations for deriving Boltzmann kinetic  
 equation of gases 05 p0663 A66-15344  
 Solution to Liouville equation, obtaining  
 expression for singlet distribution function  
 for system under arbitrary perturbation

from equilibrium, leading to solution of  
 linear Boltzmann  
 equation 06 p0912 A66-16633  
 Hot electron transfer from light mass  
 central valley to surrounding heavy-mass  
 satellite valleys in n-type gallium arsenide,  
 indium phosphide and cadmium telluride  
 analysis based on Boltzmann  
 equation 06 p0929 A66-17035  
 Convergence of Chapman-Enskog expansion  
 for linearized Boltzmann equation, using  
 perturbation theory 07 p1081 A66-17935  
 methods  
 Two-fluid shock wave model involving  
 Boltzmann equation and inelastic collision  
 theory for rarefied gas 08 p1204 A66-18524  
 Anomalies in low temperature properties  
 of noble metal alloys such as thermoelectric  
 power and nonmonotonic behavior of  
 resistivity with  
 temperature 08 p1274 A66-19362  
 Width of strong shock wave front and  
 transition layers estimated, using Boltzmann  
 kinetic equation and  
 H-theorem 08 p1209 A66-19478  
 Kinetic model construction of maximum  
 number of Boltzmann collision integral  
 properties 08 p1259 A66-19577  
 Collisional transition between lower  
 atmosphere and collisionless exosphere  
 analyzed, using integral formulation of  
 Boltzmann equation and collision  
 models 09 p1459 A66-20882  
 Exact solutions of Boltzmann equation with  
 Maxwellian distribution  
 law 10 p1557 A66-21316  
 Neutral disparate mass mixtures, replacing  
 Boltzmann collision integrals by relaxation-  
 type kinetic models with model equation  
 terms ordered according to mass ratio,  
 deriving two-fluid transport  
 equations 10 p1523 A66-21802  
 Perpendicular shock wave structure in  
 plasma, using Boltzmann ionized gas  
 equations 10 p1566 A66-21812  
 Boltzmann equation for Gunn effect in  
 GaAs, discussing scattering processes,  
 unjustifiability of use of drifted Maxwell  
 distribution, etc 10 p1583 A66-22067  
 Cauchy problem for linearized Boltzmann  
 equation, deriving high accuracy equations  
 of motion of rarefied  
 gases 11 p1735 A66-22338  
 Numerical calculations of axially symmetric  
 two-dimensional steady expansions of  
 monatomic gas, using approximate  
 Boltzmann equation with Krook collision  
 term 11 p1690 A66-22908  
 Iterative solution to shock wave structure  
 in highly rarefied flows through kinetic  
 theory and full Boltzmann  
 equation 11 p1690 A66-22910  
 Boltzmann equation behavior, at large  
 Knudsen numbers, for free molecular  
 interactions with infinite collision cross  
 section 11 p1691 A66-22918  
 Discrete ordinate technique for solution of  
 distribution function of linearized Boltzmann  
 equation, with application to Couette  
 flow 11 p1692 A66-22923  
 Internal flow problems in free, nearly free  
 molecular regimes and higher transition  
 flows, using Boltzmann equation and series  
 expansion to solve integral equation for  
 surface collision density 11 p1693 A66-22940  
 Breakdown regime of diffusion-controlled  
 HF resonance gas discharge analyzed  
 kinetically, solving Boltzmann equation for  
 electron distribution  
 function 11 p1740 A66-23081  
 Relaxation of isotropic distribution of test  
 particles in homogeneous background gas,  
 including nonzero temperature  
 effects 11 p1741 A66-23390  
 Boltzmann transport equation solution for  
 electrons in ionized gas with nonuniform  
 electron concentration 12 p1916 A66-23728  
 Gradient  
 Fourier transform of time-dependent  
 density-density correlation function  
 calculated from linearized Boltzmann  
 equation for Maxwell  
 molecules 12 p1917 A66-24584  
 Brillouin scattering by gases as  
 experimental test of kinetic theory away  
 from hydrodynamic  
 regime 12 p1917 A66-24585  
 Transport coefficients of moderately dense

gas calculated by three methods based on  
 correlation function or generalized  
 Boltzmann equation 12 p1979 A66-24586  
 Boltzmann transfer equation for electrons  
 and generation of nonlinear second harmonic  
 of current density in inhomogeneous  
 plasma 12 p1924 A66-24806  
 Milne-Eddington model in heat and mass  
 transfer, showing analogy between radiation  
 and particle transfer and correspondence to  
 simplified Boltzmann  
 equation 13 p2208 A66-25162  
 Landau damping of transverse oscillations  
 in collisionless plasma at ion cyclotron  
 resonance and collisional damping in zero-  
 temperature plasma 13 p2142 A66-25706  
 Binary-collision expansion for viscosity of  
 two-dimensional gas of hard disks, showing  
 dynamical origin of divergence appearing in  
 first correction of Boltzmann  
 equation 13 p2136 A66-26276  
 Rarefied gas mechanics based on  
 Boltzmann equation with prescribed  
 boundary conditions 13 p2071 A66-26726  
 Space and time dependence of particle  
 density and current in semiconductor  
 material 14 p2356 A66-27045  
 Existence and uniqueness of Cauchy  
 problem for Boltzmann equation describing  
 flow past convex body of rarefied gas of  
 structureless particles 14 p2334 A66-27573  
 Finite difference solution of nonlinear  
 boundary value problem of Landau-Vlasov  
 equation for charged particle for Maxwellian  
 distribution function 14 p2344 A66-27625  
 First order in density corrections to  
 transport coefficients of moderately dense  
 gas /viscosity and thermoconductivity/,  
 using Boltzmann equation 14 p2276 A66-27636  
 Integral equations defining transport  
 coefficients of moderately dense gas  
 obtained from Boltzmann equation shown to  
 be identical to first order in density, with  
 results obtained by autocorrelation function  
 method 14 p2276 A66-27639  
 Chapman-Enskog method applied to  
 equations obtained when Bogoliubov  
 functional assumption is introduced into  
 BBGKY hierarchy, determining transport  
 coefficients 14 p2276 A66-27640  
 Boltzmann equation for gas acted upon by  
 relativistic forces in fibered state  
 space 14 p2335 A66-27938  
 Quasi-linear perturbation theory of  
 transverse electromagnetic waves from  
 instabilities in nonthermal magnetoactive  
 plasma, using Boltzmann equation, applied to  
 magnetospheric MHD  
 emissions 14 p2286 A66-27982  
 Solution to dispersion equation of  
 linearized Boltzmann equation in kinetic  
 theory of rarefied gases, noting root  
 behavior and distribution function  
 structure 14 p2278 A66-28285  
 Second law of thermodynamics, discussing  
 Clausius and Boltzmann mathematical  
 expressions of entropy, role of  
 irreversibility and relationship between  
 increase of entropy and increase of  
 disorder 15 p2616 A66-29062  
 Rarefied gas flow described by Boltzmann  
 equation 15 p2477 A66-29175  
 Electromagnetic propagation in weakly  
 ionized plasma, deriving electronic  
 distribution function and dielectric  
 permittivity tensor 15 p2552 A66-29331  
 Boltzmann equation for Pitot tube  
 problem, using distribution function,  
 deriving equations for rarefied gas flow in  
 impact tube under hypersonic and adiabatic  
 conditions 15 p2481 A66-29739  
 Small-signal energy conservation theorem  
 for one-dimensional multiveLOCITY electron  
 beam according to Boltzmann and  
 multistream descriptions 15 p2467 A66-29755  
 Moment equations from collisionless  
 Boltzmann equation solved by  
 transformation into polarized  
 coordinates 15 p2555 A66-29784  
 Structure of solutions of chain of  
 equations for deriving Boltzmann kinetic  
 equation of gases 15 p2482 A66-29972  
 Collisionless Boltzmann and Maxwell  
 equations for plasma instability of plasma  
 without external magnetic field for  
 transverse oscillation propagating  
 perpendicular to streams 16 p2760 A66-30817  
 Iterative solution to Krook-Boltzmann

- kinetic equation noting Navier-Stokes numerical solution, computation and analysis of distribution function within shock wave 16 p2685 A66-30945
- Monte Carlo solutions to two molecular flow problems, heat transfer between parallel walls and shock wave profile-computer programmed in Boltzmann equation analysis 16 p2686 A66-30946
- Mathematical model for analysis of wave propagation in linearized vertically nonuniform partially ionized gas, proceeding from Maxwell and Boltzmann equations 16 p2761 A66-31005
- Trapped electron effect and stationary longitudinal wave propagation in Maxwellian hot plasma based on exact solution of nonlinear collisionless Boltzmann equation compatible with equilibrium electron distribution 16 p2761 A66-31009
- Secondary electron interaction with solid state plasma, noting energy distribution, Boltzmann equation solution, etc 16 p2789 A66-31783
- Nonlinear theoretical derivation of creep equations for three-dimensional processes in polymers, based on Boltzmann-Volterra creep heredity concept using stress-strain summation 17 p2943 A66-32807
- Linearized model of Boltzmann equation to examine problems of kinetic theory of nonuniform gases 17 p2911 A66-32961
- Boltzmann equation, interpreted in terms of certain correlation functions known as product densities, applied to fluctuation theorem and gases and liquids not in equilibrium 18 p3136 A66-34706
- High magnetic field limit of shock wave in steady state model plasma moving along x axis studied transverse to magnetic field 18 p3148 A66-34905
- Potential of average force experienced by charge in plasma calculated from Bogoliubov-Born-Green-Kirkwood-Yvon equations of classical statistical mechanics without linearization 19 p3406 A66-35996
- Microwave transmission through turbulent plasma of Zeta machine, examining transport theory by use of Boltzmann equation 19 p3429 A66-36584
- Nonrelativistic equations of bulk motion of relativistic /cosmic ray/ gas derived by taking moments of collisionless Boltzmann equation 20 p3649 A66-37327
- Electron energy distribution function obtained by Druyvesteyn analysis in low-current positive column neon discharge compared with theoretical distribution function 20 p3608 A66-37463
- Critical parameters in Poisson-Boltzmann equation of steady state thermal explosion theory, noting temperature gradient 20 p3680 A66-38047
- Density of steady state gas flow expanding from viscous to molecular flow regime approximately calculated 21 p3723 A66-38507
- Asymptotic time behavior of longitudinal waves in one-dimensional plasma of relativistic electrons and stationary ions studied, using collisionless Boltzmann equation 21 p3775 A66-39189
- Electron-collision-induced magnetoplasma instability, using Boltzmann equation for wave dispersion 21 p3794 A66-39571
- Boltzmann-Krook equation in Knudsen layers for Rayleigh shear flow and related flow of rarefied gas 21 p3731 A66-39578
- Boltzmann equation for dilute monatomic gases, discussing asymptotic interpretation of Hilbert and Chapman-Enskog theories 23 p4097 A66-42011
- Numerical solution of Boltzmann kinetic equation for weakly ionized plasma in thermoelectronic converter 24 p4239 A66-42871
- Convective processes in magnetoactive plasma flows transverse to homogeneous magnetic fields, based on multifluid equations derived from Boltzmann equation for ionization and recombination reaction 24 p4245 A66-43069
- BOLTZMANN-VLASOV EQUATION**
- Initial value problem for Boltzmann-Vlasov and Poisson equation for one-dimensional plasmas 06 p0915 A66-16161
- Response of spherical plasma probe to alternating potentials determined by Boltzmann-Vlasov equation together with Maxwell equations 11 p1746 A66-23070
- Transverse magnetic field effect on drifting hot plasma resonance peaks, noting oscillation mechanism and application of successive moments of Boltzmann equation 13 p2144 A66-25725
- Instability of three-or four-component beam plasma for various coupling waves, graphically analyzing dispersion equation derived from Boltzmann-Vlasov equations 18 p3146 A66-34472
- Third moment equation derived from Boltzmann-Vlasov equation for wave propagation in plasmas with very strong magnetic field used instead of state equation 20 p3521 A66-38363
- BOLZA PROBLEM**
- Variational and optimal control theory discussing extension of McShane and Pontryagin methods to general problem of Bolza 04 p0505 A66-13988
- Lagrange and Mayer problems of optimal control of cost 11 p1680 A66-23277
- Necessary conditions of calculus of variations applicable to optimization of control processes dependent on discontinuity point time and location 16 p2672 A66-31520
- Deduction procedure for generalized Clebsch necessary condition for singular extremals for which final form of accessory minimum problem is nonsingular Bolza problem 22 p3940 A66-40530
- BOMBARDMENT**
- S AURORAL BOMBARDMENT
- S ELECTRON BOMBARDMENT
- S ION BOMBARDMENT
- S NEUTRON BOMBARDMENT
- BOMBER AIRCRAFT**
- Hypothetical linear programming model for minimizing cost of aerial tanker support of practice bomber mission 06 p0805 A66-16349
- Flexibility in strategic retaliatory weapons offered by bombers and missiles, discussing defense capability offered by SAC 08 p1322 A66-18558
- Weight empty estimation methods evaluated for transports and bombers ranging in weight from 78 to 488 klb 11 p1783 A66-23002
- BONDING**
- SA ADHESION
- SA CERAMIC BONDING
- SA CHEMICAL BOND
- SA DIFFUSION BONDING
- SA JOINT
- SA METAL BONDING
- SA METAL-METAL BONDING
- SA MOLECULAR BONDING
- SA RESIN BONDING
- SA SOLDERING
- SA WELDING
- Photoelastic investigation of stresses in cemented joints, particularly scarf and butt bonding 02 p0298 A66-11582
- Thermocompression bonding applied to integrated circuits of semiconductor and thin film type, noting resistance, ultrasonic and electron beam welding 12 p1846 A66-24916
- Thermoconductivity, mechanical stress, processing characteristics, etc, of various adhesives used in integrated circuits, noting neoprene cement 18 p3077 A66-34051
- Nondestructive testing of adhesive bonded structures using ultrasonic-resonant instrument, noting detection of voids and cohesive strength determination 19 p3362 A66-35329
- Tungsten and tungsten composite fabrication by gas-pressure-bonding process 19 p3368 A66-36123
- Testing of adhesive bonding at high temperatures for use in reentry vehicles, using IR energy on specimen preloaded in shear [ASME PAPER 66-MD-38] 21 p3742 A66-38488
- Adhesives and joining processes in mechanical quality control 21 p3745 A66-39465
- Adhesively bonded joints withstand severe thermal shock and have excellent bonding with high strength structural alloys in cryogenic liquids 22 p3937 A66-39778
- Microbonding difficulties in joining flat pack circuits to printed circuit boards, examining parallel gap welding connections
- with board material and use of dissimilar metals 23 p4043 A66-41189
- Face-bonding technique for attaching semiconductor chips to thin film or similar circuits 23 p4043 A66-41193
- Vacuum coating techniques for thin film layers for bonding, examining adhesion, bonding layer reinforcement and surface oxidation 23 p4043 A66-41194
- BONE**
- SA RIB
- Stress-strain relationships for tension, compression and shear of femoral bone loaded longitudinally and transversely [ASME PAPER 65-WA/HUF-7] 05 p0626 A66-15698
- Effect of varying strain rate on physical properties of bone and muscle tissue, measuring load and time displacement with constant-velocity compression test machine [ASME PAPER 65-WA/HUF-9] 05 p0626 A66-15699
- Bone calcium loss during two weeks of simulated weightlessness, using X-ray wedge technique 11 p1643 A66-22577
- BONE MARROW**
- Hypoxia protection on taking of second graft of homologous bone marrow in previously irradiated and grafted mice 01 p0020 A66-10609
- Chromosome injury in mouse bone marrow due to distant ionizing radiation 12 p1806 A66-24396
- Effect of combined action of accelerations, vibration and radiation of nuclei of bone marrow cells in mice 15 p2437 A66-29478
- BOOLEAN ALGEBRA**
- Necessary conditions for realization of Boolean threshold function by means of real threshold elements 04 p0504 A66-13968
- Book on switching theory covering circuit synthesis and analysis, Boolean algebra, functional theory, relay type network, etc 06 p0861 A66-16197
- Ternary-pentary majority algebra, Boolean-to-majority function conversion, and derivative identities 08 p1188 A66-19672
- Neural, threshold, majority and Boolean logic techniques compared for reliability and efficiency in adaptive machines and data handling systems 11 p1659 A66-22300
- Multithreshold threshold element design, discussing realization based on Boolean functions, network synthesis employing transformation technique and logical design application 13 p2039 A66-25803
- Integrated circuit binary counters using majority logic current mode gate element 14 p2255 A66-27803
- Ternary-pentary majority algebra, Boolean-to-majority function conversion and derivative identities 20 p3522 A66-37264
- Parallel evaluation of Boolean function in search memory via multiwrite 20 p3523 A66-38017
- Boolean algebraic analysis of AND, OR, NAND and NOR functions in electronic integrated circuits 21 p3720 A66-39625
- BOOM**
- SA SONIC BOOM
- Solar environment and aerodynamic drag effect on deflection of structural booms in space [AIAA PAPER 66-502] 16 p2821 A66-31478
- BOOSTER**
- Engine thrust and heat mass in air breathing jet engine for space flight 04 p0572 A66-13441
- Design and comparison of apogee impulse systems developed for booster rocket thrust augmentation 04 p0573 A66-13541
- Engines for supersonic and hypersonic aircraft to be used in next decade, noting suitability for cruise aircraft or boosters 09 p1435 A66-20668
- Instrumentation of bending moments on large space boosters, discussing ground wind restrictions, telemetry system used, data transmission link, etc 19 p3356 A66-35678
- Turbine engines and ramjet for SST and space boosters 22 p3971 A66-40123
- Economics of various orbital boosters from completely expendable to completely recoverable vehicles, noting concept of cost-optimum vehicle 23 p4133 A66-41775
- BOOSTER RECOVERY**
- Saturn S-IVB stage adaptation for complete stage recovery by incorporating modification

kit including all recovery system elements 17 p3016 A66-32372  
 Recoverable space boosters, discussing technological and economic aspects of reuse 19 p3469 A66-36082  
 Rescuing men and equipment in space by manned rescue craft, unmanned craft, personal ejection capsules, etc 20 p3665 A66-38254  
 Saturn S-IVB stage adaptation for complete stage recovery by incorporating modification kit including all recovery system elements 22 p3986 A66-39776  
 Saturn booster recovery by means of drag balloon which converts to hot air balloon for final recovery 22 p3987 A66-40608

# BOOSTER ROCKET

## S ROCKET BOOSTER

## BOOTSTRAP EQUATION

Liquid hydrogen flow system performance during startup transient of nuclear rocket measured in full-scale simulated engine system, approximating in-flight exhaust conditions 12 p1911 A66-23699  
 Elementary particle theory, interactions at accelerator energies, bootstrap mechanism for generating bound states and resonances and Regge pole concept applied to high energy scattering 15 p2545 A66-29548

## BORANE

### SA DECBORANE

### SA DIBORANE

### SA PENTABORANE

Molecular configuration of bis /ortho-dodecacarborane/ determined by three-dimensional X-ray crystallography 06 p0822 A66-16631  
 Fine structure of vibrational-rotational spectrum of difluoroborane and difluoroborane-d 08 p1178 A66-18935  
 Pyrolysis of boranes using mass spectrometer at increasing temperatures, observing tetraborane, diborane, pentaboranes, etc 12 p1812 A66-23632  
 Spectroscopic analysis of isotope shift between tetraborane /10/ and pentaborane /11/ 15 p2446 A66-29236  
 Chemical kinetics of borane and diborane compounds, decomposition rates and molecular dissociation energy 15 p2447 A66-29237

## BORATE

Mass spectra of isotopically labeled tetraboranes obtained under zero ion source contact conditions, observing parent peak and metastable transition 16 p2647 A66-31379

## BORIDE

### SA DIBORIDE

### SA HEXABORIDE

### SA TITANIUM BORIDE

Metallographic identification of borides in Udimet 700 08 p1237 A66-18765  
 Saturation conditions and alloying elements effect on depth, phase composition and properties of borided layer 14 p2316 A66-27831

## BORN APPROXIMATION

Ionization cross section of ground state helium cation by electron impact in Born exchange approximation 04 p0549 A66-14312  
 Radiation unit of length, calculating path-length for passage of high-energy electrons and photons through matter 06 p0912 A66-16575  
 Vibrational excitation cross sections of diatomic molecules calculated, using Born approximation by including polarization interaction between incident electron and molecule 06 p0912 A66-16630  
 Quantitative comparison of systematic approaches to generation of inelastic impact cross section with aid of simple universal excitation cross section function [AIAA PAPER 66-150] 06 p0913 A66-17097  
 Born approximation applied to electromagnetic scattering from finite cone to determine radar cross section 10 p1500 A66-21616  
 Born approximation of cross sections for electron and proton impact ionization of Na and Mg 11 p1737 A66-22496  
 Born-exchange and Ochkur approximations used to calculate electron impact ionization cross sections for He, Li, Be, Na and Mg atoms in ground states 11 p1737 A66-22497  
 Electron impact ionization cross section of H/2s/ and H/2p/ in Born A, Born B, Born-Ochkur and classical

approximations 11 p1738 A66-22498  
 Bethe-Born approximation and partial ionization cross sections of singly and doubly charged helium and neon ions 14 p2336 A66-26830  
 Bethe-Born approximation and partial ionization cross sections of argon, krypton and xenon ions 14 p2336 A66-26831  
 Quantitative comparison of systematic approaches to generation of inelastic impact cross section with aid of simple universal excitation cross section function [AIAA PAPER 65-150] 15 p2545 A66-29268  
 Slow electron excitation cross section for polar molecule rotational and vibrational transitions based on Born approximation and point-dipole interaction 15 p2545 A66-29395  
 Augmented Born approximation based on variational principles applied to electromagnetic scattering from inhomogeneous dielectric spheres of finite extent 18 p3071 A66-34452  
 Second Born and Born-exchange approximations used in calculation of ionization cross sections for Fe XV and Fe XVI 19 p3403 A66-36325  
 Excitation of ground state hydrogen atoms by fast protons, evaluating total Born cross section in limit of infinitely massive protons 19 p3403 A66-36333  
 Born approximation for phase shift of microwaves scattered from underdense cylindrical plasma used to determine plasma electron density 21 p3794 A66-39572  
 Excitation of hydrogen molecule from ground state to B and C electronic states by electron impact, using one-center wave functions of Huzinaga together with Born approximation 23 p4098 A66-41360

## BORN-INFELD THEORY

Relativistic electrodynamics of moving medium, discussing Maxwell-Minkowski equations, Born equations, field vector transformations, etc 12 p1915 A66-24650

## BORON

Boron addition induced nickel heat resistance measured by internal friction as function of elastic oscillations 05 p0699 A66-14690  
 Radiative lifetimes of strongest vacuum UV multiplets of B I, B II, C I, C II, N I and N II measured by phase shift method 07 p1083 A66-18423  
 Anomalous diffusion of boron parallel and perpendicular to dislocation arrays in grain boundary contained in silicon 10 p1574 A66-21356  
 Boron, Volume 2, Preparation, properties and application 10 p1579 A66-21718  
 Semiconductor properties including conductivity, resistivity, band gap, optical absorption, etc, analyzed on very pure and doped beta-rhombohedral boron 10 p1579 A66-21719  
 Electrical and optical experiments performed on single crystals of beta-rhombohedral boron, noting resistivity decrease and differences between thermal and optical band gap 10 p1579 A66-21720  
 Optical and electrical constants of beta-rhombohedral boron 10 p1579 A66-21721  
 Electric and photoconductivity of vacuum sintered and zone refined semiconductor boron 10 p1579 A66-21722  
 Trap dominated conductivity changes and optical absorption phenomena in near IR in crystalline beta-rhombohedral boron 10 p1580 A66-21723  
 Electron paramagnetic resonance, electrical conductivity and impurity diffusion in doped boron 10 p1580 A66-21724  
 Magnetoresistance of crystalline beta-rhombohedral boron and amorphous boron film as function of magnetic field, temperature, specimen purity and crystal orientation 10 p1580 A66-21725  
 Vacuum deposited amorphous boron films, presenting structure, optical measurements and electrical properties 10 p1580 A66-21726  
 Boron filament tensile and flexural strength affected by surface and internal flaws with chemical polishing 10 p1548 A66-21728  
 Boron semiconductor devices acting as contactless switches, based on current vs voltage characteristics of boron 10 p1511 A66-21729  
 High precision photoelectric scan at 8667-

8668 angstrom wavelengths in solar spectrum for identification and abundance of boron 11 p1771 A66-22777  
 Dispersion hardening of titanium carbide by boron doping from critical resolved shear stress measurements 11 p1719 A66-2339  
 Role of discontinuous fibers /whiskers/ in forming composites and how reinforcing parameters and processing vary from those used in continuous fibers systems, noting differences between boron and fiberglass whisker characteristics 13 p2113 A66-2531  
 Single-configuration open-shell calculation for ground state of boron isoelectronic sequence, using doublet-spin-state wave function 16 p2750 A66-3012  
 Boron film characteristics and preparation by direct resistance heating of elements boron filaments 16 p2778 A66-3107  
 Changes in massive amorphous boron filaments by heat treatments under reduced pressures and in presence of inert gases 17 p2943 A66-3285  
 Structural chemistry of boron compounds analyzed by X-rays, examining effects of increasing boron-to-metal ratio of boron-containing crystal structure 18 p3064 A66-3438  
 Boron abundance in Sun from B I line and solar spectra 19 p3458 A66-3549

## BORON ALLOY

Vacuum thermal etching of nickel and etc figure development by boron addition 03 p0383 A66-1312

## BORON CARBIDE

Conditions of preparation and properties of pseudobinary boron carbide-boron silicide hard alloys 08 p1239 A66-1889  
 Apparatus for melting boron carbide inductively on water-cooled hearth, noting application to other refractory materials 13 p2088 A66-2656  
 Hydrocarbon fuel cell anodes containing boron carbide as support for platinum electrocatalyst 14 p2226 A66-2790  
 Boron carbide as potential substitute for platinum as catalyst for fuel cell cathodes 14 p2227 A66-2817

## BORON CHLORIDE

Dichloroborane synthesized in quantitative yields by thermal hydrogenation of boron trichloride 05 p0629 A66-1458

## BORON COMPOUND

Surface ionization of Cs atoms on lanthanum hexaboride cathode with intrinsic thermionic emission of cathode observed from mass-spectrometric measurement of ion current 06 p0912 A66-1688  
 Rotating bomb calorimetric technique determining accurate values of enthalpy of combustion of boron and boron compounds 08 p1178 A66-1906  
 Compressive strength and instability failure mechanism in uniaxial boron fiber metal matrix composite material 08 p1240 A66-1911  
 High temperature, electrically insulating refractory tubes of boron carbonitride for protection of metal thermocouples 17 p2944 A66-331  
 Inorganic thin film surface finish for boron filaments, noting improved adhesion organic resins and high temperature oxidation resistance 23 p4082 A66-4187

## BORON FLUORIDE

Detection of slow neutrons escaping from atmosphere by counters filled with boron fluoride onboard high altitude balloons 05 p0754 A66-1541  
 Neutron intensity increase observed from boron fluoride proportional counter at high altitude associated with auroral zone X-ray event 07 p1121 A66-1791  
 Atmospheric fast cosmic ray neutron flux measurements, using boron fluoride recording neutron counter 15 p2584 A66-2958  
 Atmospheric neutron flux measured by balloons, using polyethylene-moderated boron fluoride counter 18 p3197 A66-3481  
 Electrical conductivities of boron trifluoride in chlorine and bromine trifluorides studied as function of temperature and concentration 19 p3295 A66-3633

## BORON HYDRIDE

Chemistry of decaborane and structure and reactivity of stable derivatives 11 p1649 A66-2291

- Molecular orbital method for boron hydrides from self-consistent field, analyzing dipole moments, ionization potentials, molecular charge distributions, wave functions, etc 17 p2870 A66-32851  
Methylene blue action in reversing decabore-mediated norepinephrine depletion 22 p3853 A66-39788
- BORON NITRIDE**  
Interaction energies of Ne, Ar, Kr, Xe N-2 and CH-4 near semiinfinite hexagonal boron nitride lattice at potential minimum 08 p1178 A66-18936  
Synthesis conditions for materials of B-Al-N system determined by sintering mixtures of BN plus Al and AlN plus B powder in nitrogen atmosphere 11 p1720 A66-23473  
Chemical stability of silver graphite, molybdenum disulfide, zinc oxide, boron nitride, muscovite and phlogopite mica solid lubricants 16 p2715 A66-31675
- BORON OXIDE**  
Vanadium pentoxide-boron oxide-lead oxide system IR absorption spectra and electroconductivity 10 p1582 A66-21917  
Composition and combustion products of boron at 300 to 3200 degrees K and heat of formation of boron oxide 16 p2830 A66-31604
- BOSE-EINSTEIN STATISTICS**  
High pressure high current argon discharge covering statistical variations of nonblack body, photon and IR radiation and measurement with InSb photodiode 05 p0720 A66-14507  
Flux quantization, Josephson tunneling and persistent currents in superconductor studied by model of charged Bose gas at zero K 09 p1417 A66-20034  
Ground state energy of charged Bose gas obtained from pair Hamiltonian and Green functions 11 p1741 A66-23392  
Bose-Einstein distribution function for quantum photons from amplified spontaneous emission 14 p2307 A66-27195  
Near-Bose-Einstein probability distribution of photoelectron counts produced by He-Ne gas laser narrow band Gaussian light source operating slightly below oscillation threshold 16 p2717 A66-30645  
Kinetic equations in hydrodynamic approximation for weakly reacting and excited Bose systems, finding asymptotic expressions for Green function 23 p4055 A66-41412  
Bose-Einstein distribution function for quantum photons from amplified spontaneous emission 24 p4226 A66-43093
- BOSON**  
Magnetic properties of ideal gas of charged bosons and fermions as affected by dimensionality n of containing space 03 p0409 A66-12630  
Hypothesis of two intermediate bosons to explain K-2 meson anomalous decay, exploring relation to gravitational and cosmological theories 05 p0718 A66-15348  
Magnetization using Hartree-Fock approximation in terms of boson distribution for uniformly interacting spins system 07 p1084 A66-18441  
Normal ordering method of solving boson equations leading to closed solutions of Schroedinger and density operator equations in certain cases only 17 p2945 A66-32293  
Charged Bose gas, discussing ground-state energy, excitation spectra and plasmon-particle interactions, using Bohm-Pines and Bogoliubov approximations 18 p3140 A66-34729
- BOSON FIELD**  
Superfluid hydrodynamics and kinetic theory of superfluids, noting relation of macroscopic concepts of Bardeen-Cooper-Schrieffer theory to microscopic characteristics 09 p1415 A66-20006  
One-boson Lee model of solvable field theory with nontrivial charge and mass renormalization as example of Lehmann-Symanzik-Zimmermann formalism 12 p1917 A66-24098
- BOUNDARY**  
**S FLUID BOUNDARY**  
**S FREE BOUNDARY**  
**S GRAIN BOUNDARY**  
**S INTERFACE**  
**S JET BOUNDARY**  
**BOUNDARY LAYER**  
**SA COMPRESSIBLE BOUNDARY LAYER**
- SA DRAG**  
**SA HYPERSONIC BOUNDARY LAYER**  
**SA LAMINAR BOUNDARY LAYER**  
**SA THERMAL BOUNDARY LAYER**  
**SA THREE-DIMENSIONAL BOUNDARY LAYER**  
**SA TURBULENT BOUNDARY LAYER**  
Free convection boundary layers on horizontal flat plate 01 p0161 A66-10434  
Vorticity distribution in wake of circular cylinder oscillating in unperturbed flow, using Burger linearization of Navier-Stokes equations 01 p0007 A66-10715  
Boundary layer effect on thrust of small rocket engines with high expansion ratio nozzles 01 p0130 A66-10791  
Temperature and wind velocity fields of stationary atmospheric boundary layer derived from semiempirical turbulence theory 01 p0062 A66-10859  
Graduate-level text on engineering MHD establishing bridge with plasma physics, using particle /microscopic/ and continuum approaches 01 p0114 A66-10978  
MHD boundary layer development on body set in motion by jerking movement where rate of formation of flow around body is greater than boundary layer 02 p0264 A66-11386  
Similarity of two-dimensional and axisymmetric boundary-layer flows for purely viscous non-Newtonian fluids 02 p0218 A66-11951  
Generalized dimensional analysis applied to wind distribution in planetary boundary layer, using motion 02 p0223 A66-11981  
Asymptotic representation of solutions for boundary layers near weak shock waves in conical flows 02 p0176 A66-12181  
Hydrodynamic flow against rotating disk noting magnetic field effect on torque, boundary layer thickness and velocity profile, applying motion equation 03 p0399 A66-12689  
Mathematical model for predicting heat transfer in vicinity of protuberances 03 p0444 A66-12763  
Falkner-Skan similar solutions for effects of longitudinal surface curvature on incompressible laminar boundary layer flows 03 p0355 A66-12786  
Unsteady boundary layer flow of multicomponent gas mixtures, investigating combustion instability in liquid and hybrid rocket motors [AIAA PAPER 65-41] 03 p0444 A66-12796  
Electrostatic probe performance interpreted by taking into account MGD boundary layer 03 p0399 A66-12800  
Pressure field of supersonic flow around hemi-axisymmetric body resting on flat plate 03 p0316 A66-12804  
Pohlhausen method application to stagnation point flow, noting failure for case of stretch wall caused by exclusion of MHD boundary layer compatibility condition 03 p0356 A66-12807  
Air intake with boundary layer trap, examining flow structure under external supersonic pressure and uniformity parameters [ONERA TP 288] 03 p0316 A66-12898  
Inner-outer expansion technique applied to MGD Rayleigh problem with infinite conductivity 04 p0549 A66-13368  
Effect of incompressible fluid flow boundaries on unsteady aerodynamic properties of thin curved profile undergoing small amplitude oscillations 04 p0454 A66-13574  
Thin ferromagnetic Fe-Ni films, discussing elastic tensile stresses on structure of interdomain boundaries and distribution of magnetization vectors 04 p0563 A66-13876  
Numerical solution of two-dimensional Navier-Stokes equations for confined wake formed by merging of two-plane Poiseuille flow streams 04 p0511 A66-13936  
Laminar flow development of incompressible - Newtonian fluid in hydrodynamic entrance region of flat duct 04 p0511 A66-13939  
Boundary layer relation between viscosity laws of perfect gas and equilibrium dissociating air 04 p0456 A66-14158  
Qualitative and quantitative solution of linearized approximations to boundary layer equations, noting free jet and wall-slot injection into moving stream [ASME PAPER 65-APMW-6] 04 p0512 A66-14212  
Vertical distribution of turbulence and wind velocity characteristics in atmospheric boundary layer, considering temperature stratification in boundary layer 04 p0542 A66-14301  
Diffusion in supersonic duct flow composed of boundary layers, with application to hypersonic inlet with internal compression [AIAA PAPER 64-245] 05 p0606 A66-15071  
Pressurization effect on fuselage drag of Boeing 720 jetliner based on boundary layer measurement 05 p0606 A66-15077  
Shielding of surface from parallel thermal radiation beams by distributed injection of fluid containing absorbing particles into boundary layer flow over surface near stagnation point [ASME PAPER 65-WA/HT-21] 05 p0789 A66-15643  
Temperature dependent thermal conductivity, considering one-dimensional plate problem with linearly varying heat conduction and constant-volumetric specific heat [ASME PAPER 65-WA/HT-29] 05 p0793 A66-15675  
Stagnation point heat transfer for binary air diffusion model including dissociation and ionization 05 p0665 A66-15775  
Dorodnitsyn approximate solution method applied to Crocco forms of first and second order incompressible two-dimensional boundary layer equations 05 p0685 A66-15776  
Boundary layer solutions for Rayleigh problem in MGD with Hall effect, using Karman-Pohlhausen technique 05 p0728 A66-15779  
Streamline curvature effect on mixing within boundary layer, deriving magnitude of concentration and pressure 05 p0665 A66-15798  
Boundary layer between argon plasma and solid wall at atmospheric pressure 05 p0728 A66-15815  
Influence of suction or injection in boundary layer flow past vertical flat porous plate in presence of uniform magnetic field 06 p0969 A66-16181  
Real flow and interference effects of body of revolution and stabilizing surfaces when at small angle of attack [ASME PAPER 65-FE-5] 06 p0801 A66-16212  
Experimental method to produce fully developed flow in relatively short channel length 06 p0871 A66-16221  
Shell linear theory, discussing classical elasticity theory, bending equations, edge effect and asymptotic theory 06 p0962 A66-16350  
MHD stagnation-point flow, discussing incompressible viscous conducting fluid boundary layer behavior 06 p0916 A66-16355  
Flow through straight slot cascade, investigating application to axial compressors for optimum slot parameters 06 p0803 A66-16968  
Similarity solutions of boundary layer equations with algebraic decay for viscous incompressible fluid inside infinite circular cone 06 p0873 A66-16996  
MHD boundary layer equations with explicit solutions for longitudinal field in plane stationary incompressible laminar flow 06 p0920 A66-17007  
Flow field study of shock wave and boundary layer development at leading edge of sharp flat plate in rarefied hypersonic flow [AIAA PAPER 66-31] 06 p0803 A66-17082  
MHD traveling wave converter, determining frictional fluid losses due to boundary flow and calculating performance 07 p0990 A66-17240  
Rotationally symmetric flow of non-Newtonian fluid in presence of infinite rotating disk, solving Navier-stokes equation and determining velocity profiles 07 p1019 A66-17258  
Modified Karman-Pohlhausen pulse integral equation for calculating boundary layers is more accurate when seeking flow separation point 07 p1019 A66-17391  
Pressure gradient influence on velocity profile in boundary layer of plate with

semicircular transverse ribs 07 p0979 A66-17449  
 Pressure dependency in oxidation of platinum above 800 degrees C explained by boundary layer diffusion mechanism 07 p1000 A66-17476  
 Boundary layer flow of rotating sphere by series expansion from pole, discussing eruption at equator 07 p1021 A66-18046  
 Fluid dynamics - Symposium, Zakopane, Poland, September 1963 07 p1021 A66-18101  
 Lagrangian similarity hypothesis to determine structure of turbulence that arises during fluid flow over rough rigid wall 07 p1022 A66-18103  
 Effectiveness of stagnant layer of radiating gas in shielding surface from radiation flux formulated as integral equation, with heat transfer results presented graphically 07 p1155 A66-18346  
 Visible and near UV radiation intensity profiles for ablating Teflon boundary layer in hot subsonic arc-jet flow at one atmosphere [AIAA PAPER 66-56] 07 p0983 A66-18450  
 Surface pressure, heat transfer coefficient, wave structure and shock disturbances of inviscid supersonic flow field along corner of intersecting wedges [AIAA PAPER 66-128] 07 p0984 A66-18462  
 Nonsimilar solution of incompressible boundary layer over flat plate in presence of shear flow, using approximate method 08 p1204 A66-18529  
 Stagnation point velocity and pressure distribution over heat-sink shielded reentry vehicle to test boundary layer heat transfer theories 08 p1161 A66-18811  
 Boundary layer equation transformation, using special curvilinear coordinates 08 p1206 A66-18872  
 Velocity profile of main section of axisymmetric turbulent jet of incompressible fluid flowing into homogeneous companion flow of same fluid 08 p1206 A66-18876  
 Nine-level general circulation model of atmosphere for resolving surface boundary layer fluxes as well as radiative transfer by ozone, carbon dioxide and water vapor 08 p1213 A66-18924  
 Mass transfer and first order boundary layer effects on sharp cone drag [AIAA PAPER 66-33] 08 p1163 A66-18954  
 Photographic spectra of ablating plastics in thermodynamic environments related to species and temperatures in boundary layers [AIAA PAPER 66-132] 08 p1318 A66-19071  
 Schlichting two-dimensional unsteady boundary layer problem results extended to three-dimensional periodic boundary layers 08 p1208 A66-19341  
 Book on two-dimensional laminar boundary layers with and without suction noting velocity profile role, wind tunnel models, transition measurements, etc 08 p1208 A66-19355  
 Unsteady flow of second order fluid near stagnation point on harmonically oscillating flat plate 08 p1212 A66-19814  
 Approximate solutions with error estimate for stationary boundary layer with desired distribution of pressure and mass transfer along wall 08 p1166 A66-19828  
 Stationary nonviscous plane flow of conducting plasma in narrow channel subject to transverse magnetic field and Hall effect, using sectionized electrodes, noting boundary layer near anode 09 p1407 A66-20135  
 Resistance due to viscous shear on circular cylinder in oscillating stream calculated by boundary layer equations formulated in polar coordinates 09 p1367 A66-20262  
 Deformation from stress in thin walled pressure vessels determined by differential equation from boundary layer problem 09 p1467 A66-20488  
 Boundary layer theory applied to solution of problems of combined heat and mass transfer, using approximate single-parameter integral method 09 p1367 A66-20703  
 Nucleate boiling heat transfer considered as heat transfer into liquid near front of flow past blunt nosed body 09 p1471 A66-20824  
 Nonequilibrium transport properties and electron relaxation at cooled surface of

partially ionized argon 10 p1559 A66-21270  
 Local boundary layer approximations of first order for steady laminar convection flow produced by nonuniform axisymmetric heating or cooling of infinite horizontal surface 10 p1620 A66-21276  
 Initial velocity and density conditions for three-dimensional boundary layer equations, noting wakes and jets 10 p1522 A66-21303  
 Boundary layer effect on lift and drag characteristics of hypersonic lifting bodies 10 p1480 A66-21409  
 Qualitative and quantitative solution of linearized approximations to boundary layer equations, noting free jet and wall-slot injection into moving stream [ASME PAPER 65-APMW-6] 10 p1523 A66-21470  
 Ion density profiles in boundary layers associated with supersonic flow of shock heated air over flat plate measured by cylindrical and flush-mounted electrostatic probes [AIAA PAPER 66-159] 10 p1565 A66-21686  
 Rapid expansion of supersonic boundary layer and application to vortical flow of near wake 10 p1480 A66-21772  
 Velocity overshoot within boundary layer in alternating laminar air flow near mouth of square channel 10 p1524 A66-21827  
 Compressibility effect on flow in MHD boundary layer of semiminfinite thermally insulated flat plate 10 p1525 A66-21847  
 Relative effect of restrictive orifices, venturis or nozzles on measurement accuracy of fluid flow rates in pipes 11 p1703 A66-22207  
 Heat transfer and pressure data extended from classical thin boundary layer regime to near-free-molecule flow in study of low density effects in hypersonic wedge flows 11 p1633 A66-22928  
 Flow over sharp and blunt flat plates at zero angle of attack in hypersonic shock tunnel, measuring surface skin friction, heat transfer, static pressure and shock layer pitot pressure 11 p1633 A66-22929  
 First-order boundary proximity effect on Stokes resistance of body, using integral equation approach 11 p1693 A66-23008  
 Kinetic energy generation and dissipation in large-scale atmospheric circulation, using six months aerological data from North American network 11 p1731 A66-23487  
 Variational extremal principles for continuum systems, analyzing various approaches to boundary layer flow 12 p1975 A66-23544  
 Asymptotic theory where limit  $R/\text{Rayleigh number}$  approaches infinity 12 p1976 A66-23550  
 Polynomials used to solve theoretical cascade problems exemplified by two-dimensional incompressible flow through nonstreamlined blades 12 p1796 A66-23786  
 Surface pressure fluctuations produced by boundary layer turbulence developed above rigid plane surface 12 p1862 A66-23820  
 Two-dimensional stagnation point flow of elastic-viscous liquid 12 p1862 A66-23956  
 Liquid film flow stability, considering two-dimensional perturbations, hydrodynamic friction with allowance for finite curvature radius of bounding surface 12 p1864 A66-24435  
 Compressor cascade flow with blades of different thickness ratio for variable Mach and Reynolds numbers, measuring turbulence level influence on loss coefficients, secondary flow parameters, etc 12 p1799 A66-24553  
 Elastico-viscosity, cross-viscosity and suction variation effects on rheological behavior of fluid moving steadily past porous circular cylinder and between two coaxial right circular cylinders 12 p1865 A66-24808  
 Free convection film boiling heat transfer from isothermal vertical plate to subcooled stagnant liquid, using two-phase boundary layer theory 12 p1980 A66-24907  
 Saturated and surface film boiling from horizontal isothermal plate in longitudinal flow field analysis, based on two-phase boundary layer theory, correlating heat transfer and skin friction characteristics 12 p1980 A66-24908  
 Laminar hypersonic flow past sphere based

on constant-density approximation, solving Navier-Stokes equations and comparing with values of shock Reynolds number 12 p1800 A66-24943  
 Viscous hypersonic blunt body problem examined, using Newtonian thin-shock-layer theory, slip effect, Navier-Stokes shock structure, etc 13 p1990 A66-25157  
 Heat exchange between axisymmetric jet flow and plate situated normal to flow 13 p2208 A66-25313  
 Engineering method for calculating distribution of convective heat transfer for continuous boundary layer gas flow past body 13 p2208 A66-25316  
 Quasi-linear approximation method and Poisson equation used in determining static fields and electron redistribution in plasma waveguides 13 p2039 A66-25678  
 Metal-ceramic boundary structures and reactions, considering metal-oxide and metal-glass interfaces, ionic and covalent bonds, oxidation, reduction, solution and precipitation 13 p2108 A66-25767  
 Hot-wire analysis of permanent sound fields during varied flow velocity around flat plate boundary layer, noting resonance effect of sound amplitude 13 p2063 A66-25901  
 Velocity profile within boundary layer region for flow of second-order fluid past symmetrical cylinder determined for nondimensional parameter formed by velocity and material constants 13 p2068 A66-26666  
 Interaction of boundary layer produced by vortex flow of viscous electrically conducting fluid over disk with axial magnetic field and relation to MHD generator and hydromagnetic capacitor 13 p2156 A66-26707  
 Solutions of nonstationary equations of plane laminar MHD boundary layer, using transformation to specialized form of curvilinear coordinates 14 p2338 A66-26773  
 Cylinder rotation in boundary layer of air stream 14 p2273 A66-26785  
 Boundary layer generation for viscous incompressible fluid flow past rigid wall or obstacle to which fluid adheres 14 p2274 A66-26940  
 Heat transfer equation to find temperature distribution in two-dimensional and circular jets 14 p2274 A66-27378  
 Mach number, Reynolds number and boundary layer trip devices effect on base pressure 14 p2219 A66-27443  
 Periodically excited boundary layer disturbances above flat plate in water flow scanned by hot-wire anemometer under various conditions 14 p2275 A66-27477  
 Thin ferromagnetic Fe-Ni films, discussing elastic tensile stresses on structure of interdomain boundaries and distribution of magnetization vectors 14 p2363 A66-27581  
 Vertical distribution of turbulence and wind velocity characteristics in atmospheric boundary layer, considering temperature stratification in boundary layer 14 p2327 A66-28215  
 Ideal gas flow past infinite circular cone at angle of attack, noting finite-differences method for self-similar solution of Prandtl boundary layer equation 14 p2222 A66-28283  
 Laminar fluid flow in channel generated by arbitrary generatrix, allowing for interaction between boundary layer and flow core, calculating boundary layer 14 p2278 A66-28316  
 Heat and mass transfer process in reacting boundary layer of compressible gas in laminar flow along semiinfinite porous plate 14 p2416 A66-28484  
 Oscillatory pressures in idealized annular boundary layer apply to panel flutter of circular cylindrical shell in supersonic flow 15 p2610 A66-29282  
 Quasi-linearization applied in boundary layer calculations, noting simple flow over solid surface 15 p2479 A66-29299  
 PDE of terminal shape of ablating body as function of time derived, noting mass and energy flow, boundary layer thickness, etc 16 p2628 A66-30219  
 Free stream turbulence effects on heat transfer rates evaluated by boundary layer approximation 16 p2824 A66-30302  
 Reduction of thick boundary layers in low density wind tunnel by applying suction to

nozzle, using high-speed  
cryopump 16 p2673 A66-30381

Soviet papers on atmospheric boundary layer, wind profiles, meteorological effects, etc 16 p2741 A66-30769

Numerical analysis of wind velocity profile measurements and theoretical calculation of profile by numerical methods, based on geostrophic friction 16 p2741 A66-30771

Air-temperature and wind profiles in atmospheric boundary layer and dependence upon stability criteria of ground layer 16 p2741 A66-30772

Short-range forecasting of stratified cloudiness, noting linear dependence between variations in dew point and air temperature near Earth surface for aperiodic processes 16 p2742 A66-30791

Airfoil theory in incompressible flow for boundary layer suction or Helmholtz type wake 16 p2629 A66-31039

Flow of turbulent incompressible fluid downstream from step-shaped wall, determining velocity fields in isobaric region, considering existence of boundary layer thickness at separation point 16 p2687 A66-31205

Energy relationships for efficiency of propulsors which induct boundary layer flow on submerged body of revolution [AIAA PAPER 65-234] 16 p2688 A66-31330

Numerical solution of MHD equations for boundary layer conducting gas flow near flat plate when velocity distribution of external flow obeys power law 16 p2764 A66-31366

Two-dimensional MHD jet flow of conducting fluid in coplanar magnetic field and nonstationary flow past body with magnetic field perpendicular to surface 16 p2765 A66-31402

MHD boundary layer flow of incompressible conducting rotational fluids over infinite dielectric disk 16 p2765 A66-31403

Three-dimensional flow separation of plane boundary layer caused by half delta wing on flat plate using Cooke small cross-flow method and Maskell separation criterion [AIAA PAPER 66-428] 16 p2631 A66-31465

Effect of oscillatory relaxation of air boundary layer on flow characteristics around wedge 16 p2632 A66-31629

Boundary layer development at free surface formed from uniform shear flow 16 p2691 A66-31657

Asymptotic behavior of horn-shaped vortex sheet in neighborhood of x-axis 17 p2905 A66-31840

Jet flow effect on electrical discharge in conducting viscous fluid based on magnetic boundary layer theory 17 p2964 A66-31895

Strip film schlieren interferometry to investigate interaction of reflected shock with incident shock boundary layer 17 p2908 A66-32415

Large deflections of symmetrically loaded shallow membrane shells of revolution, considering existence of boundary layer near edges and using asymptotic analysis 17 p3025 A66-32480

Secondary flow for supersonic boundary layers with or without swept edges, noting effect of compressibility and heat transfer on reverse flow 17 p2840 A66-32485

Modified Pohlhausen method applied to velocity profile for MHD boundary layer problems 17 p2968 A66-32490

Displacement thickness for boundary layers with surface mass transfer 17 p2909 A66-32491

Boundary conditions in viscous interaction theory, noting boundary layer growth effect on outer inviscid flow 17 p2909 A66-32492

Temperature and pressure distribution for fluid flow through porous matrix, noting chemical reaction, heat transfer, boundary layer flow, etc [AIAA PAPER 66-423] 17 p2910 A66-32752

Elasticoviscosity and cross viscosity of second-order fluid effects on advancement over infinite flat plate 17 p2912 A66-32981

Turbulent flow near boundary and equations for mass- or heat-transfer coefficient in terms of turbulent diffusion coefficient and thermal diffusivity 17 p3037 A66-33042

Approximate solution of boundary layer

problems by variational techniques, using multiparameter approach 18 p3096 A66-33594

Terminal shock-boundary layer interaction on slender cone-cylinder payloads at supersonic speeds and resulting flow separation [AIAA PAPER 66-471] 18 p3250 A66-33653

Wind tunnel experiments on thin two-dimensional airfoil with sharp leading edge and with jet blowing through mid-chord slot on upper surface in order to control boundary layer and circulation around it 18 p3048 A66-33950

Three-dimensional flow separation about immersed surfaces 18 p3098 A66-34019

Shock wave boundary layer interactions and shear flow regimes in hypersonic inlet flows [AIAA PAPER 66-606] 18 p3049 A66-34447

Boundary layer equations for nonstationary plane flow of viscous incompressible fluid 18 p3100 A66-34545

Boundary layer of steady incompressible plane crossed fields MHD flow at large Reynolds number 18 p3147 A66-34663

Critical parameters and flow characteristics of swept wings with full-chord laminar flow, noting boundary layer disturbance effects 18 p3050 A66-34950

Aerodynamic design criteria for maintaining laminar flow control including instability limit, surface roughness, acoustical environment, etc 18 p3050 A66-34951

Plasma half-space impedance for diffusive electron reflection from plasma vacuum boundary, noting damping decrement of surface electromagnetic wave, electric field Fourier components and absorption capacity 18 p3151 A66-35065

Numerical integration of boundary layer equations for dissociating gas flows, determining heat flow near stagnation point 19 p3341 A66-35739

Error in plane-layer approximation of boundary layer emission associated with gray gas flow past plane 19 p3341 A66-35752

Navier-Stokes equations solutions for incompressible fluid representing boundary layer flows with suction along corners or cylindrical bodies 19 p3341 A66-35855

Stress field on epitaxial dislocation line in weakly alloyed titanium, calculating energy of phase boundary and contribution of latter to plastic deformation 19 p3381 A66-35929

Turbulence coefficient and mean altitude of atmospheric boundary layer determined from diurnal temperature variations and wind profile 19 p3348 A66-35939

Approximation technique for analysis of two-dimensional boundary layer flows with arbitrary external velocity distribution 19 p3341 A66-36321

MHD boundary layer at conducting wall of plane channel treated by numerical method 19 p3410 A66-36459

Self-simulating solutions of nonstationary turbulent mixing in some aerodynamic problems, considering shock interaction with boundary layer 19 p3276 A66-36462

Navier-Stokes equations for plane interface with stagnation point formed by expelling different gas from leading edge of airfoil opposite to main flow 19 p3277 A66-36635

Book on aerodynamics of pure subsonic flow including Earth atmospheric structure, fluid flow laws, boundary layer phenomena, subsonic wind tunnel and Magnus effect 19 p3278 A66-36730

Boundary layer behavior in fully ionized two-temperature plasma 19 p3433 A66-36827

Plane viscous problem of gas motion through weak straight line discontinuity of acceleration, noting formation of boundary layer 19 p3278 A66-36845

Blasius series for heat and mass transfer in two-dimensional boundary layers, discussing velocity and concentration profiles 20 p3678 A66-37122

Electrical control of boundary layer flip-flop fluidistor by disruptive discharges between electrodes producing pneumatic pressure shocks that switch output flow 20 p3501 A66-37648

Horizontal temperature gradient produced by water body effect on distribution of wind velocity and direction in atmospheric

boundary layer 20 p3594 A66-38375

Wind distribution in atmospheric boundary layer under conditions of advection from pilot balloon observations 20 p3594 A66-38376

Elliptic boundary problem with small parameter, constructing boundary layer function 21 p3755 A66-38541

Boundary layers with coupled heat and mass transfer for large enthalpy per unit mass of injected material, based on linearity of perturbation equations 21 p3834 A66-38704

Boundary layer equations of MHD free convection from heated horizontal plate in vertical uniform magnetic field 21 p3776 A66-38707

Boundary layer growth effect on tailored interface operation of shock tunnel 21 p3721 A66-38719

Short-circuit effects by metal walls and influence on plasma boundary stability 21 p3791 A66-39177

Approximate solution of two-dimensional boundary layer problem using Rayleigh-Ritz method, coordinate functions and interpolation 21 p3831 A66-39351

Wind profiles obtained from meteorological tower plotting wind velocity, normalized by value of friction velocity, as function of measurement heights 21 p3759 A66-39356

Stationary nonviscous plane flow of conducting plasma in narrow channel subject to transverse magnetic field and Hall effect, using sectionized electrodes, noting boundary layer near anode 21 p3793 A66-39407

Boundary layer equation solution along vertical hot plate for constant plate temperature, noting use of Blasius technique 21 p3837 A66-39590

Velocity distribution for inlet flow in finite radial diffuser 21 p3731 A66-39591

Book on flow and thermal boundary layers including laminar and turbulent flow velocity profiles, Prandtl equation, heat transfer problems, etc 22 p3897 A66-39702

Viscous drag on flat plate in supersonic flow injected with gas in boundary layer, examining exit cone of rocket nozzle 22 p3970 A66-39875

Shielding of surface from parallel thermal radiation beams by distributed injection of fluid containing absorbing particles into boundary layer flow over surface near stagnation point [ASME PAPER 65-WA/HT-21] 22 p3997 A66-40026

Experimental boundary layer study on hovering rotors using evaporative chemical films, pressure probes and hot wire anemometers 22 p3843 A66-40249

Flow field study of shock wave and boundary layer development at leading edge of sharp flat plate in rarefied hypersonic flow [AIAA PAPER 66-31] 22 p3844 A66-40349

Total boundary layer mass flow with mass transfer at wall 22 p3899 A66-40370

Flow pattern of three-dimensional interaction of oblique shock with boundary layer obtained when shock generated by wedge spanning supersonic wind tunnel interacts with side wall 22 p3901 A66-40491

Book on MHD covering fundamental equations, boundary conditions, incompressible flow, steady flow MHD simple and shock waves, etc 22 p3957 A66-40619

Wind tunnel tests of sonic boom phenomena, noting weak pressure field measurement, construction of extremely small models, boundary layer effects, etc [AIAA PAPER 66-765] 22 p3894 A66-40646

Panel flutter analysis via forced vibration technique noting frequency coalescence, flutter boundary and experimental technique [AIAA PAPER 66-769] 22 p3895 A66-40650

Solution of motion and energy equations in boundary layer of main portion of vortex jet 22 p3902 A66-40817

Two-dimensional problem for layer with mixed boundary conditions, obtaining solutions for Fredholm integral equations and relations for temperature distribution 22 p4001 A66-40930

Time lag effect on dynamic stability determined, using wind tunnel tests with 10 degree cone as test body simulating ablation process by gas injection into boundary layer

- [AIAA PAPER 66-757] 23 p4008 A66-41330  
Monograph on kinetic theory of plasmas, deriving state equation, Maxwell equation for plasma-magnetic field interaction and boundary layer heat transfer expressions 23 p4102 A66-41400  
Initial air-side boundary layer effect on ignition of slot injected gaseous hydrogen by hot supersonic air stream [AIAA PAPER 66-644] 23 p4149 A66-41513  
Asymptotic expansion of electromagnetic field scattered from convex cylinder near grazing incidence, using boundary layer theory 23 p4038 A66-41546  
Liquid drop flow in twisted fan-shaped nonisothermal jet allowing change in viscosity coefficient in flow field, using boundary layer equations 23 p4055 A66-41567  
Time of establishment of steady state mixing in plane and axially symmetrical jets determined, using self-similar motions in unsteady state boundary layer and free turbulence 23 p4010 A66-41734  
Mass transfer and first-order boundary layer effects on sharp cone drag [AIAA PAPER 66-33] 23 p4011 A66-41877  
Turbulent viscous-interaction parameter in connection with boundary layer growth in presence of mass transfer, examining comparison of effects of strong and weak interactions 23 p4058 A66-41902  
Similar solution of laminar mixing of curved half-jet and curvature effect of boundary layer flow along curved surface 23 p4059 A66-42003  
Short-range weather forecasting based on principles of fluid dynamics 23 p4087 A66-42017  
Boundary layer problems in rotating flows, noting similarity solutions and including general momentum-integral solution 23 p4061 A66-42044  
Unification of various small-epsilon theories of real gas flows based on assumption of specific-heat ratio near unity 23 p4151 A66-42050  
Friction and turbulent heat transfer as function of Reynolds number applied to missile rounded-off forebody, delta wings, etc, using boundary layer equations 23 p4151 A66-42056  
Power conversion enhancement of acoustic-electromagnetic wave coupling across plasma-air boundary by suitable thickness and charged particle density 24 p4241 A66-42304  
Incompressible viscous flow around right angle corner, noting effect of geometry on boundary layer and cross flow 24 p4194 A66-42410  
Similarity solutions of boundary layer equations for blowing through porous surface, obtaining skin friction 24 p4194 A66-42541  
Wind and temperature profiles for constant flux atmospheric boundary layer in lapse stratification implying relation between eddy transfer coefficient ratio and stability parameter 24 p4202 A66-42982

Combustion and sublimation in aerothermochemical interaction between dissociated air stream and graphite surface in hypersonic laminar viscous flow [AIAA PAPER 65-42] 03 p0444 A66-12797  
Turbulent velocity fluctuation field in isothermal boundary layer with homogeneous injection and combustion [AIAA PAPER 65-820] 04 p0510 A66-13689  
Thermal oxidation kinetics of silicon, describing diffusion process, oxide layer boundary reactions and space charge effects on initial phase 07 p1106 A66-18401  
Flame properties as function of flame gases 14 p2414 A66-28142  
Diffusion combustion in laminar boundary layer between two plane-parallel co-current streams 14 p2416 A66-28485  
Diffusion combustion in turbulent compressible gas flow 17 p3036 A66-32827  
Feasibility of rocket motor using detonation wave rotating in annular combustion chamber wherein propellant is injected continuously and expelled through annular nozzle 18 p3162 A66-33807  
Hydrogen combustion in air above solid noncatalytic wall heated to 800 degrees C, examining diffusion equation for slow combustion and laminar boundary layer flow over noncatalytic wall 19 p3479 A66-36249
- BOUNDARY LAYER CONTROL**  
SA FLUTTER  
SA POROUS BOUNDARY LAYER CONTROL  
Boundary layer control /BLC/ high lift system used as integral part in design of F-4 Mach 2 plus Navy interceptor [AIAA PAPER 65-714] 01 p0013 A66-10951  
Drag reduction measurements on porous cylindrical bodies with blunt nose and tail sections, using area suction [AIAA PAPER 65-561] 02 p0175 A66-11564  
Flight experiments to assess stalling behavior and handling problems arising in design, maintenance and operation of suction wing for high lift [AIAA PAPER 65-750] 03 p0319 A66-12586  
Boundary layer control for improvement of lift at lower angles of attack by carrier-based supersonic aircraft [AIAA PAPER 65-751] 03 p0321 A66-13055  
Laminar boundary layer control wind tunnel results, using perforated plastic reinforced by glass fiber 04 p0453 A66-13513  
Boundary layer control by blowing, analyzing turbulent boundary layer for flow about flat plate of incompressible fluid with intense cross flows 04 p0509 A66-13573  
Incompressible laminar boundary layer for plate with slot suction at high Reynolds number 04 p0509 A66-13654  
Boundary layer control high lift system for high speed aircraft, using ejector for momentum augmentation and air bleed from propulsion system 05 p0610 A66-15070  
[AIAA PAPER 64-589] 05 p0610 A66-15070  
Drag decrease in glider aircraft noting wing profile, flow laminarization /boundary layer control/, landing flaps, tail, etc 05 p0607 A66-15200  
Fluoric control devices physical mechanisms, including jet-on-jet and turbulence amplifiers, vortex and boundary layer control devices [ASME PAPER 65-WA/AUT-21] 05 p0624 A66-15615  
Direct lift control as landing approach aid by providing more rapid means of changing and controlling flight path than conventional methods [AIAA PAPER 66-14] 08 p1167 A66-18985  
Boundary layer control /BLC/ high lift system used as integral part in design of F-4 Mach 2 plus Navy interceptor [AIAA PAPER 65-714] 12 p1801 A66-24095  
Blowdown-type high-speed linear cascade wind tunnel with variable exit pressure, Mach and Reynolds numbers permit boundary layer control 12 p1859 A66-24927  
Decreasing secondary flows in spatial boundary layer on porous plate by boundary layer control /BLC/ through suction or blowing, using Prandtl partial differential equations 13 p2065 A66-26460  
Acoustical control of atmospheric boundary layer investigated in wind tunnel for flow velocity range from 5 to 40 m/sec 14 p2277 A66-27862  
Flow loss in conical diffusers with boundary layer suction through single slit 16 p2629 A66-30813  
High-lift jet-pump boundary layer control system for STOL short haul S-1600 transport 16 p2633 A66-31282  
Boundary layer control on walls by means of longitudinal vortices created by row of wings in shape of swallow tail 17 p2907 A66-32328  
Boundary layer control using smoke tunnel, discussing sources and scale of tunnel turbulence 17 p2912 A66-32965  
Laminar flow control /LFC/, aircraft performance benefits include increased endurance, loiter time and cruise altitude 18 p3050 A66-34948  
Self-preserving flow in outer part of two-dimensional curved turbulent wall jet for constant ratio of jet thickness to wall radius of curvature 22 p3844 A66-40489  
Boundary layer suction in two-component fluid flow around plate solved by method of partial averaging 23 p4056 A66-41568
- Comparison of lifting characteristics of profile with air ejection onto slotted and unslotted flaps, examining dependence on jet impulse coefficient 23 p4010 A66-41795  
Boundary layer control of conducting fluid by transverse magnetic field and spanwise electric field 23 p4107 A66-41904  
Approximate solution of second-order incompressible boundary layer equations, using mathematical model reformulated for application in vicinity of separation point 23 p4058 A66-41924  
Pliant coatings applied to streamlined bodies to reduce hydrodynamic drag by stabilizing laminar boundary layer against transition to turbulence 23 p4059 A66-41943
- BOUNDARY LAYER NOISE**  
Boundary layer noise and effects of acoustic energy on panel response, panel fatigue and internal sound levels tested with X-15 aircraft 01 p0010 A66-10126  
Spectral energy distribution modified by finite Mach number effects and structural response to boundary layer turbulence and susceptibility to changes in mean flow Mach number 01 p0005 A66-10129  
Response of simple structure to boundary layer noise examined together with response of supported panel to sound field 01 p0055 A66-10132  
Vibration response of steel panels to fluctuating pressures in turbulent boundary layer of wind tunnel compared to random excitation caused by jet noise and siren 01 p0148 A66-10138  
Aeroacoustic excitation of aerospace structures for design purposes, sources being jets of gas turbines and rockets and turbulent boundary layers [SAE PAPER 650823] 01 p0156 A66-10824  
Noise problem associated with rocket boosters, possible minimization by radical change of design 02 p0293 A66-11511  
Magnetoacoustic wave in rarefied plasma, examining nonstationarity of motion, wave front behavior, wave energy absorption and magnetic field profile 06 p0921 A66-17056
- BOUNDARY LAYER SEPARATION**  
SA LAMINAR BOUNDARY LAYER SEPARATION  
Separating force determined for boundary layer of nonsedimentating suspension of various configurations 01 p0060 A66-11092  
Upstream length of turbulent boundary layer separation ahead of compression corner or flare 05 p0666 A66-15801  
Displacement thickness of boundary layer with blowing for arbitrary shaped bodies, noting stagnation flow 05 p0666 A66-15802  
Compressor blade cascade in flow with boundary layer separation, calculating velocity distribution and blade angle 06 p0803 A66-16967  
Asymptotic steady state solution to problem of thermal separation of components across shear layer between cold jet mixture and hot ambient gas 09 p1470 A66-20178  
Theoretical determination of buffeting limits of wings, using boundary layer theory, obtaining Reynolds number effect on location of buffeting limits 10 p1479 A66-21377  
Turbulent boundary layer separation in supersonic flow 12 p1797 A66-24112  
Turbulence and separation in boundary layer and relation to wing design 14 p2217 A66-26925  
Conditions at head shock wave in viscous hypersonic flow past blunt body for study of boundary layer separation 15 p2423 A66-28960  
Laminar boundary layer separation in supersonic flow on body with symmetry of revolution 16 p2629 A66-30583  
Three-dimensional boundary layer separation, assuming zero friction 16 p2630 A66-31286  
Drag on cylinders of various height mounted on flat plate, noting dependence of compression region length on cylinder diameter during analysis of boundary layer separation phenomena 17 p2909 A66-32493  
Laminar separation in supersonic and hypersonic flow analyzed in gun tunnel, noting concept of incipient separation and free interaction principle [AIAA PAPER 66-455] 17 p2910 A66-32761

Shock-induced boundary layer separation on supersonic intake, using hodograph technique for flow structure analysis 17 p2841 A66-32896

Laminar, transitional and turbulent boundary layer flows with adverse pressure gradient on axisymmetric blunted conical flared body at Mach 10 10

[AIAA PAPER 66-493] 18 p3047 A66-33658

Laminar film condensation of vapor flow along flat plate and cylindrical surface 18 p3261 A66-34362

Supersonic diffuser for eliminating separation of boundary layer in isentropic compression 19 p3276 A66-36084

Separation of laminar boundary layer of gas flow from cone as function of angle of attack, Mach number, etc 19 p3277 A66-36478

Localized convection coefficient for hypersonic separation line along delta wing leading edge calculated, using Mangler and Stewartson transformation 20 p3492 A66-37818

Hypersonic boundary layer separation and expansion at shoulder of blunt based body 21 p3693 A66-38683

Prediction characteristics of separated turbulent boundary layers in compression corners used to determine aerodynamic heating distributions and dynamic loading of supersonic vehicles 21 p3724 A66-38730

Boundary layer solutions to two-dimensional stationary viscous incompressible flow past finite object under vanishing skin friction 23 p4060 A66-42009

Separation point of laminar boundary layer before dihedral, determining conservation of momentum and mass 23 p4013 A66-42010

Velocity profile in isobaric zone downstream from step-shaped wall in case of incompressible fluid 24 p4197 A66-43002

**BOUNDARY LAYER STABILITY**

Three-dimensional laminar boundary layer on body of revolution at small incidence at its stability 01 p0055 A66-10203

Nonlinear buckling of rectangular plates emphasizing calculations of thrust magnitude for boundary value problem, Von Karman equations, etc 03 p0435 A66-12612

Electrodynamic jump conditions and momentum-energy laws at arbitrary moving boundary derived three-dimensionally 06 p0917 A66-16435

Linear stability of laminar boundary layers for asymptotic suction profile, obtaining solution of inviscid equation in terms of hypergeometric function 06 p0874 A66-16998

Self-preserving development in turbulent boundary layer in strong adverse pressure gradient described by two-layer model 06 p0874 A66-17001

Ablation effects on static and dynamic stability of reentry vehicle [AIAA PAPER 66-51] 07 p1141 A66-17896

Unsteady oscillations of boundary layer interaction with shock waves in lower transonic region 07 p1022 A66-18106

Russian monograph on MHD of liquid metals, discussing application for transport and technological treatment of metals, molten salts and slags 08 p1266 A66-19566

Increased mass transfer from flat plate caused by wake from cylinders located near boundary layer edge 08 p1211 A66-19682

Small transverse flow effect on spanwise perturbation of two-dimensional boundary layer of flat plate 08 p1166 A66-19820

Stability of laminar boundary layers and wakes at hypersonic speeds, noting existence conditions for subsonic disturbances and effect of hot wake core 13 p2061 A66-25165

Turbulent flow intensity measured in turbulent wake of small fence along flat plate covered with flabby skin, for analysis of drag reduction in aerodynamics 13 p2063 A66-25598

Simultaneous diffusion of momentum and energy in turbulent mixing, noting static and stagnation properties, density and temperature variations, flow pattern, etc 13 p2070 A66-26721

Finite-difference method for computing transient velocity profiles in laminar boundary layer around two-dimensional cylinder, noting Blasius flow oscillations 14 p2274 A66-27434

Effect of unsteady longitudinal vortices on

Blasius profile in traditional boundary layer of flat plate 14 p2279 A66-28461

Stability of idealized laminar boundary flow, determining phase velocity, amplification rate and wave number of all disturbances 16 p2686 A66-30948

Response of two-dimensional laminar boundary layer to fluctuating free stream or surface oscillation 17 p2908 A66-32443

Laminar boundary layer stability of incompressible fluid at elastic surface 19 p3342 A66-36463

Behavior of solution of system of equations for unsteady boundary layer of two-dimensional liquid as time approaches infinity 19 p3343 A66-36826

Flight testing of laminar flow control on full-scale swept wings, examining total pressure probes, wing wake drag and boundary layer stability utilizing pressure transducer [AIAA PAPER 66-734] 22 p3846 A66-40625

Laminar boundary layer in incompressible liquid, noting effect of variation of kinematic viscosity and density on stability 23 p4056 A66-41725

Stability of laminar boundary layers at concave wall with vortex type disturbance introduced by interference baffles 23 p4060 A66-42022

Ablation effects on static and dynamic stability of reentry vehicle [AIAA PAPER 66-51] 24 p4283 A66-42770

Instability of laminar Ekman boundary layer, obtaining critical values of Reynolds numbers, perturbation growth rates and equilibrium finite amplitude solutions 24 p4197 A66-42980

Stability of two-dimensional boundary layer flow in rotating tank with small inflow analyzed, using perturbation theory 24 p4197 A66-42981

**BOUNDARY LAYER TRANSITION**

**SA TURBULENCE**

Surface modifications of recovered small-scale plastic models after high speed flight used to estimate extent of laminar and turbulent flow over surface related to ablation studies 02 p3033 A66-11560

Laminar boundary layer transition on highly cooled 10 degree cone in hypersonic flow, using heat gauges to study turbulent burst propagation 03 p0315 A66-12788

Laminar to turbulent transition along aluminum plate in free convection measured, using hot-wire probes 04 p0596 A66-13515

Intermittency profiles of turbulent boundary layers for various pressure gradients to determine relationship between descriptive quantities and form factor of velocity profile 04 p0508 A66-13516

Helium II film free-convection heat transfer, discussing mathematical analysis for vertical flat plate and horizontal circular cylinder [ASME PAPER 65-WA/HT-10] 05 p0791 A66-15652

Effect of initial flow turbulence on optimum suction of fluid from boundary layer of porous plate 06 p0872 A66-16468

Controlled three-dimensional roughness effect on hypersonic laminar boundary layer transition [AIAA PAPER 66-26] 06 p0804 A66-17092

Wake from bluff bodies interaction with initially laminar boundary layer [AIAA PAPER 66-126] 06 p0875 A66-17096

Laminar and turbulent boundary layer flow in ablating cones in hypervelocity flight [AIAA PAPER 66-27] 07 p1020 A66-17889

Velocity profiles of transitional viscous boundary layer for plane Poiseuille flow 07 p1023 A66-18120

Free flight dynamic stability measurements indicate that boundary layer transition has no perceptible effect [AIAA PAPER 64-427] 08 p1161 A66-18810

Surface oscillations in bounded cold plasma with charged particle fluxes along stationary magnetic field 08 p1262 A66-18982

Hypersonic shock tunnel study, examining effects of roughness, bluntness and angle of attack on boundary layer transition 08 p1166 A66-19813

Transition region and amplification factor of unstable disturbances in laminar boundary layers with distributed

suction 10 p1522 A66-21408

Transition from near free molecular flow at leading edge of flat plate in rarefied hypersonic flow to continuum boundary layer flow downstream 11 p1633 A66-22925

Correlation for boundary layer transition on sharp slender cones with heat transfer, using wind tunnel and free flight data 12 p1799 A66-24708

Convective heat transfer to flat plate and at stagnation point in partially ionized equilibrium air boundary layer, noting heating rates 13 p2210 A66-26720

Simulated fish propulsion analysis of boundary layer transition and vortex chain shedding 13 p2071 A66-26725

Boundary layer transition measurements on swept wings with supersonic leading edges 14 p2219 A66-27439

Longitudinal pressure gradient effect on evolution of finite three-dimensional perturbation in transition boundary layer of upper surface of wing section near critical Reynolds number 15 p2423 A66-28521

Transition delay and skin friction drag reduction by considering boundary layer flow over flexible aerodynamic surface [AIAA PAPER 66-430] 16 p2688 A66-31466

Laminar boundary layer transition in hypersonic shock tunnel of cone, noting effect of high Mach numbers and tip surface roughness, using surface heat transfer gauges [AIAA PAPER 66-494] 17 p2841 A66-32772

Nose bluntness and angle of attack effects on hypersonic flow, noting shock wave deflection decrease of minimum possible shock angle, varying specific heat ratio, convective heating, boundary layer transition, etc [AIAA PAPER 66-414] 18 p3046 A66-33639

Laminar and turbulent boundary layer flow in ablating cones in hypervelocity flight [AIAA PAPER 66-27] 21 p3723 A66-38686

Effect of mass injection into cavity on hypersonic boundary layer transition and on heating downstream 21 p3835 A66-38734

Boundary layer transition on downstream surface of sharply pointed cones when angle of incidence is slight and boundary layer is attached throughout 23 p4007 A66-41172

Two-dimensional roughness element effect on boundary layer transition, noting free stream turbulence level influence on amplification rate of disturbance 23 p4060 A66-42020

Laminar turbulent transition in freestream boundary layer behind axisymmetric and plane nozzle 23 p4061 A66-42036

Transitions between phases and states of crystallographic order in films, noting conditions for preferential nucleation and analogies between two- and three-dimensional phase diagrams 24 p4251 A66-42305

Pressure effects of flexible walls on boundary layer transition in turbulent pipe inlet flow 24 p4195 A66-42859

**BOUNDARY LUBRICATION**

Silicone copolymers lubricants containing both trifluoropropyl and haloophenyl substitution to cover wide temperature range [ASLE PREPRINT 65-LC-5] 02 p0237 A66-12233

Self-excited torsional vibrations of power transmission drives under boundary lubrication, developing rotating shaft/bearing relations 05 p0772 A66-14643

Hydromagnetically squeezed films between two conducting surfaces used as lubricator, discussing load capacity, pressure and time of approach [ASME PAPER 65-LUBS-6] 06 p0884 A66-16202

Silicone copolymer lubricants containing both trifluoropropyl and haloophenyl substitution to cover wide temperature range [ASLE PREPRINT 65-LC-5] 12 p1889 A66-24990

Surface roughness effect on boundary friction for various loads, speeds and lubricants [ASLE PREPRINT 65 AM 6AZ] 13 p2085 A66-25367

Lubrication characteristics of dry unbonded and bonded molybdenum sulfide films for varying speed, load, humidity and

metal substrate  
[ASLE PREPRINT 65AM 5C1] 14 p2302 A66-27773

Idle time effect on static friction studied under boundary lubrication conditions, using compression tester and press-fit test specimens  
[ASLE PAPER 66AM 1C1] 16 p2710 A66-30403

Effect of chemical attachment in boundary lubrication of aluminum thrust washer using 1-cetene and cetane 24 p4217 A66-42700

### BOUNDARY VALUE

Asymptotically accurate estimates of Bubnov-Galerkin method error in eigenvalue problem as applied to boundary value problem 01 p0091 A66-10162

Approximate solution for differential equations, using algorithm applied to boundary value problem involving linear equation 01 p0091 A66-10164

Heat potential theories applied to boundary value problem for heat conduction equation 01 p0160 A66-10167

Mixed boundary value problem for second order hyperbolic equation with discontinuous coefficients having time derivatives 01 p0092 A66-10187

Eigenfunction expansions of convenient fourth order equation constructed examining convergence, method for summing various associated series and solution of boundary value plate problems 01 p0154 A66-10484

Generalization of Wiener-Hopf integral equation in class of mixed boundary value problems 01 p0094 A66-10506

Thermodynamic paradox consisting of boundary value problem with mathematical inconsistency observed in rectangular waveguides loaded with magnetized ferrite 01 p0121 A66-10540

Solution of ferrite boundary value problem in rectangular waveguide and resolution of Lewin paradox 01 p0028 A66-10560

Simplified leading-edge flow boundary value problem of Bhatnager-Gross-Krook equation solved by finite difference method 01 p0058 A66-10633

Four types of axisymmetric distribution of stresses and displacements in infinitely long rod of circular cross section with discontinuous boundary conditions 01 p0155 A66-10713

Perturbation of boundary value problem for second order hyperbolic equation 01 p0095 A66-10927

Straight lines method applied to Dirichlet and Neumann boundary value problem for certain nonself-adjoint two-dimensional second order elliptic equations 01 p0095 A66-11014

Coupling method for determining natural oscillations of ideal incompressible liquid in vessel consisting of two regions 01 p0059 A66-11017

Stress function for linear viscoelastic problems where body shape, boundary condition type or both vary with time 02 p0298 A66-11576

Asymptotic solution of some nonstationary boundary value problems of cylindrical surface 02 p0250 A66-12098

Theory of weight classes for differentiable functions of many variables, with application to boundary value problems for elliptic equations 02 p0250 A66-12099

Mixed boundary value problem in bounded region for Navier-Stokes equations and discontinuity equation 02 p0219 A66-12101

Nonlinear boundary value problem solution as applied to effect of uniformly distributed pressure and concentrated load on spherical dome 02 p0301 A66-12174

Spectral theory applied to elliptical boundary value problem with eigenvalue parameters 02 p0251 A66-12229

Proof of boundary regularity connected with inhomogeneous systems of partial differential equations leading to elliptic boundary value problems 02 p0251 A66-12231

Approximate solution of principal boundary value problem of electrodynamic 02 p0262 A66-12246

Text on aerodynamics of wings and bodies, emphasizing matched asymptotic expansion methods for boundary value problems and numerical techniques for loading predictions via computers 03 p0313 A66-12297

Monograph on boundary problems for linear parabolic systems with complex coefficients 03 p0386 A66-12456

Elastic equilibrium of rectangular prism with given stress-vector components at lateral surfaces and displacements at faces 03 p0435 A66-12635

Finite plane stretching of neo-Hookean strip bonded at ends treated by principle of stationary potential 03 p0435 A66-12669

Time optimization problem involving dynamic programming, boundary value problem, differential equations and optimal control 03 p0349 A66-12687

Spectral functions of generalized second-order differential equations with boundary conditions at singular end 03 p0388 A66-13115

Optimum motion in central force field, discussing orbital transfer for circular orbits when energy source is controllable 04 p0576 A66-13560

Electrohydrostatic boundary equations solving two-and three-dimensional axisymmetric situation and sessile drop problem 04 p0545 A66-13808

Reflection coefficients of plane wave field in grid-earth system, using averaged boundary conditions 04 p0482 A66-13907

Nonlinear eigenvalue problem for equilibrium state of rotating rod solved by perturbation procedures and Leray-Schauder degree theory 04 p0589 A66-13948

Bounds for Dirichlet energy integral in terms of arbitrary vector 04 p0539 A66-13949

Geometrical aspects of optimal processes, discussing existence of limiting surfaces in cost augmented state space, state equations, maximum principle and functional equations for optimal trajectories 04 p0505 A66-13990

Theory of differential equations discussing extremal problems for generalization of optimal control problem 04 p0505 A66-13994

Book on MHD including kinematic aspect, magnetic force effects, boundary conditions, MGD, etc 04 p0556 A66-14384

Solution to boundary value problems associated with artificial satellite, lunar impact trajectory and interplanetary trajectory 04 p0579 A66-14445

Boundaries of stability sector of nonlinear controlled systems with delay, deriving criterion for designing maximum boundaries 05 p0657 A66-15114

Expansion in eigenfunctions of not self-conjugate boundary value problem for differential equation with singularity at zero 05 p0709 A66-15339

Exact solution for Green function of open spherical shell subjected to harmonically oscillating concentrated load and any consistent boundary conditions  
[ASME PAPER 65-WA/APM-24] 05 p0778 A66-15446

Electron temperature distribution in plasma diode, discussing electron transport properties and current-voltage characteristics 05 p0615 A66-15535

Cavitation bubble collapse in venturi, discussing flow characteristics under large pressure gradient  
[ASME PAPER 65-WA/FE-20] 05 p0663 A66-15610

Heat transfer and velocity characteristics of thermal and hydrodynamic laminar flow in ducts of arbitrary cross section, considering boundary conditions at wall  
[ASME PAPER 65-WA/HT-13] 05 p0790 A66-15650

Boundary value problem solution for composite media applied to cooling of composite cylinder by convection at outer surface  
[ASME PAPER 65-WA/HT-52] 05 p0792 A66-15664

Axial thermal gradient stresses in finite length thin cylinders, evaluating distinct boundary conditions  
[ASME PAPER 65-WA/MET-17] 05 p0780 A66-15682

Superimposed vibrations, corresponding to different propagation constants for same frequency parameter, satisfy boundary conditions at flat surfaces of cylinder 05 p0781 A66-15739

Complex variable functions, discussing boundary properties for holomorphic

continuous unit disk with constant absolute value on boundary 06 p0901 A66-16007

Numerical solution to Laplace equation in two dimensions, subject to boundary conditions imposed by conducting surfaces and dielectrics, applied to transmission line problems 06 p0846 A66-16097

Oblique incidence on plane boundary between two general gyrotropic plasma media, evaluating reflection and transmission coefficients 06 p0913 A66-16137

Book on point matching technique for solving boundary value problems of elasticity theory for multiply connected regions 06 p0962 A66-16245

Traveling magnetic wave plasma accelerator, discussing representative MHD equations, force and output power parameters and energy relations  
[AIAA PAPER 66-72] 06 p0942 A66-16257

Axisymmetric dynamic response of ring supported cylinder to time dependent loads discussing boundary conditions and differential equations of motions  
[AIAA PAPER 66-83] 06 p0962 A66-16261

Oscillating disk induced flow, discussing mathematical formulation of flow field produced by finite-amplitude rotational oscillations 06 p0872 A66-16357

Conversion of gravity reduction problem into internal boundary value problem which is solved by finite difference methods 06 p0876 A66-16416

Stress and strain analysis of sandwich plates, formulating and solving problem of bending for transversally isotropic layers and light core 06 p0964 A66-16477

Optical absorption of metal films in region of transformation to dielectric, discussing valence and conduction band separation mechanism 06 p0924 A66-16518

Pseudo-convex functions, discussing existence criteria, properties and application 06 p0864 A66-16623

Motion of solid body with cavity filled with viscous incompressible fluid at small Reynolds number, reducing hydrodynamic problem to solution of stationary linear boundary value problems 06 p0873 A66-16707

One-dimensional unsteady motions of heat conducting gas in which heat conduction has significant role, formulating boundary value problems with self-similar solutions 06 p0917 A66-16709

Heat conductivity problems for two-and three-layer systems solved by splitting boundary conditions and dividing system into single layers 06 p0972 A66-16842

Solution of boundary value problems for partial differential equations 06 p0903 A66-16903

Exact measurement of local temperature determining grain boundary temperature gradient, describing probe 06 p0882 A66-16938

Complete resolution of concentrated loads of limiting contour, determining spectrum of functional linear operator attached to interior region 06 p0967 A66-17061

Cylindrical beam plasma system immersed in finite longitudinal magnetic field deriving dispersion equation for approximate boundary conditions 06 p0921 A66-17161

Traveling wave MHD converter basic equations, accounting for magnetic potential difference in iron via generalized boundary conditions 07 p0991 A66-17242

Rotating non-Newtonian fluid, discussing stabilizing and destabilizing effect of circular magnetic field for cross-viscous parameter variation 07 p1019 A66-17259

Beam on elastic supports, determining fundamental frequency of free oscillation for one weak nonlinear boundary condition 07 p1142 A66-17260

Elastically nonhomogeneous sphere under uniform pressure, determining parameters of plastic deformation 07 p1142 A66-17262

Optimal control for systems whose behavior is described by ordinary and differential equations set with initial and boundary conditions 07 p1013 A66-17426

Transversely isotropic cylindrical shell vibrations solved via Bessel function for flexural, axisymmetric and torsional modes 07 p1143 A66-17499

Unsteady heat conduction in finite homogeneous region of arbitrary geometry

- and initial conditions with inhomogeneous boundary conditions 07 p1150 A66-17578
- Boundary value problem for parabolic equation in closed region 07 p1056 A66-17599
- Asymptotic behavior of solutions of boundary value problem for second-order elliptic equations 07 p1056 A66-17602
- Second order degenerate elliptic and parabolic equations, giving smoothness theorems of solutions 07 p1056 A66-17604
- Cauchy and boundary value problem for second-order nonlinear ordinary differential equations 07 p1056 A66-17607
- Solvability of general mixed boundary value problems for multidimensional hyperbolic integro-differential equation of arbitrary order with analytic coefficients 07 p1056 A66-17608
- Stability of solutions of Cauchy problem for linear hyperbolic differential equations 07 p1056 A66-17609
- Popov-related stability results for feedback systems proved via bounded solutions for functional equations 07 p1015 A66-17756
- Boundary problems concerning linear integro-differential equations with caloric operator and delayed arguments 07 p1057 A66-17842
- Regularization of ordinary differential operator trace in region of regular boundary conditions 07 p1057 A66-17855
- Slow decay of solution of initial boundary value problem for wave equation in unbounded region 07 p1059 A66-17970
- Existence and uniqueness theorems for invariant-imbedding nonlinear ODE systems for absorption loss rate satisfying Lipschitz condition 07 p1059 A66-17972
- Existence of subsonic jets issuing from curved symmetric channels in plane 07 p0981 A66-18030
- Data analysis from Explorer XIV satellite, noting magnetic field measurements in tail of geomagnetic cavity 07 p1029 A66-18086
- Plasma and magnetic field data from Explorer X, emphasizing correlation with multiple crossings of geomagnetic cavity boundary on dark hemisphere of Earth 07 p1029 A66-18087
- Elastic equilibrium of rectangular parallelepiped when boundary conditions on surface are given in terms of displacements 07 p1146 A66-18253
- Steady state radiative transport through homogeneous spherical medium, applying invariance principles of Ambartsumian and Chandrasekhar 07 p1155 A66-18339
- Certain inequalities for solutions of elliptic equations and derivatives near metric region 07 p1060 A66-18466
- One-dimensional heat flow to cool wall, discussing effects of compressibility and variable thermal conductivity 08 p1205 A66-18540
- Equivalence of oscillating electric field on plasma boundary, with specularly reflecting bounding wall, to unbounded plasma with planar oscillating grid at wall position 08 p1261 A66-18546
- Mixed boundary value problem for velocity potential of unsteady perturbation flow past oscillating thin profile in inviscid compressible gas at subsonic speeds 08 p1205 A66-18674
- Boundary value problems of plane theory of ideally plastic bodies, with analytical solutions 08 p1306 A66-18703
- Reflection of radio waves incident on boundary surfaces, noting application to Kraus effect theory 08 p1182 A66-18753
- Temperature fluctuations of elastic isotropic cylinder, obtaining temperature equilibrium equations and reducing three-dimensional problems of thermoconductivity and thermoelasticity to boundary value problems 08 p1307 A66-18886
- Errors in approximation equations for dynamic bending of cylindrical rod 08 p1308 A66-18889
- Small perturbations of parabolic boundary value problem 08 p1245 A66-19114
- Edge conditions effect on elastic stability of cylindrical shells extended to additional combinations of boundary conditions, considering cylinders under axial compression 08 p1310 A66-19144
- Scintillation observations of satellite signals noting latitude, diurnal, seasonal and sunspot cycle variations 08 p1183 A66-19208
- Optimal feedback control and bounding hypersurface of allowable perturbations in linear plant regulator, noting multiplier equation 08 p1200 A66-19543
- Approximate methods for integration of equations of plane isentropic motion of gas at supersonic velocities 08 p1165 A66-19572
- Boundary problems for differential and integro-differential equations 08 p1245 A66-19631
- Diffusion controlled mechanism for operation of nickel hydroxide electrode, analyzing corresponding boundary value problem and predicting electrochemical behavior 08 p1171 A66-19647
- Dynamic problems of transversely isotropic half-space and elastic layer, solving contact and boundary value problems 08 p1315 A66-19708
- Optimum processes in systems with distributed parameters described by partial differential equations 08 p1202 A66-19710
- Wave propagation equations in inhomogeneous warm plasma, emphasizing separation into quasi-electromagnetic and dynamic components 08 p1266 A66-19736
- Spherical shell bending examined, using quasi-linear stress-strain relationship 09 p1465 A66-19857
- Modified Cochran method giving valid expansions for singular perturbation problems in heat transfer 09 p1469 A66-20084
- Free boundary problem for heat equation with heat input at melting interface 09 p1470 A66-20264
- Green function-eigenvalue relationship on closed smooth boundary of open dimensional region 09 p1394 A66-20265
- Monograph on potential methods in theory of elasticity, basing boundary value solution on theory of singular integral equations 09 p1466 A66-20332
- Fredholm integral equation system for magnetic currents induced on wedge under impedance boundary condition 09 p1344 A66-20441
- Computer program for numerical solution of uniform hollow waveguides with boundaries of arbitrary shape 09 p1346 A66-20607
- Bounds for two-dimensional discrete harmonic Green function used in boundary problems 09 p1395 A66-20621
- Tensor product analysis of alternating direction implicit iteration techniques for approximate solution of elliptic partial differential equations 09 p1396 A66-20637
- Approximate solution for elasticity problems, noting mathematical determination of stress distribution in any homogeneous isotropic body 09 p1468 A66-20642
- Second-order linear equations with nonnegative characteristic form in analysis of first boundary value problem 09 p1397 A66-20734
- Approximate solution of nonlinear heat conduction problems for boundary conditions of first and third kind, using Leibenson integral relations 09 p1471 A66-20750
- Boundary condition constraint method for generalizing R-matrix theory, permitting use of shell model as basis for nuclear-reaction calculations 09 p1405 A66-20822
- Differential equations describing boundary conditions at front of change of aggregation state, computing temperature field 09 p1471 A66-20825
- Optical absorption of metal films in region of transformation to dielectric, discussing valence and conduction band separation mechanism 09 p1431 A66-20899
- Numerical solution of laminar boundary layer momentum, energy and diffusion differential equations for heat and mass transfer on moving continuous flat surface with injection or suction 10 p1619 A66-21053
- Stability and dissipation in second and third-order fluid approximations of boundary value problems for unsteady simple shear flow [AICE PREPRINT 21F] 10 p1521 A66-21188
- Integration of Laplace transformed elastokinetic equations, examining stress function, displacement vector field and boundary and initial value problems 10 p1555 A66-21226
- Boundary value problem for wave propagation on cylindrical anisotropic dielectric rod solved for hybrid modes 10 p1496 A66-21307
- Perturbation technique solution for MHD flow in closed regions with symmetric flow properties and axial boundary conditions 10 p1563 A66-21543
- Impurity atom diffusion through narrow diffusion mask opening determined by relaxation method 10 p1512 A66-21762
- Book on problems of mathematical physics noting integral transforms, curvilinear coordinates, integral equations and other solution techniques 10 p1556 A66-21766
- Solar plasma flow around geomagnetic cavity studied by numerical blunt body analog, proposing MGD boundary pressure as condition for self-consistent solution [AIAA PAPER 65-121] 10 p1533 A66-21775
- Boundary condition effects in magnetic mirror compression experiment, noting dependence of transition from unstable to quasi-stable plasma containment on density and lifetime 10 p1568 A66-21824
- Boundary value solutions applied to class of rotating disk flows, including examining convergence of successive approximation scheme 10 p1525 A66-21849
- Theorems and corollaries describing bounds for quadratic Liapunov functions 10 p1551 A66-21918
- Boundedness and uniform boundedness of nonhomogeneous systems, obtaining necessary and sufficient conditions for existence of solutions 10 p1551 A66-21920
- Electromagnetic wave diffraction around finite perfectly conducting cone 10 p1506 A66-21924
- Time reversal heat conduction problems in thermodynamical system with known boundary conditions solved for various structures 10 p1623 A66-22060
- Stressed state in medium length cylindrical shell with arbitrary closed transverse contour and method of solving it 10 p1618 A66-22178
- Numerical solution of heat conduction and gas dynamics equations by sifting over separate regions 11 p1785 A66-22339
- Current distribution and input impedance of infinite cylindrical antenna in anisotropic plasma, treating it as boundary value problem 11 p1661 A66-22396
- Elastic strip and elastic annulus differential-difference equations, using Fourier transforms and analytic continuation 11 p1780 A66-22439
- Boundary value problem for stress concentration at spherical cavity in field of isotropic tension for deformable microstructure 11 p1781 A66-22615
- Nonlinear circuit theory, discussing invariant imbedding, dynamic programming and quasi-linearization 11 p1675 A66-22629
- Algorithm for computer eigenfunction solution of boundary value problem involving partial differential equations for stress functions of semimomentless cylindrical shells 11 p1782 A66-22856
- Alternating direction schemes for heat equation in general cross sections with M space dimensions and nonlinear equations 11 p1722 A66-22982
- Torsional oscillations of fluid sphere with rigid boundary in uniform magnetic field 11 p1745 A66-23007
- Numerical analysis of thin cylindrical shell under action of external forces for small deformations, using first-order theory 11 p1783 A66-23016
- Nonlinear boundary value problem for elliptic PDE continuous over composite region 11 p1723 A66-23030
- Optimal control program satisfying all boundary conditions, noting application to thrust vector control 11 p1733 A66-23336
- Dynamic programming method for approximate solution of gliding flight and minimum time to climb problems in boundary value theory 11 p1778 A66-23349
- Uniqueness theorems for second-order linear elliptic and parabolic equations with discontinuous boundary values 11 p1724 A66-23362
- Mechanical flow processes and variational methods based on fluctuation theory, noting relations on minimum entropy production,

two-dimensional laminar flow of incompressible fluid, etc 12 p1975 A66-23543  
Eigenfunction expansions and scattering theory for free-space wave equation in exterior region 12 p1912 A66-23563  
Schauder-type solution estimates to first boundary value problem for parabolic equations of order 2p 12 p1901 A66-23663  
Boundary value problem solutions in meteorology 12 p1905 A66-23664  
Estimates of solutions to second order differential equations generalized to include inequalities with Schwarz derivative numbers 12 p1902 A66-23768  
Subinterval optimization technique for final value control system with magnitude constraint on control variable 12 p1848 A66-23852  
Quasi-linear boundary value problems solved with Galerkin convergence method 12 p1902 A66-23863  
Eigenfunctions for laminar flow in porous two-dimensional channel subject to certain boundary conditions 12 p1862 A66-23994  
Boundary value problem of acoustic point source antenna within compressible plasma region with assumed rigid boundary, noting acoustic power conversion into electromagnetic waves 12 p1920 A66-24116  
Axisymmetric problems of heat conductivity theory for layer with one constant boundary and one circular boundary solved by paired integral equations method 12 p1978 A66-24207  
Majorants of solutions of first boundary problem for second order linear elliptic equations 12 p1904 A66-24238  
Boundary value problem solution constructed as expansion of particular solutions of Chaplygin equation in region bounded by parabolic line and two characteristics 12 p1904 A66-24240  
Boundary value problems in plane and axisymmetric hypersonic flow of viscous ideal gas past blunt body 12 p1797 A66-24343  
Heat conduction problem simulation, using moving interfaces, solving Stefan and Verigin problems 12 p1978 A66-24371  
Plane stationary problem of heat conduction for mixed boundary conditions solved, using Fredholm integral equation with symmetrical kernel 12 p1979 A66-24372  
Maximized elliptic equations, Dirichlet problem, distance function solution, maximum principle, removable singularity, etc 12 p1905 A66-24401  
Charge sheath role at discharge wall in determining boundary conditions for LF wave in low pressure discharge, using hydrodynamical model 12 p1923 A66-24571  
Ion acoustic waves propagating along cylindrical plasma column analyzed, deriving boundary condition at plasma surface 12 p1923 A66-24572  
Uniqueness theorem of axisymmetric exterior traction boundary value problem in linear elastostatics theory 12 p1971 A66-24818  
Orr-Sommerfeld equation regarding stability of parallel flows solved for large Reynolds number, using inner and outer expansion theory 12 p1866 A66-24944  
Two-dimensional Stokes flows for functions time-periodic with common frequency, noting analogy to oscillations of long cylinder in viscous fluid 12 p1867 A66-24963  
Theorems associated with surface parabolic potentials 13 p2116 A66-25334  
Mathematical programming methods for solving nonlinear state-constrained discrete optimal control problems 13 p2047 A66-25352  
Reducing optimal control variational problems to limit problem associated with Hamilton-Jacobi equation 13 p2047 A66-25423  
Cold forming of metals, noting thin tube flow boundary variation with permanent deformation due to torsion and tension 13 p2195 A66-25455  
Maximum friction along jet path in mixing zone at constant pressure applied in finding irrotational wall velocity 13 p2063 A66-25468  
First boundary value problem for general case of axisymmetric stressed state of body of revolution, using biharmonic solution of Love and Grodskii 13 p2196 A66-25636  
Plasma stability with plane boundary, noting effect of perturbed electric field, particle trajectory and equilibrium distribution 13 p2144 A66-25726

Weak, strict and strict-weak Levi conditions defined in complex variables, noting conditions for holomorphy and coincidence of functions 13 p2118 A66-25787  
Stress state of weakly curved cylindrical shell analyzed, finding biharmonic function from given boundary value of partial derivatives 13 p2197 A66-25853  
Equation for elliptical system in plane singly connected region, satisfying specified boundary condition 13 p2119 A66-25903  
Boundary value problem for quasi-linear elliptic equations degenerating parabolically on boundary of region D lying in upper half-plane 13 p2119 A66-25904  
Existence and uniqueness of solution for first boundary value problem of system of specified mixed-type differential equations 13 p2119 A66-25905  
Deriving nearly periodic solutions for Sobolev equation with near periods dependent on spatial variables, constructing solutions for boundary value problem of Hopf equations 13 p2119 A66-25906  
Schauder-type boundary estimates for solution of directional-derivative problem of parabolic equation in noncylindrical region 13 p2120 A66-25909  
Dirichlet problem for elliptical system, showing solvability of inhomogeneous system with uniform boundary values for half-plane and circle cases 13 p2120 A66-26008  
Second-order elliptical operator for m-dimensional Euclidean space with open region bounded by closed surface 13 p2120 A66-26010  
Approximate analytical solutions for distributed parameter networks with parameters as functions of spatial variable, using differential equation that reduces boundary value problem to Sturm-Liouville system 13 p2120 A66-26068  
Analog computer solution of simplified turbulent viscous layer boundary value problem 13 p2064 A66-26370  
Stressed state of spherical shallow shells determined by satisfying boundary conditions and using infinite sets of algebraic equations 13 p2202 A66-26412  
Static boundary value problem for shallow shells with multiply connected sections 13 p2202 A66-26414  
Boundary conditions in bending theory of reinforced shells, noting decreased stress concentration obtained by reinforcement ring 13 p2204 A66-26431  
Airy stress function applied in solving problems for doubly connected regions with contiguous circular boundaries 13 p2204 A66-26432  
Conformal mapping of unit circle onto given, singly connected or multiply connected region bounded by simple closed contour 13 p2204 A66-26433  
Self-similar solutions for Mises equation of boundary value problem in incompressible gas flow 13 p2065 A66-26486  
Net-point method determination of two finite-difference systems for systems of Navier-Stokes equations 13 p2066 A66-26504  
Nonsteady motion of slender body near interface between fluids of different densities 13 p2067 A66-26536  
Inviscid hypersonic flow of nonuniform incident stream over wedge, noting vorticity effects, perturbation equations and boundary conditions 13 p1992 A66-26665  
Electrical analogy for turbulent liquid metal heat transfer in noncircular duct entrance region, solving Fourier equation, determining fluid boundary conditions, temperature distribution, etc 13 p2210 A66-26717  
Optimal control problems described by classical boundary problems for equations of parabolic and hyperbolic type 14 p2263 A66-26768  
Boundary problem describing plane jet steady state flow of ideal incompressible fluid, reducing solution to nonlinear integro-differential equations 14 p2272 A66-26775  
First boundary value problem for nonlinear second order differential equations 14 p2320 A66-26942  
Boundary value problems for minimal surface equation 14 p2320 A66-26943  
Electrodynamic boundary conditions at moving boundary, determining fields in

interior of semiinfinite fixed channel 14 p2235 A66-2704  
Uniqueness of operator spectral function of self-adjoint boundary value problem involving second-order differential equation with operator coefficients 14 p2320 A66-2715  
Green function of high degree of self adjoint expansion of elliptic operator generated by differential expression in smooth inside domain and on smooth part of boundary 14 p2321 A66-2716  
Regularity properties of functions from domains of definition of minimum and maximum operators for general elliptic problem with inhomogeneous boundary conditions 14 p2321 A66-2716  
Solution of quasi-static problem in thermoelasticity for cylinder with time dependent boundary conditions obtained as series of Bessel functions and error functions 14 p2397 A66-2738  
Boundary value problem of elastic/viscoplastic beams solved, using iteration method, noting wave propagation, and effect of shear and inertia of axial motion of beam in motion equation 14 p2397 A66-2738  
Solution of boundary value problem for three-dimensional wave equation applied to supersonic gas flow past wing in presence of shock wave, obtaining velocity potential 14 p2218 A66-2738  
Stresses and displacements in circular cylinder of transversely isotropic material for mixed boundary conditions, obtaining solution by using partial differential equation 14 p2397 A66-2738  
Finite difference solution of nonlinear boundary value problem of Landau-Vlasov equation for charged particle for Maxwellian distribution function 14 p2344 A66-2762  
Decay of solutions of initial boundary value problem for hyperbolic equations in unbounded regions 14 p2322 A66-2762  
Green matrix of periodic boundary value problem for system of linear differential equations 14 p2322 A66-2767  
Thermal stresses in finite cylinder with prescribed temperature distribution on curved lateral surface and with ends in contact with smooth insulating plates 14 p2400 A66-2772  
Variational problem of designing maximum draft nozzle supersonic section for three dimensional supersonic flow 14 p2221 A66-2805  
Finite difference method solution of parabolic and hyperbolic partial differential equations in one space variable 14 p2324 A66-2814  
Nonlinear and constrained variational problems in search theory and boundary value problem construction by maximum principle 14 p2324 A66-2819  
Motion of material point in central force field, reducing problem to solution of boundary value problem based on Pontryagin maximum principle, using analog computers 14 p2245 A66-2828  
Basic equations and methods for transverse MHD flow analysis when Hall currents are not suppressed, noting set of suitable simplifications, restrictive conditions and boundary value considerations 14 p2346 A66-2830  
Thermoelasticity equations describing harmonic vibrations of medium solved via singular integral equation 14 p2408 A66-2839  
Stresses and coupled-stresses generated by dislocation in isotropic media treated in terms of boundary value problem for Cosserat medium 14 p2409 A66-2846  
Dual integral equation and dual series analysis and application to mixed boundary value problems in elasticity, hydrodynamic, and electrostatics 15 p2526 A66-2895  
Dual integral equations in elasticity theory noting Mehler-Fok transformation of spherical functions, Fredholm equation and application to mixed boundary value problems 15 p2526 A66-2895  
Asymptotic solutions of boundary value problems for elastic semiinfinite circular cylindrical shells by removing restriction on slow circumferential variation 15 p2609 A66-2923  
Stabilization of unstable two-point boundary value problems, noting field

- method for avoiding computer storage problems during integration of related differential equations 15 p2528 A66-29292
- Extension to MHD hypersonic stagnation flow theory of Bush, including viscous term and solving boundary value problem from both ends at once 15 p2424 A66-29307
- Singular integral equations for thermoelasticity equations describing harmonic oscillations of medium, applied in boundary value problems 15 p2611 A66-29419
- Instability of nonlinearly viscoelastic column under finite compression, noting boundary conditions, application to buckling problem, types of stability loss, etc 15 p2615 A66-29720
- Lagrangian multiplier method applied to mixed boundary value problems such as stresses due to temperature changes in semiinfinite slab 15 p2615 A66-29733
- Linear initial value problems involving first order differential equations transformed into higher order systems and treated as boundary value problems, using numerical techniques 15 p2529 A66-29773
- Sandwich panel bending under thermal and mechanical loads, solving differential equations for temperature distribution, transverse load and uniform edge compression with boundary conditions 16 p2812 A66-30218
- Error bounds based on a priori inequalities for solutions of boundary value problems for linear elliptic partial differential equations 16 p2731 A66-30236
- Linear integral operators applied to singular differential equations and to computations of compressible fluid flows 16 p2683 A66-30241
- Hermite interpolation combined with Ritz method for numerical approximation of solution of two-point boundary value problems 16 p2732 A66-30243
- Linearized unsteady supersonic potential flow theory formulation of boundary value problem of aerodynamic forces on oscillating cylinder and comparison with two-dimensional quasi-steady and slender body approximations 16 p2628 A66-30259
- Nonlinear deformation theory of plasticity for plane strain which approximates isotropic hardening of von Mises loading surface by isotropic hardening piecewise linear loading surface 16 p2812 A66-30260
- General boundary conditions for second-order ordinary differential operators 16 p2733 A66-30630
- Riemann-Hilbert boundary value problem for elliptic systems of linear partial differential equations of first order 16 p2733 A66-30651
- Uniqueness and solution estimates to boundary value problems, noting solvability correlation with existence of Green function 16 p2733 A66-30739
- Solution of heat-conduction equation over functional spaces possessing fractional derivatives with respect to time, applied as solution to first boundary value problem 16 p2827 A66-30779
- Uniqueness of solution to second and third boundary value problems for second-order elliptic equation in presence of boundary singular points 16 p2734 A66-30783
- Normal solvability of Dirichlet problem for Bitsadze elliptic system, noting conditions under which homogeneous problem has nonzero regular solutions 16 p2734 A66-30784
- Solution of boundary value problems describing two-dimensional flow in plastic regions 16 p2815 A66-30789
- Intrinsic electric field of rarefied ion-electron plasma in external magnetic field and plasma stability, noting use of Galerkin method to determine plasma layer slippage 16 p2760 A66-30790
- General boundary value problems for general elliptic systems with discontinuous coefficients 16 p2735 A66-30965
- Expansion in eigenfunctions of not self-conjugate boundary value problem for differential equation with singularity at zero 16 p2735 A66-30969
- Boundary problems for differential and integro-differential equations 16 p2736 A66-30980
- Boundary value problem of temperature stresses of rectangular orthotropic plates solved, using separation of variables method 16 p2818 A66-31067
- Thermoelastic problem for plate with prismatic inclusion of rectangular cross section discussing stress, elastic deformation, displacement potential, etc 16 p2818 A66-31108
- Variational solution of simultaneous stability equations boundary value problem for transverse displacements and stress state 16 p2819 A66-31137
- Steady motion of viscous incompressible fluid between concentric spheres, injecting and ejecting fluid through inlet and outlet holes, describing boundary conditions by series expansion 16 p2687 A66-31294
- Shape and stability of liquid-gas interface in annular tank in force field determined by numerical integration of boundary value problem and eigenvalue [AIAA PAPER 66-425] 16 p2689 A66-31488
- Rigid revolution paraboloid pressure on plates and membranes with contour consisting of straight line segments 16 p2822 A66-31509
- Boundary conditions for existence of damped solutions to plane problem in elasticity theory for half-strip with stress-free longitudinal edges 16 p2822 A66-31525
- Dynamic influence of orography on atmospheric motion examined, using fluid mechanics analogy with periodicity as boundary condition 16 p2699 A66-31637
- Axiomatic theory of Dirichlet problem applicable to nonlinear PDEs and to systems of PDEs 16 p2738 A66-31704
- Solution of particular elementary boundary value problem using new set of orthogonal functions 16 p2739 A66-31726
- Book on similarity theory and physical interpretation, examining boundary value problems, dimensional analysis, etc 16 p2739 A66-31751
- Rational approximation and differential properties at boundary of analytic functions 16 p2739 A66-31796
- Mixed boundary value problem for parabolic hypoelliptic equation with two independent variables treated by modified potential method 16 p2740 A66-31798
- Finite difference estimation of boundary value problem errors 17 p2945 A66-31878
- Difference system and boundary conditions for primitive-equation barotropic forecast 17 p2948 A66-31942
- Symmetrical stress wave propagation in thin plate with small, circular hole at center, noting boundary conditions and solutions via Laplace transforms and by method of characteristics 17 p3022 A66-32012
- Kohn-Kato bounds for natural frequencies of axial shear vibrations for solid circular bar, extending calculations through conformal transformations for bar with many-lobed plane curved boundary 17 p3022 A66-32014
- Stress concentration factor for infinite plate in tension containing doubly symmetrical hole with three intersecting circles forming boundary 17 p3023 A66-32081
- Stochastic equation applied to investigating second boundary value problem for parabolic differential equations with small parameters 17 p2946 A66-32297
- Nonlinear parabolic equations, considering existence, uniqueness theorems, abstract Cauchy problem, etc 17 p2946 A66-32307
- Heat transfer problems solved, using Pohlhausen solution for phase-space trajectory, noting effect of boundary conditions and application of analog computer 17 p3034 A66-32497
- Arc operation under nonsteady electrical inputs, noting initial conditions, energy equation solution, temperature profiles, application of Green function for moving boundary problem, etc [AIAA PAPER 66-480] 17 p2970 A66-32769
- Stationary boundary value problem of Navier-Stokes equation for incompressible viscous fluids 17 p2911 A66-32817
- Evolution of two different homogeneous media separated by straight wall with arbitrary transmission and reflection properties, noting heat flow, vibration, diffusion coupled vibration, etc 17 p3036 A66-32842
- Boundary value problems in secondary creep of circular thin shells under axisymmetric loading, giving solutions for deformation rates and stress resultants 17 p3030 A66-32891
- Intensity of emergent radiation in finite homogeneous slab absorbing and scattering it isotropically, viewed as boundary value problem determined by imbedding techniques 17 p3037 A66-33012
- Thin circular cylindrical shell behavior in axial compression, noting buckling under stress, boundary condition detail effects, etc 17 p3031 A66-33064
- Textbook on differential equations with deviating arguments, covering existence theorems, linear equations, stability theory, boundary value problems, etc 17 p2947 A66-33188
- External gravity field and geodetic boundary value problem 17 p2921 A66-33195
- Loading of thin ring airfoil in unbounded spherical source flow field, calculating vortex distribution, strength, etc [ASME PAPER 66-FE-3] 17 p2914 A66-33259
- Direct method in calculus of variations for boundary value problem of Mangoron type 17 p2948 A66-33416
- Initial boundary value problems involving Maxwell equations in isotropic media solved numerically 18 p3065 A66-33533
- Equivalence between scalar three-dimensional diffraction problems in homogeneous medium and two-dimensional diffraction problems in inhomogeneous medium with inverse square permittivity profile 18 p3065 A66-33534
- Exact solution for Green function of open spherical shell subjected to harmonically oscillating concentrated load and any consistent boundary conditions [ASME PAPER 65-WA/APM-24/] 18 p3248 A66-33576
- Thrust programming in central gravitational field, discussing reduction of Mayer-Bolza variational problem to boundary value problem for system of nonlinear differential equations 18 p3241 A66-33846
- Sufficient conditions for boundedness of solutions of linear system of differential equations with variable coefficients 18 p3126 A66-33929
- Discreteness conditions for spectrum of one-term differential operator, considering asymptotic distribution of eigenvalues 18 p3126 A66-33931
- Infinite boundary value problem solution for third-order differential equations obtained in convergent series form 18 p3126 A66-33974
- Differential inequality theorem for boundary value problem involving second-order differential equation 18 p3126 A66-33975
- Existence, uniqueness and periodicity of solutions to boundary value problems for quasi-linear ODEs on topological space of continuous mappings 18 p3127 A66-34138
- Partial differential equation describing transient conduction in multidimensional inhomogeneous media solved by method based on use of known boundary conditions 18 p3262 A66-34380
- Existence and uniqueness of solution in viscoelasticity theory for aging materials, considering four boundary value problems for body subjected to finite deformations 18 p3255 A66-34393
- Additional conditions for boundary value problem with directional derivative in heat conduction 18 p3127 A66-34544
- Transverse propagation of waveguide modes in conducting cylindrically stratified magnetoplasma analogous to VLF radio waves propagating in Earth-ionosphere 18 p3071 A66-34565
- Asymptotic theory of spherical electrostatic probe in collision-dominated partially ionized gas by quasi-linearization 18 p3146 A66-34583
- Boundary value problem of Stokes equations proving branching for flow between two rotating concentric cylinders and nonexistence of singular flow 18 p3101 A66-34659
- Flow of incompressible viscous fluid subject to conditions governed by Navier-Stokes equation, examining fluid velocity as time tends to infinity 18 p3101 A66-34660

Mixed initial boundary value problem for wave equation in three space dimensions, proving existence of generalized solution 18 p3128 A66-34662

Variational principle applied to boundary value problems in kinetic theory, specifically examining Kramer problem, plane Couette flow and plane Poiseuille flow 18 p3102 A66-34919

Transverse boundary effects on ionic-acoustic wave propagation in magnetoplasma 18 p3150 A66-34938

Plane steady state problem solved in thermoconductivity theory in case of boundary conditions of third kind for regions of special shape 18 p3267 A66-35055

Bjerhammar gravimetric boundary value problem with gravity reduction defined by integral equation 19 p3345 A66-35393

Quantitative examination of Saint Venant principle in context of elastostatic boundary problems, i.e., axisymmetric pure torsion of bodies of revolution 19 p3473 A66-35485

Analog computer solution of high-order optimal control problem, noting application of Pontryagin maximum principle and extension to two-point boundary value problems 19 p3306 A66-35536

Perturbation method solution of rectangular waveguide boundary value problem filled with transversely magnetized semiconductor or plasma 19 p3317 A66-35716

Displacement boundary value problem in classical linear elastostatics, deriving ellipticity condition for uniqueness theorem 19 p3474 A66-35852

Asymptotic solutions for large time obtained for predominantly mechanical mode of one-dimensional solution of coupled thermoelastic equations 19 p3400 A66-35853

Vector formulation of boundary value optimization problems 19 p3388 A66-35871

Comparison of parameter hunting procedures and implementation techniques for solving higher order boundary value problems with rapid convergence [AIAA PAPER 65-693] 19 p3462 A66-35900

Low thrust trajectory optimization, using Newton-Raphson method to solve nonlinear two-point boundary value problem [AIAA PAPER 65-698] 19 p3462 A66-35904

Solution of mixed boundary and Cauchy problem for system of PDE 19 p3389 A66-35933

Third boundary problem solution for two-dimensional equation of thermal conductivity in arbitrary region by locally one-dimensional method 19 p3478 A66-35934

Difference analog construction for second-order elliptic differential equation in case of rectangular network 19 p3389 A66-35935

Sensitivity analysis and invariant imbedding, discussing application to adaptive control theory and reduction of boundary value problems to initial value problems 19 p3326 A66-36011

Solution of two-point boundary problems in optimal control syntheses in which sensitivity coefficients for differential equations satisfy jump conditions at discontinuity point 19 p3327 A66-36017

Eigenvalue problems for systems of ordinary differential equations resolved computationally by use of quasi-linearization technique 19 p3310 A66-36046

Schauder-type solution estimates to first boundary value problem for parabolic equations of order 2p 19 p3390 A66-36193

Boundary value problem solutions in meteorology 19 p3394 A66-36194

Theorems associated with surface parabolic potentials 19 p3390 A66-36195

Diffraction of electromagnetic plane by half-plane in uniaxially anisotropic medium solved in terms of Sommerfeld approximation 19 p3304 A66-36284

Min-H Strategy in deriving two iterative methods for rapid convergence to optimum solutions for nonlinear variational two-point boundary value problems 19 p3466 A66-36677

Nonlinear and nonstationary finite differential system identification by quasi-linearization and differential approximation 19 p3335 A66-36701

Iterative approximation method for solution of proper elements /eigenvalue/ of Sturm-Liouville equation 19 p3392 A66-36783

Elastic deformation of unbounded

transversely isotropic body with internal plane-circular slot under slot surface load 19 p3476 A66-36839

Iterative solution of time optimal control boundary value problem resulting from application of Pontryagin maximum principle 20 p3535 A66-36850

Weierstrass necessary condition and basic equations for optimal control of initial or boundary states of continuum mechanical MHD and hypersonic partial differential systems 20 p3535 A66-36853

Asymptotic behavior of solutions to boundary value and initial problems for ODE with small parameter, using functions of power law boundary layer 20 p3590 A66-37109

Continuous plane with circular inclusion with different elastic properties, giving solution in form of boundary equation in random variable 20 p3668 A66-37530

Application of Rayleigh principle to obtain sharp upper bounds for increase of first eigenvalue of membrane submitted to parallel and equidistant rectilinear constraints 20 p3669 A66-37544

Electric analogs construction for stability and oscillation of elastic system 20 p3670 A66-37674

Boundary value problem of wave equation with application to antenna theory of singular integral equations 20 p3531 A66-37730

Plane linearly polarized electromagnetic wave diffraction on several spheres forming linear system, showing solution of boundary value problems 20 p3603 A66-37754

Solvability and methods of solution of boundary value problems noting uniqueness, potential theory application in solving polyharmonic equations and second-order equation 20 p3591 A66-37757

Reflection coefficients of plane wave field in grid-Earth system, using averaged boundary conditions 20 p3518 A66-37865

Ablation analysis in cylindrical coordinates for axisymmetrical configuration of wall materials with temperature-dependent properties and nonlinear heat flux conditions at boundaries [AIAA PAPER 66-542] 20 p3680 A66-38034

Boundary conditions of downstream singularity in nonadiabatic flames 20 p3680 A66-38048

Magnetospheric boundary phenomena, noting dependence of charged particle observations on character of associated magnetic fields 20 p3641 A66-38329

Boundary value problems for Sturm-Liouville-type equation with asymptotic formula derived for eigenfunctions 20 p3592 A66-38420

Boundary value problems with natural boundary conditions solved by representing desired solution by finite sum 20 p3592 A66-38423

Eigenfunction expansion of analytic linear ordinary differential operators of boundary value problem with normalized irregular discontinuous boundary conditions 20 p3592 A66-38432

Linear elliptic partial differential systems, eigenvalue and boundary value problems - Johns Hopkins University, Lectures, March-May 1965 21 p3754 A66-38457

Well-posed BVP for linear partial differential system and relation of weak solution with two Banach spaces 21 p3754 A66-38458

Semiweak solutions of elliptic BVP, particularly generalized Dirichlet problem 21 p3754 A66-38461

Existence and uniqueness theorems for Dirichlet problem of second-order linear elliptic equation, Neumann BVP, mixed BVP and oblique derivative problem 21 p3754 A66-38462

Linear elastostatic BVPs for inhomogeneous anisotropic elastic body including existence-uniqueness theorem, based on Korn inequality 21 p3755 A66-38463

Elliptic BVP in equilibrium theory of thin plates employing iterated Laplace operator 21 p3822 A66-38464

Elliptic singular integro-differential operators on smooth compact manifold without and with boundary 21 p3756 A66-38626

Closed loop optimization of fixed

configuration systems termed specific optimal control solved by applying Pontryagin maximum principle to reduce problem to two-point boundary value problem 21 p3718 A66-38662

Mathematical model of linear guidance law to dynamical system, noting reduction of two-point boundary value class error 21 p3765 A66-38870

Existence of angular boundary values of harmonic function in sphere 21 p3757 A66-38902

Computer analysis of cylindrical shell stability under uniform external pressure and critical pressure determination for various boundary conditions 21 p3829 A66-38970

Energy transport mechanism in magnetosphere analyzed by study of character of three-dimensional hydromagnetic waves in uniform cold plasma 21 p3734 A66-39218

Existence conditions of solution to two-point boundary value problem for ordinary nonlinear any order differential equation 21 p3757 A66-39248

Necessary and sufficient conditions for matrix satisfying discrete maximum principle and difference methods for numerically solving second-order elliptic boundary value problem 21 p3757 A66-39258

Dynamic behavior of soap film stretched between two coaxial rings, assuming potential energy of this surface to be proportional to surface area 21 p3772 A66-39352

Stress function and displacement vector for linear, homogeneous, isotropic and elastic material body occupying bounded simply connected region of space 21 p3772 A66-39352

Extension of extremum principles concerned with velocity fields for boundary value problems of incompressible rigid viscoplastic /Bingham/ solid 21 p3832 A66-39440

Flight stability, discussing quasi-critical case in neighborhood of asymptotic stability boundary of autonomous systems and that of variable system parameters 21 p3696 A66-39594

Bending of anisotropic cylindrical bodies with curved axis under transverse force 21 p3833 A66-39595

Haag general synchronization theory for oscillating systems with one degree of freedom applied to boundary value problems for multivibrating systems 21 p3774 A66-39607

Boundary value problem for equation of mixed type with two intersecting parabolic lines of degeneration, reducing it to integral equation with solution in half-plane 21 p3758 A66-39613

Boundary value problem for isothermal unidirectional deformation of hyperelastic material applied to inflation of thick walled sphere 22 p3988 A66-39673

Book on boundary value problems and partial differential equations for electric circuits and other engineering problems 22 p3938 A66-39703

Heat equation solution by use of Crandall optimum finite difference method with boundary discontinuity 22 p3997 A66-40029

Hamilton principle, motion equations, natural boundary conditions and constitutive relations for finite deformation of one-dimensional curved elastica and radial motion and stability of circular ring 22 p3990 A66-40138

Wiener-Hopf and series solutions to BVP of indentation stresses and displacements in infinite hollow elastic cylinder for axisymmetric punch of finite length and arbitrary profile 22 p3990 A66-40139

Stressed state near round opening in orthotropic cylindrical shell solved for various loading and boundary conditions by Bubnov-Galerkin variational method 22 p3990 A66-40145

Effect of stiffening ribs on stressed-strained state of shallow symmetrically loaded conical shells, noting reduction of boundary value problem to integration of differential equations 22 p3991 A66-40150

Mixed boundary value problem in elasticity of circular and quarter-plane

segments 22 p3991 A66-40153  
 Conformal mapping technique applied to boundary value problem of plane wave diffraction by perfectly conducting elliptic cylinder, noting integral 22 p3866 A66-40185  
 Cauchy and boundary value problems for second-order hyperbolic equations 22 p3939 A66-40189  
 Uniqueness of solution to second and third boundary value problems for second-order elliptic equation in presence of boundary singular points 22 p3940 A66-40445  
 Normal solvability of Dirichlet problem for Bitsadze elliptic system, noting conditions under which homogeneous problem has nonzero regular solutions 22 p3940 A66-40446  
 Infinitely small bending deformations of convex surfaces with boundary condition of generalized slip, formulating boundary value problem for bending of surface 22 p3995 A66-40450  
 Nonlinear boundary value problem for temperature distribution in convex solid with radiation boundary condition 22 p3999 A66-40565  
 Axisymmetric problems of heat conductivity theory for layer with one constant boundary and one circular boundary solved by paired integral equations method 22 p4000 A66-40571  
 Book on numerical processes in differential equations including initial value and boundary value problems 22 p3941 A66-40620  
 Small parameter method to study steady state flow of viscous incompressible fluid in journal bearing 22 p3928 A66-40688  
 Matrix functions and use in problems of heat and mass transfer 22 p4000 A66-40820  
 Projection method for obtaining upper and lower bound estimates of solutions to elliptic equations 22 p3942 A66-40914  
 Variational techniques in solving BVPs for nonlinear plastic, elastoplastic and viscous media and in predicting existence, uniqueness and equilibrium conditions 23 p4136 A66-40996  
 Shell dynamical integral and integro-differential BVPs for linear deformable shells, examining reciprocity theorem and Kirchhoff-Lowe hypothesis 23 p4136 A66-40997  
 Soviet literature survey of exact and approximate solution of two- and three-dimensional mixed boundary value problems in theory of elasticity 23 p4136 A66-40999  
 Approximate solution of boundary value problems in elasticity theory as applied to thin plate theory, using homogeneous equations 23 p4136 A66-41000  
 Axisymmetric dynamic response of ring supported cylinder to time dependent loads, discussing boundary conditions and differential equations of motions [AIAA PAPER 66-83] 23 p4138 A66-41106  
 Parameters of dynamic systems described by PDEs determined by replacing PDE with integral equation and eliminating via recursion process terms resulting from initial and boundary conditions 23 p4084 A66-41396  
 Initial broadening of diffusion flame sheet caused by nonvanishing equilibrium constant determined, using method of inner and outer expansions 23 p4148 A66-41500  
 Rall theorem on variational principle for linear elastodynamic BVPs on Hilbert space 23 p4138 A66-41538  
 Existence and uniqueness theorems in Poincare-Liapunov theory for multipoint control boundary value problems 23 p4085 A66-41539  
 Invariant imbedding and scattering of light in one-dimensional medium with moving boundary, noting relaxation of photon emission and Doppler frequency shift 23 p4087 A66-41540  
 Wiener-Hopf solution of thermoconductivity boundary value problems 23 p4149 A66-41558  
 Proof of existence of boundary value solutions for various mixed component equations by reduction to singular integral equation 23 p4085 A66-41562  
 Analog of Galerkin method for solving boundary value problems and quasi-linear operator equations 23 p4086 A66-41569

Pontryagin maximum principle applied to solution of optimal control problems by hybrid computer, using digital parameter optimizer to solve two-point boundary value problem 23 p4042 A66-41601  
 Numerical solution of BVP for optimal control parameters in trajectory analysis 23 p4051 A66-41617  
 Boundary conditions for unique solution to linearized warm plasma equations 23 p4105 A66-41640  
 Fredholm integral equations obtained in study of boundary value problem occurring in thin shallow shell theory 23 p4140 A66-41835  
 Approximate solution of certain mixed plane boundary value problems involving isotropic elastic body 23 p4140 A66-41836  
 Thermal transport in channel-gas flow, discussing integral equation and power series solution 23 p4150 A66-41869  
 Mixed boundary value problem of theory of analytic single-value function 23 p4086 A66-41873  
 Boundary value problem of steady two-dimensional MHD flow of viscous incompressible fluid past rigid plate 23 p4106 A66-41875  
 Trefftz method applied to derivation of integral for general boundary value problem in classical theory of elasticity 23 p4144 A66-41968  
 Inviscid hypersonic flow past flat wings at large angle of attack analyzed, using homogeneous layer concept of shock layer theory 23 p4013 A66-42014  
 Generalized solution to linear second-order parabolic equation showing that first boundary value problem has unique solution, obtaining estimates of Holder norms of solutions 24 p4231 A66-42233  
 Classical character of generalized solution of boundary value problem for general nonlinear Navier-Stokes equations 24 p4231 A66-42235  
 Benard convection between free bounding surfaces for ranges of Rayleigh and Prandtl numbers achieving steady state with motion of single large cell, evaluating eigenfunction amplitudes 24 p4293 A66-42409  
 Graphical construction and geometrical interpretation of particular analytical solution for determining ionic orbits subject to certain boundary conditions 24 p4277 A66-42685  
 Bifurcated parallel plate waveguide solution extended to solution of open ended parallel plate waveguide radiating into space 24 p4184 A66-42703  
 Isentropic two-dimensional nonstationary flow of polytropic gas adjoining region with quiescent gas, constructing approximate picture of motion near arbitrary discontinuities 24 p4195 A66-42723  
 Net point method determination of two finite difference systems for systems of Navier-Stokes equations 24 p4195 A66-42724  
 Hilbert parametrix method of solving linear BVPs for second-order elliptic PDEs, using Green functions 24 p4232 A66-42740  
 Weak and strict solution existence theorem for initial-boundary value problem for nonlinear hyperbolic equation in relativistic quantum mechanics 24 p4237 A66-42829  
 Single second-order oblique derivative problem with elliptic operator 24 p4232 A66-42830  
 Two mixed boundary value problems of infinite elastic cylinder under torsion solved by dual integral equation with differentiation of boundary conditions 24 p4291 A66-42843  
 Numerical solution of linear boundary value problems 24 p4233 A66-43201

# **BOUNDARY VALUE PROBLEM**

Torsion of elastic rectangular bar with similarly distributed external tangential loads applied at both ends 24 p4289 A66-42436

# **BOUSSINESQ APPROXIMATION**

Temperature distribution in flow past sphere, discussing time dependent form of Boussinesq transformation [ASME PAPER 65-HT-38] 05 p0784 A66-14752  
 Boussinesq approximation for hydrodynamic stability of natural thermal convection of fluid between two parallel vertical planes and calculation of critical

Reynolds number 15 p2617 A66-29399  
 Energy method applied to stability of flows governed by nonlinear Boussinesq equations, establishing universal stability region in Reynolds-Rayleigh number plane 19 p3478 A66-36199  
 Thermal convection in horizontally infinite layer of fluid confined between rigid heat conducting plates driven by temperature difference 23 p4151 A66-42055

# **BOW SHOCK**

Model of Fermi acceleration at shock front developed and applied to Earth bow shock 13 p2184 A66-25620  
 Electron acceleration near Earth bow shock measured, using Explorer XVIII satellite, noting solar wind effect, energy spectrum in radiation belt and magnetospheric boundary, etc 13 p2175 A66-26355  
 Time required for detached bow shock to reach equilibrium 17 p2840 A66-32483  
 Interaction of first and second shocks of blast-bow wave in double-driver shock tube, examining stagnation point pressure prediction methods [AIAA PAPER 66-409] 17 p2840 A66-32748  
 Energy spectrum change of group of electrons being convected downwind in magnetosheath and behind Earth bow shock 18 p3170 A66-34521  
 Shock wave instability and mass flow accommodation for ribbon-type parachutes, noting canopy porosity and free stream Mach number 22 p3845 A66-40594

# **BOWEN HYPOTHESIS**

Slit spectrograph theory of Bowen for use with medium size astronomical telescopes 02 p0229 A66-11701

# **BOX BEAM**

Deformation of cantilever parallelogram box beam 12 p1969 A66-24365  
 Design, fabrication and test of sandwich construction box beam made of D-43 columbium and Haynes 25 superalloy for use as hot redundant structure for hypersonic vehicles 16 p2816 A66-30894

# **BRAGG EQUATION**

Temperature effect on diffraction curve profile for Bragg case using triple crystal spectrometer, observing intrinsic temperature effect due to thermal motion 06 p0923 A66-16186  
 Existence of vortex lines in superconducting niobium in mixed state demonstrated via neutron diffraction 09 p1420 A66-20050  
 Integral equations describing multiple neutron Bragg reflections in mosaic crystal 11 p1742 A66-23409  
 Horizontal deflection in TV display produced by Bragg reflection of laser light by ultrasonic waves in water 24 p4212 A66-42816

# **BRAIN**

SA CEREBRAL CORTEX  
 SA ELECTROENCEPHALOGRAPHY  
 SA HYPOTHALAMUS

Alpha particle and X-radiation ionizing effects on cerebral astroglial cells and blood vessels of young rats 10 p1487 A66-22020  
 Importance of neural site and experimental conditions in determining motivational direction /positive or negative/ produced by electrical stimulation of brain in animals 11 p1644 A66-22976  
 Holtzman strain experiments on rats, determining if electrical stimulation of various neural sites produce motivational consequences of appetitive or defensive behavior 13 p2009 A66-25790  
 Correlation between survival time of rats under acceleration stress and cerebral level norepinephrine 17 p2855 A66-32145  
 Neuronal circuitry relations of cat mammillary nuclei derived from neuron population ratio computed from population data 18 p3058 A66-34067  
 Neuronal circuitry and neuron populations of structures in normal animal brains and brains modified by unambiguous lesion arrays 20 p3505 A66-37053  
 Operant conditioning of single unit responses, considering hippocampus and midbrain tegmentum 20 p3506 A66-37601  
 Spectral analysis of human EEG generators in posterior cerebral regions 20 p3506 A66-37604  
 Hypoxia of simulated high altitude

- exposure prolongs synaptic delay and conduction time in brain system of rats 22 p3855 A66-40403
- Physiological and mechanical effects of radial accelerations on brain temperature of dog and rabbit 23 p4026 A66-41336
- Vibration effect on bioelectric activity of brain and oxygen consumption, using experimental rats 23 p4027 A66-41340
- Molecular and ultrastructural correlates of function in neuron, neuronal nets and brain studied, using genetic and immunological concepts 24 p4165 A66-43102

**BRAIN CIRCULATION**

- Rheographic regional method for evaluation of cerebral and ocular circulation in cardiac and cerebrovascular disease 04 p0463 A66-14002
- Blood flow rate in surface veins of brains of animals subjected to accelerations, noting thermal transducer 15 p2445 A66-29500
- Change pattern in human cerebral blood flow during time immediately following initiation of carbon dioxide inhalation 18 p3056 A66-33691
- X-ray irradiation effect on venous blood flow in rabbit brain vessels 23 p4027 A66-41344

**BRAKE**

- SA AIRCRAFT BRAKE
- SA WHEEL BRAKE
- Aerodynamic forces acting on wings with braking flaps 19 p3275 A66-35365
- Minimum of maximum overload in braking of vehicle in atmosphere, examining aerodynamic lift on basis of Pontryagin maximum principle 22 p3986 A66-40465

**BRASS**

- Stress-corrosion cracking, rate of weight loss and surface condition of 70-30 copper zinc alloy in concentrated aqueous ammonia 07 p1053 A66-18519
- Diffusivity, elastic modulus and stacking fault energy effect on high temperature creep behavior of alpha brasses 11 p1717 A66-22996
- X-ray study of 16 monolith and powdered brass samples with 30.07 to 40.1 percent copper, indicating two phase fields for gamma region of Cu-Zn system 12 p1896 A66-24866

**BRAYTON CYCLE**

- Brayton cycle nuclear space power systems and heat transfer components 01 p0016 A66-10913
- Recuperative Brayton cycle for nuclear-electric spacecraft power supplies [AIAA PAPER 64-757] 13 p2005 A66-26620
- Brayton-cycle space power system, describing solar collector, heat receiver/storage unit, recuperator, radiator and gas bearings [AIAA PAPER 64-726] 13 p2006 A66-26635
- Thermal energy storage using solar Brayton cycle cavity receiver with lithium fluoride heat storage [AIAA PAPER 64-727] 13 p2006 A66-26636
- Gas lubricated bearings used in Brayton cycle closed-loop system turbomachinery in design of two-shaft power plant [ASME PAPER 66-GT/CLC-9] 14 p2300 A66-26982
- Closed Brayton cycle for onboard generation of space vehicle electric power from solar, isotope and nuclear reactor energy source [ASME PAPER 66-GT/CLC-10] 14 p2224 A66-26983
- Design of 500-kwe closed Brayton cycle power conversion system, analyzing various turbomachinery configurations hermetically sealed and operating on gas bearings [ASME PAPER 66-GT/CLC-15] 14 p2225 A66-26985
- Brayton cycle, Rankine cycle and thermoelectric systems considered as radioisotope secondary power systems for MOL [ASME PAPER 65-AV-18] 16 p2636 A66-30856
- Electrical power control and conditioning subsystem for Manned Orbital Research Laboratory /MORL/, noting Brayton cycle, system optimization, alternator and frequency converter selection 20 p3497 A66-37157
- Dynamic power generating systems using Rankine and Brayton cycles for space application 20 p3598 A66-37256

- Closed Brayton cycle power system for space vehicles, discussing closed loop and major components 23 p4020 A66-41750
- Plutonium-238 radioisotope Brayton cycle power system design and vehicle integration 23 p4021 A66-41754
- High temperature testing and evaluation of graphite helical-screw expanders and compressors for use with inert gas Brayton cycle 23 p4075 A66-41755

**BRAZIL**

- Space research activities in Brazil 15 p2601 A66-29935

**BRAZING**

- SA SOLDERING
- SA WELDING
- In situ ultrasonic testing of brazed hydraulic pipe joints in aircraft, noting superiority over radiography 01 p0079 A66-10973
- Brazing and diffusion bonding of titanium alloys to similar and dissimilar materials in high vacuum or inert gas [SAE PAPER 650752] 05 p0687 A66-15001
- Techniques of joining aluminum to stainless steel for space vehicle application [SAE PAPER 650754] 05 p0701 A66-15002
- High remelt temperature brazing of Ta-10W honeycomb structures by brazing with pure titanium, using diffusion sink concept 13 p2109 A66-25774
- Chromium-vanadium alloys for brazing tungsten to molybdenum in engine application 13 p2087 A66-26020
- Brazed hydraulic system design and fabrication for Skyhawk A4B aircraft 17 p2849 A66-33098
- Brazed lap joints between stainless steel and tantalum or Ta-10W alloy obtained with pure copper or silver-copper-base brazing alloys 19 p3367 A66-36112
- Refractory metal brazing alloys developed for producing brazed refractory metal sandwich panels 19 p3367 A66-36113
- High-temperature brazing materials for niobium and tungsten with tensile-shear strengths in excess of 7000 psi at 2500 degrees F 19 p3367 A66-36114
- Reactive brazing alloys evaluated for columbium alloy foil brazing in order to avoid erosion and embrittlement of conventional brazing alloys 19 p3367 A66-36115
- Exothermic brazing of refractory metals, tabulating braze filler metals that formed acceptable joints with molybdenum, tungsten and TZM alloy 19 p3367 A66-36117
- Brazing and cladding research on refractory metals offers dependability and continuity of protective layers and abrasion resistance in extreme environments 19 p3368 A66-36119
- Protective coatings for titanium and tantalum refractory alloy brazing envelopes, offering ephemeral protection from oxidation at ultrahigh temperatures 19 p3384 A66-36143
- Solid state welding and brazing for surface layer bonding 22 p3925 A66-40269

**BREAKDOWN**

- S ELECTRIC BREAKDOWN
- S VOLTAGE BREAKDOWN
- S VORTEX BREAKDOWN

**BREATHING**

- S AIRCRAFT BREATHING APPARATUS
- S HIGH ALTITUDE BREATHING
- S LIQUID BREATHING
- S OXYGEN BREATHING
- S PRESSURE BREATHING
- S RESPIRATION
- BREATHING MODE
- Dynamic behavior of aircrew breathing equipment considering cyclic flow response tests, stability problems, measurement techniques and human respiratory impedance 03 p0329 A66-13350

**BREATHING VIBRATION**

- Thermal events in diurnal breathing cycle and vapor loss reduction in volatile liquid storage [AICE PREPRINT 11C] 10 p1521 A66-21181
- Liquid instability of vibrating partially filled elastic tank, emphasizing resonant breathing mode and frequency response 20 p3672 A66-38153

**BREGUET 941 AIRCRAFT**

- Breguet 941 STOL aircraft advantages over conventional commercial jet aircraft to solve

- requirements imposed on airport facilities 02 p0177 A66-1174
- Breguet 941 STOL aircraft design and performance, noting maximum lift coefficient and single-shaft power plant 10 p1483 A66-2171
- Breguet 941 STOL aircraft, considering possibilities as television relay platform with Citroen ID 19 station wagon 14 p2238 A66-2767
- BREGUET 942 AIRCRAFT**
- Organization of short-distance interurban transportation system based on STO aircraft of Breguet type 05 p0611 A66-1519
- BREGUET 1150 AIRCRAFT**
- Breguet 1150 high seas reconnaissance aircraft, noting design features and technological problems 24 p4159 A66-4248
- BREMSTRABLUNG**
- SA X-RAY
- Transition and bremsstrahlung spectrum from measurement of energy dependence of visible and UV radiation emitted from electron bombarded Ag targets 01 p0108 A66-1019
- Radiation hazard for cosmonaut inside outside spaceship from Earth radiation belt, considering electron radiative effect, tissue sensitivity, etc 02 p0182 A66-1166
- Galactic X-ray astronomy discussing neutron stars, thermal bremsstrahlung and synchrotron radiation 02 p0290 A66-1186
- Cut-off of ruby laser emission by pulse electron and bremsstrahlung radiation, using adiabatic temperature 03 p0377 A66-1244
- Enhanced bremsstrahlung from thermal plasmas containing nonthermal electrons 03 p0401 A66-1295
- Solar flares, discussing continuous electromagnetic radiation, hard X-ray radiation and microwave radio bursts 05 p0752 A66-1537
- Gas breakdown by laser can be accounted for by both microwave breakdown theory and inverse bremsstrahlung 06 p0893 A66-1704
- Accuracy of calculation of energy losses by fast muons, considering cases of bremsstrahlung, direct pair production and nuclear cascades 07 p1117 A66-1756
- Periodic variations in luminosity of quasars, stellar radio sources related to fluctuations of main parameters of magnetic bremsstrahlung mechanism 07 p1134 A66-17620
- Anomalous bremsstrahlung and anomalous cyclotron radio emission from partially ionized gases in 20 to 1000 m range 08 p1263 A66-1901
- Bremsstrahlung produced during stoppage of electrons generated by thunderstorms can create ionized columns extending to ionospheric heights 10 p1529 A66-2115
- Bremsstrahlung, recombination radiation and electromagnetic emission from high temperature high density plasmas 10 p1566 A66-2170
- Radioactive debris over Fairbanks, Alaska, on February 18, 1965, investigating bremsstrahlung X-rays in auroral zone 12 p1875 A66-2489
- Bremsstrahlung of nonrelativistic plasmas: treating nondegenerate electron component of plasma simultaneously with degenerate component by applying Fermi-Dirac distribution 12 p1925 A66-2499
- Nonlinear dielectric laser light absorption by neutral gas resulting in avalanche breakdown of gas due to thermal ionization 13 p2090 A66-2542
- Charge particle acceleration through electron absorption of bremsstrahlung photons 14 p2375 A66-2725
- Emission from hot low-density plasma due to bremsstrahlung, radiative recombination and electron collision-induced line emission 14 p2345 A66-2812
- Experimental evidence of inverse bremsstrahlung and electron-impact ionization in low pressure argon ionized by giant pulse laser 15 p2544 A66-2911
- Plasma electron temperature measure from soft X-ray bremsstrahlung absorption by beryllium foil 16 p2756 A66-3009
- Plasma bremsstrahlung power derived from relativistic, nonrelativistic and electron beams 17 p2965 A66-3225
- X-ray spectrum produced by thermal

bremsstrahlung of gas, taking Gaunt factor into account 18 p3200 A66-35049  
 EAS RF emission detection, discussing enhanced Cerenkov radiation, mutual coherence effects, diffraction, Fresnel zones, Coulomb-field bremsstrahlung, etc 18 p3208 A66-35117  
 One-dimensional cascade theory of photon-electron showers for light and heavy substances, taking into account polarization of medium upon cross section for electron bremsstrahlung 18 p3213 A66-35145  
 Bremsstrahlung and pair production processes as regarded in cascade theory of showers 18 p3213 A66-35146  
 Bremsstrahlung of electron impinging on fixed center of force and subsequent anomalous interaction, noting similar effect in strong interactions 18 p3218 A66-35183  
 Delta electrons formed in interstellar hydrogen-galactic ray collision 19 p3452 A66-35283  
 Visible and UV transition radiation, bremsstrahlung and plasma due to electron bombardment of metal surfaces 20 p3604 A66-37280  
 Ultrarelativistic muon electromagnetic interaction energy loss due to bremsstrahlung and pair production 24 p4271 A66-42936

**BRIDGE**  
 SA WHEATSTONE BRIDGE  
 SA WIRE BRIDGE CIRCUIT  
 Bearing reactions and stresses of bridge analyzed by calculating bending of rectangular plate with two supported and two free parallel sides 01 p0155 A66-10711  
 Diode gate design, using bridge circuit to eliminate spurious gating signals 14 p2267 A66-27802  
 Diode bridge variable attenuator used to overcome error signals and harmonic distortion in wide range 14 p2267 A66-27805  
 AGC 14 p2267 A66-27805  
 Bridge circuit measurement of phase at UHF and microwave frequencies, examining amplitude modulation and mixer types 24 p4171 A66-42101  
 Thermistor temperature sensing bridge for temperature control of liquid volume 24 p4214 A66-43033

**BRIGHTNESS**  
 SA LUMINESCENCE  
 SA LUMINOSITY  
 SA SKY BRIGHTNESS  
 X-ray photograph confirmation in 1964 of solar brightness distribution derived from ionospheric observations during solar minimum in 1954 04 p0579 A66-14179  
 Brightness dependence of pulse arc on power per unit length of arc, estimating charged particle density and plasma temperature 06 p0919 A66-16875  
 Secular variations in absolute brightness of periodic comets attributed to instrumental and geometrical effects 07 p1133 A66-17519  
 Apparent magnitude of periodic comet Oterma calculated from relation between absolute brightness and computed ephemerides 07 p1134 A66-17521  
 Brightness calculation of aureole visible in daytime at Earth edge from spacecraft 08 p1217 A66-19302  
 Brightness temperature measurements on illuminated side of Venus at 10.6 cm challenges Troitski theory of planetary radiation emission 08 p1297 A66-19457  
 Millimeter wavelength brightness temperatures of Mars, Jupiter and Saturn calculated from antenna temperatures 11 p1769 A66-22532  
 Brightness of oxygen bands in twilight and day airglow, relating variation to sunspot cycle, ozone dissociation and solar eclipse 11 p1702 A66-23490  
 Koval method for correcting distortions in photometric cross sections for Martian disk brightness distribution 12 p1944 A66-23502  
 Supercooled water droplets hypothesized in Venus cloud layer, based on radiometric observation in SHF range 12 p1944 A66-23503  
 Brightness fluctuations in quiet-form auroras, noting peaks and anisotropy of spectrum 14 p2286 A66-27983  
 Millimeter wavelength solar radiation consisting of thermal, slowly varying active and burst components and eclipse measurements of brightness

distribution 15 p2594 A66-29001  
 Brightness distribution in corona during solar eclipse of May 30, 1965 16 p2796 A66-30279  
 Initial pulse in luminous emission of discharge laser, using photomultiplier preceded by mobile iris, determining geometrical distribution of discharge brightness 16 p2719 A66-31209  
 Brightness temperature measurements on illuminated side of Venus at 10.6 cm challenges Troitski theory of planetary radiation emission 18 p3232 A66-34486  
 Lunar photometric brightness variational function based on JPL study of Moon topology 18 p3235 A66-34656  
 Profiles of isophotes and relative intensities for Aristarchus region of Moon taken during total eclipse on December 19, 1964 18 p3237 A66-35048  
 Optical photometric properties of lunar surface, discussing brightness effects, solar wind, albedo, reflectivity, backscatter, chemical composition, ion bombardment effects, etc 19 p3457 A66-35444  
 Brightness calculation of aureole visible in daytime at Earth edge from spacecraft 19 p3348 A66-36039  
 Koval method for correcting distortions in photometric cross sections for Martian disk brightness distribution 20 p3646 A66-37015  
 Supercooled water droplets hypothesized in Venus cloud layer, based on radiometric observation in SHF range 20 p3646 A66-37016  
 Brightness curves used to determine geometrical and physical parameters of eclipsing binary systems containing component with extended spherical atmosphere 20 p3647 A66-37031  
 Venus brightness temperature and polarization of integral radio emission at 3.75 cm wavelength 20 p3648 A66-37044  
 Photoelectric photometer used for tracking entry of artificial satellites into shadow of Earth 20 p3518 A66-37839  
 Water vapor mass below upper limit of Earth cloud cover estimated through Earth brightness measurements 21 p3735 A66-39360  
 Airborne spectrozonal telephotometer used in calculation of photographic brightness coefficient of Earth surface 22 p3919 A66-40621  
 Brightness variation from center to limb for Sun in submillimeter and IR range calculated from some available models of solar atmosphere 24 p4278 A66-42708

**BRIGHTNESS DISCRIMINATION**  
 Brightness discrimination and brightness contrast of human and animal eyes in suprathreshold luminance difference 04 p0461 A66-13791  
 Interpretation of some particular features in brightness distribution of twilight sky 06 p0876 A66-16554  
 Interpretation of some particular features in brightness distribution of twilight sky 14 p2289 A66-28226  
 Ruby phosphorescence under intense optical excitation, inferring possible recombination characteristics from initial brightness decay 15 p2558 A66-28607  
 Luminescence in December 1964 lunar eclipse, noting brightness measurement results in Mare Nubium region 16 p2800 A66-30644  
 Oscillatory component in solar granulation continuum brightness fluctuations, secondary maxima in temporal autocorrelation functions and power spectra 17 p2996 A66-31920  
 Solar active region analysis at radio frequencies, using fan or pencil beam scanning and superposition of wide beam transit curves 17 p3007 A66-33083  
 Lunar occultation and identification of MSH 19-27 radio source, noting computer analysis of brightness distribution 18 p3225 A66-33549  
 Increment threshold of vision cannot be used as reliable index of visual brightness due to variable and complex relation 20 p3504 A66-36947  
 Effect of color and brightness contrast, direction of contrast and contrast values on legibility of circular dial 21 p3701 A66-39420

**BRILLOUIN EFFECT**  
 Use of Brillouin scattering for optical beam modification, spatial distribution of

acoustic energy and coherent sound of great intensity 03 p0376 A66-12421  
 Brillouin scattering in liquids examining velocity, frequency and lifetime of thermally excited hypersonic sound waves, using laser light sources 03 p0376 A66-12422  
 Stimulated Brillouin and Raman scattering in gases, discussing sound velocity calculation from frequency shift and argon, hydrogen and nitrogen 04 p0531 A66-13981  
 Molecular anisotropy of propagation of intense light beam, noting Raman and Brillouin effects 05 p0696 A66-15106  
 Brillouin scattering of light by phonons and phonon maser in derivation of conservation theorems from basic equations 07 p1045 A66-18397  
 Forced Mandelstam-Brillouin scattering in gases, determining hypersonic velocity for three gases 09 p1408 A66-20770  
 Gas spectroscopy of laser-induced stimulated Brillouin effect in high pressure oxygen 11 p1715 A66-23432  
 Brillouin scattering by gases as experimental test of kinetic theory away from hydrodynamic regime 12 p1917 A66-24585  
 Coupled wave formalism, giving unified description of parametric down conversion of light, stimulated Brillouin and Raman effects, etc, stressing exponential character of gain 13 p2132 A66-26156  
 Discrepancy between calculated and experimental values for Raman gain in pulsed laser suggests higher energy distribution due to light trapping or Brillouin scattering 13 p2096 A66-26157  
 Interaction between stimulated Brillouin and Raman scattering in carbon sulfide, using optical resonator and laser beam 13 p2097 A66-26162  
 Stimulated Brillouin scattering in anisotropic media, showing excitation and propagation of stimulated phonons at radio frequencies 13 p2097 A66-26163  
 Multiple stimulated Brillouin emission exhibited by liquids exposed to pulsed ruby laser, noting scattering events, Stokes orders identification and iteration mechanism 13 p2097 A66-26164  
 Stimulated Brillouin scattering in quartz analyzed, noting amplification, Stokes wave generation and ruby gain 13 p2097 A66-26165  
 Dispersion and absorption of hypersonic waves analyzed by examining Brillouin scattering as function of scattering angle 13 p2133 A66-26167  
 Forced Mandelstam-Brillouin scattering in gases, determining hypersonic velocity for three gases 14 p2341 A66-27305  
 Dispersion relations for waves propagating along warm homogeneous isotropic plasma columns immersed in dielectric medium 15 p2549 A66-28713  
 Scattered light spectrum of thermal sound waves used to provide velocity and absorption data about hypersonic waves in several liquids 16 p2745 A66-30300  
 Stimulated Brillouin scattering from nitrogen and methane using giant pulse laser, noting convergence angle of backscattered beam sound, velocity measurement, etc 17 p2961 A66-32627  
 Stimulated Brillouin scattering in ferroelectric triglycine sulphate crystals and Rochelle salt exhibiting second-order phase transition, measuring scattering threshold as temperature function 20 p3620 A66-37770  
 Brillouin scattering spectra of crystalline quartz, fused quartz and Pyrex glass, noting acoustic modes in crystalline spectrum 23 p4114 A66-41628

**BRILLOUIN FLOW**  
 SA ELECTRON BEAM  
 Power flow of cyclotron modes propagating in waveguide filled with cold collisionless axially magnetized plasma studied by Brillouin diagram 20 p3612 A66-38398

**BRILLOUIN ZONE**  
 Fermi surface shape and size determination and thermoconductivity and conduction electron properties in metals 18 p3155 A66-34135  
 Optical absorption edges with nearly parallel bands of aluminum analyzed for all polyvalent metals with simple structures 19 p3401 A66-36391  
 Energy levels and interband oscillator

strengths of antimony calculated in Brillouin zone by pseudopotential method, predicting polarization effects and spin-orbit splittings 19 p3446 A66-36392

#### BRISTOL-SIDDELEY BS-53 TURBOFAN ENGINE

Recent developments in vectored-thrust Pegasus turbofan engine used in V/STOL subsonic strike fighters 04 p0573 A66-13931

#### BRISTOL-SIDDELEY OLYMPUS 593

##### TURBOJET ENGINE

Concord SST propulsion system, discussing thrust, flight requirements, medium compression ratio straight jet engine, intake, exhaust, etc 12 p1935 A66-23706

Olympus 593 B engine design and characteristics for Concorde application 13 p2172 A66-25564

Concorde supersonic transport aircraft propulsion, fuel supply and storage systems 22 p3848 A66-40415

#### BRITTLENESS

##### SA EMBRITTLEMENT

##### SA HARDNESS

Brittle fracture paths completely predictable and those predictable after initial random propagation 01 p0152 A66-10378

Irreversible tempering brittleness of spring steel with Mn, Cr, Si and C 01 p0086 A66-10452

Mechanical proof test used to reduce variability and screen out weaker elements of brittle materials with widely scattered strength values 03 p0436 A66-12754

Fracture of brittle bodies with cracks subjected to tension and compression 03 p0441 A66-13291

Critical loads causing brittle-rupture equilibrium cracks that develop near elliptical holes in bodies that remain elastic up to fracture 03 p0441 A66-13298

Synthesis and fabrication methods for intermetallic carbides, borides, beryllides, nitrides and silicides, decreasing susceptibility to brittle fracture 07 p1051 A66-18298

Brittle fracture in ceramic materials, noting Griffith theory on crack propagation, plastic deformation occurrence, stress distribution effect, etc 07 p1054 A66-18499

Plastic properties of brittle materials analyzed by hydrostatic pressure, using double ring, calculating radial pressure on sample, between rings, etc 08 p1305 A66-18600

Deformation of double ring used in compression tests to study stress-strain state of brittle and ceramic materials 08 p1313 A66-19438

Front and zone of fractures originating in brittle elastic body under influence of high pressure arising on wall of cavity within body 08 p1313 A66-19475

Gas-bearing facilities for determining axial stress-strain and lateral strain of brittle materials to high temperature 08 p1242 A66-19722

High-chromium ferrite steel Kh25T brittleness at 475 degrees C investigated, using neutron structural analysis 09 p1391 A66-20872

Hydrogen effect on strength, plasticity and brittleness of metals with fcc lattice at various temperatures and hydrogen concentrations 12 p1894 A66-23763

Niobium addition effect on mechanical properties of steel, noting improvement of tensile strength and cold brittleness threshold decrease 12 p1897 A66-24899

Quenching and slow-cooling effects on ductile-brittle bend-transition temperature of chromium wire 13 p2107 A66-25587

Propagation of brittle cracks in body under compression, discussing theory of resistance of brittle bodies to compression 13 p2196 A66-25629

Approximation method for determining limit and breaking load for infinite brittle body weakened by plane crack, noting crack propagation 13 p2203 A66-26423

Effect of stress concentrations on load carrying capacity of brittle materials of nonuniform microstructure, considering iron plates with holes 13 p2205 A66-26441

Self-sustained fracture of stressed brittle body with assessment of fragment mean dimension 14 p2399 A66-27594

Brittle materials failure theory for cases where presence of plane deformation or plane stressed state is assumed, using Griffith theory 16 p2822 A66-31510

Ceramic structural design, discussing laboratory specimen design, brittle material strength, boundary conditions, statistical parameters, etc 18 p3125 A66-33733

Joint strength analysis for brittle materials 22 p3927 A66-40283

Self-sustained fracture of stressed brittle body with assessment of fragment mean dimension 24 p4291 A66-42734

#### BROADBAND AMPLIFIER

Disk and parasitic resonance of broadband and small circulators for UHF and VHF 01 p0040 A66-10551

Standard amplifier building blocks used in systems design, stressing manufacture by silicon integrated circuit processes 02 p0203 A66-11924

Broadband tunable tunnel diode oscillator in waveguide mounting, noting role of variable capacitor 03 p0339 A66-12450

Octave-broadband tunnel-diode amplifier design with added shunt capacitance and stabilizing circuit 05 p0643 A66-14573

Traveling wave transistor for HF medium-power application, device is also broadband amplifier whose circuit uses distributed elements 06 p0853 A66-16645

Tunnel diode series inductance and stray capacitance effect on gain and bandwidth of broadband reflection type amplifiers 07 p1007 A66-17509

Wideband DC amplifier operating with double full-wave signal transformation 11 p1664 A66-22621

Broadband X to K band varactor frequency doubler, noting efficiency increase by replacing variable resistance element with varactor 12 p1832 A66-23908

Tunnel diode amplifier for broadband radio communication using integrated circuits, noting noise figure, stability and saturation effect 12 p1840 A66-24623

Solid state tuned RF radiometric receiver using low-noise broadband tunnel diode amplifier 14 p2290 A66-27063

Broadband slotted cone antenna exhibiting multioctave bandwidth properties in UHF-VHF range 14 p2256 A66-27912

Relation between transistors and distortion in line amplifiers used for repeaters or multicouplers, noting generation of harmonics and intermodulation products, distortion sources in transistors, etc 14 p2262 A66-28381

General broadband matching for passive and active 1-port load impedance and application to tunnel diode amplifier 15 p2464 A66-29321

Broadband semiconductor diode frequency multipliers, examining performance, noise theory, realization and frequency multiplication mechanism 17 p2890 A66-32904

Broadband semiconductor diode frequency multipliers, examining performance, noise theory, realization and frequency multiplication mechanism 18 p3075 A66-33564

Solid state millimeter wave receivers for space vehicle environments, discussing integral mixer IF amplifiers, oscillators and varactor multipliers 22 p3879 A66-40733

VHF power modulator devised to give broadband output signals within frequency range of 66 to 184 megacycles at 2.5 mw and 50 ohms impedance 24 p4184 A66-42644

SA POTASSIUM BROMIDE

SA SILVER BROMIDE

Concave-convex growth spirals due to screw dislocation in nickel bromide 15 p2563 A66-28730

BROMINE

Photochemical studies of oxygen-ozone and carbon dioxide equilibria with bromine UV lamp 04 p0473 A66-13397

BROMINE COMPOUND

Cis-and trans-beta-bromostyrene reaction with lithium diphenylphosphide in tetrahydrofuran producing cis-and trans-beta-styryldiphenylphosphine, discussing proton magnetic resonance and configuration retention 14 p2232 A66-27498

Electrical conductivity variation with temperature of chlorine and bromine trifluoride, noting maximum conductivity

below freezing point of chlorine trifluoride 23 p4118 A66-41241

#### BROWNIAN MOTION

Self-field electron kinetic reaction to electromagnetic propagation in three-fluid Brownian plasma 01 p0110 A66-10330

Dirichlet problem solved by probability density for Brownian particle, using Fredholm integral equation 01 p0094 A66-10730

Book on kinetic theory of simple liquids including equilibrium properties, time-dependent system, Markov processes, Brownian motion, transport coefficients, etc 08 p1209 A66-19461

Optimization of five second and third-order systems with saturating and relay controllers and with random Brownian Motion input 11 p1674 A66-22222

Dirichlet problem solved by probability density for Brownian particle, using Fredholm integral equation 24 p4232 A66-42740

BRUDERHEIM METEORITE

Xenon, radiogenic Xe 129R and krypton contents and xenon and krypton isotopic composition of Bruderheim meteorite 08 p1297 A66-19401

Thermal history of Bruderheim meteorite showing lost of 90 percent radiogenic argon 40 20 p3651 A66-37591

BUBBLE

Size distribution law for dimensions of gas bubbles formed during cavitation in turbulent flow of liquid 06 p0870 A66-16191

Numerical analysis of collapse of spherical bubble in compressible fluid including surface tension, viscosity and adiabatic compression of gas within bubble [ASME PAPER 65-FE-16] 06 p0870 A66-16211

Terminal rise velocity of small distorted gas bubbles in liquid of small viscosity 06 p0874 A66-17001

Violent bubble behavior in liquids contained in vertically vibrated tanks caused by water hammer type of resonance [AIAA PAPER 66-86] 06 p0875 A66-17091

Bubble coalescence in longitudinally vibrated liquid column 07 p1025 A66-18171

Behavior of individual cavitation bubbles in cavitating flows of water and liquid Mercury, using two-dimensional Plexiglas venturi 07 p1025 A66-18171

Contact area of boiling bubbles observed through electroconductive glass/heating surface/into tank 08 p1320 A66-19550

Time variation in boiling heat transfer caused by bubble generation 08 p1320 A66-19550

Saturated vapor spherical bubble collapse in uniformly subcooled liquids 08 p1320 A66-19550

Cavitation strength of distilled water and distribution of cavitation nuclei, accounting for pressure threshold variance 11 p1688 A66-22601

Devitrification of glass around collapsed bubbles in tektites, noting formation mechanism 11 p1773 A66-22961

Relationship between shock wave phenomena during collapse of cavitation bubbles in water and temperature and gas content of water 13 p2060 A66-25091

Size distribution law for dimensions of gas bubbles formed during cavitation in turbulent flow of liquid 13 p2064 A66-25911

Conditions under which gas bubbles arise in organs and physiological fluids of living organism during pressure drop 13 p2011 A66-26571

Motion of gas bubble in weightless viscous fluid with temperature gradient 14 p2273 A66-26786

Bubble boiling model of nucleation and growth of bubble on heating surface 14 p2411 A66-27138

Violent bubble behavior in liquids contained in vertically vibrated tanks caused by water hammer type of resonance [AIAA PAPER 66-86] 16 p2685 A66-30911

Delay time for bubble formation associated with heating surface thermal layer formation in water moderated reactors 17 p2956 A66-32271

Mass transfer in gas-liquid dispersions noting effect of flow rate, bubble size etc 18 p3266 A66-34736

Dimensional and experimental analyses of

helium bubble motion in liquid  
 nitrogen 20 p3545 A66-37104  
 Munroe jet formation when small cavity or bubble in liquid is subjected to impact or shock 20 p3546 A66-37804  
 Relationship between shock wave phenomena during collapse of cavitation bubbles in water and temperature and gas content of water 21 p3723 A66-38516  
 Linear flow equation motion of fluid with suspended impurities, noting that under certain assumptions velocity fields can be described by family of potential functions 21 p3729 A66-39448  
 Marangoni flow, motion of liquid surfaces under influence of surface tension gradients, explaining high fluxes obtained in boiling heat transfer 22 p3999 A66-40303  
 Viscosity, surface tension and inclination angle effect on motion of long bubbles in closed tubes 22 p3900 A66-40388  
 Two-dimensional bubble contours in steady state turbulence-free flow of ideal incompressible fluid, obtaining solution for all internal pressures 24 p4232 A66-43064  
**BUBBLE CHAMBER**  
 Ruby laser with concentric resonator as illumination source of bubble chamber 01 p0084 A66-11189  
 Laser simulated nucleation in bubble chamber, comparing sensitivity with radioactively stimulated nucleation 10 p1557 A66-21583  
 Nucleate saturated pool boiling over horizontal plate, noting bubble development relation to boiling through heat exchange 12 p1973 A66-23528  
 Ruby laser with concentric resonator as illumination source of bubble chamber 12 p1890 A66-24010  
**BUCKLING**  
 SA COMPRESSION BUCKLING  
 SA CREEP BUCKLING  
 SA ELASTIC BUCKLING  
 SA EULER BUCKLING  
 SA SHELL STABILITY  
 SA STRAIN  
 SA STRESS  
 SA THERMAL BUCKLING  
 Small amplitude vibrations of rectangular panel relative to static buckled configuration 02 p0301 A66-12164  
 Linear small deflection theory and statistical analysis in dynamic buckling of thin cylindrical shell under axial impact [ASME PAPER 65-APMW-17] 04 p0592 A66-14218  
 Nonconservative loading on linear two-degree of freedom elastic system, discussing damping effects on equilibrium stability [ASME PAPER 65-WA/APM-17] 05 p0777 A66-15439  
 Torsional instability of cantilevered bars, describing effects of distributed nonconservative compressive load at free end [ASME PAPER 65-WA/APM-19] 05 p0777 A66-15441  
 Collapse of pressurized axially stiffened thin cylinder 06 p0967 A66-16933  
 Inextensional buckling of thin conical shell under axial compression [AIAA PAPER 66-125] 07 p1148 A66-18461  
 Buckling loads of reinforced cylindrical shells, discussing size and placement of stiffening members 10 p1614 A66-21391  
 Torsional instability of cantilevered bars, describing effects of distributed nonconservative compressive load at free end [ASME PAPER 65-WA/APM-19] 12 p1961 A66-23979  
 Linear small deflection theory and statistical analysis in dynamic buckling of thin cylindrical shell under axial impact [ASME PAPER 65-APMW-17] 12 p1961 A66-23980  
 Nonconservative loading on linear two-degree of freedom elastic system, discussing damping effects on equilibrium stability [ASME PAPER 65-WA/APM-17] 12 p1961 A66-23983  
 Buckling, postbuckling and imperfection sensitivity of cylinders and shells 14 p2404 A66-27987  
 Buckling characteristics of eccentrically stiffened cylindrical shells under hydrostatic pressure loading and vibration, buckling and

flutter characteristics of stiffened flat plates [AIAA PAPER 65-370] 15 p2610 A66-29285  
 Energy method for analysis of lowest mode symmetrical buckling of thin shell shallow spherical caps and cylindrical arches under blast loading 15 p2610 A66-29291  
 Mechanical strength of plastic buckling of sheet metals under lateral hydraulic loads 15 p2510 A66-29778  
 Local buckling in curved two-dimensional manifolds, detailing experimental exposition of phenomenon in stability and deformation of shallow spherical shell 17 p3021 A66-32005  
 Torsion of slit overlapped thin walled tubes, noting change in slope at point of first instability in torque-twist relationship 18 p3253 A66-33802  
 Space-frame radome design and buckling analysis for wind and deadweight static load using digital computers 18 p3095 A66-34299  
 Buckling, postbuckling and imperfection sensitivity of cylinders and shells 22 p3992 A66-40337  
 Postbuckled equilibrium configurations of axially compressed circular cylindrical shell determined from large deflection theory and principle of stationary potential energy 22 p3993 A66-40340  
 Initial buckling under shear stress of long clamped plate with parallel edges reinforced by stiffener mesh, noting flexural and torsional rigidity of stiffeners 22 p3995 A66-40495  
**BUDGET**  
 S ENERGY BUDGET  
**BUFFALO AIRCRAFT**  
 S DE HAVILLAND DHC-5 AIRCRAFT  
**BUFFER**  
 Very high input impedance buffer circuit using field effect transistors for voltage sensing in high impedance analog simulator 17 p2886 A66-32381  
 Buffering capacity of substances liberated by Chlorella expressed in terms of van Slyke buffer index, noting changes in pH 17 p2880 A66-32831  
**BUFFER STORAGE**  
 Buffer storage in digital radar smoothing irregular output data flow, noting decreasing bandwidth requirements 11 p1654 A66-22656  
**BUFFETING**  
 HF response of shell-type structures to buffeting aerodynamic environment [AIAA PAPER 66-81] 06 p0968 A66-17086  
 Theoretical determination of buffeting limits of wings, using boundary layer theory, obtaining Reynolds number effect on location of buffeting limits 10 p1479 A66-21377  
 Transonic buffeting effects on hammerhead shaped payloads analyzed, using power spectral techniques and wind tunnel tests 20 p3672 A66-38170  
**BULK MODULUS**  
 Plastic deformation in body under uniform pressure, establishing necessary condition for existence of uniform stressed state in inhomogeneous body 07 p1142 A66-17261  
 Continuous fluid film self-acting cylindrical journal bearing theory and design data, introducing isothermal bulk modulus into lubrication equations [ASLE PREPRINT 65AM 3A2] 07 p1039 A66-18285  
 Spherically divergent stress pulses in linear viscoelastic solids, measuring change in shape of polyethylene polymethyl methacrylate and polystyrene blocks 09 p1393 A66-20662  
 Overall elastic moduli of inhomogeneous system composed of various solid phases firmly bonded together at arbitrary concentration 17 p3029 A66-32791  
**BULKHEAD**  
 Hot drape forming of torus and semitoroidal bulkhead segments from aluminum alloys [SAE PAPER 660290] 15 p2511 A66-29831  
**BULLPUP MISSILE**  
 Value analysis as cost reduction factor, using production of Bullpup A and B missiles as example 11 p1711 A66-23060  
**BUOY**  
 S FLOTATION SYSTEM  
**BUOYANCY**  
 SA RAYLEIGH NUMBER  
 Axial temperature variation in turbulent buoyancy-controlled diffusion

flame 08 p1319 A66-19202  
 Turbulent heat transfer effect on gas stratification in field of Archimedes forces 12 p1979 A66-24429  
 Streamlines in Benard convection cells induced by surface tension and buoyancy 15 p2478 A66-29247  
 Buoyancy and magnetohydrostatic stability of magnetic body immersed in magnetizable fluid 16 p2749 A66-31757  
 Buoyancy in convecting ideal dissociating gas analyzed, obtaining solution for one-dimensional unsteady free mixing 18 p3103 A66-34931  
 Fluidmagnetic buoyancy effects in ferrohydrodynamic /FHD/ flows and implications of Ernschaw levitation theorem 23 p4057 A66-41885  
**BURGER EQUATION**  
 Two physical-space and two spectral solutions of Burger equation which are exact, viscous and nonsteady 18 p3103 A66-34930  
**BURNER**  
 SA AFTERBURNER  
 Hydrogen/oxygen and hydrogen/air flame temperature experiments on porous fuel flame burner 20 p3680 A66-38042  
**BURNING PROCESS**  
 S COMBUSTION  
**BURNING RATE**  
 SA FLAME PROPAGATION  
 Nonuniqueness of stationary solutions to system of equations in burning theory with piecewise invariable reaction rate and thermoconductivity and diffusion coefficients 06 p0970 A66-16345  
 Electronic timer for rocket, controlling duration of burning time 08 p1188 A66-18616  
 Premixed flames of trimethylaluminum vapors and oxygen stabilized at reduced pressure, analyzing stability region, burning velocity and emission spectrum 08 p1318 A66-19199  
 Combustion of solid rocket propellants, using potassium nitrate as oxidizer and phenol formaldehyde as fuel 08 p1319 A66-19201  
 Servomechanism measurement of solid propellant burning rate 08 p1227 A66-19697  
 Book on quasi-stationary conditions in open systems with short reaction times in solid propellant rocket engines 09 p1432 A66-20487  
 Hybrid rocket engine performance noting stable fuel burning, burning rate, thrust modulation, ignition delay and use of tricomponent fuels 10 p1594 A66-21715  
 Ballistic performance change in spinning rocket motors attributed to internal gas dynamics and combustion effects, noting grain geometry influence 10 p1590 A66-21945  
 Nonuniqueness of stationary solutions to system of equations in burning theory with piecewise invariable reaction rate and thermoconductivity and diffusion coefficients 11 p1785 A66-22340  
 Combustion of composite ammonium perchlorate based propellants near extinction pressure, noting burning rate parameters 13 p2171 A66-25181  
 Combustion of hydrazine droplets burning in hydrazine vapor investigated via suspended droplet technique [AIAA PAPER 65-355] 14 p2370 A66-27413  
 Quasi-steady spherically symmetric burning of monopropellant liquid droplet in stagnant atmosphere 14 p2412 A66-27560  
 Organic flame temperatures and burning velocities at various fuel-air ratios measured, noting band intensity, effect of diluents, etc 14 p2413 A66-27723  
 Schlieren photographs of spark ignition in turbulent gas mixture flows and analysis of ignition delay and burning velocity 15 p2616 A66-29069  
 Burning rate equation and constant volume burning of solid propellant to determine ballistic properties 15 p2617 A66-29606  
 Stabilization of lifted diffusion flame in turbulent methane jet flow field and measurements of gas flow velocity, turbulence and gas composition 15 p2479 A66-29608  
 Liquid hydrazine decomposition process to determine what chemical or physical changes may be occurring that cause breaks in burning rate/ pressure curves, measuring flame temperature and light

emission 15 p2570 A66-29610  
Weightlessness effect on flame ignition, burning rate, self-extinguishment, etc 16 p2825 A66-30487  
Effect of spin on internal ballistics of solid propellant motor  
[AIAA PAPER 66-523] 16 p2791 A66-31485  
Five halogenated hydrocarbons and effect on flame speed of  
methane 17 p3032 A66-31881  
Formula derivation for acoustic conductivity of combustion surface of condensed system 17 p3033 A66-31896  
Burning properties of oxygen-nitrogen and oxygen helium spacecraft atmospheres determined for increasing safety of crew members in case of emergency 17 p3033 A66-32147  
Pressure dependence of burning rate of stoichiometric fuel-oxidizer mixtures 17 p3036 A66-32825  
Burning velocity in turbulent stream of homogeneous mixture 17 p3036 A66-32826  
Combustion rate of ammonium perchlorate-polystyrene and ammonium perchlorate-Plexiglas mixtures related to mixture ratio 18 p3260 A66-33720  
Computer programs for combustion rates of hydrogen-air mixture 18 p3063 A66-33830  
Saturn IVB vehicle constraints noting burning time, associated design problems, performance requirements, propellant management, etc  
[SAE PAPER 660441] 18 p3245 A66-33889  
Water vapor effects on burning rate of aluminum and magnesium wires at atmospheric pressure  
[WSCI 66-4] 18 p3264 A66-34421  
Propellant composition influence on finite-amplitude axial wave mode instability in solid propellant rockets  
[AIAA PAPER 66-600] 18 p3161 A66-34431  
Cinephotomicrographic studies of metallized fuel-rich propellants with high aluminum powder content, discussing composition, burning rates, etc  
[AIAA PAPER 66-616] 18 p3162 A66-34433  
Ignition pressure transient of rocket motor, discussing initial ignition event, flame spreading and final chamber filling, convective heating effect on burning rate, etc  
[AIAA PAPER 66-666] 18 p3165 A66-34449  
Combustion rate in simultaneous heterogeneous-homogeneous reactions on particle surfaces of catalytic agents added 18 p3265 A66-34550  
Mathematical model of combustion instability in solid propellant rocket engines, noting system dynamic behavior, appearance of limit cycle and effect of large amplitude oscillations on burning rate 20 p3627 A66-36889  
Digital computer analysis of kinetic equations for CO burning in presence of hydrogen 20 p3679 A66-37702  
Burning rate anomalous dependence on particle size for ammonium perchlorate-polystyrene mixture 20 p3679 A66-37703  
Reaction rates of decomposition burning of small spheres of liquid hydrazine 20 p3626 A66-38043  
Distance/time records, drag coefficients and Reynolds numbers of single freely-falling drops of pentane, heptane and benzene burning in cold atmosphere 20 p3626 A66-38044  
Equilibrium control and burning rate control of solid propellant in heat exchanger 20 p3629 A66-38155  
Hybrid rocket combustion mechanism, burning rate, mass transfer coefficient, throttling effects and grain design  
[AICE PREPRINT 34C] 22 p3970 A66-39877  
Ignition and controlled burning of liquid oxygen-liquid methane mixture, evaluating use as rocket monopropellants  
[AICE PREPRINT 28E] 22 p3969 A66-39880  
Japanese Aeronautical Research Institute Solid Rocket and Special Small Rocket projects, examining propellant design for performance requirements 23 p4132 A66-41418  
Erosive burning in rocket engines of radial burning type, using polyurethane/ammonium perchlorate base propellant grains, examining flow channel constriction 23 p4121 A66-41433

Halides used as burning rate depressants on combustion stability of polyurethane/ammonium perchlorate base propellants, examining acoustic instability 23 p4119 A66-41435  
Analog computation of minimum fuel trajectories with soft landings in uniform gravitational field, using Pontryagin maximum principle to reduce two-point BVP with optimal controllers 23 p4133 A66-41618

## BURNOUT

Torque-free precession of spin stabilized spacecraft, showing thrust misalignment as cause for final burnout impulse 16 p2810 A66-30903

## BURST

## SA METEOR BURST

## SA RADIO BURST

Thin metal diaphragms in shock tubes, discussing bursting characteristics and petalling behavior  
[ASME PAPER 65-WA/MET-16] 05 p0661 A66-15683

Simultaneous error correction and burst error detection, using binary linear cyclic codes 09 p1347 A66-20643

## BUTADIENE

Statistical variability of ultimate properties for eight samples of SBR-sulfur gum vulcanizates 05 p0706 A66-15460

## BUTYLENE

## S ISOBUTYLENE

## S POLYISOBUTYLENE

## BY-PASS ENGINE

High bypass high-pressure ratio cycles in turbofans for increased subsonic transport range  
[AIAA PAPER 65-795] 03 p0415 A66-12561

Optimum design of by-pass engine with exhaust and by-pass flow mixing, noting thrust and efficiency 04 p0572 A66-13536

Engine technology including higher turbine operating temperatures, high speed fan and nacelle design, increased by-pass ratio and improved power plant efficiency 06 p0943 A66-16924

Dual flow engines with high by-pass ratios, considering engine process parameter effects, fuel consumption, efficiency, etc 06 p0944 A66-17025

Intake requirements and cold efflux of high-bypass turbofan engines can be turned to advantage by integrated installation arrangements which reduce long-haul operating costs 09 p1434 A66-20392

High by-pass turbofan for business aircraft, comparing jet propulsion system efficiency with fan engines, cost factors and market potentials  
[SAE PAPER 660221] 13 p2173 A66-26400

Bypass engine development from conventional gas turbine to ducted-fan and aft-fan engine, noting principle of afterburning 14 p2373 A66-27014

Exhaust mixing process in Rolls-Royce bypass jet engines, noting stream mixing in common duct with corrugated metal interface on inlet side 17 p2990 A66-32079

High bypass high-pressure ratio cycles in turbofans for increased subsonic transport range  
[AIAA PAPER 65-795] 19 p3279 A66-36490

## C-5 AIRCRAFT

C-5A aircraft design load criteria for landing gear of large aircraft that must operate from semi-improved airfields  
[AIAA PAPER 65-711] 01 p0013 A66-10948

Handling qualities research for C-5A, noting inconsistencies in magnitudes of parameters and parameters to be specified  
[AIAA PAPER 65-740] 03 p0317 A66-12548

Lockheed C-5A military jet transport design 11 p1636 A66-22332

New high by-pass ratio turbofan engine for C-5A subsonic transport aircraft  
[SAE PAPER 660323] 15 p2428 A66-29843

Lockheed C-5 quantitative maintainability program and application to air-vehicle utilization and cost 20 p3495 A66-37891

Uniform design process AFSCM 375-5 implementation and operating personnel interrelationships in aircraft

industry 20 p3685 A66-3792

## C-BAND

C-band weather radar AVQ-10 incorporating tunnel diode amplifier and p-i-n solid state protector switch 07 p1008 A66-1772

TWT delivering CW power in L, S, C and X-band designed for space environment considering size, weight, voltage, etc, and comparing klystrons, amplifiers, circuit design, etc  
[AIAA PAPER 66-308] 12 p1844 A66-2472

Temperature stable high power C band digital many-phased-array-radar phase shifter 13 p2035 A66-2552

## C-141 AIRCRAFT

Fail-operative stability augmentation system for C-141 jet transport aircraft yaw control axis, using triple redundant sensor and signaling 01 p0011 A66-1062

C-141 aircraft automatic navigation system, self-contained and with redundant modes of operation, ensures all-weather mission reliability 07 p1078 A66-1782

## C-142 AIRCRAFT

Acoustic fatigue testing of 20 fuselage panels of XC-142A VTOL/STOL transport aircraft, using simulated propeller noise 01 p0151 A66-1012

Landing gear design challenges for V/STOL service XC-142A and relative success/failure  
[SAE PAPER 650843] 01 p0012 A66-1082

Structural dynamics of XC-142A tilt-wing VTOL aircraft including flutter, vibration, environmental acoustics, etc  
[AIAA PAPER 65-790] 03 p0318 A66-1252

XC-142A tri-service V/STOL aircraft specifications, considering control and transmission systems and flight test results 03 p0321 A66-1282

Thrust-control system on XC-142A tilt-wing aircraft considered in connection with structural design of aircraft hover, transition and acceleration  
[AIAA PAPER 65-769] 03 p0321 A66-1302

Flight controls of tilt wing XC-142A aircraft, noting mechanization and operation of wing and flap control system 06 p0809 A66-1682

## CABIN ATMOSPHERE

## SA PRESSURIZED CABIN

## SA SPACE CABIN ATMOSPHERE

Spacecraft cabin atmosphere, comparison of pure oxygen with two-gas atmosphere 06 p0814 A66-1592

Supersonic aircraft artificial atmosphere, discussing linear relationship between imperceptible perspiration and ambient water vapor pressure 06 p0815 A66-1602

Low humidity and dehydration in jet fuselage, noting water metabolism and effect of various beverages 10 p1491 A66-2132

Pressure cabin design and utilization, noting relation between air speed and environmental temperature on kinetic heating, contamination of cabin atmosphere, pressurization control, sealed cabin advantages, etc 10 p1492 A66-2212

## CABLE

## S COAXIAL CABLE

## S TRANSMISSION LINE

## CABLE FORCE RECORDER

Rotating orbiting cables, determining lateral vibration in orbital plane via mathematical model analysis  
[AIAA PAPER 66-98] 06 p0962 A66-1622

## CADMIUM

## SA NICKEL-CADMIUM BATTERY

Photovoltaic effect in thin ternary semiconductor of Cd-Te-Hg 07 p1092 A66-1722

Identification of mass series and mass values in Fermi surface of cadmium cyclotron resonance compared with results for zinc 10 p1581 A66-2172

## CADMIUM ALLOY

Superconducting transition temperatures of Cd-Hg alloys covering complete composition range, considering effect of ordering 07 p1109 A66-1842

Electric Ag-CdO contacts obtained by internal high temperature oxidation method 08 p1239 A66-1892

Indium-cadmium alloy superconducting transition temperatures for varying compositions, noting electronic structure 13 p2169 A66-2822

Semiconductor lasers with high power efficiency obtained via electron beam excitation on crystals of mixed cadmium-sulfide-selenide alloy 16 p2720 A66-31533

Chemical activities of cadmium and magnesium in binary Mg-Cd alloys based on vapor pressure measurement by Knudsen effusion method 18 p3121 A66-33729

**CADMIUM ANTIMONIDE**

Optical constants of CdSb determined for photon energies up to 2 eV from reflectivity measurements and Kramers-Kronig dispersion relation 02 p0275 A66-11967

Electrical conductivity, Hall effect and thermoelectric power as function of temperature in CdSb single crystals strongly doped with silver 02 p0275 A66-11968

Magnetoresistance effect on p- and n-type cadmium antimonide single crystals for various arrangements of electric and magnetic fields 11 p1756 A66-23017

Gold and silver doping effect on Hall effect, electroconductivity thermal emf and conductivity of CdSb 17 p2984 A66-33145

**CADMIUM COMPOUND**

Temperature dependence of electric conductivity and Hall effect of single crystal cadmium tin arsenide 01 p0126 A66-11026

Stationary and kinetic methods determining parameters of sensitizing recombination r-center in high resistivity monopolar photoconductors 02 p0273 A66-11718

Propagation of LF helicon waves in strongly doped cadmium arsenide and indium antimonide 03 p0410 A66-12944

Liquids used in manometers for pressure and pressure difference measurement in rarefied gases, considering cadmium boron tungstate, polymethylsiloxanes, etc, noting lack of toxicity, low viscosity, etc 03 p0371 A66-13204

Diamond-like semiconductors in glassy state, investigating structure and characteristics of cadmium-germanium-arsenide 07 p1106 A66-18383

P-type cadmium tin arsenide crystals, plotting temperature dependences of specific electroconductivity, Hall coefficient and thermal electromotive force 08 p1277 A66-19622

Electrical capacity of galvanic cell and crystal habit and surface property effects on porous cadmium hydroxide electrode electrochemical properties 08 p1171 A66-19644

Cadmium and indium thiogermanates, properties and synthesis 14 p2361 A66-27339

Conduction band in cadmium arsenide semiconductor, measuring transport phenomena 15 p2560 A66-28635

Physical properties of thin films of CdS and CdSe formed by vacuum deposition analyzed as function of deposition and processing conditions 16 p2782 A66-31422

Optical and magnetooptical phenomena in CdSnAs sub 2, discussing reflection and absorption spectrum, optical activity, double refraction, dielectric constant, etc 16 p2788 A66-31775

P-type cadmium tin arsenide crystals, plotting temperature dependences of specific electroconductivity, Hall coefficient and thermal electromotive force 17 p2984 A66-33136

Sensitivity of cadmium sulfate-based photovoltaic cells in short wave region 21 p3798 A66-38915

Semiconducting properties of cadmium tetraphosphide 24 p4253 A66-42361

**CADMIUM FLUORIDE**

Laser regime with giant pulses generated in dysprosium doped cadmium fluoride under continuous pumping by xenon lamps, obtaining Q factor modulation by rotating prism 08 p1234 A66-19376

Optical absorption and reflectivity of single crystals of strontium fluoride and cadmium fluoride in far UV 17 p2974 A66-31844

Effect of anomalous dispersion on stimulated emission spectrum of doped cadmium fluoride crystals 17 p2977 A66-32317

Laser regime with giant pulses generated in dysprosium doped cadmium fluoride under continuous pumping by xenon lamps, obtaining Q factor modulation by rotating prism 18 p3119 A66-34178

**CADMIUM SELENIDE**

N-type conductive cadmium selenide single crystals investigated for heat treatment and Hall effects in selenium vapor 01 p0127 A66-11194

Interband Faraday rotation at liquid-nitrogen temperature in CdS-CdSe mixed crystals 02 p0274 A66-11722

Cadmium selenide thin film transistors /TFT/ where electron mobility values exceed bulk single crystal values 02 p0276 A66-11979

Electrical properties of cadmium selenide evaporated films prepared on substrates at various substrate temperatures 03 p0409 A66-12725

Cadmium sulfide and cadmium selenide, discussing optical absorption, energy band structure, effective band-masses and composition changes of crystals in polarized light 05 p0731 A66-14656

Cadmium sulfide and cadmium selenide recombination centers, discussing temperature dependence of electron capture cross sections 05 p0731 A66-14661

Exciton absorption lines and long wave intrinsic edges of single-crystal CdSe and CdS at low temperatures 06 p0924 A66-16540

Forced emission from electron-excited cadmium selenide 10 p1544 A66-22174

Potential distribution in p-type selenium layer adjacent to n-type cadmium selenide in cut-off direction 11 p1757 A66-23231

Edge absorption of indium-doped cadmium in polarized light, noting exchange interaction between current carriers and Fermi level dependence on carrier concentration 12 p1929 A66-24449

Deposition of cadmium selenide films for transducers of electromagnetic energy to acoustic energy at microwave frequencies, noting use of multiple film assemblies 12 p1839 A66-24616

Cadmium sulfide and cadmium selenide, discussing optical absorption, energy band structure, effective band-masses and composition changes of crystals in polarized light 13 p2167 A66-25931

Cadmium sulfide and cadmium selenide recombination centers, discussing temperature dependence of electron capture cross sections 13 p2168 A66-25936

Laser oscillations in CdSe and CdS bombarded by fast electron beam 14 p2306 A66-27031

Laser-generation-type luminescence CdS-CdSe crystals exposed to double photon excitation from ruby laser 14 p2308 A66-27647

Exciton absorption lines and long wave intrinsic edges of single-crystal CdSe and CdS at low temperatures 15 p2569 A66-29987

CdSe-Au-Ge metal base transistor fabricated, based on fact that Ge-Au junction barrier is low and CdSe-Au junction is Schottky 16 p2660 A66-30615

Lattice vibrational properties of hexagonal CdSe 16 p2778 A66-31075

Expanded single crystal hetero-transitions in CdS-CdSe system 16 p2787 A66-31734

Distribution of recombination centers over energy levels of CdS-CdSe solid solutions 16 p2787 A66-31737

Forced emission from electron-excited cadmium selenide 19 p3441 A66-35788

Absorption, radiative recombination and photoconductivity of CdSe 19 p3444 A66-36035

Time-dependent response of polycrystalline cadmium selenide thin film transistor to transient high energy radiation 20 p3525 A66-37316

Spectral characteristics of two-photon optical excitation and light emission from CdSe semiconductor laser with modulated Q-factor 20 p3578 A66-37565

Edge absorption of indium-doped cadmium in polarized light, noting exchange interaction between current carriers and Fermi level dependence on carrier concentration 20 p3619 A66-37681

Light emission from semiconducting cadmium selenide crystals when not excited with photons, electron beam or tunneling, noting association with acoustoelectric field domain 20 p3620 A66-37767

Direct measurement of dispersion

properties of cadmium sulfide and CdS-CdSe crystals, using Obreimov-Fresnel diffraction method, growing crystals by synthesis 21 p3799 A66-38926

Spatial distributions of carrier concentration and internal field in cadmium selenide for various voltages, measuring conductivity and Hall coefficient 23 p4112 A66-41292

Failure mechanisms of CdS and CdSe thin film FETs noting volt-ampere characteristics, temperature, electrical stress and humidity effects 24 p4181 A66-42381

**CADMIUM-SILVER BATTERY**

**S SILVER-CADMIUM BATTERY**

**CADMIUM SULFIDE**

Space and time dependence of increased phonon population /amplitude of lattice vibration/ in amplifying cadmium sulfide crystal 01 p0122 A66-10575

Isothermal cross section of phase diagram of Zn-Cd-S and sulfide films 01 p0125 A66-10781

Moire patterns of two superposed cadmium sulfide crystals observed by Lang method of X-ray observation 01 p0126 A66-10968

Range formula calculation of neodymium ion concentration in two samples of CdS crystals after bombardment at 200 keV Nd ion energies 01 p0126 A66-10970

Indirect transition and temperature dependence of absorption limit in single crystal cadmium sulfide 01 p0126 A66-11006

Interband Faraday rotation at liquid-nitrogen temperature in CdS-CdSe mixed crystals 02 p0274 A66-11722

Capture and recombination levels in CdS single crystals examined from photoconductivity analysis 02 p0277 A66-12087

Effect of surface state of cadmium sulfide on fundamental absorption edge and fine structure obtained from gaseous phase in inert atmosphere 03 p0407 A66-12405

Vacuum deposition of cadmium sulphide ultrasonic transducers for generating longitudinal or linearly polarized shear waves 03 p0368 A66-12410

Beating effect of current oscillations in cadmium sulfide due to nonuniform illumination and indicating sinusoidal oscillations of different frequencies and comparable amplitude 03 p0408 A66-12453

Cuprous oxide-cadmium sulfide junction photocells enhanced in photosensitivity and rectifying properties by exposure to periods of light and darkness 03 p0413 A66-13190

CdS single crystal optical generator during excitation by ruby laser, discussing two-photon absorption coefficient at 300 degrees K for radiation flux densities 04 p0529 A66-13874

Recombination parameters in CdS determined from kinetics and IR quenching of photocurrent relative to available illumination 04 p0584 A66-14257

Two ohmic electrodes or one ohmic and one barrier electrode for current-voltage stable-negative characteristic of cadmium sulfide, noting IR radiation effects 04 p0568 A66-14351

Electron collision-ionization avalanches in cadmium sulfide crystal due to electric field intensities 04 p0570 A66-14489

Conductivity dependence of acoustoelectric effect in cadmium sulfide samples 05 p0731 A66-14653

Cadmium sulfide and cadmium selenide, discussing optical absorption, energy band structure, effective band-masses and composition changes of crystals in polarized light 05 p0731 A66-14656

Cadmium sulfide and cadmium selenide recombination centers, discussing temperature dependence of electron capture cross sections 05 p0731 A66-14661

Quenching and enhancement of dark conductivity in high resistivity photosensitive single crystals of cadmium sulfide 05 p0732 A66-14663

Crystalites of CdS in obliquely evaporated film on relative intensity of X-ray diffraction peaks 05 p0736 A66-14975

High strain sensitivity in CdS evaporated films, noting effects of tension and/or compression on film resistance 05 p0736 A66-14977

Luminescence decay of electron bombarded

CdS, measuring time constants 05 p0737 A66-15173  
 Fine structure exhibited by near IR absorption and emission spectra of copper ions in ZnS and CdS crystals recorded at low temperatures 05 p0742 A66-15874  
 Storage stability, moisture degradation and thermal cycling durability of cadmium sulfide-copper sulfide thin film solar cells 06 p0808 A66-16012  
 Current voltage characteristics of cadmium sulfide semiconductors showing departures from Ohm law associated with ultrasonic amplification, crystal length and increasing conductivity 06 p0923 A66-16183  
 Low temperature copper diffusion limits frequency range of cadmium sulfide shear mode diffusion layer transducer 06 p0851 A66-16461  
 Exciton absorption lines and long wave intrinsic edges of single-crystal CdSe and CdS at low temperatures 06 p0924 A66-16540  
 Coherent current oscillations observed in dark conductive In-doped CdS at 77 and 300 degrees K 06 p0925 A66-16659  
 Current oscillations in nonuniformly illuminated cadmium sulfide, examining effects of variation in parameters 06 p0925 A66-16664  
 Angular distribution of annihilation gamma quanta in CdS single crystals of high and low resistivity 06 p0928 A66-16921  
 Second sound in semiconductors, interpreting signal following amplification in CdS crystal as diffraction caused by anisotropy of amplification coefficient 06 p0930 A66-17055  
 Lattice vacancies and interstitials in II-VI compounds of cadmium sulfide and zinc selenide caused by electron bombardment often determine advantages or limits of material 06 p0935 A66-17130  
 Space-charge-limited currents and electron traps in CdS crystals thermally stimulated after electron injection 07 p1097 A66-17738  
 Electron energy levels in CdS single crystals from Hall effect, conductivity and space-charge-limited current measurements 07 p1098 A66-17739  
 Depletion layer 1000 mc transducers for producing or detecting hypersonic waves in solids, using CaS or GaAs for high acoustoelectrical conversion efficiency 07 p1009 A66-17827  
 Laser emission in pure cadmium sulfide crystals bombarded by electron beams 08 p1233 A66-18650  
 Group II-VI semiconductors, examining theory of bound exciton complexes, lattice vibrations, phonon-assisted edge emission and higher energy bands 08 p1271 A66-19239  
 Contact-making process in cadmium sulfide crystals, examining influence on plasma electron efficiency in glow discharge effect 08 p1272 A66-19243  
 Secondary illumination effect on intrinsic photovoltage and photocurrent excited in certain spectral region in cadmium sulfide crystals with gold and indium contact 08 p1272 A66-19244  
 Rise and decay of photoconductivity of cadmium sulfide single crystals with superlinear photocurrent illumination characteristics 08 p1272 A66-19248  
 Postdeposition vacuum heat treatments of cadmium sulfide films, examining effect on photocurrent and photocurrent to dark current ratio 08 p1273 A66-19258  
 Time resolved photoluminescence spectra of two green broad emission bands in CdS as function of temperature, attributing new structure to transverse optical phonons 08 p1276 A66-19368  
 Generation in cadmium sulfide during two-photon optical excitation by ruby laser with modulated Q-factor 08 p1277 A66-19620  
 Metallography of cadmium crystals with copper impurities obtained by sublimation from copper powder, noting that copper solubility is limited 08 p1277 A66-19623  
 Indirect transition and temperature dependence of absorption limit in single crystal cadmium sulfide 09 p1411 A66-19944  
 Effect of electric field and crystalline dimensions on position of optical absorption edge in cadmium sulfide thin films obtained by vacuum deposition 09 p1412 A66-19995  
 Low temperature measurement of magnetic

susceptibility of CdS single crystals with manganese impurity, considering effects of antiferromagnetic exchange 09 p1424 A66-20078  
 Photoimpedance measurement as function of AC field of CdS crystals coated with SiO films or situated between polystyrene foils 09 p1425 A66-20189  
 CdS-type superlinear photoconductivity due to excitation from localized levels 09 p1426 A66-20195  
 Extrinsic and intrinsic surface states and photoelectronic properties of insulating CdS crystals 09 p1427 A66-20256  
 Spectral dependence of photovoltaic effect CdS-CdSe heterojunction 09 p1427 A66-20482  
 Stationary IR quenching of photocurrent in CdS, discussing recombination channels 09 p1428 A66-20538  
 Characteristics of cadmium sulfide photocells and p-n junction photocells, using germanium or silicon 09 p1355 A66-20573  
 Cadmium sulfide based film photoresistors insensitive to moisture and long exposure to air 09 p1429 A66-20820  
 Film-type photocell consisting of p-n heterojunction between copper oxide and cadmium sulfide with secondary maximum in sensitivity 09 p1429 A66-20821  
 Metal oxide semiconductor /MOS/ transistors constructed on single crystal cadmium sulfide, noting transconductance, gate source, gate drain capacitance, etc 09 p1360 A66-20980  
 Direct piezoelectric coupling to surface elastic waves by spatially periodic electrode, noting measurements in quartz plate and CdS film 10 p1533 A66-21068  
 Contact barriers on insulating semiconductor cadmium sulfide measurements, based on pulsed light and bridge 10 p1573 A66-21245  
 Phonon series in cadmium sulfide single crystal emissions at low temperature range 10 p1583 A66-22025  
 LF photocurrent noise intensity, spectrum and photoresponse in CdS single crystals 10 p1588 A66-22157  
 Isothermal cross section of phase diagram of Zn-Cd-S and sulfide films 11 p1749 A66-22294  
 Cadmium sulfide space charge limited diodes, noting current voltage characteristics and field and electron density distributions 11 p1668 A66-23026  
 Spatial variation of electric field in amplifying CdS measured, using electro-optic effect to study acoustic flux from thermal noise 11 p1758 A66-23356  
 Coupling of ordinary and extraordinary electromagnetic waves in CdS induced by external magnetic field or stress 12 p1926 A66-23719  
 CdO films as transparent ohmic contacts with CdS /single crystal and film type/ photoconductor 12 p1927 A66-23771  
 IR radiation effect on photovoltaic effect in cadmium sulfide excited by visible light 12 p1927 A66-23772  
 Capacitive probe measurements of potential fluctuation in current-oscillating CdS crystals under ultrasonic amplification conditions at room temperature 12 p1931 A66-24812  
 Current saturation in CdS crystals 12 p1931 A66-24814  
 Ultrasonic generation and amplification in CdS crystals with barrier layer under constant drift field 13 p2159 A66-25085  
 Photoelectric properties and relaxation time of polycrystalline layers of cadmium sulfide are highly dependent on substrate temperature 13 p2160 A66-25097  
 Crystallites in evaporated film of CdS on Au and Al films studied by X-ray diffraction 13 p2161 A66-25196  
 Negative resistance in cadmium sulfide single crystal 13 p2162 A66-25198  
 Microwave emission from crystal of n-type CdS illuminated by mercury lamp or laser in strong electric field 13 p2162 A66-25199  
 Surface photovoltage measured in vapor-deposited cadmium sulfide using metal-insulator-semiconductor-structures, noting surface potential analysis as applied to thin film field effect 13 p2164 A66-25487  
 Cadmium sulfide single crystal preparation

by zone sublimation method, analyzing structure via X-ray diffraction and obtaining photosensitivity curves 13 p2165 A66-25687  
 Stationary and kinetic determination parameters of capturing recombinative centers in CdS single crystal 13 p2166 A66-25687  
 Effects of recoil in semiconductor with thermal-neutron-absorption cross section measuring changes in luminescence and conductive properties of CdS 13 p2166 A66-25700  
 Conductivity dependence of acoustoelectric effect in cadmium sulfide samples 13 p2167 A66-25900  
 Cadmium sulfide and cadmium selenide discussing optical absorption, energy band structure, effective band-masses and composition changes of crystals in polarized light 13 p2167 A66-25900  
 Cadmium sulfide and cadmium selenide recombination centers, discussing temperature dependence of electron capture cross sections 13 p2168 A66-25900  
 Laser oscillations in CdSe and CdS bombarded by fast electron beam 14 p2306 A66-27000  
 UV absorption and dispersion of cadmium sulfide crystals and energy band structure 14 p2356 A66-27000  
 Influence of trapping on acousto-electric effect in piezoelectric semiconductor noting ultrasound absorption and experimental results in cadmium sulfide 14 p2359 A66-27100  
 CdS single crystal optical generator during excitation by ruby laser, discussing two photon absorption coefficient at 300 degrees K for radiation flux densities 14 p2308 A66-27500  
 Fine-line absorption spectrum anisotropy with respect to crystallographic axis in cadmium sulfide 14 p2308 A66-27600  
 Laser-generation-type luminescence CdS-CdSe crystals exposed to double photon excitation from ruby laser 14 p2308 A66-27600  
 Two ohmic electrodes or one ohmic and one barrier electrode for current-voltage stable-negative characteristic of cadmium sulfide, noting IR radiation effects 14 p2368 A66-28200  
 Structural defects arising during growth and heat treatment of CdS single crystals studied, using anomalous transmission of X rays 15 p2557 A66-28500  
 High amplitude LF current and optical transmission oscillations in CdS single crystals under high electric field and monochromatic illumination near fundamental absorption edge 15 p2558 A66-28600  
 Impurity photovoltaic effect in cadmium sulfide, noting radiative enhancement of spectral response upon illumination with green light 15 p2561 A66-28700  
 Two parallel carrier capture mechanisms in single recombination center in cadmium sulfide 15 p2563 A66-28700  
 Transient acoustoelectric interaction in CdS and ZnS crystals during single transition measuring electron drift 15 p2563 A66-28700  
 Exciton absorption lines and long wave intrinsic edges of single-crystal CdSe and CdS at low temperatures 15 p2569 A66-29900  
 Beam trapping in cadmium sulfide noting threshold, trapping length, refractive index change and Stokes radiation 16 p2716 A66-30100  
 Phonon series in cadmium sulfide single crystal emissions at low temperature range 16 p2776 A66-30800  
 Linear absorption effect on threshold for self-focusing of laser beam in cadmium sulfide, noting variation of absorption coefficient 16 p2720 A66-31500  
 Electric conductivity of CdS single crystals in atmosphere, dry air, oxygen, water vapor, carbon dioxide and in transverse electric field 16 p2786 A66-31700  
 Dark conductivity of cadmium sulfide single crystals as affected by contact voltage and transverse electric field 16 p2786 A66-31700  
 Expanded single crystal hetero-transition in CdS-CdSe system 16 p2787 A66-31700  
 Distribution of recombination centers over energy levels of CdS-CdSe solid

- solutions 16 p2787 A66-31737  
Gamma radiation and fast neutron effects on dark resistance, photoconductivity, majority carrier mobility, recombination kinetics, etc. in CdS single crystal 16 p2787 A66-31765  
Spatial periodic modulation of high field domain in cadmium sulfide 17 p2974 A66-31813  
Magnitude of DC conductivity change in CdS by microwave phonons at liquid helium temperature explained with piezoelectric polaron effect 17 p2975 A66-31886  
Current oscillations, negative resistance and high field domain transition in dark conductive cadmium sulfide crystals 17 p2975 A66-31940  
Generation in cadmium sulfide during two-photon optical excitation by ruby laser with modulated Q-factor 17 p2936 A66-33134  
Metallography of cadmium crystals with copper impurities obtained by sublimation from copper powder, noting that copper solubility is limited 17 p2984 A66-33137  
Spectra and intensity vs excitation level and spatial distribution vs current density determined for optical radiation by electron excited cadmium sulfide 17 p2937 A66-33308  
Current-voltage characteristics peculiarities of fine cadmium sulfide single crystals with nonohmic contacts 17 p2986 A66-33311  
Current oscillation observations in photoconductive cadmium sulfide crystal 17 p2987 A66-33317  
Changes in piezoelectric constants of cadmium sulfide crystal caused by illumination and on mechanical vibration caused by fluctuation of carrier injection from electrodes 18 p3153 A66-33613  
Cadmium sulfide thin films as ultrasonic transducers, obtaining mixed or pure vibration modes via crystalline axis orientation 18 p3111 A66-34085  
Resonant enhancement of Raman cross section for phonons in CdS at frequencies near absorption edge 18 p3156 A66-34468  
Photoconductivity of thin layers of CdS, noting intrinsic maximum for various dopants, temperature effect, activation energy, etc 18 p3157 A66-34628  
Spectral distribution of relative quantum yield of photoluminescence in polycrystalline cadmium sulfide films 18 p3158 A66-34694  
Evaporated and recrystallized CdS layers, discussing electron mobility, level distribution, capture cross section and techniques of measurement 19 p3435 A66-35408  
Spatial distribution of acoustoelectric field in photoconductive CdS measurement under conditions of current saturation, determining carrier drift mobility 19 p3435 A66-35415  
Steady state open-circuit photovoltage in some monocrystalline CdS samples found to be due to generation of free minority carriers 19 p3437 A66-35476  
Concentration and lifetime of minority carriers in cadmium sulfide determined by method based on optically induced changes in concentration 19 p3437 A66-35477  
Layer of CdS crystals photoconduction measurements suggesting change in space charge under illumination due to increase of free electron concentration in volume 19 p3438 A66-35478  
LF photocurrent noise intensity, spectrum and photoresponse in CdS single crystals 19 p3440 A66-35771  
Texture and electric conductivity of cadmium sulfide thin films 19 p3442 A66-35865  
Electron-phonon interaction phenomena observed in GaAs and CdS, examining current saturation, ultrasonic emission by charge carriers and acoustic amplification 19 p3445 A66-36256  
Lampert double injection theory for CdS diodes with negative resistance I-V characteristic curve 20 p3535 A66-38435  
Ultrasonic generation and amplification in CdS crystals with barrier layer under constant drift field 21 p3795 A66-38510  
Direct measurement of dispersion properties of cadmium sulfide and CdS-CdSe crystals, using Obreimov-Fresnel diffraction method, growing crystals by synthesis 21 p3799 A66-38926  
Modulation by ultrasonic diffraction of 10.6 micron laser radiation in photoelastic CdS, GaAs and Si crystals 21 p3747 A66-39112  
Photoconductive and luminescent behavior of undoped cadmium sulfide single crystals at room temperature under laser excitation 21 p3748 A66-39165  
Varying excitation intensity effects on edge emissions from pure and doped CdS powder samples, noting electron-hole recombination mechanisms 21 p3802 A66-39202  
Applications for ferroelectric cold conductors and GaAs light-sensitive diodes, examining supersonic amplification in CdS 21 p3716 A66-39620  
UV absorption and dispersion of cadmium sulfide crystals and energy band structure 22 p3966 A66-40823  
Optical thickness measurement of nonabsorbing dielectric film when it is inconvenient to apply overlay film to measure thickness by Fizeau fringe shift 22 p3968 A66-40889  
Precision polishing technique for optical and microwave acoustical surfaces with overall flatness of one-eighth wavelength of light and parallel to 6 inches 23 p4067 A66-41248  
Structural defects arising during growth and heat treatment of CdS single crystals studied, using anomalous transmission of X-rays 23 p4112 A66-41284  
P-type conductivity and stored electron charge densities in high resistivity cadmium sulfide crystals 23 p4114 A66-41625  
Single crystal wurtzite CdS luminescence as function of exciting intensity, noting shift of overlapping band structure of green-edge emission indicative of electron-hole recombination 24 p4219 A66-42250  
Recrystallization of evaporated CdS layers in environment containing various elements, obtaining oxygen enhanced crystal growth 24 p4253 A66-42356  
Optical properties and energy structure parameters calculation for CdS-CdTe crystals 24 p4253 A66-42362  
Failure mechanisms of CdS and CdSe thin film FETs noting volt-ampere characteristics, temperature, electrical stress and humidity effects 24 p4181 A66-42381  
Surface pinned layer-like field inhomogeneities in cadmium sulfide, investigating visibility of field layer by corresponding shift of absorption edge, using Franz-Keldysh effect 24 p4254 A66-42427  
**CADMIUM TELLURIDE**  
Recombination radiation of p-n junctions in CdTe-ZnTe system crystals for various current densities and molecular compositions 01 p0125 A66-10780  
Cadmium telluride laser with electron excitation 01 p0084 A66-11188  
Impurities effect on electrification of cadmium telluride dust, specifically n and p types, with electrification increasing with impurity concentration 06 p0928 A66-16891  
Specific conductivity, Hall, Nernst-Ettingshausen and thermoelectric transfer effects in InAs-CdTe and InAs-ZnTe alloys 09 p1428 A66-20539  
Photovoltaic cells based on p-n junctions of ternary Cd-Te-Hg films, noting fabricating methods for n-or p-types 09 p1431 A66-20926  
Distribution coefficient and electrical behavior of indium in cadmium telluride crystals, using In 114 /half-life 49 days/ as tracer 10 p1574 A66-21352  
Diffusion of selenium in cadmium telluride, using radioactive Se as tracer 10 p1574 A66-21353  
Recombination radiation of p-n junctions in CdTe-ZnTe system crystals for various current densities and molecular compositions 11 p1749 A66-22293  
Elastoresistance coefficients for n-type cadmium telluride determined at 300 and 195 degrees K 12 p1926 A66-23713  
Cadmium telluride laser with electron excitation 12 p1890 A66-24009  
Photoconductivity and optical transmission of cadmium-indium-telluride, noting temperature dependence 13 p2165 A66-25685  
Field effect measurements in n-and p-type CdTe at room temperature and pressure 15 p2558 A66-28612  
Spontaneous and coherent photoluminescence in cadmium mercury telluride crystals excited optically by GaAs diode laser. 15 p2517 A66-29390  
Resistivity increase in Cadmium Telluride, attributed to conduction band separation due to deionization into impurity levels 16 p2768 A66-30131  
Hexagonal crystal structure growth of CdTe thin film 19 p3438 A66-35480  
Injection luminescence in forward-biased CdTe p-n junction diode 23 p4112 A66-41298  
Optical properties and energy structure parameters calculation for CdS-CdTe crystals 24 p4253 A66-42362  
Pressure deformation of band structure of HgTe-CdTe alloys determined from measurements of Hall effect and resistivity 24 p4258 A66-43009  
**CAJUN ROCKET**  
**S NIKE-CAJUN ROCKET**  
**CALCITE**  
Compressional wave velocity in limestones, marbles and single crystal of calcite under hydrostatic pressure to 20 kbar 19 p3351 A66-36337  
**CALCIUM**  
H-line of calcium ion analyzed from spectrograms of chromospheric spicules 01 p0131 A66-10277  
Green corona before birth and after death of calcium pike in intensity plot vs heliographic latitude 09 p1455 A66-20379  
Bone calcium loss during two weeks of simulated weightlessness, using X-ray wedge technique 11 p1643 A66-22577  
Energy level transitions in vacuum UV absorption spectrum of calcium vapor 14 p2337 A66-27704  
Profile of ionized calcium resonance lines radiated from arc plasma jet observed by Fabry-Perot etalon 17 p2970 A66-32714  
Final character figures of calcium bright foci for IGY 18 p3235 A66-34735  
Cosmic ray produced lithium and calcium in iron meteorites 18 p3236 A66-34890  
Open circuit half-cell potentials of calcium in thiocyanate-liquid ammonia solutions 18 p3055 A66-34902  
Polarization difference in elastic scattering of proton from Ar 40 and Ca 40 due to spin-orbit force difference 18 p3140 A66-35037  
Ionized calcium luminescence in large chromospheric flare, noting K line broadening due to nonthermal turbulent motions 23 p4126 A66-41078  
**CALCIUM FLUORIDE**  
Ruby laser radiation effect on fluorescence and laser action in dysprosium doped calcium fluoride crystals 01 p0082 A66-10718  
Plastic deformation spitting and evolution of spectral lines and excited level structure of europium ion in alkaline-earth fluoride crystals 03 p0409 A66-12717  
Germanium films deposited on heated crystal calcium fluoride substrates in vacuum system 05 p0732 A66-14667  
Growth of absorption bands of natural and synthetic calcium fluoride crystals irradiated with protons from cyclotron at Tomsk Institute 05 p0741 A66-15857  
Chemical and thermal stability of fluoride solid lubricants measured and tested for aerospace environment [ASLE PREPRINT 65AM 5C5] 07 p1039 A66-18284  
Frequency and temperature effects on dielectric properties of calcium, strontium and barium fluorides 10 p1577 A66-21561  
Microstructure of epitaxial germanium films deposited on calcium fluoride substrates, noting parameters of deposition 13 p2158 A66-25063  
Magnetization induced by circularly polarized laser light incident on nonabsorbing material, in absence of external magnetic field, in doped calcium fluoride proportional to light intensity and Verdet constant 13 p2131 A66-26142  
Pulsed nuclear resonance experiment on neodymium doped calcium fluoride, determining relaxation time 14 p2336 A66-27638  
Stimulated emission from samarium-doped calcium fluoride crystal excited by ruby laser 15 p2516 A66-29358  
Laser lines due to energy transfer from color centers to erbium ions in calcium fluoride crystals irradiated by gamma

ray 16 p2717 A66-30278  
Self-lubricating properties of composites of porous nickel and nickel-chromium alloy impregnated with barium fluoride-calcium fluoride eutectic  
[ASLE PAPER 66AM 1C2] 16 p2710 A66-30404  
Solid state CW optically pumped microwave maser, using divalent thulium doped calcium fluoride 18 p3117 A66-33614  
Lowest of UV absorption bands attributed to 4f-5d transition of trivalent rare earth ions in calcium fluoride 19 p3443 A66-36004  
Stimulated emission from samarium-doped calcium fluoride crystal excited by ruby laser 20 p3577 A66-37362  
Ruby laser radiation effect on fluorescence and laser action in dysprosium doped calcium fluoride crystals 20 p3579 A66-37656  
Electron paramagnetic resonance and optical spectra of trivalent erbium in type II crystals of calcium fluoride disclose existence of cubic, tetragonal and trigonal sites 22 p3961 A66-39916

**CALCIUM METABOLISM**  
Nuclear fast red technique of calcium in serum, parotid fluid and urine in weightless state 03 p0329 A66-13347

**CALCIUM OXIDE**  
Electrical conductivity of single crystals of calcium and strontium oxides 10 p1581 A66-21878

**CALCIUM TUNGSTATE**  
Addition of molybdenum to neodymium doped calcium tungstate laser material increases susceptibility to photolytic coloring and changes vacuum reduction coloring spectra 04 p0561 A66-13732  
Laser oscillation in calcium tungstate crystals activated with trivalent praseodymium 05 p0694 A66-14898  
Continuous optical quantum generator operating at room temperature on calcium tungstate doped with neodymium ions 09 p1386 A66-19956

**CALCULUS**  
SA DIFFERENTIAL EQUATION  
SA INTEGRAL EQUATION  
SA OPERATIONAL CALCULUS  
SA VARIATIONAL CALCULUS  
SA VECTOR CALCULUS  
Numerical calculus and physical calculus - Colloquium, Henri Poincare Institute, Paris, May 1963  
[PST PAPER NT-147] 14 p2323 A66-27790  
Mean value theorem for curves arising in solution of ordinary differential equation by series method 20 p3590 A66-37525

**CALIBRATION**  
SA STANDARDIZATION  
SA WIND TUNNEL CALIBRATION  
Intercalibration of cosmic ray neutron monitors at nine European sea level stations and deduction of daily latitude effect in 1963 01 p0132 A66-10321  
Vacuum gauge calibration at lower pressures necessitates transfer to secondary standard and extrapolation of this calibration to range of interest 01 p0067 A66-10491  
Calibration of spectral apparatus for visible region of spectrum with measurements of spectral fluxes of total and scattered radiation, atmospheric spectral transparency, etc 01 p0133 A66-10755  
Evaluation and calibration of missile and space tracking systems including test-by-test analysis, lofted rockets, self-calibrating systems, etc 01 p0053 A66-10805  
Shock and vibration measurement system with error correcting techniques including dynamic calibration data, noise detection, etc  
[SAE PAPER 650820] 01 p0069 A66-10822  
Thermal shock and wrinkled diaphragms effect on calibration of pressure transducers 01 p0070 A66-10887  
Laboratory vibratory stand for calibrating sensors of oscillatory motion 01 p0070 A66-11020  
Calibration procedures and statistical analysis for error reduction in ballistic camera lead-screw type comparator 02 p0228 A66-11380  
Lincoln sphere for radar calibration, noting measurements before and after launching 03 p0430 A66-12449

Tunable calibrated impedance for measurement of unknown terminations in millimeter range and based on reflection coefficient adjustments 03 p0371 A66-13242  
Calibration of ARIS /Advanced Range Instrumentation Ships/ radars for cross section measurements 04 p0479 A66-13611  
Assured performance calibration discussing statistical quality control, instrument variability, vacuum tube and digital voltmeter histories, calibration costs, etc 04 p0520 A66-13941  
Shipboard inertial navigation system recalibration, using periodic position information from communications satellite 05 p0712 A66-14604  
High altitude aircraft for calibration of solar cells and extrapolation of data to obtain outer space short circuit current 06 p0808 A66-16013  
Checking and calibration of aircraft compasses, discussing compass base at Dublin Airport and effect of lightning strikes 07 p1032 A66-17675  
Accurate and economical determination of static system position errors in pressure altimeter systems by trail cone technique 07 p1034 A66-17792  
HF magnetic probes for measurement of transient magnetic fields in linear pitch devices and Helmholtz coil calibration 07 p1037 A66-18491  
Light source having absolute spectral energy distribution for standardizing star tracker calibration 08 p1252 A66-19501  
Indicator design for semiconductor strain gauges, discussing basic circuitry, calibration and stability 08 p1226 A66-19599  
Solar cell orbital performance measurement, discussing apparatus, V-I characteristics, spectral response and calibration 08 p1174 A66-19664  
Power of solar cell array in space predicted from comparative measurements in earth sunlight of given solar panel and monitor with known output in space 09 p1331 A66-20171  
Absolute calibration of Arizona Photometry 09 p1402 A66-20293  
Accurate calibration of Doppler winds for use in computation of mesoscale wind fields 09 p1399 A66-20728  
Cylindrical black body furnace with graphite resistance built in France, attaining 1600 degrees C, for calibration of radiation pyrometers 09 p1383 A66-20909  
First order error analysis, radar antenna calibration technique and polarization scattering matrix 10 p1501 A66-21627  
Photometric standards which are references for measurement of sources of energy in visual and near visual portion of electromagnetic spectrum 11 p1736 A66-22671  
Lincoln radar calibration sphere ejected from Titan III-A transtage to calibrate all but large-scale radar installations 11 p1777 A66-22875  
Calibration problem of load-measuring instruments solved, using automatic digital voltmeter  
[ASTME PREPRINT IQ66-705] 12 p1882 A66-24412  
Sensor calibrations using NBS standard of spectral irradiance, as used for Mariner IV Canopus sensor 13 p2080 A66-25986  
Self-calibration and automatic correction for wavelength response of monochromator-filter-detector system 14 p2292 A66-27323  
Calibration curve for Preston tubes in supersonic flow obtained by reference-temperature method 14 p2294 A66-27452  
Calibration of communication satellite Earth station antenna system, using radio stars 14 p2238 A66-27532  
Maintaining of flow similarity in calibration of nozzle type water meters for study of working processes of pumps 14 p2225 A66-27698  
Utilization of confidence interval concept for instrument calibration 14 p2296 A66-27818  
Calibration of spectral apparatus for visible region of spectrum with measurements of spectral fluxes of total and scattered radiation, atmospheric spectral transparency, etc 14 p2285 A66-27854  
Gravimeter error in recording of Earth tides, examining leveling and calibration problems 14 p2298 A66-28400

Range instrumentation systems calibrating and evaluation at Air Force Eastern Test Range 14 p2272 A66-28444  
Calibrating geodetic and geophysical errors effect on Minuteman trajectory, noting instrument errors 14 p2390 A66-28444  
Carbon dioxide to calibrate instruments for carbon determination in metals 15 p2445 A66-28612  
Calibration ensuring optimal instrument performance, using statistical quality control, noting background of Assurance Performance Calibration program 15 p2508 A66-28812  
Calibration of birefringent filter photometer 15 p2499 A66-28844  
Radiation measurement error using Eppley radiation sensors in Antarctic 15 p2503 A66-29664  
Voltage output characteristics of axial gradient heat flux transducers employing thermoelectric temperature difference sensing 16 p2702 A66-30422  
Pyrheliometers, noting performance, application, environmental effects and calibration based on black body radiation 16 p2703 A66-30562  
Lens decentering distortion using thin prism and Conrady models, noting application of precise calibration technique analytical photogrammetry 16 p2746 A66-30512  
Calibration and testing of temperature measuring devices in -200 to 3000 degrees C 16 p2704 A66-30632  
High accuracy variable area meteorological calibrations with multiple gases 16 p2704 A66-30672  
Calibration of spherical reflector at Arecibo Ionospheric Observatory antennas using analytical photogrammetric methods 18 p3075 A66-33742  
Accelerometer standard designed for reciprocity and comparison calibrations of vibration transducers 18 p3112 A66-34202  
Frequency standard system using quartz servo-oscillators for design and testing of high-stability frequency sources 18 p3087 A66-34702  
Constant current sources consisting of sealed ionization chambers for calibrating electrometers 19 p3357 A66-35802  
Strain gauge strip chart error determination, elimination and effects on accuracy of electric calibration 19 p3360 A66-36302  
Calibration of turbine flow meter on air against pitot tube traverse, considering random scatter 19 p3362 A66-36752  
Digital computers used in error calculation in calibration curves of turboengines and other pneumatic devices 20 p3555 A66-36922  
Calibration device for flow and volume meters for liquid rocket engine propellant 20 p3561 A66-38062  
Calibration test for photorheological method of stress analysis in plastically flowing body under plastic work or creep deformation 20 p3671 A66-38102  
Calibration process for RZ-2 rocket engine noting changes in orifices, engine performance, influence coefficients, etc 21 p3807 A66-38642  
Inertial platform test station for shipboard maintenance and calibration of platform used in A6A and E2A aircraft, examining accelerometer bias and gyro drift tests 21 p3723 A66-38882  
Radio astronomy measurements requiring absolute intensity calibrations, noting flux densities and measurements of very dark areas of sky 21 p3815 A66-39482  
Quantitative photographic determinations of laser beam power density distributions and Q-switched ruby oscillator-amplifier system divergence characteristics 23 p4075 A66-41032  
Error of measurement of mean square value of fluctuation signals due to voltmeter calibration 23 p4038 A66-41523  
Shutters, lenses, vidicons, data rates and calibration techniques for TV cameras of Rangers VI, VII, VIII and IX 23 p4070 A66-41671  
Piston manometer calibration for precision pressure measurement 24 p4213 A66-42822

**CALIBRATOR**  
Valve arrangement for calibrating

- piezoelectric shock tunnel transducers used in pressure measurements 24 p4213 A66-42823
- CALORIC REQUIREMENT**  
**S NUTRITIONAL REQUIREMENT**  
**CALORIC STIMULUS**  
 Barany hypothesis tested to clarify mechanism of caloric nystagmus by use of zero gravity environment 17 p2857 A66-32168
- CALORIMETER**  
 Pulse energy and power of lasers under continuous operating conditions measured, using calorimeters, photoelectric effect of radiation, etc 03 p0379 A66-13205  
 Heat conduction in thermocouples with lateral heat leakages applied to calibration of microcalorimeters of Calvet type 05 p0679 A66-15174  
 Energy spectrum shape and absolute abundance of nuclear active particles at low altitude determined, using ionization calorimeter, plotting angular distribution of particles 07 p1115 A66-17551  
 Specific heat of liquids with constant volume determined, using, pycnometer cell, obtaining formula for specific heat in terms of measurable thermal parameters 13 p2077 A66-25354  
 Ionization calorimeter for measuring primary cosmic ray components, discussing nuclear interactions, energy spectra, EM cascades, etc 13 p2175 A66-26011  
 Enthalpy of gas stream, calorimeter surface treatment and heat transfer measurement errors in arc-heated tests 14 p2411 A66-27425  
 Calorimeter bomb combustion of hydrocarbons and fluoro-substituted hydrocarbons with nitrogen trifluoride and nitrogen trifluoride-oxygen mixtures and mass spectrometric analysis 15 p2570 A66-29609  
 Transfer efficiency of theta pinch in converting capacitively stored electrical energy to plasma energy measured, using calorimeter technique 16 p2761 A66-31090  
 Bench-top calorimeter for determining radiation and convection in small-scale combustion of fuel [WSCI 66-14] 18 p3113 A66-34425  
 Energy and power of Q-switched neodymium glass laser measured, using calorimetric devices, vacuum photodiodes, etc 18 p3120 A66-34904  
 Electron-photon and nuclear active components energy of young air showers measured by ionization calorimeter, determining inelasticity coefficient 18 p3206 A66-35100  
 Ionization calorimetry of energy spectrum of leading particles in cores of EAS compared with data from model 18 p3206 A66-35101  
 Spectrum of nuclear active component of cosmic rays determined by nuclear calorimeter 18 p3217 A66-35171  
 Meson properties analyzed underground by spark calorimeter operated by telescope of Geiger counters 18 p3220 A66-35194  
 Angular distribution and energy spectrum of cosmic particle showers at large zenith angles analyzed, using ionization calorimeter 18 p3220 A66-35196  
 Electron-photon cascade showers recorded with ionization calorimeter, determining influence of value of radiation length on form of mean cascade curve 18 p3221 A66-35198  
 Interaction of 1000 bev particles by ionization calorimeter technique suggests free path of nuclear active particles in atmosphere decreases as particle energy increases 24 p4267 A66-42908  
 Ionization calorimeter measurement of number of particles in electron photon cascade with energy transferred from ionization calorimeter 24 p4269 A66-42924
- CALORIMETRY**  
**SA THERMOMETRY**  
 Specific heat of gadolinium near Curie point, discussing measuring procedure and line drawing of calorimetric setup 01 p0118 A66-10252  
 Atomic heat of titanium, vanadium and chromium in high temperature range, discussing parameters and experimental techniques 05 p0698 A66-14511  
 Diluted nickel alloys, describing calorimetric determination of specific heat at low temperatures 06 p0897 A66-16939  
 Rotating bomb calorimetric technique, determining accurate values of enthalpy of combustion of boron and boron compounds 08 p1178 A66-19068  
 Specific heat of iron, cobalt and nickel in high temperature range measured, using quasi-adiabatic operating calorimeter 08 p1240 A66-19255  
 Calorimetric and magnetic measurements of dilute titanium alloys with other transition elements, distinguishing between homogeneous and nonhomogeneous transitions 09 p1419 A66-20045  
 Magnetocaloric effects in high-field superconductor, noting magnetic field-induced temperature variation effects on thermally isolated superconducting alloy specimen 09 p1420 A66-20051  
 Superheating of linear high polymer polyethylene crystals, evaluating time dependence of melting, differential thermal analysis and calorimeter techniques 12 p1899 A66-23937  
 Calorimetric measurement of local temperatures in nitrogen plasma jet at atmospheric and subatmospheric pressures [DGR PAPER 66-002] 13 p2082 A66-26493  
 Calorimetric measurement of local temperatures and velocities in weakly ionized nitrogen plasma at subsonic velocity and thermodynamic equilibrium 14 p2294 A66-27487  
 Direct measuring radiation calorimeter developed for determining radiant heat flux of solid propellant gas flame in rocket combustion chambers [AIAA PAPER 65-358] 18 p3159 A66-33814  
 Heat transfer in wake of reflected shock wave in reacting gases, using calorimetry and shock tube technique 21 p3727 A66-39095  
 Precision microwave power measurement methods noting calorimetry, bolometry and thin film 24 p4184 A66-42649
- CAMBERED WING**  
 Pressure distributions on cambered bodies of arbitrary cross section at angle of attack applied to transport fuselage afterbody design [AIAA PAPER 65-718] 03 p0314 A66-12543  
 Lift coefficient in two-dimensional smoke wind tunnel noting symmetrical, cambered and leading double-edge slot wing section 03 p0317 A66-13216
- CAMERA**  
 SA BAKER-NUNN CAMERA  
 SA BALLISTIC CAMERA  
 SA FRAMING CAMERA  
 SA HIGH SPEED CAMERA  
 SA LALLEMAND CAMERA  
 SA TELEVISION CAMERA  
 Aurora position and brightness determination by S-180 camera as affected by such factors as distortion and vignetting 02 p0226 A66-11345  
 S-180-S spectral camera characteristics of spectral sensitivity, distortion and slit width effect 02 p0226 A66-11346  
 High speed streak camera using electronic control circuits, light amplifier and time calibrator 02 p0230 A66-11816  
 Stereocamera for determining spatial orientation of cosmic particle tracks in large diffusion chamber 03 p0368 A66-12503  
 Camera for precision satellite observations accurate to one inch in determining position and to less than 0.002 seconds in determining moment of measurement 03 p0370 A66-13200  
 Commercial aerial camera objectives estimated with TsNIIGAIK electron-optical bench 04 p0519 A66-13662  
 Simple rotating drum streak camera covering principle, design, construction and application 04 p0520 A66-13940  
 Sinusoidal rocking-motion camera, advantages in satellite tracking such as light grasp gain, speed error insensitivity, clock switch operation, etc 05 p0682 A66-15370  
 Stereoscopic camera system design for use on lunar orbiting vehicle including illumination, lunar albedo, resolution and signal to noise ratio 08 p1222 A66-18734  
 Metric photography techniques utilizing stroboscopic light in highlight camera and rotating disk camera 10 p1534 A66-21229  
 Space photography, camera-film systems and TV/videotape systems for space environments 11 p1707 A66-23162  
 Design parameters of astronomical camera for lunar charting 12 p1876 A66-23644  
 Panoramic facsimile camera providing IR and visible spectrum imagery designed for unmanned space operation, noting construction, weight, etc 13 p2077 A66-25236  
 Military aerial mapping program, noting camera lens distortion, shutter, stabilization, films, etc 16 p2703 A66-30511  
 Polarization photography of solar corona, noting apparatus used for separation of K from F component 16 p2705 A66-30827  
 Smear resolution losses in ground target photographs for maneuverable target-tracking reconnaissance cameras, noting MOL simulation 17 p2925 A66-32351  
 Aerial mapping camera for photogrammetric research, examining three systems of correcting for film distortion 18 p3110 A66-33740  
 Rotating prism design for continuous image compensation cameras, application to UV and IR regions of spectrum 19 p3354 A66-35384  
 Pinhole array camera for multiple image production for integrated circuits 19 p3354 A66-35385  
 Dielectric-tape camera borne by meteorological satellite to provide high-quality photographs of Earth cloud cover 20 p3557 A66-37204  
 Cameras for recording data related to orbit of Earth satellites, noting technique in which tracks on photograph are chopped into discrete segments of length related to satellite velocity 20 p3560 A66-37841  
 Photographic radar system employing Q-switched ruby laser, Mullard type 6929 image tube and conventional camera 21 p3736 A66-38796  
 Photography of small freely moving particles undergoing heat and mass transfer, using beam splitter to align two cameras on drop 22 p3917 A66-39675  
 Distortions in aerial photographs due to errors in cameras, noting determination methods in various countries 22 p3919 A66-40622  
 Advanced imaging techniques for Metro camera for space applications 23 p4070 A66-41670
- CAMERA SHUTTER**  
 Photographic equipment using image converter tube as electronic shutter with exposure times from 0.5 to 5000 microseconds 23 p4070 A66-41674
- CAMOUFLAGE**  
**S RADAR ABSORBING MATERIAL**  
 /RAM/
- CANADA**  
 Canadian aerospace research including study of high latitude atmospheric phenomena by universities and government 09 p1458 A66-20710  
 Canadian space program including nonmilitary activities, upper atmosphere research, rocket sounding, aurora studies, satellite use, etc 15 p2601 A66-29937  
 Trends in short-haul transportation in Canada 24 p4296 A66-42261
- CANADAIR CL-84 AIRCRAFT**  
 V/STOL Canadair CL-84, evaluating control and lift propulsion system 05 p0609 A66-14767  
 Control and lift-propulsion systems and model testing of Canadair CL-84 V/STOL tilt-wing aircraft 06 p0806 A66-16818  
 Flight characteristics and test program of CL-84 light tilt-wing V/STOL Army support vehicle 07 p0986 A66-17271  
 Stability and control test program for Canadair CL-84 tilt-wing V/STOL aircraft prototype [SAE PAPER 660315] 15 p2427 A66-29839  
 CL-84 V/STOL flight simulation at Canadair through design, development and flight testing of flapped tilt-wing prototype [ICAS PAPER 66-18] 24 p4159 A66-42493
- CANADIAN SATELLITE**  
**S ALOUETTE I SATELLITE**  
**S ISIS SATELLITE**
- CANARD**  
 Effect of canard foreplane on longitudinal long-period perturbed motion of aircraft depends on change in hinge moments with Mach number change 04 p0458 A66-14152

## CANONICAL PROBLEM

- Transformation of error ellipsoid in motion of material point, with selection of invariant parameters 06 p0954 A66-16423
- Isoperimetric problems of controlled systems of continuous functions solved, using Lure canonical transformations 07 p1012 A66-17376
- Relativistic perturbed oscillator, solving problem via canonical transformation 07 p1080 A66-17498
- Perturbed motion stability in critical cases, examining canonical systems 07 p1082 A66-18184
- Alfven wave propagation in incompressible inviscid infinitely conducting medium by canonical equations of motion 08 p1205 A66-18534
- Linear cycle set factorization, showing that uniqueness of canonical procedure is incorrect and introducing new cycle division algorithm 11 p1679 A66-23247
- Transformation of canonical system of differential equations with rapidly varying periodic coefficients into canonical system with constant coefficients 12 p1902 A66-23764
- Extension of dynamics to arbitrary systems of differential equations, proposing universal canonical structure generalizing Hamiltonian structure 15 p2539 A66-29145
- Canonical form for two-terminal nonlinear RLC network first-order ordinary differential equations 15 p2472 A66-29371
- Invariant imbedding as basis for integration theory for canonical equations of motion with parallels to Jacobi theory 17 p2947 A66-32500
- Generalized Lur coordinates used in canonical forms for controllable systems, with applications to optimal nonlinear feedback 20 p3535 A66-36848
- Canonical theory approximation of optimum or Bayes detection procedures in critical limiting threshold mode of operation 21 p3705 A66-39146
- Direct solution method for canonical equations resulting from elimination of terms of first-order general planetary theory 23 p4127 A66-41174
- CANOPY**
- Filling process of solid cloth parachute canopies of flat circular and 10 percent extended skirt types operating under finite mass conditions 22 p3845 A66-40592
- CANTILEVER BEAM**
- Transfer functions of cantilever beam and clamped-edge square plate determined by cross-correlation methods 01 p0148 A66-10136
- Optimal surface damping in two-layered cantilever for random periodic loading decreasing in symmetrical cycle 01 p0160 A66-11180
- Residual stress in epitaxial silicon film on sapphire measured by cantilever beam technique 05 p0733 A66-14673
- Torsional instability of cantilevered bars, describing effects of distributed nonconservative compressive load at free end [ASME PAPER 65-WA/APM-19] 05 p0777 A66-15441
- Effect of initial strains on flange reinforced cantilever beam, using triangular elements with linearly varying strains 06 p0961 A66-16004
- Beam deflection in creep bending for statically determinate and indeterminate cases [ASME PAPER 64-WA/MET-9] 06 p0961 A66-16208
- Self-oscillating hydraulic vibration apparatus capable of generating high cyclic actuating power for testing purposes 07 p1147 A66-18389
- Longitudinal and lateral natural frequencies of cantilever bars with concentrated end masses for axial and transverse excitation 09 p1468 A66-20936
- Stress corrosion cracking test employing precracked bar stressed in bending, noting apparatus and results on martensitic steel and titanium alloy 12 p1958 A66-23647
- Torsional instability of cantilevered bars, describing effects of distributed nonconservative compressive load at free end [ASME PAPER 65-WA/APM-19] 12 p1961 A66-23979

- Deformation of cantilever parallelogram box beam 12 p1969 A66-24365
- Photoelastic intensity variations in glass beam following impact of steel ball, registering values 13 p2198 A66-26300
- Pointwise 13 p2198 A66-26300
- Ballistic pendulum technique to measure permanent plastic deformation of shallow circular arches subject to explosive impulse loading 15 p2610 A66-29294
- [AIAA PAPER 65-408] 15 p2610 A66-29294
- Approximate formulas for upper and lower values of natural frequencies for transverse vibrations of cantilever bars of variable cross section 16 p2813 A66-30299
- Dynamic plastic bending of cantilever and variation in strength of mild steel with strain rate, considering shear force at hinge 16 p2815 A66-30808
- Frequency equation for free vibration of uniform cantilever beam carrying concentrated mass and moment of inertia at tip 17 p3030 A66-32966
- Dynamic absorber tuning and damping of resonance of cantilever beams excited by sinusoidally varying force 17 p3030 A66-33034
- Stability of bending-torsional equilibrium of cantilevered bar subjected at end to follower force, as in case of wing under jet, determining critical thrust 19 p3475 A66-36432
- Static and dynamic stability loss of nonconservative mechanical systems describing buckling of clamped-free rod and stability loss of cantilever beam subjected to bending 20 p3672 A66-38267
- Support flexibility effect on natural frequency free vibrations of uniform cantilever carried by mass supported on string 21 p3833 A66-39608
- Oscillation of tubular cantilevers conveying fluid, discussing theoretical conditions of stability 22 p3994 A66-40408
- Oscillation of tubular cantilevers conveying fluid, checking stability aspects of theory and accounting for internal and viscous damping 22 p3994 A66-40409
- CANTILEVER PLATE**
- Parallelogrammic elements in solution of deflection and natural frequency of rhombic cantilever plate 13 p2198 A66-26237
- Free vibration of trapezoidal cantilever plates with swept-back leading edge 16 p2823 A66-31666
- Ritz method for solving elastic stability of rectangular cantilever plate in flows moving in direction perpendicular and parallel to clamped edge of plate 23 p4139 A66-41787
- CANTILEVER WING**
- Taper ratio effects on transonic flutter characteristics of series of thin cantilever wings with 45 degree sweptback and aspect ratio 4 13 p2199 A66-26381
- CAPACITANCE**
- SA RLC CIRCUIT**
- Synchronization of reflex klystron loaded with resonator with nonlinear capacitance from p-n junction of semiconductor diode at third harmonic of external signal 03 p0342 A66-12626
- Photocapacitive effect for determining degree of anisotropy of zinc sulfide with stacking faults 04 p0571 A66-14498
- Regenerative heat exchangers, covering heat transfer and pressure loss characteristics of glass ceramic matrix materials [ASME PAPER 65-HT-35] 05 p0784 A66-14750
- Capacitance-voltage curves in MOS devices indicating difference in relaxation time of surface states 06 p0940 A66-17163
- MOS capacitance measurements, utilizing graphical relations between silicon surface parameters 06 p0940 A66-17165
- Capacitive biasing transducer is electromechanical analog of parametric system 06 p0860 A66-17199
- Effect of fast states with discrete energy levels and quasi-continuous spectrum on capacitance of silicon dielectric film-metal structure 08 p1274 A66-19308
- Electrical capacity of galvanic cell and crystal habit and surface property effects on porous cadmium hydroxide electrode electrochemical properties 08 p1171 A66-19644
- Room temperature capacitance voltage characteristics and built-in diffusion voltages

- in n Ge-n Si double saturation heterojunction 09 p1411 A66-199
- Parametric mixing action resulting from pumping emitter capacitance in transistors 09 p1355 A66-206
- Capacitance of alloyed p-n junctions in type InSb is inversely proportional square root of bias voltage 09 p1429 A66-208
- Field effect transistor input capacitance in pinch-off region derived by using two parallel coupled condensers as equivalent 10 p1510 A66-216
- Reactance of gallium arsenide buffer oscillator in oscillating state, plotting value together with capacitance 12 p1835 A66-241
- Load capacitance method for measurement of quartz crystal parameters 12 p1845 A66-248
- Double-layer capacitance of solid silver bromide determined against platinum and gold electrodes, using electrochemical cell 12 p1933 A66-250
- Capacitance transducer characteristics at applications as fuel gauge, level detector, interface detector, pressure and proximity sensors, etc 13 p2078 A66-253
- Carrier concentration and minority carrier lifetime measurement in MOS epitaxial layers by capacitance method 13 p2164 A66-254
- Capacitance type ferrite transducer consisting of polycrystalline yttrium garnet of high resistivity 14 p2252 A66-272
- Silicon film MOS transistors with extremely low capacitance produced by diffusion of source and drain regions entirely through film 15 p2459 A66-288
- Capacitance variation of gold n-type gallium arsenide surface barrier diode when illuminated, applied to light detector frequency modulation, etc 15 p2463 A66-290
- Density and location of surface states at silicon-silicon dioxide interface determined by analyzing capacitance-voltage characteristics of MOS diode 15 p2567 A66-294
- Results derived from dissipative four-terminal networks applied to varactor converter, leading to capacitance variation determination as function of polarizing potential 16 p2662 A66-309
- Behavior of incremental and fundamental capacitances appearing in varactor analyzed as function of voltage 16 p2662 A66-309
- Space charge density in p-n junction found to be unrelated to charge density assumed in Schottky theory 17 p2979 A66-326
- Low temperature silicon variable capacitance diodes for use in low noise band parametric amplifier 17 p2890 A66-329
- Photoeffect on barrier capacitance of p-n junction 17 p2988 A66-333
- Resonant frequency change of oscillator circuit due to nonlinear capacitance of semiconductor diode used as amplitude detector 17 p2898 A66-335
- Half-wavelength resonators as capacitive gap strip-line bandpass-type microwave filters, discussing parameter derivation for equivalent circuit and Cohn synthesis method 18 p3087 A66-346
- Capacitance transducer for measuring capacitance ratios with minimum environmental problems, noting wide application range 19 p3355 A66-354
- Capacitive transducer principle, describing basic circuit, performance characteristics and sensitivity factors 19 p3355 A66-354
- Capacitive biasing transducer is electromechanical analog of parametric system 19 p3356 A66-355
- Silicon variable capacitance diodes with high-voltage sensitivity produced by low temperature epitaxial growth technique 20 p3528 A66-374
- Frequency multiplication using diffusion capacitance with derivation of efficiency expression 20 p3519 A66-380
- Bias voltage dependence of capacitance in n-type silicon p-n junctions with voltage breakdown 20 p3621 A66-380
- Photoreponse measurements of depletion capacitance and diffusion potential of Gallium Schottky-Barrier diodes 20 p3534 A66-383
- Reactance modulation amplifier with semiconductor-diode capacitance analyzed by

oscillation theory 21 p3711 A66-38911  
 Distribution of capacitive photo-emf over surface of semiconductor determined by measuring value created by scanning surface of sample with narrow modulated-light beam 22 p3965 A66-40316  
 Conductance and capacitance of metal-insulator-semiconductor diodes or any two-terminal complex admittance plotted automatically as function of applied bias 22 p3882 A66-40897  
 Amplification processes in parametrically regenerated circuit with simultaneous complex variation of capacitance and attenuation 23 p4038 A66-41517  
 Three-circuit system with circuits connected by nonlinear capacitance applied to frequency converters, amplifiers, etc 23 p4049 A66-41565  
 Nonuniform thickness of dielectric films effect on capacitance and tunnel currents of elements with metal-insulator-metal structure 24 p4254 A66-42387  
 MOS transistor structures with enhancement mode of operation, discussing fabrication processes via V-C characteristics, temperature effects on performance, etc 24 p4181 A66-42389  
 Thyristor circuit, basis for capacitive switching circuits, expressing switching capacitance by DC source 24 p4181 A66-42485  
**CAPACITIVE FUEL GAUGE**  
 Fluid content measurement in storage tanks under zero-g conditions discussing gas law system, trace material, capacitive panel and RF methods [AIAA PAPER 65-365] 19 p3340 A66-35611  
 Fuel and propellant gauging, using method of capacitance change induced by liquid dielectrics 20 p3664 A66-38251  
**CAPACITOR**  
 Charged Styropor ball motions in free float between plates of perforated capacitor with alternating electric field 01 p0119 A66-10374  
 Comparison of inflector unmatched with line with matched one using additional capacitors, showing both devices have identical electric and time characteristics 01 p0046 A66-11057  
 Embedment stress effects on electrical characteristics of encapsulated components, presenting capacitor test results 02 p0247 A66-11287  
 Microelectronics and results achieved in relays, switches, variable capacitors and potentiometers 02 p0205 A66-11943  
 Developments in capacitor design particularly electrolytic, ceramic and mica types 03 p0347 A66-13331  
 Metal oxide semiconductor structures in integrated circuits as high and low resistances, inverters and AC amplifiers 05 p0643 A66-14569  
 Capacitor reliability as function of voltage and temperature of dielectric and environmental conditions 06 p0839 A66-15951  
 Book on theoretical and engineering problems arising in capacitor discharge technique of pulse generation 06 p0878 A66-16046  
 Surface state density variations on metal oxide semiconductor capacitors due to gamma radiation 06 p0925 A66-16646  
 High-pressure pulse arc created by discharging capacitor bank through steadily burning argon arc 06 p0919 A66-16874  
 Measuring temperature coefficient and drift for small capacitors, noting design and environmental control 09 p1359 A66-20921  
 High voltage capacitor discharge from Marx circuit, using stepup transformer 10 p1486 A66-21862  
 Text on high speed optical pulse technology, lasers and measuring techniques, emphasizing capacitor discharge application 10 p1538 A66-22063  
 Coaxial capacitor for measuring density of fluids in both liquid and gaseous phase over wide range of temperatures and pressures 11 p1707 A66-22961  
 Transient processes resulting from instantaneous application of constant potential difference to plasma capacitor plates 12 p1922 A66-24216  
 Interaction of boundary layer produced by vortex flow of viscous electrically conducting fluid over disk with axial magnetic field and relation to MHD generator and hydromagnetic capacitor 13 p2156 A66-26707  
 Harmonic linearization technique to examine characteristics of oscillatory circuits with nonlinear capacitors 14 p2250 A66-27167  
 Capacitors for monolithic integrated circuits 14 p2252 A66-27306  
 Surface charge sign effect on capacitor photoelectromotive force in semiconductors and photoinduced contact potential change 15 p2559 A66-28628  
 Space charge polarization in glass films, discussing parameters of shift of capacitance-voltage characteristics, diffusion coefficient in metal-glass-silicon dioxide-silicon double-layer capacitor 16 p2779 A66-31089  
 Compatible thin film resistor-capacitor process using nichrome and alumina-silica glass for silicon integrated circuits 16 p2667 A66-31595  
 Deuterium plasma containment and stability in theta pinch configuration using megajoule capacitor banks, studying density, temperature and radial distribution 19 p3413 A66-36505  
 MOS capacitance of p-type silicon in inversion layer and ion drift in fringing field 22 p3872 A66-39744  
 Transient processes resulting from instantaneous application of constant potential difference to plasma capacitor plates 22 p3878 A66-40580  
 Optimal lumped constant dispersive network design with inductors and capacitors functioning independently 23 p4034 A66-41015  
 Electrical properties and fabrication of zinc oxide-bismuth oxide low Q capacitor with high apparent dielectric constant over wide frequency range 24 p4180 A66-42311  
 Energy storage film capacitors for pulsed plasma thrusters developed for coaxial plasma gun and pulsed arc gun [AIAA PAPER 65-337] 24 p4261 A66-42780  
**CAPE KENNEDY**  
 Objectives, effectiveness and results of reliability program at Kennedy Space Center /KSC/ referring to Saturn launches 01 p0141 A66-10106  
 Effective planning and operations required for control of air pollution due to increased use of toxic propellants in larger missiles 02 p0183 A66-11491  
 Inaccuracy in rocketsonde data on HF of midwinter easterlies in stratosphere over Cape Kennedy 10 p1531 A66-21281  
 Programmable patching system at Cape Kennedy for communications network composed of two individual switching subsystems, using solid state devices and glass-reed relays 14 p2233 A66-26805  
**CAPILLARY**  
 Optimum ionizer structure, examining cesium transport through tungsten capillaries [AIAA PAPER 66-207] 12 p1922 A66-24529  
 Modified Poiseuille equation for gas flow through capillaries, applicable to flow regimes extending from molecular to viscous flow 21 p3725 A66-38943  
**CAPILLARY CIRCULATION**  
 Localization caused by capillary effects in gas-liquid interface such as epidermis and wicks depends upon gas phase unsaturated with liquid vapor 03 p0355 A66-12779  
 Heat pipes as heat removal systems in space thermionic power supplies, discussing laminar, turbulent flow and heat transfer efficiency 05 p0789 A66-15542  
 Thermal diffusion coefficient and composition of gas mixtures by measuring gas flow rate in capillary tube as function of viscosity 07 p1148 A66-17394  
 Approximate theory for electrokinetic phenomena in capillary flows, determining interaction between mechanical and electrical energy 08 p1174 A66-19829  
 Distribution of permeable solute during Poiseuille flow in capillary tubes, deriving equations, noting flow dependence on permeability but not on diffusion constant 19 p3285 A66-35711  
 Leak specifications for gas-filled electronic enclosures, discussing molecular, slow viscous, capillary and ordinary leak patterns 24 p4182 A66-42574

**CAPILLARY WAVE**

Growth and excitation of surface waves on capillary liquid jet stressed by electric field 07 p1087 A66-17946  
 Gas flow and self-diffusion in capillaries 17 p2909 A66-32652  
 Capillary gas flow and self-diffusion as affected by pressure ranging from free molecule to continuum regimes 17 p2910 A66-32653  
 Geometric dimensional, plasma temperature and pressure effects on capillary discharge with evaporating wall /CDEW/ 18 p3143 A66-34028

**CAPSULE**

S ESCAPE CAPSULE  
 S MERCURY CAPSULE  
 S SPACE CAPSULE

**CAPTURE**

S ELECTRON CAPTURE

**CAPTURE EFFECT**

Field effect theory in semiconductors with capture centers, noting basic equation, quadrature expressions, etc 11 p1751 A66-22732  
 Traveling wave beats created by ring laser on rotating platform, noting frequency division rotating rate and capture band parameters 13 p2089 A66-25102  
 Stationary and kinetic determination of parameters of capturing recombination centers in CdS single crystal 13 p2166 A66-25686  
 Plastic deformation effect on carrier capture in silicon 14 p2358 A66-27090  
 Two parallel carrier capture mechanisms at single recombination center in cadmium sulfide 15 p2563 A66-28738  
 Formation mechanism of ionospheric narrow sporadic E layers by high energy electron fluxes captured by geomagnetic field 15 p2488 A66-29110  
 Traveling wave beats created by ring laser on rotating platform, noting frequency division rotating rate and capture band parameters 16 p2717 A66-30281  
 Rarefied supersonic flow condensation on cold flat plate, noting capture coefficients, shock wave behavior, etc 16 p2825 A66-30383  
 Temperature dependence of lifetime of electrons and holes in GaAs, noting trapping effect of recombination centers and capture levels 16 p2787 A66-31771  
 Integrated flux distributions in neutron capture in stars 17 p2997 A66-31924  
 Evaporated and recrystallized CdS layers, discussing electron mobility, level distribution, capture cross section and techniques of measurement 19 p3435 A66-35408  
 Plastic deformation effect on carrier capture in silicon 22 p3967 A66-40846  
 Capture effect on I-V characteristics of junction diodes and injection coefficients in forbidden transition zone 23 p4045 A66-41444  
 Field effect theory in semiconductors with capture centers, noting basic equation, quadrature expressions, etc 23 p4113 A66-41470  
 Optical heterodyne receiver antenna properties, noting effective aperture of capture cross section vs directional tolerance and detection of doppler shifts in liquid scattered coherent light 24 p4174 A66-42809  
**CARAVELLE AIRCRAFT**  
 S SUD-AVIATION SE-210 AIRCRAFT  
**CARBIDE**  
 SA ALUMINUM CARBIDE  
 SA BORON CARBIDE  
 SA CHROMIUM CARBIDE  
 SA HAFNIUM CARBIDE  
 SA NIOBIUM CARBIDE  
 SA SILICON CARBIDE  
 SA STEEL  
 SA TANTALUM CARBIDE  
 SA TITANIUM CARBIDE  
 SA TUNGSTEN CARBIDE  
 SA URANIUM CARBIDE  
 SA VANADIUM CARBIDE  
 SA ZIRCONIUM CARBIDE  
 Refractory metal carbide solubility in cobalt dependent on carbon content, crystal structure and metal-carbon bonds 01 p0085 A66-10287  
 Solid solution and carbide strengthened arc melted alloys of hafnium with tungsten and ternary alloys of tantalum, columbium,

- rhenium and carbon 06 p0894 A66-16078  
 Vacuum diffusion welding of zirconium, niobium and tantalum carbides to high-melting niobium, tantalum, molybdenum and tungsten 06 p0887 A66-16696  
 Optimum conditions for preparation of complex carbide alloys containing scandium carbide 07 p1049 A66-17903  
 Thermal shock resistant carbides, using arc-casting techniques, noting microstructure, phase diagram, mechanical properties, etc 07 p1055 A66-18504  
 Book on refractory metals and cemented carbides /hard metals/, discussing pressing and sintering techniques, testing methods, properties under stress, etc 12 p1893 A66-23739  
 Effect of preparation conditions on formation of carbide phases in iron-carbon thin films, using vacuum condensation 12 p1933 A66-25025  
 Extremely high thermal shock resistance in group IVA carbides of carbide-graphite composites fabricated, using vacuum arc melting and casting techniques 15 p2524 A66-29287  
 Large quantities of high-purity carbides and carbide solid solutions produced by auxiliary metal bath in carbon tube furnace 16 p2723 A66-30638  
 Powder metallurgy methods for obtaining products of complex form from sintered carbides 16 p2715 A66-31679  
 Chemical bonds in carbides and nitrides of transition metals, obtaining atomization heat of compound and effective charges of transition atomic nuclei 19 p3386 A66-36425  
 Niobium dissolution kinetics in iron carbide 19 p3386 A66-36447  
 Compressive tests on WC-Co cemented alloys including preparation of sample, equipment, behavior and failure mode [ASME PAPER 66-MD-80] 21 p3750 A66-38503  
 Optimum conditions for preparation of complex carbide alloys containing scandium carbide 21 p3752 A66-39403  
 Solid solutions of titanium, tungsten, chromium prepared by carbidization of mixtures in hydrogen medium and obtained as fine-grained carbide powders 22 p3934 A66-39865
- CARBOHYDRATE**  
 SA CELLULOSE  
 SA GLUCOSE  
 SA GLYCOGEN  
 SA NUCLEOSIDE  
 Stratigraphic distribution of carbohydrate residues in middle Devonian Onondaga beds of Pennsylvania and western New York and application to paleontology and paleoecology 22 p3912 A66-40133
- CARBOHYDRATE METABOLISM**  
 Stress and dietary influence on direct oxidative pathway of carbohydrate metabolism in jejunal mucosa of rats 16 p2841 A66-31383  
 Increase of arterial lactate and pyruvate in blood glucose of fasted anesthetized dog after hydrazine injection 17 p2856 A66-32157
- CARBON**  
 SA DIAMOND  
 SA FERRITE  
 SA GRAPHITE  
 Electric resistivity of carbon resistor material determined as temperature function, calculating static response characteristics of carbon bolometer 02 p0228 A66-11445  
 Graphite and carbon steel case hardening by chromium 05 p0702 A66-15111  
 Effects of nitrogen and carbon on low temperature embrittlement of vanadium, noting transition temperature increases 05 p0702 A66-15488  
 Carbon diffusion into titanium and zirconium nitrides, noting carbide layer parabolic growth rate and experimental techniques 05 p0704 A66-15817  
 Radiation from carbon particle clouds produced by research rocket motors [ATAA PAPER 66-133] 06 p0970 A66-16413  
 Measurement of equilibrium fractions of helium ions present in helium beams scattered at zero degrees through carbon foils 06 p0912 A66-17038  
 Interaction mean free path of nuclear-active particles in iron determined by measuring number of interactions in each iron layer in ionization calorimeter 07 p1115 A66-17550  
 Interaction of vanadium, niobium and tantalum diborides with carbon 07 p1049 A66-17904  
 Data on combustion of pyrolyzing solids as applicable to combustion chambers of hybrid propulsion devices, placing emphasis on coal 07 p1154 A66-18028  
 Radiative lifetimes of strongest vacuum UV multiplets of B I, B II, C I, C II, N I and N II measured by phase shift method 07 p1083 A66-18423  
 Carbon and tungsten effects compared on tensile flow stress recovery of molybdenum 08 p1237 A66-18764  
 Carbon seals for gas turbine evaluated in statistically designed test method 08 p1232 A66-19381  
 Thermal dissociation in interactions of carbon with carbon dioxide and oxygen 08 p1320 A66-19639  
 Carbon deposition boundaries and other constant parameter curves in triangular representation of C-H-O equilibria, with application to fuel cells 11 p1639 A66-22243  
 Energy spectra of ions emitted by beryllium, carbon and molybdenum heated by laser 13 p2131 A66-25479  
 Photochemical decomposition of carbon suboxide and spectroscopic observation of carbon atom reactions with nitrogen, hydrogen and deuterium at 4.2 degrees K 14 p2233 A66-27975  
 Kh16N15M2B steel properties and effects of grain size and Nb/C ratio 15 p2519 A66-28536  
 Kinetics of highly endothermic carbon-silica reaction for silica-reinforced resin systems 17 p2943 A66-32453  
 Rotational and vibrational temperature of diatomic C in comets derived from high resolution spectra, considering transition probabilities in R and P branches 17 p3010 A66-33380  
 Total number of cyanide molecules and diatomic carbon free radicals and density distribution in head of Arend-Roland 1957 III comet 17 p3010 A66-33381  
 Triatomic carbon spectrum transition bands based on available photographic and densitometric data 17 p3013 A66-33401  
 Deformation characteristics of 0.90 percent carbon steel wire studied for structures and strengthening mechanisms 18 p3122 A66-33754  
 Free-free absorption coefficient of electrons in field of neutral carbon atoms calculated per unit electron pressure per carbon atom in static central field exchange approximation 18 p3233 A66-34574  
 Carbon/graphite material /carbiterx/, physical, thermal, mechanical and chemical properties 18 p3125 A66-34618  
 Values of Morse potential for interaction of atoms in diatomic molecules carbon, CO and CN 21 p3775 A66-39072  
 100-200 ksi yield-strength notched steels for high-toughness weldments, discussing quenched and tempered steels, maraging steels, heat treatment effects, etc 21 p3751 A66-39193  
 Interaction of vanadium, niobium and tantalum diborides with carbon 21 p3752 A66-39404  
 Melting point and microhardness of carbon-saturated TiC-VC solid solutions, noting temperature of eutectic of TiC-VC with graphite 22 p3934 A66-39866  
 Rate constants for atomic and molecular hydrogen ion transfer from tri- and tetra-atomic carbon paraffins to propylene and cyclopropane molecular ions 22 p3861 A66-40905  
 Correlation between chemi-ionization in flames containing organic fuels and heat of oxidation of carbon in fuel molecule 23 p4147 A66-41154  
 Ceylon and artificial graphite behavior under very high pressure, examining problem of metallic phase of carbon 24 p4229 A66-42751  
 Inelasticity in carbon particle nuclei interactions evaluated by variation with depth of energy of electron photon shower in thick absorber 24 p4268 A66-42910  
 Carbon solubility in Ta, Nb and V at temperatures from 1500 degrees C to eutectic temperatures 24 p4228 A66-43068
- CARBON ARC**  
 Carbon arc solar simulator with nonconsumable tungsten rod negative electrode operating continuously over 10 hours 02 p0213 A66-11231  
 Carbon joint and nonconsumable negative electrode design for carbon arc solar simulator 10 p1521 A66-21931  
 Electron concentration in AC carbon arc determined from H-beta linewidth 11 p1748 A66-23410  
 Maecker-Boldt cascade arc in argon a radiance standard, noting superiority over carbon arc, especially in UV 16 p2767 A66-31699
- CARBON COMPOUND**  
 SA FLUOROCARBON  
 SA HYDROCARBON  
 Early interaction stages of metal oxides with carbon, using thermochromatographic method to determine temperature reaction onset 12 p1892 A66-23512  
 Syntheses of three macromolecular chlorocarbons, studying structure and configuration, noting high thermal stability and chemical inertness 12 p1812 A66-23633  
 K emission band of graphite examined using grazing incidence spectrometer and Gaussian window function 12 p1931 A66-24808  
 Photoelectric photometry of comet Everhart 1964 h, noting density of carbon radicals and CN molecules 17 p3000 A66-32334
- CARBON DIOXIDE**  
 Estimates of collision cross sections for carbon dioxide and air molecules at 20 degrees K with thermal radiation field at error source 01 p0062 A66-10761  
 Carbon dioxide reduction systems using chemical, electrochemical and thermoelectric energy 02 p0185 A66-11641  
 Linear coefficient of amplification of carbon dioxide subjected to HF excitation field for laser emission 02 p0241 A66-12001  
 Shock tube measurements of carbon dioxide dissociation in argon mixtures at 6000 to 11,000 degrees K 03 p0443 A66-12331  
 Spectral emissivity calculations for parallel bands of carbon dioxide at 4.3 microns between 150-600 degrees K, comparing experimental measurements with theoretical calculations 03 p0393 A66-13101  
 State equation for carbon dioxide describing gaseous and liquid phases and left and right boundary curves at temperatures and pressures 04 p0572 A66-13668  
 Molecular collision cross sections discussing vibrational excitation of carbon dioxide by collision with molecular hydrogen 04 p0548 A66-13811  
 Cluster ion formation by electric retarding field, measuring spectrum and size distribution in condensed supersonic molecular beams of carbon dioxide 05 p0718 A66-14501  
 Atmospheric radiation calculations emphasizing carbon dioxide and nitrous oxide absorption spectrum, spectral energy distribution, quasi-statistical band models, etc 05 p0748 A66-14911  
 Carbon dioxide-R-branch lines of 5 mu sun 3 band from integral of absorption coefficient of Martian atmosphere 05 p0763 A66-15281  
 Electron paramagnetic resonance spectrum of carbon dioxide when absorbed on UV irradiated magnesium oxide 05 p0630 A66-15766  
 Atmospheric thermal radiation calculations from unresolved molecular absorption spectra of atmospheric carbon dioxide and water 05 p0875 A66-15866  
 Internal and vibrational partition functions of carbon dioxide and rotational line intensities arising from transitions from ground and first excited states 06 p0907 A66-15948  
 Carbon dioxide frost as thermal insulation for hypersonic spacecraft, noting conductivity 06 p0989 A66-16301  
 CW laser action in carbon dioxide-helium mixtures 06 p0890 A66-16388  
 Carbon dioxide absorption bands in Mars atmosphere, transmission, function of carbon dioxide amount and effective surface

- pressure  
[AIAA PAPER 66-147] 08 p1290 A66-19072  
Cumulus cloud simulation by dropping  
solid piece of carbon dioxide into hot  
water 08 p1248 A66-19388  
Thermal dissociation in interactions of  
carbon with carbon dioxide and  
oxygen 08 p1320 A66-19639  
Thermodynamic parameters of carbon  
dioxide and argon mixture behind straight  
shock wavefront 09 p1470 A66-20146  
Transmission of IR radiation from flames  
through various carbon dioxide  
pathlengths 09 p1471 A66-20509  
Regenerative separation and recovery of  
carbon dioxide from manned atmospheres,  
using metallic oxides  
[AICE PREPRINT 26D] 10 p1491 A66-21191  
Free convection heat transfer to carbon  
dioxide near critical point, noting free,  
turbulent and oscillating  
flow 10 p1619 A66-21271  
Carbon dioxide effect on shattering of  
freezing water drops, using methanol-cooled  
chamber with variable temperature  
control 10 p552 A66-21290  
Oxidation of artificial graphitic carbon 14  
oxidized to carbon 14 dioxide in presence of  
nonsterile soils, noting inhibition of  
biological activity by electron beam  
irradiation 11 p1649 A66-22304  
Spectral emissivity measurements of  
carbon dioxide at high  
temperatures 11 p1738 A66-22870  
Atmospheric high resolution transmission  
in carbon dioxide bands between 12 and 18  
microns evaluated, using mixed Doppler-  
Lorentz broadening and new method for  
slant-path calculations 11 p1738 A66-22889  
Free energy of pure fluids as function of  
thermodynamic temperature determined  
from measurements of internal energy,  
noting case of carbon  
dioxide 12 p1981 A66-24997  
Carbon dioxide relaxation processes in  
shock waves, measuring density variation,  
vibrational energy, relaxation time, shock  
density profile, etc 13 p2061 A66-25161  
Chemical system and reaction rates behind  
strong shock waves in mixtures of carbon  
dioxide and nitrogen used to study entry  
conditions into Mars 13 p2062 A66-25276  
Interferogram interpretation to determine  
carbon dioxide concentration in air  
mixture 13 p2208 A66-25315  
Microwave absorption in compressed  
carbon dioxide between 150 and 300 gc  
measured, detecting no losses at 150  
gc 13 p2021 A66-25383  
IR laser radiation with power of 5.7 watts  
in vicinity of 10.69  $\mu$ m in sealed tube  
containing pure carbon dioxide excited by  
AC or DC current 13 p2131 A66-25410  
Quantum yield of CO formation from  
photolysis of carbon dioxide at wavelengths  
of argon lines 13 p2017 A66-25801  
Vertical temperature distribution in  
Martian atmosphere, noting insensitivity to  
surface pressure and carbon dioxide  
variations 13 p2186 A66-26132  
He-Ne laser homodyne spectrometer  
observation of broadening of spectral profile  
of light scattered from carbon dioxide near  
critical temperature and density due to  
density fluctuations 13 p2133 A66-26168  
Atmospheric absorption in IR region,  
noting effects of water vapor, ozone, carbon  
dioxide and collision-induced dipole  
moments 13 p2075 A66-26603  
Gas shielded metal arc welding, discussing  
power sources, wire feed mechanism, torch  
and carbon dioxide  
cylinders 13 p2088 A66-26764  
Vibrational-rotational line strengths and  
widths in carbon dioxide, using carbon  
dioxide-neon laser 14 p2306 A66-27030  
Jet boundary determination of  
underexpanded two-phase carbon dioxide  
supersonic nozzle flow 14 p2219 A66-27445  
Estimates of collision cross sections for  
carbon dioxide and air molecules at 200  
degrees K with thermal radiation field as  
error source 14 p2286 A66-27861  
Carbon dioxide to calibrate instruments for  
carbon determination in  
metals 15 p2445 A66-28617  
Measurement of single line in P branch of  
carbon dioxide vibro-rotational absorption  
band using tuned optical maser  
spectroscopy, noting presence of shifted  
frequencies 15 p2512 A66-28691  
IR spectral reflectance of water frost and  
solid carbon dioxide 15 p2501 A66-28977  
Total absorption cross section of carbon  
monoxide and carbon dioxide in 550-200  
angstrom range 15 p2538 A66-28978  
Adaptation rearrangements in organisms of  
mice during and after exposure to high  
concentrations of carbon  
dioxide 15 p2438 A66-29479  
Intensive Chlorella culture need of carbon  
dioxide concentration in closed and  
controlled air-carbon dioxide  
system 15 p2440 A66-29508  
Absorption, photolysis and  
fluorescence of carbon dioxide measured in  
regions of strong band and continuous  
absorption in various spectral  
ranges 16 p2749 A66-30111  
Rate constant for atomic oxygen ion  
destruction by carbon dioxide measured in  
pulsed flowing afterglow  
system 16 p2645 A66-30115  
Fast ion molecule reaction in carbon  
dioxide analyzed, using mass  
spectrometer 16 p2645 A66-30116  
Photolysis of carbon dioxide and molecular  
oxygen, using 1470 angstrom radiation to  
produce atomic oxygen 16 p2645 A66-30117  
Hypoxic hypoxia attenuation mechanism by  
carbon dioxide enrichment of air  
intake 16 p2638 A66-30273  
Mars atmosphere models based on Mariner  
IV occultation deriving electron number  
density, temperature, pressure, mass  
density, etc, noting carbon dioxide  
presence 16 p2800 A66-30713  
Photolysis of carbon dioxide, using 1633  
angstrom line of bromine  
lamp 16 p2646 A66-30862  
Optical transition probability and  
broadening cross section obtained from  
absorption measurements in carbon dioxide  
and mixtures with other  
gases 17 p2933 A66-31938  
Carbon dioxide control for manned  
spacecraft, discussing regenerative methods  
for eliminating system weight dependence  
on mission duration 17 p2863 A66-32141  
Regenerative sorbents for removal of  
carbon dioxide with minimal drying of  
process air stream 17 p2865 A66-32186  
Continuous flow, solid state  
electrochemical device for simultaneous  
carbon dioxide removal and oxygen  
generation 17 p2867 A66-32675  
[AICE PREPRINT 47E] 17 p2867 A66-32675  
Regenerative separation and recovery of  
carbon dioxide from manned atmospheres,  
using metallic oxides  
[AICE PREPRINT 26D] 17 p2868 A66-32681  
Carbon dioxide laser principle and  
performance 17 p2936 A66-33247  
High-power molecular laser based on  
vibrational-rotational energy level, noting  
carbon dioxide-neon-helium laser  
design 17 p2936 A66-33248  
Spectrographic investigation of  
luminescence of carbon monoxide and  
dioxide excited by collisions with  
accelerated ions 17 p2961 A66-33403  
Carbon dioxide supersaturation and  
condensation in supersonic nozzles in terms  
of stagnation pressures, temperatures, and  
expansion rates 17 p3039 A66-33476  
Change pattern in human cerebral blood  
flow during time immediately following  
initiation of carbon dioxide  
inhalation 18 p3058 A66-33691  
Occurrence of adenosine monophosphate  
inhibition of carbon dioxide fixation  
photosynthetic and chemosynthetic  
autotrophs 18 p3056 A66-33697  
Laser action in closed molecular system  
with mixture of carbon dioxide, nitrogen  
and water vapor, noting coupling-out plate  
reflectivity and population  
inversion 19 p3373 A66-35433  
Vibrational relaxation of carbon dioxide in  
mixtures with noble  
gases 19 p3295 A66-35494  
Carbon dioxide decomposition and oxygen  
reclamation by chemical reaction with  
electrochemically reduced  
lithium 19 p3292 A66-36234  
Chemical methods for carbon dioxide  
conversion for oxygen recovery, including  
relationship to biological  
processes 19 p3293 A66-36235  
Carbon dioxide control by enzymatic  
reaction in spacecraft atmosphere by hydro-  
lyase and multienzyme  
system 19 p3293 A66-36240  
Heat transfer in turbulent carbon dioxide  
pipeflow at supercritical  
region 20 p3674 A66-36983  
Vibrational relaxation measurements in  
carbon dioxide, using induced-fluorescence  
technique 20 p3578 A66-37595  
Identification of number of lines at 11  
microns emitted from pulsed carbon dioxide  
laser as P branch of carbon dioxide  
vibrational transition 20 p3579 A66-37629  
Random Elsasser band model to compute  
atmospheric transmission of Earth and Mars  
for 2-micron carbon dioxide  
bands 20 p3655 A66-38024  
Nitrogen ion charge-transfer reaction rates  
with CO and carbon dioxide in pulsed  
flowing afterglow system 21 p3774 A66-38529  
Supersonic nozzle flow of dissociated  
oxygen, nitrogen and carbon  
dioxide 21 p3694 A66-39089  
Carbon dioxide flow density in wake of  
shock wave front 21 p3726 A66-39091  
Peculiarities in Mach reflection of shock  
waves traveling in carbon dioxide gas and  
nitrogen at velocities of order of 2000  
m/sec 21 p3728 A66-39094  
Thermodynamic parameters of carbon  
dioxide and argon mixture behind straight  
shock wavefront 21 p3836 A66-39417  
Thermal conductivity of carbon dioxide in  
critical region interpreted, considering gas  
as mixture of clusters and heat transfer due  
to formation and breaking of  
clusters 21 p3837 A66-39454  
Abundance and temperature of carbon  
dioxide in Martian atmosphere, noting  
implications, observation methods and  
results 21 p3816 A66-39558  
Carbon dioxide dissociation rate measured  
from 3000 to 5000 degrees K, considering  
decrease in temperature and increase in  
density caused by endothermic  
dissociation 22 p3859 A66-39915  
Thermal model of Martian surface suggests  
solid carbon dioxide composition of polar  
caps, studying diurnal and annual  
temperature variations at various  
latitudes 22 p3981 A66-40482  
Induced microwave absorption in carbon  
dioxide studied at frequency of 9260 mc/sec  
over temperature range from 270 to 500  
degrees K and pressures as high as 95  
atm 22 p3985 A66-40909  
Molecular spectroscopy, measuring  
absorption coefficient at center of carbon  
dioxide band, determining vibration-rotation  
transition moment 23 p4076 A66-41179  
Competition, hysteresis and reactive Q-  
switching in carbon dioxide lasers at 10.6  
microns, using moving mirror  
technique 23 p4079 A66-41831  
Absorption lines on Venus spectrograms of  
rotational fine structure of excited  
vibrational transition of carbon  
dioxide 23 p4130 A66-41816  
Conductivity modulation by heavy-to-light  
hole transitions in p-type germanium noting  
carrier lifetime and ringing of laser  
pulse 24 p4219 A66-42249  
Planetary atmosphere resolution spectrum  
noting carbon dioxide lines, radiation  
transfer, composition, temperatures,  
pressures, etc 24 p4277 A66-42687  
Venus atmosphere noting pressure induced  
absorption in carbon dioxide-nitrogen  
atmosphere as indicated in decline of  
microwave brightness 24 p4277 A66-42688  
Kinetics of dissociation of carbon dioxide  
gas molecules behind shock wave  
front 24 p4196 A66-42882  
**CARBON DIOXIDE CONCENTRATION**  
Carbon dioxide induced mild hypoxia,  
correction of alterations on performance of  
psychologic and psychomotor  
systems 07 p0998 A66-17661  
Secular variation of atmospheric  
radiocarbon concentration, noting  
dependence on geomagnetic field  
strength 11 p1698 A66-22569

Conditioned reflex role in information of subthreshold stimuli of respiratory system in dogs subjected to electric shock and carbon dioxide increase 14 p2228 A66-27185

Variations in atmospheric radio carbon activity related to secular variations in carbon-14 production rate, carbon residence times and carbon reservoir times 18 p3104 A66-33552

**CARBON DIOXIDE REMOVAL**

**S AIR PURIFICATION**

**CARBON DISULFIDE**

CW laser oscillation between 11.48 and 11.55 microns from nitrogen-carbon disulfide system 06 p0890 A66-16384

Interaction between stimulated Brillouin and Raman scattering in carbon disulfide, using optical resonator and laser beam 13 p2097 A66-26162

Laser oscillation in flash photolysis of carbon disulfide and oxygen to form CO 17 p2933 A66-31941

Carbon disulfide traveling wave Kerr cells with identical microwave and dielectric constants, noting light modulator construction at microwave frequencies 24 p4185 A66-42814

**CARBON MONOXIDE**

Variations of equivalent line widths of first overtone of carbon monoxide band at transition from photosphere to facula, estimating temperature difference 01 p0131 A66-10278

Manufacture of propellants by aerogel carbothermal process involving reduction of silicates with methane and/or carbon [SAE PAPER 650835] 01 p0053 A66-10831

Photoionization and absorption coefficients of carbon oxide measured below 1000 angstroms, using Seya-Namioka scanning vacuum UV monochromator with helium continuum as background 02 p0263 A66-11834

Integrated intensity measurements on fundamental and first overtone band systems of carbon monoxide between 2500 and 5000 degrees K 04 p0596 A66-13647

CW gas laser, measuring vibrational rotational translation frequencies of carbon monoxide 04 p0531 A66-13984

Laser action on rotational transitions of 10-9, 9-8, 8-7, 7-6 and 6-5 vibrational bands of ground electronic state CO 07 p1046 A66-18424

Commercial fuel cells, noting biochemical, regenerative and low temperature carbon monoxide fuel cell 07 p0996 A66-18476

Saturation problem for middle sections of CO solar spectral lines, using thin layer absorption concept 08 p1297 A66-19453

Vasovagal syncope induced by application of negative pressure to lower half of human body, noting effect on lung CO diffusing capacity 11 p1643 A66-22580

Closed ecological systems and endogenous formation of CO in plant and animal tissues 11 p1648 A66-23048

Adsorption of CO radicals on three types of magnesium oxide using EPR techniques, noting spectrum of adsorbed radical, bonding, etc 12 p1916 A66-23619

Quantum yield of CO formation from photolysis of carbon dioxide at wavelengths of argon lines 13 p2017 A66-25801

Total absorption cross section of carbon monoxide and carbon dioxide in 550-200 angstrom range 15 p2538 A66-28978

Diffusion and dissociation of CO molecules in solar atmosphere 15 p2596 A66-29139

Physiological, psychological and biochemical effects on humans after 8-hr inhalation of low carbon monoxide concentration 15 p2435 A66-29448

Dissociation layer heights on Venus, Mars and Jupiter, noting CO flame airglow intensities 15 p2604 A66-30050

Carbon monoxide adsorption on tungsten surface as affected by temperature, noting sticking probability of molecules striking clean or covered surfaces 16 p2721 A66-30108

Laser oscillation in flash photolysis of carbon disulfide and oxygen to form CO 17 p2933 A66-31941

Spectrographic investigation of luminescence of carbon monoxide and dioxide excited by collisions with accelerated ions 17 p2961 A66-33403

Dissociation rate of undiluted carbon monoxide behind strong shock waves

produced in arc discharge shock tube [AIAA PAPER 66-518] 18 p3063 A66-33660

Saturation problem for middle sections of CO solar spectral lines, using thin layer absorption concept 18 p3232 A66-34482

Hydroxyl radical concentration in rarefied CO flame by EPR method 18 p3265 A66-34551

Electric quadrupole transition in fourth positive system of CO observed in bands of electric dipole allowed transition 19 p3404 A66-36800

Digital computer analysis of kinetic equations for CO burning in presence of hydrogen 20 p3679 A66-37702

Nitrogen ion charge-transfer reaction rates with CO and carbon dioxide in pulsed flowing afterglow system 21 p3774 A66-38529

Values of Morse potential for interaction of atoms in diatomic molecules carbon, CO and CN 21 p3775 A66-39072

Chemical reactor on-site manufacture of propellant oxygen from metallic silicates found on Moon 22 p3977 A66-39895

[AICE PREPRINT 46C]

Chemiluminescence in atomic-oxygen-acetylene and atomic-oxygen-carbon suboxide flames attributed to formation of CO in excited and electronic states 22 p3997 A66-39926

Analytic solution for ignition kinetics of dry carbon monoxide-oxygen reaction obtained, assuming initiation reaction followed by chain-branching steps 22 p3998 A66-40115

Recombination of carbon monoxide and atomic oxygen in expansion wave at high temperature in single pulse shock tube 22 p3860 A66-40527

**CARBON STEEL**

**S STEEL**

**CARBON TETRACHLORIDE**

Carbon and ethylene tetrachloride ultrasonic modulators applied to IR laser heterodyne experiments on InAs photodiode 11 p1714 A66-23353

**CARBON 13**

Carbon-13 chemical shifts of carboxyl carbon atom of acetic, benzoic and mesitoic acids in various compositions of sulfuric acid 14 p2232 A66-27376

**CARBON 14**

Secular variations of cosmic ray produced carbon 14 in 150 wood samples up to 2000 years old 05 p0747 A66-14795

C 14 content in tree rings, Tungusk meteor and supernova explosions 05 p0765 A66-15334

Oxidation of artificial graphitic carbon 14 oxidized to carbon 14 dioxide in presence of nonsterile soils, noting inhibition of biological activity by electron beam irradiation 11 p1649 A66-22304

Carbon 14 content of dendrochronologically dated tree rings used to determine atmospheric C-14 variation over past six millennia 11 p1697 A66-22568

Phosgenation procedure for synthesis of carbon-14 labeled isocyanates, noting isotope distribution in compounds 14 p2231 A66-26871

C 14 content in tree rings, Tungusk meteor and supernova explosions 15 p2603 A66-29981

Variations in atmospheric radio carbon activity related to secular variations in carbon-14 production rate, carbon residence times and carbon reservoir times 18 p3104 A66-33552

Carbon 14 content in growth rings of tree 60 km from epicenter of 1908 explosion of Tungus meteorite, considering antimatter as possible explosion cause 18 p3233 A66-34553

Variation in radiocarbon content in atmosphere studied from measurement of concentration in wood sample nearly 2000 years old 18 p3199 A66-34889

Solar activity variations, C 14 production by cosmic rays and reevaluation of C 14 dating 24 p4265 A66-42738

**CARBONACEOUS METEORITE**

Aromatic hydrocarbons in carbonaceous chondrites investigated by time-of-flight mass spectrometry and hypothesized as formed in solar nebula under thermodynamic equilibrium 01 p0136 A66-10436

Carbonaceous chondrite in stony meteorites, noting presence of organized elements and microfossils 02 p0289 A66-11604

Rubidium-strontium ages of chondrules and

carbonaceous chondrites 02 p0290 A66-11604

Chemical composition of meteorites a micropaleontological evidence of existing meteoric biological carbonaceous chondrites 08 p1287 A66-18476

Origin of diamonds in Canyon Diablo a Novo Urei meteorites 09 p1447 A66-19600

Mineralogical, chemical and microscopic analyses of carbonaceous chondrites reveal presence of substances usually synthesized by living cells on Earth 11 p1771 A66-22700

Organic matter in Orgueil meteorite a chemical equilibrium in solar nebula 13 p2185 A66-25801

Organic matter in carbonaceous chondrites as forming from chemical equilibrium in solar nebula 13 p2185 A66-25801

Inhomogeneities, inclusions and interbrecciation in meteoritic material including carbon-rich samples 14 p2384 A66-27800

Carbonaceous meteorite analysis, indicating possible biological substances 18 p3232 A66-34482

Chemical composition of meteorites a micropaleontological evidence of existing meteoric biological carbonaceous chondrites 19 p3459 A66-35500

Sulfur compounds analysis in lipid extracts from Orgueil meteorite support concept of low temperature environment on parent body and differ from petroleum 20 p3648 A66-37702

Cl, Br and I contents in carbonaceous chondrites measured by activation analysis 21 p3814 A66-39200

Statistical petrographic analysis of meteorite and carbonaceous chondrite evolution on Moon and Mars from rock photographs 23 p4132 A66-42814

**CARBONATE**

Molten carbonate fuel cell system performance evaluated from engineering and economic aspects [AIAA PAPER 64-747] 13 p2007 A66-26600

**CARBONIC ANHYDRASE**

Carbon dioxide control by enzymatic reaction in spacecraft atmosphere by hydrolase and multienzyme system 19 p3293 A66-36200

**CARBOXYL GROUP**

Carbon-13 chemical shifts of carboxyl carbon atom of acetic, benzoic and mesitoic acids in various compositions of sulfuric acid 14 p2232 A66-27376

Conversion of 2-carboxy-3-keto-9-methoxy-10-unsaturated hexahydronaphthalene into 5,6-fused products on irradiation in aqueous alkaline media, observing photochemical rearrangements 24 p4170 A66-42300

**CARBOXYLIC ACID**

High activity of alkali metal salts of carboxylic acids and substituted phenols synergists for arylamine antioxidants ester-type synthetic lubricating oils 11 p1711 A66-23100

**CARCINOTRON**

Submillimeter wave mixing of output of carcinotron and output of klystron crossed-waveguide harmonic generator 15 p2463 A66-29000

**CARDIOGRAM**

**S BALLISTOCARDIOGRAM**

**S ELECTROCARDIOGRAM**

**S PHONOCARDIOGRAM**

**S VIBROCARDIOGRAM**

**CARDIOGRAPHY**

**SA BALLISTOCARDIOGRAPHY**

**SA ELECTROCARDIOGRAPHY**

Impedance plethysmographic system for monitoring right ventricular output obtain cardiac output 17 p2924 A66-32100

**CARDIORESPIRATORY SYSTEM**

**SA BLOOD CIRCULATION**

Cardiac and respiratory changes in spacemen under light physical strain during Voskhod I orbital flight 13 p2010 A66-25801

Real time cardiorespiratory rate monitoring for data converter on Gemini space program 19 p3288 A66-35700

Liquid breathing effects on dogs hyperbaric chamber 21 p3699 A66-38400

Maximum exercise tolerance in healthy aircrew members limited by cardiac output 24 p4163 A66-42400

Flack Test for cardiorespiratory integrity noting heart rate response 24 p4164 A66-42400

**CARDIOVASCULAR SYSTEM**  
**SA BLOOD CIRCULATION**  
**SA CAPILLARY**

Behavior of right intraventricular conduction in 148 flying cadets under normal sea-level conditions and acute anoxic anoxia 01 p0020 A66-10608

Observations on heart rates and cardiodynamics during prolonged weightlessness, discussing immersion experiment on animals 04 p0465 A66-14073

Effect of weightlessness on cardiovascular, neuromuscular and autonomic nervous systems 06 p0810 A66-15904

Correlation analysis to study reactions of human cardiovascular system during space flight of Voskhod 06 p0814 A66-17175

Positive /headwards/ acceleration effect on vision, cardiovascular system, respiration, kidneys, brain wave patterns and total performance 10 p1490 A66-22123

Analog computer, programmed on digital computer, used in examination of lumped and distributed parameter models of cardiovascular system 12 p1809 A66-24230

Age, cardiac output and choice reaction time of airline, military and test pilots, attempting resolution of data discrepancy 12 p1806 A66-24397

Cardiovascular stress resulting from radial acceleration gradient impeding venous return analyzed by rotation of seated subject about Z axis /Rz/ 12 p1807 A66-25016

Long-term lower body negative pressure in supine position effect on deterioration in cardiovascular function of man during prolonged bed rest 15 p2430 A66-28657

Rotations effect on functional state of human cardiovascular and respiratory systems at various angles of inclination of torso 15 p2437 A66-29476

Cardiovascular measurement on anesthetized dogs subjected to vibration, noting recording techniques, instrument sensitivity, etc [AIAA PAPER 66-442] 16 p2642 A66-30622

Hypoxia and lower body negative pressure effects on blood volume, and orthostatic and physical tolerance after four weeks of hypoxic bed rest 16 p2640 A66-31124

German Air Force functional tests for early diagnosis of cardiovascular disease among aircrew, also discussing therapy 16 p2640 A66-31133

Cardiovascular deconditioning from weightlessness treated by 9-alpha-fluorohydrocortisone 17 p2858 A66-32180

Exercise performance and cardiovascular response of man exposed for 56 days to oxygen-helium atmosphere 18 p3057 A66-33772

Space cardiology, discussing methods of biological telemetry such as ECG, seismocardiography, kinetocardiograph, arterial oscillography, etc 18 p3059 A66-34364

Consequences of heart-to-foot acceleration gradients on tolerance to positive acceleration determined on variable radius centrifuge 19 p3285 A66-36373

Heart rate response to Valsalva maneuver performed regularly during space flight suggests application to development of astronaut orthostatic intolerance 19 p3286 A66-36376

Tilt table response and blood volume changes associated with 30 days of bed rest, evaluating time required to recover from cardiovascular deconditioning 22 p3853 A66-39785

**CARET WING**

Wind tunnel testing of delta-like lifting bodies at low, supersonic and hypersonic speeds, noting lift to drag ratios and off-design performance of caret wave-rider wings [ICAS PAPER 66-24] 23 p4007 A66-41011

**CARGO**

Role of IATA cargo agent in handling air freight shipments 15 p2619 A66-29789

Future improvements in economic and service performance of cargo carriers in surface modes of transportation 15 p2620 A66-29797

**CARGO AIRCRAFT**  
**S TRANSPORT AIRCRAFT**  
**ARNOT ENGINE**

Practical Phillips cycle for low temperature

refrigeration, noting equal coefficient of performance to that of ideal Carnot cycle under isothermal conditions 09 p1472 A66-20879

Carnot function and relationship to second law of thermodynamics 13 p2209 A66-25860

**CAROTID SINUS REFLEX**

Internal carotid artery insufficiency in neuro-ophthalmic and aeromedical implications, noting ophthalmodynametry in flight qualification 24 p4164 A66-42457

**CARRIER**

SA AIRCRAFT CARRIER

SA MAJORITY CARRIER

SA MINORITY CARRIER

Anisotropic absorption of electromagnetic waves by hot carriers in germanium 02 p0277 A66-12082

Recombination of nonequilibrium charge carriers in p-type indium antimonide, using steady state photomagnetolectric effect 08 p1272 A66-19246

Magnetic field effect on energy distribution and slowing-down times of nonequilibrium carriers in semiconductors when excitation source creates electron-hole pairs 12 p1929 A66-24451

Electric conductivity and thermal emf of solid solutions of silicon-germanium with near silicon composition and various current-carrier concentrations and test temperatures 12 p1929 A66-24454

Excitation of axial oscillation modes in semiconductor lasers analyzed, based on rate equations for chemical potentials of carriers and number of photons 12 p1890 A66-24455

Amplitude probability density of random stationary signal potential and variation of free carriers in germanium semiconductor at near-ambient temperature 13 p2170 A66-26758

Temperature variation and carrier concentration effects on density-of-states effective mass, polar and dipolar thermoconductivity, electron and phonon scattering and electron-phonon interaction in doped Si-Ge alloys 14 p2365 A66-27759

Slow wave interaction with drifting stream of carriers, including collision and diffusion effects, noting TWT and acoustic semiconductor amplifier cases 17 p2878 A66-31820

Carrier travel time in transistor region where changeover from neutral region to depletion layer takes place 18 p3076 A66-33936

Acousto-thermal effect in semiconductors in which carriers are characterized by isotropic effective mass and relaxation time, both dependent on energy 18 p3154 A66-33944

Effect of reduction of breakdown voltage by external illumination of oxide protected planar diode or by nonequilibrium carriers drifting in surface channel 20 p3528 A66-37493

Reflectivity of heavily doped samples of p-type gallium arsenide of known carrier concentration and determination of dependence of effective mass upon carrier concentration 20 p3619 A66-37631

Magnetic field effect on energy distribution and slowing-down times of nonequilibrium carriers in semiconductors when excitation source creates electron-hole pairs 20 p3619 A66-37683

Electric conductivity and thermal emf of solid solutions of silicon-germanium with near silicon composition and various current-carrier concentrations and test temperatures 20 p3619 A66-37686

Excitation of axial oscillation modes in semiconductor lasers analyzed, based on rate equations for chemical potentials of carriers and number of photons 20 p3579 A66-37687

Carrier motion equation in Gunn diode in terms of average drift velocity and diffusion coefficient 20 p3534 A66-38402

Isochronal and isothermal stage II recovery in high energy electron irradiated n-type InSb semiconductor, based on Hall coefficient and electroconductivity 21 p3800 A66-38994

N-type Ge hot carrier Hall mobility, magnetoresistance, Maxwellian energy distribution, electron-electron and intervalley electron-phonon collisions 21 p3801 A66-38997

IR absorption, reflectivity and transmission

in n-type gallium arsenide single crystals at room temperature due to impurities and high carrier concentration 21 p3805 A66-39580

Carrier density, mobility and space-charge-limited current in p-type silicon 22 p3962 A66-40049

Spatial distributions of carrier concentration and internal field in cadmium selenide for various voltages, measuring conductivity and Hall coefficient 23 p4112 A66-41292

Multiple access to ideal bandpass limiter channel in pseudonoise system analysis 23 p4040 A66-41593

Scattering mechanism in space charge region as possible explanation of temperature fluctuations of carrier mobility in n-and p-type indium arsenide 23 p4115 A66-41829

One-dimensional approximation analysis of excess carrier density distribution in illuminated semiconductor and radiative recombination effects 23 p4115 A66-41857

Resistance network analog method determination of carrier density distribution and charge constant in p-n junction for two-dimensional axisymmetric case 23 p4115 A66-41858

Anisotropic thermoelectric power in semiconductors as result of combined phonon and impurity scattering or in presence of carrier with anisotropic effective mass 24 p4252 A66-42352

Decaying free carrier concentration increase in GaAs when subjected to increased level of drive during first cycle 24 p4253 A66-42370

**CARRIER FREQUENCY**  
**SA RADIO FREQUENCY**

Carrier frequency stabilization of FM laser with respect to center of atomic gain profile, using small distortion present in laser oscillation 01 p0083 A66-10966

Rate of intercarrier energy exchange in semiconductor by intraband collisions within Maxwellian distribution of carriers 04 p0566 A66-14314

Degradation of correspondence between reference and modulated carriers by arbitrary offset in time-frequency space in random channel 06 p0831 A66-16342

Received field strength dependence on maximum and minimum usable carrier frequency range for ionospheric scattering 06 p0836 A66-17034

Amplitude modulated carrier frequency signal circuit analyzed, showing open loop linear pulse system 07 p1014 A66-17439

Volt-ampere and current carrier mobility characteristics of semiconductors with electron-phonon bonds proportional to applied field 10 p1582 A66-21968

Amplification of electromagnetic waves in solid state plasma in presence of carrier drift in external electric and magnetic fields 10 p1586 A66-22147

Secondary emission effect on LF noises near carrier frequency of continuously operating high power TWT output signal 11 p1655 A66-22724

Extremely rapid propagation deformations in phase envelope of rectangular-type carrier pulse with extended spectrum 13 p2031 A66-25424

Active transistor modulators for carrier frequency engineering, noting noise reduction, lower power requirements and modulation-filter matching 13 p2032 A66-25485

Gating circuit concept, using carrier frequency approach, applied to inverter, converter and cycloconverter circuits 13 p2043 A66-26296

T-type carrier-frequency RC correcting circuits calculated by equivalent transfer function 14 p2264 A66-27205

Frequency deviations in carrier frequencies of ionospherically propagated HF radio waves produced by fluctuations in solar ionizing radiation 14 p2286 A66-27903

Optical and electrical characteristics of n-type indium oxide films prepared by spraying, noting relation between carrier mobility and particular impurity used 15 p2559 A66-28623

Automatic control systems with carrier frequency information transmission channel,

deriving transfer functions 16 p2872 A66-31552

Amplification of electromagnetic waves in solid state plasma in presence of carrier drift in external electric and magnetic fields 19 p3440 A66-35761

Simultaneous estimate of delay time and drift of carrier frequency during nonoptimum reception against correlated noise background 20 p3519 A66-38002

Rheoelectric integrator simulation method for charge carrier lifetime determination in transistor 21 p3713 A66-39320

Volt-ampere and current carrier mobility characteristics of semiconductors with electron-phonon bonds proportional to applied field 21 p3805 A66-39547

Peak power of pulse modulated RF carrier measured by sequential comparison with reference carrier 22 p3872 A66-39728

Secondary emission effect on LF noises near carrier frequency of continuously operating high power TWT output signal 23 p4037 A66-41462

**CARRIER INJECTION**

Properties of long forward-biased diodes operating in double-injection regime 03 p0346 A66-13318

Long-wave recombination radiation of germanium associated with optical transitions involving photon emission and current carrier heating 04 p0568 A66-14348

Distribution of high plasma density along semiconductor rod, noting surface recombination rate and assuming existence of high level injection at one end of rod 06 p0923 A66-16176

Dependence of lifetime on injected level in high-energy electron-irradiated silicon with production of total displacements per primary recoil event 06 p0939 A66-17156

Carrier temperature injected into InSb effect on shape of direct intrinsic line 07 p1095 A66-17317

Effect of injection of charge carriers on recombination lifetime in GaAs diode laser 07 p1042 A66-17331

Efficiency of DC electroluminescence produced when minority carriers are injected into n-type ZnSe crystals depends on injection efficiency at contacts 07 p1097 A66-17342

Nonisothermal gaseous transport of hot injected plasma in semiconductor 07 p1103 A66-18213

Lifetime degradation rate due to cobalt gamma irradiation reduced in p-silicon due to electron injection at low temperature 07 p1106 A66-18400

Single injection measurements in n-type silicon at liquid-helium temperatures under transient conditions, using pulse measurements 07 p1107 A66-18414

Doppler effects of injected carriers of semiconductor detected in microwave fields, used to measure semiconductor plasma drift velocity 08 p1270 A66-19060

Fluctuation of electric field distributions within germanium sample when one contact of sample is used to inject holes 09 p1412 A66-19994

AC current measurement to determine contribution in semiconductors, which appears as displacement current, from space charge caused by injected and alternatively modulated carriers 09 p1432 A66-20970

One-sided avalanche injection in n-p-p diodes as cause of negative resistance for carrier concentrations smaller than impurity concentration 10 p1515 A66-22085

Spectral density of white noise generated in uniformly multiplying p-n junction calculated for any distribution of injected carriers 10 p1515 A66-22087

Dependence of recombination-generation current and injection coefficient of p-n junction on forward bias voltage 11 p1666 A66-22730

Indium antimonide diodes of various base thickness for high injection levels, results in graphical form applied to magnetic diode production 11 p1666 A66-22740

High injection theories of transport in p-n junctions and transistors in charge neutrality approximation 11 p1756 A66-23020

Double injection in long p-p-n diffused silicon junctions subjected to heat treatment, noting donor density energy level

and electrical properties 11 p1756 A66-23027

VHF power modulation receivers using germanium injection modulators produce no additional noise at frequencies around 25 cps 11 p1670 A66-23228

Injection and extraction of hot electrons in n-n heterojunctions with rapid Maxwellization of electron gas, negative resistance and semiconductor characteristics 13 p2186 A66-25920

Injection-current dependence of intensity of recombination radiation of separate bands in gallium arsenide 14 p2249 A66-27084

Long diode theory not limited by conditions of quasi-neutrality, noting V-I characteristics 14 p2254 A66-27744

Long-wave recombination radiation of germanium associated with optical transitions involving photon emission and current carrier heating 14 p2368 A66-28245

Properties of long forward-biased diodes operating in double-injection regime 14 p2280 A66-28292

Injection of minority carriers at field-induced junction near silicon-silicon dioxide interface 15 p2459 A66-28897

Capacitive current injected by collector effect on internal reaction of plane transistor 16 p2660 A66-30587

Relation between time of voltage buildup and length of diode base in p-n junction at high injection levels 16 p2776 A66-30866

Phase shift lifetime of excess carriers in semiconductors under sinusoidal injection, showing decrease as injection frequency increases 16 p2784 A66-31451

Electroluminescence of silicon carbide diodes 16 p2668 A66-31781

Instability of Sb and Au-doped n-type germanium during carrier injection, examining current-voltage and frequency characteristics and illumination 17 p2974 A66-31858

Strong injection in nondegenerated p-n junction producing electron-hole plasma in n region near junction 17 p2986 A66-33307

Changes in piezoelectric constants of cadmium sulfide crystal caused by illumination and on mechanical vibration caused by fluctuation of carrier injection from electrodes 18 p3153 A66-33613

Transient behavior of current to applied voltage step for semiconductor structure with double injection behavior in initial and final states 19 p3435 A66-35406

Efficiency limitation factors in radiative recombination in electroluminescent GaAs diodes, examining contribution of majority and minority carriers injected into P region 19 p3319 A66-36284

Plasma confinement experiments with electron injection parallel to cusped magnetic field axis in nonadiabatic regime 19 p3422 A66-36549

Astron facility experiments on injection of very intense pulses of relativistic electrons into cylindrical azimuthally symmetric magnetic trap 19 p3423 A66-36551

Electron injection and E-layer buildup in Astron device theoretically studied by one-dimensional model, using Green functions for self-electric and self-magnetic fields 19 p3423 A66-36552

Steady state donor-acceptor recombination rate and effects on diode current and injection electroluminescence, using Shockley-Read-Hall semiconductor phenomenological model 21 p3800 A66-38993

Injection-current dependence of intensity of recombination radiation of separate bands in gallium arsenide 22 p3882 A66-40840

Dependence of recombination-generation current and injection coefficient of p-n junction on forward bias voltage 23 p4045 A66-41468

Indium antimonide diodes of various base thickness for high injection levels results in graphical form applied to magnetic diode production 23 p4045 A66-41478

Space-charge-limited current dependence on time in semiconductor taking trapping into account 24 p4252 A66-42350

Time dependence of space-charge limited current in Fe-doped p-silicon used for determining capture probability, noting retrapping significance 24 p4252 A66-42351

Charge transport through hemispherical metal contacts on semiconductors,

calculating V-I characteristics and injection ratios 24 p4254 A66-42351

**CARRIER MODULATION**

**SA PULSE MODULATION**

Qualitative interpretation of negative resistance by impact ionization of deep level impurities noting temperature, impurity concentration and energy level 05 p0735 A66-14618

Spectral density of FM baseband wave when it is quantized random facsimile signal 05 p0634 A66-15111

Helicons in n-type silicon and germanium calculating collective modes of electrons external magnetic field from frequency and wavelength-dependent conductivity tensor 06 p0923 A66-16176

Power spectrum of random phase modulated carrier, assuming rectangular spectrum for modulating signal 06 p0853 A66-18666

Behavior of carrier mobility in semiconductors with layered structure, with carriers acting as mobile particles in state of independent layers 06 p0929 A66-16180

AC current measurement to determine contribution in semiconductors, which appears as displacement current, from space charge caused by injected and alternatively modulated carriers 09 p1432 A66-20970

Microwave circuit design using transmission line, noting single-sideband suppressed carrier modulator, tunnel diode in low-noise amplifiers, etc 10 p1512 A66-21712

Nomograph for FM/FM telemetry system design 12 p1815 A66-24111

Diode quad modulator suppresses carrier 65 db in high capacity communication system 14 p2247 A66-28866

Coherent transmission of optical radiation from laser source and use of RF subcarrier placed on optical beams for wideband communications purposes 14 p2244 A66-28400

Propagation velocity and attenuation variation effect in coaxial cables frequency modulated carrier evaluated using IBM 1620 computer 16 p2649 A66-30611

Response of phase-locked loop near threshold to input consisting of modulated carrier and white Gaussian noise, noting ratio of SNR 18 p3070 A66-34280

Computer optimization of baseband design of angle-modulated unified carrier space ground communication link 19 p3299 A66-35611

Conductivity modulation by heavy-to-light hole transitions in p-type germanium noting carrier lifetime and ringing of laser pulse 24 p4219 A66-42211

**CARRIER ROCKET**

**S LAUNCH VEHICLE**

**CARRIER SYSTEM**

Indirect optical transitions in semiconductors due to photons and impurities, noting absorption and emission of photons, avalanche and long wavelength radiation 02 p0273 A66-11740

Carrier circuit techniques applied to fluorescence amplifier control systems 09 p1332 A66-20311

Edge absorption of indium-doped cadmium in polarized light, noting exchange interaction between current carriers and Fermi level dependence on carrier concentration 12 p1829 A66-24411

Carrier concentration and minority carrier lifetime measurement in MOS epitaxial layers by capacitance method 13 p2164 A66-25411

Edge absorption of indium-doped cadmium in polarized light, noting exchange interaction between current carriers and Fermi level dependence on carrier concentration 20 p3619 A66-37611

**CARTAN SPACE**

Dirac equation for spin-half particles curved space-time formulated by using Cartan calculus, applied to treatment neutrinos in homogeneous nonisotropic universes and plane wave geometries 12 p1905 A66-24511

**CARTESIAN COORDINATE**

Stereographic mapping of plane Cartesian coordinate grid onto sphere for position navigation use 09 p1401 A66-20911

Relations among vibrational frequencies isotopically substituted molecules when on one Cartesian coordinate of any atom

- involved in motion, obtaining general valence-force-constant matrix 14 p2336 A66-27373
- Best straight line calculated by least squares method 16 p2736 A66-31007
- MHD wave equation for compressible infinitely conducting fluid formulated in Cartesian tensor form 18 p3103 A66-34935
- Flat elliptical crack in infinite elastic medium under shear stress at infinity 22 p3995 A66-40457
- Continuum mechanical Cartesian tensor analysis theorem on completeness of Beltrami stress function 23 p4139 A66-41544
- CARTOGRAPHY**
- SA MAPPING**
- Tables and maps of geomagnetic coordinates corrected by higher order spherical harmonic terms 01 p0082 A66-10888
- Reseau techniques application to cartographic photography to improve analytical procedures, reduce mensuration errors and aid in automating systematic corrections 02 p0228 A66-11382
- Multistrip transformation, of aerial photographs of mountainous regions to obtain scale maps 02 p0229 A66-11896
- Renovation techniques for topographic maps 06 p0879 A66-16325
- Nearly ideal cartographic projections of variable type and reduction of certain functional to minimum 08 p1217 A66-19346
- Graphical device for transformation between horizon system of coordinates and equatorial system, noting construction techniques, operation and application 09 p1381 A66-20395
- Large-scale aerial photographs applied to cartography by taking pictures of same area at varying scales 10 p1534 A66-21132
- Twelve monthly world maps of daily means of total solar radiation incident on horizontal surface 11 p1702 A66-23156
- Cylindrical coordinate system describing geomagnetic field analyzed, noting consequences in magnetic cartography when going from field to time gradients 12 p1875 A66-24970
- Statistical comparison of lunar maps of U.S. Army with Baldwin maps, determining true precision of individual values on both maps 13 p2177 A66-25119
- Soil investigation and geological map preparation from aerial photographs 15 p2505 A66-30014
- Lunar charting for project Apollo 16 p2743 A66-30669
- Graphical method by which small local users of meteorological satellite pictures can identify geographical position of features in image [AIAA PAPER 66-439] 16 p2708 A66-31467
- Lunar topography and cartography, noting application to lunar atlas preparation, absence of magnetic field, etc 17 p2999 A66-32132
- Nearly ideal cartographic projections of variable type and reduction of certain functional to minimum 19 p3348 A66-36054
- CARTRIDGE**
- Neutron radiographic techniques to solve nondestructive testing problem of pyrotechnic cartridge inspection 21 p3806 A66-39153
- CARTRIDGE ACTUATED DEVICE**
- SA THRUSTOR**
- Propellant actuated device /PAD/ functions by using cartridge type energy source wherein chemical reaction is controlled without sonic orifice 18 p3160 A66-34188
- CASCADE**
- SA ELECTRON PHOTON CASCADE**
- Comparing VHF cascade circuits with double diffusion silicon planar transistors and metal oxide field effect planar transistors 04 p0501 A66-14133
- Upper laser states deriving population through cascade transitions from higher layer states of argon ion noting consistency of laser output current dependence with current dependence of cascade rate 20 p3579 A66-37774
- Possibility of realization of multicascade tunnel diode frequency doublers without intercascade amplification 20 p3533 A66-38009
- Stability of solutions to inverse problems in cascade theory, analyzing case when equilibrium spectrum of particles is specified 24 p4269 A66-42922
- CASCADE FLOW**
- Conformal mapping to calculate exit flow velocity of compressible frictionless subsonic flow through plane blade cascade 01 p0005 A66-10212
- Velocity changes and concomitant losses in rotating transonic blade cascade 01 p0005 A66-10213
- Mach number effect on secondary losses of straight turbine-blade configuration at high subsonic velocities 01 p0007 A66-10924
- Axial compressors with nonuniform inlet flow, investigating size of gap between blade rows and rotating stall 01 p0008 A66-10953
- High subsonic flow passing choked flat plate cascade with comparatively small pitch chord ratio 02 p0175 A66-11305
- Three-dimensional theory of incompressible and inviscid flow through mixed flow turbomachines [ASME PAPER 64-WA/GTP-1] 02 p0176 A66-11765
- Laplace transform technique to develop asymptotic solutions to integral equations describing influence of scattering law on radiation damage displacement cascade 02 p0245 A66-11946
- Linear cascade of double-circular-arc airfoils in transonic shear flow compared with subsonic flow 03 p0313 A66-12394
- Aerodynamic damping effect on cascading double circular arc blades vibrating in translatory mode 03 p0313 A66-12397
- Outlet angle in axial compressor cascades, accounting for effect of shear flows, Bernoulli surface rotation and flow separation [ASME PAPER 65-WA/FE-2] 05 p0608 A66-15714
- Supersonic cascade tunnel to evaluate compressor blade performance [ASME PAPER 65-WA/GTP-4] 05 p0661 A66-15719
- Theory of highly rarefied cascade flow and proposal for new axial flow molecular pump in free molecule range 06 p0803 A66-16945
- Flow through straight slot cascade, investigating application to axial compressors for optimum slot parameters 06 p0803 A66-16968
- Clearance loss in rectilinear cascade, emphasizing flow separation and vortices shed at blade tips 07 p0980 A66-17483
- Supercavitating flow past straight cascade of arbitrary hydrofoils 07 p1024 A66-18169
- Assessment of current methods of calculating flows through cascade turbines 08 p1162 A66-18862
- Pseudoshocks in pipe flow in supersonic compressors represented as diffusion process, noting application in cascade and rotor configuration 10 p1479 A66-21363
- Supersonic retardation cascades for lossless reduction of supersonic flow to subsonic in turbines and compressors 10 p1591 A66-21380
- Secondary flows in turbine cascades, obtaining correlations between velocity distributions and circulations along span by expanding Fourier series 11 p1632 A66-22664
- Polynomials used to solve theoretical cascade problems exemplified by two-dimensional incompressible flow through nonstreamlined blades 12 p1796 A66-23786
- Analytic design of turbine blades based on inviscid isentropic supersonic vortex flow theory and performance in cascades 12 p1796 A66-23800
- Airfoil cascade oscillation in near-sonic gas flow 12 p1798 A66-24432
- Compressor cascade flow with blades of different thickness ratio for variable Mach and Reynolds numbers, measuring turbulence level influence on loss coefficients, secondary flow parameters, etc 12 p1799 A66-24553
- Text on cascade flow through airfoils and application to turbomachine and blade design 14 p2220 A66-27699
- Supersonic cascade tunnel used to evaluate compressor blade performance [ASME PAPER 65-WA/GTP-4] 16 p2673 A66-30340
- Turbine blades suitable for supersonic relative inlet velocities and performance in cascade 17 p2841 A66-32889
- Graduate level textbook on axial flow turbine design, examining useful thermodynamic/fluid mechanic concepts, cascade potential flow, turbine efficiency, etc 17 p2991 A66-32991
- Aerodynamics of propulsion plants, discussing cascade flow parameters, sub and supersonic flows, rocket gas cooling, acceleration of electrically conducting gases, etc 19 p3343 A66-36749
- Pressure distribution of steady flow through cascade of closely spaced circular cylinders 23 p4010 A66-41778
- CASCADE WIND TUNNEL**
- Blowdown-type high-speed linear cascade wind tunnel with variable exit pressure, Mach and Reynolds numbers permit boundary layer control 12 p1859 A66-24927
- Versatile facility applicable as high-speed annular cascade wind tunnel or as transonic axial flow test compressor 12 p1859 A66-24928
- CASE**
- S MISSILE CASE**
- S MOTOR CASE**
- CASE BONDED PROPELLANT**
- Ultrasonic testing of solid propellant rocket motors, describing technique for separation of propellant from steel combustion chamber 09 p1385 A66-20965
- Forced vibration function for stresses and displacements in viscoelastic thick-walled cylinder case-bonded to thin shell, noting pressure and strain effect [AIAA PAPER 65-173] 10 p1817 A66-21784
- Cast-double-base propellant mechanical behavior and failure during slow cooling and rapid pressurization of case-bonded rocket motors [AIAA PAPER 65-161] 12 p1934 A66-24704
- Photoelastic analysis of stress and strain distributions of case-bonded propellant grains, calculating internal pressure and dependence on mechanical properties of grain material 23 p4120 A66-41440
- CASSEGRAIN ANTENNA**
- 85-ft paraboloid antenna with new type of Cassegrainian feed system for satellite communication ground station at Nova Scotia 02 p0189 A66-11362
- Design and electrical properties of 25-meter Cassegrainian antenna installed at Raisting ground station for radio communications via satellites 08 p1190 A66-18681
- USN contributions to space communications, noting Syncom program, communications by Moon relay, design of antenna aboard Kingsport vessel, etc [AIAA PAPER 66-270] 12 p1820 A66-24743
- Dichroic Cassegrain subreflector utilizing array of nonresonant elements 15 p2457 A66-28590
- Ground clutter shields for L-band radar using 60-ft parabolic reflector with Cassegrain geometry 15 p2457 A66-28596
- Transmitting antenna of Cassegrain type, noting conical horn, primary and secondary mirror, etc 16 p2681 A66-30955
- Phase error and associated cross-polarization effects in Cassegrain-fed microwave antenna 18 p3074 A66-33528
- Low-cost ground station design for satellite communications, with emphasis on Cassegrain reflector antenna and drive system 18 p3093 A66-33868
- Conical beam scanning by nutating subreflector in Cassegrain antenna system, showing most favorable motion pattern from point of view of electrical performance 18 p3082 A66-34282
- Shadow and diffraction effect of spars on Cassegrain antenna system gain performance 18 p3082 A66-34283
- Diffraction pattern analysis of fields generated by hoghorn-fed Cassegrain antenna operating in Fresnel zone 18 p3083 A66-34289
- Antenna structure analysis by finite-element method and energy method, considering Cassegrain antenna 18 p3255 A66-34312
- Cassegrain satellite tracking antenna with 40-ft diameter, considering reflector geometry and feed design 18 p3085 A66-34319
- R.R.E. North Site Cassegrain aerial system for monopulse tracker radar 18 p3086 A66-34322
- Millimeter wavelength parabolic reflector

- with Cassegrain feed system 18 p3095 A66-34325
- Cassegrain monopulse tracking antenna for LEM and Command Module rendezvous guidance 21 p3714 A66-39524
- CASSEGRAIN OPTICS**
- Optical system of RM-700 astronomical telescope, analyzing prime focus and Cassegrain focus 05 p0680 A66-15206
- Design and construction of 106-cm Cassegrain-type reflector telescope at Pic du Midi observatory 13 p2081 A66-26233
- Sun pumped continuous wave one-watt YAG crystal laser, noting equipment setup and output duration 17 p2934 A66-32620
- CASSIOPEIA A**
- Flux density of Cas A measured, using horn-reflector antenna, response compared with output of reference-noise source 05 p0762 A66-15278
- Aerobee rocket measurements of cosmic X-ray sources emanating from Cygnus A, M-87 and galactic supernova remnant Cassiopeia A 13 p2174 A66-25836
- CASTIGLIANO VARIATIONAL THEOREM**
- Compatibility conditions derived from Castigliano principle by three-dimensional stress function 02 p0299 A66-11804
- CASTING**
- SA INVESTMENT CASTING**
- SA PROPELLANT CASTING**
- Lightweight steel and superalloy casting design, describing avoidance of shrinking, ceramic-shell molds, X-ray standards and weld repair [ASME PAPER 65-MD-3] 05 p0688 A66-15132
- Text on die, permanent mold, shell and other processes for casting aluminum and aluminum alloys 07 p1047 A66-17214
- Thermal shock resistant carbides, using arc-casting techniques, noting microstructure, phase diagram, mechanical properties, etc 07 p1055 A66-18504
- Precision casting based on directional solidification resulting in longitudinal columnar grains with preferred orientation, eliminating transverse grain boundaries in gas turbine elements 09 p1388 A66-20153
- [SAE PAPER 660055] 09 p1388 A66-20153
- Composite casting as metallurgical bonding technique, noting application to weight reduction and increase of corrosion resistance 13 p2086 A66-25779
- Extremely high thermal shock resistance in group IVA carbides of carbide-graphite composites fabricated, using vacuum arc melting and casting techniques 15 p2524 A66-29287
- Casting technique based on directional solidification for nickel and cobalt alloys used in gas turbine blades [AIAA PAPER 65-742] 23 p4079 A66-40973
- CAT**
- Hypoxia in cats and rats due to gradual and abrupt drops in oxygen content of air 15 p2439 A66-29491
- Superacute hypoxia in cats exposed to pure nitrogen followed by artificial respiration 15 p2439 A66-29492
- Chorioretinal lesion produced by pulsed ruby laser beam and complex changes in retinal excitability in cats 16 p2641 A66-31761
- CATALYST**
- SA ELECTROCATALYST**
- SA ENZYME**
- Boron carbide as potential substitute for platinum as catalyst for fuel cell cathodes 14 p2227 A66-28174
- Performance analysis of carbon-supported platinum-ruthenium alloy catalysts with respect to anodic oxidation of methanol in acid electrolyte 17 p2870 A66-31898
- Criteria for selection of mixed metal oxides that can be used as catalysts in oxygen-hydrogen batteries 17 p2871 A66-32949
- CATALYTIC ACTIVITY**
- Macrokinetics of homogeneous-heterogeneous processes in moving media and estimates of initial material concentration in core and boundary layer regions of reaction vessel flow 06 p0971 A66-16543
- Heat transfer rate to stagnation point of catalytic surface placed in slow flow of dissociated oxygen from glow discharge tube and atom-molecule diffusion coefficient 06 p0822 A66-16632

- Concentration profile in laminar boundary layer frozen to wall by catalytic chemical reaction 07 p1019 A66-17245
- Water vapor influence on latitudinal and seasonal distribution of stratospheric ozone concentration explained via Hampson chemical mechanism 08 p1216 A66-19209
- Kinetics of oxidation of various atmospheric contaminants over several catalysts tested in catalytic reactor [AICE PREPRINT 26C] 10 p1491 A66-21190
- Catalytic dehydrogenation of hydrocarbons over chromia-alumina catalyst in absence of added hydrogen to determine heat sink capability 11 p1650 A66-23119
- Methylcyclohexane dehydrogenation over platinum-alumina in absence of excess hydrogen, yielding toluene and hydrogen 11 p1650 A66-23122
- JP-5 fuel-air mixture ignition by platinum catalytic igniters, using ramjet engine baffle combustors 13 p2171 A66-25594
- Properties of laminar boundary layer undergoing surface catalysis with two reactants and two products obeying Langmuir-Hinshelwood mechanism, solving concentration field by integral equation 13 p2019 A66-26663
- Catalytic efficiency of noncatalysts interferes with accuracy of measurement, noting necessity of oxygen treatment of noncatalytic surfaces 15 p2502 A66-29310
- Extraterrestrial life detection based on catalysis of oxygen exchange between labeled oxyanions and water, noting equipment 15 p2441 A66-29961
- Kinetics of oxidation of various atmospheric contaminants over several catalysts tested in catalytic reactor [AICE PREPRINT 26C] 17 p2868 A66-32680
- Dipeptidyl arylamidase I of bovine pituitary tissue and chloride and sulphydryl activation of seryltyrosyl-beta-naphthylamide hydrolysis 17 p2861 A66-32899
- Combustion rate in simultaneous heterogeneous-homogeneous reactions on particle surfaces of catalytic agents added 18 p3265 A66-34550
- Boundary conditions and rate equations in surface-catalyzed reactions 18 p3064 A66-34598
- Diffusion of chemically frozen partially dissociated gas over surfaces with discontinuous catalytic 18 p3266 A66-34928
- Catalytic combustion of cyclohexane, cyclohexene and benzene, determining significance of combustion via computer program 18 p3266 A66-35022
- Periodic volt-ampere curves of anode oxidation mechanism of hydrocarbons, alcohols, ketones, aldehydes and carboxylic acid to carbon dioxide, using Raney platinum catalyst 19 p3295 A66-36291
- Purification of turbine oil by hydrogenation, using Al-Co-Mo catalyst 20 p3575 A66-38382
- Measurement apparatus for studying kinetics of catalytic recombination of gas atoms at solid surfaces of refractory metals, semiconductors and dielectrics 21 p3735 A66-38522
- Surface catalytic and Reynolds number effects on nonequilibrium hypersonic stagnation flow of air or diatomic gas on highly cooled blunt body 22 p3847 A66-40919
- CATAPULT**
- S LAUNCHING**
- S TAKEOFF SYSTEM**
- CATECHOLAMINE**
- Bed rest and water immersion effects on plasma volume and catecholamine response to tilting, noting urinary excretion of norepinephrine and epinephrine 15 p2430 A66-28661
- Urinary excretion of 3-methoxy-4-hydroxymandelic acid during dreaming sleep in man 16 p2638 A66-30635
- CATENARY CURTAIN**
- Mechanics of catenaries for structures and machines in space, noting equations for behavior [AIAA PAPER 66-99] 07 p1037 A66-17899
- CATHODE**
- SA ANODE**
- SA CATHION**
- SA COLD CATHODE**
- SA HOT CATHODE**
- SA PHOTOCATHODE**

- SA THERMIONIC CATHODE**
- Cathode sputtering theory, explaining sputtering dependence on ion angle of incidence, with application in electromagnetic isotope separators, etc 08 p1257 A66-1869
- Potential striae determined in hollow cathode plasma 08 p1264 A66-1918
- Mass and energy transfer characteristics of cathode attachment zone in high intensity arcs [AIAA PAPER 66-187] 11 p1742 A66-22215
- Design of gravity-independent force-free liquid-metal cathode providing unlimited cathode life in gas discharge devices and mercury electron-bombardment thrusters [AIAA PAPER 66-245] 13 p2106 A66-2517
- Enhanced photoelectron emission between 200 and 1300 angstroms, using polygonal cathode to absorb incident radiation 13 p2131 A66-25828
- Boron carbide as potential substitute for platinum as catalyst for fuel cell cathodes 14 p2227 A66-28174
- Arc cathodes as heat sources in low pressure gas flows, noting loss of material and other effects 14 p2346 A66-28178
- Inverse brush cathode design that functions like brush cathode in producing negative glow plasma 15 p2550 A66-28728

 Boundary properties of Cauchy integrals and harmonically conjugate functions in regions having rectifiable boundary 07 p1059 A66-18097  
 Analog computer techniques applied to find roots of complex functions, to generate complex functions by Cauchy integral theorem and to scan z plane 10 p1507 A66-21693  
**CAUCHY LAW**  
 Existence and formal uniqueness theorem of partial linear differential equations with Cauchy conditions on characteristic multiple hyperplane 01 p0095 A66-11075  
 Boundary conditions producing simple waves in Green-elastic and Cauchy-elastic materials that generate three-dimensional

unsteady deformations 06 p0874 A66-17010  
 Attenuation factor and degree of stability of automatic control systems determined by Mikhailov criterion and Chebyshev polynomials 08 p1201 A66-19684  
 Cauchy type integral on hypersphere, defining Cauchy principal values, noting role in theory of functions of complex variables 11 p1724 A66-23366  
 Attenuation factor and degree of stability of automatic control systems determined by Mikhailov criterion and Chebyshev polynomials 18 p3091 A66-34670  
**CAUCHY PROBLEM**  
 Liubich generalization of Laplace transform as related to Cauchy problem 01 p0094 A66-10651  
 Existence of explicit stable difference scheme in correct Cauchy problem for linear systems of partial differential equations with constant coefficients 01 p0094 A66-10654  
 Cauchy problem for linearized Boltzmann equation in kinetic theory of gases 01 p0107 A66-11011  
 Cauchy problem for infinite order linear differential equation 02 p0250 A66-12019  
 Existence and uniqueness of Cauchy problem for Boltzmann equation describing flow past convex body of rarefied gas of structureless particles 02 p0261 A66-12022  
 Comparison lemma for determining uniqueness of solution to Cauchy problem for ordinary differential equations 02 p0251 A66-12243  
 Cauchy problem of heat conduction equation and inversion of Weierstrass transform on certain symmetrical Riemann spaces 03 p0444 A66-12714  
 Singular perturbation for mixed Cauchy problem relative to equation with second-order partial linear hyperbolic derivatives 05 p0708 A66-15094  
 Charged fluid in presence of electromagnetic induction and thermal exchange, noting Cauchy problem, thermodynamic and heat equations 05 p0787 A66-15101  
 Cauchy problem for hyperbolic singular convolution-type integral equation 05 p0708 A66-15320  
 Cauchy problem for first-order nonlinear equation 05 p0709 A66-15360  
 Correct solvability of Cauchy problem for parabolic systems with coefficients satisfying Dini condition 06 p0902 A66-16534  
 Cauchy problem at infinity for certain nonlinear systems of ordinary differential equations 06 p0903 A66-16704  
 Width of influence zone for heat conduction equation in Cauchy problem 06 p0971 A66-16711  
 Classes of uniqueness for solutions of Cauchy problem and representation of positively defined kernels 07 p1056 A66-17598  
 Second order degenerate elliptic and parabolic equations, giving smoothness theorems of solutions 07 p1056 A66-17604  
 Cauchy and boundary value problem for second-order nonlinear ordinary differential equations 07 p1056 A66-17607  
 Stability of solutions of Cauchy problem for linear hyperbolic differential equations 07 p1056 A66-17609  
 Uniqueness theorem for Cauchy problem for heat equation, using Poisson representation 07 p1153 A66-17839  
 Poisson representation and Cauchy problem for heat equation, with improved results over previous paper 07 p1153 A66-17843  
 Two-tangents method for numerical solution of Cauchy problem for system of ordinary differential equations 07 p1058 A66-17911  
 Three-dimensional Cauchy-Poisson problem for waves in viscous fluid 07 p1026 A66-18196  
 Approximate methods for integration of equations of plane isentropic motion of gas at supersonic velocities 08 p1165 A66-19572  
 Cauchy problem for elliptic system 09 p1396 A66-20632  
 Cauchy problem for linearized Boltzmann equation, deriving high accuracy equations of motion of rarefied gases 11 p1735 A66-22338  
 Cauchy problem for two-dimensional Laplace equation in infinite strip 11 p1722 A66-22646  
 Global solutions of Cauchy problem for

quasi-linear first-order differential equations in several space variables 11 p1722 A66-22895  
 General solution for class of initial value problems for systems of aerodynamic equations, constructing reference solution to Cauchy problem involving shock and expansion waves 11 p1694 A66-23363  
 Liubich generalization of Laplace transform as related to Cauchy problem 12 p1903 A66-24022  
 Existence of explicit stable difference scheme in correct Cauchy problem for linear systems of partial differential equations with constant coefficients 12 p1903 A66-24023  
 Cauchy problem for infinite order linear differential equation 12 p1903 A66-24024  
 Necessary and insufficient conditions for well-posed Cauchy problems verified by Fourier analysis 13 p2118 A66-25828  
 Modified Cauchy problem in Bitsadze representation with smoothness conditions imposed on initial conditions and on coefficients of pertinent parabolic equation 13 p2119 A66-25907  
 Asymptotic solution of Cauchy problem for integro-differential equation with small parameter associated with derivative 13 p2119 A66-25908  
 Protter criterion for correctness of Cauchy problem for second-order degenerate hyperbolic equation 13 p2120 A66-26246  
 Cauchy problem of first-order nonlinear partial differential equations 13 p2121 A66-26503  
 Maximum property of Cauchy problem for wave operator 14 p2320 A66-28941  
 Existence and uniqueness of Cauchy problem for Boltzmann equation describing flow past convex body of rarefied gas of structureless particles 14 p2334 A66-27573  
 Uniqueness theorems of Cauchy problem for parabolic equations of heat conduction 14 p2322 A66-27630  
 Estimation of proximity of solution for Cauchy problem of nonlinear differential equations, formulating six theorems 14 p2325 A66-28279  
 Emersion and impulse ring waves, examining rigorous solution of classic Cauchy-Poisson problem with finite energy 15 p2480 A66-29647  
 Generalized Cauchy representations and resonance phenomena 16 p2747 A66-30637  
 Certain incorrect Dirichlet and Cauchy problems of potential theory for elliptic and parabolic equations 16 p2733 A66-30744  
 Correct solvability of Cauchy problem for parabolic systems with coefficients satisfying Dini condition 16 p2735 A66-30972  
 Nonlinear parabolic equations, considering existence, uniqueness theorems, abstract Cauchy problem, etc 17 p2946 A66-32307  
 Pointwise bounds for solutions to Cauchy problem for elliptic systems of partial differential equations, using extension of Payne and Trytten results 19 p3388 A66-35487  
 Solution of mixed boundary and Cauchy problem for system of PDE 19 p3389 A66-35933  
 Protter criterion for correctness of Cauchy problem for second-order degenerate hyperbolic equation 19 p3390 A66-36196  
 Incorrect problems of mathematical physics examined and illustrated by classical Cauchy problem for Laplace equation 20 p3591 A66-37756  
 Powers of integral operator generated by Cauchy problem for second-order hyperbolic equation solved by Riesz method of analytical continuation 21 p3756 A66-38739  
 Differential inequality theorems applied to hyperbolic differential equation, discussing Riemann functions and sufficient conditions for characteristic and Cauchy problems for quasi-linear Bianchi equation 21 p3757 A66-39232  
 Stress function and displacement vector for linear, homogeneous, isotropic and elastic material body occupying bounded simply connected region of space 21 p3772 A66-39354  
 Poisson representation of solutions to Cauchy problem for heat equation, showing applicability of Nicolescu method of imaginary reflection 21 p3837 A66-39612  
 Asymptotic formulas for approximate solutions of Cauchy problem by difference

techniques, considering error of tabulated elements 22 p3939 A66-40154

Cauchy and boundary value problems for second-order hyperbolic equations degenerating within and on boundary of region 22 p3939 A66-40189

Cauchy problem of first-order nonlinear partial differential equations 22 p3939 A66-40439

Stability of trivial solution to system of linear differential equation with distributed delay, determining majorant of solutions to Cauchy problems 22 p3941 A66-40797

Navier-Stokes equations solutions for coefficient of viscosity tending to zero become solution to Euler equations in Cauchy problem for equations of hydromechanics 24 p4193 A66-42232

**CAVITATION**

Tandem interference effects of supercavitating struts within framework of two-dimensional inviscid irrotational and linearized hydrodynamic theory 01 p0057 A66-10443

Solid surface interaction of atoms and molecules of wedge cavity in rarefied free molecular gas stream 04 p0456 A66-14143

Cavitation bubble collapse in venturi,

discussing flow characteristics under large pressure gradient [ASME PAPER 65-WA/FE-20] 05 p0663 A66-15610

Laminar heat transfer and pressure distribution in open cavity supersonic flow, noting heat-transfer coefficient [ASME PAPER 65-WA/HT-37] 05 p0608 A66-15670

Size distribution law for dimensions of gas bubbles formed during cavitation in turbulent flow of liquid 06 p0870 A66-16199

Energy distribution in cavitation bubble collapsing at interface between liquid and solid approximated by localized explosion in ideal gas 06 p0870 A66-16200

Analog computer solution to nonlinear dynamic system model of oscillations associated with cavitating inducers and sequence of trend-and-effect of constituent influences [ASME PAPER 65-FE-14] 06 p0870 A66-16210

Pressure peaks in hydraulic actuator inertia load aggravated in presence of valve overlap, noting cavitation damage [ASME PAPER 65-FE-4] 06 p0808 A66-16213

Flow field in rectangular cavities at low Reynolds number 07 p1020 A66-17941

Predicting onset of cavitation for surface irregularity on parent body 07 p1024 A66-18167

Hydrofoil profile and surface roughness effect on cavitation performance 07 p1024 A66-18168

Jet inducer with multiple nozzles calibrated in liquid mercury and water to minimize feed pump performance degradation due to off-design operation and cavitation 07 p1025 A66-18170

Jet pump cavitation correlation by similarity parameter 07 p1025 A66-18171

Cavitation testing of high efficiency shear force pump and pump rotor, considering air content and cavitation parameters 07 p1038 A66-18172

Bubble coalescence in longitudinally vibrated liquid column 07 p1025 A66-18173

Shaft deflections in turbopumps from cavitation-induced unbalanced hydrodynamic forces in inducer 07 p1038 A66-18174

Cavitation damage in high-temperature liquid metal pumps for Rankine cycle space power plants studied in water model 07 p1038 A66-18175

Cavitation induced between rotating and stationary cylinder in vaporizing liquid within gap of simulated electric motor configuration 07 p1039 A66-18176

Behavior of individual cavitation bubbles in cavitating flows of water and liquid Mercury, using two-dimensional Plexiglas venturi 07 p1025 A66-18177

Motion picture on cavitation hysteresis, details on test apparatus, noting cavitation delay time 07 p1025 A66-18178

Cavitation performance testing in water of mixed flow pump 07 p1039 A66-18179

Impeller 07 p1039 A66-18179

Cavitation damage in alkali liquid metals predicted from properties of water, aviation gasoline and sodium-potassium eutectic 08 p1211 A66-19721

Pressure coefficient criterion for transition between two- and three-dimensional turbulent cavity flow 10 p1523 A66-21791

Cavitation strength of distilled water and distribution of cavitation nuclei, accounting for pressure threshold variance 11 p1688 A66-22607

Nonlinear two-dimensional cavity theory for choked unsymmetric flow over flat plate at arbitrary attack angle, noting variation of lift and drag coefficients [ASME PAPER 65-FE-13] 12 p1864 A66-24544

Cavitation delay time variation with velocity, size, dissolved air content, liquid tension, flow history and surface characteristics [ASME PAPER 65-FE-9] 12 p1864 A66-24552

Cavitating and noncavitating flows past plano-convex hydrofoil, noting oscillation frequency dependence on attack angle, tunnel velocity and cavitation number [ASME PAPER 65-FE-3] 12 p1865 A66-24557

Size distribution law for dimensions of gas bubbles formed during cavitation in turbulent flow of liquid 13 p2064 A66-25915

Energy distribution in cavitation bubble

collapsing at interface between liquid and solid approximated by localized explosion in ideal gas 13 p2064 A66-25915

Water entry cavity for missiles, noting parameters, cavity development and collapse, etc 13 p2071 A66-2677

Shock waves from empty cavity collapsing with spherical symmetry on small solid sphere 13 p2071 A66-2677

Strouhal number relation to cavitation erosion effect of circular cylinder model placed in closed circuit channel, in critical and supercritical Reynolds number range 14 p2275 A66-2766

Cavity depth for waterdrop impacts against water, discussing apparatus, equation for cavity depth, effect of gravitation potential energy, liquid surface behavior etc 15 p2477 A66-2877

Flutter conditions for finite-span hydrofoil under partial cavitation or supercavitation 16 p2688 A66-3133

Hubless inducer with shroud eliminating vane clearance cavitation, noting test data, suction speed, interrelation of boundary layer transition and cavitation, etc [ASME PAPER 66-FE-8] 17 p2932 A66-3326

Resistance to cavitation flow erosion and cracking in metal alloys studied, using rotating disk in water [ASME PAPER 66-FE-11] 17 p2915 A66-3326

Fluid dynamic characteristics of propeller pumps in presence of oscillatory cavitation, noting performance of J-2 rocket engine system [AIAA PAPER 66-559] 18 p3246 A66-3446

Cavitation behavior of Herschel-type venturi tube, noting constant flow for varying venturi profile 18 p3114 A66-3464

Optimum fully cavitating hydrofoils having analytic profiles at zero cavitation number investigated by Levi-Civita method 19 p3342 A66-3642

Cavitation flow of water and ethyl alcohol in venturi tube, noting effect of varying vapor concentration and thermodynamic properties 20 p3544 A66-3692

Munroe jet formation when small cavity of bubble in liquid is subjected to impact of shock 20 p3546 A66-3780

Hydrodynamic implosion mechanism and impact of liquid jets formed by collapsing cavitation bubbles, examining damage to solid boundaries 20 p3547 A66-3783

Frequency of wake shedding from circular cylinder in water flow with values above critical Reynolds number, noting eddy generation and drag coefficient dependence on cavitation number 20 p3548 A66-3803

Cavitational flow past curvilinear airfoil constructed according to Ryabushinski scheme 20 p3548 A66-3817

Approximation method for wall effect in cavitation flow around bodies in water tunnel, examining effect of solid boundary on resistance factor 23 p4056 A66-4172

Intensity and scale effect of cavitation damage investigated by closed circuit hydrodynamic test devices 23 p4057 A66-4188

**CAVITY**

**SA CHAPMAN-FERRARO CAVITY**

Torsion problem of nonhomogeneous infinite circular cylinder with symmetrical located spherical cavity 03 p0442 A66-1330

Cyclotron radius, magnetospheric boundary and Debye length scaling parameters for magnetospheric cavity arising from solid wind-induced geomagnetic storm and visibility of quasi-Van Allen belts 14 p2269 A66-2712

Bistable flow in hemispherical cavity induced by external stream, noting skew position 14 p2274 A66-2743

Convective heat transfer in centrifugal force field of cavity between two rotating disks in turbulent gas flow 14 p2375 A66-2769

Three-dimensional photoelasticity calculation of stresses in spheres with concentric spherical cavities under diametral compression 14 p2401 A66-2776

Stress concentration near circular cavity in nonlinearly deformable material 15 p2608 A66-2878

Local emissivity of vertex point of diffusional or V-groove cavity, noting dependence on wall material, angle factor

and agreement with theoretical solution 17 p3035 A66-32613

Elastic stress field due to spherical inclusion or cavity in infinite exterior region, deriving potential energy dependent on strains, noting skin effects and stress concentration factor 19 p3474 A66-36427

Numerical extrapolation solution of kernel-characterized integral equations for apparent emissivity of conical and cylindrical cavities 20 p3681 A66-38298

Griffith type crack propagation due to localized thermal stress at holes, cavities, penny-shaped cracks and inclusions disturbing uniform heat flow 23 p4146 A66-41993

Shape and motion of cavities in steady planar supercavitating flows, noting transverse gravity field effect on Helmholtz flow past forebody experiencing drag alone 23 p4062 A66-42059

Dual transverse electric mode cavity preselector loaded with large nonferrous metallic perturbation plug 24 p4179 A66-42102

**CAVITY RESONANCE**

**SA RESONANT CAVITY**

Beat frequencies and coherence properties in circularly polarized atomic transitions of gaseous lasers with axial magnetic fields 07 p1046 A66-18429

Beat frequency and rotation of polarization plane in He-Ne laser with axial magnetic field 07 p1046 A66-18430

Thin conducting susceptances in circular TE-11 and TM-01 waveguides measured by cavity-resonance method 08 p1198 A66-19750

Simplified measurement of Q of microwave transmission cavities 12 p1816 A66-24148

Asymptotic solution to motion of solid containing cylindrical or spherical cavities filled with viscous liquid 12 p1863 A66-24356

Small oscillations of pendulum with spherical cavity filled with viscous incompressible liquid 12 p1882 A66-24357

Frequency sweep method of measuring relaxation times and determining Q value in high Q superconducting cavities 14 p2258 A66-27955

Aerodynamically induced resonance in rectangular cavities resulting from doubly tuned amplification of shear layer unsteadiness by shear layer edge tone and cavity enclosure 18 p3047 A66-33676

Electromagnetic cavity resonances in rotating systems investigated through covariant space-time formulation of classical electromagnetic field theory 18 p3119 A66-34451

Laser mirror transducer decoupling from mechanical resonances of laser cavity 19 p3374 A66-35813

Microwave cavity resonant frequency sampler for direct oscilloscope-photographic recording of electron density, recombination and diffusion time in decaying plasma 21 p3740 A66-39389

**CAVITY RESONATOR**

General mode structure and eigenvalues of cavities containing ferrite magnetized in axial direction 01 p0027 A66-10547

Fabry-Perot resonators compared with cavity resonators and microwave interferometers for plasma diagnostics, noting electron density application 03 p0398 A66-12525

Intensity distribution in Fabry-Perot interferometer producing resonant waves for large Fresnel number applied in model for filament-form laser mechanism 03 p0379 A66-13097

High power microwave filters discussing dominant mode and harmonic filters, design, parameters, application and limitation 04 p0493 A66-13677

Mode selective characteristics of plane-parallel dielectric plate as reflector for ruby laser resonator 04 p0533 A66-14330

Rectangular waveguide filter with trapped mode resonators, describing operation, energy handling characteristics and application 06 p0845 A66-16086

Resonant endfire antennas formed by open cavity with radiating elements coupled to cavity field 06 p0853 A66-16657

Electromagnetic propagation in rotating systems, classic analysis of mode-splitting phenomena caused by rotation of cavity

resonator 11 p1658 A66-23266

Instrumentation for measurement of short-term frequency stability of microwave sources 12 p1816 A66-24134

Stripline cavity resonator for low microwave frequency measurements of magnetic and dielectric properties of ferrites 12 p1881 A66-24156

Resonator cavity measurement of microwave Faraday effect in low resistivity semiconductors 14 p2349 A66-26799

Spurious X-band output signals observed during interaction of dual reflex klystron cavities and klystron beams 14 p2258 A66-27956

Stability conditions of two-photon processes, analyzing combination and double radiation by matter placed in resonator cavity 17 p2874 A66-32242

Cavity natural resonant frequencies in cylindrically stratified magnetoplasma examined by exact harmonic series solution 18 p3072 A66-34566

Faraday rotation obtained with pulsed high-field magnets for controlling laser cavities 19 p3372 A66-35380

Theory of steady multimode oscillation of solid state laser extended to cavities with inefficient end mirrors or losses dependent on frequency 23 p4077 A66-41274

Transient ionization levels of hypersonic velocity projectile wakes measured by open microwave resonators phase shift observation 24 p4209 A66-42194

Transmission resonant cavity measurements of electron line densities and collision frequencies in ionized wakes of hypervelocity projectiles 24 p4191 A66-42195

Electron number densities measured behind shock wave in pressure driven shock tube by microwave resonant cavity technique and by electrostatic quasi-Langmuir probe 24 p4191 A66-42197

**CELESCOPE PROJECT**

Tradeoff for high reliability program, discussing development of satellite equipment for Celestscope project 15 p2507 A66-28796

**CELESTIAL BODY**

Sovereignty with respect to outer space especially celestial bodies and space stations, noting international law for free exploration, navigation, etc 03 p0447 A66-13075

Codification to determine international law of celestial bodies resulted in formulation of general principles 03 p0448 A66-13079

Iterative determination of space flight trajectory and velocity represented as sum of Kepler motions about celestial bodies 18 p3234 A66-34635

Space law in planetary explorations 19 p3482 A66-36211

Legal status of Moon and celestial bodies 19 p3483 A66-36213

Celestial bodies nature and structure effect on space flights, detailing interplanetary space properties and orbital motion 24 p4280 A66-43131

**CELESTIAL GEODESY**

Cosmic triangulation systems assessing polar method for determining geodetic satellite coordinates and inherent error estimation and correction 03 p0361 A66-12502

Effect of Moon phase and celestial latitude on lunar modulation of geomagnetic activity 10 p1529 A66-21157

Directional accuracy of chords and angles in geocentric equatorial coordinate system in stellar triangulation 12 p1867 A66-23515

Error analysis for statorscope or radar altimeter phototriangulation readings and radio geodetic coordinate photography phototriangulation 12 p1867 A66-23517

Absolute direction in space and control of stellar triangulation equations 12 p1875 A66-24874

Electronic trispheration, three-dimensional analog of triangulation, for long distance geodetic surveys 12 p1875 A66-24936

Directional accuracy of chords and angles in geocentric equatorial coordinate system in stellar triangulation 21 p3732 A66-38659

Error analysis for statorscope or radar altimeter phototriangulation readings and radio geodetic coordinate photography phototriangulation 21 p3732 A66-38661

Glossary of gravimetric and celestial

geodesy 23 p4063 A66-41525

**CELESTIAL MECHANICS**

**SA ASTRODYNAMICS**

**SA PERTURBATION THEORY**

Finite collision time for artificial celestial body moving under influence of Newtonian force from attractive center 01 p0137 A66-10794

Classification of all nonplanar motions in problem of two fixed gravitation centers of arbitrary masses corresponding to real potential 02 p0292 A66-12234

Terrestrial gravitational potential determined by observation of satellite motion, assuming trajectory is determined solely by force field 03 p0428 A66-13027

Textbook on celestial mechanics, meridian astronomy, instrumentation, solar research and astrophysics 05 p0760 A66-15087

Solution of extremal problems of celestial mechanics 05 p0764 A66-15318

Equilibrium shape of Moon, assuming homogeneity computing mean rotation configuration and pertinent single parameter equilibrium shapes 07 p1133 A66-17304

Resonance cases and small divisors in third integral of motion used to calculate galactic orbits on plane of symmetry of nonaxisymmetric galaxy 08 p1296 A66-19353

Trajectory analysis and Birkhoff rings in restricted three-body problem in three-dimensional coordinate system 09 p1453 A66-20251

Book on celestial mechanics considering Laplace-Newcombe method, Hill planet and lunar methods, periodic orbits methods, etc, using differential equations 09 p1459 A66-20916

Book on mathematics underlying celestial mechanics, including central force problem, n-body problem, Hamilton-Jacobi and perturbation theories 11 p1776 A66-23202

Hamiltonian mechanics applied to planetary and artificial satellite motion problems 12 p1950 A66-24402

Numerical methods of celestial mechanics and Airy method computation of trigonometric series with numerical coefficients 12 p1950 A66-24403

Inclined periodic solutions of restricted three-body problem in form of orbit parameters 13 p2185 A66-25809

Soviet monograph on celestial mechanics of satellites and space probes covering trajectory problems, two-and three-body systems, space flight duration between two points, etc 13 p2188 A66-26465

Book on satellite orbital flight trajectory theory and celestial mechanics 15 p2595 A66-29128

Analytical mechanics, motion stability, celestial ballistics - All-Union Conference, Moscow, January-February 1964 15 p2538 A66-29144

Poincare-von Ziepel procedure in celestial mechanics applied to satellite motion about oblate Earth 16 p2796 A66-30263

Lagrange theorem extended for solution of three-body problem to regular configurations of more than three particles 16 p2804 A66-31393

Mars spacecraft guidance and navigation requirements, noting entry trajectory, possible guidance errors and gravitational constant uncertainty [AIAA PAPER 66-532] 16 p2744 A66-31501

Celestial mechanics covering two-body problem, planetary and asteroid theory, interplanetary trajectories, lunar probe, spherical harmonics, etc 17 p2997 A66-32019

Satellite orbit stability discussing proof of Haseltine formal stability theorem, doubly periodic expansions, satellite motion around oblate curve, etc 17 p2999 A66-32065

K-orthogonality for inversion of state transition matrices 17 p2946 A66-32482

Perturbation theories for equations of celestial mechanics, obtaining analytical solutions in terms of Chebyshev polynomial series [AIAA PAPER 66-534] 18 p3226 A66-33664

Dynamical system of two degrees of freedom, with application to restricted problem and lunar theory 18 p3234 A66-34654

Book on methods in astrodynamics and celestial mechanics including libration points, satellite motion, orbit determination, optimization, optimal control,

- etc 19 p3460 A66-35887  
Theory and application of motion associated with equilibrium configurations of dynamical systems applied to astronomy and space dynamics 19 p3461 A66-35888  
Effect of Sun perturbations on motion near Earth-Moon equilateral libration points [AIAA PAPER 65-683] 19 p3461 A66-35890  
Libration point motion in restricted four-body problem and stable trajectory determination for Earth-Moon-Sun system, noting effect of initial configurations of system [AIAA PAPER 65-684] 19 p3461 A66-35891  
Restricted three-body problem in plane, with two equal masses and nonperiodic orbits 20 p3653 A66-37798  
Critical values of satellite orbit inclinations accounting for effects of first-order perturbations and mean anomaly 20 p3654 A66-37853  
Coplanar orbit transfers by tangential impulses at apse point in graphical presentation of solutions 20 p3657 A66-38176  
Difference assessment between secular and long period perturbations generated by similar initial conditions for celestial mechanics problems 22 p3985 A66-40959  
Spin-orbit coupling in solar system, examining resonant spin rates for one-and two-body planet/ satellite systems with eccentric orbits 24 p4272 A66-42203
- CELESTIAL NAVIGATION**  
Recognition procedure identifying given star constellation despite erroneous scanning, for application in celestial navigation 01 p0102 A66-10619  
Star pattern recognition system for spacecraft attitude control [AIAA PAPER 64-652] 03 p0390 A66-12755  
Remote extraterrestrial surface navigation, discussing image-tube based stellar field acquisition system 04 p0543 A66-13590  
Complex and hand-held instrumental devices for celestial navigation, noting Apollo scanner and sextant assembly 04 p0521 A66-14024  
Minimum field of view required for rapid accurate navigation star identification-acquisition established between 25 and 30 degrees 06 p0906 A66-16247  
Two automatic astronomical navigation and tracking systems compared for accuracy and performance in civil aircraft 07 p1070 A66-17722  
Astronavigation applied to piston aircraft and supersonic jets, advantages and shortcomings 07 p1076 A66-17797  
Manual control sextant sighting performance for space navigation, using simulated and real celestial targets 10 p1554 A66-21894  
Electro-optical celestial guidance system with miniaturized computer and scanning sensor 12 p1909 A66-24104  
Recognition procedure identifying given star constellation despite erroneous scanning, for application in celestial navigation 13 p2123 A66-25179  
Electro-optical automatic celestial guidance system for spacecraft and satellites 13 p2124 A66-25643  
Automatic instrumentation for celestial sightline tracking of spacecraft 18 p3132 A66-33871  
Autonomous celestial and selenocentric spacecraft navigation and orbit prediction without using ground tracking stations 20 p3598 A66-38253
- CELESTIAL OBSERVATION**  
Modulation type radiometer with input parametric converter used for observation of weak radiation from Moon, Jupiter and other celestial sources 04 p0520 A66-13883  
Comet Ikeya-Seki /1965f/ discussing visual, telescopic and spectral observation 04 p0578 A66-14022  
Meridian astronomy methods including determination of instrumental errors, derivation of systems of right ascensions and declinations and determining systematic errors 05 p0761 A66-15089  
Spectroscopic observations of Sun-grazing Ikeya-Seki Comet /1965f/ at minimum possible heliocentric distance 05 p0761 A66-15100  
Disappearance of Saturn rings every 15 years due to profile view, thinness and lack of self-luminosity 07 p1136 A66-17813  
Sky observations with balloon-borne X-ray telescope having sodium iodine scintillator 09 p1442 A66-20466  
Astronomical observations from space vehicles - International Astronomical Union Symposium, Liege, Belgium, August 1964 10 p1596 A66-21078  
Possible atmosphere detection on J-II and J-III satellites revealed by excess brightness on eclipse reappearance 10 p1604 A66-21202  
Planetary nebulas noting observational problems, parallax, proper motion, distance, etc 11 p1767 A66-22260  
Two-year study of solar seeing conditions with recording monitor near Sydney, Australia indicates average of 23 sec per hour of observation 11 p1768 A66-22365  
Halley comet motion during return of 1910, obtaining orbits via differential correction procedures, including perturbation by all planets but Pluto 11 p1769 A66-22531  
Annual astronomical almanac compiled by Madrid Observatory 11 p1770 A66-22638  
Comet observations in IQSY 11 p1771 A66-22768  
Astronomical and orbital data of comet Ikeya-Seki noting elements for parabolic orbit, elliptical orbit, etc 13 p2188 A66-26319  
Daylight observations of 1965 f comet, noting influence on solar corona, spectra at various wavelengths, polarization data and results of photoelectric scans 15 p2592 A66-28645  
Modulation type radiometer with input parametric converter used for observation of weak radiation from Moon, Jupiter and other celestial sources 15 p2503 A66-29695  
Streaking fireball of January 14, 1965, analyzing position, motion and brightness 15 p2601 A66-29939  
Comet Ikeya-Seki near perihelion passage 16 p2694 A66-30657  
Aircraft as platform for solar eclipse observation, discussing history, project APEQS, navigation problems, aircraft used, etc 16 p2705 A66-30822  
Aircraft stabilization for solar eclipse observation, emphasizing use of autopilot for maximum control 16 p2743 A66-30823  
Photographs from observatories of comet Ikeya-Seki discovered in constellation Hydra 16 p2804 A66-31309  
Sunspot cycles from 1954 to 1964, considering difference in activity observed in Northern and Southern Hemispheres 16 p2804 A66-31311  
Photographic observations of minor planets at Sydney during 1964 17 p3003 A66-32822  
Telescopic and photographic observation of cometary structure, particularly coma region 17 p3010 A66-33377  
Weak comets in vicinity of Sun during solar eclipse 17 p3010 A66-33382  
Empirical decision-making techniques, determining nature of quasi-stellar source or galaxy 18 p3234 A66-34616  
Sidereal anisotropy indicated for charged galactic cosmic radiation obtained by celestial scanning, using narrow angle muon telescope 21 p3808 A66-38466  
Evidence for natural ephemeral Earth satellite including latitude and longitude, date, time, azimuth and elevation of observations 22 p3978 A66-40005  
Bottom-moored sonar beacons surveyed in absolute position coordinates, noting transmitter-receiver and celestially augmented inertial navigator and error minimization techniques 22 p3945 A66-40323  
Astronaut observation in Gemini and Mercury space flights that stars cannot be seen in daytime, noting first-magnitude stars and background illumination 22 p3982 A66-40523  
Venus phase simulator experiment indicating anomaly due to observer 23 p4128 A66-41208  
Orbit determination for comet 1965 F Seki-Ikeya, projecting collision with Sun at perihelion 23 p4129 A66-41573  
Tables of observational statistics on comets, minor planets and natural satellites 24 p4273 A66-42205  
Zodiacal light, airglow and falling atmospheric dust measurements and observations in terms of solar orbiting small diameter particle clouds 24 p4276 A66-42666  
Stellar extinction measurements made in Gemini IX flight, determining existence and location of Link layer from airglow study 24 p4280 A66-43026  
Interplanetary space and celestial observations from ground stations, satellite and space rockets 24 p4280 A66-43131
- CELESTIAL SPHERE**  
Cosmic ray distribution intensity over celestial sphere determined, detecting anisotropy against background of isotropic variations, using spherical analysis 09 p1439 A66-20222  
Night sky and zodiacal light polarization near 5000 angstroms over celestial sphere noting dependence of zodiacal light distribution on angular distance from sun 16 p2698 A66-31252  
Book on spherical astronomy including celestial coordinate systems, parallax, diurnal motion, precession and nutation, time measurement, etc 16 p2806 A66-31732
- CELL**  
S BIOLOGICAL CELL  
S ELECTRIC CELL  
S ELECTROCHEMICAL CELL  
S FUEL CELL  
S GALVANIC CELL  
S GAS CELL  
S HEXAGONAL CELL  
S KERR CELL  
S KNUDSEN CELL  
S PARTICLE IN CELL TECHNIQUE  
S PHOTOCONDUCTIVE CELL  
S PHOTOELECTRIC CELL  
S PHOTOVOLTAIC CELL  
S SOLAR CELL
- CELL DIVISION**  
SA MITOSIS  
Mitotic phases of Tradescantia paludosa microspores as affected by spaceflight factors of Voskhod I 10 p1486 A66-21981  
Text on evolution, interpreting function of body organs in terms of chemical processes and tracing development of complex organic molecules 10 p1487 A66-22066  
Response of tissue culture cells to low magnetic fields, noting no quantitative growth differences 12 p1807 A66-25013  
Maximum photosynthetic capacity for Chlorella determined experimentally from cell reproduction rates 15 p2440 A66-29502  
Magnetic effects on reproduction and metabolism of normal and diseased mammalian cells in vivo and in vitro 17 p2859 A66-32222
- CELLULOSE**  
SA NITROCELLULOSE  
SA WOOD  
Antibody globulin coupled to diazotized aminoaryl derivative of carboxymethyl cellulose to form immunoadsorbent for extracting antigens 12 p1805 A66-23566  
Cellulose and derivatives and coupling with biochemical substances 16 p2646 A66-31151
- CEMS SYSTEM**  
SA AIRCRAFT MAINTENANCE  
Manned aircraft self-contained checkout and fault isolation systems, discussing characteristics and operational concept [ISA PREPRINT 1.3-3-65] 05 p0684 A66-15511
- CENTAUR LAUNCH VEHICLE**  
SA ATLAS CENTAUR LAUNCH VEHICLE  
Test program for thermal-vacuum testing of Centaur vehicle components 16 p2808 A66-30481
- CENTAUR PROJECT**  
Centaur project with assessment of reliability of explosive one-shot devices 14 p2394 A66-28444
- CENTRAL ELECTRONIC MANAGEMENT SYSTEM /CEMS/**  
S CEMS SYSTEM
- CENTRAL NERVOUS SYSTEM**  
SA AUTONOMIC NERVOUS SYSTEM  
Human stress reactions to three-day march, sleep deprivation, food and oxygen starvation, noting changes in central nervous system functions 04 p0467 A66-14086  
Anoxia effect on central nervous system in forms of personality, vision and consciousness impairment 10 p1489 A66-22114  
Electrophysiological study of responses of central nervous system on action of some factors of space flight 11 p1642 A66-22487

Physiological study and instrumentation of pigtail Macaque under extended exposure to near-zero gravity environment 13 p2014 A66-25514

Residual pathologic changes in central nervous system of dog following rapid decompression to 1 mm Hg 19 p3286 A66-36381

Soviet papers on effect of space flight factors on functions of central nervous system 23 p4025 A66-41334

Peculiarities in effects of ionizing radiation on space vehicle crew and on functioning of central nervous system 23 p4026 A66-41335

Vibration stimulus effect on oxygen metabolism of brain in rats with partial destruction of auditory and vestibular apparatus and in anesthetized control rats 23 p4027 A66-41341

Vibration effect on conditioned reflexes, oxidation mechanism and electric activity of brain in rats 23 p4027 A66-41342

**CENTRAL NERVOUS SYSTEM DEPRESSANT**

S MEPROBAMATE

S PENTOBARBITAL SODIUM

**CENTRAL NERVOUS SYSTEM STIMULANT**

S EPINEPHRINE

S NOREPINEPHRINE

S STRYCHNINE

**CENTRIFUGAL COMPRESSOR**

Flow field in centrifugal compressor impeller [ASME PAPER 65-WA/GTP-7] 05 p0608 A66-15722

Boundary layer influence on performance of centrifugal-compressor impellers, measuring discharge velocity profile [ASME PAPER 65-WA/FE-7] 05 p0609 A66-15728

Boundary layer influence on performance of centrifugal-compressor impellers, measuring discharge velocity profile [ASME PAPER 65-WA/FE-7] 12 p1799 A66-24538

Shaft sealing systems on centrifugal compressors, noting labyrinth, restrictive ring shaft, liquid film and mechanical and special seals [ASME PAPER 66-MD-42] 21 p3742 A66-38490

**CENTRIFUGAL FORCE**

Stresses calculated in centrifugal impeller with cover disk by two-dimensional stress analysis and digital computer program [ASME PAPER 65-WA/FE-17] 05 p0780 A66-15701

Fatigue testing of structure, using machines producing loads by centrifugal forces 06 p0965 A66-16488

MHD plasma accelerator with circular autostable path where centrifugal force is balanced by spontaneous centripetal MHD force 09 p1410 A66-20985

Equations for translatory motion of lifting body moving at hypersonic speed, considering Earth sphericity, noting effect of centrifugal forces 13 p2193 A66-26448

Rotary deployment and stabilization mechanisms for solar collectors [AIAA PAPER 64-732] 13 p2005 A66-26631

Concentration profile of heavy species for binary fluid mixture under body force from uniformly mixed upstream condition, considering inviscid hydrodynamical model 18 p3103 A66-34925

**CENTRIFUGAL PUMP**

Liquid-metal heat transport fluid circulation, discussing molten lithium pump development and testing for high performance mobile nuclear plants [ASME PAPER 65-WA/FE-18] 05 p0689 A66-15611

Canned motor pump for nitrogen tetroxide or hazardous liquids, noting ball bearings, chemical materials, balancing drum and helium leak tested motor parts [ASME PAPER 65-WA/FE-3] 05 p0691 A66-15715

Hydraulic performance and sensitivity of various configurations of centrifugal pumps to tip clearance effects [ASME PAPER 64-WA/FE-17] 06 p0884 A66-16211

Jet pump cavitation correlation by similarity parameter 07 p1025 A66-18171

Liquid-metal heat transport fluid circulation, discussing molten lithium pump

development and testing for high performance mobile nuclear plants [ASME PAPER 65-WA/FE-18] 10 p1539 A66-21502

Cermet face seals for inert gas environment sealing shaft of liquid-metal pumps employing conventional lubrication system [ASLE PREPRINT 65AM 4C4] 10 p1540 A66-22039

Three-dimensional flow visualization approach to complex flow characteristics in centrifugal impeller [ASME PAPER 66-GT-83] 14 p2274 A66-26989

Geometrically different volutes effect on impeller of centrifugal pump performance, discussing radial thrust, head and runout capacity [ASME PAPER 66-FE-14] 17 p2932 A66-33268

Centrifugal pump for liquid metal power-transmission in flight control systems [ASME PAPER 66-FE-20] 17 p2932 A66-33273

Natural convective heat transfer to gas turbine rotor blade and thermal resistance of cooling system using centrifugal pump 20 p3627 A66-36926

**CENTRIFUGAL STRAIN**

Anatomical studies in dog anesthetized with pentobarbital and chlorpromazine and subjected to repeated prolonged positive G 03 p0327 A66-12362

Protein synthesis in liver of adrenalectomized and hypophysectomized rats exposed to centrifugation stress 13 p2010 A66-25899

**CENTRIFUGE**

**SA HUMAN CENTRIFUGE**

Acceleration effect on food reinforced DRL and FR schedules 03 p0325 A66-13175

Harmful oscillation elimination from high rpm gyroscopic centrifuge by introducing one elastic bearing into dynamic system 08 p1307 A66-18877

Biophysical property similarities of several human enteroviruses as shown by density gradient ultracentrifugation of virus mixtures 13 p2009 A66-25872

Tables for evaluation of Faxen approximation to solution of Lamm equation 14 p2320 A66-27115

Aerospace medical advances in Polish military aviation and pilot testing procedures and equipment, particularly low pressure chamber and centrifuge 14 p2271 A66-28365

Structural mounting of large diameter cylindrical missile section in centrifuge for high acceleration environmental testing 16 p2677 A66-30458

Fast rise programmed centrifuge, noting acceleration testing capabilities, power speed control, etc 16 p2679 A66-30473

Centrifuge performance, noting angular velocity constancy vibration levels in terms of acceleration, temperature effects, etc 16 p2679 A66-30476

Consequences of heart-to-foot acceleration gradients on tolerance to positive acceleration determined on variable radius centrifuge 19 p3285 A66-36373

Twofold transversely applied 8-g centrifuging effect on functional state of otolithic part of vestibular apparatus of guinea pigs 23 p4026 A66-41337

**CENTRIPETAL FORCE**

MHD plasma accelerator with circular autostable path where centrifugal force is balanced by spontaneous centripetal MHD force 09 p1410 A66-20985

Degree of partiality effect on centripetal turbine operation 23 p4122 A66-41799

**CENTURION AIRCRAFT**

S CESSNA 210 AIRCRAFT

**CEPHEID**

Second postulate of special theory of relativity proved by existence of short period Cepheids 05 p0759 A66-14888

Computation method used in pulsation of Lyrae models extended to models of Cepheid variables, noting instability of appropriate period, mass size, luminosity and velocity curves 20 p3650 A66-37339

Pulsation in cepheid instability strip in H-R diagram, giving equations for spherically symmetric motion 21 p3816 A66-39489

**CERAMIC BONDING**

Insulating materials, discussing impregnated refractory ceramic foams for

high energy hybrid motors 06 p0899 A66-16293

Hybrid circuit rejects avoided by using ceramic channels and ultrasonic bonders during assembly of active semiconductor devices and integrated circuits to thin film network 10 p1512 A66-21759

Metal-ceramic boundary structures and reactions, considering metal-oxide and metal-glass interfaces, ionic and covalent bonds, oxidation, reduction, solution and precipitation 13 p2108 A66-25767

Ceramic structural design, discussing laboratory specimen design, brittle material strength, boundary conditions, statistical parameters, etc 18 p3125 A66-33733

Strength of ceramic specimens with parallel cylindrical holes, noting strength/weight characteristics during compression loading 21 p3753 A66-38677

Adhesive and bonding techniques evolution for general and specific use in aircraft and aerospace industry, noting elastomeric and ceramic adhesives 22 p3928 A66-40418

Thermocompression bonding, discussing aluminum wire connection to substrate material via eyelet bond 23 p4044 A66-41197

**CERAMIC COATING**

Heat resistant ceramic coating on steel produced by gas-flame spraying of refractory oxides investigated for effective heat conductivity and integral radiative capacity 03 p0443 A66-12514

IR radiation of refractory solids with radiation properties of flame-sprayed ceramic coatings, determining normal spectral emittance, integrated normal total emittance and IR intensity curves at 1300 K 03 p0386 A66-13100

Oxidation-resistant ceramic coatings for tungsten, tantalum, molybdenum and niobium 07 p1051 A66-18300

Continuous hot pressing apparatus design, operation, production economy and results with oxidic materials and metals 16 p2709 A66-30255

**CERAMICS**

**SA CERMET**

Design and fabrication techniques for high voltage impulse generation by conversion of mechanical to electrical energy, using piezoelectric ceramics 01 p0016 A66-10916

Powdered or densified nonconductive ceramic materials analyzed by spark source mass spectrography based on use of conducting probe 02 p0188 A66-11294

Ceramics technology noting properties, high temperature and corrosion resistance, brittleness, comparison with metals, etc 02 p0248 A66-11741

Nucerite, ceramic-metal composite with high mechanical strength and abrasion resistance noting crystal structure, application, properties, etc 02 p0244 A66-11742

Piezoelectric crystals and ceramics properties that affect application in electroacoustic transducers 03 p0408 A66-12408

Heat transfer through porous ceramics and thermally degraded ablation material, discussing conductivity [ASME PAPER 65-HT-46] 05 p0785 A66-14756

Metal fiber reinforced ceramics 05 p0705 A66-14817

Radiation damage to crystalline lattices by energetic particles, discussing consequences on physical behavior of solids, particularly ceramics 05 p0738 A66-15471

Thermodynamic calculations and experimental measurements to illustrate material properties pertinent to ablation process and to suggest refractory compounds as ablating materials 05 p0706 A66-15472

Electromechanical hysteresis and relaxation effects in piezoelectric ceramics 06 p0927 A66-16722

Polarization and volt-ampere characteristics of ferroelectrics simultaneously under static and alternating fields 06 p0854 A66-16726

Papers on ceramics emphasizing relationship between microstructure, fabrication techniques and properties, including review of aerospace technological applications 07 p1050 A66-18293

Relation between fabrication, microstructure and properties of solid

ceramics 07 p1051 A66-18294  
Oxide ceramics fabrication, with particular attention to microstructure 07 p1053 A66-18296  
Composite ceramic systems consisting of metallic or organic phase and ceramic phases, microstructure, mechanical strength and thermal expansion 07 p1051 A66-18299  
Refractory materials properties used in nuclear fuel element 07 p1079 A66-18302  
Effect of space environment on ceramic materials, considering atmosphere (including vacuum/), thermal, radiation and meteoroid environments 07 p1147 A66-18307  
Text on modern ceramics, principles and concepts 07 p1054 A66-18495  
Ductility in polycrystalline single phase ceramics, noting behavior at room and high temperature of single crystal structure, dislocation, etc 07 p1054 A66-18498  
Brittle fracture in ceramic materials, noting Griffith theory on crack propagation, plastic deformation occurrence, stress distribution effect, etc 07 p1054 A66-18499  
Interrelationship among fabrication procedures, microstructure and properties of ceramic materials, noting dependencies on porosity, grain size, temperature, pressure, etc 07 p1054 A66-18500  
Structural design with ceramic materials, using prestraining and prestressing for improved tensile and impact strength and stiffness 07 p1054 A66-18501  
Casting of plastic-ceramic dies 08 p1229 A66-18687  
Construction of hot forming tool made of fused silica ceramic 08 p1229 A66-18691  
Liquid titanium reaction with nonmetallic refractory ceramics, Ti melting behavior and electron-probe microstructural analysis 08 p1236 A66-18759  
Temperature and bias characteristics of ceramics of Pb/Zr-Ti-O-3 and its families, using schematic model on reorientations of 180 and 90 degree domains 08 p1243 A66-19061  
Ceramic and graphite fibers and whiskers, Air Force sponsored monograph 09 p1392 A66-20475  
Silicone alumina low temperature low-pressure plastic molding technique for precision forming of ceramic materials for aerospace structural application 10 p1538 A66-21130  
Evaluations for multiaxial-stress properties of ceramic materials including elastic and plastic strength, stiffness, ductility, resilience, etc 12 p1958 A66-23631  
Explosive compaction of ceramic materials 12 p1900 A66-24720  
CERCOR glass-ceramic axial flow rotary regenerator as inexpensive component for gas turbine regeneration [ASME PAPER 66-GT/107] 14 p2301 A66-27004  
Stannic oxide ceramic formation and dielectric constant and resistivity measurements and evaluations 14 p2362 A66-27499  
Superconductivity in ceramic mixed titanates 16 p2770 A66-30180  
Special ceramics - Symposium, British Ceramic Research Association, Stoke-on-Trent, U.K., July 1964 16 p2728 A66-30244  
Preparation and mechanical properties of spinel, discussing microstructure, transverse and compressive strength and Young's modulus 16 p2730 A66-30251  
Ceramic materials selection for principal high temperature components of gas turbines 16 p2790 A66-30256  
Rupture strength increase in tungsten and molybdenum chopped wires silicide coated by pack diffusion and incorporated in mullite matrix by vacuum hot pressing [ACS PAPER 7-C-65F] 16 p2723 A66-30949  
High temperature compressive deformation equipment for ceramic materials noting loading, alignment and stress-strain measurement 16 p2682 A66-30950  
Behavior of ceramic insulating materials under nonisothermal conditions at high temperatures 16 p2731 A66-31605  
Absorption spectra modification in silica ceramics after gamma irradiation from Co-60 19 p3388 A66-35463  
Scale model of submerged VLF antenna using lossy ceramic powder to model ice

and snow for submarine communication, geophysics, etc 19 p3321 A66-36416  
Optimum fabrication of microelectronic devices by interconnection of integrated circuits on ceramic substrates 19 p3323 A66-36820  
Honeycomb structure, examining assembly, skin delamination at spars or terminal fitting, glasscloth radome and inspection techniques 20 p3671 A66-37827  
Mechanical properties of metallic and ceramic fibers in metallic matrices and refractory fibers in ceramic matrices 21 p3751 A66-39231  
Ceramic fiber reinforcement of steel, aluminum, nickel and titanium alloys 21 p3752 A66-39242  
Mechanical-type filters used in electronic circuits including quartz filters, piezoelectric materials, metallic resonators, ceramic converters, torsion resonators and miniaturized filters 21 p3717 A66-39628  
Velocity of sound vibration in partially plated piezoelectric ceramics differs in plated region and unplated region due to piezoelectric effect 22 p3877 A66-40186  
Fired circuitry application to ceramic substrates by thick film process and use of thin films on ceramic and glass substrates by vapor deposition 23 p4043 A66-41126  
Fuel cells with ceramic electrolyte operating at high temperatures, calculating voltage and efficiency 24 p4161 A66-42503  
**CEREBRAL CORTEX**  
Responses of neuronal elements in visual cortex of unanesthetized cats shown to depend on time interval length 12 p1806 A66-24232  
Perceptual masking and enhancements of two flashes in evoked cortical potentials recorded by electroencephalography 23 p4029 A66-41549  
Internal carotid artery insufficiency in neuro-ophthalmic and aeromedical implications, noting ophthalmodynamometry in flight qualification 24 p4164 A66-42457  
Neuronal spike populations and EEG activity in chronic unrestrained cats, noting multiple unit responses of acceleration/inhibition during behavioral conditioning procedures 24 p4169 A66-43098  
**CEREBRUM**  
Electric impedance measurements in hippocampus, amygdala and midbrain reticular formation during altering, orienting and discriminative responses in cat 24 p4166 A66-43167  
**CERENKOV COUNTER**  
Balloon-borne scintillation counters combined with Cerenkov counter for measuring primary cosmic ray charge and energy spectra during 1963 07 p1123 A66-17994  
Cerenkov counter measurement of nuclear component of cosmic rays onboard Elektron II satellite as function of solar activity during IQSY 10 p1595 A66-21043  
Spark chamber with vidicon readout for balloon-and satellite-borne high energy gamma ray astronomy analysis, noting Cerenkov counter 12 p1877 A66-23685  
Operation of scintillation and Cerenkov counters used for recording cosmic radiation, noting design, amplitude properties, collection of scintillating light from phosphor, etc 12 p1882 A66-24185  
Cosmic ray anisotropy and gamma rays in Orion analyzed, using Geiger counter and Cerenkov telescope 15 p2579 A66-29525  
High energy mountain-altitude nuclear interactions produced by pions and nucleons, pion/proton and neutral/charged interacting particle ratios studied, using multiplate cloud chamber with air Cerenkov counter and absorption spectrometer 15 p2584 A66-29554  
High altitude cosmic ray measurements by Cerenkov scintillator counter system near solar minimum 17 p2994 A66-33147  
Balloon-borne Cerenkov scintillation counter for measurements of primary proton and helium spectra and modulations 18 p3188 A66-34822  
Balloon flight data obtained at 50 and 65 degrees N geomagnetic latitude on spectra of primary cosmic ray hydrogen and helium nuclei, using Cerenkov scintillator technique 18 p3190 A66-34831

Balloon-borne Cerenkov scintillation counter measurements of energy spectra of primary cosmic radiation heavy nuclei at various geomagnetic latitudes 18 p3191 A66-34840  
Cerenkov counter using sulfur hexafluoride gas as radiator developed for study of isotopic composition of helium nuclei in primary cosmic radiation 18 p3193 A66-34853  
Cerenkov counter measurements of primary cosmic ray heavy nuclei made by Elektron II satellite 18 p3199 A66-34886  
Anisotropy of muon-rich extensive air showers examined by observation, using large area air Cerenkov detector at 60 degrees zenith angle 18 p3205 A66-35095  
Transition region of pulse spectrum from EAS particle density recordings by Cerenkov and scintillation detectors 18 p3207 A66-35110  
Cerenkov and scintillation counters responses to electron-photon EAS 18 p3208 A66-35113  
Air shower detection with radio receiving system, broadband band helical antenna and Cerenkov particle detector 18 p3115 A66-35119  
EAS front structure and normal energy transfer determined from pulse forms recorded by Cerenkov detectors 18 p3210 A66-35126  
Airborne equipment for study of nucleon interactions at energies in excess of 10 trillion ev 18 p3214 A66-35155  
Two detector elements developed for 2000-ton neutrino detector, noting cylindrical spark counter and Cerenkov counter 18 p3096 A66-35224  
Balloon measurements of cosmic ray hydrogen and helium nuclei at locations with nominal geomagnetic threshold rigidities 19 p3452 A66-35926  
Large air Cerenkov counter construction and performance characteristics for use in distinguishing protons and pions in cosmic radiation in 10-45 gev energy region 23 p4072 A66-42086

**CERENKOV RADIATION****SA COSMIC RADIATION****SA GAMMA RADIATION**

Radiation characteristics of point charge moving along direction of external magnetostatic field in warm anisotropic plasma 01 p0111 A66-10509  
Propagation, interaction and scattering of electromagnetic waves on diffusing inhomogeneous cylindrical plasma beam 01 p0027 A66-10550  
Possibility of determining electron concentration and magnetic field of plasma by measuring drift wave frequencies 02 p0291 A66-12114  
Cerenkov radiation by charge moving lengthwise in magnetic field of cold plasma, determining radiation spectrum range and total radiation energy 03 p0397 A66-12389  
Ultrasonic waves and electrons in piezoelectric semiconductors, noting role of acoustoelectric fields and propagating collective sound waves 03 p0408 A66-12414  
High energy proton from local radio sources, using telescopic system for Cerenkov effect detection of broad atmospheric showers 05 p0753 A66-15389  
Traveling wave characteristics of Cerenkov interaction studied by circular waveguide with electron beam flow 06 p0850 A66-16441  
High energy photons from discrete sources of cosmic radiation, verifying radio source electron production through proton-nucleon-matter interaction 06 p0947 A66-16572  
Spectral distributions for current and field fluctuations in nonequilibrium plasma located in external magnetic field 06 p0918 A66-16868  
Primary ultrahigh energy cosmic radiation composition analyzed, using Cerenkov flash 09 p1437 A66-20205  
Ultrahigh energy primary cosmic ray energy spectrum calculated from EAS particle-number spectrum 09 p1437 A66-20206  
Cerenkov radiation in circularly symmetrical waveguide filled with uniform dielectric in presence of flowing modulated electron stream 09 p1351 A66-20258  
Spatial scattering of associated electromagnetic waves arising during passage of fast charged particles through

semiconductors, noting role of Cerenkov radiation 09 p1428 A66-20596  
 Transition radiation relative to dispersion of dielectric permittivity for charged particle passing through boundary between two media 09 p1410 A66-20930  
 Cerenkov measurements of high energy gamma ray flux from quasi-stellar radio sources in mountains near Dublin 10 p1599 A66-21105  
 Cerenkov electron absorption of Alfvén and magnetoacoustic waves in plasma cylinder, obtaining formula for energy absorbed by plasma and damping factor where there is no resonance layer 11 p1743 A66-22443  
 Cerenkov radiation from charge spiralling in warm plasma under action of infinite magnetostatic field 11 p1745 A66-22494  
 Cerenkov radiation by charge moving lengthwise in magnetic field of cold plasma, determining radiation spectrum range and total radiation energy 13 p2139 A66-25394  
 Separation of radio emission of extensive air showers /EAS/ polarized in East-West direction from usual Cerenkov radiation 13 p2175 A66-26023  
 Possibility of determining electron concentration and magnetic field of plasma by measuring drift wave frequencies 14 p2385 A66-28073  
 High Q open resonator using two-conical optics and capable of traveling wave resonances at millimeter and submillimeter wavelengths 15 p2461 A66-29011  
 Ion motion effect on spectral region and energy density of Cerenkov excitation produced by charge moving in cold magnetoactive plasma 16 p2755 A66-30091  
 Quasi-linear approximation of Cerenkov and cyclotron damping of electromagnetic waves in magnetoactive plasma, considering collisions of wave-absorbing resonance particles with plasma 16 p2762 A66-31173  
 Increase of mean photon energies by mechanism related to Cerenkov plasmon-induced acceleration of charged particles 17 p2965 A66-32254  
 Frequency range in which Vavilov-Cerenkov surface wave exists in plasma-vacuum boundary 17 p2968 A66-32540  
 Radio noise bursts from Jupiter at decimeter wavelengths noting Cerenkov emission, Doppler-shifter cyclotron emission and escaped-whistler models 18 p3225 A66-33550  
 EAS RF emission detection, discussing enhanced Cerenkov radiation, mutual coherence effects, diffraction, Fresnel zones, Coulomb-field bremsstrahlung, etc 18 p3208 A66-35117  
 Jodrell Bank experiment testing Askarian hypothesis on radio pulses coincident with EAS under mutual coherence effects and checking coherent condition, internal reflection, shower energy, threshold and polarization 18 p3209 A66-35118  
 Solar and sidereal time variations of small air showers measured by array of water Cerenkov detectors 18 p3213 A66-35143  
 Primary intensity and primary spectrum at energies of trillion ev determined from atmospheric Cerenkov light 18 p3217 A66-35173  
 Spatial scattering of associated electromagnetic waves arising during passage of fast charged particles through semiconductors, noting role of Cerenkov radiation 20 p3622 A66-38130  
 Resonance excitation and Cerenkov damping of HF plasma oscillations 21 p3780 A66-39004  
 Cerenkov absorption of whistlers in nonhomogeneous plasma cylinder, noting electron heating 21 p3780 A66-39005  
**ERIUM**  
 Direct, Orbach and Raman paramagnetic relaxation measurements for trivalent cerium ion present as dilute impurity in lanthanum magnesium hydrate 19 p3443 A66-36001  
**ERIUM COMPOUND**  
 X-ray diffraction from cerium deformed at room temperature to form extrinsic stacking fault 02 p0272 A66-11710  
 Emission of Auer-Welsbach mixture in flames 16 p2827 A66-30852

**CERMET**

Cermet ablatives for thermal shields in fabrication of nozzles and nose cones [SAE PAPER 650767] 01 p0078 A66-10838  
 Refractory material cermet fabrication, discussing techniques of preparation, fuel-metal compatibility and fuel canning 05 p0713 A66-15585  
 Porous cermets of iron, bronze and stainless steel efficiently arrest flame of burning gas mixtures 06 p0897 A66-16694  
 Similarity theory applied to thermal shock resistance of brittle cermets 06 p0897 A66-16699  
 Deformation of double ring used in compression tests to study stress-strain state of brittle and cermet materials 08 p1313 A66-19438  
 Cermet face seals for inert gas environment sealing shaft of liquid-metal pumps employing conventional lubrication system [ASLE PREPRINT 65AM 4C4] 10 p1540 A66-22039  
 Cermet film microcircuit characteristics and design 13 p2029 A66-25126  
 Oxide-base cermets prepared by infiltration with silver and silver alloys, noting dispersion strengthening, bend creep, impact loading, etc, for gas-turbine application 16 p2730 A66-30250  
 Structure and electrical resistance as function of temperature for Nichrome-silicon monoxide cermet films on single crystal Si substrates 16 p2783 A66-31425  
 Pressing of two-component sintered materials 16 p2728 A66-31676  
 Thick film techniques, discussing applications, limitations, passive elements and design characteristics of cermet element 17 p2882 A66-32107  
 TiN-Mo cermet production by hot pressing and microstructure and phase composition, noting Ti-N production method 17 p2939 A66-32392  
 Hardness and microstructure of sintered alloys of molybdenum with oxides of aluminum and zirconium obtained by powder metallurgy methods 17 p2939 A66-32394  
 Element distribution in cermet alloys of W-Ni-Fe system determined by X-ray spectral analysis 17 p2940 A66-32848  
 Durability of cutting tool alloys for producing porous cermet ball bearings, noting effect of pearlite in cermets 17 p2930 A66-32850  
 Physical and mechanical properties of cermets obtained by sintering powdered iron at high temperatures under dynamic impact compression 20 p3583 A66-37413  
 Heat resistance of refractory alloys containing nickel, cobalt, tungsten, niobium, etc, and cermets, noting application in rocket engines 24 p4228 A66-43049  
**CESIUM**  
 Photon radiation effect on ionization of cesium vapor 05 p0615 A66-15533  
 Cesium thermionic converter with tungsten cathode and nickel anode improved operation by increasing cesium pressure 05 p0617 A66-15551  
 Constants A and B of cesium superfine structure calculated from magnetic sublevel intersections 05 p0741 A66-15859  
 Excited state of cesium lifetime determined from double magnetic resonance experiments 09 p1406 A66-20944  
 Low-energy electron diffraction studies adsorption of cesium on Si /111/ 10 p1576 A66-21551  
 Effective excitation cross sections for resonance doublets of cesium and rubidium, using slow electrons 10 p1544 A66-21981  
 Flying clock experiment with traveling cesium beam clocks 11 p1703 A66-22251  
 Optimum ionizer structure, examining cesium transport through tungsten capillaries [AIAA PAPER 66-207] 12 p1922 A66-24529  
 Measurement of cross section for excitation of cesium atom by electron impact in prethreshold energy region, using electron trap method 12 p1925 A66-24878  
 Measurement of shift of cesium absorption lines near series edge, obtaining electron elastic scattering cross section at zero energy by extrapolation of shift 12 p1918 A66-24882

Cesium beam atomic time and frequency standards 13 p2079 A66-25874  
 Pressure effects of argon on fine structure components of first two members of cesium principal series 13 p2135 A66-26263  
 Pressure effects of helium on fine structure components of first two members of cesium principal series, noting changes in shift curves 13 p2135 A66-26264  
 Photoelectric yield and energy distribution for clean-cleaved cesium-covered /111/ surfaces of silicon and germanium 14 p2365 A66-27755  
 Atomic standards of frequency and second of ephemeris time, discussing frequency of Cs 133 transition at zero field 14 p2296 A66-27899  
 Excited state of cesium lifetime determined from double magnetic resonance experiments 15 p2543 A66-28532  
 Electron spin resonance in rubidium and cesium observed, using selective transmission technique 16 p2750 A66-30145  
 Conduction electron spin resonance in rubidium and cesium observed, using reflection technique 16 p2750 A66-30146  
 Excitation cross sections of cesium in collisions with slow electrons 17 p2989 A66-33507  
 Effective excitation cross sections for resonance doublets of cesium and rubidium, using slow electrons 19 p3402 A66-35860  
 Atomic-beam technique for studying Stark effect in optical D-line transition in cesium and rubidium 19 p3402 A66-35993  
 Output characteristics of cesium thermionic converter as function of size of electrode gap, using device with movable air-cooled stainless steel anode 22 p3853 A66-40943  
 Measurement of cross section for excitation of cesium atom by electron impact in prethreshold energy region, using electron trap method 23 p4099 A66-41085  
 Measurement of shift of cesium absorption lines near series edge, obtaining electron elastic scattering cross section at zero energy by extrapolation of shift 23 p4097 A66-41089  
 Excitation cross sections of cesium in collisions with slow electrons 24 p4249 A66-42122  
**CESIUM ANTIMONIDE**  
 Fast-acting nonselective light emission receiver for wavelengths from 250 to 800 millimicrons 08 p1223 A66-19286  
**CESIUM COMPOUND**  
 Electron work function analysis using cesium compounds vapor combinations in thermionic energy converter, noting role of vapor pressure 05 p0619 A66-15562  
**CESIUM DIODE**  
 Cesium diode parameters and operating characteristics in arc mode not requiring specific ion generating mechanism for interpretation 05 p0615 A66-15538  
 Cesium filled diodes measured at various cathode temperatures, noting effect of ions generated in interelectrode space on current 05 p0728 A66-15549  
 Ignited mode of current voltage characteristics of thermionic diodes 05 p0617 A66-15550  
 Phenomenology of ignited cesium diode discharge noting saturation mode, obstructed mode and ball of fire 05 p0728 A66-15552  
 Thermionic converters with two alkalines using graphite insertion composites for imparting supplementary degree of freedom to cesium plasma diode 05 p0617 A66-15554  
 Cesium diode with cylindrical molybdenum emitter and niobium collector fueled with uranium dioxide in out pile test 05 p0618 A66-15557  
 Cesium fluoride additive effect on emitter work function and power output of cesium diodes with various emitter materials 05 p0618 A66-15558  
 Maximum obtainable efficiencies of cesium diodes with cesium fluoride additive from experimental U-I curves 05 p0618 A66-15559  
 Cesium diode thermionic converter, noting design, operation, application 10 p1485 A66-21515  
 Time resolution of laser-induced electron emission from cesium diode at high laser power 16 p2719 A66-31135

Large amplitude oscillations with frequencies corresponding to ion transit times in thermal cesium plasma diodes with parallel plane construction 19 p3313 A66-35425

Inert gas effect on performance characteristics of cesium thermionic converter, noting saturation current increase 22 p3853 A66-40944

Thermionic energy conversion phenomena and advances, detailing Cs diode and optimum ideal performance 23 p4021 A66-41756

## CESIUM ENGINE

Discrepancy between observed ion production rate in cesium thermionic converter and Saha-Langmuir equation prediction suggests locality of ion formation 05 p0612 A66-14984

Electric rocket propulsion system requirements for space propulsion, comparing capabilities with chemical and electrical rockets 08 p1280 A66-18575

Electron-ion emitting characteristics of various electrode materials with cesiated surfaces for cesium contact ion thrusters [AIAA PAPER 66-208] 10 p1592 A66-21447

Plasma measurements in cesium electron bombardment ion engine indicate that reversed cathode-anode configuration improves radial ion distribution [AIAA PAPER 66-246] 10 p1593 A66-21455

Life testing of electron-bombardment cesium ion engine designed for power-to-thrust ratio of 160 kw/lb [AIAA PAPER 66-233] 10 p1594 A66-21701

Surface ionization engine development, considering life testing of sastrugi thrusters [AIAA PAPER 66-236] 11 p1760 A66-22219

Development and performance of cesium ion engines for satellite control, noting lifetime, fuel consumption reliability, thrust vector control, etc [AIAA PAPER 66-234] 13 p2172 A66-25173

Multistrip cesium contact thrusters, integral focus life test engine and various integral focus ionizers [AIAA PAPER 66-235] 13 p2172 A66-25174

Cesium contact ion engine construction and performance and engine neutralizer [AIAA PAPER 65-375] 16 p2791 A66-30906

Computer program for current profile and trajectory analysis for cesium contact thruster leading to integral focus configuration of multistrip contact engines for long space missions [AIAA PAPER 66-206] 16 p2792 A66-31690

High performance annular Hall-current accelerator using radial magnetic field and axial electric field with cesium as propellant [AIAA PAPER 65-300] 19 p3450 A66-35614

Comparison of electromagnet and permanent magnet versions of electron bombardment cesium ion engine [AIAA PAPER 65-373] 19 p3450 A66-35617

## CESIUM FLUORIDE

Cesium fluoride additive effect on emitter work function and power output of cesium diodes with various emitter materials 05 p0618 A66-15558

Maximum obtainable efficiencies of cesium diodes with cesium fluoride additive from experimental U-I curves 05 p0618 A66-15559

## CESIUM ION

Focusing and accelerating electrode materials for cesium contact ion engines, noting advantages of copper, beryllium and molybdenum [AIAA PAPER 64-684] 02 p0278 A66-11537

Fission heated generator using cesium ion space charge neutralization for operation in pile 05 p0620 A66-15568

Neutron activation and cesium-aluminum sputtering in oxygenated gas atmosphere [AIAA PAPER 66-77] 06 p0913 A66-17103

Theory and operation of cesium thermionic converter 07 p0995 A66-18322

Sputtering yields of aluminum, copper and titanium measured as function of cesium ion energies for use as electrodes on cesium ion engines [AIAA PAPER 66-203] 10 p1575 A66-21445

Ion propulsion by electrostatic acceleration of cesium ions subjected to transverse magnetic field, using negative space charge sheath [AIAA PAPER 66-256] 10 p1563 A66-21461

Residual gas effect on work function vs

critical temperature for surface ionization of cesium on porous tungsten 10 p1594 A66-21778

Cesium ion emission patterns obtained from rear-fed porous refractory metals, using thermal emission microscope [AIAA PAPER 66-220] 11 p1746 A66-23086

Ionization characteristics of various porous metal ionizers and suitability for use in cesium contact thrusters [AIAA PAPER 66-218] 11 p1756 A66-23094

Cesium-vapor ion electrostatic drives for long-term space flight 11 p1761 A66-23129

Secondary emission of excited cesium atoms during bombardment of molybdenum and tantalum by fast cesium ions 14 p2338 A66-28248

Radioactive tracer technique to measure yield and angular distribution of copper sputtered from monocrystalline target subject to cesium ion bombardment [AIAA PAPER 65-379] 15 p2566 A66-29290

Cesium ionization cross section measurement from threshold to 50 ev, noting apparatus used and results obtained 15 p2548 A66-29814

Cesium ion tubes advantages over conventional tubes including ability to study electron-inertia effects 17 p2888 A66-32823

Cesium ion source evolved from surface ionization on porous refractory metal ionizers 18 p3138 A66-34240

Low thrust divergent flow cesium-on-tungsten contact ionization electrostatic thruster for satellite attitude control and stationkeeping missions [AIAA PAPER 66-569] 20 p3628 A66-37051

Hypersonic plasma generator for reentry vehicles with arc tunnel experimental data and analysis of nonequilibrium chemical reaction between cesium atoms and ionized air species 20 p3497 A66-37158

Neutron activation investigation of cesium ion sputtering of Al in rarefied oxygen atmosphere 22 p3950 A66-40082

## CESIUM PLASMA

Ionic waves amplified by collective behavior in alkali plasma obtained by contact ionization of cesium or potassium vapors on surface of two coaxial tantalum cylinders 01 p0110 A66-10331

Oscillation frequency and amplitude variation with parameters of contact-ionization cesium plasma device 01 p0111 A66-10391

Electron-ion recombination rate and effective ionization calculated for cesium plasma by Bates method 03 p0398 A66-12510

Oscillation and Maxwellian distribution of electrons in cesium 03 p0403 A66-12968

Electrostatic ionic instability of cesium Q type machines for hot plasma-beam interactions in VLF range in sheath and plasma 03 p0404 A66-12984

Comparing data of two Langmuir probes placed in cesium plasma generator 04 p0550 A66-13476

Cesium plasma thermionic converter, calculating voltage drop in emitter, collector and plasma 05 p0615 A66-15536

Heat transfer measured at different conditions of diode operation, obtaining data on plasma properties and electrode sheaths 05 p0616 A66-15546

Prototype of cesium plasma converter implementing heavy-duty electric power generator with nuclear reactor as primary energy source 05 p0617 A66-15547

Arc mode thermionic converter output characteristics relationship to neutralization plasma properties 05 p0620 A66-15570

Cesium plasma created in thermionic converter investigated by Langmuir probe to determine potential, gain, velocity and oscillations 05 p0620 A66-15571

Emitter of thermionic converter with cesium plasma heated by solar energy, determining electric power values 05 p0623 A66-15595

Current-voltage characteristics of low-voltage arc in cesium vapor, noting ionization process 06 p0915 A66-16150

Conductivity and transfer coefficients calculated from electron scattering in cesium plasma 06 p0918 A66-16836

Solar energy powered cesium-plasma thermionic converter, noting development,

output and application 09 p1333 A66-20924

Weak collisions effect on ion waves instability in cesium plasma solved via linearized Fokker-Planck equation 10 p1568 A66-21823

Relative drift between ions in adjacent layers exciting Kelvin-Helmholtz instability analyzed in thermally ionized cesium plasma, noting range of frequency oscillations 12 p1923 A66-24577

Design and construction of probe measuring density of neutral atoms in quiescent alkali metal magnetoplasma, noting vacuum system, electric circuitry, etc 12 p1884 A66-24984

Disturbance of thermal equilibrium of weakly ionized cesium contact plasma due to wall losses measured by Langmuir probe 13 p2137 A66-25117

Arc discharge in cesium vapor within diode, noting plasma parameter distribution in electrode spacing during low, luminous, and arc discharge phases 13 p2142 A66-25681

Drift instabilities in thermionic plasmas, noting excitation of LF oscillations with finite perturbation amplitude around cathode ion sheath 13 p2145 A66-25729

Multicomponent transport theory to compute cesium plasma transport properties over range of conditions wherein it changes from pure single component gas to mixture and then to completely charged particles gas 13 p2147 A66-25751

Diffusion coefficient measurement in fully ionized cesium plasma, using potassium plasma pulse launching techniques 13 p2155 A66-26680

Excitation of ion-acoustic waves in potassium-cesium plasma when passing current through it, finding natural frequencies of system when plasma is drifting along axis 15 p2550 A66-29214

Microwave scattering from large amplitude oscillations in cesium plasma, noting cross-section magnitude and nonlinear effects 15 p2556 A66-29810

Current-voltage characteristics of low-voltage arc in cesium vapor, noting ionization process 15 p2429 A66-29880

Plasma probe for dense isothermal cesium plasma, noting electron concentration and temperatures, potential distribution, etc 16 p2756 A66-30102

Gravitational instability of magnetoplasma in radial electric field, noting resistive drift modes, stabilization criterion effect of Coriolis force, Landau damping, etc 17 p2966 A66-32425

Ionization outside equilibrium and relaxation of ionization in cesium seeded argon 18 p3144 A66-34102

Two-stream instability for longitudinal waves in plasma traversed by ion beam 18 p3148 A66-34909

Plasma model representing phenomena occurring in cesium thermionic converters operating in collisional ignited mode 19 p3406 A66-35429

Atomic time standards, describing cesium beam standard, ammonia maser and gas-cell type clocks 19 p3354 A66-35468

Temperature and pressure of cesium plasma in wake of incident and reflected shock wave 21 p3790 A66-39075

Cesium plasma of Q device used in study of stability of plasma devices with slanted, nonconducting end plates 21 p3792 A66-39187

Cesium-plasma diode effect dependence on material output of cathode in vacuum, plotting short circuit current vs vapor pressure, voltage distribution, etc 22 p3952 A66-39752

LF drift waves observed in thermally ionized cesium plasma in magnetic field, with variable curvature 23 p4106 A66-41710

LF oscillation modes in TOPSY thermally generated cesium plasma devices investigated as function of plasma parameters 24 p4240 A66-42299

## CESIUM VAPOR

Low voltage arc in cesium vapor for case in which free-path length of particles is small compared to electrode spacing 01 p0016 A66-10702

Resonance absorption measurements in cesium vapor 02 p0262 A66-11435

Nonisothermal pulse discharge column in argon-cesium and helium-cesium systems

with produced plasma studied for nonisothermic conductivity 03 p0398 A66-12508

Shifts in output frequency of cesium vapor magnetometer due to temperature, light intensity and orientation, noting Zeeman component and geomagnetic field 05 p0678 A66-14968

Negative resistance of dynatron type and oscillations in reverse current range of cesium thermionic energy converter 05 p0620 A66-15572

Electron and ion emission of material in presence of cesium vapor, noting use as emitters 05 p0622 A66-15579

Thermodynamic validity of two cesium adsorption theories analyzed from semiclassical approach and electronegativity approach 05 p0622 A66-15581

Contact potential difference measurements for adsorption of cesium on polycrystalline tungsten surfaces in cesium vapor 05 p0622 A66-15582

Electron mobility in potassium and cesium DC glow discharges at low electron temperature 05 p0728 A66-15809

Solar radiation effect on Langmuir frequency, noting ionization of cesium vapor at low potential differences 09 p1409 A66-20925

Low voltage arc in cesium vapor for case in which free-path length of particles is small compared to electrode spacing 11 p1640 A66-23307

Atomic frequency standard fluctuation, instability due to noise and atomic beam frequency stability 12 p1881 A66-24125

Normal atom concentration in cesium and mercury vapors during pulse discharge 15 p2545 A66-29343

Increasing sturdiness of glass-to-metal seals in cesium vapors 15 p2429 A66-29707

Plasma probe in thermal emission converter with high cesium vapor, noting parameters of diffusion, electron concentration, etc 16 p2756 A66-30103

Electron temperature measurements in low voltage arc in saturated cesium vapor 16 p2756 A66-30105

Heat conductivity coefficient of cesium vapor at temperatures from 1000 to 1600 degrees K and 1 to 5 torr measured by hot tungsten filament method 18 p3142 A66-34022

Plasma Separator Thrustor, advanced ion thruster design based on independent operation and optimization of plasma source and plasma extraction system [AIAA PAPER 66-598] 18 p3163 A66-34217

Low pressure combination of barium and cesium vapors for reduction of transport-affected losses in thermionic energy converters, noting work function and V-I characteristics 18 p3055 A66-34584

Corrosion tests on eight refractory metals and alloys in liquid lithium and cesium vapors 19 p3383 A66-36136

Normal atom concentration in cesium and mercury vapors during pulse discharge 20 p3604 A66-37348

Electron and ion emission from polycrystalline surface of Be, Ti, Cr, Ni, Cu, Pt and type-304 stainless steel in cesium vapor 20 p3623 A66-38400

**CESSNA 210 AIRCRAFT**

Hydraulic system of Cessna 210 aircraft, noting component structure, electrical and hydraulic sequencing devices, etc [SAE PAPER 660202] 13 p2002 A66-26385

**CF-104 AIRCRAFT**

S F-104 AIRCRAFT

**CH-3 HELICOPTER**

SA SIKORSKY S-61 HELICOPTER

USAF CH-3C helicopter V/STOL in flight refueling, discussing requirements, system characteristics and flight tests 17 p2844 A66-32724

**CH-53 HELICOPTER**

CH-53A helicopter design, testing, reliability and flight characteristics 07 p0988 A66-17494

**CHAMBER**

S ANECHOIC CHAMBER

S ARC CHAMBER

S BUBBLE CHAMBER

S CLOUD CHAMBER

S COMBUSTION CHAMBER

S ENVIRONMENTAL CHAMBER

S FLOW CHAMBER

S ION CHAMBER

S IONIZATION CHAMBER

S LOW PRESSURE CHAMBER

S PLENUM CHAMBER

S PRESSURE CHAMBER

S ROCKET CHAMBER

S SPARK CHAMBER

S TEST CHAMBER

S VACUUM CHAMBER

**CHAMBER PRESSURE**

Low thrust cold gas reaction jet system for small spacecraft with nitrogen, ammonia, Freon-12 and Freon-14, analyzing thrust chamber pressure history [ASME PAPER 65-WA/AUT-11] 05 p0624 A66-15608

Response of Langmuir probes in rocket exhaust jets, noting sensitivity to chamber temperature and pressure and alkali metal concentration 14 p2294 A66-27421

Cryopumping, titanium-sublimation and ion-pumping mechanisms studied for exhausting vacuum chambers to simulate outer space 16 p2677 A66-30456

Solid propellant ignition and ignition propagation for rocket exhaust and hypergolic-type igniters 18 p3161 A66-34225

Igniter performance in solid propellant rocket motors, examining mass discharge rate effect on chamber pressure transients [AIAA PAPER 66-680] 18 p3161 A66-34227

**CHANCE-VOUGHT MILITARY AIRCRAFT**

S A-7 AIRCRAFT

S C-142 AIRCRAFT

S F-8 AIRCRAFT

S XC-142 AIRCRAFT

**CHANDRASEKHAR EQUATION**

Transfer equation of solar absorption line developed with split upper level in magnetic field 05 p0759 A66-14870

Internal diffuse radiation field computed in finite homogeneous isotropically scattering slab illuminated by parallel rays of radiation 10 p1556 A66-21923

Nonuniqueness of solutions of nonlinear integral equation for Chandrasekhar S-function for homogeneous semiinfinite atmosphere 13 p2127 A66-25612

**CHANNEL**

Channel shape effect on current-voltage characteristics in channel transistors 04 p0496 A66-13906

Electrical and gas dynamical parameters effect on length of linear constant Mach number MHD duct, assuming gas is ionized by neutron irradiation in expansion nozzle preceding duct and electron recombination takes place in duct 13 p2000 A66-25739

Stability of automatic systems for tracking point targets, noting nonlinear dependence of signals on channel mismatch and its limiting values 17 p2902 A66-32579

Channel shape effect on current-voltage characteristics in channel transistors 20 p3532 A66-37864

Error probabilities in binary transmission of signals over selectively fading diversity channels containing specular and scatter type components 22 p3864 A66-40058

Distortion of FM signals after being processed through time-invariant channels with nonlinear phase characteristic and fluctuating amplitude 22 p3864 A66-40061

**CHANNEL CAPACITY**

Parallel decoding for discrete channel with statistically independent noise 02 p0189 A66-11404

Mathematical structure and characteristics of codes used in transmission over nonsymmetric channels 02 p0209 A66-12020

Channel capacity of communications satellite repeater, deriving link capacities of radio teletype and voice channels 04 p0478 A66-13597

Relationship between distribution entropy and variation in distribution of almost-periodic channels 05 p0638 A66-15361

Coding theorems for almost-periodic channels 05 p0638 A66-15362

Monitoring of discrete state discrete transition Markov source whose states are input letters to memoryless discrete noisy channel 06 p0860 A66-16189

Signal optimization for digital communication system over channel characterized by rational transfer function and Gaussian noise having

memory 06 p0829 A66-16192

Degenerate parametric amplifier receiving two oppositely modulated input waves, improving noise figure 07 p1010 A66-18152

Tunnel diode voltage-controlled oscillator to expand FM system channel capacity 07 p1010 A66-18246

Synchronism between transmitting and receiving terminal of transmission systems, particularly single channel systems, using code pulse modulation 09 p1346 A66-20546

Ultimate performance of m-ary transmissions, showing signal filtering by use of energy measurement 10 p1505 A66-21837

Random and burst channel error affects output signal-to-noise ratio of delta modulation system 13 p2019 A66-25145

Variable premodulation gain to multichannel transmission system for which AM baseband power is proportional to cumulative channel activity, showing improvement of SNR 13 p2020 A66-25151

Shannon model for capacity of time-continuous and time-discrete Gaussian channel with inputs perturbed by independent noise random variable 13 p2024 A66-25938

Audio signal processing techniques in future space exploration, discussing channel capacity, speech processing, bandwidth narrowing, etc 13 p2025 A66-26024

Quantum information generalizes classical Shannon concept 13 p2025 A66-26045

Quantum communication channel entropy and information analysis using noncommutative output and input variables, including waveguide carrying capacity thermal noise calculations 13 p2025 A66-26046

Mathematical structure and characteristics of codes used in transmission over nonsymmetric channels 14 p2266 A66-27571

Error detection techniques for maximizing average rate of information transmitted through burst error channel 14 p2243 A66-28346

Maximum channel capacity of tandem link multichannel troposcatter systems for specified noise level 14 p2243 A66-28347

Four-and five-horn tracking feeds for large antennas, emphasizing sum channel gain in five-horn feed 18 p3083 A66-34292

PCM bandwidth halving and twin working method of superimposing two PCM channels in frequency band occupied by one PCM channel 19 p3305 A66-36625

Cathode ray oscillograph-directional antenna recordings of electromagnetic pulses from lightning discharges 20 p3553 A66-38081

Laboratory environment simulation of multipath propagation interference effects on low channel capacity FM systems 22 p3865 A66-40066

**CHANNEL FLOW**

**SA ANNULAR FLOW**

Laminar flow through parallel and uniformly porous walls of different permeability 01 p0057 A66-10425

Simple wave interaction in polytropic rarefied gases flowing from parallel wall channel 01 p0006 A66-10473

Flow stability theorem for viscous homogeneous and incompressible fluid through infinitely long cylindrical pipe of arbitrary cross section 01 p0058 A66-10504

Flow structure in initial length of MHD channel of square cross section taking longitudinal magnetic field nonuniformities into account 01 p0113 A66-10699

Eddy conductivity, eddy viscosity and dimensionless ratio of diffusivity for mercury flowing in tube 01 p0164 A66-10904

Adiabatic heating and temperature recovery factor of tubes carrying liquids of high Prandtl number 01 p0165 A66-10905

Two-phase flow and heat transfer for boiling liquid nitrogen in horizontal tubes 01 p0165 A66-10909

Graduate-level text on engineering MHD establishing bridge with plasma physics, using particle /microscopic/ and continuum approaches 01 p0114 A66-10978

Axisymmetric steady flow of incompressible viscous fluid in circular tube of constant porosity treated by small parameter method 01 p0059 A66-11003

Electrically conducting two-dimensional

compressible flow in traveling wave plasma accelerator, noting effect of nonuniform magnetic field 01 p0115 A66-11085

Transfer of heat or nonstationary mass in circular cylindrical laminar flow tube 01 p0166 A66-11086

Hall currents effect during acceleration of plasma intrinsic magnetic field 02 p0264 A66-11384

MHD flow analyzed in entrance region of parallel-plate channel 02 p0267 A66-11531

Collisionless mass flow of ionized gas through channel with imposed magnetic field [AIAA PAPER 65-124] 02 p0267 A66-11535

Equation of velocity distribution of fluid in duct, evaluating effect of eddy activity on second derivative 02 p0218 A66-11759

Plasma velocity field determined from glow discharge in crossed fields propagating along rectangular channel, two walls being dielectrics and other two electrodes 02 p0268 A66-11786

Plane transonic gas flow past symmetrical convex profile at zero angle of attack along axis of channel with parallel walls 02 p0176 A66-12171

Motion of medium of variable electric conductivity in rectangular channel situated in magnetic field 02 p0270 A66-12172

Heat transfer and friction for laminar flow of gas in circular tube at high heating rate, using finite difference method 02 p0304 A66-12198

Quasi-one-dimensional ionized gas motion through channels of arbitrary cross section in crossed electrical and magnetic field 03 p0398 A66-12516

Local heat transfer during turbulent gas flow in pipe for large temperature differences, describing test apparatus and results 03 p0443 A66-12517

Shear flow influence on sound attenuation in lined duct, considering upstream and downstream propagation 03 p0356 A66-12822

Free convection heat transfer in partially enclosed channel flow, noting effect of vertical fin geometry and temperature [ASME PAPER 64-WA/HT-33] 04 p0595 A66-13386

Transient heat transfer between thin circular tube and incompressible fluid, considering radial conduction and heat loss [ASME PAPER 65-HT-2] 04 p0595 A66-13393

Plasma flow discussing flow mode stabilization in channel formed by two electrodes, flow parameters and plasma conductivity 04 p0529 A66-13553

Electrokinetic transducers to measure potential fluctuations of turbulent flow of tap water in open channel 04 p0509 A66-13664

Laminar flow development of incompressible Newtonian fluid in hydrodynamic entrance region of flat duct 04 p0511 A66-13939

Bergerson and first approximation method for solving problems of unsteady fluid flow in pipeline 04 p0511 A66-14157

Hydrodynamic behavior of mercury in laminar and turbulent flow in tube, discussing effect of vacuum and protective gas 04 p0511 A66-14185

Effect of heat removal through MHD channel walls on stability of temperature distribution during electrical discharge in gas between two planes 04 p0557 A66-14421

Two-dimensional flow of inviscid nonheat-conducting gas with variable conductivity in crossed constant electric and arbitrary magnetic fields 04 p0557 A66-14422

Motion, temperature distribution, concentration and change in electric conductivity of ionized gas in initial section of plane channel 04 p0557 A66-14432

MHD flow in rectangular ducts, discussing laminar motion of conducting liquid under uniform transverse magnetic field 04 p0558 A66-14475

Slow viscous shear flow past plate midway between two walls studied analytically, using Stokes approximation 05 p0605 A66-14702

Transition flow of nitrogen through short circular tubes with length-to-diameter ratios from 0.005 to 1 and pressure ratios from 1 to 20 05 p0605 A66-14704

Stability diagrams for MGD channel flow of conducting fluid for different coplanar

magnetic field intensities 05 p0721 A66-14710

Effect of asymmetrical heating on turbulent heat transfer in rectangular duct [ASME PAPER 65-HT-11] 05 p0782 A66-14735

Integral approximations for skin friction and heat transfer in MHD channel flow [ASME PAPER 65-HT-15] 05 p0783 A66-14739

Thermal flow meter incorporating effect of axial conduction [ASME PAPER 65-HT-19] 05 p0676 A66-14741

Optimum electrode arrangement in MHD channel, taking into account Hall effect 05 p0722 A66-14996

Laminar flow in two-dimensional channel with uniformly porous walls through which fluid is uniformly injected 05 p0662 A66-15057

Heat losses from turbulent gas flowing through poorly insulated pipe where heat lost from outer surface is by free convection and radiation, solving heat equation [ASME PAPER 65-WA/HT-16] 05 p0790 A66-15648

Film boiling of saturated nitrogen flowing upward in vertical heated tube, noting annular-flow regime change to vapor matrix [ASME PAPER 65-WA/HT-26] 05 p0793 A66-15677

Generalized equation of choking for two or more unmixed streams flowing in same channel, noting relevance to ejector principle 05 p0665 A66-15773

Experimental method to produce fully developed flow in relatively short channel length 06 p0871 A66-16221

Stabilized flow of two-phase incompressible viscous media in cylindrical tube 06 p0871 A66-16312

Quasi-steady flow relations to study wave action in duct with gauze 06 p0873 A66-16932

Secondary flow in fully-developed turbulent flow in straight channels, noting Reynolds number effect, directional characteristics of local wall shear stress, etc 06 p0873 A66-16997

Interaction or coupling of radiation with conduction and convection mechanisms in nonisothermal nongray gas flowing in entrance region of tube with isothermal black walls [AIAA PAPER 66-136] 06 p0875 A66-17090

Convective heat transfer in thin rectangular channels commonly found in nuclear reactor fuel assemblies 07 p1148 A66-17299

Stability criterion for flow in interspace between two parallel arbitrarily curved walls 07 p0980 A66-17482

Unsteady, combined free and forced convective MHD channel flow of conducting fluid through transverse magnetic field 07 p1085 A66-17580

Quasi-one-dimensional unsteady hydromagnetic wave flow of ideal inviscid compressible conducting fluid in nonuniform ducts 07 p1089 A66-17962

Existence of subsonic jets issuing from curved symmetric channels in plane 07 p0981 A66-18030

Tube gas flow theory applicable to laminar flow, slip flow, transition region of flow and free molecular flow 07 p1023 A66-18131

Rotation vector increase derived for secondary incompressible fluid flow in curved channels 07 p1023 A66-18134

Wave action in duct with gauze calculated, using steady flow relations including pressure loss coefficients 07 p1026 A66-18281

Nonsteady flow through square-edged orifice in pipe 07 p1026 A66-18283

EGD power generation including functioning, coupling, broad and narrow channels, expanding momentum channel, efficiency, etc 07 p0993 A66-18313

Electric power generation using monopolar charged particles in fluid flow 07 p0994 A66-18315

Analogy between gas flow through convergent/divergent nozzles and open side-contracted channel 08 p1205 A66-18628

Two-dimensional steady MGD flow of ideal thermally nonconducting fluid with infinite conductivity, when magnetic intensity and velocity are orthogonal 08 p1261 A66-18675

Convective heat transfer and artificially turbulent flow through roughened corrugated channels 08 p1317 A66-18864

Transition regime mass flow rate and longitudinal pressure distribution along short tube with bellmouth entry 08 p1207 A66-19131

Charge density distribution, electric field strength and flow rate of turbulent flow of incompressible fluid in flat nonconducting channel 08 p1263 A66-19172

Electron temperature variation in argon MGD channel in crossed magnetic and electrical fields 08 p1263 A66-19174

End effects on viscoelastic polymer flow through capillary tube 08 p1209 A66-19552

Stability of set of Jeffery-Hamel profiles, approximating profiles in two-dimensional divergent channels, investigated by numerical solution of Orr-Sommerfeld problem 08 p1212 A66-19823

Approximate theory for electrokinetic phenomena in capillary flows, determining interaction between mechanical and electrical energy 08 p1174 A66-19829

Vorticity growth when steady heat current is applied to liquid He 2 in narrow tube 09 p1366 A66-20017

Superfluid critical velocity in He 2 isothermal gravitational flow in narrow channels 09 p1366 A66-20018

Critical velocities and supercritical velocity dissipation effects in isothermal flow of liquid He 2 in narrow channels 09 p1366 A66-20019

Modified Cochran method giving valid expansions for singular perturbation problems in heat transfer 09 p1469 A66-20084

Heat transfer in laminar flow between parallel porous walls with discontinuous change in wall temperature 09 p1470 A66-20176

Laminar fully-developed flow of water between parallel flat plates examined, using motion equation with experimental values for viscosity, conductivity, specific heat and density 09 p1470 A66-20179

Visualization of flow in transverse plane across main stream past cylinder 09 p1364 A66-20600

Turbulent heat transport coefficient of various fluids in pipes measured, obtaining formula from experimental data 09 p1367 A66-20702

Free convection thermal transfer in narrow horizontal channels and infinitely wide channels 09 p1471 A66-20704

One-dimensional adiabatic compressible gas flow in cylindrical tube taking into account Reynolds number variations along tube and compressibility effect on friction factor 09 p1368 A66-20827

Two-dimensional steady potential subsonic flow of compressible fluid past circular cylinder between two parallel walls 10 p1522 A66-21323

Pseudoshocks in pipe flow in supersonic compressors represented as diffusion process, noting application in cascade and rotor configuration 10 p1479 A66-21363

Condensing characteristics of mercury vapor flowing in horizontal single tubes examined in crossflow-nitrogen-cooled and NaK-cooled condensers 10 p1621 A66-21463

High precision high-spatial resolution tracer study of low-noise steady air flow in rectangular pipe, emphasizing region within two microns of wall 10 p1524 A66-21804

Cylindrical Poiseuille flow of rarefied gas for inverse Knudsen number from zero to 10 10 p1524 A66-21806

Velocity overshoot within boundary layer in alternating laminar air flow near mouth of square channel 10 p1524 A66-21827

Hydromagnetic stability of current-carrying fluid between two coaxial cylinders with radii ratio 0.05 to 0.9 10 p1568 A66-21829

Thermal flow meter incorporating effect of axial conduction [ASME PAPER 65-HT-19] 11 p1703 A66-22187

Combined free and forced laminar convection heat transfer inside inclined circular tubes of varying position [ASME PAPER 65-WA/HT-3] 11 p1785 A66-22191

Relative effect of restrictive orifices, venturis or nozzles on measurement accuracy of fluid flow rates in pipes 11 p1703 A66-22207

Stationary flow of viscous incompressible anisotropically conducting fluid in coaxial

- channel 11 p1743 A66-22235
- Hydraulic resistance coefficient 11 p1688 A66-22592
- dependence on Reynolds and Hartmann numbers in turbulent flow of conducting fluid through tube in magnetic field 11 p1743 A66-22337
- Turbulent heat transport coefficient of various fluids in pipes measured, obtaining formula from experimental data 11 p1688 A66-22592
- Clamping conditions effect on critical flow rate of fluid moving through pipe, taking into account direction and friction forces on stability 11 p1782 A66-22853
- Rate of effusion for gas flow through orifice and application to fluorine gas dissociation energy 11 p1688 A66-22880
- Hypersonic rarefied gas flow in short ducts, measuring wall static pressure and stream total pressure distributions 11 p1634 A66-22932
- Flow structure in initial length of MHD channel of square cross section, taking longitudinal magnetic field nonuniformities into account 11 p1747 A66-23301
- Heat transfer in turbulent flow of incompressible fluid in plane curved channel 11 p1694 A66-23317
- Turbulent channel flow, discussing friction flow anisotropy and homogeneity, vortex flow, channel viscosity, etc 12 p1860 A66-23532
- MHD duct flow under circular and radial magnetic field 12 p1920 A66-23954
- Eigenfunctions for laminar flow in porous two-dimensional channel subject to certain boundary conditions 12 p1862 A66-23994
- Flow parameters of incompressible ideal fluid in axisymmetric curvilinear channel, obtaining and solving nonlinear differential equation 12 p1863 A66-24243
- Larmor precession of charged particles effect on nonstationary temperature field in plane channel 12 p1922 A66-24361
- Critical Reynolds numbers for oscillating fluid in tube in region of laminar-turbulent transition 12 p1864 A66-24448
- Turbulent radial channel flow without swirl between parallel disks having both supersonic and subsonic regions, determining pressure distribution and normal shock [ASME PAPER 65-FE-11] 12 p1799 A66-24547
- Radial diffuser using swirl-free incompressible flow between narrowly spaced disks of radial channel and supply-pipe outlet [ASME PAPER 65-FE-12] 12 p1864 A66-24548
- Initial flow in entrance of straight circular pipe computed as refinement of Atkinson and Goldstein solution 12 p1867 A66-24980
- Pipeflow simulation by triggered monostable multivibrator driving chopper as logarithmic function generator 13 p2027 A66-25220
- Nonstationary two-dimensional channel flow of compressible electrically conducting fluid subject to traveling magnetic field 13 p2140 A66-25422
